“Now (at the end of February 1995) we are making about 50 kg of seitan per week by hand. We sell it in some 20 healthy food shops all over Slovenia.” He would like to start making tofu, soymilk, natto, and tempeh, Later he would like to make miso too. “Our aim is preparing 100% vegetarian foods of the highest possible quality, made from organically grown soybeans, wheat, and daikon. Now we need more information. Presently Mr. Trampus grows about 12,000 kg of wheat and 9,000 kg of soybeans per year. Prof. Spanring is our good friend. He helped Mr. Trampus to choose the best varieties of soybeans for making tofu and the wheat with the highest gluten content for seitan. Now we use hard winter wheat. We mill it into flour in our own mill with stones. From 100 kg of wheat flour we get about 23 kg of very dark brown seitan.

“Up until now, all of the starch has been rinsed by hand, but we have constructed an automatic rinsing machine which will be prepared for use very soon. We presently rinse using only warm water at about 30°C. We discard all the starch (putting it on compost heaps on the fields), but later we will use it as an ingredient in cooked soymilk puddings.”

Jan would like to order *The Book of Tempeh*. He is looking for a source of tempeh starter. Tempeh is largely unknown in Slovenia, but he would like to introduce it because it is a healthy food and tastes very good. Address: Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: (386) 068 59 481.

3789. Azevedo, Chris; Gallagher, Paul. 1995. Trends in Japan’s soybean market. Paper presented at a conference titled “Producing Soybeans for the Soyfoods Market.” 8 p. Held 2 March 1995 at Ames, Iowa. [6 ref]

• **Summary:** The pages and most tables in this report are unnumbered. One table shows per capita annual consumption (in lbs) of soybeans in selected Pacific Rim

countries in 1974, 1984, and 1994, as follows, in descending order of pounds consumed per capita in 1994: Indonesia: 9.2, 14.0, 23.2. South Korea: 21.4, 18.8, 20.1. Japan 11.0, 15.3, 16.7. North Korea: 11.8, 12.2, 11.2. Malaysia: 2.9, 5.2, 10.3. China: 14.7, 13.0, 9.7. Thailand: 1.2, 3.9, 3.9. Philippines: 0.4, 0.5, 0.8. Sources: (1) USDA; (2) U.S. Bureau of the Census, World Population Profile, 1994 and 1984; (3) Statistical Yearbook, Statistical Office of the United Nations, New York, NY.

Another table shows annual soybean consumption in million metric tons in 1974, 1984, and 1994, as follows, in descending order of amount consumed in 1994: China: 5.237, 6.193, 5.350. Indonesia: 0.546, 1.072, 2.105. Japan: 0.716, 0.830, 0.950. South Korea: 0.328, 0.358, 0.410. North Korea: 0.083, 0.109, 0.117. Thailand: 0.023, 0.092, 0.105. Malaysia: 0.015, 0.036, 0.090. Philippines: 0.007, 0.013, 0.025. Source: USDA.

A final table shows the amount of soybeans used (in thousand metric tons) in Japan, by product and total, each year from 1978 to 1993, as follows: Use of soybeans for tofu rose from 486 in 1978 to a peak of 531 in 1984, falling to 492 in 1993. Use for natto rose from 71 in 1978 to a peak of 109 in 1993. Use for miso rose from 182 in 1978 to a peak of 185 in 1980, falling to 173 in 1993. The total rose from 750 in 1978 to a peak of 927 in 1992, falling to 920 in 1993. Address: Iowa State Univ. Phone: 515-294-0160.

• **Summary:** Contents: Introduction. How miso is made. Good health helper. A little dab'll do ya. A color photo shows Savory adzuki beans and vegetables with miso. Address: Former Moosewood cook.

3791. **Product Name:** Soy Miracle Ultimate Shake (Chocolate Royale, Creamy Vanilla Almond).

Manufacturer's Name: FreeLife International.

Manufacturer's Address: 354 Woodmont Rd., Suite 5, Milford, Connecticut 06460. Phone: 1-800-882-7240.

Date of Introduction: 1995. March.

Ingredients: Ultra Soy Complex I (Trademark) {An exclusive blend of Supro brand soy protein isolate, soy fiber, soy lecithin, tofu powder, soy flour, tamari soy powder, miso powder, & Cholestatin (Trademark) (mixed soy phytosterols)}, crystalline fructose, complex carbohydrate (maltodextrin), Dutch cocoa powder, natural flavors, xanthan gum, oat fiber, calcium phosphate, magnesium oxide, potassium chloride, siberian ginseng, ascorbic acid, inositol, choline bitartrate, blue-green micro algae, L-carnitine, vitamin E acetate, Spanish bee pollen, apple pectin, citrus bioflavonoid, niacinamide, zinc oxide, invertase (plant enzyme), ferrous fumarate, D-calcium pantothenate, vitamin A palmitate, manganese sulfate,

pyridoxine hydrochloride, riboflavin, thiamine hydrochloride, bromelain, papain, folic acid, biotin, vitamin D-3, potassium iodide, chromium, picolinate, sodium selenate, sodium molybdate, cyanocobalamin.

Wt/Vol., Packaging, Price: 15 oz (240 gm).

How Stored: Shelf stable.

Nutrition: Per one level scoop (14 servings per container): Calories 95, calories from fat 0, total fat 0 gm (0% daily value; saturated fat 00 gm), cholesterol 0 mg, sodium 150 mg (6%), potassium 150 mg (4%), total carbohydrate 16 gm (dietary fiber 2 gm, sugars 10 gm), protein 10 gm. Vitamin A 100%, vitamin C 100%, vitamin B-1 100%, vitamin B-2 100%, vitamin B-6 100%, vitamin E 100%, niacinamide 100%, pantothenic acid 100%, folic acid 100%, biotin 100%, vitamin D-3 100%, vitamin B-12 100%, calcium 30%, phosphorus 20%, magnesium 20%, iron 25%, zinc 100%, iodine 100%. Percent daily values are based on a 2,000 calorie diet.

New Product-Documentation: FreeLife leaflet. 1995.

“FreeLife: Experience the incredible benefits of FreeLife’s exclusive Soy Miracle products.” “The cornerstone of the Soy Miracle Ultimate Body Program is the fat-free Ultimate Shake. The Ultimate Shake was specially designed to be a great-tasting source of many important nutrients needed to achieve optimal health and to help decrease excess body fat when used as part of the complete Soy Miracle Ultimate Body Program.

“Dr. Mindell’s exclusive formula, Ultra Soy Complex I, contains eight of the most powerful soy foods synergistically combined to create the ultimate nutritional shake. These soy foods include the world’s best soy protein isolate, soy fiber, soy lecithin, tofu powder, soy flour, tamari powder, miso powder, and mixed soy phytosterols. The Ultimate Shake also contains blue-green micro-algae, Siberian ginseng, Spanish bee pollen, and active enzymes [from the soy flour?] for better absorption.

“The Soy Miracle Ultimate Shake can be used as a complete meal replacement or healthy snack and provides 100% of the USRDA of all essential vitamins and most minerals. For maximum fat-loss results, replace one or two meals each day with a delicious Soy Miracle Shake and eat at least one well-balanced meal. Increase your daily physical activity and supplement your diet with FreeLife’s Soy Miracle Ultimate Antioxidant and Ultimate Body Toner.”

Label for Chocolate Royale sent by Carolyn Ashman of Napa, California. 1995. May 15. She is a FreeLife distributor. Phone: 707-259-9459. “Directions: As a dietary supplement, add one level scoop (scoop included in can) of Soy Miracle Ultimate Shake (TM) to 8 fl. oz. of skim milk or Westsoy nonfat soy milk and blend or shake until smooth. For best flavor, milk should be very cold. For maximum results” the shake should be used together with

the two other products in this line and “the complete Soy Miracle Ultimate Body Program (TM).”

Talk with Luke Taffuri, Vice-President of Operations, FreeLife International (354 Woodmont Rd. #5, Milford, Connecticut 06460. Phone: 1-800-882-7240). 1995. May 30. To buy these products, you must be sponsored by a distributor. Cost: \$61.25 for all 4 products incl. shipping. Each can of shake is \$18.55. Antioxidant is \$19.60. Body toner is \$18.55. How much genistein is in these products? If each day you take one serving of a shake and two antioxidant pills plus two body toner pills, you will get 20 mg/day of genistein, plus 16-17 mg/day of daidzein. These products were introduced on 1 Feb. 1995, at the same time as Dr. Mindell's book became available. The company, FreeLife, was started in 1995.

Talk with Karma McLleskey of Fairfax Station, Virginia. 1995. Aug. 18. Luke Taffuri runs the computers at Freelif. The people who know the most about the products are Ray Faltinsky (president) and Kevin Fournier (vice president).

3792. Furuhashi, Hideki. 1995. Japanese soyfoods markets. Paper presented at a conference titled “Producing Soybeans for the Soyfoods Market.” 9 p. Held 2 March 1995 at Ames, Iowa.

• **Summary:** This paper consists of nine very interesting statistical tables, one on each page. Table 1 shows the supply and demand for soybeans in Japan from 1984 to 1992 (in tonne = metric tons). The supply of Japanese-grown soybeans decreased from 126,000 tonnes in 1984 to a low of 73,000 tonnes in 1992, and imports increased from 4,401,000 tonnes in 1984 to 4,725,000 tonnes in 1992. The demand for soybeans from crushers has stayed about steady, ranging from a low of 3,428,000 tonnes in 1991 to a high of 3,928,000 tonnes in 1985. Demand for food uses has increased from 786,000 tonnes in 1984 to a high of 927,000 tonnes in 1992 (up 18%). Demand for use as feed has increased from 55,000 tonnes in 1984 to 95,000 tonnes in 1992.

Table 2 shows soybean utilization in Japan by type of food product from 1987 to 1994: Use of soybeans for tofu and aburage stayed about steady at 498,000 tonnes, by far the largest food use. Use for miso decreased slightly from 180,000 tonnes in 1987 to 170,000 tonnes in 1994. Use for natto grew strongly from 97,000 tons in 1987 to 110,000 tonnes in 1994. Use for kori-tofu (dried-frozen tofu) grew slightly from 29,000 tonnes in 1987 to 30,000 tonnes in 1994. Use for soy sauce grew strongly from 5,350 tonnes in 1987 to a record 25,300 tonnes in 1992, dropping slightly to 23,000 tonnes in 1994. Use for soymilk decreased slightly from 4,000 tonnes in 1987 to 3,100 tonnes in 1994. Total use of soybeans for food in Japan grew slowly from 875,350 tonnes in 1987 to 930,000 tonnes in 1994 (up 6%).

Table 3 shows Japanese population and per capita consumption of soyfoods from 1982 to 1992. Population

grew from 103,720,000 to 124,452,000 during this period, while per capita consumption grew from 6.8 to 7.4 kg/capita (up 8.8%).

Table 4 shows per family expenditures and consumption per year on tofu, natto, miso, and soy sauce from 1982 to 1992. For example, expenditures on tofu increased from 2,535 yen in 1982 to 7,992 yen in 1992, while consumption fell from 87.98 cakes to 79.26 cakes. Thus in 1992 the average Japanese family consumed 1 cake of tofu every 4.6 days.

Table 6 shows imports of soybeans for food from the USA, Canada, and China from 1982 to 1992. Imports from the USA are subdivided into IOM, Beeson, and other identified varieties. In 1992 about 88.7% of food-grade soybeans imported to Japan from the USA were IOM. Moreover, of all these soybeans imported for food use in 1992, about 76.6% came from the USA, 21.5% from China, and 1.85% from Canada.

Table 6 shows the amount spent per capita by people of different 5-year age-groups on four soyfood products. The average person in the age 60-64 year group spent ¥2,976 on tofu, ¥1,539 on miso, ¥1,490 on soy sauce, and ¥1,098 on natto. The average person in the age 30-34 year group spent ¥1,581 on tofu, ¥603 on miso, ¥508 on soy sauce, and ¥708 on natto.

Table 7 shows the source of soybean used to make four soyfood products in 1984, 1990, and 1992. In 1992, of the 498,000 tonnes of soybeans used in tofu and aburage in Japan, 74.8% of the soybeans were IOM from the USA, 6.0% were Beeson (USA), 8.0% were other U.S. varieties, 3.0% were from China, and 8.0% were grown in Japan. Of the 30,000 tonnes use to make dried-frozen tofu, 86.7% were IOM and the rest were from China. Of the 108,000 tonnes used to make natto, 55.5% were from the USA and Canada, 39.8% were from China, and 4.6% were grown in Japan. Of the 176,000 tonnes of soybeans used to make miso, 88.0% were from China, 5.7% were white-hilum beans from the USA, and 6.25% were grown in Japan.

Table 8 shows that production of soybeans in Japan from 1982 to 1994 has decreased sharply. In 1982 some 262,300 tonnes were produced on 147,000 ha with a yield of 1,782 kg/ha. In 1994 some 98,800 tonnes were produced on 26,500 ha with a yield of 1,620 kg/ha.

Table 9 is two charts showing the distribution system for (1) Imported soybeans from suppliers to end users, and (2) Domestic soybeans from farmer to end users. Farmers sell to the Zenno Nokyo or a collector. Address: Mitsui & Co. Phone: 515-294-0160.

3793. Golbitz, Peter. 1995. Traditional soyfoods: Processing and products. *J. of Nutrition* 125(3S):570S-572S. March. Supplement. First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease. [9 ref]

• **Summary:** Contents: Introduction. Soymilk. Tofu. Tempeh. Miso. Soy sauce. Address: Soyatech, Inc., Bar Harbor, Maine 04609. Phone: 360-379-9544.

3794. **Product Name:** Hot Mama's Large Garden Tofu Ravioli.

Manufacturer's Name: Hot Mama's Ravioli, Etc.

Manufacturer's Address: 1485 Gericke Road, Petaluma, CA 94952.

Date of Introduction: 1995. March.

Ingredients: Tofu, spinach, onions, carrots, garlic, miso, spices, salt, pepper.

Wt/Vol., Packaging, Price: 16 oz. paperboard box. Retail for \$5.99 (3/95, California).

How Stored: Frozen.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1995. March. Paperboard box. 11 by 7¼ by 1 inch. Green and red on white. "Egg free. Dairy free. Oil free. No preservatives added. Carry flat. 24 ravioli."

3795. Iowa State University. 1995. Producing soybeans for the soyfood market: Conference schedule and registration (Leaflet). Ames, Iowa. 6 panels.

• **Summary:** On Thursday, 2 March 1995, Iowa State University held a 1-day conference titled "Producing Soybeans for the Soyfoods Market" at the Holiday Inn Gateway Center, Ames Iowa. No proceedings were published. Schedule: Wednesday evening: Tour of Iowa State University's Pilot Plant and Center for Crops Utilization and Research. Soyfoods tasting reception follows at the Holiday Inn Gateway Center for conference registrants. Thursday. Morning session: Markets, trade, and policy. 8:30 a.m.–Welcome and introductions, by Lester A. Wilson. 9:00–Japanese soyfoods markets, by Hideki Furuhashi, Mitsui & Co. 9:45–Growth potential for soyfood beans in Asian markets, by Lester A. Wilson. 10:30–Break. 10:45–U.S. participation in soyfoods markets in the Pacific Rim, by Robert Neal, Agri-Grain Marketing. 11:30–Trade policy changes and opportunities, by Paul Gallagher. 12:15–Lunch. Afternoon session: Soybean varietal effects on soyfood quality. 1:30 p.m.–The effect of varietal characteristics on perceived soyfood quality, by Keisuke Kitamura, Chief, Legume Breeding Lab, MAFF [Ministry of Agriculture, Forestry and Fisheries], National Agricultural Research Center, 3-1 Kannondai, Tsukuba, Ibaraki 305, Japan. 2:15–Soybean breeder panel discussion, with Keisuke Kitamura, Walter Fehr (ISU), Dennis Strayer (Strayer Seeds), Tom Brumm (MBS Seeds), Clark Jennings (Pioneer Hi-Bred Intl.), Jerry Lorenzen (FTE Genetics). 2:45–ISU research presentations: (1) Soybean varietal and storage effects on tofu processing–Pilot plant study, by Lester A. Wilson and Patricia Murphy. (2) Rapid quality testing with near-infrared whole grain analyzers, by Charles

Hurburgh. 3:30–Break. 3:45–Health benefits of soyfoods, by Mark Messina (American Soybean Association health consultant); Isoflavones in soybeans and soyfoods, by Patricia Murphy (ISU Dep. of Food Science and Human Nutrition). 5:00 p.m.–Closing comments and questions.

Conference sponsors: Midwest Agribusiness Trade Research and Information Center (MATRIC, Iowa State Univ.). Center for Crops Utilization Research (ISU). Utilization Center for Agricultural Products (UCAP, ISU). Iowa Soybean Promotion Board. MSGA/MSPRC (Minnesota Soybean Growers Assoc. / Minnesota Soybean Research & Promotion Council). Registration fee: \$100 before Feb. 15, or \$125 thereafter.

A five-page directory of the 74 attendees is attached. Address: Ames, Iowa.

3796. Northrup King. 1995. Corporate corner: Specialty soybeans offer farmers profitable alternatives without yield sacrifices. *ASA Today (St. Louis, Missouri)* 1(5):4. March.

• **Summary:** At Northrup King edible soybeans combine specialty traits with top-notch yields. "Unlike many edible soybeans, Northrup King varieties are developed first for yield, then for specialty traits such as yellow hila, seed size, and high protein content." John Thorne, director of breeding for Northrup King, says: "We recognize that even though these food-grade soybeans may capture a premium price, our customers can't afford to sacrifice yields."

3797. Ontario Soybean Growers' Marketing Board. 1995. Technical soybean mission: Japan, Hong Kong, Malaysia, Singapore. March 10-26, 1995. Chatham, Ontario, Canada. 23 p. 28 cm. [Eng]

• **Summary:** Contents: Participating members: Dr. Karen Lapsley, Mr. Ron McDougall, Mr. Michael Loh, Mr. Doug Jessop (food technologist and tofu expert, Harrow Research Station), Mr. Kim Cooper (marketing specialist, OSGMB). Note: This is the first Canadian soybean mission in which a food technologist (Doug Jessop) participated. Background. Mission objectives. Acknowledgements. Mission details–Japan: Canadian embassy.

Japan Miso-Co-op Industrial Association: Japan imports about 250,000 tonnes {metric tons} of soybeans from China each year, and about 150,000 tonnes of that amount is for the miso market. The remaining miso soybeans come from Canada, USA, and Japan. The best soybean for making miso comes from the Hokkaido area of Japan. It is a large, white hilum type, perhaps Toyomasuri. Generally the larger the soybean the better for making miso. Japanese miso makers need two types of soybeans from Canada: (1) Normal SQWH (Special Quality White Hilum); average values for color, taste and texture are acceptable though higher values would be preferable; (2) High Premium Soybeans; they would consider paying a premium for better color, taste, and texture.

Azuma Natto Foods Co. Ltd.: This natto company uses 7,000 tonnes/year of soybeans making them the third largest natto maker in Japan. They use 65% USA, 25% Japanese, and 15% Canadian soybeans. There are four sizes of natto: Small natto < 5.5 mm accounts for 72% of the natto market in Japan; Large natto, 5.5 to 6.2, account for 18%. Extra large natto > 8.5 mm account for 18%. Split seed natto account for 10%. Factors in assessing the suitability of soybeans for natto are: Fat content should be less than 19%. Total sugars—Group 1 contains sucrose, fructose, and glucose, group 2 contains raffinose and stachyose. Calcium affects the hardness or softness of natto. The ideal range is 180-250 mg/100 gm. Sanwa Company—Tofu manufacturer.

Wed., March 15—Japan Tofu Association: There are over 20,000 tofu makers in Japan, and 53 of these are members of this association, with half of the 53 being in the Tokyo area. Only 185 tofu manufacturers in Japan have 30 or more employees. Tofu makers consider there are two types of organic soybeans: true organic and semi-organic. The association imports about 2,000 tonnes of each type from the USA; they are OCIA certified.

Home Foods Company Ltd. uses 4,000 metric tons of soybeans a year, mostly a blend of 70% Chinese white hilum and 30% U.S. white hilum. The soys from the USA are I.O.M. soybeans, especially the “High Super” variety. For the more premium market they use a blend of 50% Japanese soys and 50% Harovinton soybeans. They have also just started blending 50% Chinese and 50% Canadian white hilum soybeans. The two most important criteria for their soybeans are high protein and high total sugars. Sugar levels of Chinese soybeans (24-25%) are higher than those of Canadian soybeans (23-24%).

Thursday, March 16—Takeya Miso Co.: Ikuo Fujimori, President. Takeya has two plants employing 100 production workers and using 5,000 to 6,000 tonnes of soybeans yearly. 70-80% of their products are sold in supermarkets. For years they have been using the U.S. soybean variety Kanrich.

Nagano Chushin Agricultural Experiment Station: They have been breeding soybeans since 1957 and in that time have developed and released 17 varieties, the most famous being Enrei. The staff of 34 includes 5 soybean breeders. Dr. Nobuo Takahashi has been breeding soybeans for over 18 years. Japan has domestic soybean area of 370,500 acres (150,000 ha); it is decreasing, so imports are increasing.

Nagano Miso Industrial United Co-operatives: This group consists of 8 local co-ops made up of 160 miso manufacturers, who pay a fee to this group based on sales. There was a detailed discussion of the types of sugars in soybeans necessary for good miso.

Friday March 17—National Food Research Institute. Tsukuba is developing into a science research park, now containing over 200 different research institutes. NFRI, originally founded in 1934 as the Rice Institute, moved to

Tsukuba from Tokyo in 1973. Thirty years ago, all tofu in Japan was made with Japanese soybeans. Dr. Toshiro Nagai spoke about natto: In 1992 the natto needs of Japan were met by soybeans from China (45%), USA (38%), Canada (17%), and Japanese domestic (8%). Natto consumption has increased by about 10% for each of the last few years. Dr. Sayuki Nikkuni spoke about miso: In 1992 the miso needs of Japan were met by soybeans from China (87%), USA (6%), Japan (6%), and Canada (1%). Dr. Kaoro Koyama spoke about tofu: In 1992 the soybeans for tofu totaled 490,000 tonnes and came from USA (390,000 tonnes; 80%), Canada (50,000; 10%), Japan (20,000; 4.1%), China (20,000; 4.1%), and South America (10,000; 2.0%).

Asahi Food Processing Co. Ltd. This plant, which has 350 employees and operates 365 days/year, was established in 1972 and produces tofu, fried tofu, natto, noodles, and juices. They use 15 tonnes of soybeans daily or 4,900 tonnes/year, of which 38.8% are grown in Japan and the remaining 61.2% are IOM from the USA. Each day they make 120,000 cakes of tofu, 100,000 pieces of fried tofu, and 20,000 packages of natto. Most of the soybeans they use in production are dehulled. They use about 500 tonnes/year of OCIA certified soybeans from the USA and some semi-organic soybeans from Japan. The prices they pay per kg of soybeans are: IOM 30-40 yen; Vinton, identity preserved varieties, and Harrovinton [Harovinton] 100 yen; organic 120-140 yen; Enrei (Japanese) 400 yen.

Saturday, March 18—Hong Kong. Canadian High Commission. Canada Packers (Hong Kong) Ltd.

Monday, March 20. Shenzhen Economic Zone: This area of 30 square km, just outside the Hong Kong border, contains 1 million people or 60% of the provincial population, all of whom require a special permit to work in the area. This economic zone is booming, basically due to spiralling costs in Hong Kong, where many businesses and factories are closing and moving to this area, where land and labor costs are much lower.

Shenzhen Vitasoy (Guang Dong) Foods & Beverage Co. This plant, which is only one year old, produces a major share of the soymilk for Hong Kong. They are able to import soybeans at a low tariff rate because they ship the majority of their finished products back into Hong Kong. The plant uses Canadian SQWH (Special Quality White Hilum) soybeans, but has problems with uneven seed size. They presently receive the soybeans in 45 kg jute bags, but would prefer strong 45 kg poly-lined paper bags. A small percentage of dairy milk is mixed with the soymilk, which is thought to improve its texture and taste.

Tuesday, March 21. Dah Chong Hong, Ltd. This was the first company to import Canadian soybeans for food use in the early 1970s. Dah Chong pointed out that Ontario soybeans were experiencing increasing competition from Quebec soybeans, especially in the past two years. The Quebec soybeans are 5-10% less expensive, due to lower

basis levels, lower freight costs, and being more aggressive in a new market. Their quality is similar to Ontario, though the seed coat color is somewhat darker. There are about 50 tofu makers in Hong Kong, 10 larger size and 40 smaller size, although there is not a large difference in size. Consumers believe that packaged tofu is not as fresh as that purchased fresh daily from local markets.

Amoy Food Ltd. (Dr. Alain Butler; This plant makes soy sauce and other sauces used in cooking. They use only Canadian soybeans, the Maple Glen variety from Quebec). Wed., March 22. The group visited Hung Tao Soya Bean Products Pty., a traditional Hong Kong tofu and soybean sprout plant in the New Territories.

Thursday, March 23—Malaysia. Canadian High Commission. Yeo Hiap Seng (Malaysia) Berhad (Contains excellent details on the company). Chop Lee Kit Heng Sdn. Bhd. (A soybean trader selling to end users in Malaysia).

Friday, March 24—Singapore. Canadian High Commission. Yeo Hiap Seng Ltd. (Singapore). Meeting with nine tofu manufacturers in Singapore. (The name of each company is given. There are 40 tofu makers in Singapore, and the majority now use Canadian soybeans. Tofu growth in the last 5 years has been very rapid and competition is fierce). Asia Corporation Pte. Ltd. (This company accounts for about 70% of the soybeans imported into Singapore and Malaysia. They first brought Canadian soybeans into the area in 1978). Canadec Private Ltd. Sing Yeap Trading Pte. Ltd.

Saturday, March 25—Unicur Food Company Pte. Ltd. (Mr. Goh gave a tour of his facility and discussed his plans for a new plant in late 1995). Yam Thye & Co. (Warehouse).

Encore Ltd.: Sylvia B. Hollenstein, managing director. This company, based in Switzerland, uses Swiss technology to produce soy yogurts, chocolates, and noodles in Switzerland from Chinese soybeans—mostly for the taste. The products are shipped from Switzerland to the company's 3 retail stores in East Asia; they plan to expand to 10 retail stores by the end of 1995.

Appendixes A through J, issued as a separate document, contain extensive and detailed information and some published documents related to the technical mission. Address: P.O. Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

3798. Fujimori, Ikuo. 1995. Canadian soybeans for miso manufacturing in Japan. *Canadian Export Soybeans (OSGMB, Chatham, Ontario, Canada)* 8(1):1. April.

• **Summary:** "I have been using Canadian soybeans constantly since 1975, which I first tested soybeans from Ontario. I chose the variety 'Harwood' because of its large size, white hilum, and high sugar content... These first soybeans were bagged shipments in containers, and now we receive the soybeans in bulk containers.

"In 1978 I visited soybean growing areas in Ontario. I found a new variety "Harcor" to be one of the better varieties for miso making... The majority of the Ontario soybeans purchased are SQWH (Special Quality White Hilum), namely mixed varieties of white hilum soybeans. At the same time we have bought some 'IP' (Identity Preserved) varieties in limited quantities."

"In the 1980s, I joined with four soybean missions to Canada, sponsored by the governments of Canada and Ontario, and also by the Ontario Soybean Growers' Marketing Board (OSGMB). I gained much information and knowledge about Ontario soybeans. I was impressed by the co-operative system between the OSGMB, the governments of Canada and Ontario, the soybean producers and the industry personnel involved. I was also impressed by the work of keeping quality standards by the Canadian Grain Commission, and by the study of developing new soybean varieties for food use at the Harrow Research Station. Using Canadian soybeans, I found the quality rather stable compared to Chinese soybeans. That is a big advantage for miso manufacturing."

In December 1994 the Japanese Miso Manufacturers Association visited Ontario. As of 1995 "the quality of Chinese soybeans seems unstable and their ability to supply is fluctuating. Therefore many miso makers are now thinking of using Canadian and American white hilum soybeans instead of Chinese soybeans."

A photo shows Mr. Fujimori, Fred Brandenburg of OSGMB, and Elmer Buchanan (Ontario Minister of Agriculture).

Note: This bi-annual newsletter was formerly titled *Ontario Export Soybeans*. Formerly 2 pages, green on yellow, it is now 4 pages, dark green and brown on tan. Address: President, Takeya Miso Co., Nagano, Japan.

3799. Lowe, James M. 1995. Testing at the Canadian Grain Commission. *Canadian Export Soybeans (OSGMB, Chatham, Ontario, Canada)* 8(1):2-3. April.

• **Summary:** "Canada has long been recognized internationally as a producer and supplier of high quality grains... For over 25 years the Canadian Grain Commission (CGC) has monitored shipments of Canadian grains, including soybeans, for a variety of compounds that might pose a risk to the health of animal and human populations." Today the CGC tests for over 70 pesticide residues, 10 mycotoxins (including aflatoxins), and "heavy metals."

A photo shows members of the Japanese Miso Manufacturers Association examining grain samples at the CGC office in Chatham, Ontario. Address: Regional Manager, Canadian Grain Commission, Chatham, Ontario, Canada.

3800. **Product Name:** Cold Mountain Fermented Black Bean Paste [Regular, or Dehydrated].

Manufacturer's Name: Miyako Oriental Foods, Inc.

Manufacturer's Address: 4287 Puente Ave., Baldwin Park, CA 91706.

Date of Introduction: 1995. April.

Ingredients: Black soybeans, rice, salt, water, *Aspergillus oryzae*.

New Product–Documentation: Portfolio sent by Terry Shimizu of Miyako Oriental Foods. 1999. Nov. 22. Talk with Terry Shimizu. 1999. Nov. 29. The regular product was introduced in April 1995, and the freeze-dried form in June 1996.

3801. *Ontario Soybean Growers' Marketing Board Newsletter*. 1995. Producing soybeans for the soyfood market. April. p. 3.

• **Summary:** In early March, 1995, Iowa State University conducted a seminar titled "Producing Soybeans for the Soyfoods Market." Topics covered included an introduction to soyfoods (complete with tasting at Iowa State's Center for Crops Utilization Research facility), a review of Japan's soyfoods market, trade policy changes and challenges, quality assessment, and the effects of varietal characteristics on soyfood quality.

Speaking on Japan's soyfoods market, Hideki Furuhashi of Mitsui & Co. reported that consumption of tofu and natto is increasing slowly in Japan, while miso and soy sauce are decreasing. China has been supplying Japan with 250,000 to 300,000 tonnes/year of soybeans, mainly for making miso and natto. Japan imports between 120,000 and 130,000 tonnes/year of identity preserved soybeans, up from 100,000 tonnes 5 years ago. For example, 50,000 tonnes of Vinton were imported in 1994.

Bradley Hildebrand of Cargill in Minneapolis, Minnesota, reported that the U.S. exports about 130 million bushels/year of soybeans to Japan. About 30 million bushels (23% of the total) are used to make soyfoods. Most of the soybeans used for soyfoods in Japan are "IOM" beans because they are grown in Indiana, Ohio, and Michigan. IOM soybeans are not any specific variety or hilum color, but they are generally higher in protein and better in quality than other U.S. soybeans. They trade at a premium of 10-20 cents per bushel over other U.S. soybeans in Japan. IOM soybeans are traded on the Japanese grain exchange. For shipment to Japan, IOM soybeans are railed to Baltimore (Maryland) or Norfolk (Virginia) for shipment via panamax size vessels. They may also be railed to Mobile (Alabama) or New Orleans (Louisiana) for vessel shipment.

Hildebrand reported that IOM soybeans will keep the largest market share due to their low price, however there is a market for variety soybeans. He said that Vinton is the most popular variety for making tofu in Japan, but it does not yield high enough in the field to make it price competitive. "He suggested that breeders need to develop a high-yielding soybean with Vinton's tofu-making

characteristics. However he said the market for variety soybeans is not huge and is easily flooded." Address: Box 1199, Chatham, ONT, Canada N7M 5L8. Phone: 519-352-7730.

3802. Slavin, Joanne L. 1995. Health benefits of soy fiber: A quick taste. *Soy Connection (The) (Chesterfield, Missouri–United Soybean Board)* 3(2):1, 4. Spring. [9 ref]
• **Summary:** The insoluble dietary fiber content in ½ cup of various soyfoods is as follows: Soybeans (raw/uncooked) 12.0 gm, soy meal [soy flour] 7.0 gm, miso 3.9 gm, soy milk 1.3 gm, tofu (raw) 0.6 gm.

Soy fiber is also isolated and used as a food additive. Different companies produce various types of soy fiber, but most of the published research is on soy polysaccharide, which contains 75% total dietary fiber (TDF) including a mixture of cellulosic and noncellulosic structural components of the internal cell wall. Soy polysaccharide is mostly insoluble dietary fiber, but clinical studies have shown it has properties of both insoluble and soluble dietary fiber. Soy polysaccharides, like other insoluble fibers, increases stool weight.

There is considerable evidence that intake of fiber-rich foods is inversely related to risk of cancers in the colon and rectum. It is estimated that the risk of colorectal cancer could be reduced by about 31% if fiber intake were increased by 13 gm/day.

"Dietary fiber has also been shown to be effective in lowering serum cholesterol. It may decrease risk of coronary heart disease by decreasing serum lipids, lowering blood pressure, improving glucose metabolism, and aiding weight maintenance. Soluble fibers appear most effective in lowering serum cholesterol" but they are only effective in subjects with elevated cholesterol levels.

"Potential negative effects of dietary fiber include lower absorption of vitamins, minerals protein and calories. It is unlikely that healthy adults who consume fiber amounts within the recommended ranges will have problems with nutrient absorption."

"Soy fiber appears to be extremely fermentable in human subjects, with 93% of the dietary fiber as soy polysaccharide being fermented... Fermentation of dietary fiber produces gas and short chain fatty acids, one of which, butyrate, appears to play an important role in cancer prevention."

"Compared with other fiber sources available as supplements for food, soy fiber provides a range of positive functional, nutritional, and physiological effects. Soluble fibers, such as gums and pectins, lower serum cholesterol but are difficult to incorporate into foods and are not palatable. Insoluble fibers, such as wheat bran or cellulose, are effective in the prevention and treatment of constipation, but are difficult to consume on a long term basis. Soy polysaccharide has found wide acceptance as a

supplemental fiber source and is added to hospital nutrition products, breads, and other baked products, including muffins, cookies, and crackers.” Address: Prof., Dep. of Food Science and Nutrition, Univ. of Minnesota, St. Paul, MN.

3803. Walker, Morton. 1995. Concentrated soybean phytochemicals. *Healthy & Natural Journal* 2(2):58-60. April. [12 ref]

• **Summary:** Contents: Introduction (Designer Foods Symposium III). Cancer inhibitors in soybeans. Prostate cancer cured by fermented soybean drink (Haelan 851). The therapeutic characteristics of Haelan 851. Note: The address, phone number, and fax number of Haelan Products Inc. in Metairie, Louisiana, is given.

Soybeans contain five different types of anti-cancer agents: protease inhibitors, phytate, phytosterols, saponins, and isoflavones. The latter are plant estrogens with strong inhibiting effects in hormone-related malignancies such as prostate, ovarian, cervical, and breast cancers. Isoflavones are found in a variety of soy foods, including soy milk, tofu, tempeh, miso, textured vegetable protein, soy flour, soy nuts, and soybeans. “The isoflavone component which most excites the medical research community is genistein. It’s an overpowering suppressor of the oncogene enzymes that ordinarily stimulate pathological cell growth.” Address: Medical Journalist, 484 High Ridge Road, Stamford, Connecticut 06905-3020.

3804. Shimizu, Teruo. 1995. Recent developments at Miyako Oriental Foods (Interview). *SoyaScan Notes*. May 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Miyako’s miso business is growing rapidly. They can no longer keep up with demand. This summer Miyako plans to triple its production volume. They hope to buy another plant nearby and make miso in both their current plant and at the new location. Note: As of Feb. 1994 Miyako reported that it was making 2.2 million lb/year of miso.

In 1982 Miyako started importing freeze dried miso and spray dried miso from its parent company in Japan. But the high cost of Japanese imports resulting from the steady decrease in the value of the U.S. dollar has led Miyako to develop its own freeze-dried product in California. They are working with Mercer Processing Inc. in Palo Alto, which does the freeze drying. Later, they plan to use this freeze-dried miso to formulate other products, such as instant miso soups.

In addition, they plan to develop a spray-dried miso (which is lower quality and less expensive, and contains maltodextrins).

Miyako has started getting my enquiries for products from companies in Canada and Mexico because of NAFTA. Address: Vice President, Miyako Oriental Foods Inc., 4287

Puente Ave., Baldwin Park, California 91706. Phone: 818-962-9633.

3805. Liu, Keshun; Orthoefer, Frank; Thompson, Keith. 1995. The case for food-grade soybean varieties. *INFORM (AOCS)* 6(5):593-96, 598-99. May. [10 ref]

• **Summary:** Contents: Introduction. Food beans vs. oil beans. Traditional soyfoods: Soymilk, tofu, toasted full-fat soy flour [kinako], soy sprouts, soy sauce, miso, tempeh, natto. Soy protein ingredients: Soy grits and flour, soy protein concentrates, soy protein isolates. Soyfood nutrition. Current size of food bean market. Breeding of food beans. Conclusions.

“Oil/meal beans include all the commonly produced soybeans.” The oil is typically used for food and the meal for livestock feed. However the “new varieties of food soybeans” are generally exported to countries in East Asia for preparation of Oriental soyfoods. Table 3 compares food and oil beans. Seed size: Large vs. small to large. Seed uniformity: High vs. no preference. Hull color: White-yellow vs. yellow. Hull quality: Thin, firm vs. no preference. Hilum color: Clear to buff vs. clear to blank. Protein content: High vs. medium to high. Oil content: Low to high vs. high. Cleanliness: U.S. Grade 1 or better vs. any grade. Major applications: Tofu, soymilk vs. oil, defatted meal.

In addition to their use in making traditional soyfoods, the “new food-grade varieties,” especially those with high protein content, have been marketed for preparation of toasted full-fat soy flour, defatted soy flour, and soy protein concentrates and isolates.

Photos show: (1) Keshun Liu, Frank Orthoefer, and Keith Thompson. (2) Color and size comparison of soybeans for food use and those intended for crushing (color). The “food beans” are larger than the “oil beans.”

Note: This is the earliest English-language document seen (July 2001) that contains the term “oil beans” or the term “oil/meal beans,” both used in contrast to “food beans” or “food soybeans.” This is also the earliest English-language document seen (July 2001) with the term “food-grade” (or “food grade”) used in the title to refer to soybeans or soybean varieties. Address: 1. Project Leader, Soyfood Lab., Jacob Hartz Seed Co. Inc., 901 N. Park Ave., Stuttgart, Arkansas 72160; 2. Vice President for research and development, Riceland Foods Inc., P.O. Box 927, Stuttgart, AR 72160; 3. Vice president, International Soyfood Sales, Jacob Hartz Seed Co.

3806. Lazzaro, Don. 1995. History and current status of soymilk in Australia (Interview). *SoyaScan Notes*. June 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ceres Natural Foods is their holding company and Pureharvest is their trading name. They made this name change in 1982 since they found the word Ceres was

difficult for many people to pronounce. The first soymilk they imported to Australia was made by Saniku in Japan and imported from Mitoku.

Don is interested in macrobiotics. In early 1979 he took over the running of a small macrobiotic and natural foods retail store in Melbourne named Ceres Wholefoods. The only way he could make it viable was to try to buy at better prices, so in April 1979 he started a wholesale and import company, which he named Ceres Natural Foods, also in Melbourne. There was a company named Real Foods (run by Michael Pels) in New South Wales, Australia, that was importing, through Mitoku in Japan, tamari, soy sauce, miso, tofu, etc. Real Foods was the first company in Australia to import foods from Mitoku in Japan.

Don knew Michael from when they both used to live in Sydney in about 1978. Michael purchased some rice cake machines (the same kind used by Chico-san) through Mitoku from Airin Co. These machines were very poorly engineered and constructed. Michael has already sold 168 of these machines to Quaker.

When Don took over the Ceres Wholefoods retail store in 1979, he approached Michael and asked to be the distributor in Victoria of the food products Michael was importing from Japan through Mitoku. Michael said okay, and Don began distributing. Don asked Michael to import some soymilk from Mitoku, which he did in mid-1980. The stick-on label over the Japanese label said Ceres Natural, in Choc-Malt and Natural flavors. But the first soymilk in Australia was imported from Japan in about 1977-78, through Muso by 3-4 health food stores named Russel's; it was made by Marusan in a stand-up plastic pouch. Not much of it was sold. In about 1980-81, Michael decided to get out of the whole import business in order to focus on making rice cakes. So Mitoku Mr. Kazama and Chris Dawson asked Don to become their importer in Australia. Don also ran a 3rd company, a center that provided information and advice on macrobiotics.

Jim Wilson, who was running Spiral Foods in Australia, had been importing from Mitoku. He convinced Mitoku not to sell to Don, his competitor; Mitoku agreed. Mitoku then approached Saniku, and in about 1981 Don began importing soy milk made by Saniku through Mitoku. Don sold it under the same label he had used before. The Muso started to import some soymilk packaged in Tetra Brik cartons through Spiral Foods. Don got the same product from Kibun, and on it began to use the name Pureharvest.

In short: Four companies pioneered in importing soymilk to Australia: Real Foods, Russel's, Spiral Foods, and Ceres Natural Foods. There was also a little relatively beany Chinese soymilk sold in the ethnic Chinese market. Ceres, as a result of its Tetra Brik package, managed to get fairly good distribution into the grocery / supermarket trade, starting in late 1983 or early 1984. By this time Ceres was by far the biggest seller of soymilk in Australia. They were

importing five 20-foot containers per month of the Kibun soymilk product. Ceres was actively promoting this soymilk, doing trade shows, etc.

In 1986 Ceres was approached by a small soymilk maker named Australian Natural Foods (ANF) in Sydney; basically they had old machinery and were in trouble. They approached Don asking if they could make a soymilk for him. They worked out an exclusive deal and formula, and in Nov. 1986 Ceres launched this as Aussie Soy in its first 1 liter package, in Tetra Brik. Sales shot up. It was trucked in a dairy tanker to Bon Lait in Victoria (almost 1,000 miles away) where it was packaged in a dairy that had a Tetra Brick packaging machine. In about 1990-91 ANF first got its own Tetra Brik packaging machine. That same year ANF launched its own soymilk product, named So Natural, to compete with Sanitarium's So Good. It is made from whole soybeans, and is very similar to the Aussie Soy product that have long made for Don.

As early as 1980 Sanitarium Foods was importing Soyolac in tins / cans. They sold it mostly to Seventh-day Adventists through their own retail stores. Then in April 1987 Sanitarium Foods launched their own So Good soymilk (made from a blend of soy protein isolates, made and packaged by dairy companies) in Australia. They went into it in a big way, with a national campaign. It was the best thing that ever happened to Don and Ceres, because this campaign grew the market dramatically. By April 1987 Ceres was selling 10,000 cartons / month of their Aussie Soy, not including their Japan imports. One year later the figure had skyrocketed to 60,000 cartons / month, increasing to 152,000 on year after that.

Nevertheless, according to the *Australian Grocery Industry Marketing Guide* (1995), Sanitarium has 71% of the dairylike (unflavored) Australian soymilk market, followed by Vitasoy at 7% (they launched in about 1991, and have done a very aggressive marketing campaign), then So Natural (made by ANF) at 5%, Sun Gold at 5%, and Aussie Soy at 4-5%. Of the total Australian soymilk market, flavored soymilks account for only about 5% of the total; the remaining 95% is dairylike; its a milk alternatives market. Each of the three major supermarket chains in Australia (Woolworth's Safeway, Franklin's, and Cole's) has its own soymilk brand. Franklin's has an isolate soymilk made by ANF, starting about a year ago. Sun Gold, made by Associated Dairies of New South Wales, is almost identical to So Good, made by the dairy company that used to mix Sanitarium's product. In about 1990 Sanitarium set up their own soymilk mixing and packaging factory.

Today the soymilk retail market in Australia is \$45 million, with a population of only 17 million people. This is huge on a per capita basis. This market has three main segments: (1) Middle class, educated, with some allergies—70%. (2) Age 50 and older, concerned with cholesterol—20%. (3) Natural foods and vegetarian—10%.

In late 1993 and early 1994 Don approached Berrivale Orchard Ltd. (a cooperative of fruit growers, headquarters in Berri, South Australia) to see if they would be interested in making a soymilk product for Ceres / Pureharvest—because Don’s relationship with ANF had become intolerable.

In 1979, to get tofu to sell at his retail store, Don used to go to Chinatown in Melbourne twice a week. He bought it from a little Chinese company (whose name he does not remember) located opposite Victoria Market. He would take a couple of buckets and carry it home in bulk, under water. Address: Pureharvest, 15 Ardena Ct., East Bentleigh, Victoria 3166 Melbourne, Australia.

3807. Evans, Barry. 1995. The American Miso story. In: Great Eastern Sun. 1995. Pricelist. Effective June 5, 1995. 37 p. See p. 2-3.

• **Summary:** “This spring, as we complete our sixteenth year of operations at the American Miso Company, we are moved to reflect back on the path we have traveled to reach this point. In the spring of 1979, a group of people approached Michio and Aveline Kushi with the idea of forming a new company to produce miso in the United States using traditional methods and only the finest organic ingredients. With the Kushi’s enthusiastic support, the Erewhon Miso Company was created to supply Erewhon with miso to distribute throughout the United States. From this distant perspective, it is difficult to remember how powerful a force Erewhon was in the natural foods industry at that time. Dominating the market in the Northeast, Erewhon was the largest distributor of natural food in the United States with strong connections to distributors for its name brands in other regions.

“With Erewhon as our partner, master distributor, and a major investor, we moved ahead confidently with our plans to build a miso factory in the Piedmont Region of North Carolina. The Kushis entreated Akiyoshi Kazama, founder of Mitoku Trading Company, a major supplier then as now of high-quality Japanese natural food to the U.S. market, to put aside any narrow concerns of self interest and find us someone to train our would-be miso makers in the rapidly fading art of traditional miso manufacture. In a selfless spirit of international cooperation, Mr. Kazama searched for someone who still made miso the old-fashioned way, yet was open-minded enough to invite strangers into his home (literally).

“After many false starts amid a lengthy search, Mr. Kazama finally located, in the mountains of Yaita Prefecture north of Tokyo, Takamichi Onozaki, a country miso maker of the old school. Mr. Onozaki, generously opening his home and his heart to *gaijin* [foreign] seekers after knowledge from half a world away, agreed to house and train an American couple, John and Jan Belleme, for an entire miso-making season. From November, 1979, until

June, 1980, Mr. Onozaki taught his students all the miso lore he had accumulated from a lifetime of miso making in his small, rural miso factory staffed entirely by local farmwives. This was intermediate technology with a vengeance!

“Upon the Bellemes’ return to America, we rapidly constructed our factory building near Rutherfordton, North Carolina, and Mitoku arranged to ship us our new equipment from Japan. By late 1980 we had begun to make our first experimental batches of rice miso. As the miso slowly aged in its huge cypress vats, great events developed hidden from our eyes which were to have a profound effect on the young Erewhon Miso Company. In July, 1981, Michio and Aveline Kushi journeyed to Rutherfordton for the official christening of the miso plant. The beautiful and joyous ceremony left not a dry eye in the gathering; later we discussed Erewhon’s ambitious plans to package and market the rapidly ripening miso.

“A glorious road into the future seemed to lay open before us, but Erewhon’s financial condition was rapidly deteriorating as too rapid expansion took its toll on a company stretched to the limit by its success. One month later we received the stunning news that Erewhon had filed for bankruptcy. In one of the saddest stories we have ever had the misfortune to be a part of, the Kushis lost control of the company they had nurtured from its birth, and we lost our only customer, a major investor, and our major source of inspiration and guidance.

“At first we were devastated by the blow fate had dealt us, but we had nowhere to go but forward as we had already made a huge financial and emotional investment in our project. Severing our ties to the past, we renamed our enterprise the American Miso Company and began a desperate search for marketers for our product. When we were unable to find anyone to help us, we resolved to set up our own marketing company and do the job ourselves. Thus, out of the direct necessity, Great Eastern Sun was born in December, 1981. Mitoku, itself almost destroyed in the storm of the Erewhon disaster and eager to rebuild, agreed to export Japanese natural food to Great Eastern Sun. GES processed its first order in April, 1982, and sold the first American Miso in September of that same year.

“In the fall of 1981, Mr. Onozaki came to Rutherfordton on an inspection trip to see exactly how well his students had learned their lessons. He stayed and worked in the factory alongside our own crew, patiently reviewing our practices and refining our procedures until he pronounced himself fully satisfied. He had never left Japan before in his life. In the fall of 1982 [sic, spring], Mr. Onozaki dispatched his daughter and son-in-law to America to work for several months in the miso factory just to make absolutely certain that everything remained kosher. In late 1985, John and Jan Belleme turned over the operation of the factory they had built to their successor, Don DeBona, who remains as miso

factory manager to this day. Three books and many projects later, the circle comes round again as the Bellemes are now Mitoku's U.S. representatives.

"Although our miso was sold only in bulk for its first two seasons, our familiar tubs with the Miso Master logo soon arrived on the scene and sales slowly but steadily grew. Starting with eight barrels, we added six in 1986, seven in 1989, five in 1991, and fifteen more in 1993 for a total of 41 of these leviathans, each holding over four tons of two-year miso. In order to house our expanding activities, we built a second factory building as big as the first in 1992, and we are already experiencing a shortage of space once again as demand continues to grow. Two years ago we began to export our miso to Europe where it is distributed by Lima throughout the continent. The American Miso Company story continues on into the future." Address: Owner, Great Eastern Sun, Asheville, North Carolina 28806. Phone: 704-252-3090.

3808. **Product Name:** [Sweet White Miso, Barley Miso].

Foreign Name: Shiro Miso, Orzo Miso.

Manufacturer's Name: Fonte della Vita S.r.L. (La).

Manufacturer's Address: Via Monviso 18, 12049 Trinita (Cuneo), Italy. Phone: (0172) 66 397.

Date of Introduction: 1995. June.

Wt/Vol., Packaging, Price: 350 gm glass jar.

How Stored: Shelf stable.

New Product–Documentation: Letter from Stephen Jannetta of Lititz, Pennsylvania. 2000. Jan. 12. Stephen worked with Christian Elwell at South River Miso Co. in Conway, Massachusetts, for two seasons: (1) Oct. 1990 to May 1991, and (2) Sept. 1993 to May 1994. After the first season he traveled to Italy. The first miso that he produced in Italy was for Soyalab (located near Florence) during a period between February and May of 1992. This was basically experimental. They made about 500 kg of shiro miso and about 1,500 kg of barley miso.

In 1994 Soyalab was purchased by La Fonte della Vita (located near Cuneo, Italy) and Stephen went there in October of that year after his second season at South River Miso Co. He began production the third week of November and finished the last week of April 1995. "In total we produced approximately 13,000 kg of barley miso and 2,100 kg of rice miso using organic soybeans and grains, and sea salt. Also at about this time the 1,500 kg of barley miso that was produced at Soyalab in 1992 was packaged and distributed, I believe, under the Soyalab label."

3809. Great Eastern Sun. 1995. Pricelist. Effective June 5, 1995 [Mail order]. Asheville, North Carolina. 37 p. 28 cm.

• **Summary:** Contents: Catalog information. Miso Master organic miso (traditional, mellow, or sweet). Sweet cloud organic sweeteners. Haiku organic Japanese tea. GES organic English tea. Emerald Cove sea vegetables.

Emperor's Kitchen condiments (soy sauce, vinegars, ume plum products, toasted sesame oil, mirin, dried vegetables, shiitake mushrooms, beans, seeds, grains, dry condiments, Atlantic sun-dried sea salt). Traditional Japanese macro pasta. Traditional Japanese specialty items (misos, candies, seaweed and ume, organic pasta, liquid condiments, specialty products {snow-dried tofu, HamaNatto, Zenryu fu (round cakes of wheat gluten), shonai fu (flat sheets), organic brown rice koji, organic nuka rice bran, organic brown rice dinner with azukis [azuki beans], or with vegs, mochi (4 types), noodles (some or bifun rice noodles), ume products, teas, pickles (incl. natto miso chutney)}, personal care products, kitchenware, knives). Address: 92 McIntosh Road, Asheville, North Carolina 28806. Phone: 704-252-3090.

3810. Jacobi, Dana. 1995. *Miso. Natural Health* 25(3):96-97, 136, 138-40, 142-44. May/June. [7 ref]

• **Summary:** The subtitle reads: "With infinite variations in taste and intensity, ranging from sweet and mild to robust and zesty, there is a miso to enhance the flavor—and immune-boosting powers—of soups, stews, sauces, salad dressings, and even desserts."

Contents: Introduction. Becoming a miso connoisseur. The benefits of miso. Cooking with miso: Get the basics, find "affinity" foods, first dissolve it, don't overdo it. 9 recipes. Color photos show white bowls containing a broth of (and thus the color of): Hatcho miso, mellow barley miso, mellow white miso, red miso, sweet white miso, barley (mugi) miso, bellow beige miso, and soybean miso. Address: Food writer, New York, NY.

3811. Jacobi, Dana. ed. 1995. *The natural health cookbook: More than 150 recipes to sustain and heal the body.* New York, London, Toronto, Sydney, Tokyo, Singapore: Simon & Schuster. 271 p. . June. 25 cm.

• **Summary:** This is a selection of the best recipes published in *East West Journal*, compiled by Dana Jacobi, Dan Seamens, and the editors of *Natural Health* magazine. The recipes are generally low in fat, free of white sugar and other refined foods, and nutrient dense, based on grains, legumes, and vegetables; some contain fish and shellfish. Chapter 4 is titled "Seitan, tempeh, and tofu." Miso and soy sauce are used throughout as seasonings.

Contains recipes for Amasake dressing (p. 153), and Amasake scones (p. 191). Amasake (or Amazake) is defined in the Glossary of ingredients (p. 243). Address: New York City, NY.

3812. *Natural lifestyle magazine and mail-order market.* 1995. Asheville, North Carolina: Natural Lifestyle Supplies. 55 p. Catalog. 28 cm.

• **Summary:** A macrobiotic mail-order catalog with several nice articles, it sells many types of soyfoods and related

products, including the full line of Kushi Cuisine, organic soybeans (yellow and black), azuki beans, amazake, Rice Dream, soymilk, soy Malted (Westbrae), Nasoya Vegi-Dressings, Nayonaise, Farmhouse Tekka, organic soy sauce, fresh tofu, snow-dried tofu, kuzu, and miso. Publisher: Tom Athos. Editor and graphic design: Debbie Athos. Address: 16 Lookout Drive, Asheville, North Carolina 28804-3330. Phone: 1-800-752-2775.

3813. Soyfoods Association of America. 1995. A consumer profile of the soyfoods shopper. San Francisco, California. 100 p. *

• **Summary:** Contents: Executive summary. Overview. 1. U.S. population—Awareness of soyfoods: Number of consumers who have heard of soyfoods (most have heard of tofu, few have heard of tempeh), demographics of soyfood-aware consumers (consumers under age 60 more aware of soyfoods, soyfoods-aware consumers are more affluent, greater number of Easterners but awareness is nationwide, more likely to be married).

2. Soyfoods consumers—Demographics: Use of soyfoods (about 26 million soyfoods consumers—15 million eat tofu, consumers who use one kind of soy product more likely to use another type), demographics (younger households and baby boomers, household incomes skew higher, more than two-thirds are college-educated, employed in white-collar professions, women in soyfoods households less likely to be in clerical jobs, men working full-time—some self-employed, busy women in a variety of employment situations, one-third of soyfoods consumers have children at home, most in the east—proportionately more in the west, proportionately more in pacific, live in areas of greater population density, living the American dream, mostly home-owners).

3. Soyfoods consumers—Shopping and eating patterns: Frequency of eating types of soyfoods (most eat soyfoods infrequently, soy cheese used more frequently, regular users use soyfoods—especially soymilk—a lot, consumers of one type use other types more), where consumers buy soyfoods (groceries/supermarkets stores of choice for tofu, natural foods store shoppers more dedicated soyfoods consumers, meat substitutes purchased in mass-market, other soyfoods in natural foods stores, soymilk customers split between grocery and natural foods, miso popular in Asian stores), future purchase plans (more than 6 million consumers plan to use soyfoods more, soy hot dog—cheese and frozen dessert consumers most enthused about eating more soyfoods), the soyfood shopper's diet (seek low-fat/cholesterol/sodium/sugar foods, health interests vary by types of soy products tried), other red meat alternatives (most list fish and poultry as red meat alternatives, vegetarian foods favored by consumers of specific soy products).

4. Soyfoods consumers—Attitudes about soyfoods: Attributes of soyfoods (a positive opinion of soyfoods'

health benefits—consumers approve less of taste and ease-of-use, soymilk and soy hot dog consumers most likely to agree that soyfoods are healthy, few consumers have negative health image of soyfoods, soy products users believe in soyfoods' special nutrients, soyfoods easier to use than public thinks, familiarity breeds affection, users of various soy products see cost savings, those who use specific soy products—especially tempeh—cannot find them where they shop, consumers of various types do not feel soyfoods are a problem for allergies), importance of organically grown (more than one-third of soyfoods consumers seek organically grown, attitudes about organic stronger among users of specific products).

5. Soyfoods consumers—Sources of product information: Where consumers first learned of soyfoods (word of mouth is primary source, promotion works for packaged products), why consumers first began to eat soyfoods (novelty and health are the prime motivators, soymilk consumers more concerned about specific health and lifestyle issues—soy burger consumers seeking low-fat meat substitutes), why consumers currently eat soyfoods (consumers less sure why they currently eat soyfoods, tofu—soymilk—and soy burger consumers more likely to have specific reasons), familiarity with health connections (consumers unfamiliar with some of soyfoods' health benefits—familiar with soyfoods' link to cholesterol and heart disease, both users and interested non-users aware of link to cholesterol and heart disease, core consumers not well-informed about other health benefits), sources of information (magazines and newspapers most common source of health information).

6. U.S. population—Why consumers aren't eating more soyfoods: Who is interested in eating more types of soyfoods (consumers would like to try new soyfoods), what would get consumers to eat more soyfoods (taste and lack of cooking suggestions are barriers to use, soy hot dog consumers seeking lower prices—soymilk shoppers seeking more outlets—tofu consumers want recipes, rural—southern and consumers seek lower cost—more affluent seek better taste).

7. Children and soyfoods: How often children eat soyfoods (among soyfoods households—two-thirds of kids age 2-12 eat these products, households with children age 2-12 eat more soy burgers—soymilk, children age 13-18 more likely to be infrequent soyfoods consumers, households with older children tend to choose same products as soyfoods consumers overall), children's attitudes about soyfoods (children's attitudes toward soyfoods are mixed—many parents cannot speak for their children).

8. The tofu shopper: Ways consumers use tofu most often (tofu use most often in stir-frys), why consumers eat tofu (consumers say they eat tofu because it is healthy), what influences brand choice (price—freshness and taste), why consumers aren't eating more tofu (tofu consumers are looking for new ways to use tofu), demographics (most tofu

users are 30-59—those 60 and over avoid it, higher household incomes, tofu household heads are highly educated and have executive jobs, household size and marital status similar to average American, concentrated in more populated areas—East and West coasts).

9. The soymilk shopper: Ways consumers use soymilk most often (most often used as a beverage), why consumers use soymilk (non-specific health features and convenience attract soymilk users), what influences brand choice (freshness, quality, taste drive soymilk sales), why consumers aren't using more soymilk (cost and availability hinder use), demographics (younger households use soymilk, more affluent households, education and occupation, more multiple-person households, more Westerners and those in mid-size MSAs).

10. The soy-based meat alternatives shopper: Why consumers use soy-based meat alternatives (because they are healthier), what influences brand choice (taste and price), why consumers aren't buying/using more soy-based meat alternatives (cost, unfamiliarity, taste and availability hinder use, cost and availability factors are higher among users of specific products), demographics (soy burger users and interested non-users are younger, household income somewhat higher among meat alternatives users, college educated and graduates, white collar employees, two person households for some products—soy burgers mirror U.S. population, soy bacon use higher in East—burgers higher in central region, variations by types of products used).

11. The soy-based dairy alternatives shopper: Why consumers used soy-based dairy alternatives (for health reasons), what influences brand choice (taste primarily), why consumers aren't buying or using more soy-based dairy alternatives (cost and unfamiliarity hinder use), demographics (older and more affluent, educated and professionally employed, smaller size households—more singles, live in moderately populated areas, more concentrated in east and west).

12. Other soyfoods shoppers—Soy flour, tempeh, and miso: Demographics (soy flour consumers older—miso consumers most affluent, soy flour, tempeh and miso found in educated households, occupation status similar to other soyfoods shoppers, smaller households and more singles use tempeh, more soy flour users in low-density areas, east and west coasts for miso and tempeh).

Methodology. Questionnaire. Continued. Address: One Sutter St., Suite 300, San Francisco, California 94104. Phone: 510-935-9764.

3814. Soyfoods Association of America. 1995. A consumer profile of the soyfoods shopper. II. Methodology of collecting information. San Francisco, California. 100 p. *
 • **Summary:** This survey was conducted by Market Facts, Inc., a market research firm based in Chicago, Illinois. Project directors for this report were Tim Redmond

(American Soy Products) and Peter Golbitz (Soyatech, Inc.). Fieldwork was done by Sheri Hoffenberg (Market Facts). Analysis and Report: Sara M. Starr and Peter Starr (Starr Track). Price: SAA members \$475. Nonmembers: \$975.

The survey was conducted in two parts. In the first part a questionnaire was mailed to 20,000 people in the Market Facts database. Of these, 17,715 people mailed back responses, and of these 15,168 were completed and usable. Three questions related to soyfoods: 1. Have you ever heard of: Ten types of soyfoods are listed—Tofu, soymilk, soy flour, tempeh, miso soup stock paste, soy burgers, soy hot dogs, soy bacon or breakfast sausage, soy cheese, and soy frozen desserts. The respondent is asked to check those that he or she has heard of. 2. Which of these ten soyfoods have you eaten 5 or more times in the past year? The same list is repeated and the consumer is asked to check as indicated. 3. "I would eat more soyfoods if... (1) They were more accessible where I shop for food, (2) I knew better what to do with them, i.e. recipes, (3) I was better informed on the health benefits; (4) I thought they tasted good; (5) They were less expensive. Check all that apply.

Part II. From the 15,168 people who mailed back completed and usable responses to part I, 750 people were chosen to participate in a follow-up survey, which consisted of a 4-page questionnaire containing in-depth questions about consumption of and attitudes toward ten different types of soyfoods, purchasing motivations and patterns, and questions about children's attitudes toward soyfoods. The sample was divided into 3 groups. A questionnaire was mailed to a representative sample of 626 people (anyone who indicated they had eaten soyfoods at least 5 times in the past year). An over-quota sample of 67 soymilk users and 57 respondents who indicated that they were soy cheese users. This was done in order to ensure enough completed questionnaires among people who used soymilk and soy cheese. To ensure the sample quality, consumers were again asked about their use of various kinds of soyfoods. Consumers who responded affirmatively to using at least one kind of soyfoods were retained in the mail survey sample. Address: One Sutter St., Suite 300, San Francisco, California 94104. Phone: 510-935-9764.

 • **Summary:** The editorial begins: "Up till now, I've never had a good reason to overcome my fear of tofu, the squishy, slimy white stuff that serious vegetarians love to tout as a wonder food. But I may have to eat all my anti-tofu words—and a little tofu, to boot—in the wake of the newfound love affair between soyfoods and health researchers... There's been an explosion of new research results released in the past few months, all headed toward the conclusion that

soyfoods are the greatest thing to hit the food chain since sliced bread.”

Products like tofu, tempeh, TSP (textured soy protein) and miso “are known—if they’re known at all—as exotic Oriental foods eaten by counter-culture vegetarians, not red blooded Americans.” Address: Managing Editor.

• **Summary:** Tofu is a “spongy white block that is a major part of Asian diets... Asian restaurants have increased the popularity of tofu, which sustained much of the Woodstock generation. Still there is notable resistance to the chalky soybean derivative that is often called ‘the cheese of Asia.’

“Johanna H. Dwyer, director of the Frances Stern Nutrition Center at the New England Medical Center Hospitals in Boston [Massachusetts], discovered this resistance during a four-year study on soy protein and estrogen levels in women. She couldn’t find subjects that were willing to consume enough tofu to make the study valid.” So she ended up using a concentrated soy protein in the study. Dr. Dwyer still feels that “tofu is a good part of a healthy diet, even if by itself it doesn’t prove to be a magic bullet. And a good diet is one that is low in saturated fat, high in fiber, and rich in fruits and vegetables.”

Each of the following common soybean products is defined: Soy milk, tofu, tempeh, miso, soy flour, textured soy protein.

• **Summary:** Barry was born on 25 Feb. 1947 in Reading, Pennsylvania. His father was in the army reserves. He has been an avid reader since he was about age 9. He did very well on his SAT exams, and entered Princeton University in the fall of 1965 on an ROTC scholarship; there he majored in history, a subject in which he is deeply interested to this day. After 3 years he left Princeton (in a squabble over a project) and attended Temple University in Philadelphia for one year. Returning to Princeton for a fifth year in college, he graduated in 1970. He has been a “natural foods enthusiast” since he was in college. He entered the U.S. Army in Feb. 1971, living off post at Fort Knox (Kentucky), formally applied as a conscientious objector, and was honorably discharged in Aug. 1972 with full veteran’s benefits. He returned to Temple Univ., enrolled in a PhD

program in history, but left after 3½ semesters. In June 1974 he became a vegetarian—though he regularly eats fish. In 1977, while living in Coconut Grove, Florida, he first heard about macrobiotics and heard Michio Kushi speak in Coconut Grove. He became a devoted follower of macrobiotics, which he still is. Barry heard about the miso venture through Kathy Kashdan, his housekeeper, who was the sister of John Belleme’s ex-wife. Sandy Pukel (pronounced pyu-KEL), who owned the Oak Feed Store, was the pasha (local chieftain) of the large macrobiotic community (satrapy) in Coconut Grove. Sandy was also extremely close to Michio, and they were often in touch. Sandy was probably Michio’s closest friend among American followers of macrobiotics. The day after Michio’s lecture, Barry went to Sandy’s Oak Feed Restaurant (where he had previously spent much time) and asked to see John Belleme, the manager of Oak Feed Store, who was seated at a table in the Oak Feed Restaurant with Sandy Pukel, talking with Edmund Benson about the miso company idea. Barry walked over to the table and introduced himself, and said he might like to be involved with the miso company; neither he nor John knew one another, but their paths were soon to become deeply intertwined.

1978 fall—Sandy Pukel, John Belleme, and Michio Kushi start to discuss the idea of a miso manufacturing company in America. John Belleme became interested in this idea in the fall of 1976 in Brookline, Massachusetts.

1978 fall—Various people buy shares in the new miso company. Jim Kenney \$5,000. Frank Head intended to buy shares, but never did. At either that time or later Edmund Benson invested about \$25,000 of \$50,000 that he had formerly pledged.

1978 fall—Pukel and Belleme make a deal through a real estate agent to buy the property in Rutherfordton, North Carolina, on which the American Miso Co. now stands. As Barry recalls, this was the very first concrete move toward starting a miso company other than John taking Japanese Berlitz lessons, which he started at about the same time. They bought something like an option on the property. They put something like \$1,000 to \$5,000 down as good-faith money and had about 6-12 months to come up with the rest of the down payment of \$15,000 to \$20,000. John Belleme rode up to North Carolina on his motorcycle to help make the down payment and sign the original land deeds *before* Barry invested any money. Maybe John also rode up again later.

1979 Feb. 28—Oak Feed Miso, Inc. is incorporated. The initial directors and officers are Sanford J. Pukel (President, 3030 Grand Ave., Coconut Grove, Florida 33133) and John Belleme (Secretary-Treasurer, 5490 W. 1 Ct., Hialeah, Florida 33012). It is not clear who owns how much stock at this time. Oak Feed Miso was discussing a joint venture with Erewhon to establish the actual factory, which would then be called the Erewhon Miso Co.

1979 April—Five of the six months have passed. Barry (now age 32) becomes involved as an investor in the miso company, contributing initially \$50,000, which more than covers the urgently needed down payment. He thinks Sandy could have found a way to make the next land payment without his money, but perhaps not easily. Barry had not been previously involved in the miso project in any way. Barry believes that by this time Sendai Miso-Shoyu and Mitoku (Mr. Kazama) had very little interest in serious participation in the Erewhon Miso Co. Michio may have wanted them to be involved, but they did almost nothing to demonstrate their interest. At best they may have said “keep us posted.” But nothing ever happened.

1979 Oct.—John and Jan Belleme leave for Japan to study miso making. After “camping out” in Mr. Kazama’s office for a while, he ends up studying with Mr. Onozaki. Barry’s investment helps, but the checks sent to the Bellemes in Japan are written by Sandy Pukel on the Oak Feed Miso account.

1979 Nov. 18—Barry is in a horrific bicycle accident in Pennsylvania. He flies over the handlebars, into a field, breaking 5 vertebrae and 9 ribs. After a 14-hour operation, he spends 6 months flat on his back in the hospital and 1 year in a full-body cast. He was paralyzed from the waist down for quite some time. He did not eat one bite of hospital food; he had all natural-food meals brought in. Continued. Address: Owner, American Miso Co., Inc. and Great Eastern Sun, Asheville, North Carolina 28806. Phone: 704-252-3090.

3819. Evans, Barry. 1995. Chronology and history of Oak Feed Miso, Inc. and American Miso Co. of North Carolina. Part II. 1980 (Interview). *SoyaScan Notes*. Aug. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1980 June—John and Jan Belleme return to the USA from Japan. A letter shows that by late summer John had started to order miso-making equipment. Barry is sure that the wooden vats come from Arrow Tank Co. (Buffalo, New York) the only traditional barrel maker left in the United States—a very interesting place. The vats are all traditionally made, from old recycled wine barrels and other old wood. Over the years, the miso company has bought all its vats from Arrow Tank Co. The first 35 vats were cypress, but when those ran out, the next five were fir (they took a long time to season), and last 5-6 were redwood (they worked better).

Concerning Joseph and Patricia Carpenter: Barry never met them and he understands that their being asked to leave when the Bellemes returned was a traumatic, landmark event in their lives. Barry was once in prison for 32 months, and was on probation for three years after that, and was awaiting prison for 2 years before he actually went. But when it was over, he let it go and went on with his life. After John returned from Japan, Barry heard about the

Carpenters situation from John and Sandy, who said (generally) that they had not done much while they were there, and they did not seem very motivated. But, in all fairness, maybe they didn’t have any clear instructions as to what they were supposed to do. For him, their whole role in the miso company was always very hazy. But until Barry took a hand in things, the whole company was very “loosey-goosey.” Nobody had any clear instructions as to what was to be done. Only John and Jan Belleme know the details of what actually happened. Sandy is a “conflict avoider” so he would have been ambiguous. John was not a conflict avoider. John, who was never a hippie and was very yang after his stay in Japan, came back to find these two hippie types on the land. “This culture clash may have had a lot to do with it.” Also, there was only one house, so the two families would have had to live together.

1980 summer—Each time the company needed more money, they would come to Barry—since he was the only one they knew who had any and was willing to invest it. This summer, when the building had to be constructed, the equipment ordered and paid for, and land payments made, Barry started to invest a lot more money, and to own more and more shares. When he invested his second \$50,000 he began to pay more attention to who else owned shares. “As I began to sniff the wind a little more, I sensed that I was surrounded by phantom shareholders, and was the only one actually investing any money.” Sandy and Michio didn’t want Barry to be on the board of directors, and they wanted his stock to be Class B, which did not enable him to vote—even though he was now the leading investor. Barry confronted Michio on this while on an airplane en route from Boston to Florida; Sandy was also on the plane. Barry made it plain that he would not invest any more money (he was being asked for about \$90,000 more) unless he could be on the board of directors, and all the stock (not just his) would be voting stock. Michio and Sandy reluctantly agreed. All this came to a head at an important meeting in Miami in the summer of 1980, shortly after John and Jan returned from Japan.

When the Belleme’s returned from Japan, people began to realize that this miso company might really happen. Negotiations had been taking place throughout 1979 and 1980. Three or four versions of an ownership contract / agreement had been presented but never signed; there would be 14-15 more over the next year, and none of those was ever signed either. The negotiations ended with Erewhon’s bankruptcy. The discussions were really between the Erewhon group (comprised of Michio, Aveline, Morris Kirsner—their attorney—and Evan Root) and the Oak Feed Miso group (comprised now of Barry, John and Jan Belleme, and David Young—their attorney). Sendai Miso-Shoyu and Mitoku were not even mentioned; they were out of the picture. Mr. Kazama, owner of Mitoku, probably feared and doubted the potential new American miso

company. “The issue was: Who would control the company, Erewhon or us? And how many shares would each person or company own?” Each group wanted to own a majority of the shares. This meeting went on for several days at various places, including restaurants, the Oak Feed Store, and the office of David Young—the Oak Feed Miso group’s attorney. Note: See also meeting of 27 Sept. 1981.

Barry, who was on crutches, flew in from Reading, Pennsylvania, accompanied by his close friend and confidant, Saul Goodman, a macrobiotic healer and shiatsu practitioner. Barry could not travel by himself, and this was the first trip he had taken after his bike accident. David Young was concerned that the Oak Feed group was being asked to put up almost all of the money yet would not have control; yet he was ambivalent. Sandy Pukel was a member of the Oak Feed Miso group, but he was also ambivalent; he was really on Michio’s side. He felt that Erewhon’s participation was absolutely vital, and whatever had to be given up to get that participation was appropriate. Everyone should trust in Michio, and Michio would provide.

Sandy was and is one of Michio’s closest friends and confidants in the whole world. Sandy and Mona Schwartz were the co-heads of the Florida Macrobiotic Association. An excellent macrobiotic teacher and cook, Mona ran a study house in the Miami area, where Barry ate many of his meals for the first several years that he was practicing macrobiotics. So did Dr. Keith Block. Mona first told Barry how close Michio and Sandy were, and how much each influenced the other’s thinking.

Barry recalls that Michio and his attorney, Morris Kirsner, were so demanding and unreasonable in what they wanted that even Sandy hesitated. He wanted to give them more than Barry and John, but he didn’t want to give them everything they wanted. Negotiations dragged on and on because they were taking this unrealistic negotiating stance. So it was easy for Barry and John, who saw increasing signs of weakness in Erewhon, to begin to fight a war of attrition and prevent anything from happening.

The Board at that time had five members—including John Belleme, Sandy Pukel, Edmund Benson, Barry, and one other person—which was probably not Michio. Only four other people besides Barry invested money in the miso company: Edmund Benson \$20,000, Frank Head (who started Mountain Ark) \$5,000, the Japanese cook at the Oak Feed Restaurant (Yozo Masuda) \$10,000, and Jim Kenney \$5,000. Barry bought out the first two, and Jim died before the company began operations. Sandy Pukel, as one of the company’s founders, got a number of “founders shares” for free, which Barry eventually bought back from him.

1980 fall—A document shows that at this time “John and Jan go on Erewhon payroll and start construction of Erewhon Miso in Rutherfordton, North Carolina.” They begin by leveling the land. They went on the payroll of the Erewhon Trading Co., not the Erewhon Miso Co., since the

latter company did not have a payroll and never really existed. Of course, Michio and Aveline owned Erewhon and all or most of its stock. Barry recalls that Erewhon was supposed to put up a certain amount of money for their share of the joint venture, and then provide the additional services of buying all miso made by the new miso company, packaging, and distributing it.

Barry recalls that much of the automatic miso-making equipment came from Japan—some or all of it from the Fujiwara Brewing Co. in Hiroshima. John visited them in 1983 when the miso company was considering adding a soy sauce plant near the miso plant. Continued. Address: Owner, American Miso Co., Inc. and Great Eastern Sun, Asheville, North Carolina 28806. Phone: 704-252-3090.

3820. Evans, Barry. 1995. Chronology and history of Oak Feed Miso, Inc. and American Miso Co. of North Carolina. Part III. 1981 to 1982 (Interview). *SoyaScan Notes*. Aug. 25. Conducted by William Shurtleff of Soyfoods Center. • **Summary:** Continued: 1981 Jan. 31—Oak Feed Miso, Inc. IRS tax returns (for the fiscal year ending Jan. 31) show losses of \$89,000 for the last year with no sales. Note: The land was purchased on a mortgage, with about \$20,000 down payment.

1981 March—The miso building is essentially complete, but some equipment still had to be ordered—from Japan and the USA.

1981 early—Michio and Aveline Kushi can see that Erewhon is heading for bankruptcy. They try urgently to raise money. Sandy Pukel loans the Kushis \$100,000—and thereby wins their eternal gratitude and friendship. Sandy never gets the money back. Barry is upset, because he believes that this was money he gave to Sandy as his investment in the miso company. Essentially, Barry then had to give Sandy more money which he finally did invest in the miso company—as follows: Sometime later in 1981, to make things more complicated, Sandy (who is now short of cash) asks Barry if he would be willing to invest in Oak Feed Store and Restaurant with the understanding that Sandy will use the money to buy the shares he had pledged to buy in Oak Feed Miso, Inc. Barry accepts the deal, and Sandy invests the \$80,000 to \$90,000 in Oak Feed Miso—which makes Barry happy.

1981 July—The opening ceremony for Erewhon Miso Co. is held at Rutherfordton, North Carolina. This was “the crowning moment of the early phase of the miso company. We were all still together at that point, including Michio. We had a big, beautiful sign out on the road in front of the factory, put up for the opening ceremony, that read ‘Erewhon Miso Co.’—even though that was never the name of the company. The delegation from Erewhon was Michio, Aveline, and Evan Root. Evan was overwhelmed by the emotion of it all—just crying like a baby. John and Jan Belleme were there, as was a woman from Asheville who

did the photography. Sandy Pukel must have also been there, though Barry has no clear recollection of this. Yet tension between Barry and Sandy had been growing. “Without Sandy and Michio, the project never would have happened.” By now many people could see that Erewhon was headed for bankruptcy, but “Even at the time of the opening, everyone thought Michio would pull another rabbit out of his hat in the end,” to save Erewhon. In late summer and early fall Barry attended several meetings called to discuss Erewhon’s perilous financial condition. These meetings were all held in the area of Boston, Massachusetts, sometimes in the office of Morris Kirsner, the Kushi’s attorney. Barry was invited largely because they hoped he would help bail out Erewhon.

1981 Aug.–John and Jan Belleme start making miso in North Carolina; the soybeans and grains are contributed by Erewhon Trading Co. But by August or September the Kushis can see that Erewhon’s bankruptcy is imminent, so they stop sending John his paycheck and additional raw materials. This creates a crisis; everything must be rethought with Erewhon out of the picture. John may have sent out feelers to Westbrae and Eden to see if they wanted to take over Erewhon’s role as distributor of the miso—they didn’t.

1981 Sept. 27–At an annual meeting of Oak Feed Miso, Inc. all shares are converted to Class A voting shares. Major shareholders are: Barry Evans 1400 shares. Sandy Pukel 1400 shares. John Belleme 900 shares.

1981 Nov. 18–Erewhon Trading Co. files for bankruptcy protection under Chapter 11 of the federal Bankruptcy Act. For the next several months, “various wolves were circling around, trying to grab hold of the half-dead body. Finally U.S. Mills and Nature Food Centres Inc. grabbed it and dragged it off to its lair.” As part of the deal, Michio had to agree that he would only do endorsements through the new owners. So Michio, who had lost control of his own destiny for quite some time, could not be involved with the miso company any more. Barry thinks Sandy realized that and his heart went out of the miso company project at that point. Consequently, all deals between the miso company and Erewhon come to an end. Barry thinks that Erewhon Trading Co. invested a total of about \$15,000 in the miso company in the form of payments and miso ingredients. After Erewhon was purchased out of bankruptcy, the new owners, Chuck Verde and Cynthia Davis, never got this investment back. When they called, Barry took the position that the costs and difficulties the miso company had endured because of Erewhon’s collapse were much greater than \$15,000. Barry added that if they took the matter to court, he would sue them for breach of contract. In fact, the miso company barely survived that collapse.

Over the past four months Barry, who admires Michio as a spiritual leader, has come to realize that he cannot be counted on to help establish the new miso company. He has

grown tired of all the difficulties with Erewhon and Michio; as a practical businessman, he was “a nightmare.”

1981 late–Marty Roth now enters the picture. When John Belleme left his job as manager of Oak Feed Store to study miso in Japan, Jim Kenney took over from him. Jim was an epileptic; while traveling on vacation in East Asia about a year later, he died tragically at about age 27–Barry heard he choked on the seed of an umeboshi salt plum that he was using to try to control an epileptic fit. So in about July or August 1981 Sandy brought in Marty Roth, who had been running the Natural Cafe in Santa Fe, New Mexico. Marty was soon working as manager (or assistant manager) of Oak Feed Store. Marty (a very inventive and creative guy) and Barry (a co-owner of the store) quickly find they get along well and work together effectively. Marty didn’t want to stay in Miami, and his job with Sandy wasn’t working out. When Marty told this to Barry, Barry said that he was planning to establish his own import company in North Carolina, and that company was also going to take over distribution for the miso factory. It is not crystal clear to what extent Barry lured Marty away from Oak Feed Co. and to what extent Marty would have left anyway.

1981 Dec.–Great Eastern Sun (GES) is organized. The first employee and manager is Barbara Arrow, who arrived in Dec. 1981.

1982–Jan. GES orders its first container of natural foods from Mitoku (Mr. Kazama) in Japan.

1982 Jan. early–Marty Roth moves from Florida to North Carolina to run Great Eastern Sun (GES)

1982 Jan.–Barry makes another investment in the miso company and thereby replaces Sandy Pukel as the largest shareholder. Barry buys out remaining shareholders—except Jim Kenney who is no longer living. Sandy proposes to Barry a deal whereby he would trade Barry all of his stock in the miso company for all of Barry’s stock in Oak Feed Store. Barry accepts, but with the added condition that Barry could import goods from Mitoku in Japan.

1982 Jan. 4–Barry Evans sends out a letter on American Miso Co. letterhead to potential customers that begins: “Dear Friends—We at The American Miso Company are proud to announce the opening of our miso shop in Western North Carolina.” It ends: “The Lindenself Foundation, doing their business as Linden’s Elf Works, located in Piedmont, North Carolina, has been appointed as the sole agent in marketing and distribution of The American Miso Company brand products... Your phone contact is John Troy at... 919/364-2723. Enclosed is the Linden’s Elf Works distributor price sheet which includes all the pertinent information for your upcoming Spring catalogue. With kindest regards, Barry Evans, President.” When Marty Roth sees this announcement, he argues that GES should distribute AMC’s miso; Barry agrees. So John Troy and Elf Works never did distribute any AMC miso.

1982 Jan. 31–Oak Feed Miso has losses of \$67,000 for the previous year with no sales. Total loss: \$157,000.

1982 Feb. 26–Sandy Pukel and Barry Evans sign an agreement whereby Sandy gets out of Oak Feed Miso and Barry gets out of Oak Feed Store and Oak Feed Restaurant by an exchange / trade of stock. Barry recalls that Sandy left the miso company reluctantly for two reasons. First, because he saw the miso company as “his baby” and he liked to be in control—not so much because he saw it as a company with a bright and profitable future. And second, because Michio wasn’t involved any longer, and couldn’t be because of what had happened to Erewhon. Barry never asked Sandy (or any of the other shareholders) if he could buy their shares. They all approached him with the idea. First, for example, Edmund Benson wanted to get his money back, so Sandy bought his stock. Yozo Masuda’s stock was included in the deal with Sandy.

1982 March 22–Great Eastern Sun is incorporated.

1982 April 19–At the annual meeting of the shareholders of Oak Feed Miso, the name is officially changed to American Miso Co. This change is filed with the state of Florida on 5 May 1982, and signed by Barry Evans and Janet Belleme. The final stamp of filing is 19 May 1982. Barry notes: “In numerology, this date (May 19) is a 44 number, since $5 + 19 + 1 + 9 + 8 + 2 = 44$. Forty-four is the number of ultimate business success.” Barry did not plan to incorporate the company on this date. “It was just the order of the universe.”

1982 May 18–Great Eastern Sun sells its first food products to a natural food store; they were imported from Japan.

1982 mid- to late- The principals of the American Miso Co. are now Barry Evans, John and Jan Belleme, and Mrs. Kenney. Barry started with 1,400 shares, got 1,400 from Sandy, 100 from Yozo, 250 from Edmund, and 200 from Gary Dukeman (a friend of his)—for a total of 3,350. John and Jan had about 850 shares. John had been given about \$20,000 worth of shares as a founder of the company, and because he went to Japan to learn how to make miso, and because he had worked for a modest salary (less than \$20,000/year) as a miso maker in North Carolina. Mrs. Kenney had 50 shares. On a percentage basis, Barry owned 78.9% of the miso company, John and Jan Belleme owned 20%, and Mrs. Kenney owned the rest. Continued. Address: Owner, American Miso Co., Inc. and Great Eastern Sun, Asheville, North Carolina 28806. Phone: 704-252-3090.

3821. Evans, Barry. 1995. Chronology and history of Oak Feed Miso, Inc. and American Miso Co. of North Carolina. Part IV. 1983 to present (Interview). *SoyaScan Notes*. Aug. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1983 Oct. 1–Barry desires to buy and John and Janet Belleme desire to sell all their 900 shares in the American Miso Company. John agrees to work

as a consultant for 6 months and to train a person to take his place. Barry wants to run the company in a more “commercial” way than John does, starting with major price increases.

1984 Jan. 31–American Miso Co. has gross receipts or sales last year of \$61,941, annual losses of \$68,367, and total losses from day one of \$306,633.

1985 Jan. 31–American Miso Co. has sales last year of \$107,000, annual losses of \$21,000, and total losses from day one of \$327,000.

1985 Dec.–John Belleme leaves American Miso Co. because of a conflict with Barry Evans. Don DeBona, who arrived in the spring of 1985 and worked with John for 6 months, takes over. A year or two before John left, Sandy purchased his shares in American Miso Co.—because John wanted him to. John felt that Barry was making decisions with which he did not agree, and that he shouldn’t have to suffer financially if they turned out to be bad decisions. Barry did not want John to leave, but neither did he want John to be in control of the business. Barry recalls that there was a big conflict and bad feelings between him and John at the time John left.

1986 Jan. 31–American Miso Co. makes its first profit during the past year of \$22,000. Gross revenues or sales were \$214,000 and total losses from day one decrease to \$304,000. Notice the big jump in sales. Barry instituted a 50-70% price increase, over John’s protests. Note: Barry never went to business school, but he learned to be a good businessman in the “school of hard knocks.”

1987 Jan. 31–Sales last year of \$262,000, profit of \$101,000 (up 4.6 fold), and total losses to date of \$203,000. Now—sales only for the following fiscal years: \$252,000 in 1988, \$275,000 in 1989, \$315,000 in 1990.

Then the fiscal year end changes to Aug. 31 to coincide with that of Great Eastern Sun. Sales are \$161,000 in 1991, \$392,000 in 1992, \$435,000 in 1993, \$505,000 in 1994, and \$550,000 in 1995. In 1995 the total losses carried forward go to zero for the first time. In other words, including his salary, Barry first broke even this year.

1992 Jan. 2–Barry takes a federal vacation, returning to the company on 1 Sept. 1994.

1997 Oct.–Don DeBona decides to leave AMC. The broad issue was control. It was a sad day for Barry. Don owned no shares in the company and, after having been there for ten years, he wanted to own a significant part of the company, and be able to build up equity, if he was to continue. Barry was unwilling to give him that ownership, so he quit—but continued to live in his house on the property. “It was not a very pleasant parting.”

2000 July–In the early years, no koji was made each year during the hot months, from about June until August or mid-September. Now, however, the koji-makers are so skilled that they make it during those months, but outside of the koji room on open tables. This helps to meet the steadily

growing demand. Today, with a crew of eight (including 4 packagers), AMC makes about 350,000 lb/year of miso (about 7,600 lb/week) and might possibly be able to expand this to 450,000 lb/year with its existing buildings.

2000 July—Almost all the early American Miso Co. records (including payables, receivables, invoices, payroll records, etc.) are kept in many cardboard boxes in a storage area in Asheville—but they are not well organized. Records from the first year or two (1979-80) may be missing entirely. One of these days Barry would like to get these AMC records organized. may be missing. The Great Eastern Sun records are intact from the beginning and are well organized.

Barry: “I have tried to tell you this story in a fair and dispassionate way. No one should think that I was the dogged person hanging on, or the prime mover of everything. But it was really just the flow of circumstances. I was just swept along, and countless times I was scared to death and wished I had never gotten involved, and spent sleepless nights ruing the fact that I had made such a fool out of myself, and thought things would never work out, and would end in disaster.” But actually the company has experienced nice, steady growth.

Note: Barry planned to buy South River Miso Co. within 1-2 weeks after this interview and was 90% sure the deal would go through—but it never did. Address: Owner, American Miso Co., Inc. and Great Eastern Sun, Asheville, North Carolina 28806. Phone: 704-252-3090.

3822. Iwata, Masakazu. 1995. Re: The pioneering work of Gonshiro Harada (died 1943) with koji, tofu, miso, natto, and okara in California. Letter to William Shurtleff at Soyfoods Center, Aug. 25. 1 p. Typed, with signature.

• **Summary:** Mr. Iwata is the author of *Planted in Good Soil: A History of the Issei in United States Agriculture* (1992). Yesterday he contacted Fred Harada, “whose father had a tofu manufacturing establishment in the Fresno area... He is a good source of information. His father, Gonshiro Harada (died 1943), an Issei (first-generation Japanese immigrant to the USA) from Hiroshima Prefecture, was a master koji-maker who learned his trade in Japan. He opened a store in Fresno in the 1920s but went broke during the depression of 1929; he was a creditor unable to collect from credit customers. Subsequently, in 1939, he relocated in Fowler, about 10 miles southeast of Fresno, where he and his wife and family (nine children) established the Harada Tofu Co. and manufactured such foods as tofu, kamaboko, agé, miso, natto, okara, and other related items, peddling them to the Japanese farmers in a broad area of Central California. Of course the company handled vegetables and other grocery goods on their route consisting of several hundred customers.

“Fred indicates that his father was an innovative entrepreneur who made much of his own tofu-making

equipment.” Fred believes his father got at least some of his soybeans from rice growers in the Colusa region, who grew soybeans as a sideline. “He mentioned that the Koda rice farms in South Los Baños may have had some acreage in this crop.”

Fred Harada can be contacted at 637 North 6th Street, Montebello, CA 90640. Phone: 213-721-8455. Best to contact him after 7:00 p.m. Address: 879 North Vail Ave., Montebello, California 90640. Phone: 213-723-4389.

3823. Iwata, Masakazu. 1995. Re: Early soybean cultivation by Japanese rice growers in central California around the time of World War I. Letter to William Shurtleff at Soyfoods Center, Aug. 25. 1 p. Typed, with signature.

• **Summary:** Yesterday Dr. Iwata contacted Fred Harada, “whose father had a tofu manufacturing establishment in the Fresno area... He is a good source of information... My conjecture would have been that much of the soybeans for the tofu came from abroad, but according to Fred, some of the Japanese rice growers, whose heyday in rice farming was around the time of World War I [1914-1918] in the Colusa region, grew soybeans as a sideline. He mentioned that the Koda rice farms in South Los Baños may have had some acreage in this crop.

“I have a section in my book (*Planted in Good Soil: A History of the Issei in United States Agriculture*. New York: Peter Lang Publishing, 1992) on the Koda farms, utilizing information from interviews and the Keisaburo Koda biography in Japanese (*Koda Keisaburo Den*, 1965), but found no mention of soybean production. You might contact Edward Koda (P.O. Box 6, South Dos Palos, California 93665), the son of the founder, about this. I believe the operation is now in the hands of Ross, the third generation heir.

Fred Harada can be contacted at 637 North 6th Street, Montebello, CA 90640. Phone: 213-721-8455. Best to contact him after 7:00 p.m.

Update: Letter from Dr. Iwata. 1996. Dec. 6. “Most likely the Chinese who arrived in California around the time of the Gold Rush of 1849 introduced soybeans from China.” Address: PhD, 879 North Vail Ave., Montebello, California 90640. Phone: 213-723-4389.

3824. Mountain Ark Trading Company. 1995. Catalog—September-December 1995 [Mail order]. Fayetteville, Arkansas. 30 p. 27 cm.

• **Summary:** Soy-related products in this mail order catalog include: Miso, soy sauce, tempeh, tofu, black soybeans, yellow soybeans, tofu dressings, natto miso. Also: Sea vegetables, amaranth, quinoa, teff, blue corn. The general manager is Nick Masullo. Address: P.O. Box 3170, Fayetteville, Arkansas 72702. Phone: 1-800-643-8909.

3825. Orthoefer, Frank T.; Liu, Keshun. 1995. Soybeans for food uses. *International Food Marketing & Technology (Germany)* 9(4):4-8. Aug. [5 ref]

• **Summary:** Contents: Introduction. Traditional soy foods: Soy milk, tofu, toasted whole soybeans and full-fat soy flour, soybean sprouts, yuba, soy sauce, tempeh, natto, miso. Soy protein ingredients: Soy grits and flour, soy protein concentrates, soy protein isolates. Soy nutrition: Soy protein, fat and calories, phytochemicals. Food bean market. Summary.

Two “different types of soybeans have emerged: oil beans and food beans. This is particularly true in the US soy market...”

Of the fourteen phytochemicals, seven are present in soybeans. These seven are phytates, isoflavones, carotenoids, coumarins, triterpenes, lignans, and phenolic acids. Phytochemicals have been shown to affect human health as much as vitamins and minerals, and many of them have anti-cancer properties. The discovery of phytochemicals may change how the nutritional value of food is assessed.

The world market for soybeans for food use is estimated at about 1 million metric tons (tonnes). In Japan alone about 830,000 tonnes are made into soyfoods as shown in a pie chart as follows: Tofu (552,000 tonnes, 63.4%), miso (180,000 tonnes, 21.5%), natto (90,000 tonnes, 10.7%), soymilk (10,000 tonnes, 1.2%), soy sauce (5,000 tonnes, 0.6%), and others (22,000 tonnes, 2.6%). In the USA the food bean market is estimated at 50,000 tonnes. Other major markets for food beans are in Korea, China, Taiwan, Hong Kong, Singapore, Malaysia, and Thailand. Food-grade soybeans can be sold by that the growers at a premium of 5-20% above the base price. The demand for food beans is increasing steadily. Address: 1. Vice President, R&D, Riceland Foods, Stuttgart, Arkansas; 2. Project Leader, Soy Food Lab., Jacob Hartz Seed Co., Stuttgart, Arkansas.

3826. Stevens, Jane Ade; Stevens, Roger. ed. and comp. 1995. U.S. soyfoods directory. Lebanon, Indiana: Indiana Soybean Development Council. 31 p. 28 cm.

• **Summary:** This first edition of the directory contains more than 270 company listings. The cover is checkerboard red and white. Contents: Forward [sic, Foreword]. How to use the Soyfoods Directory (incl. Internet access). Soyfood descriptions (alphabetical): Edamame (Sweet beans), food use soybeans (whole soybeans), organically grown soybeans, isolated soy proteins, lecithins, meat analogs (meat alternatives), miso, natto, nondairy (soy) frozen desserts, okara, soy cheese & yogurt, soy flour & grits, soy grits, soy meal & flakes, soy nuts, soy oil, soy protein concentrates, soy sauces (tamari, shoyu, teriyaki), soymilk, tempeh, textured soy proteins, tofu & products. Composition and nutrient content of soyfoods (large table, p. 7). Soybean products chart: From whole soybeans, from

soybean meal, from soy oil and lecithin. Soyfood companies by product (products listed alphabetically).

Soyfood companies (alphabetical by company name; Each listing contains address, contact, phone, soy products, product names, distribution, to locate product, classification). Soyfood companies by state (alphabetical by state; California has by far the most). Professional associations and industry information resources. U.S. soybean facts. Soyfoods directory survey.

This directory's address on Internet's World Wide Web is <http://www.in.net/soy>. For more information or suggestions, call 1-800-275-7679. Address: Stevens & Associates, 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 1-800-275-7679.

3827. Tanny, Armand. 1995. Soy for salubrity. *Muscle & Fitness* 56(8):74. Aug. *

• **Summary:** Soybean products.

3828. Fallon, Sally W.; Enig, Mary G. 1995. Soy products for dairy products? Not so fast. *Health Freedom Newsletter (Monrovia, California)* 14(5):12-20. Sept. [35 ref]

• **Summary:** Contents: Introduction. History of the bean. Fit for human consumption? Marketing the soybean? Processing denatures and dangers remain. Soy formula not the answer. Fabricated soy foods. Cancer preventing or cancer causing? Soy products are not complete. Only fermented soy products are safe. Another look at milk. Processing is the problem [that transforms healthy milk products into unhealthy ones]. Quality dairy products are available. Butter is a healthy food. Homemade formula best for babies. Contains two recipes for homemade formula: Milk based formula (based on unhomogenized raw organic milk plus lactose, cod liver oil, coconut oil, etc.). Milk free formula (based on 3½ cups of homemade broth, made from beef, lamb, chicken, or fish).

This article is written to scare people “who have turned to soy products as substitutes for dairy products,” and to sing the praises of natural (fresh, raw, and organic) dairy products. It is loaded with so much incorrect information and false conclusions about soybeans and their alleged dangers to human health that one does not know where to begin in starting to refute them. To take just a few such statements: (1) “The Chinese did not eat the soybean as they did other pulses (legumes) such as the lentil, because the soybean contains large quantities of a number of harmful substances.” Fact: The soybean, processed into a host of soyfoods using simple technologies, has been the main legume consumed in China since ancient times. It has long been referred to as “The cow of China.”

(2) Trypsin inhibitors in soybeans are “not completely deactivated during ordinary cooking and can produce serious gastric distress, reduced protein digestion and chronic deficiencies in amino acid uptake.” Facts: The

SoyaScan database contains 386 articles on trypsin inhibitors. When active, these proteins inhibit trypsin, a digestive proteolytic enzyme secreted by the pancreas, which helps us to digest proteins. Fortunately, trypsin inhibitors are almost completely deactivated by the typical cooking of soybeans to make soyfoods. There is no scientific evidence that the small percentage remaining has any adverse effects on human health, digestibility, or amino acid absorption. A considerable body of research, starting in the 1970s, shows that trypsin inhibitors have anti-cancer properties.

(3) “The soybean also contains hemagglutinin [sic, hemagglutinins], a clot promoting substance that causes red blood cells to clump together.” Fact: Like trypsin inhibitors, hemagglutinins are inactivated by ordinary cooking and have been a non-issue in the scientific literature for at least 10 years.

(4) Soybeans are high in phytic acids or phytates, which can cause health problems. “Only a long period of fermentation will significantly reduce the phytate content of soybeans.” “Oriental children who do not get enough meat and fish to counteract the effects of a high phytate diet, frequently suffer rickets, stunting and other growth... Parents would do well to ask their six-year old boys whether they would prefer to be six-foot-one or five-foot-seven when they grow up, before substituting tofu for eggs, meat, and dairy products.” Fact: Phytates and phytic acid are a two-edged sword. They appear to inhibit mineral absorption by forming tight chelates with a variety of polyvalent metals such as calcium, zinc, and iron. By virtue of forming a unique iron chelate, they suppresses iron-catalyzed oxidative reactions and may serve a potent antioxidant function in the preservation of seeds. By the same mechanism, dietary phytic acid may lower the incidence of colonic cancer and protect against other inflammatory bowel diseases. Twelve records in the SoyaScan database show phytic acid to have anticancer activity. In addition, they are one source of dietary phosphorus in the soybean.

(5) Aluminum content of soy formula is 10 times greater than milk-based formula, and 100 times greater than unprocessed milk. Aluminum has a toxic effect on the kidneys of infants, and has been implicated as causing Alzheimer’s in adults. Fact: Aluminium is the most abundant metal in the earth’s surface. It is harmless to humans except for infants with kidney failure—who should not drink soymilk. There is no solid scientific evidence indicating that aluminum causes Alzheimer’s disease; that theory, advocated by a few scientists 10 years ago, is no longer being pursued.

(6) Allergies to soy are almost as common as those to milk. Fact: Roughly 10 to 15 times as many infants are allergic to cow’s milk compared to soymilk. Since 1910 soy-based infant formulas have saved the lives of many

infants whose mothers could not breast feed and who were allergic to cow’s milk

The authors conclude that only traditional fermented soy products such as miso, natto, and tempeh, are safe.

About the authors (autobiographical): Sally W. Fallon, M.A. lives in Washington, DC, with her husband and 4 children. A member of the Price Pottenger Nutrition Foundation Advisory Board, she is a regular contributor to their quarterly journal. Mary Enig, PhD, is an expert in the field of lipid chemistry who has conducted many studies on *trans* fatty acids. She is also well known for a career of anti-hydrogenation and anti-margarine research and writing, with funding from the dairy industry. A large percentage of America’s margarine is made from soy oil.

Update: Printout of website named Mercola.com sent to Soyfoods Center by Sjon Welters of Cabot, Vermont. 1998. Nov. 6. The title of this 6-page website is “Avoid soy: Concerns regarding soybeans.” On the last page we read: “The above information was abstracted from an article written by Sally Fallon and Mary Enig, PhD. (an international expert renown [sic] in the field of lipid chemistry) for Health Freedom News in September of 1995.” Address: 1. M.A.; 2. PhD. Phone: 818-357-2181.

3829. Lamport, Rick. 1995. Soy to the world. *Granary News (Sarasota, Florida)*. Sept. p. 1, 3, 10-11, 14-15, 18-19. [1 ref]

• **Summary:** A humorous, fun-poking potpourri and overview of soyfoods and some of the new research on their medical benefits. “In reputation, tofu, tempeh, and miso are the Gabor sisters of natural foods, i.e., thought to have bad taste and serve no purpose. But in reality, they are more like the Bridges brothers. They take on many roles and always give an unusually good performance. Pity the poor bean curd. It deserves our consideration, use and approval. Tofu is not really an acquired taste. It is more an acquired texture.”

The author then coins some new soy words and phrases—which sound best pronounced with a Yiddish accent: Soyloiloquy, psycho-soymatic, Moonlight Soynata, Soyviet Union, soyilent majority, soyentific validation, lunasoy, soyonara.

A photo (p. 1) shows the rear end of a “Soyota” [Toyota] automobile bearing the license plate “Tofu Me—Florida Granary.”

3830. SunRich. 1995. SunRich (Ad). *Soya Bluebook Plus 1995-96*. p. 59.

• **Summary:** This one-third page black-and-white ad lists three categories of products: (1) Identity preserved specialty soybeans and grains: IP corn; Food quality soybeans available for soymilk, tofu, tempeh, miso, natto, sprouts, and soy sauce; Shipments available in containers, rail or bulk barge.

(2) Soyamilk powders: Spray-dried soymilk and tofu; Soy/dairy milk.

(3) Sweet Beans: Frozen green soybeans; Podded (*edamame*) or peeled (*mukimame*).

* Certified organic soybeans & products available.

Address: P.O. Box 128, Hope, Minnesota 56046. Phone: 1-800-342-6976 or 507-451-3316.

• **Summary:** Contents: Introduction. Soybean chemical composition. Unfermented soy foods: Soymilk, tofu (momen, kinugoshi or silken, packed tofu, aseptically packaged tofu, deep-fried tofu, kori tofu or dried-frozen tofu), other nonfermented soy foods (yuba, kinako or roasted whole soybean flour, fresh {edamame} and canned soybeans, texturized soy protein-based foods). Fermented soy foods: Miso, shoyu (soy sauce), natto, tempeh, sufu. Japanese Agricultural Standards. Identity preservation and transportation. Soybean quality characteristics: Overview, judging quality (tofu, miso, natto). Note: This is the earliest English-language document seen (Dec. 2005) that contains the term "roasted whole soybean flour."

Tables: 1. Nonfermented soy food products and common names by country. 2. Fermented soy food products and common names by country. 3. Chemical composition of soy foods. 4. Per capita annual consumption of soybeans (kg) in selected Asian countries (China, Indonesia, Japan, Korea, Malaysia, Philippines, Thailand; for the years 1968, 1978, 1988, 1994).

Figures: 1. Flowchart of refrigerated and shelf-stable soymilk production. 2. JAS seal of approval. 3. Diagram of equipment used in large scale tofu production (each piece of equipment is numbered and labeled). 4. Flowchart of regular tofu production. 5. Graph showing percent transmittance of whey versus coagulant concentration for soymilks at 6% solids made from Weber, Vinton, and Amsoy soybeans. A concentration of 0.023 N was selected as the optimum coagulant concentration, since it gave the most transparent whey. 6. Graph showing percent transmittance of whey versus coagulant concentration for Amsoy soymilk at concentrations of 4, 5, and 8% solids. Concentrations of 0.018N, 0.019N, and 0.035N, respectively, were selected as optimum coagulant concentrations. 7. Flowchart of kinugoshi (silken) tofu production. 8. Flowchart of packaged tofu production. 9. Flowchart of aseptically packaged tofu production. 10. Flowchart of kori (dried-frozen) tofu production. 11. Diagram of equipment used in large scale production of dried-frozen tofu (each piece of equipment is numbered and labeled). 12. Flowchart of miso production. 13. Diagram of

the interactive factors producing the characteristic attributes of miso. 14. Flowchart of tempeh production. Address: Iowa State Univ., Ames, Iowa.

3832. Albertson, Ellen. 1995. Super soy: The newest miracle food. *Self*. Oct. p. 148-151, 204. [1 ref]

• **Summary:** The subtitle continues: "Okay. One more time. Scientists are telling us they've found the nutritional Holy Grail, a simple food that prevents heart disease and cancer. Do we believe them? Yes!"

"Soy may be so effective that it actually crosses the line from nutritional to medicinal."

This article begins with a summary of the meta-analysis by Dr. James Anderson published in the *New England Journal of Medicine* (3 Aug. 1995). It reported soy in the diet can significantly lower high cholesterol." It also notes that: (1) "Genistein, a powerful natural chemical unique to soy," may stop the growth of cancer cells. (2) The natural estrogens in soybeans may "help alleviate postmenopausal symptoms." In Japan, where soy is typically eaten daily, there is no word for "hot flashes."

Photos and definitions of various soyfood products are given: Tempeh, soy flour, tofu, textured vegetable protein, soy milk. A section titled "15 delicious ways to add soy to your diet," gives serving suggestions for these and other soyfoods at breakfast, lunch, snack, and dinner.

A full-page table on p. 204 rates the best (B) and worst (W) of the following, with nutritional information, taste, texture, and comments: Hot dogs: B-Yves Veggie Cuisine Tofu Wieners. • **Summary:** Contents: Introduction. History and production. The benefits of soya: Nutrition, functional properties. Products & applications: oil-based products

(soya bean oil, soya lecithin), soya protein products (full-fat soya flours, defatted soya flours, soya concentrates, soya isolates), soya fibre products (incl. soy bran), whole soybean products or soya foods (soya milk or drink, tofu, yuba, soya sauce, miso, tempeh, natto). Trends and problems: Growing market for soy protein ingredients, U.S. soyfoods market, soymilk sales, problems of quality and image and legislation. Address: Editor, Soyfoods, England.

3834. United Soybean Board. 1995. The absolutely astounding supermarket soybean search. Chesterfield, Missouri: USB. 6 panels. 28 cm.

• **Summary:** This colorful, six-panel foldout contains a panoramic 4½-panel illustration of the inside of a modern supermarket. Each of the aisles and sections are marked. Additional signs show the many places that soy appears in the store.

The bottom half of the first page states: “Ever since the famous American chemist George Washington Carver began exploring the mysteries of this little legume near the turn of the century, the growth in food and technical uses for soybeans has been nothing short of astronomical. Today, every aisle of your local supermarket contains soybean products, and we’re not just talking tofu. Take a look at the astounding number of products containing soybeans at the Super Duper Food Store in Anytown, USA.”

A sidebar explains four symbols for marking foods made from whole soybeans (circle) or containing soy oil, soy lecithin, and soy protein or soybean meal. For example (moving from left to right): Margarine & spreads. Tofu. Tofu ice cream. Peanut butter (with soy oil). Desserts and Mixes (with soy oil). “Super Soy—Oh Boy” (Soymilk end display, by the case). Cooking oils. Mayonnaise, Salad dressing. New Chips Asoy! Sauces. A sign reading “Think soy.” Soya Snax. Soy Joy (in the refrigerated drinks section).

One full page, titled “Believe It,” gives a detailed alphabetical listing of 76 categories supermarket items that contain soy, and what type they contain. For example: “Cosmetics: Soybean oil. Crackers: Soybean oil, soybean oil shortening. Croutons: Soybean oil. Diet drinks: Soybean oil, soy lecithin, soy protein isolate.” Also included are: Soy sauce. Soy nuts. Tofu. Not mentioned: Miso. Soymilk. Meat alternatives. Address: 16305 Swingley Ridge Dr. #110, Chesterfield, Missouri 63017.

3835. United Soybean Board. 1995. Soybeans: How a little bean becomes an ingredient in thousands of products from margarine to tofu to chicken feed (Brochure). Chesterfield, Missouri: USB. 12 panels + poster. 23 cm.

• **Summary:** This attractive color publication is folded so that the first 12 panels are a brochure. However when fully unfolded, a large color poster appears. The brochure notes: In 1992/93 the USA produced 51% of the world’s soybeans.

An early history of the soybean in the USA [full of errors]. America livestock (including poultry) consume about 22.5 million tons of soybean meal a year. How soybeans are grown. Composition of the soybean. Foods made from soybeans: Edamame, miso, natto, soy milk, soy sauce, tempeh, tofu or soybean curd, full fat flour. Photos (each incorrect) in the brochure show: “1904: The famous American chemist George Washington Carver discovers that soybeans are a valuable source of protein and oil. 1920s: Combines first used to harvest soybeans. 1922: First U.S. soybean processing plant opens. 1929: Soybean pioneer William J. Morse spends two years in China, gathering more than 10,000 soybean varieties for U.S. researchers to study. 1940: Henry Ford takes an ax to a Ford car body to demonstrate the strength of the soybean plastic he has developed.”

The color poster (16 by 27 inches) is a cartoon showing how soybeans are processed into various products, including full fat flakes, crude and degummed soybean oil, soy concentrates, soy isolates, soy flours, and defatted soy flakes. A soybean utilization/processing diagram at the bottom of the poster shows 137 different products that can be made from the soybean, including 33 whole soybean products (“Traditional soyfoods” incl. tofu, soymilk, miso, tempeh, soy sauce, natto), 33 soybean meal products (26 edible uses + 7 feed uses), and 71 soy oil products (13 edible uses, 19 industrial uses, and 18 applications for lecithin). The seven types of lecithin applications are: Emulsifying agent (4 applications), nutritional (medical use, dietary use), anti-spattering agent (in margarine manufacture), stabilizing agent (in shortening), anti-foam agent (yeast manufacture, alcohol manufacture), dispersing agent (in paint, ink, and rubber manufacture, and in insecticides), and wetting agent (in cosmetics, paint pigments, and calf milk replacers).

Accompanying the brochure/poster is a note pad with the same slogan across the top of each sheet: “Soybeans—Designed for life.” Across the bottom is written: “United Soybean Board—Investing check-off dollars.” Address: P.O. Box 419200, St. Louis, Missouri 63141-9200.

3836. Ribbens, Bob. 1995. Traditional Foods Cooperative was changed to Earth Fire Products Co. in Feb. 1994 (Interview). *SoyaScan Notes*. Nov. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The change in name was accompanied by a change in ownership and structure—from a cooperative (which was a corporation) to a non-stock corporation. Bob made the change to reorganize the company’s decision-making process. It was sort of like a bankruptcy. Prior to the change, Bob was funding the company but other people were running it. They didn’t want to include him in the decisions. When he asked them to put up as much risk as he was putting up, as long as they wanted to make the

decisions, they decided they didn't want to do that. They made an agreement about reducing risk on a new product, but they didn't keep their side of the agreement and ran down cash funds by a large amount. Bob is now owner. The stock is not owned by the workers. None of the former workers are with the business any more. There have been many changes during the last 6 months.

Bob Mandel and Cindy Wiar made the first products, tofu and tempeh, on their own in May 1984. Bob Ribbens thinks that the date of Nov. 1986 is too early for seitan; he thinks the introduction date should be 1989. He never saw tempeh on sale in the community before 1989. In 1989 they decided to stop making tofu and tempeh commercially, and to switch to making seitan and miso. The meeting for interested people took place in 1988, not in 1989. The organization formalized in the summer of 1989.

Bob's company presently has the following products on the market: Long-term barley miso (started selling in Feb. 1995). Seitan in 14 oz retail and 5 lb bulk pack. Brown rice miso, Kickapoo chutney, mellow white miso. They plan to start selling their mellow barley miso at a local co-op this month (Nov. 1995). They also plan to introduce a barbecue seitan. They also sell miso by mail order. They no longer make tofu or tempeh—those markets are too competitive. Address: P.O. Box 92 (Corner of Grove and North Railroad Streets), Gays Mills, Wisconsin 54631. Phone: 1-800-267-6918.

3837. Kushi, Michio. 1995. Guide to standard macrobiotic diet: Kushi Macrobiotics Corp. edition. Becket, Massachusetts: One Peaceful World Press. 64 p. Nov. Illust. No index. 22 cm.

• **Summary:** Introduction. Part I—Basic principles of standard macrobiotic diet. Part II—Summary of daily dietary recommendations. Part III—Standard macrobiotic dietary practice: Whole grains, soup (incl. miso soup), vegetables, beans (incl. azuki beans, black soybeans, tofu, dried [frozen] tofu, tempeh, natto, okara), sea vegetables, fish and seafood, fruit, pickles, nuts, seeds snacks, condiments, seasonings, garnishes, desserts, beverages, modifications, helpful eating hints. Part IV—Proposed one week meal planner. Macrobiotic resources: The Kushi Institute, The One Peaceful World Society. Kushi Macrobiotics Corp. background (formed in May 1994 to market a line of natural, macrobiotic foods). Michio Kushi: Brief biography (Age 69, he is Chairman of the Board and Director of Research of Kushi Macrobiotics Corp.). On the rear cover is a portrait photo of Michio Kushi with his autograph in both English and Japanese.

Note: This book is designed to promote the Kushi Cuisine line of macrobiotic foods. A half-page black-and-white photo of that line of foods is shown facing the inside rear cover. The slogan is: "Perfect replacements for imperfect foods." Kushi Macrobiotics Corp. is located at

Three Stamford Landing, Suite 210, Stamford, Connecticut 06902. Phone: 203-973-2929. Address: Becket, Massachusetts.

3838. Melina, Vesanto; Davis, Brenda; Harrison, Victoria. 1995. *Becoming vegetarian: A complete guide to adopting a healthy vegetarian diet.* Summertown, Tennessee: The Book Publishing Co. x + 262 p. Foreword by Suzanne Havala. Index. 26 cm. [20 ref]

• **Summary:** An excellent vegetarian and vegan sourcebook and cookbook by three registered dietitians. Contents: Acknowledgements. Foreword. Introduction. 1. What is a vegetarian? 2. The evidence is in. 3. Without meat—exploding the myths. 4. Without dairy products. 5. Veganism: More food for thought. 6. Fats and oils: A balancing act. 7. Fiber: The gift from plants. 8. The vegetarian food guide: Putting it all together. 9. Vegetarian nutrition in the growing years. 10. Vegetarian diplomacy. 11. From market to meals. 12. Recipes: Simple treasures. Appendixes: 1. Glossary. 2. Nutrition recommendations.

This book contains a wealth of accurate, positive information about many different types of soyfoods (especially tofu) and related subjects, including tofu, soymilk, tempeh, miso, soy yogurt, soy cheese, soy sauce, tamari, and soy oil (incl. omega-3 fatty acids). Plus wheat gluten, seitan, rice milk, sea vegetables, adzuki beans (p. 66, 162), quinoa, amaranth, macrobiotics, phytochemicals, plant estrogens found in tofu and other soy products (p. 75; they may contribute to positive calcium balance and have a protective effect on the bone health of Chinese and Japanese women), dietary fiber.

Talk with Vesanto Melina. 1996. July 22. This book was originally published in Canada in May 1994 by Macmillan Canada in Toronto. A revised U.S. edition was published in Nov. 1995 by The Book Publishing Co. in Summertown, Tennessee. Address: Canada.

3839. Ledvinka, Ferro. 1995. *Introducing macrobiotics and soyfoods to Italy (Interview).* *SoyaScan Notes*. Dec. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ferro was a pioneer of macrobiotics in Italy. In the process he also helped to introduce soyfoods, especially to Florence. He first learned about macrobiotics when he read a book on macrobiotics in Italy. He started eating a macrobiotic diet. In Rome there was a macrobiotic center founded and run by Marquesa Parvolo, who had been cured of leukemia or a blood disease by George Ohsawa several years before. In 1971 he heard a lecture at this center in Rome by Rob Dobrin, who gave him Michio Kushi's address in Boston, Massachusetts. In the summer of 1972 he traveled to Boston to study macrobiotics, and there he learned how to make tofu and seitan. After leaving the USA, he returned to Italy, living in Rome. From there he worked

to spread macrobiotic food and philosophy to all major Italian cities.

In Jan. 1977 Ferro went to Japan to work with Mr. Kazama at Mitoku, exporting macrobiotic foods to Italy and other European countries. The first Italian company to order these foods (including Japanese miso and tamari) was ProBios in Florence. They were followed by two Italian Macrobiotic Centers, located in Rome and Milan. In Oct. Ferro left Japan, returned to Italy, lived in Rome for a while, then moved to Florence, where he established the pioneering Fondazione Est-Ouest at via de Serragli 4, in Florence. This was a combination macrobiotic restaurant and macrobiotic study center. Ferro also worked for a while with ProBios. He taught various people to make tofu, seitan, and tempeh—but none of the restaurant customers would buy or eat these strange new foods. So Ferro decided to fry them and serve them as a snack, free of charge, before each meal. A Tuscan proverb says that “Even a slipper, if fried, tastes good.” In this way people in Florence started to eat these new foods. The restaurant made and served these foods from about 1982 to 1985. Then people who were working in the restaurant moved to another place, became independent, and they started a small food factory named Soyalab. The founder of Soyalab, Matteo Iacovelli, is now the chairman of the Kushi Institute in Milan. Another person who helped a lot on the way was Alfredo Ingannamorte. These people learned how to make tofu and tempeh in Boston. Alfredo studied at the Kushi house in Becket. Matteo worked at a macrobiotic restaurant (Open Sesame) in Brookline Village. Address: Via Pellicceria 6, 50123 Firenze (Florence), Italy. Phone: 055-827 274.

3840. Huang, Hsing-Tsung. 1995. Early history of soybeans and soyfoods in China (Interview). *SoyaScan Notes*. Dec. 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The early *jiang* in China was made from meat or fish. The *jiang* used by Confucius was almost surely made from meat and fish. Many of the ancient books were annotated during the Han dynasty in an attempt to explain the meaning of certain words and passages. A very eminent scholar in the late Han dynasty (about 100 A.D.), talking about events in roughly 500 B.C., said that the *jiang* used by Confucius was made from meat and fish.

The soybean was not an important crop in China until the early Han, say 200 to 300 B.C. The soybean is mentioned in the *Book of Odes*, which is the most ancient and most reliable of Chinese books, not as a crop but as a plant that people gathered from the wild. Then there are a series of books that were traditions of the Chou dynasty; these were codified and gathered by about 300 B.C., but in them there are not many references to the soybean. However by the time of the Western (Former) Han (206 B.C. to 8 A.D.) there were references in the literature to cartloads and big urns of *jiang* [Chinese-style miso]; *shi* (fermented soy

nuggets) was also mentioned many times in the literature. Both these foods had become commodities.

Soy is also found in the Han Tomb No. 1 at Ma-wang-tui (pronounced “ma-wang-DUI”), a big archaeological find in China. A woman ruler was buried here in about 165 B.C. with all the 5-6 major grains, including wheat, barley, rice, 2 kinds of millet, soybean (*shu*), and hemp. Also found in the tomb were several seasonings including “soy sauce (*jiang*), *shi* (‘salted darkened beans’), and leaven (*qu*).”

The earliest reference to pasteurization in China concerns pasteurization of wine, around the 11th century, long before the Japanese were pasteurizing shoyu before shipping it to Holland. He is not aware of any early reference to the Chinese pasteurizing soy sauce, but he will look again. However soy sauce is so highly salted that it does not require pasteurization, whereas wine does. The wine was filled into earthenware jars with a small mouth, which was covered with cloth or leaves, then sealed with mud.

Dr. Huang will travel to China next month (to Foochow, capital of Fujian province) and he hopes to see some of the existing traditional fermentation processes. Soymilk was not an important traditional food in China, but it was becoming important when he traveled there in the 1940s with Dr. Joseph Needham. When they visited northern China, early in the morning people would have a huge iron wok of hot soymilk, which they sold for breakfast. Joseph liked the soymilk with bits of *youtiao* (deep-fried bread sticks; W.-G. *yu t'iao*).

One of the chapters in Dr. Huang's book deals with nutrition in China. The Chinese diet is said to be lacking in calcium. It is well known that for calcium to be absorbed, you need lactose, and the ability to tolerate lactose. Thus, it would be surprising to find higher bioavailability of the calcium in soymilk or tofu. Before the time of Confucius (551-479 B.C.) the Chinese ate a lot more animal products than they do now, but the agricultural system developed with the emphasis on grains, less emphasis on animal products, and no emphasis on milk—probably because of the lactose intolerance of the Chinese people. Thus, the Chinese never developed a dairy industry. Mongols are not as lactose tolerant as northern Europeans, but they are heavily dependant on animal milks as a source of food. They get around this problem by converting animal milk into yogurt. This fermentation converts the lactose to lactic acid, which both solves the lactose intolerance problem and extends the life of the product by lowering the pH.

Another interesting problem: Europeans are the only ones who make true cheese, using rennet. The Mongolians and all the pastoral people in Asia rely on various animal milks, including horse's milk to make koumiss, and they even make a type of cheese that is sort of like cottage cheese, coagulated by acid. Dr. Huang thinks the discovery of rennet is one of those major, accidental discoveries that is

very rare. If you wash an animal stomach carefully before using it to store milk, that will wash all the rennet away. Another such major discovery is the Chinese discovery of *chu* or koji. Address: 309 Yoakum Parkway #403, Alexandria, Virginia 22304.

3841. Behling, Ann. 1995. Soybeans: A natural cancer fighter. *Soybean Digest*. Dec. p. 26a.

• **Summary:** A recent study by the National Cancer Institute [Howe et al. 1992, published in *J. of the National Cancer Institute*, 84:1887-96] shows that the risk of colon cancer in the USA could be reduced by about 31% with an average increase in fiber intake of about 13 grams per day. The current average U.S. per capita intake of dietary fiber is only about 11 grams per day, while the recommended intake is 20 to 35 gm/day. Joanne Slavin, a professor in the Department of Food Science and Nutrition, University of Minnesota, says that whole soybeans offer the best source of soy fiber, followed by soy flour, miso, and tempeh.

3842. Grain & Salt Society, Inc. 1995. A grain of salt newsletter: Fall/winter 1995/96 [Includes mail order catalog]. Magalia, California. 12 p. 28 cm.

• **Summary:** This newsletter includes a mail order catalog. Soy-related products include: Junsei Yamazaki Barley Miso. Contains excerpts by Selina DeLangre from *The Book of Miso*, by Shurtleff and Aoyagi, plus miso recipes. Senior editor: Philippe DeLangre. Research editor: Bill McKellar. Address: P.O. Box DD, Magalia, California 95954. Phone: 1-800-867-7258.

3843. Ontario Soybean Growers' Marketing Board Newsletter. 1995. Profiles: W.G. Thompson & Sons Ltd., white hilum soybeans and Ontario's railroad system. Dec. p. 7.

• **Summary:** John O'Brien, Manager of W.G. Thompson & Sons Ltd., predicts that premiums for white hilum soybeans will virtually disappear within five years. Instead, more soybean growers will be locking in premiums by growing special varieties that companies such as Thompsons will contract and ship for specific Asian customers. "Thompsons, a \$300 million a year family-owned business with 300 employees, has already earned a name is special quality crops. From its 14 Ontario elevators, the company works with farmers on 75,000 to 100,000 acres of contract crops each year, with over half that acreage going to soybeans."

White hilum soybeans have become just another commodity in Ontario, says Wes Thompson Jr. The future lies in going the next step, in sitting down with customers and finding out exactly what they want in a soybean, and then producing and shipping those soybeans for them as part of a long-term relationship. Thompsons is already contracting specific varieties for exclusive delivery to

individual Pacific Rim makers of tofu, miso, and natto. At Pain Court, the company is also installing a high-tech sorting line that will enable it to sort for shape and color, and to completely eliminate foreign material. At the same time, Thompsons isn't getting out of the huge and profitable crush market. To prove that, it is playing a leading role in the campaign to save Ontario's rural rail network.

Thompson's Hyland Seeds Division sold 14 private and 8 SeCan (public) varieties in 1995; it expects to sell 24 private and only 4 SeCan varieties in 1996. Address: Box 1199, Chatham, ONT, Canada N7M 5L8. Phone: 519-352-7730.

3844. **Product Name:** [Kikko Mensi Sauce].

Foreign Name: Kikko Salsa Mensi.

Manufacturer's Name: Kikko Corporation S.A.

Manufacturer's Address: Calle Robert Fulton No. 115, Lima 3, Peru. Phone: 326-1358 or 326-0955.

Date of Introduction: 1995.

Ingredients: Soybean paste, shoyu, garlic, sugar, and wine vinegar.

Wt/Vol., Packaging, Price: 350 ml (11.84 fl oz.) plastic bottle.

How Stored: Shelf stable.

New Product-Documentation: Company history form filled out and label sent by Marco Kamego, a present owner of Kikko Corporation S.A. 1997. Dec. 29. Label: 7.5 by 2.75 inches. Full-color front panel on tan-orange and white. Color illustration of a turkey on a plate surrounded by vegetables. "Sauce for seasoning all types of meats. The ideal sauce for baked turkey" (*Salsa para aderezar todo tipo de carnes. El Adobo ideal para el pavo al horno*).

3846. Grogan, Bryanna Clark. 1995. The (almost) no-fat holiday cookbook: Festive vegetarian recipes. Summertown, Tennessee: The Book Publishing Co. 192 p. Index. 21 cm. [26 ref]

• **Summary:** This low-fat vegan cookbook, containing a wealth of soy-related recipes, features 18 menus for celebrating holidays from around the world. Address: Denman Island, east of Vancouver, British Columbia, Canada.

3847. Hagler, Louise. 1995. Lighten up! Tasty, low-fat, low-calorie vegetarian cuisine. Summertown, Tennessee: The Book Publishing Co. 160 p. Illust. Index. 23 cm.

• **Summary:** This is a vegan cookbook containing over 130 easy-to-prepare recipes, including many soyfoods recipes:

about 26 tofu recipes, 5 tempeh recipes, 7 textured vegetable protein recipes, and 3 miso recipes, plus recipes using wheat gluten and quinoa.

Contents: Introduction. Snacks and appetizers: Dips and spreads, salsas, finger foods, fresh juices. Salads and dressings: Salads as a main dish, light salads, salad dressings, sauces and pestos. Soups: Main dish soups, light soups. Mainly beans. Mainly grains. Mainly pasta. Mainly tofu, tempeh and: Textured vegetable protein. Vegetables: Greens of all kinds, spring and summer vegetables, fall and winter vegetables. Lighter sweet things: Lighter pies, cakes, tarts and cookies, lighter sweet toppings, fruit treats.

A color photo on the rear cover shows “Louise Hagler, best-selling author and editor of *Tofu Cookery*, *Tofu Quick and Easy*, and the original *Farm Vegetarian Cookbook*, has been a creative vegetarian since 1969.” Address: Summertown, Tennessee.

3848. Herbst, Sharon Tyler. ed. 1995. *The new food lover’s companion: Comprehensive definitions of over 4000 food, wine, and culinary terms.* 2nd ed. Hauppauge, New York: Barron’s. xvi + 715 p. 18 cm. 1st ed. published 1990. Barron’s Cooking Guide. [325* ref]

• **Summary:** This carefully researched and well written dictionary of food terms also contains 21 useful appendixes and a good bibliography. All enquiries should be directed to: Barron’s Educational Series Inc., 250 Wireless Blvd., Hauppauge, New York 11778.

Soy and related entries can be found under the following headings: Adzuki bean (also azuki), agedashi, cheese-imitation cheese (generally includes tofu and lecithin), Fermented black beans (also called Chinese black beans and salty black beans), flour-gluten flour, kecap manis / ketjap manis, kudzu, milk (see soy milk), miso, natto, okara, queso fresco (also called queso blanco), quinoa, seitan, shoyu (Japanese for soy sauce), soybean, soybean oil, soy flour, soy milk, soy pea (see soybean), soy sauce (light soy sauce, dark soy sauce, Chinese black soy, tamari), tempe or tempeh, tofu (also called soybean curd and bean curd).

3849. Kushi, Michio; Jack, Alex. 1995. *Das grosse Buch der Makrobiotik: Ein universaler Weg zu Gesundheit, Glueck und Frieden* [The big book of macrobiotics: A universal way to health, happiness, and peace]. Munich, Germany: Droemer Verlag. [Ger]* Address: Boston, Massachusetts.

3850. Masuoka, Hiroshi. 1995. *Masuo-san no oishii miso zukuri: wakasa no kenkô no moto* [Mr. Masuo’s way of making delicious miso: The source of youth and health]. Tokyo: Jakometei Shuppan. 110 p. Illust. (color). 21 cm. [Jap]* Address: Japan.

3851. Northrup, Christiane. 1995. *Heal your symptoms naturally.* Potomac, Maryland: Phillips Publishing Inc. 18 p. 28 cm.

• **Summary:** In the section titled “Natural healing for menopause” (p. 1-3) Dr. Northrup advises women to take natural progesterone, since their body stops producing its own progesterone during menopause. This supplement provides relief from both hot flashes and mood swings for many women. “For two weeks out of every month, use a little progesterone cream on the soft areas of your skin, changing sites often... Another form of natural progesterone is plant progesterone. There are many sources. The most common are soy foods and yams (not sweet potatoes).” Also take a safe form of estrogen-estriol. It can be applied as a vaginal cream and may protect against breast cancer. “Natural estrogens such as estriol have been in use for over 50 years, and are considered generic. Although these natural hormones aren’t very common in the U.S., estriol is one of the more popular estrogens in Europe.” To find a U.S. source call the Women’s International Pharmacy at 1-800-279-5708.

“Natural plant hormones with estrogen-like effects are found in soy products, such as soy milk, tofu and miso, in addition to cashews, peanuts, oats, corn, wheat, apples and almonds. Japanese women go through menopause more easily than American women, partly because their diet is so high in the natural estrogens found in soy products. (Note: If you still have your uterus, never take estrogen of any kind without balancing it with progesterone.)”

In the section titled “Natural healing for breast cancer” (p. 6-7) notes that you can lower your risk through diet. “Eat soy products, You can also protect your breasts with tofu. A study published in the September 1994 issue of the *American Journal of Clinical Nutrition* demonstrated that women who ate 60 grams of soy protein per day (about 2 ounces) had changes in the estrogen levels that were similar to the effects of tamoxifen—an antiestrogen drug that is undergoing study as a possible prophylactic agent in women who are at high risk for breast cancer.

“The effects of soy protein on hormonal levels are thought to be from estrogen-like substances in soybeans called isoflavones. These behave like partial estrogen agonists/antagonists, which means they help increase the effects of estrogen in women who have estrogen levels that are too low, while helping to decrease the effects of estrogen in women whose estrogen levels are too high.

“While we’re waiting for more research on the subject, I’d recommend adding soy protein to your diet regularly. In addition to tofu, soy protein is found in tempeh, miso and natto. These products are sold in many grocery stores and in almost all health food stores.” Address: M.D. (gynecologist), Women to Women, Yarmouth, Maine.

3852. Kushi Macrobiotics Corp. 1996. Kushi Cuisine order form. Stamford, Connecticut. 2 p. Revision #3. Jan. 19.

• **Summary:** This 1-page (back-to-back) photocopied order form lists 26 meals, seasonings, and snacks, which range in price from \$4.39 to \$0.99. Soy-related items include: Buckwheat noodles (soba style) + soy-ginger sauce (4 servings, \$4.39). Quick brown rice + red azuki beans & onions (4 servings, \$2.59). Instant miso soup + garden & sea vegetables + shiitake mushrooms (12 servings, \$3.99). Instant chicken-free vegetarian noodle soup + tofu & mushrooms (6 servings, \$3.99). Traditional premium (shoyu style) soy sauce (10 oz, \$2.99). Wheat-free premium (tamari style) soy sauce (10 oz, \$3.59). Postage for \$0 to \$10.00 is \$4.95. Address: P.O. Box 1434, Stamford, Connecticut 06904. Phone: 1-800-200-4184.

3853. GEM Cultures. 1996. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 10 p. Jan. [4 ref]

• **Summary:** New additions include *The Simple Soybean and Your Health*, by Virginia and Mark Messina, and a maple tofu kit. Contents: Soycrafters Section: Tempeh, natto, koji starters, miso, koji, tofu boxes, tofu coagulants (natural nigari, Terra Alba naturally occurring calcium sulfate or gypsum). Books. Bread cultures. Dairy cultures. Tea fungus–Kombucha. Sea vegetables. Kitchen items. Ordering information. Address: Fort Bragg, California. Phone: 707-964-2922.

3854. Soyfoods Center archival collections, from the 1600s ongoing. 1996. Lafayette, California. [6313 ref]

• **Summary:** As of 1 Jan. 1996 the Soyfoods Center Archives contains 6,313 unpublished archival documents—mainly correspondence, interviews, photographs, and unpublished manuscripts relating chiefly to the history of soybeans and soyfoods, and to a lesser extent, the history of vegetarianism and natural foods.

Main subject areas include: early history of soybeans and soyfoods; modern soy protein products; soyfoods industry and market; industrial utilization of soybeans; soy pioneers in the U.S., Europe, and worldwide; major U.S. soybean crushers; Seventh-day Adventists worldwide; pioneer U.S. soy protein companies; pioneer U.S. natural food companies and distributors; soybeans, soyfoods, Third World nations, and world hunger; nutritional and medicinal value of soybeans and soyfoods; and soybean production, trade, and marketing.

Document level access is available through the repository's SoyaScan information retrieval system.

Most important specific subject areas: Miso, natural foods, Seventh-day Adventists, soy sauce, soybean, soybean industry, soybean products, soyfoods, soyfoods industry, soymilk, tempeh, tofu, vegetarianism. Address: P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

3855. Connolly, Maureen. 1996. Have you had your tofu today? For the health-conscience, soy has become the superfood du jour. Is it all it's cracked up to be or the next incarnation of oat bran? *Women's Sports and Fitness* 18:62-63. Jan/Feb. [3 ref]

• **Summary:** Studies show that soy can reduce your risk of coronary disease. A 1990 study by the National Cancer Institute identified five anticarcinogens present in soybeans. As little as 25 gm/day of soy protein can be beneficial to health, and many soy products are now on the market. The author talks about "soy's new celebrity" and asks her readers "why not try tofu?"

A sidebar titled "A smorgasbord of soy" (p. 63) gives a brief description of the following soy products: Isolated soy protein, miso, soybeans, soy flour, soy milk, tempeh, textured soy protein (TSP), and tofu. Address: New Jersey.

3856. Hagler, Louise. 1996. Soyfoods cookery: Your road to better health. Summertown, Tennessee: The Book Publishing Co. 160 p. Illust. Index. 21 cm. Introduction by Mark and Virginia Messina.

• **Summary:** Contents: Foreword, by Louise Hagler. Introduction, by Mark Messina and Virginia Messina: Introduction, soybeans—a powerhouse of nutrition, soy and cancer (soybeans—a phytochemical factory, genistein and non-hormone cancers, soy and cancer treatment, isoflavones in the diet), soyfoods and heart disease—beyond cholesterol, soyfoods and bone health, soyfoods and kidney disease, menopause, perspective on soyfoods, about the Messinas. Basic soyfoods (glossary): Whole soybeans, fresh green soybeans, soymilk, okara (soy pulp), soymilk powder, soy protein concentrates, soy protein isolates, tofu, freeze-dried tofu, tempeh, textured vegetable protein, miso, soy flour or grits, yuba or bean curd stick or sheet, natto, soy sauce, soy oil, soy lecithin, convenience soyfoods (frozen soyburgers, frozen tamales and burritos, frozen soy hot dogs or wieners, frozen fat-free soy ground meat replacement, frozen soy pizza, tempeh burgers, frozen tofu lasagne, stuffed shells, manicotti, tortellini or ravioli, frozen soy breakfast links or "sausages" or tempeh "bacon," "ground" tofu, meatless chili mixes, meatless burger mixes, soy "cheeses," eggless soy mayonnaise, tofu salad dressings, soy ice creams, frozen pot pies, frozen pocket breads, instant miso soup, eggless soy cake, quick bread, pancake and waffle mixes, liquid soy coffee creamer, smoked or baked tofu). Feeding babies and children soyfoods. Breakfast, brunch & bread. Whole soybeans. Sauces, spreads, dips & dressings. Soup & salad. Main dishes. Desserts. Drinks & yogurt.

No dairy products or eggs are used; honey is called for in some recipes. Optional microwave instructions are sometimes included. Address: Summertown, Tennessee. Phone: 615-964-3571.

3857. Stacy, Michelle. 1996. Can soy save your life? Michelle Stacy separates hype from hope. *Food & Wine*. Feb. p. 88-94, 96. [1 ref]

• **Summary:** This story is based on the study by Dr. James Anderson in the *New England Journal of Medicine* (Aug. 1995). "In its cholesterol-busting guise, soy bears an eerie resemblance to another unglamorous food: oat bran."

"A growing body of evidence suggests that it [soy] may help prevent certain cancers, slow calcium loss from bones and moderate symptoms of menopause. Many of these effects, researchers posit, are due to natural substances in soy called isoflavones, which resemble the hormone estrogen and may replicate the many protective effects of estrogen without any of its drawbacks."

But many marketers, including Ronald Paul (president of Technomics, a food-consulting firm in Chicago) believe that soy has a bad image. "It's going to be a marketing challenge to change the public's view of it. I always like to say that if you can make the kiwi a success you can make anything a success." Will companies start to promote their products by advertising on the package "Excellent source of soy!?" Another obstacle to acceptance for some people that tofu reminds them of the health-food era of the 1960s.

Photos show the following packaged soyfoods, each with a brief description: Edamame, soy sauce, soy milk, soy flour, miso, tempeh, roasted soybean powder, tofu. Contains the following recipes, each accompanied by a color photo: Grilled tofu salad. Miso-carrot dressing. Tempeh sandwiches. Chili con tofu. Miso-clam soup. Fried tofu with mushroom gravy. Miso-stuffed chicken. Silken tofu in ginger syrup. A full-page color photo shows green vegetable soybeans in and around one large pod. Small photos show most of the recipes, plus a field of soybeans, and a farmer holding a young soybean plant. Address: Author of *Consumed: Why Americans Love, Hate, and Fear Food* (Simon & Schuster).

3858. Macdonald, Bruce. 1996. New developments at Macrobiotic Company of America (MCOA). Acquisition of Mountain Ark Trading Co. in Fayetteville, Arkansas (Interview). *SoyaScan Notes*. March 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce's Macrobiotic Company of America (MCOA) used to sell tofu kits to Mountain Ark but then they stop re-ordering because they planned to sell the company. When Mountain Ark was under the stewardship of Frank Head and others they were macrobiotic oriented. But 3½ years ago Frank sold the company to Ozark Cooperative Warehouse in Fayetteville. "There wasn't a person in that organization that ever had a bowl of miso soup in their life—I don't think. So they began to steer the company away from macrobiotics toward a mainstream natural food company. One of the first things they did was

to put in a line of tomato products. So their macrobiotic customers began to run away."

MCOA acquired Mountain Ark on 1 Feb. 1996. Bruce purchased the company name, toll-free phone number, and mailing list of 5,700 customers. He did not purchase any of their inventory. The company is now located at 799 Old Leicester Highway, Asheville, North Carolina 28806—at MCOA. Phone: 1-800-643-8909. Bruce plans to carry the tofu kit on a regular basis—though it sells slowly. The kit is imported from Japan. The cost changes with each container imported. It retails for about \$20-25.00. In Oct. 1993, Mountain Ark sold the kit for \$36.99 + \$4.95 shipping.

The innovation of this whole scenario is that, over the last 10 years or so, all of the companies that were involved with macrobiotics either went bankrupt or ran away from it. When Bruce took over MCOA 3 years ago he changed its direction and went headlong into becoming the largest variety supplier of macrobiotic foods on the planet. The company started to grow—even in the big natural foods stores—such as Fresh Fields. Macrobiotic foods is the most misunderstood category in the health food industry. For the big stores he printed up a best-seller list of 200 items that could be put in a "macrobiotics section." Now Bruce is in the process of putting macrobiotic sections in all the Fresh Fields stores. "Because we import direct then distribute direct to retail stores, we are able to offer them prices on these foods that are 25-30% less than a normal distributor. The old way of doing business was, for example, Eden Foods imports it, marks it up 30 or 35%, and sells it to Cornucopia, who marks it up 25-30% and sells it to the store." His wholesale and retail catalogs have a great selection of foods. The only difference is that the retail prices are 10% higher. These low retail markups give a real break to macrobiotic consumers. MCOA also provides information by phone.

Note: MCOA is owned equally by Muso Shokuhin of Japan and by Bruce Macdonald. Address: President, Macrobiotic Company of America, Asheville, North Carolina 28806. Phone: 704-252-1221.

3859. Macdonald, Bruce. 1996. Big problems at Kushi Macrobiotics (Interview). *SoyaScan Notes*. March 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michio and Aveline have big problems on their hands at their new company Kushi Macrobiotics. "Basically, you've got a bunch of high rollers from the commercial food industry thinking that, with slick packaging and cheap ingredients, they can create a product line that is double the price of Fantastic Foods' and not nearly as good in quality... They just don't have a clue of the sophistication of the natural foods shopper. They've got five guys each making \$125,000 a year, and they haven't sold a thing yet. Norio Kushi is making \$80,000 a year, and he is barely at the level

of knowing how to brush his teeth in terms of business experience.”

Its just amazing. They raise \$1 million privately to start off with. They blew through that with surveys, etc. As Jimmy Silver said aptly, ‘Basically what they found out with their million dollars was that people weren’t interested in what they were selling.’ What they are doing is basically the antithesis of what macrobiotics stands for. Then they proceeded to use no organic ingredients and made it a corporate policy to not use anything from Japan—except brown rice vinegar, of which they are buying a low quality product from Eden Foods. They then raised 6 million with a public offering, and now have less than \$4 million left. They are going through money like crazy. They have a 40,000 square foot warehouse in New Jersey, with 10,000 square feet of offices and 3 people in there. None of the distributors that Bruce knows have picked up the Kushi line.

One little disaster got the president fired. They did a line of 4-5 bean dishes. Some jerk didn’t realize that you don’t add salt to beans when you cook them. So they advertised a 25-minute cooking time on the package; well you could cook this for 25 years and it would never be right. So this guy ordered a production run worth hundreds of thousands of dollars, without checking it with Michio, who is in charge of quality control. It is all garbage.

So 3 weeks ago Aveline called up Bruce in a panic. She thought she was creating another Erewhon. There is a peculiar lack of judgment throughout this whole process. Since Michio is in charge of quality, they do production runs of the whole line and then they send the finished products to Michio. Aveline tried tasting this bean dish and a few others and she was horrified, just beside herself. She says to Bruce, “We want to buy your company.” Bruce says, “Okay, \$5 million and you can have it.” Bruce went to the Kushi’s home in Brookline and spent 3 days with them. Aveline looks better and healthier than she has in years. They are now planning to go an acquisition binge; the first company they have their sights on is some cracker company. “I laid out a plan for them, including a major change in the 7-member board of directors. Michio can remain as chairman. You can keep three of the ‘financial wizards’ on the board, but the other three have got to be Yuko Okada (of Muso Shokuhin), Christopher Dawson, and me. We’ll take all the losses at the beginning, then turn the company into a worldwide macrobiotic company.”

Bruce’s Macrobiotic Company of America is doing very well financially. When he acquired it, sales were less than \$900,000 a year. This year he will probably do \$3 million. Everyone from Lenny Jacobs on down told Bruce that macrobiotics was dead. True, it has changed, but it alive in new ways. For example, a guy name Horse Schultz is the chairman of the Ritz-Carleton Hotel Chain; he is having his chefs trained at the Kushi institute, and has sent out a memo

to all of his hotels worldwide that by a certain date they will be offering macrobiotic quality meals at all hotels in addition to the traditional fare. They are converting one hotel at a time. Bruce is now flying miso down to Cancun. Horse Schultz’s cancer is now in remission. Address: President, Macrobiotic Company of America, Asheville, North Carolina 28806. Phone: 704-252-1221.

3860. Mountain Ark Trading Co.; Macrobiotic Company of America. 1996. The “new” Mountain Ark consumer direct catalog—spring 1996 [Mail order]. 799 Old Leicester Hwy., Asheville, NC 28806. 37 p. March 15. 28 cm.

• **Summary:** This is a very comprehensive mail order catalog, with an excellent index, for macrobiotic whole foods, specialty cookware, cookbooks and books on natural healing, futons, furniture, etc. Soy-related products include: Aduki beans—precooked, amaranth, amazaki concentrate, amazaki [amazake] pickles, arame (sea vegetable), barley malt, black soybeans, brown rice malt, brown rice syrup, cookbooks, dulse (sea vegetable), fu (dried wheat gluten), green nori flakes, hamanatto, hijiki, Hokkaido azuki beans, Hokkaido black soybeans, Japanese plums (*umeboshi*), jinenjo soba, Job’s tears, kamut, kanten bars, kelp granules, kinako, kombu cha, kuzu, miso, mochi, natto miso, natto starter spores, nigari, nori, quinoa, sea palm—California, seaweed sesame shake, seaweed cookbook, seitan, shoyu, soy sauce, tamari, tofu making kit, tofu—dried, wakame. Many of these products are imported from Japan.

Bruce Macdonald of Macrobiotic Company of America acquired the company from Frank Head of Fayetteville, Arkansas, on 1 Feb. 1996. The entire catalog can be viewed on the Internet at <http://www.mountainark.com>. Address: Asheville, North Carolina. Phone: 1-800-643-8909.

3861. Yoshihara, Yasuo. 1996. Update on Shin-Mei-Do Miso Co. (Interview). *SoyaScan Notes*. March 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Yasuo speaks with a slight Japanese accent. Shin-Mei-Do Miso Co. is active and growing. They make brown rice miso and barley miso, each sold in 450 gm and 4.5 kg plastic tubs. Lulu does the bookkeeping. The demand for their miso on the west coast of Canada is increasing so they stopped distributing to Eastern Canada. Within the last week a person from eastern Canada called him about starting a miso factory in eastern Canada, and he had a similar enquiry last year. He may be interested in teaching potential miso makers as an apprentice for pay—depending on the conditions. Shin-Mei-Do sells all of its miso to natural foods wholesalers. Amano in Vancouver makes most of the miso sold in Oriental food stores in British Columbia. Moreover, a huge amount of miso (many tons) is imported from Japan. Westbrae packages imported Japanese miso and has nothing to do with Amano—as far as Yasuo knows. Yasuo doubts that Amano ever made miso for Westbrae.

Yasuo has never made miso to be sold under another brand. Shin-Mei-Do is basically still a very small operation. Yasuo does not want to become a big company where the miso is made largely by machines. Address: Shin-Mei-Do Miso Co., 5 Wren Road, Denman Island, BC, Canada V0R 1T0. Phone: 604-335-0253.

3862. Albert-Matesz, Rachel. 1996. Have you had your miso today? *Let's Live* 64(4):80-82. April.

• **Summary:** Discusses the different types of miso and its health benefits. Address: Seattle, Washington.

3863. Goulart, Frances Sheridan. 1996. Oh, soy! *Fit (New York)*. March/April. p. 77-79.

• **Summary:** On the section titled "A nutritional wonder," the authors notes that soymilk has 15 times more iron than dairy milk, 50% less fat, and no cholesterol. Tofu is one of the two best sources of calcium (yogurt is the other) recommended by the Osteoporosis Foundation for meeting adult calcium needs (1,000 mg/daily). One 4-oz. serving of tofu provides twice as much calcium as one cup of plain yogurt. Soybeans provide the antioxidant vitamins A and E.

A sidebar titled "Your soy shopping list" gives brief definitions of tofu, tempeh, miso, natto, soy milk, soy cheese, soy sauce, and textured vegetable protein (TVP). Address: Connecticut.

3864. *Soyfoods (ASA, Europe)*. 1996. New soya products at FiE '95. 7(1):6-7. Spring.

• **Summary:** "Every year the Food Ingredients Europe Exhibition seems to get bigger and bigger, with more exhibitors and more visitors." Last year's FiE, held 7-9 November 1995 in Frankfurt, Germany, was no exception, and many soy products—especially soy sauces and related seasonings—were on display.

Miwon Co. Ltd. (Seoul, Korea) has developed a range of ingredients under the brand name SoyaDeli. Products include FiberPro, PeptiPro, FlavorPlus, and FlavorBase.

Kikkoman Trading Europe GmbH (Heerdter Lohweg, Germany) introduced FVP Paste, made by enzymatic hydrolysis and concentrated in a vacuum.

Wan Ja Shan International (Middletown, New York) is one of the largest makers of naturally brewed soy sauce and Oriental sauces in the USA. Their products include soy sauce, preservative-free soy sauce, stir-fry sauce, hoisin sauce, teriyaki sauce, tamari soy sauce, dehydrated soy sauce, dehydrated teriyaki sauce, and clear soy sauce.

Ajinomoto Europe Sales GmbH (Hamburg, Germany) was selling San-J Tamari in both liquid and dried forms.

Nikken Foods (Tokyo, Japan) is a large maker of natural food flavors. Exported mainly in powdered form, these include a wide array of soy sauce, natural flavor enhancers, and other fermented products, including white miso powder and red miso powder.

Inproba BV (Baarn, Netherlands) offers a wide selection of about 160 Oriental products, both at retail and to the food industry. These include various soy sauces and other soy products, and they can also develop custom recipes for their customers.

Upcoming FiE exhibition and conferences: 1996 Nov. 12-14 at Paris, France; 1997 at London, UK; 1998 at Frankfurt, Germany.

3865. Tyler, Jim; Neville, Jan. 1996. Wellspring Natural Food Co. Mail order catalog. Amherst, Massachusetts: Wellspring. 32 p. 28 cm.

• **Summary:** This is the first issue of this catalog, and Wellspring started in 1996. Soy-related products include: Miso, shoyu, black soybeans (from Hokkaido, Japan), yellow soybeans (organic), azuki beans, snow-dried tofu, kuzu, miso ramen, kinako, natto miso chutney, tekka miso, soymilk, and amasake.

Jim has been a macrobiotic teacher and counselor since 1975-76 and Jennifer was a chef at the Kushi Institute. Main competitors include Gold Mine and other such companies. This catalog is service oriented, easy to use, and more than 80% of the products have lower prices than the competition. Address: P.O. Box 2473, Amherst, Massachusetts 01004. Phone: 1-800-578-5301.

3866. DeAngelis, Lissa; Siple, Molly. 1996. Recipes for change: Gourmet wholefood cooking for health and vitality at menopause. New York, NY: Dutton Signet. A Div. of Penguin Books USA Inc. xvi + 400 p. May. Index. 25 cm. [34* ref]

• **Summary:** In the upper right corner of the front cover we read: "Feel great without hormone replacement therapy!" This is a book, with a natural foods and macrobiotic slant, about using foods in place of hormone therapy to help deal with nine problems that occur around the time menopause: Premenstrual syndrome, hot flashes, fatigue, heart palpitations, memory lapses, mood swings, irritability and depression, weight gain, waning interest in sexuality, hypothyroidism. All menu suggestions are divided into two choices: Vegetarian and non-vegetarian (but with many vegetarian dishes). Pages 4-5 note that science has found active ingredients in foods that promote good health during menopause. Soybeans and soy products are "rich in phytohormones... sometimes called phytoestrogens." Four types of food are "off the menu" = should not be consumed: Refined sugars, caffeine and coffee, processed oils, and refined white flour and refined grains. The subsection titled "Phytohormones" (p. 16) lists ten foods, including tofu and brown rice, as good sources. The benefits of phytohormones and soyfoods are also discussed in the section on "Breast cancer" (p. 55-56).

Soy-related recipes include: Miso soup (p. 90). Bean basics (p. 120-23). Tofu teriyaki with vegetables (p. 123-

24). Tempeh, green beans, and carrots with mustard sauce (p. 132-33). Tempeh slices for sandwiches (p. 148-49). Tofu alfredo sauce (p. 303).

The recipes also call for: Adzuki beans, almond butter and tahini, almond milk, kudzu, and plums (umeboshi). The last page is titled "About the authors." Photos of Lissa DeAngelis and Molly Siple appear on the inside rear dust jacket. Address: 1. Private nutrition consultant, North Edison, New Jersey; former Assoc. Director of the Natural Gourmet Cookery School in New York City for 10 years; 2. Registered Dietitian, Los Angeles, California.

3867. Eauclaire, Sally. 1996. Soy backlash. *Vegetarian Times* No. 227. May. p. 18. *

• **Summary:** Highly processed soy foods may not be as beneficial as touted.

3868. Ichikawa, Takashi. 1996. Seikôhō no chakusô: Kanai Noritoshi no bijinesu rinen to shoku no nichibei-shi [The concept of the frontal attack: Noritoshi Kanai's business theory and U.S.-Japan food history]. Tokyo: Sangokan. 254 p. Illust. No index. 20 cm. [Jap]

• **Summary:** This is a very interesting history of Mr. Noritoshi Kanai and Mutual Trading Co. in Los Angeles, which he built into a very successful enterprise. Address: President, Mutual Trading Co., 431 Crocker Ave., Los Angeles 90013.

3869. Messina, Mark; Messina, Virginia. 1996. The dietitian's guide to vegetarian diets: Issues and applications. Gaithersburg, Maryland: Aspen Publishers, Inc. xi + 511 p. Index. 24 cm. [1939 ref]

• **Summary:** Contents: Preface. Acknowledgments. Part I: An overview of vegetarian diet. 1. Demographics and definitions: History of vegetarianism, profile of vegetarians, types of vegetarian diets. 2. Health consequences of vegetarian diets: Differences in dietary components of vegetarian and nonvegetarian diets, cardiovascular disease, hypertension, cancer, diabetes, obesity, kidney disease, renal stones, gallstones, diverticular disease, other conditions, the dairy connection, phytochemicals, conclusion.

Part II: Vegetarian nutrition. 3. Protein: A historical perspective on protein, protein requirements, vegetarian diets and protein digestibility, assessing protein quality, plant proteins and nitrogen balance, protein complementarity, conclusion. 4. Calcium: Osteoporosis, calcium and osteoporosis, calcium absorption and the RDA, calcium excretion, bone health of vegetarians, meeting the calcium RDA on plant-based diets, plant sources of calcium, other factors that affect bone health/fracture rate, conclusion. 5. Minerals: Iron, zinc, selenium, copper, magnesium, phosphorus, manganese, iodine, sodium, chloride, potassium, fluoride, chromium, molybdenum. 6. Vitamins: Vitamin B₁₂ (cobalamin), riboflavin, vitamin D,

vitamin B₆, vitamin B₁ (thiamin), niacin, folate, biotin, pantothenic acid, vitamin C (ascorbic acid), vitamin A, vitamin E, vitamin K. 7. Food guides for vegetarians: A history of food guides, developing food guides for vegetarians, vegetarian food guides, appendix 7-A—food guides for vegetarians (food guide for lacto-ovo vegetarians and vegans, the 1-2-3-4-5 vegetarian food guide, American Dietetic Association's vegetarian food guide, the vegetarian food pyramid, the vegetarian food pyramid, macrobiotic food guide).

Part III: Vegetarian diets throughout the life cycle. 8. Pregnancy and lactation: Weight gain and calorie needs in pregnancy, weight gain in pregnant vegetarians, meeting nutrient needs of pregnancy on a vegetarian diet, meal-planning guidelines, adolescent pregnancy, potential complications of pregnancy, common conditions of pregnancy, vegetarians and lactation, appendix 8-A—food guides for pregnant and breast feeding vegetarians (food guide I, food guide II). 9. Vegetarian diets in infancy: Growth in vegetarian infants, vegetarian diets during the first six months of infancy, solid foods for vegetarian infants, comparison of sample menu plans for 9-month old vegan and omnivore infants, potential concerns in infant feeding, macrobiotic diets in infancy, fatty acids in the diet of vegetarian infants, conclusion. 10. Preschool and school-age children: Growth of vegetarian children, diets of vegetarian children, protein, fat, calcium, vitamin D, vitamin B₁₂, iron, zinc, guidelines for meal planning for vegetarian children, milk in the diets of vegetarian children, counseling parents of vegetarian children, vegetarian diets for school-age children, school lunch, bag lunch, appendix 10-A—meal-planning guidelines for children (other food guides). 11. Vegetarian diets for adolescents: Growth of vegetarian adolescents, nutrient needs of vegetarian adolescents, meal-planning guidelines for vegetarian adolescents, eating disorders. 12. Vegetarian diets for older people: Dietary status of older vegetarians, nutrient needs of older vegetarians, meal planning for older people.

Part IV: Practical applications for counseling vegetarians. 13. Counseling vegetarian clients: Dietary assessment, counseling clients to plan menus based on vegetarian food guides, vegetarian diets as dietary therapy, reducing fat in vegetarian diets, reducing food costs on vegetarian diets. 14. Diabetes: Diet therapy for diabetes, vegetarians and diabetes, the diabetic exchange lists, appendix 14-A—exchange lists for meal planning. 15. Vegetarian diets for athletes: Vegetarian diets and athletic performance, nutrition needs of athletes, risks of amenorrhea in female vegetarians and female vegetarian athletes. 16. Vegetarian food preparation: Preparing grains, preparing beans, using tofu, using textured vegetable protein, using egg substitutes, cooking with sweeteners.

Glossary of vegetarian foods. Resources on vegetarian diet: Vegetarian resources for dietitians, resources for

vegetarian clients, on-line services, mail-order vegetarian foods.

Appendixes. A. Fiber, cholesterol, and macronutrient intakes of adult vegetarians and nonvegetarians. B. Lipid levels in adult vegetarians and nonvegetarians. C. Blood pressure of adult vegetarians and nonvegetarians. D. Anthropometric data of female adult vegetarians and nonvegetarians. E. Anthropometric data of male adult vegetarians and nonvegetarians. F. Intake ratios of N-6 to N-3 fatty acids on vegetarian and non-vegetarian diets. G. Protein, calcium, phosphorus, sodium and potassium intakes of adult vegetarians and nonvegetarians. H. Iron intake and status of vegetarians and nonvegetarians. I. Mineral intake of adult vegetarians and nonvegetarians. J. Water soluble vitamin intake of adult vegetarians and nonvegetarians. K. Fat soluble vitamin intake of adult vegetarians and nonvegetarians. L. Fiber, cholesterol, and macronutrient intakes of vegetarian and nonvegetarian school-age children and teenagers. M. Water soluble vitamin intakes of vegetarian and nonvegetarian school-aged children and teenagers. N. Fat soluble vitamin intake of vegetarian and nonvegetarian school-aged children and teenagers. O. Mineral intake of vegetarian and nonvegetarian school-aged children and teenagers. P. Fiber, cholesterol, and macronutrient intakes of elderly vegetarians and nonvegetarians. Q. Water soluble vitamin intake of elderly vegetarians and nonvegetarians. R. Mineral intake of elderly vegetarians and nonvegetarians.

The information on vitamin K is excellent and extensive (despite one small error): Table 6-12 (p. 197) gives the vitamin K content of selected foods. The content of soybean oil is 77 micrograms per tablespoon (not milligrams as stated). Other rich sources are (per ½ cup cooked): Lentils (261 mcg), kale (179 mcg), spinach (141), broccoli (119). The source of these statistics is: USDA Provisional table on vitamin K content of foods. 1994. Hyattsville, Maryland: USDA.

Index listings for individual soyfoods: Tofu: p. 38-82, 392. Tempeh: p. 391. Soymilk: p. 214-15, 284-85, 391. Miso: p. 389. Soy cheese, soy flour, soy yogurt, soybeans, soynuts, Take Care (fortified soy protein beverage sold in powdered form), tamari: p. 391 (Glossary of vegetarian foods). Address: 1. PhD; 2. MPH, RD. • **Summary:** Includes a recipe for Hearty miso soup with shrimp. Address: Laguna Hills, California.

3871. Luciano, Elizabeth. 1996. Miso: Asian comfort food gains fans. *Boston Globe*. July 10.

• **Summary:** An introduction to miso with recipes. Includes a talk with Christian Elwell of South River Miso Co. Address: Massachusetts.

3872. Natural lifestyle magazine and mail-order market: Spring-summer '96. 1996. Asheville, North Carolina: Natural Lifestyle Supplies. 63 p. Catalog. 28 cm.

• **Summary:** A macrobiotic mail-order catalog with several nice articles, it sells many types of soyfoods and related products, including the full line of Kushi Cuisine, organic soybeans (yellow and black), azuki beans, amazake, Rice Dream, soymilk, Westbrae Maltededs, Nasoya Vegi-Dressings, Nayonaise, Farmhouse Tekka [miso], organic soy sauce, fresh tofu, snow-dried tofu, kuzu, and miso. Publisher: Tom Athos. Editor and graphic design: Debbie Athos. Address: 16 Lookout Drive, Asheville, North Carolina 28804-3330. Phone: 1-800-752-2775.

3873. Keuneke, Robin. 1996. The magic of miso. *Total Health* 18(4):54. Aug. *

• **Summary:** Includes recipes.

3874. Elwell, Christian. 1996. Fermenting miso and oatmeal overnight to give the oatmeal a delicious sweet taste (Interview). *SoyaScan Notes*. Sept. 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This summer Christian started making oatmeal in the evening, and (after it was ready and had cooled a little) seasoning it with unpasteurized miso. When the combination is allowed to ferment overnight, the enzymes in the miso bring out a delicious sweetness in the miso by breaking the complex carbohydrates down into sugars. "This has really changed my appreciation for oatmeal. It works best with the light misos such as chick pea miso. The Russians used to do the same thing, using one of their local fermented foods instead of miso." Address: Founder and Owner, South River Miso Co., South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

3875. Gaiser, Klaus. 1996. Re: Update on work with seitan and tofu in Germany. Letter (fax) to William Shurtleff at Soyfoods Center, Sept. 21. 3 p. Typed, with signature on letterhead. [Ger]

• **Summary:** Klaus founded Topas GmbH in April 1993. Originally the name stood for TO-fu + PA-sta, but after late 1996, as Klaus developed more and more seitan products, it came to mean TO-fu + PA-sta + S-eitan. Klaus sold his company Yamato Tofuhaus [in April 1989] to a firm named Huegli. With the money from the sale he purchased a 300-year old oak-framed farmhouse (with a 2,000 liter fountain in the old vault cellar) for himself, his wife, and 5 children. For the next three years he stayed on to manage Yamato

Tofuhaus, but by the end of 1992 he found the work unsatisfying so he left and decided to start another health food business of his own. In the meantime, Huegli bought Heiler, Germany's biggest reform food wholesale company. Heiler was also dealing with tofu, so together Huegli and Heiler sold quite a lot of tofu and tofu products—about 2 metric tons per week of tofu convenience foods by 1992 and maybe another ton of tofu and tofu-varieties such as smoked tofu. Nowadays their annual sales are not that high; Klaus has no exact statistics, but he would estimate they are about two-thirds of 1992 levels.

In early 1995 Klaus tried to find a place for his company in the tofu market again, but he soon realized his place had been taken. “The German health food market was and is so flooded with tofu products that you just have to come with a real big bang to awaken any interest of the retail shop owners in a new tofu product. They just don't see any reason for selling the 23rd variety of tofu-burger and the 17th variety of tofu-spread.”

Klaus then remembered an old recipe that used wheat gluten. He saves each and every product development experiment in his computer and has about 800 by now. The gluten was colored with red fermented rice (*beni-koji*, made with *Monascus purpureus*) and thus was very meat-like. In fact, when spiced, it so resembled a sausage that he first thought it was too daring to offer such a product to vegetarians. This product turned out to be the basis for his new business. He called it “Wheaty” and started selling it as a cold cut in late 1995. Since that time, monthly sales have gone up and up. “A mere joy.” He could sell much more if he had enough money for costly advertisements, etc. Now his company is selling seven products, based mostly on seitan, with some tofu. Other companies are now starting to try to imitate his most successful product, Wheaty. Klaus believes that seitan has a very bright future in Germany, yet in a new form. The traditional lumps of gluten cooked in soy sauce have not been able to electrify large portions of the population. So Klaus has “re-invented seitan” to resemble familiar German meat products. “And this is the most effective way to convince a greater number of ‘normal’ people of the value of a vegetarian diet.”

One serious problem is that red-fermented rice made with *Monascus purpureus* is not allowed as a food ingredient in Germany; there was a recent ruling by a German court of law. Moreover, as a food coloring, it is classified as a “food additive” so it needs an “E-number” from EC bureaucracy in Brussels, Belgium,—which it has not yet gotten. This is a pity, since it is the only natural heat-resistant meat color, as well as an excellent flavor enhancer, source of vitamin B, and cholesterol reducer. If it were legal, it could be made by Karl Selg-Mann, who is Germany's only manufacturer of soy sauce and miso.

Talk with Klaus by phone. 1996. Sept. 21. He presently does not own a factory; he finds other food companies to

make his products. Klaus speaks almost perfect English. He hitch-hiked in England and Scotland in 1975, then lived for a year in China in 1976, arriving 3 days after Mao Tse-dong died [Note: Mao died in Sept. 1976]. The BNN (*Bundesverband Naturkost und Naturwaren*), a German organization promoting organic foods, has established regulations concerning wheat gluten; originally they said it could only be made from whole wheat. But they found that was too expansive so now they allow the use of 10% by weight of vital wheat gluten. Address: Founder and owner, Topas GmbH, Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

3876. Sheridan, Margaret. 1996. Is tofu ready for the big leagues? *Los Angeles Times*. Sept. 26. p. H8, H10, H11.

• **Summary:** The article begins: “Tofu, the spongy off-white soybean cake that spells B-O-R-I-N-G for so many people, is about to get a marketing makeover. Slick packaging, toll-free consumer hotlines, new products, and a blitz of cookbooks created by chefs rather than earnest vegetarian activists are some of the strategies tofu companies plan to use to bring tofu into the mainstream.” A number of second generation tofu products found in supermarkets, and forthcoming cookbooks are listed.

“But some advertising and marketing professionals say that's not enough.” The author talks with many such people who dislike tofu for various reasons: “Tofu is a joke... Tofu is a sissy. Bland, white, boring. It needs to take a stand. Become something. And that name! Its terrible.” “Tofu goes against the American palate... Very little in American food, except baby food or gelatin, has that texture. Even buying tofu is alien. What else do you buy floating in water? And Americans love convenience. Bean curd is anything but. It's not an open-and-eat product.” “I buy tofu but it just sits there, floating in my refrigerator. It makes me feel stupid and guilty. What do you do with it? I end up tossing it out.” Hinoichi is America's largest tofu manufacturer. In March 1997 the company plans to move from its present 50,000 square foot plant in Los Angeles to a facility three times that size in Garden Grove. Harry Tanikawa, Hinoichi sales manager, notes that tofu and soy have been helped by good research and press from the medical community. He adds: “When you see fast-food places such as Panda Express in the shopping malls adding more tofu items to the menu, when you can buy a tofu hot dog at Dodger Stadium, you know tofu has arrived.” Note: Dodger Stadium is a major league baseball park in Los Angeles.

Worthington Foods has experienced a sales rush in meat alternatives; the category went from nothing four years ago to \$150 million a year. The company's best-selling items, sold under the Morningstar Farms brand, are breakfast patties, sausage links, garden burgers, and spicy black bean burgers—according to Don Burke, executive vice president

of sales and marketing. The people who buy Worthington products are “the masses, people who want to cut down a little on meat and saturated fat. Most are aging baby boomers who want taste, convenience, and a health benefit.”

Tofu “recipes for the mainstream” include: Red flannel hash. Mushroom scrambler. Tofu-stuffed French toast. Tofu slaw. Tofu citrus shake. Tofu cheesecake (p. H11).

The article ends with two sidebars: 16 “Tofu do’s and don’ts.” Soy food: Its many looks (p. H11)–Defines different soyfoods: Tempeh, miso, textured vegetable protein (TVP), soy milk, soy flour, soy cheese, soy sauce, tamari. Address: Times staff/food writer.

3877. *ASA Today (St. Louis, Missouri)*. 1996. ASA/Japan hosts 40th anniversary celebration. 2(10):1-2. Sept.

• **Summary:** An estimated 175 “Soycomplex Leaders” from throughout Japan attended the ASA [American Soybean Association] /Japan 40th Anniversary celebration in Tokyo, according to ASA/Japan Country Director Kent Nelson. In 1946 ASA started activities in Japan as a member of the Japanese American Soybean Institute (JASI), which included the Japan Oilseed Processors Association (JOPA), the Japan Oil and Fat Importers & Exporters Assoc. (JOFIEA), and the Japanese tofu, soy sauce, and miso associations.

A photo shows ASA Executive Officer George M. Strayer and Mrs. Strayer in October 1955 leaving Waterloo, Iowa, enroute to Japan on a trade mission.

One sidebar (p. 2) titled “Meeting Japan’s needs now and in the future,” states: Japan imports 97% of its soybeans. Nearly 25% of Japan’s imported soybeans are used for food. Japan is projected to import its 5 billionth bushel of soybeans from the USA in the second half of the year 2000. “Japan remains the top single country market in the world (soymeal included) and is expected to remain the largest export market for US producers into the year 2000.”

A second sidebar (p. 1) titled “ASA/Japan celebrates 40th anniversary,” notes that in 1956, Japan imported 536,000 metric tons of US soybeans. In 1995 Japan imported eight times that amount, over 4 million metric tons. This fall a unified trade team composed of JOPA processors and JOFIEA importers will meet with ASA and United Soybean Board leaders in St. Louis, Missouri, to discuss short, medium, and long-term goals.

3878. Franklin, Deborah. 1996. The healthiest women in the world [in Okinawa]. *Health*. Sept. p. 56-63.

• **Summary:** On average, American men now live to be 72, and American women 79. Not as good as the Japanese, where the ages are 76 and 83 respectively. But women in Okinawa live, on average, to age 84—longer than women in any other country or region of the world. Okinawa was annexed by Japan in 1879 and today it is a full-fledged

Japanese state (the equivalent of a U.S. state). What is their secret? Kazuhiko Taira, a gerontologist at the University of the Ryukyus in Okinawa, thinks that much of it has to do with the Okinawan diet. In Okinawa there is a saying that “food is medicine.” Traditionally Okinawans have eaten three times more meat (especially pork) than Japanese mainlanders, 50% more tofu, and—very important—40% less salt. In the decades before 1960, mainland Japanese adults typically consumed 6-9 bowls of miso soup each day, plus a few small servings of salty pickled vegetables and/or seaweed—all sources of salt. Yukio Yamori, who (for the last 15 years) has studied links between diet and longevity notes that Okinawans eat quite a bit of tofu and other soy products which are particularly rich in isoflavonoids—estrogen-like compounds that may reduce one’s risk of osteoporosis. His “most recent study, of post-menopausal women in Japan and Hawaii, showed that women who consumed the most soy had the densest bones.” This might explain why elderly Japanese—and especially Okinawan—women suffer far fewer bone fractures than American women, even though the Japanese consume much less calcium.

Another important key to a long and healthy life in Okinawa is *yumaru*, a word written with the Japanese characters for “circle” and “connection.” It expresses that sense of belonging and connectedness and feeling needed, which makes elderly people look forward to each new day. In Okinawa, the elderly are greatly respected. Address: Staff writer.

3879. Hastings, Carl. 1996. Soybean products in human foods. Paper presented at Regional Workshop on Soybean Processing and Utilization for Central America and the Caribbean. 4 p. Held Sept. 15-18 in Jamaica.

• **Summary:** Contents: Introduction. Soy sprouts. Whole soybeans: Cooked green beans, cooked soybeans, roasted or deep fat cooked soybeans (soy nuts—salted, flavored, etc., candy coated, salad topping, bakery ingredient or topping, soynut butter, soy coffee) fermented soybeans (tempeh—*Rhizopus*, natto—*Bacillus*, hamanatto—*Aspergillus*). Cereal blends: CSM (Corn-Soy-Milk), WSB (Wheat-Soy-Blend), other (bulgur, oat, sorghum grits).

Refined soy oil: Solvent extracted, physically extracted, uses, lecithin. Soy protein: Soy flour (full fat, defatted), concentrates, isolates, textured, uses. Hulls. Soy fiber. Soy milk: Liquid, powder, uses (plain, flavored, fortified, blends, instant formula, nutritional beverages, tofu, soy cheese, frozen desserts, yogurt, soymilk film (yuba)). Soy sauce. Soy paste (miso). Soy pulp (okara). Address: Reliv, Inc., Chesterfield, Missouri.

3880. Pulmuone U.S.A. Inc. 1996. Pulmuone (Catalog). South Gate, California. 16 p. 28 cm.

• **Summary:** This is a very attractive, full-color catalog describing the company and its products. Contents: Cover

(with a green photo of Korean countryside). Bring nature to your life: a message from Pulmuone. "Pulmuone begins with nature. We strive to bring nature to your door steps. Our job is a process to create a balance between nature and technology. The most advanced technology is applied in developing our products. Seek the balance. Taste our promise." Tofu: Good as meat without the fat (3 tofu products). Pasta from Asia? Instant noodle, fresh noodle, dried noodle. Authentic taste from home: Tea, soybean paste (6 types of Korean-style miso), oil and vinegar, organic beans and grains [brown rice, sweet brown rice, whole barley, pressed barley, soy bean, black [soy] bean, kidney bean], mineral water. Health food: What if you don't have time to eat the right food? Multi-complex health supplements, diet supplements, concentrated health supplements. Cosmetic: Isslin skin care program. About Pulmuone. Important dates in the history of Pulmuone: May 1981–Pulmuone Organic Foods founded (direct distribution of Organic farm products). Oct. 1982–Pulmuone Fermented Foods founded. April 1983–Pulmuone Fermented Foods opens production facility in Pochun (begins production of supplementary foods). May 1987–Pulmuone Kimchi Museum opens. May 1988–Pulmuone R&D Center opens. Jan. 1989–Pulmuone Scientific Committee founded, Dietary Life Research Center opens. Jan. 1990–Doan Soybean Past Plant opens. Jan. 1991–Pulmuone USA Inc. founded. June 1991–Doan Noodle Plant opens. Sept. 1992–Doan Supplementary Foods GMP Plant opens. Aug. 1993–Korean-Chinese joint venture, Ilsongjung Foods Ltd. founded. June 1995–Tofu Plant opens in U.S.A.

"Pulmuone was founded in 1981 with forty employees. It has grown to become a multi-national company of 2,000 employees with annual sales volume of \$250 million.

"The secret to their success lies in their uncompromising commitment for better foods and better life.

"Pulmuone's 'Research and Development Center' opened in 1988 to continue the search for more advanced technology in ensuring the quality of food and life. Together with 'Pulmuone Science Committee' organized with the outstanding scholars in the field, our challenge to science and technology for the future will be succeeded."

Photos show: Sliced and packaged tofu (p. 4-5). Six varieties of Korean soybean paste (p. 9). The outside of Pulmuone's tofu plant at South Gate, California (p. 14). A tofu production line in the USA plant (p. 15).

Letter from John Sim, marketing director of Pulmuone. 1997. June 17. This brochure was printed in September 1996. Concerning the statement that Pulmuone uses only organic materials: "Pulmuone Tofu manufactured here in the U.S. is made from Vinton 81 soybeans from Minnesota. Products such as bean paste are manufactured in Korea using only certified organic soybeans." Address: 4585 Firestone Blvd., South Gate, California 90280. Phone: 213-564-3000.

3881. Jacobi, Dana. 1996. *The natural kitchen: Soy! 75 delicious ways to enjoy nature's miracle food*. Rocklin, California: Prima Publishing. xii + 244 p. Oct. Index. 22 cm. Series: *The natural kitchen*. [16 ref]

• **Summary:** Contents: Preface. Acknowledgments. Introduction: Soy and health. All about soyfoods: Traditional soyfoods (tofu, miso, tempeh, soy sauce, soymilk), other Asian soyfoods (okara, yuba, kinako, natto), second-generation soyfoods (soy dairy products, soy deli foods, textured vegetable protein {TVP}, textured soy protein {TSP}, soy isolate (isolated soy protein)), more soy choices (fresh soybeans, dried black soybeans, soy flour, soy grits, soy flakes, soy nuts), cooking with soyfoods (tofu {pressing, freezing, marinating, sautéing and pan-crisping, frying, braising, pureeing, parboiling, storing and handling tofu}, miso, tempeh, soymilk, other soy dairy foods), cook's notes (herbs, spices and flavorings, nuts, oils, produce, stock, sweeteners).

Soups, appetizers, and first courses. Main dishes. Pasta and light dishes. Side dishes and sauces. Salads, burgers, and kebabs. Desserts. Breakfast and beverages. Mail order sources.

The Preface states: "If you are new to soy, you will find descriptions of soyfoods, from tofu to soymilk... If you already cook with soyfoods, the approximately 75 recipes in this book and their variations will expand your repertoire. These recipes will take you across lines that people who cook with soy rarely approach. The dishes bring familiar and satisfying textures along with flavors that are full and deep. Whether ethnic or classic, they are dishes with verve and elegance." The author first tasted tofu, with her parents, in 1953, "at the precocious age of eight," at The Great Shanghai on 125th St. in Manhattan, New York City. Address: Food writer, New York, NY.

3882. Oser, Marie. 1996. *Soy of cooking: Easy-to-make vegetarian, low-fat, fat-free, and antioxidant-rich gourmet recipes*. Minneapolis, Minnesota: Chronimed Publishing. xviii + 264 p. Illust. Index. 23 cm. [55 ref]

• **Summary:** This is a very nice gourmet vegan cookbook with 16 full-page color photos. Contents: Dedication. Notice: Consult a health care professional. Grateful acknowledgment to. Foreword, by Neal D. Barnard, M.D. Preface, by Marie Oser. Introduction, by Suzanne Havala. Soyfood for thought. A healthy kitchen. The soyfoods pantry (short definitions of generic and brand-name soy products). A quick guide to ingredients. Substitutions. Spices: The variety of kitchen life. Techniques.

Recipes: Sensational starters. Soups, stews, and salads. Bountiful breads. Exceptional Entrées. Soyful sides. Pizza and pasta. Delectable desserts.

Resource guide (Names and addresses of 23 companies selling soy and soy-related ingredients). Recommended

reading (15 books). Bibliography (40 journal articles). Address: Agoura Hills, California 91391. Phone: 818-707-7353.

3883. SunRich. 1996. Soya food ingredients. Soybeans for: (Leaflet). Hope, Minnesota. 3 p. 28 cm.

• **Summary:** These two closely related leaflets are in black ink on a red letterhead. The first leaflet states that SunRich offers “specialty soybeans... for specific soyafood uses: Consistency. Quality. Identity preserved.” “Our extensive grower base enables us to contract produce soybeans for your special needs. Specific varieties with reduced antinutritional factors (lipoxygenases, trypsin inhibitor enzymes and oligosaccharides, stachyose and raffinose) available.”

“Soyamilk powders: For ingredient or beverage use.” A table describes soya beverage powders, spray-dried soymilk, spray-dried tofu powder, soy/dairy milk replacers.

“Sweet Beans–Frozen green soybeans–Podded (Edamame) or peeled (Mukimame). Certified organic soybeans and products available.”

The second leaflet states: “Tofu varieties–Vinton, Beeson. Soymilk–Yellow or white hila. Sized over 6.7 mm round. Natto–Sized through a 5.5 mm round. Miso–Yellow hila. High soluble sugars. Boiling soybeans–Edamame varieties, yellow or black seed coats, high soluble sugar. Sized over 7.5 mm round screen. Frozen green soybeans. Edamame, mukimame. New varieties and types–High soluble sugars, high protein content, specific fatty acids. Grower base of 500 growers in Minnesota, Iowa, Wisconsin, South Dakota. Produce specific varieties for customers–Container lots, bagged, bulk. Bulk barge. Organic or conventional.” Address: P.O. Box 128, Hope, Minnesota 56046-0128. Phone: (507) 451-3316.

3884. United Soybean Board. 1996. National report on consumer attitudes about nutrition. Seattle, Washington. 8 p. Oct. 28 cm.

• **Summary:** This report, commissioned by USB, was conducted by a an independent research firm. It included telephone interviews with 1,000 consumers and primary household shoppers of all ages throughout the USA. They were asked a series of up to 23 questions. The standard margin of error for the study is $\pm 3.2\%$.

Popularity of soy products: A bar graph shows the following, listed in descending order of popularity. The first number indicates the percentage of the population who are familiar with each product; the second number indicates the percentage of those who are familiar with the product that have tried it. Tofu–76% of Americans are familiar with tofu, and 53% of these have tried tofu. Veggie burger–69% / 53%. Soybean oil–65% / 28%. Soy milk–58%–35%. Infant formula [soy-based]–53% / 36%. Soy protein–42% / 32%. Soy flour–41% / 30%. Miso–17% / 58%. Tempeh

14%–45%.

“How healthy are soy products? 40% of the population acknowledge that soy has positive health attributes. Half of those believe soy is a high protein source. 13% of the respondents cited soy as an option for lactose intolerance, 13% as a low fat food and 11% as a cholesterol reducer.”

Consumer concern and confusion about nutrition terms: Trans fatty acids–37% of the population are familiar with the term; 38% of those who are familiar are concerned about trans fatty acids; 51% of those who are familiar are confused about trans fatty acids. Hydrogenation: 36% are familiar, 39% of those are concerned, and 46% of those are confused. Address: 190 Queen Anne North, Seattle, Washington 98109. Phone: 1-800-TALK-SOY.

3885. **Product Name:** [Barley Miso, Soybean Miso, and Rice Miso (Each Aged for 18 Months)].

Foreign Name: Miso.

Manufacturer’s Name: Lion Health Food Co.

Manufacturer’s Address: Zagorska 12/9, YU-11080 Zemun, Yugoslavia. Phone: +381 11-106073.

Date of Introduction: 1996. November.

Ingredients: Organic ingredients.

How Stored: Shelf stable.

New Product–Documentation: Talk with Sladjan Radelovic. 2001. April 21. He started selling these three types of miso is about Nov. 1996.

3886. **Product Name:** [Imoplex–18-Month Barley Miso with Extracts of Shiitake Mushrooms, Konbu, and a Mixture of Herbs (Paste, or Tablets)].

Foreign Name: Imoplex.

Manufacturer’s Name: Lion Health Food Co.

Manufacturer’s Address: Zagorska 12/9, YU-11080 Zemun, Yugoslavia. Phone: +381 11-106073.

Date of Introduction: 1996. November.

Ingredients: Organic ingredients.

How Stored: Shelf stable.

New Product–Documentation: Talk with Sladjan Radelovic. 2001. April 21. He started selling Imoplex (which stands for “Immunity Complex”) in about Nov. 1996. It cleans the body of toxics and parasites, and increases the immunity.

3887. Pulmuone U.S.A. Inc. 1996. Update on Pulmuone (Brochure). South Gate, California. 3 p. 28 cm.

• **Summary:** This 3-page black-and-white brochure was inserted into the color Pulmunoe catalog in June 1997. Contents: Background. Situation analysis. Pulmuone’s future. Why Pulmuone tofu for the general market? Sales and trade promotions. Distribution. Media plan.

“Background: The success of Pulmuone in Korea stems from the original philosophy of naturally produced foods with respects to mother nature. This corporate culture is

prominent in its employees and product line. From delivery personnel to the board of directors, Pulmuone identity is imbedded in the corporate and personal lives of all employees.

"In 1991, Pulmuone's dedication expanded across the Atlantic Ocean to the United States. Pulmuone had a far reaching dream to provide Korean Americans with natural ethnic products they could not find in the U.S. Pulmuone bean paste [miso] and pepper paste were the first products to come into the U.S. and minerals and supplemental foods followed thereafter. Then in June of 1995, Pulmuone opened its first tofu plant in South Gate, California.

"Thus began the history of Pulmuone USA.

"Situation Analysis: Currently, Pulmuone USA holds 70% of Korean tofu market. A market held for over 3 decades by a single Japanese company in the U.S., Pulmuone boldly and aggressively captured the Korean American market within 14 months. Once Pulmuone tofu was introduced to the market, Korean Americans immediately recognized the superior quality of Pulmuone Tofu over other brands.

"Pulmuone has also enjoyed success in the Japanese American market within a short span of time. Pulmuone currently produces private label tofu for Marukai, which is a very popular wholesale type market amongst the Japanese Americans. In the past, they carried two of the most popular brands, Hinoichi and Aloha. However, within a 3 month period, Marukai brand tofu sold both brands by a ratio of 3 to 1.

"We have a state of the art facility with complete automation. Our current production rate is 20,000 pounds of tofu per day running at single shift.

"Pulmuone Tofu's obvious superior qualities are attributed to the following: 1. Use of highest quality pure Vinton 81 soybeans; Vinton 81 soybeans are 30% more expensive than regular soy beans. 2. Quick Chill System for optimum freshness and flavor. 3. Lower pasteurization temperature without compromising taste or shelf stability. 4. Complete Manufacturing Plant Sanitation System on a daily basis."

The company has scheduled advertisements in *Vegetarian Times*, *Los Angeles Times Magazine* (in Korean), and *Super Market Business* for late 1996 and early 1997.

Letter from John Sim, marketing director of Pulmuone. 1997. June 17. This insert was printed on 17 Nov. 1996. Address: 4585 Firestone Blvd., South Gate, California 90280. Phone: 213-564-3000.

3888. Fukutake, M.; Takahashi, M.; Ishida, K.; Kawamura, H.; Sugimura, T.; Wakabayashi, K. 1996. Quantification of genistein and genistin in soybeans and soybean products. *Food and Chemical Toxicology* 34(5):457-461.

• **Summary:** Discusses: Soybeans, soy nuts, soy powder, soymilk, tofu, miso, natto, soy sauce, genistein. Address: 1-

3,5-6. Biochemistry Div., National Cancer Center Research Inst., 1-1 Tsukiji, 5-chome, Chuo-ku, Tokyo 104; 1,4. Tsumura & Co., 3586 Yoshiwara, Ami-cho, Inashiki-gun, Ibaraki 300-11. All: Japan.

3891. **Product Name:** [Rice Miso, Barley Miso, Brown-Rice Miso].

Foreign Name: Kome Miso, Mugi Miso, Genmai Miso.

Manufacturer's Name: Noka Sojamanufaktur GmbH.

Manufacturer's Address: Hauptstrasse 3, 55232 Alzey, Germany. Phone: 06731-6892.

Date of Introduction: 1996.

New Product-Documentation: Two brochures brought from Biofach in Germany. 1997. March. (1) Noka Sojamanufaktur. (2) Noka Produkte.

3892. Ang, Eng Tie. 1996. *Delightful tofu cooking*. Seattle, Washington: Ambrosia Publications. 160 p. Illust. Index. 23 cm.

• **Summary:** This cookbook, which is not vegetarian, includes recipes using pork, beef, chicken, fish, shrimp, crab, etc. It contains 152 original recipes from around the world. Contents: Acknowledgements. Introduction. About the author. 1. Condiments and sauces. 2. Appetizers and snacks. 3. Soups. 4. Salads. 5. Vegetables. 6. Seafood. 7. Meat and poultry. 8. Rice and noodles. 9. Desserts. Appendix: Diagrams, suggested menus, glossary. Ordering information.

"Eng Tie Ang was born in Indonesia of Chinese parents, moved to Brazil at the age of five, and came to the United States at the age of twenty-five. She learned cooking at an early age at home and in her parents' small restaurant in Suzano, Sao Paulo, Brazil. Her first and most influential cooking teacher was her mother, a master of various kinds of Oriental cooking. As a teenager, she studied Western cooking at a cooking school in her hometown. In addition to *Delightful Tofu Cooking* she has published three other cookbooks: *Delightful Thai Cooking*, *Delightful Brazilian Cooking*, and *Delightful Vietnamese Cooking*...

"In addition to writing cookbooks, Ms. Ang has been a cooking instructor for the University of Washington's Experimental College. She also frequently teaches courses through the Puget Consumers' Co-op and other cooking schools in the Seattle area. She offers courses in tofu

cooking... Moreover, she is an avid organic gardener and an accomplished batik painter.

“Ms. Ang lives in Seattle with her husband, Donald Richard Bissonnette, and two sons, Alex and André.” A small black-and-white photo on the rear cover shows Eng Tie Ang. Address: Seattle, Washington.

3893. Danival. 1996. *Danival: The environmental approach*. Mézin, France. 7 p. 30 cm. Lay-flat comb bound. [Eng]

• **Summary:** Contents: Introduction. Map of France (showing Danival in the southwest near the Garonne River valley, in the historical region of Gascony). Danival, Daniel Gevaert and the Pruneaux d’Agen (plums). Danival Atlantic sea salt (incl. nutritional analysis).

“The jury of the ‘Enterprise and Environment’ competition organized by the French Ministry of the Environment has awarded the Special *Ecoproduit* 1992 prize to Danival for their overall approach to environmental questions.

“The range of organic foods which Danival presented to the jury are manufactured in strict conformity with *Nature et Progres* specifications through the whole production process.

“All packing materials can be re-used and recycled. Preserves are bottled in glass jars with tinplate caps.

“A small hydro-electric generator is powered by the old water mill. In this way, part of the factory’s power supply is produced from a renewable source of energy.

“Danival’s originality also lies in their know-how in the manufacture of miso and shoyu. These two products are obtained from fermented soya beans and are very rich in easily digested vegetable protein.” For the past ten years Daniel Gevaert, the son of Pierre Gevaert, has been farming 60 hectares in the fertile Garonne Valley—also known as the Valley of the Four Seasons. His agricultural methods are exclusively organic. “The farm is Danival’s main supplier of raw materials—and this is where Danival has the edge!”

“The company is housed in the Andiran water-mill buildings and employs nine people full time. Today Danival’s range of organic products includes 9 varieties of jam, pureed prunes, semi-rehydrated Agen prunes, peach and apple compotes, concentrated tomato puree, ratatouille, tomato ketchup, tomato sauce, bolognaise sauce, spaghetti sauce, sweet-corn, chick peas, azuki beans, lentils, haricot beans, Japanese pumpkin puree, seitan, gluten powder, miso, shoyu, and Atlantic sea-salt from the Ile de Ré.”

“All packaging materials can be re-used and recycled. Preserves are bottled in glass jars with tinplate caps.

“A small hydro-electric generator is powered by the old water mill. In this way, part of the factory’s power supply is produced from a renewable source of energy.

“Danival’s originality also lies in their technical know-how in the manufacture of miso and shoyu. These two products are obtained from fermented soya beans and are

very rich in easily digested vegetable protein.” Address: Moulin d’Andiran, 47170 Mézin, France. Phone: +33 5 5397 0023. Fax 5 5397 0010.

3894. Hosking, Richard. 1996. *A dictionary of Japanese food: Ingredients & culture*. Boston, Rutland, Vermont, Tokyo: Tuttle Publishing. 239 p. Illust. by Richard C. Parker. Index. 21 cm. [16 ref]

• **Summary:** An excellent, accurate book. The basic entry for each word is given under its Japanese name (thus *daizu* rather than soybeans). Each entry includes the Japanese term in kana (usually hiragana) and (usually) kanji (Chinese characters). One hundred small illustrations are very helpful.

Here is an example: “dengaku (hiragana, kanji) a preparation in which food such as eggplant, taro, konnyaku, or tofu are dressed with a sweetened miso topping and grilled on skewers. Fish *dengaku* is called *gyoden*.”

Seventeen appendices (p. 197-235) give detailed discussions of the following important Japanese foods and related items: Chopsticks. Katsuobushi. The kitchen and its utensils. Kombu. The meal. Miso. Saké. Salt. Sansai. Soy sauce. Sushi. Tea. The tea ceremony. Umami and flavor (incl. MSG). Vegetarianism (incl. Buddhism, shōjin ryōri, and fucha ryōri). Wasabi. Wasanbon sugar.

The author has lived in Japan since 1973. He holds an M.A. degree from Cambridge Univ. Address: Prof. of Sociology and English, Hiroshima Shudo Univ., Japan.

3895. Masuda, Koh. editor in chief 1996. *Kenkyusha’s new Japanese-English dictionary*. 4th edition. Tokyo: Kenkyusha. xiii + 2111 p. 27 cm. [Eng; jap]

• **Summary:** The first edition of this superb dictionary was published in 1918, the second in 1931, and the third in 1954. Some of the definitions of soy-related terms are quite poor. Examples:

Edamame: “green soybeans.” Better: Green vegetable soybeans, or Edamamé.

Kōji: “*koji*.” Good.

Miso: “*miso*.” Good. Also defines: Miso-koshi: a miso strainer; Miso mame: a soybean. Misoshiru: miso soup.

Nattō: “fermented soybeans.” Better: Whole soybeans fermented with *Bacillus subtilis*. Nattō-jiru: “Miso soup with minced fermented soybeans.” Good.

Omiotsuke [Jap: Misoshiru] See miso [Miso soup; word used by women only].

Otsuke [Jap: Misoshiru] Miso potage (soup).

Shōyu: “soy (sauce).” Should say: Soy sauce. The word “soy” no longer refers to soy sauce.

Tōfu: “bean curd [cheese]; *tofu*. Yaki-dofu: “roasted bean curd.” Tofu itcho: a piece [cake] of bean curd. Tofu-ya: “a tofu dealer [seller, maker].”

Tônyû: “soybean (soya) milk.” Better: Soymilk, soya milk, or soybean milk.

Yuba: “dried bean curds.” Should say: The thin protein-lipid film formed atop soymilk when it is heated.

Neither nomamé nor tsurumame, both referring to the wild soybean, are entries in this dictionary.

Non soy: Azuki (characters small + bean): “an adzuki [adsuki] bean.” Azuki aisu: “adzuki-bean sherbet.” Azuki-kayu: “adzuki-bean gruel.” Azuki-han: “rice boiled with adzuki beans.” Azuki-iro no: “reddish-brown or russet” in color. Kintoki-azuki: “a large kind of adzuki bean.” Kintoki-mame: “adzuki beans cooked with sugar.” Mochi: “rice cake.” Yôkan: “sweet jelly of beans; a fine sweet paste.” Mizu-yôkan: “soft adzuki-bean jelly.” Mushi-yôkan: “steamed adzuki-bean jelly.” Yôkan-iro: “a liver [rusty] color; a faded color (as of clothes).” Note: The character *yô* in *yôkan* means “sheep” and can also be pronounced *hitsuji*. Zenzai: “thick bean-meal soup (with sugar and rice cake [mochi]).”

3896. Steinkraus, Keith H. ed. 1996. Handbook of indigenous fermented foods. 2nd ed., revised and expanded. New York, Basel, and Hong Kong: Marcel Dekker, Inc. xii + 776 p. Illust. Index. 26 cm. Food Science and Technology Series, Vol. 73. Index. 26 cm. [350+ ref]

• **Summary:** Contents: Introduction to indigenous fermented foods. (1) Indonesian tempe and related fermentations: Protein-rich vegetarian meat substitutes. (2) Indigenous fermented foods involving an acid fermentation: Preserving and enhancing organoleptic and nutritional qualities of fresh foods. (3) Indigenous fermented foods involving an alkaline fermentation. (4) Indigenous fermented foods in which ethanol is a major product: Type and nutritional significance of primitive wines and beers and related alcoholic foods (incl. Chinese koji (qu, “big-qu, small qu”), p. 449), Japanese amazake (p. 480-81). (5) Indigenous amino acid / peptide sauces and pastes with meatlike flavors: Chinese soy sauce, Japanese shoyu, Japanese miso, Southeast Asian fish sauces and pastes, and related fermented foods (incl. Korean soy sauce {p. 543-45}, inyu {p. 544-45}, Korean doenjang, kochujang, Japanese hamanatto {p. 624-26}). (6) Mushrooms: Producing single-cell (microbial) protein on lignocellulosic or other food and agricultural wastes. (7) General papers related to indigenous fermented foods. Address: Inst. of Food Science, Cornell Univ., Geneva, New York.

3897. Tetsudo Unyukyoku. 1996. Shio sato shôyu miso ni kansuru chôsa [Survey concerning salt, sugar, shoyu, and miso]. Tokyo: Yushodo Shuppan. 23 cm. Series: Juyo Kamotsu Jokyô, no. 9. [Jap]*
Address: Japan.

3898. Winter, Ruth. 1996. Super soy: The miracle bean. New York, NY: Crown Publishers Inc. 192 p. Index. 21 cm. [106 ref]

• **Summary:** On the cover is written: “This wonder bean can help fight cholesterol, high blood pressure, blood sugar, cancer, ease menstrual and menopause symptoms, and keep a colon healthy. Includes a cookbook of 50 soy recipes from New York’s Natural Gourmet Cookery School.”

Contents: Introduction: The Cinderella bean. 1. How soy protects the heart and blood vessels: Full of fiber, the Eskimo secret omega-3 fatty acids, lecithin and vitamin E, preventing strokes, magnificent magnesium, soy and the Mediterranean diet, foam to wash out cholesterol?, cholesterol competitors—phytosterols, is it thyroid hormone [when thyroxine levels rise, cholesterol falls]?, amino acid at work?, could it be the B’s?, is it the flavonoids?, the bean and obesity, high blood pressure and the bean, could it be just avoiding meat and dairy products?, summing it up. 2. How soy protects against cancer: Protease inhibitors, trypsin inhibitors, plant estrogens, polyphenols, terpenes—antioxidants, fighting phytates, maybe it’s due to low-count amino acid, saponins, inositol—the cancer-fighting phytic acid, which soy products have the most anticancer potential?, potential adverse effects of soybeans. 3. How soy helps ease digestive problems: Promoting regularity, calcium and soybeans. 4. How soy is beneficial in diabetic diets. 5. How soy is proving beneficial to women: The soy and the cycle, other hormonal benefits, magnesium, PMS and pregnancy, contraceptive or fertility inducer?, so “B” it, the bones need it, magnesium and bones, boron and bones, it could be the phytates. 6. Soy and men: Soy and sex, protein power. 7. Soy products and their nutritional value: Soybeans, edamame, soybean sprouts, tofu (also known as bean curd and dou fu-tofu), tempeh, soy milk, yuba, soy cheese, okara, soy yogurt, soy sauce, soy oil, soybean lecithin, soy nuts, miso, natto, soy flour, soy powder, soy protein isolates, concentrates and grits, texturized soy protein, convenience of soy foods. 8. Easy ways to add soy to your diet: Some other easy ways to add soy to your diet, sensible soybean use. 9. Recipes: Appetizers, soups, salads, main dishes/entrées, side dishes/breakfast, sauces/dips, desserts. Glossary. Where to get more information. References. Address: M.S., Health and science writer, Short Hills, New Jersey.

3899. Stevens & Associates, Inc. ed. and comp. 1997. U.S. 1997 soyfoods directory. Lebanon, Indiana: Indiana Soybean Development Council. 47 p. 28 cm. [29 ref]

• **Summary:** This second, expanded edition of the directory contains more than 270 company listings. Contents: Forward. How to use the Soyfoods Directory (incl. Internet access). Daily soyfood guide pyramid (color). Soyfood descriptions (alphabetical): Introduction, green vegetable soybeans (edamamé), hydrolyzed vegetable protein (HVP),

infant formulas—soy based, lecithin, meat alternatives (meat analogs), miso, natto, nondairy soy frozen dessert, okara (see soy fiber), soy cheese, soy fiber (okara, soy bran, soy isolate fiber), soy flour, soy grits, soy protein concentrate, soy protein isolate, soy protein—textured, soy sauce (tamari, shoyu, teriyaki), soy yogurt, soybeans, soymilk (soy beverages), soynut butter, soynuts, soyoil & products, sprouts—soy, tempeh, tofu & tofu products, whipped toppings (soy based—“similar to other nondairy whipped toppings, except that hydrogenated soyoil is used instead of other vegetable oils”), yuba. Soybean products chart: From whole soybeans, from soybean meal, from soyoil and lecithin. Soyfood companies by product (products listed alphabetically).

Composition and nutrient content of soyfoods (large table, p. 14). Soyfood companies (alphabetical by company name; Each listing contains address, contact, phone, soy products, product names, distribution, to locate product, classification). Mail-order soyfoods: Soyfood mail order companies (listed alphabetically by company). Soyfood companies by state (alphabetical by state; California has by far the most). Soybean promotion & research organizations (national, and state). Professional associations and industry information resources. Soy cookbooks (19). Soy resource books (10). Soyfood fact sheets and recipes: 1-2 pages each for meat alternatives, miso, soyoil, soy flour, soymilk, tofu, textured soy protein, whole soybeans. Soyfoods directory survey.

This directory is on the Internet’s World Wide Web at <http://www.soyfoods.com>. For more information or suggestions, call 1-800-301-3153. The Internet version of the Directory continues to improve. “The first year saw hits to our site increase from 1,000 the first month to more than 8,000 per month now. We have added a new search engine that makes it easier to find information and a new monthly e-mail newsletter, *Soyfoods USA*, designed to inform media sources, dietitians and consumers about the latest soyfoods information. To subscribe to this popular newsletter, just send an e-mail message to soyfoods@ind.com with the words “Subscribe Soyfoods USA” in the body or subject field.”

Talk with Roger Stevens. 1997. March 10. The 1997 directory was first available in January 1997. About 100,000 copies of this directory were printed, and all but 7,000 have already been sent out free of charge. About 77,000 copies were sent to registered dietitians nationwide; all are members of the American Dietetic Association. Another 10,000 copies were sent to the American Association of Family and Consumer Sciences—basically extension personnel at the Cooperative Extension Service in each county; these people provide a lot of consumer information about foods and agriculture. About 500 copies were sent to each of the 20 state soybean development councils. The remaining 6,000 copies were sent to callers

who left their name and address at a toll-free answering service. The next step is to do a media tour in Indiana. Traveling with a registered dietitian, they expect to generate a lot of requests from citizens of Indiana. One of the goals is to show other states that if you promote soyfoods in this manner, you will get a lot of interest. Roger hopes to encourage other states to take a more active role in promoting soyfoods. The directory has generated a tremendous amount of information on the part of dietitians who call the toll-free number and have many questions about soyfoods; Roger tries to refer them to people who have the answers—such as 1-800-Talk-Soy. The Indiana Soybean Council has had to hire a new person just to handle the requests for this directory.

Next Roger plans to do a survey of registered dietitians to learn more about their responses to the 1997 directory. He might ask: Did you receive the book? Do you use it? If so, in what way and how often? How many people do you influence with regards to soyfoods as a result of this book? So if each of the 77,000 dietitians influences, on average, 10 people a year, the directory has reached more than 750,000 people. One major goal of this book is to help dietitians include more soyfoods in their own diets and in the diets of their clients. How can we better help you do this? Do you want a cookbook? A starter kit? Shall we include coupons?

From the focus groups he has already conducted, Roger thinks that future editions of the directory will be presented more like a cookbook or recipe book, with the directory in the back. “People really like the recipes. They just hand them out to their clients. We get requests for 100 books at a time from dietitians, who give the entire book to their clients at classes, in their offices, etc.” Roger has the funds to do the research to find out exactly what dietitians want in the way of soyfoods recipes and how they want them organized.

Other possible questions: Which part or parts of the book do you find most valuable? Which do you find least valuable. Is there any information which is not in the book that you wish were included?

Roger would also like to develop for the next edition of this book a graphic presentation of the inside of a typical supermarket showing all the different products which contain soy.

Note: The word “soyoil” is used instead of “soy oil” throughout this directory. Address: Stevens & Associates, 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

3900. Sullivan, Cheryl; Rhodes, Kathy. 1997. *Simply soy: A variety of choices*. Williamsburg, Virginia: Virginia Soybean Association. 118 p. Undated. Illust. Recipe index. 26 cm.

• **Summary:** Contents: Introducing soyfoods into your diet. The healthful soybean. Exploring soyfoods: Dried soybeans, fresh green soybeans, soy milk, tofu, textured soy

protein, soy flour, soy grits, tempeh, miso, soy meat analogs. Where to find soy products. Nutrient information. Recipes: Breakfast, beverages, breads, appetizers & snacks, salads, soups, sandwiches, side dishes, main dishes, desserts.

Talk with Susan Haller of the Virginia Soybean Assoc. 2000. Nov. 9. This undated book was published about 3-4 years ago.

Talk with Cheryl Sullivan. 2002. Aug. 12. She wrote this booklet for the Michigan Soybean Promotion Committee; it was published in about Jan. 1997. It was never sold and is now available online at www.soyfoods.com/SimplySoy. Address: 1. M.A., R.D., Sullivan Nutrition Inc.; 2. PhD, R.D., Preventive Cardiology Program, Univ. of Michigan; c/o 151 Kristiansand Drive, Suite 115 E & F, Williamsburg, Virginia 23188. Phone: (757) 564-0153.

3901. Pearce, Jean. 1997. Getting things done: Starting out on soy. *Japan Times (Tokyo)*. Feb. 12. p. 17. Wednesday. [Eng]

• **Summary:** “Last week’s columns reported on recent research pointing to the dietary benefits of soybean products in relieving complaints associated with menopause.”

Discusses isoflavones and the isoflavone content (in micrograms per gram) of kinako (roasted soy flour, 2,589), roasted soybeans (1,625), edamame (1,354), natto (1,273), regular tofu (509), fried tofu (695), soy milk (357), miso (373), shoyu (16).

Gives several tofu recipes and recommends *The Book of Tofu* by Shurtleff & Aoyagi.

“And finally, kudos to Japan Airlines for creating natto in a palatable form, freeze-dried and flavored... It has been tremendously successful. In two years, total sales amounted to ¥56 million. Just think of all those isoflavones.” A photo shows Jean Pearce.

3902. Smith, Michelle. 1997. Members of the Soyfoods Association of North America (as of 12 Feb. 1997). Walnut Creek, California. 1 p. Feb. 12. Unpublished typescript.

• **Summary:** The Association has 35 paid members. Two of the companies (Devansoy and MLO Products) have two people listed from each company. The companies are: ADM–Jack Painter, Eden Foods–Sally Gralla, Devansoy–Elmer Schettler & Ed Pedrick, Lightlife Foods–Rick McKelvey, MLO Products–Ed Cabelera & Ryan Schmidt, Pulmuone–Seung Hoon Lee, SunRich–Allan Routh, Sacramento Tofu–Alvin Kunishi, American Miso–Don DeBona, Tofu Shop–Matthew Schmit, Turtle Island–Seth Tibbott, Vitasoy–Yvonne Lo, Westbrae–Myron Cooper, American Soy–Tim Redmond, Clofine–Richard Eluk, International ProSoya–Dusty Cunningham, Monsanto–Molly Cline PhD, MYCAL–Terry Tanaka, Natural Products–Paul Lang, Pacific Soybean–Dan Burke, Alfred College–Charles Goubau, Ohio Soybean Council–Jim

Kapp, Iowa Soybean Association–Kirk Leads, Iowa State University–Dr. Lester Wilson, Mark Messina PhD, Nebraska Soybean Board–Stephanie Lynch, EMB Partners–John Eastham, Nutrition Advantage–Anne Patterson R.D., Soyatech–Peter Golbitz, Soyfoods Center–Bill Shurtleff, Apple Valley Market–Gary Pappendick, Essene–Howard Waxman, Sevananda–Vince Hoffman. Address: Executive Director, Soyfoods Assoc. of North America, P.O. Box 3179, Walnut Creek, California 94598. Phone: 510-935-9721.

3903. Nelson, Emily. 1997. Ambiance to go: Two neophytes bring a taste of New York to Hungry Pittsburg: In the land of the Pierogi, customers stand in line just for the atmosphere. But avoid the curried tofu. *Wall Street Journal*. Feb. 18. p. A1, A17.

• **Summary:** Tom Baron and Juno Yoon are copying hot restaurant ideas in Pittsburg. Their restaurant named Soba serves miso-glazed red snapper. But one evening at their restaurant Kaya, they both tasted the curried-tofu appetizer, found it terrible, and sent it back to the kitchen. Address: Staff reporter.

3904. Kourebanas, Maria. 1997. Less is more: Dining on the light side–International bean soups. *Gourmet* 57(2):112, 143-45. Feb.

• **Summary:** Contains a recipe (p. 145) for Adzuki bean miso soup (from Japan), using ¼ cup white miso.

3905. **Product Name:** Soy meat Mealmaker (Formerly Cajun BBQ Style and Vegan Cajun Burger) [Original Spicy Flavor].

Manufacturer’s Name: Soy Devine.

Manufacturer’s Address: 1388 Haight St., Suite 222, San Francisco, CA 94117. Phone: (415) 339-8045.

Date of Introduction: 1997. February.

Ingredients: Organic nigari tofu*, organic tomato sauce*, fresh onion, filtered water, mustard, organic brown rice syrup*, organic apple cider vinegar*, Bragg Liquid Aminos, organic miso*, organic peanut butter*, fresh garlic, non-irradiated spices. * = Grown in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 14 oz (392 gm) plastic tub. Wholesales for \$3.00. Bulk price (4 lbs. minimum): \$3.00/lb.

How Stored: Refrigerated or frozen.

New Product–Documentation: Call from Martha Devine. 1997. Jan. 16. She left Arcata in April 1996 and is starting this month to make products in San Francisco in a new kitchen. She buys her tofu from Quong Hop. This product, which was launched in Jan. 1995 as Vegan Cajun Burger (On a Bun), has been renamed and repositioned.

Photocopy of Label sent by Martha Devine. 1997. Feb. 3. This product will be coming soon. Label: Top–3½ inches

diameter. “Healthy delicious fast foods. A vegan diet is kinder to animals, people & the environment.” “Use meatless Soy meat Meal-Maker to replace the beef, pork, chicken, turkey, tuna, or sausage in dishes like: burritos, chili, enchiladas, nachos, tacos, tamale pie, tostadas, shepherd’s pie, lasagna, spaghetti, hero subs, sloppy joes, rice or noodle casseroles, or your own favorites! Pre-cooked. Delicious ‘as is’ or just heat & eat! Soy is joy.” Note: Mara changed her name back to Martha (her name at birth) in Dec. 1995.

3906. Witt, Barbara. 1997. *Pan-Asian express: Quick fixes for Asian food fans*. New York, NY: Bantam Books. xiii + 194 p. Index. 24 x 14 cm.

• **Summary:** The author, who grew up in Connecticut, loved Chinese food and Mott Street in New York City. An excellent writer, she won the James Beard award in 1993. The section on “Seasonings” (p. 8-13) gives descriptions of: Hoisin sauce, sesame seeds, soy sauce (Kikkoman is a good brand; tamari is darker and stronger), soy sauce–dark (sometimes called “black soy”; Koon Chun is a good brand), soy sauce–mushroom (flavored with straw mushrooms; Pearl River Bridge is a good brand). Soy sauce–shrimp (The Chinese equivalent of Thai and Vietnamese fish sauce. Pearl River Bridge is a good brand), soy sauce–Indonesian (*Ketjap manis*; not to be confused with the less subtle Chinese sweet soy sauce).

The section on “General packaged goods” (p. 15-18) gives descriptions of: Black beans–Chinese salted (Chinese salted black beans: “The ancient and original soyfood that produced miso and soy sauce looks kind of pitiful...” Good brands are Mee Chun and Pearl River Bridge. Avoid those flavored with five-spice powder), coconut milk (canned is excellent), coconut cream, tofu (“innocuous”).

Soy-related recipes include: Seared corn, tomato, and black bean relish (with “chopped Chinese black beans,” p. 40-41). Silky tofu walnut dip (p. 50-51). Bean paste soup (*miso shiru*, with red bean paste, p. 91). Romaine salad with lemon soy dressing (with soy sauce, p. 95-96). Tropical fruit, avocado, and tofu salad (p. 110-11). Scallops with pork and black beans (with “Chinese fermented black beans,” p. 146-47). Curried mushrooms, peas, and potatoes (p. 171-72). Address: Washington, DC.

3907. DeBona, Don. 1997. Update on American Miso Co. (Interview). *SoyaScan Notes*. March 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Last Monday, March 17, Don ended his work at American Miso Company (AMC)—after 13 years of making miso. Monday was St. Patrick’s Day and Don is more Irish than Italian. The week before, Barry had said to Don, “You know, this is not working out.” During those 13 years, the company’s annual miso production has grown 400-500%, until now AMC makes about 200 metric tons of

miso a year, and has about 70% of the miso market on the East Coast of the United States. When Don arrived at the company there were 8 vats of long-term miso, each containing about 4,000 kg; now there are 48 such vats.

In mid-1995 Don decided to end his minority partnership with Barry Evans. He sold all of his shares in the company to Barry, soon after Barry’s release from prison in California in the fall of 1995; the terms of the sale are confidential, but Don stayed on as an employee with a yearly salary. Barry really resented the fact that Don ended his partnership, but Don had great difficulty being partners with Barry—just as John Belleme had before him. Because of this feeling, Don was able to get “only a fair deal” financially for his share of the company. After the break-up, their relationship has continued to grow worse.

Don needs to have income because he has three kids, including two teenagers who will soon be entering college; his youngest is age 10. Now Don is looking for a new job. He still lives in the same house by the miso factory; he owns that house. Since he sold his share in AMC to Barry Evans, Greg Gonzales (who formerly ran errands for Barry in Los Angeles) has been working at AMC. Don hasn’t really taught him how to make koji and miso—because he was never asked to—but Greg has learned by observation. Now Greg does all the work, but he is not that interested in it and he has a long way to go until he understands the important subtleties of making koji. The company will continue to exist but the quality of the miso is likely to fall.

Barry got out of jail in the summer of 1995. Since then he has been spending a lot of money—not on his companies but on personal belongings; he now has three houses in Asheville. This spending binge put both of Barry’s companies, American Miso Co. and Great Easter Sun, “way out on a limb financially.” Barry made it very uncomfortable for Don to stay on at AMC. Barry has not visited AMC even once in 3 years.

Don is considering writing a history of the company, now that he has a little spare time. He is starting a consulting company and would like to train others around the world how to make miso. Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

3908. DeBona, Don; Chaplin, Paul. 1997. Update on miso in Europe (Interview). *SoyaScan Notes*. March 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Don attended Biofach in Germany this month; this is the fourth time he has attended. He has had two students who came from Europe to study miso-making with him at American Miso Co. in North Carolina. Jan (pronounced *Yon*) Kerremans, who worked at Lima Andiran in southern France, studied with Don for 2 months, Oct. 1984 to Nov. 1984. Jan was a minority partner with Pierre Gevaert. Jan now still works for Lima, but not as a miso

maker; originally Flemish, he married a French woman, lives in Paris, and is Lima's sales rep.

Paul Chaplin from Wales studied with Jan Kerremans at Lima in France during May and June 1984, then with Don for 2 months, in October and November 1985. His miso manufacturing business in Wales is still tiny, but it is growing well. Total turnover (income) in fiscal 1996 (Nov. 1995 to Nov. 1996) was £28,000 (= \$44,800). Paul's new address is: Source Foods (Organic Priority) 9 Cwm, Business Centre, Marine Street, Cwm, Ebbw vale, NP3 6TB, Wales, UK.

For both Jan and Paul, Don provided miso-making instruction, as well as room and board, free of charge. Barry Evans did not like Don to be teaching other people to make miso.

Pierre Gevaert was the founder of Lima. His son is named Daniel, and Daniel's wife is Valérie. Daniel studied miso-making with Jan Kerremans in southern France. In early 1990, after Pierre Gevaert died, Daniel and his wife took over Lima's miso company at Andiran in southern France. They changed the company name to Danival from Lima-Andiran. The two of them now make two types of miso, and they also sell shoyu and tamari—but it is not known if they make the latter two products or not. Lima and Danival are no longer in contact with one another because there are bad feelings between them; Lima purchases their miso from American Miso Co.—much to Danival's chagrin.

Other new miso companies in Europe: Noka, run by Karl Selgmann, in Alzey, Germany. Karl used to be with Mr. Hiroshi Kozaki of Kanta Kozaki in Urbach; that company started in 1990. Paul Chaplin has visited Noka.

Two new miso makers in Yugoslavia are Sladjan Randjelovic and his wife, Vladimirka, of Lion Health Food Co. (Zagorska 12/9, YU-11080 Zemun, Belgrade, Serbia / Yugoslavia). Their business card says: "Belgrade, London, and Beijing." Vladimirka is actively involved in the business. They are both very macrobiotic. They already make *mizumé* (rice syrup or rice malt). Their miso was of fairly good quality. They also made an interesting miso with added shiitake and kombu.

Hans Weisseneder is making miso for Sojvita in Lichtenwoerth, Austria. He had photos of his vats which are in a wine cellar outside of Vienna.

In Europe, imports of miso from Japan are almost certainly larger than total European miso production. Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

3909. Danival. 1997. Price List—Danival: 1 March 1997. Mezin, France. 21 p. 30 cm. [Eng]

• **Summary:** Contents: Unrefined Atlantic sea salt. Tomato preserves. Vegetable preserves (incl. azuki with hijiki sea weed). Mushroom preserves. New condiments. Fruit purees

with no added sugar (but 35% corn syrup for sweetness). Cereal sweeteners (barley malt, wheat syrup, corn syrup, rice syrup, apple syrup). Desserts and fruit juice. Fruit desserts. Agen prunes. Danival's macrobiotic food range: "Europe's leading manufacturer of organic macrobiotic food products. Produced in France, traditional Japanese manufacture. Non genetically engineered soya, grown by Mr. Berjon from his own seed beans since 1991." Brown rice miso* (unpasteurized, 4 sizes), barley miso* (unpasteurized, 4 sizes), young shiro miso* (unpasteurized, 2 sizes), shoyu* (unpasteurized; 5 sizes), tofu*, smoked tofu*, tempeh with shoyu and wakame*, seitan with shoyu and hijiki*, gluten powder*. * = Organically grown, certified by AB-Ecoconcert.

A 4-page French-language color insert (dated March 1997) contains color photos of many of these products, sealed in glass jars—incl. "Bio Miso (*Orge/Gerst*), Sauce Bolognaise Seitan, Raviolis (*Farcies au Seitan*), and Bio Shoyu." Address: Moulin d'Andiran, 47170 Mézin, France. Phone: +33 5 5397 0023. Fax 5 5397 0010.

3910. Foley, Michael. 1997. Briefcase portables: Turn your desk into the hottest lunch spot in town. *Vegetarian Times* No. 235. March. p. 62. *

• **Summary:** Includes recipes and a list of editors' favorite lunches.

3911. Hanamaruki K.K. 1997. Hanamaruki [Hanamaruki]. Nagano Prefecture, Japan. 21 p. 30 cm. [Jap]

• **Summary:** The first 13 pages of this color brochure are about the company, the next four pages are about the top management, and the last 3 pages show the company's miso products. Inserted into the back, and dated April 1999, is a chronology of the company from its founding in 1918. Address: Hirade 1560, Tatsuno-cho, Kamiina-gun, Nagano-ken 399-0422 Japan. Phone: 0266-41-1321.

3912. Miyako Oriental Foods, Inc. 1997. Cold Mountain Miso: A traditional taste of Asia to the modern world (Leaflet). Baldwin Park, California. 6 panels. 22 x 10 cm. Address: 4287 Puente Ave., Baldwin Park, California 91706. Phone: 818-962-9633.

3913. Pirello, Christina. 1997. Cooking the whole foods way: Your complete, everyday guide to healthy, delicious eating with 500 recipes, menus, techniques, meal planning, buying tips, wit & wisdom. New York, NY: Berkeley Publishing Group (HPBooks). xii + 525 p. March. Illust. Index. 24 cm. [38 ref]

• **Summary:** This is basically a macrobiotic cookbook. It is largely vegetarian, but has one long chapter of fish recipes (p. 189-220). No red meat or sugar is used. One long chapter, titled "Tofu, tempeh, & seitan" (p. 157-88) contains many recipes. Other soy-related recipes include: Basic miso

soup (p. 38). Miso millet stew (p. 78). Minute miso soup (p. 102). Black soybean relish (p. 136; as black soybeans are simmered, they create their own gravy). Baked beans with miso & apple butter (p. 143). Tofu cheese (with miso, p. 162). Lemon miso sauce (p. 422). Also contains recipes for amasake, azuki beans, and sea vegetables.

The recipe for Tofu cheese (p. 162), which is very creative and delicious, was developed by Christina many years ago, but the method was kept a secret—until now! Basically extra firm tofu is fermented/pickled in white miso. This recipe is for those who can't stand to give up cheese, and the resulting fermented soy cheese can be used in place of dairy cheese in many recipes, ranging from creamy white sauces to thin squares on a cracker. The tofu can be fermented in the miso anywhere from 12 hours to 4 days—depending on how strong you would like the flavor to become.

3914. Viana Naturkost GmbH. 1997. Preise und Neues [Prices and new products]. Euskirchen, Germany. 28 p. 30 cm. [Ger]

• **Summary:** This impressive, stylish/classy color catalog from Biofach, March 1997, consists of two parts. The 20-page smaller format (26.5 cm) black-and-white insert gives the prices of all products for 1997. The larger color catalog describes new products. The price list contains the following product categories: Basic and seasoned tofu products. Fresh tofu spreads. Tofu hot dogs. Wheat gluten products. Tofu cutlets. Tempeh. Seitan. Burgers and snacks. Spreads in glass jars. Soy sauce and miso products (organic shoyu, organic tamari, barley miso, brown rice miso). Fresh patés. Deli salads. Soya mayonnaise (Vianaïse). Rice drink. Noodles. Fresh pasta stuffed with tofu fillings (Tortellini, Maultaschen). Frozen products (incl. Chili con tofu and spring rolls). Sprouts (11 types & products, not incl. soy sprouts). Spreads from Noka. Canned products (*Konserven*). Address: Willi-Graf-Str. 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251-9446-0.

3915. Caruthers, Maryanne. 1997. Miso may not spark romance, but many love its unique flavor. *Oregonian* (Portland, Oregon). April 22.

3916. Elliott, Julia. 1997. With a little help from the soybean. New York, NY: SCB—Published by the author. 62 p. No index. 28 cm. Lay-flat comb bound. April.

• **Summary:** Contents: Facts and information (p. 1-8): Why the soybean? Areas of health that soy may affect: Heart disease and cholesterol, cancer, osteoporosis, kidneys, Alzheimer's disease, menopausal symptoms. Soyfoods (p. 9-13): Soy milk, tofu, soybeans, soy flour, miso, tempeh, texturized soy protein, soy protein isolates. Isoflavone contents. Recipes (p. 14-61): Appetizers, min dishes, desserts, tofu.

Note 1. There are no references to back up the many medical statements and claims on pages 1-8 of this book.

Note 2. This is not a vegetarian cookbook; ingredients include 1 lb. ground beef (p. 14), 6½ oz. minced clams (p. 15), 1 lb. sweet or hot sausage (p. 16). Address: 10 Guyton St., Kingston, New York 12401. Phone: 914-338-6368.

3917. Labbé, Max. 1997. Ces étonnants aliments végétaux fermentés et lacto-fermentés [Those astonishing fermented and lactic-fermented vegetable foods]. Auvers sur Oise, France: Published by the author. 116 p. Preface by Richard Hwei-Ming Bau. Illust. No index. 21 cm. [Fre]

• **Summary:** Part III of this popular book, titled "Asiatic Specialties," contains the following sections and subsections (p. 77-103): Chinese and Japanese fermented foods: Shoyu and tamari, miso, umeboshi, nuka pickles, natto, sufu. Characteristics and way of tempeh: Definition, preparation, arrangement of grains before inoculation. Indonesian tempeh: Preparation of the cakes, preparation of the inoculum. Javanese tapé (tapeh) and its culture. American-style tempeh. A color photo on the rear cover shows Max Labbé. Address: 3 rue Emile Level, F- 75017, Paris.

3918. *Nutrition News* (Riverside, California). 1997. Soy tsunami: The wave of the future. 21(4):1-4. April. [1 ref]

• **Summary:** Contents: A wave is coming (introduction). East soy and save your life. Soy vs. cancer. Top ten benefits of soy—According to Earl Mindell's Soy Miracle. Genistein is unique to soy. Soy vs. heart disease. The pause that refreshes: a soy shake. And, by the way, save your planet too. Get on the soy train! If you are a first timer, jump in there with tofu and/or isolated soy protein.

Where the good stuff is—table showing nutritional composition, including isoflavones of 1 serving of: miso, cooked soybeans, soy flour, soymilk, soy nuts (dry roasted), soy protein isolate, tempeh, firm tofu, low fat tofu (aseptic pack), extra firm tofu (aseptic pack), textured soy protein. Note: Good sources of isoflavones provide 30-50 mg per serving.

"This issue of *Nutrition News* is dedicated to partners William Shurtleff and Akiko Aoyagi and to Frances Moore Lappe, pioneers in the promotion of soyfoods and of the concept of kindness of eating."

3919. Spaelstra, J.; Shapira, H.; Donnelly, H. 1997. Re: Introducing Dakini Health Foods Pvt. Ltd., in Pune/Puna, India. Letter to William Shurtleff at Soyfoods Center, May 7. 1 p. Handwritten.

• **Summary:** The letter begins: "To whom it may concern: We are a young company. Just started one year ago and very enthusiastic. I have come across your *Book of Tofu* and loved it. Started experiments and love it even more now. My friend and partner in business [Seemo] came across some

American book [*Handbook of Indigenous Fermented Foods*, edited by Keith Steinkraus] that had 1 chapter about tempeh production. Out of this he developed the way to make tempeh here in India, which was quite difficult at times because the info was far from complete. Meanwhile our plans have changed because of all this and the very wholesome atmosphere that we sense around working with soybeans (and consuming the different products)—the same atmosphere we are picking up from your books too which is very inspiring to us.”

They order three books—tofu-, tempeh-, and miso production, plus *The Book of Tempeh*—all by Shurtleff & Aoyagi. “We would really like to set up a complete soyfood line now. So please get in touch!” Signed: J. Spaelstra (Holland), H. Shapira (Israel), and H. Donnelly (Indian). Address: Dakini Health Foods Pvt. Ltd., Vidyut Nagar, Plot A2, Kawdewadi, Pune/Puna 411 001, India. Phone: 0091-212-63-1990 (phone and fax).

3920. Gevaert, Valérie. 1997. Re: Brief history of Danival and current activities. Letter to William Shurtleff at Soyfoods Center, May 13—in reply to inquiry. 2 p. Typed, with signature. [Eng]

• **Summary:** “Daniel Gevaert purchased the Lima Andiran site in early 1990—but not the Lima trademark—and established Danival the same year in June. Our miso and shoyu, as well as our fruit and vegetable preserves are prepared with certified organic ingredients, and we also package unrefined Atlantic sea-salt. Our company name is indeed Danival.” The address and phone and fax numbers are shown below.

“My full name is Valérie Fenech Saint Genieys. Daniel and I have been married for 15 years, and we have two sons, Benoît age 14 and Martin age 10.

“We began producing miso as soon as we bought the site, and put it on the market for the first time in 1992, after completing the first 18 month production cycle. Our shoyu products were launched the following year. All Danival’s products are prepared on site. We buy 90% of our raw material in France (soya, vegetables, fruits and cereals), giving priority to local producers in our region in the southwest.

“Daniel’s skills in preparing miso came to him from his father, who was in charge of miso production for Lima. At the time, Jan Kerremans was an employee whose task was to work on the miso recipe. Daniel himself has had the great privilege of receiving the teaching and guidance of the master-craftsman who is personally responsible for miso preparation within the imperial court of Japan, and who has imported his traditional skills and knowledge to Daniel while visiting Danival or during Daniel’s frequent trips to Japan. We are both familiar with your publications and find them of great value.”

Note 1. Near the top of the letterhead, below and to the left of the logo and company name, is written “Fabricant de père en fils.” In the center of the stationary, in a light half-tone, is a line drawing of a traditional shoyu seller (which also appears in *The Book of Miso*, 2nd ed., by Shurtleff & Aoyagi, p. 262). A printed seal in the lower left corner shows that the company won special mention for the *Prix Écoproduit* 1992, in the “Enterprise and Environment” competition organized by the French Ministry of the Environment.

Note 2. Enclosed with the letter are five brochures and booklets, some of which are cited separately. Address: Moulin d’Andiran, 47170 Mézin, France. Phone: +33 5 5397 0023. Fax 5 5397 0010.

3921. Seemo (H. Shapira). 1997. Re: History of Dakini Health Foods Pvt. Ltd., in Pune/Puna, India. Letter (fax) to William Shurtleff at Soyfoods Center, May 13—in reply to inquiry. 7 p. Handwritten.

• **Summary:** Seemo is Mr. H. Shapira from Israel and Kairava is Mrs. J. Spaelstra from the Netherlands. Seemo is in charge of tempeh, Kairava in charge of tofu & soymilk. They are making the earliest known commercial soybean tempeh in India. For their first letter see Dakini (1997).

Both Seemo and Kairava are devout disciples of Osho (formerly called “Sri Rajneesh”), he since 1984 and she since 1986. They arrived in Pune to stay in about 1988/89. Initially to support themselves, they had a gem and crystal shop, a wholesale new-age jewelry operation, and a motor bike repair shop. Now they have finally found what they want to do for work. “It’s love and Zen.” Osho died in Pune on 19 Jan. 1990; they returned to India the next day; the fire was still burning at the burning ghat. In the year before his death, his discourses were mostly about Zen. He died in Pune due to heavy metal poisoning and radiation damages done to him by U.S. marshalls in an Oklahoma jail cell, where he was kept unlawfully in 1985.

Their company started with the idea of making white tahini and possibly Turkish halva [halvah] (in which white tahini is a main ingredient). It was extremely difficult to get started. As foreigners doing business in India, they had to register a “Pvt. Ltd.” company. Then they could not find a space for the company, since Pune is a rapidly growing city. So Seemo pulled down the back garden in his rented house, constructed a shed with a floor area of 25 square meters, and moved his bedroom up to the second floor. This gave him an additional 24 square meters where the bedroom used to be. They also have a 25 square meter storeroom where they make the tempeh. He got electrical connections then waited for 8 months while a colloid mill (copy of a 1940 model), hot air oven, and filling machine were delivered. The mill proved to be a technical nightmare; he had to totally rebuild it. Finally their small factory started operation. Then they added peanut butter and brown tahini

to their product line—with no additives or preservatives. They had to set aside their plan to make halva.

Spicer College, run by Seventh-day Adventists, is located in Pune. They have a health food store and they make peanut butter—nearly edible, with too much sugar and salt, plus other ingredients. Their sesame butter (brown tahini) is gritty, rancid, and inedible. They also produce grape juices (very, very sweet), pastries (Mmmm good). And they make and bottle soy milk in plain and chocolate flavors, but it is loaded with white sugar and Class II permitted preservatives! They also make pretty good tofu; Seemo used to eat it now and then for the last 8 years. “Besides being actually able to taste the Bible in it, I had no reason to complain.” This tofu is now served at the Osho commune. “Pune old timers told me that once—20 years ago—the place was managed by an enthusiastic old American woman and the quality of their products was very good.

At Dakini, they now also make hummus in their kitchen, 15 kg/week in summer and 60 kg/week in winter. They pack it in 200 or 400 gm cups and sell it at various shops in town to foreigners and Indians. They like it.

Seemo started developing the tempeh about 8 months ago. Last year a friend of his found a book titled *Handbook of Indigenous Fermented Foods*, edited by Dr. Keith H. Steinkraus, in a pavement stall for 400 rupees (US\$13.00). Since he had been to Bali, Indonesia, many times, he tried making some of the foods but rarely got any edible products. So before leaving Pune, he gave the book to Seemo as a gift. As he read it, Seemo got really excited. He had grown up in a meat-eating family. Even while traveling and living in Europe, he continued to eat meat and junk foods. “Then I understood it was not good for me on all levels, and went vegetarian.” Living in Holland later on, he started to learn about tofu, and then tempe, tamari, etc. “So now I was a healthy, well-fed vegetarian.” Then he moved to India, but after some years of eating fried foods, lentils and lots of dairy products, he started to eat meat again, 2-3 times a month. “It did not feel too good, but I had no idea how to manage my diet, and living on mostly dairy products did not suit my body. So when Dr. Steinkraus’ book fell into my hands, I got excited and realized that it might be possible to make tempe here in India at a small, affordable investment.

“So I first got a small incubator built; its actually like a cool box ½ meter wide and 1½ meters high, made of galvanized sheet metal with insulation and 8 shelves (of which I now use only 3).” At the bottom are heaters, which give 250-540 watts of heat. Two old computer cooling fans distribute the heat, and a thermostat regulates it. “It’s not a perfect machine but I can do 5-12 kg/day when I want and, most important, I can produce in it excellent spore powder—since it is difficult to import anything here. Actually, I nearly gave up the project, because I was making sporulated

tempeh, then sun-drying it and running in through my spice grinder. The powder looked great. The tempe cakes used to get hot, then very hot, then smelly with funny colors (no white mold). I double-checked everything. In the end, only the grinding was left, so I bought a small hand-turned grain mill (500 rupees = US\$15.00). Since then, perfect tempeh has been happening.

“For starter, I first got a packet of spores from Holland. Later I got 1 gram of white tempe starter from an American friend in Goa (she used to make her own supply down there), and playing with it I found it a bit more suitable for my use. So most of my spore stock now is from this starter, and some is mixed. I still have to study how to make tempe and starter during the different seasons here. Now it is very hot and dry. Next month is monsoon (wet), followed by a month that is hot and humid, and then the 3-month ‘cold’ season.”

About half of all tempe produced is sold frozen; the other half is sold fresh. Seemo also plans to try making dry tempeh. He gives away lots of tempe as samples; most people love it. Starting this July, it will appear on the menu of one restaurant, possibly two—first as Tempeh Stroganoff and Tempeh Shashlik (steamed, then spiced, then barbecued). “When I get *The Book of Tempeh* I will introduce it to more places. Meanwhile, I have totally forgotten about eating meat. I feel strong and light. I find my vision benefits too; I haven’t noticed that with tofu. Now that I am a bit more confident working with the mold, I hope to raise some capital, move to a suitable place (possibly well out of town), and then start to make tamari shoyu, and definitely some miso too. So that’s a little of our story. Thank you.” Address: Dakini Health Foods Pvt. Ltd., Vidyut Nagar, Plot A2, Kawdewadi, Pune/Puna 411 001, India. Phone: 0091-212-63-1990 (phone and fax).

3922. Kaufman, P.B.; Duke, J.A.; Brielmann, H.; Boik, J.; Hoyt, J.E. 1997. A comparative survey of leguminous plants as sources of the isoflavones genistein and daidzein: implications for human nutrition and health. *J. of Alternative and Complementary Medicine* 3(1):7-12. Spring. *

• **Summary:** Genistein and daidzein are important anticancer metabolites. A survey of over 80 taxa of mostly agriculturally important plants found the highest concentrations of genistein (more than 2 gm per kg dry weight) in the leaves of *Psoralea corylifolia* (Indian bread root). All other legumes except fermented soybean miso had genistein levels of less than 400 mg per kg dry weight. Significant concentrations of daidzein (dry weight basis) were found in the stems of fava bean (*Vicia faba*; over 1 gm/kg) and the roots of the kudzu vine (*Pueraria lobata*; 0.95 gm/kg). Miso is a rich source of both isoflavones. Address: 1. Dep. of Biology, Univ. of Michigan, Ann Arbor, MI 48109-1048.

3923. Liu, KeShun. 1997. Fermented Oriental soyfoods. In: KeShun Liu. 1997. Soybeans: Chemistry, Technology, and Utilization. Florence, Kentucky: Chapman & Hall. xxvi + 532 p. See p. 218-96. Chap. 5. Index. [127 ref]

• **Summary:** Contents: Introduction. Fermented soy paste (*jiang* and miso): Varieties of miso and jiang, koji and microorganisms involved, koji starter and its preparation, Chinese jiang preparation (traditional household method, pure culture method, enzymatic method), Japanese miso preparation (rice koji preparation, treatment of soybeans, mixing and mashing, fermentation, pasteurization and packaging), principles of jiang and miso preparation, major factors in jiang and miso making (raw materials, cooking temperature and time, conditions during koji preparation, proportions of ingredients, fermentation conditions, novel processing for special products). Soy sauce (*jiangyou* or *shoyu*): Varieties of soy sauce, soy sauce processing (traditional Chinese household method, modern Chinese method, processing of Japanese shoyu, comparison of soy sauce and *jiang* or miso preparations), principles of making soy sauce (action of koji enzymes, fermentation by lactic bacteria and yeasts, color and flavor formation, glutaminase and glutamic acid), chemical soy sauce, progress in soy sauce preparation (use of defatted soy grits or flakes, improvements in treating soybeans, development of an automatic koji-making system, application of microorganisms with specific activities, techniques to shorten production time, improvements in soy sauce clarification), chemical composition, quality attributes and standardization, mycotoxins. Tempeh: Varieties of tempeh, preparation (traditional method, pilot plant method, petri dish method), microorganisms involved, factors affecting tempeh fermentation (starter, dehulling and aeration, moisture, temperatures, acidity, losses of solids), changes during fermentation (general changes, protein, lipid, carbohydrates and other constituents), production of vitamins, storage, nutritional value. Natto: Preparation, microorganisms involved, factors affecting natto quality (raw material, soybean cooking conditions, storage), changes during fermentation, trends in research on natto and *B. natto* (development of novel strains of *B. subtilis*, purification and characterization of key enzymes, studies into genes encoding key enzymes of *B. subtilis*, studies of possible physiological roles of natto). Soy nuggets (*douchi* or *hamanatto*). Sufu: Preparation, types of sufu, microorganisms involved, effect of mold growth, effect of brine aging, references. Address: PhD, Soyfood Lab., Hartz Seed, a Unit of Monsanto, P.O. Box 946, Stuttgart, Arkansas 72160-0946. Phone: 870-673-8565.

3924. Messina, Mark; Messina, Virginia. 1997. Soy: Good food for good health. *Veggie Life (Concord, California)*. April/May. p. 48-50, 55.

• **Summary:** Contents: Introduction. Heart disease. Osteoporosis. Menopause. The many faces of soyfoods: Soybeans, soy flour, soymilk, textured vegetable protein, tempeh, soynuts, miso, tofu.

3925. **Product Name:** Miso Thai Vegetables.

Manufacturer's Name: Gloria's Kitchen.

Manufacturer's Address: P.O. Box 2071, Burlingame, CA 94011-2071. Phone: 650-579-0638.

Date of Introduction: 1997. June.

How Stored: Frozen.

New Product–Documentation: Letter (fax) with date sent by Gloria's Kitchen. 1999. June 21. This product was introduced in June 1997.

3926. Andoh, Elizabeth. 1997. Tea and temple fare in Kamakura. *New York Times*. July 20. p. XX6, XX18 (Sunday).

• **Summary:** Contains reviews of restaurants in Kamakura. Saami serves dishes that include wheat gluten, and "soy foods," and a sweet tofu-based pâté known as gizei-dofu [gisei-dofu], plus "goma-dofu, creamy sesame pudding drizzled with soy sauce and topped with a dab of fiery wasabi horseradish."

Kintame uses traditional pickling mediums including "miso paste." Their "house soup is ozoni, a creamy, pale, a miso-thickened broth.

Fushiki An offers shojin ryori, temple-style vegetarian cuisine including goma-dofu and a "clear broth with cubes of silken bean curd..." The chirashi-zushi contained "soy-simmered koya-dofu bean curd..." Address: Tokyo, Japan.

3927. Mueller, Ed. 1997. Brief history of Takoma Soy Inc. (Interview). *SoyaScan Notes*. July 21 and 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Takoma Soy was incorporated on 5 March 1992 and started operation on 1 April 1992—sharing the same space as Olive Tree Works in Takoma Park, Maryland. Takoma Soy purchased tofu from Spring Creek Natural Foods (Spencer, West Virginia) and sold it at cost to Olive Tree. Takoma Soy is now a full-line natural foods distributor, carrying products which include Spring Creek Tofu (from Spencer, West Virginia), Miso Master miso (from North Carolina), and tempeh from Cricklewood (Mertztown, Pennsylvania). They recently purchased (using a bank loan) a property that used to be a Bible camp. On the property are a 12,000 square foot building, a lodge house (with 5-8 bedrooms), and 3 cabins. At its peak the camp had 300 to 500 day campers and up to 150 overnight guests. Ed would like to convert the main building into a tofu factory. He is working on a joint venture that would probably set up a new company, with Twin Oaks and Olive Tree involved as partners. Twin Oaks plans to stop making tofu, buy their

tofu from Takoma Soy in Maryland, and focus on making second generation tofu products.

Ed was a Peace Corps volunteer in Sierra Leone. His vision for the property is to develop a center where people can come to learn agricultural skills, including how to make tofu, bake bread, etc. Address: 11 South Pennsylvania Ave., Hancock, Maryland 21750. Phone: 301-678-5283.

3928. Buzzell, R.I.; Poysa, V. 1997. Two food quality soybean cultivars released by GPCRC. *Canadian Soybean Technical Bulletin (OSGMB, Chatham, Ontario, Canada)* 3(2):1. July.

• **Summary:** GPCRC is the Greenhouse and Processing Crops Research Centre (formerly Harrow Research Station). "These two cultivars, AC Onrei and OX756, have been introduced to complement Harovinton expand the export of Ontario soybeans into the premium Asian soyfood market. Harovinton, a tofu-type soybean cultivar developed at Harrow, has established Canadian soyfood soybeans as a premium quality product in Asia, where it is called 'Orient Pearl.'

"AC Onrei is a selection from the cross Vinton X Enrei. Enrei is a premium quality Japanese tofu cultivar which lacks the a4 protein sub-unit of the 11S glycinin (gy4/gy4). Enrei's superior tofu quality, especially the ability to make premium tofu using the 'nigari' (magnesium chloride) coagulant, is due to the lack of this a4 protein sub-unit. Vinton is Gy4/Gy4 and has the a4 protein sub-unit."

"OX756 was developed from the backcross of L2 X Harovinton. L2 is a backcross derived lx2/lx2 line of Century which lacks the L2 lipoxigenase isoenzyme... Harovinton is Lx2/Lx2 and has the L2 lipoxigenase isoenzyme."

"OX756 is a low lipoxigenase (lx2/lx2), yellow hilum cultivar similar in yield but earlier maturing than Harovinton, the recurrent parent. The lack of the lx2 lipoxigenase enzyme should reduce the 'beany' flavours in tofu, soymilk, and other soyfood products made with OX756, thus promoting wider acceptance of soybeans as food ingredients. It was released to W.G. Thompson and Sons, Ltd."

A table shows agronomic performance and seed quality for these two new food varieties compared with Harovinton during 8-9 years. For each variety are given: Yield, plant height, lodging score, days to maturity, weight of 100 seeds, protein %, and oil %. Address: AAFC, GPCRC, Harrow, Ontario, Canada.

3929. Jessop, D.B. 1997. The food processing lab at GPCRC at Harrow. *Canadian Soybean Technical Bulletin (OSGMB, Chatham, Ontario, Canada)* 3(2):1. July.

• **Summary:** "The food processing lab at the GPCRC [Greenhouse and Processing Crops Research Centre] has, for the past several years, evaluated soybean varieties for

their soymilk, tofu and miso making properties. The Grainspec whole grain infrared analyser is capable of evaluating raw soybeans for moisture, oil, protein, total sugar, colour and more recently sucrose and stachyose [an oligosaccharide that causes flatulence]. The raw beans are also analysed for water uptake in both the tofu and miso process." Address: AAFC, GPCRC, Harrow, Ontario, Canada.

3930. Woodrow, L.; Buzzell, R.I. 1997. Sugars in food processing soybeans. *Canadian Soybean Technical Bulletin (OSGMB, Chatham, Ontario, Canada)* 3(2):2. July.

• **Summary:** "The soybean program at the Greenhouse and Processing Crops Research Centre [formerly Harrow Research Station] focuses on the development of lines with characteristics suited to the domestic and export food processing markets. Seed characteristics such as hilum and seed coat colour; storage protein content and profile; enzyme profile; oil content and fatty acid composition; total carbohydrate content; and free sugar composition are important determinants of the food processing performance of soybeans into products such as soymilk, tofu, and miso."

"As soybeans mature, free sugars are synthesized and form part of the storage reserves of the seed. When the seed germinates, these sugars represent the first energy available to the young seedling... Glucose and sucrose are present in most fruits and vegetables, raffinose and stachyose are found in some plant families including legumes. These sugars are synthesized in a pathway that leads from the monosaccharide glucose to sucrose (disaccharide), raffinose (trisaccharide) and finally the tetrasaccharide, stachyose. In the mature soybean sucrose and stachyose are present at levels ranging from 3.0-8.0% by weight dry matter depending on the variety or line. Raffinose and glucose are intermediates in the synthesis and are present at much lower levels in the mature seed."

A graph shows the glucose, sucrose, raffinose, and stachyose contents of 40 soybean varieties and lines, plotted to show their relationships with the total free sugar content. The data illustrates that among lines increasing total free sugar content is correlated with an increase in sucrose. Sucrose is the most abundant sugar in mature soybeans, followed by stachyose, then raffinose. Glucose and fructose are present in only trace amounts. Address: AAFC, GPCRC, Harrow, Ontario, Canada.

3931. Little Tokyo Service Center. 1997. L.A. Tofu Festival, August 9-10. Los Angeles, California. 22 p. Illust. 26 cm. Saddle stitched (stapled).

• **Summary:** Contents: 1997 LA [Los Angeles] Tofu Festival committees and volunteers. Schedule of events, Aug. 9-10. Map of events. Letter from Little Tokyo Service Center, with thanks to House Foods / Hinoichi Tofu as the Title Sponsor. List of sponsors by rank. Honorary chairpersons:

Sandy Gooch and Rob Fukuzaki. Health education and health benefits of tofu. Tofu: A 2,000 year old health food miracle, compiled by William Shurtleff of Soyfoods Center. 1997 LA Tofu Festival restaurant profiles (20 restaurants, p. 7-9): Aloha Food Factory (Alhambra, CA, started Oct. 1990–Tofu specialty dish: Tofu with cha-shu on stir fried vegetables). Berth 55 (Long Beach, 1988–Tofu poke dish). Buk Chang Dong Soon Du Bu (LA, April 1996–Spicy tofu casserole with oyster, shrimp & clams). Chez Sateau (Arcadia, 1981–Tofu cheesecake, Tofu Caesar Salad. Chef Sato was “Chef of the Year of Los Angeles” and 1980 Chef of the Year of southern California.” He was also a member of the 1980 U.S. Team for the Cooking Competition in the Culinary Olympics). Curry House (Beverly Hills, Aug. 1996–Tofu steak {marinated in soy sauce}, Tofu cheesecake). Furaibo (LA, Aug. 1994–Tofu salad with original ginger). Indo Cafe (Los Angeles, 1993–Stuffed tofu cake {tofu filled with ground chicken and shrimp}, Fried tofu {marinated in turmeric and candlenut}). Jozu Restaurant (LA, Dec. 1, 1996–Fried tofu with marinated porkchops). Little Tokyo Lion’s Club (LA, 1974–Tofu miso soup, Futomaki sushi). Mr. Ramen (LA, Oct. 1993–Vegetarian {with tofu} ramen). Ocean Seafood Restaurant (LA, 1990–Mabo tofu, Tofu with mixed vegetables, Tofu in clay pot). Papa Jon’s Cafe (Long Beach, 1990–Greek tofu salad, Tofu lentil salad, Potato-tofu salad, Sesame tofu salad, Tofu spinach, Lasagna, Tofu broccoli stir-fry, Spaghetti and tofu balls, Tofu/lettuce/tomato {TLT} sandwich, Tofu scramble {breakfast}, Tofu dessert pies, Tofu frosting {on cake}, Tomato basil w/tofu, Teriyaki tofu, and Spinach mushroom pasta w/tofu). Pat Greenberg, “Fitness Gourmet” (Beverly Hills, Renowned instructor of the “Joy of Soy” cooking classes). Southern California Cuisine (LA, 1994–Tofu ravioli served with Curry sauce or traditional marinara sauce). Suehiro Cafe (LA, 1972–Stir-fried eggplant, Bell peppers with tofu braised in miso sauce, Deep-fried tofu with sauce). Three Brothers Restaurant & Catering (Harbor City, 1983–Chinese tofu salad, Tofu seafood salad). Tofutti Brands Inc. (Cranford, New Jersey, 1982–Non-dairy frozen desserts, Tofutti tortellini, Mini ravioli, Tofutti cookies). Unique Catering (Chino Hills, 1995–Tofu patty with shiitake sauce, String beans with tofu dressing, Inari-sushi). Vegetarian Delight (San Gabriel, 1991–Veggie fish in hot braised sauce). Wild Oats Community Market (Santa Monica, 1984–Tofu tempeh deli salad).

Advertisements (p. 10-21), including ads for Tofutti, Patricia Greenberg “The Joy of Soy” cooking classes, JFC International Inc., House Foods America Corporation (full page, inside rear cover). Address: Little Tokyo Service Center (Resource Development Center), 231 East 3rd St., Los Angeles, California 90013. Phone: 213-473-1600.

3932. Hesser, Amanda. 1997. Miso goes beyond Japanese cooking. *New York Times*. Sept. 3. p. C1, C8 (NY City ed.); p. B1, B8 (Natl). Living Arts section. [1 ref]

• **Summary:** An excellent, long article. The version in the New York City edition (described below) is considerably longer than that in the national edition. Nina Simonds believes that miso is no longer an exotic food as it once was; it has now become much more mainstream. Many varieties of miso are now sold in America. William Shurtleff, co-author of *The Book of Miso*, notes that “It brings a savory flavor to vegetarian meals that is very hard to find. Miso provides a bridge between a steak and a vegetarian diet.”

Katagiri & Company, on the Upper East Side of New York City, sells more than 20 varieties. In Japan, miso soup maintains a reputation as a cure-all, much like chicken soup is to westerners. Contains three miso recipes. One sidebar, titled “The package says a lot,” gives the name, address and phone number of six different sources for misos: The Health Nuts, Integral Yoga Natural Foods, Katagiri & Company, Whole Foods Market (all 4 in New York City), South River Miso Co. (Conway, Massachusetts), and Natural Lifestyle Supplies (Asheville, North Carolina–Sells Miso Master, Onozaki, Mitoku, and South River misos). Photos show: Nine different brands of packaged miso. A bowl of miso soup, with chopsticks.

3933. Fischer, Paul. 1997. History of House of Herbs, and of the Far East line of condiments which includes soy sauce, teriyaki sauce, and hoisin sauce (Interview). *SoyaScan Notes*. Sept. 11 and 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** House of Herbs was started in 1939 by Patricia Winters. She was quite a woman, who invented the first under-arm deodorant called Oder-Ono, and she sold that company in 1929. Her husband, Ezra Winters, who was a muralist. He was doing a mural in a post office depicting the use of herbs and spices in medicine, cosmetics, and food. She was retired after selling her business, lived in Connecticut, so she started growing herbs in her back yard. Then she started selling them at the New York Flower Show around 1940-41, and out of that she developed a business, House of Herbs.

Paul has been working for other people in the specialty food business since 1955. He worked for Virginia Deere Extract Co., for a specialty food distributor, and for a packer of Spanish olives. In 1972 he had been for Virginia Deere for about 5 years. He and his wife lived in New Jersey and their plant was in Brooklyn; it was a long commute and he was getting very tired of it. His wife agreed with his desire to go into business. They found a business named House of Herbs (in Greenville, New Hampshire), which was on the verge of bankruptcy, and was now owned by Republic Foods (a mini-conglomerate)–having changed hands 3 or 4 times since Patricia Winters first sold it. In late May 1972

Paul and his wife bought House of Herbs and began running it in New Hampshire. In 1974 they moved the company to 28 Ann Street, Passaic, New Jersey—where it is still located.

House of Herbs presently makes a line of condiments under the Far East brand. The first product in the line was HVP soy sauce. In 1974 House of Herbs was a small specialty food company, that packaged and sold herbs and spices, cooking wine and wine vinegar, which he sold to specialty food distributors. One of these distributors in Atlanta, Georgia, was distributing Kikkoman Soy Sauce; Kikkoman then went direct, so this distributor got very angry and asked Paul if he could make a soy sauce for him. Paul said “Sure I can.” So Paul bought some Hercules HVP, got the federal standards or specifications (E-610), and developed an HVP soy sauce which he called “Maestro Brewed Soy Sauce”—even though it was not fermented. That was the first product in the line. The ingredients (shown above) are the same now as they were in the beginning. Also in 1974 Paul developed a Teriyaki Sauce, also under the Maestro Brand. Then he added more (such as Sweet & Sour Sparerib Sauce, Oyster Sauce, Brown Sauce, etc.), since he found he needed a line to sell the products. In about 1975 or 1976 he visited San Francisco, California, for a convention. He saw a Far East travel agency, so he took the man’s business card and used it to design a new label with the Chinese characters for “Far East” on it. Then he registered it in the U.S. Patent Office as a trademark. In about 1987 he introduced a Hoisin Sauce (which see). He basically cooks, mixes, and bottles the ingredients to make this line; no fermentation is involved. Paul wants to start making Hatcho miso, since fermented soy beans, the main ingredient in his Hoisin sauce, are no longer available from Wah Jah Shan.

Paul will be age 67 in November 1997. “I am not going to retire. I love my little business. It’s very exciting. I go to Florida, where I have a little house, in the winter. I’m too young to retire. Business has been very, very good the last 3-4 years and all of a sudden, it has dropped way off. So now I’m looking for a way to make Hoisin Sauce—because nobody makes a good product.” Address: Owner, House of Herbs, Inc., 38 Ann St., P.O. Box 178, Passaic, New Jersey. Phone: 201-779-2422.

3934. Bates, Caroline. 1997. California—Los Angeles area: *Spécialités de la maison. Gourmet* 57(9):32, 34. Sept.

• **Summary:** One of the three restaurants featured in this article is Jozu, a Japanese restaurant at 8360 Melrose Ave. in Los Angeles (phone: 213-655-5600), owned and run by Andy Nakano. One of the writer’s favorite recipes is the fragrant Japanese eggplant in miso sauce. A photo shows the prepared dish.

3935. Lightlife Foods, Inc. 1997. Eating healthy can be soy easy (Brochure). Greenfield, Massachusetts. 12 p. 22 cm.

• **Summary:** On the cover of this full-color, glossy brochure is a color photo of a meatless burger (between buns, with onion, tomato, and lettuce), a hot dog (in a bun, with a bead of mustard on top), and a plate of stir-fried tempeh with veggies. In the background are rolling soybean fields. In the foreground are three pods of green vegetable soybeans, and 15 whole dry soybeans.

Contents: Ten reasons to include soyfoods and soy protein in your diet (p. 2-3): 1. You will be in good company. 2. Lower your cholesterol. 3. Lower your risk of cancer. 4. Menopausal symptoms. 5. Soyfoods are nutritious. 6. A quality protein source. 7. Save our precious resources. 8. A variety of alternatives and greater availability. 9. Better quality. 10. Soyfoods are “in.”

Glossary of common vegetable protein foods (p. 4-5): Tofu, tempeh, meat analogs, soymilk, soy cheese, soy flour, soy protein, textured vegetable protein (TVP), seitan, miso. A table shows each Lightlife product, serving size, and grams of soy protein (soy tempeh has the most at 24 gm per 4 oz serving, followed by Gimme Lean at 18 gm per 4 oz).

Products (with a brief definition of each) and mission statement (p. 6-7): Smart dogs. Tofu pups. Wunderdogs (The first low-fat vegetarian hot dog just for kids). Smart deli slices (fat free). Foney baloney (Kids love it). Lean links sausages. Gimme lean (fat free). Marinated smoky tempeh strips (“Fakin’ Bacon”). Fakin’ bacon bits. Marinated tempeh “grilles” (soy tempeh patties in Tamari, Lemon, and Barbecue flavors). Lightburgers (fat free). Lightsausages (fat free). Tempeh (in 5 varieties—Soy, Three Grain {millet, brown rice, barley}, Garden Vegetable, Quinoa-Sesame, and Wild Rice), Savory seitan, Vegetarian request (100% vegetarian, all-natural entrees). A color photo shows many products in their packages.

Getting started (p. 8-10; how to use key products). About Lightlife (since 1979). Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001 Ext. 129.

3936. Richmond, Akasha. 1997. The art of tofu: Celebrated vegetarian recipes from around the world. Torrance, California: Morinaga Publications. iv + 84 p. Illust. No index. 22 cm.

• **Summary:** Contents: Preface. Food with charisma. Guide to ingredients. Freezing, blending, storing, and baking with Mori-Nu Tofu. Cooking terms and techniques. Recipes: Small bites. Soups. Entrée salads and sandwiches. Main meals. Baked goods and desserts. Ingredient equivalents. Metric equivalents. Oven temperature equivalents.

This book was sponsored and published by Morinaga, and every recipe calls for the use of Mori-Nu Tofu. The 50 recipes are low in calories and fat—and delicious!

Known as the “chef to the stars,” Akasha has been the personal chef for celebrities such as Michael Jackson, Barbara Streisand, and Carrie Fisher—to name a few. Her

catering company has catered events and parties for the likes of Madonna, Al Pacino, Richard Simmons, MTV, and others. The Preface begins: "Back in 1975, when I first decided to go 'vegetarian,' you could only find tofu in Chinese restaurants and obscure health food eateries." She grew up in Hollywood and Florida; "Coconut Grove hippies and surfers were the start of a career that would take me all over the world." Address: Beverly Hills, California.

3937. Cooper, Myron. 1997. New developments at Westbrae. Sale to Hain Food Group is imminent (Interview). *SoyaScan Notes*. Oct. 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** About 6 months ago the Vestro board of directors changed the company name to Westbrae Natural, Inc. Westbrae is scheduled to be sold to the Hain Food Group on Oct. 14. Myron is quite certain the deal will go through. He and Andy Jacobsen will stay on the run the Westbrae part of the business. The price of Hain's stock has been skyrocketing recently, even though their earnings are less than those of Westbrae. Hain had made several weak offers for Westbrae, then (by coincidence) Chiquita Banana came along and made a strong offer—that almost led to the sale. After that, Hain came back with a serious offer.

Vestro purchased Westbrae in 1988. At that time, Westbrae had only one soymilk SKU (not including Malted), in a yellow box, made by Vitasoy—so there was not much room for growth. Since then, Westbrae's non-dairy beverage category (soymilk and rice milks) has grown extremely rapidly—roughly eight-fold in sales, so that today Westbrae's sales in this category are about \$16 million/year; of that roughly 80% is soy and 20% rice. Myron believes that Westbrae is now the leader in this category (soy + rice beverages) among all natural foods companies, ahead of both Eden Foods and Vitasoy. Westbrae's distributors tell Myron that the latter two companies now appear to be having problems; they may be having difficulties keeping up with demand. Imagine Foods (maker of Rice Dream) is a very strong competitor, and Rice Dream (rice beverage) has been a bonanza. But Westbrae has just introduced a competitor—Oat Plus, which tastes good and contains soluble fiber (beta-galactones), about which FDA allows a health claim.

Westbrae's single best-selling SKU in terms of units sold may be Malted. Myron has had a hard time finding a manufacturer for this product. They are made by John Yamauchi in Los Angeles. He is having trouble keeping up with demand.

Westbrae has no plans to introduce soymilk in a gable-top carton, primarily because the company now has only one refrigerated product—tub miso.

Myron is very concerned about the possibility of *E. coli* turning up in some company's soymilk and damaging the whole industry. Les Wilson at Iowa State Univ., who is on

the Soyfoods Association board, will be looking into this problem in the larger context of soymilk bacteriology.

Since 1988, Westbrae has continued to be a leader in soymilk innovation. They introduced the first "Lite" soymilk, were the first to structure the soymilk category to make it similar to dairy milk (full-fat, low fat, etc.), introduced the first fortified soymilk, the first small kid's size "Lunchbox" soymilk, the first coffee soy [Café Westbrae—Coffee-Flavored Soy Beverage], and (in Sept. 1997 at Baltimore, Maryland) VigorAid,—nutritional soymilk in the same category as Ensure.

After the Hain sale is finalized, Westbrae will take over management of two very interesting Hain soy products: Pizsoy (a natural pizza with soy cheese), and Ice Bean (a soy ice cream originally made by Farm Foods). Myron feels that these products have considerable unrealized potential.

Update: Talk with Hain Food Group—Westbrae. 1998. Feb. 18. Westbrae was, in fact, sold to Hain on 14 Oct. 1997. The new company name is that shown just above. Myron Cooper and other top executives will continue to work at their former location in Carson, California. Address: President, Westbrae Natural Foods, Inc., 1065 East Walnut St., Carson, California 90746. Phone: 310-886-8200.

3938. Madison, Deborah. 1997. Vegetarian cooking for everyone. New York, NY: Broadway Books. x + 742 p. Oct. Illust. Plus 24 full-page color plates. Index. 26 x 21 cm.

• **Summary:** One of the most comprehensive vegetarian cookbooks ever published; Contains 1,400 recipes. One chapter, titled "The Soy Pantry" (p. 593-609) has the following contents (with many recipes): Introduction (The soybean is the cow of the Orient). Soy milk. Tofu. Tempeh. A sidebar (p. 594) lists more recipes that include soyfoods, by chapter.

Soy-related recipes (not including those on p. 593-609) include: Soy oil (p. 43). Bechamel sauce (p. 53; dairy-free variation uses soy milk). Tofu "mayonnaise" (p. 60). Tofu garlic "mayonnaise" (p. 60). Sesame sauce with tofu (p. 67). Peanut-tofu sauce (p. 69). Spring rolls with napa cabbage and tofu (p. 107). Tofu salad spread (p. 129). Marinated tofu sandwich (p. 130). Tempeh on rye sandwich (p. 130). TLT—Tempeh, lettuce, and tomato sandwich (p. 130). Buckwheat noodle salad with grilled tofu and roasted peppers (p. 178). Green goddess dressing (p. 190; dairy-free variation with silken tofu). Miso soups (about, plus 5 recipes; p. 231-33). Mushrooms with paprika and sour cream—variation with tofu (p. 255). Thai tofu and winter squash stew (p. 257). Winter vegetable pot pie (p. 259; dairy-free variation can use soymilk). Mushrooms and tofu in Hoisin sauce (p. 269). Stir-fried broccoli, mushrooms, and peppers with caramelized tofu (p. 270). Dried mushroom, leek, and tofu stir-fry with Chinese barbecue sauce (p. 270). Goat cheese enchiladas with corn and red mole (p. 292; silken tofu can replace a portion of the goat cheese to give a less rich

version). Soybeans (about; p. 314). Somen in broth with silken tofu and spinach (p. 482-83). Soba in broth with spinach, purple dulse, and silken tofu (p. 483). Udon with stir-fry and five-spice tofu (p. 484). Smoothies (p. 594). Protein drink for breakfast (p. 617, with soy milk). Breakfast burritos with tofu (p. 625). Scrambled tofu (p. 627). Scrambled tofu with herbs and cheese (p. 627). Scrambled tofu with tomatoes and salsa (p. 627). Multigrain waffles (with soy flour, p. 633).

Also used in the recipes are: Quinoa. Sea vegetables. A color photo on the cover shows Deborah Madison.

The dust jacket (and *Jessica's Biscuit Cookbook Catalog*, spring 1998) says: "What Julia Child is to French cooking and Marcella Hazan is to Italian cooking, Deborah Madison is to contemporary vegetarian cooking. At the Greens restaurant in San Francisco [California], where she was the founding chef, and in her two acclaimed vegetarian cookbooks, Madison elevated vegetarian cooking to new heights of sophistication... Madison received the M.F.K. Fisher Mid-Career Award in 1994... She has been a board member of the Santa Fe Area Farmers' Market for the past six years in Santa Fe, where she lives with her husband, Patrick McFarlin."

Marion Cunningham, author of Beard Award winners *The Fannie Farmer Cookbook* and *The Fannie Farmer Baking Book*—"If I could have only one book on the subject of vegetables, *Vegetarian Cooking for Everyone* would be it."

Letter (fax) from Dana Jacobi. 1998. April 26. This cookbook just won the IACP/Julia Child award as the "cookbook of the year" for 1998—the highest honor given, out of 432 books nominated—and a tremendous honor for vegetarianism as well as for Deborah Madison. Note: IACP is the International Association of Culinary Professionals. This book also won the IACP/Julia Child award as the best general cookbook of the year (out of 54 cookbooks nominated, and beating out the new 1997 edition of *The Joy of Cooking*). Two major sets of cookbook awards are given each year: The IACP/Julia Child awards (given in April at a different location each year) and the James Beard awards (given in May in New York City). Each set offers awards in something like 10 different categories. There is surprisingly little overlap among the nominations for both in each category. Address: Santa Fe, New Mexico.

3939. *Soya Bluebook Plus*. 1997. Oilseed glossary: Definitions and terms commonly associated with oilseed products or processing. 1998. p. 354-60.

• **Summary:** Acidulated soapstock, activated, amino acids, antioxidant, biodiesel, biotechnology, bleaching, bleaching earth, bolls, Bowman-Birk trypsin inhibitor, bran, break material, cake, canola, canola meal, catalyst, coconut, coconut–desiccated, coconut milk, coconut meal, cold pressed soy oil, cold test, confection sunflower, cooking oil,

copra, copra meal, corn bran, corn feed meal, corn flour, corn germ meal (wet milled), corn gluten feed, corn gluten meal, corn grits, cotton linters, cotton plant by-product, cottonseed–glandless, cottonseed cake (or cottonseed flakes)–mechanical extracted, cottonseed meal–solvent extracted, cottonseed screenings, cotyledon, cracked corn, cracking, crude cottonseed oil, crude soy oil, defatted soy flour, degermed, dehulled–dehulling, degummed soy oil, degumming, deodorized, desolventizer-toaster, diglyceride, drying oil, edamame, edible crude soy oil, edible refined soy oil, emulsifier, endosperm, esterification, expanded–expanding, expeller, extracted–mechanical, extracted–solvent, extruded, extruder, extrusion, fat, fatty acid, feed (feedingstuff), feed grade, fermented–fermenting, flaking, flour, free fatty acid (F.F.A.), full-fat soy flour (enzyme active or heated/toasted), fully refined soy oil, genetic engineering, germ, ghee, gossypol, grain, green vegetable soybeans, grits, groundnut, gumming, high-fat flour, hilum, hulls, hydrogenated vegetable oil, hydrogenization [sic, hydrogenation], hydrolyzed corn protein, hydrolyzed soy protein, isolated soy protein, kibbled soybean meal, Kunitz trypsin inhibitor, lecithin, lecithinated soy flour, linseed meal, linters, lipoxxygenase, low gossypol cottonseed meal, low-fat soy flour, malto dextrins [maltodextrins], margarine, maturity groups, meat analogs [meat alternatives], meat extenders, melting point, methyl esters, miso, monoglyceride, natto, nutraceuticals, oil, okara, once refined soy oil, oxidation, palm kernel oil, palm olein, palm stearin, peanut hulls, peanut meal, peanut skins, pellets, polymerization, processing or extraction of oilseeds (also called "crushers" or oil mill operations–solvent extraction, continuous pressing, batch pressing), protein, pulses, raffinose, rancidity, rapeseed meal–mechanical extracted, refining, refractive index (R.I.), rolled or rolling, salad oil, shortening, soapstock, solvent extracted, solvent extracted soybean flakes, soy flour, soy grits, soy protein concentrate, soy protein isolate, soy sauce (incl. that hydrolyzed with hydrochloric acid), soy sprouts, soya, soya lecithin, soybean(s), soybean ground, soybean cake, soybean curd, soybean fatty acids, soybean feed–solvent extracted, soybean flakes and 44% protein soybean meal, soybean flakes and high protein or solvent extracted soybean meal, soybean hay sun-cured ground, soybean hulls (or seed coats), soybean meal, soybean meal–dehulled–solvent extracted, soybean meal–dehulled–mechanical extracted, soybean mill feed, soybean mill run, soybean processor, soybean protein product–chemically modified, soybean seeds–extruded ground, soybean seeds–heat processed, soybean solubles–condensed, soybean solubles–dried, soyfoods, soymilk, soynuts, spinning (to texturize soy protein isolate for food or industrial use), stachyose, steepwater, sterols, sunflower hulls, sunflower meal–dehulled–mechanical extraction, sunflower meal–dehulled–solvent extracted, sunflower meal–mechanical extracted,

sunflower meal–solvent extracted, sunflower seed–oil varieties, technical grade refined soy oil, tempeh, textured soy concentrate, textured soy flour, textured soy protein, toasting, tofu, transgenic, triglyceride, trypsin inhibitors, unsaponifiable matter, unsaturation, vanaspati–vegetable ghee, wet-milled, whole-pressed cottonseed–mechanical extracted, winterized oil, yuba. Address: 318 Main St., P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207-288-4969.

3940. Gonzalez-Watanabe, Yvonne; Watanabe, Joji. 1997. Introducing tofu to Hispanics. Visit to the House Foods America Corp. tofu factory in Garden Grove near Los Angeles (Interview). *SoyaScan Notes*. Nov. 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Yvonne and her husband Joji (who first contacted Soyfoods Center on 12 Sept. 1997) are interested in translating *The Book of Tofu* into Spanish and introducing tofu to the Hispanic community, starting in Los Angeles. Yvonne, age 24 was born in the USA, where her parents (who are both from Costa Rica) lived for 30-35 years; her father was a pharmacist. She learned to speak some Spanish at home. Her parents have returned to Costa Rica. Yvonne (who was raised a Catholic) now works in a real estate office and teaches vegan cooking classes at the Kanzeonji Non-Sectarian Buddhist Temple and Shiva Ashram Yoga Center at Mt. Washington in Los Angeles; there both she and Joji practice Zen meditation and yoga. Rev. Ryugen Watanabe, Joji's uncle, is a Soto Zen master, yoga teacher, and the head of this temple. Both Yvonne and Joji are vegetarians, and she is a vegan. Her sister is an editor for *El International*, a big Spanish language magazine located in Miami, Florida.

Yvonne got interested in vegetarianism and soyfoods through Rev. Watanabe. She had had severe migraine chronic headaches for many years. After trying every possible remedy to no avail, she told her uncle, Rev. Watanabe, about her problem. He said simply but forcefully, "It's your diet." She thought: "He's crazy. I have a great diet." In 1994, although she had been eating meat for 30 years, she tried the vegetarian diet he recommended and got quick relief. Following his advice, she began by giving up red meat and pork, then phased out chicken and fish until after 8-9 months she was consuming a vegan diet. As Yvonne began educating herself about vegetarian nutrition, she was looking for alternatives to meats as a source of protein. Rev. Watanabe told her about tofu, and even taught her how to make it at home from whole soybeans. Now Yvonne teaches other people how to make tofu at home.

Yvonne has great admiration for Rev. Watanabe. "He's really great. He's been teaching Zen and Yoga for more than 20 years and he still charges the same, low prices—\$2.00 for a Yoga class. If you can pay, you pay. If you can't, how about rolling some incense. It's wonderful. I've never seen someone so committed to people."

Yvonne has been a vegan ever since and has not had a headache in almost five years. A friend of Yvonne's had migraine headaches that were so bad, she had to give herself shots. Yvonne suggested that she try switching to a vegetarian diet. She hasn't had a headache in a year. Over the years many of Yvonne's female relatives (her mother, sister, cousin, etc.) have become vegan—largely because they want to lose weight.

Joji, age 36, was born in Tokyo but has lived in the USA since age 6. He speaks Japanese and English and is a financial consultant. Joji graduated from USC, and now works in a corporate environment in real estate financing. His grandmother, Masa Miyai, lives with them. Four years ago they shut down their business selling medical supplies to Latin America. Now they are developing a project to introduce tofu to Hispanics.

On Oct. 18-19 Yvonne and Joji visited Soyfoods Center, where they talked with Bill Shurtleff about their project and book publishing. They photocopied many Spanish-language documents and recipes related to tofu. Upon returning to Los Angeles, they developed a one-page Spanish language brochure on tofu, visited with Margaret Endo in order to arrange for a booth in next summer's Tofu Festival, and began to do research.

Their first research project was a visit to the House Foods America Corp. tofu plant in Garden Grove, Southern California. After a brief meeting with employee Miyuki Nagano, she took them on a walking tour of the plant, so they were able to observe the entire tofu-making process. It is completely automated, except when a worker smooths the curds in the pressing trays before they are pressed. The company employs about 120 people at this facility. Of the 78 workers in the factory (including shipping and receiving), 98% are Hispanic men, but the office workers are all Japanese. The company has its own delivery trucks; its marketing is focused on California, in part because of increased competition from companies outside the state—as in Massachusetts [Nasoya Foods]. The company invites the Hispanic workers to take home tofu, but they don't—probably because they don't know what to do with it. The company has a full test kitchen and laboratory, and Miyuki is interested in developing tofu recipes that Hispanics will like. The company also makes natto at this plant.

Update: Talk with Yvonne. 1997. Nov. 23. Her cousin, Alejandra Jimenez, from Costa Rica has just arrived in Los Angeles to work with her on the tofu project. Alejandra's native language is Spanish but she also speaks perfect English and has a master's degree in English. Another cousin from Costa Rica is part of an all-male rock band, whose members are ages 30-37; all were born and raised in Costa Rica. She served them 3 tofu recipes—which they liked very much: (1) Tofu cubed in miso soup; (2) Chilled tofu, cubed with sesame oil, rice vinegar, and soy sauce; and (3) Crisp freshly deep-fried tofu cubes, with soy sauce.

They are interested in using tofu as part of a weight-loss program.

They all went to a Chinese vegetarian restaurant in nearby San Gabriel named Vegetarian Delights. Run by a Chinese-American lady, it served a delicious dish named Roasted Black Bean Fish, that tasted remarkably like fish—but used tofu instead of fish. Yvonne made friends with the owner. Address: 6029 LaPrada St., Los Angeles, California 90042. Phone: 213-254-1712.

3941. Mutual Trading Co., Inc. 1997. *Kyôdô Bôeki K.K. 70 nenshi: Nihon no aji o sekai no hitobito ni* [Mutual Trading Company, Inc.: A 70 years' historical]. Los Angeles, California. 108 p. Nov. 20. 28 cm. [Eng; Jap]

• **Summary:** This excellent history of Mutual Trading Co. (MTC) is divided into two parts, each written in both Japanese and English. Part I is the general company history (p. 1-32). Part II, titled "Chronological history of Mutual Trading Co., Inc.: 1926-1996" and containing numerous photos (p. 33-107), gives a chronology of the company in the context of major world events. Located in Los Angeles, Mutual was a pioneer in bringing Japanese foods to America.

1926 April 19—Mutual Trading Co., Inc. is established when ten Japanese retailers in Los Angeles pool their resources. Sadagoro Hoshizaki is the first president. 1934—MTC's annual sales top \$500,000 for the first time.

1942—Under executive order 9066, Japanese-American residents of Little Tokyo are forcibly evacuated and sent to one of ten internment camps. Mutual Trading Co. is forced to stop business. Mr. Hoshizaki spends the duration of World War II in the Manzanar Camp in central California. Fortunately, all of MTC's merchandise was safely stowed at the Maryknoll Church, a Catholic church in Little Tokyo. 1948—With a \$1,000,000 letter of credit in his pocket, Hoshizaki headed to Japan as a trade Envoy to re-establish economic ties. He and Mr. Ishii formed Tokyo Mutual Trading Co.; for the first time MTC had offices on both sides of the Pacific.

1951—Mr. Noritoshi Kanai invested in MTC and joined the management team in Japan. 1956—Mr. Kanai traveled to the USA for the first time to study the demand for Japanese foods.

1964—Mr. Kanai, with his wife and children, relocates to Los Angeles to assume management of MTC from the ailing Mr. Ishii. 1968—MTC moves to a much larger warehouse at 431 Crocker St. in Los Angeles

1970—MTC's annual sales top \$2 million. 1971—Predicting future strengthening of the yen vs. the U.S. dollar, and projecting increased needs for production of Japanese foods in the USA, Mutual pursues plans to make miso and sake in California. 1975—Annual sales reach \$10 million. 1976 Jan.—In a joint venture with Yamajirushi Jôzo (of Maruko Machi, Nagano prefecture, Japan), Miyako

Oriental Foods (Yamajirushi Shinshu Miso of Los Angeles) is established under the management of Teruo Shimizu. 1976—Noritoshi Kanai becomes the fourth president of Mutual Trading Co. Richard Inaba is the chairman. 1977—The popularity of Japanese foods in Southern California continues to rise; there are now 228 restaurants, 39 of which are sushi bars. 1978—Mutual's "Miyako" brands products debut at Ralphs, a 120-store supermarket chain in Southern California.

1982—Miyako Oriental Foods opens a new, 1,000 metric ton capacity miso plant in Baldwin Park, California. In Berkeley, Takara USA begins producing Shochikubai Sake, with Mutual as a partial investor. 1985—Mr. Kanai is chosen President, Japanese Chamber of Commerce of Southern California. 1986—Mr. Kanai is chosen President, Pan American Nikkei Association of USA (PANA). 1988—Mutual acquires management and shareholder control of The Cherry Company in Hawaii from Kirin Beer. And Kirin becomes a shareholder of MTC.

1990—Representing the Japanese-American community, Mr. Kanai is invited to the formal coronation ceremonies for His Majesty Emperor Heisei of Japan. 1994—The government of Japan commends Mr. Kanai for his lifetime services in contributions bridging the Japanese and American cultures, bestowing on him The Order of the Rising Sun, Gold and Silver Rays. 1996 May—Mutual celebrates its 70th anniversary at the MGM Grand Hotel in Las Vegas.

Company profile as of Dec. 1996 (p. 61). Annual sales: \$82.6 million. No. of employees: 199. Products in catalog: 13,000 (of which 5,000 are food, 8,000 are non-food). MTC Group Affiliates: Tokyo Mutual Trading Co., Tokyo and Kobe, Japan. New York Mutual Trading Inc., Moonachie, New Jersey. The Cherry Co., Ltd. Honolulu, Hawaii. Miyako Oriental Foods, Baldwin Park, Calif. Takara Sake USA Inc., Berkeley, Calif. Urashima USA, Inc., Walnut, California. Address: 431 Crocker St., Los Angeles, California 90013. Phone: 213-626-9458.

3942. Ontario Soybean Growers' Marketing Board (OSGMB). ed. and comp. 1997. *Canadian soyfoods directory*. Chatham, Ontario, Canada: OSGMB. 27 p. 28 cm.

• **Summary:** This excellent, complete, and accurate directory was compiled by the Collège d'Alfred of the University of Guelph, under contract with the Ontario Soybean Growers' Marketing Board (OSGMB). The project leaders were Suzanne Lavoie, Charles Goubau, and Ian Walker. The first Canadian soyfoods directory was published in April 1994 (22 pages).

Contents: Foreword—Ontario Soybean Growers' Marketing Board (OSGMB). Acknowledgements from researchers. Table of contents. Soyfood product descriptions: Green vegetable soybeans—Edamamé, meat analogs, miso, natto, okara, soy cheese, soy flour, soy

frozen desserts, soy grits, soy isolate fibre, soy lecithin, soy oil, soy protein concentrate, soy protein isolate, soy pudding, soy sauce, soy sprouts, soy yogurt, soymilk (soy drink and soy beverage), soynuts, tempeh, textured soy flour-TSF, texturized soy protein, tofu, whole dry soybeans, yuba. Soyfoods for your health: Heart disease, cancer, osteoporosis, other conditions. Composition and nutrient value of soyfoods. Soyfood companies by product.

Soyfoods companies by province: Alberta (7), British Columbia (21), Manitoba (2), Nova Scotia (2), Ontario (54), Quebec (20). Soyfood companies (105 companies that make or market wholesale soyfoods)—complete listings (address, phone and fax numbers, contact person, products).

Soyfoods distributors—complete listings (13). Soybean distributors—complete listings (28). Research information sources—complete listings (24). Soyfoods information sources (23). Canadian soyfoods directory questionnaire.

Spot in *Ontario Soybean Growers' Marketing Board Newsletter*. 1997. Dec. p. 5. The Canadian Soyfoods Directory was launched in November after a two-month delay. "The project was undertaken following numerous information requests from consumers, processors and health professionals." Funded by the Board of OSGMB, it has been mailed to all Registered Dietitians across Canada, and it will soon be available on the Board's website. Address: OSGMB, 180 Riverview Dr., P.O. Box 1199, Chatham, ON N7M 5L8, Canada. Phone: 519-352-7730.

3943. Kamego, Marco. 1997. Re: History and present status of Kikko Corporation S.A., manufacturer of soy sauce and miso in Peru. Letter to William Shurtleff at Soyfoods Center, Dec. 29. 3 p. [Eng]

• **Summary:** Mr. Kamego filled out a 3-page company history form sent by Soyfoods Center. This company was founded in April 1957 in Peru by Mr. Manuel Toshihiko Kamego (Marco's father) and Mr. Alejandro Kioyasu Kamego (Manuel's brother). In 1957 the company, named *Fabrica de Siyau Kikko Sociedad de Responsabilidad Limitada*, was located at Av. Colombia 171, Pueblo Libre, Lima, Peru. Phone: 32-3754. The company's first two products, Kikko Siyau ("soy" sauce—but made with Peruvian common beans, *Phaseolus vulgaris*, instead of soybeans because the latter were not available) and Miso Kikko (both *shiro miso* {sweet white miso made with rice} and *aka miso* {red miso made with barley}) were both introduced in 1957. These products may have been the world's first shoyu and miso made with common beans instead of soybeans. In 1960 the company first began to use soybeans in its products; they were grown in Tumbes, on the northern coast of Peru.

From the beginning, the company was dedicated to the traditional, nearly hand-made production of sauces and foods to supply the restaurants and homes of Peruvians of Asian origin through the home delivery system. Marco

writes: "We are the pioneers of soy sauce manufacturing in Peru. It is through our product that the Peruvian native people have come to know soy sauce, its use and quality. Our company has succeeded because of tenaciousness, as well as adaptation to the requirements of the Peruvian market." The Kamego family originated in Japan. The two Chinese characters (*kanji*) with which the family name are written, can also be pronounced "Kikko" and mean "turtle's shell." This explains the origin of the Kikko brand and emblem/logo. Note: The name and logo is very similar to that of Kikkoman, the world's leading manufacturer of soy sauce.

In 1964 the company introduced its third soy product, *Mensi Kikko* (in Chinese *mien shih* = sweet wheat-flour soy nuggets), obtained from fermentation of whole soybeans; it is known as *mianchi* (*mien shih*) in China and *doenjang* in Korea. In 1979 Ajinomoto, the world's leading manufacturer of seasonings and of MSG, began to produce soy sauce in Peru in competition with *Fabrica de Siyau Kikko*, but as of 1997 Kikko is still the leader in the Peruvian market, ahead of Ajinomoto.

In July 1994 the company moved its factory and offices to a new location, which is the present address: Jr. Alexander Fleming 432, Ate, Lima 03, Peru.

In 1995 the company was reorganized as Kikko Corporation *Sociedad Anonima* (S.A.). This new company was formed from the merger of the original company with *Sazonadores S.R.L.* Note: *Sazonadores* means "seasonings" in Spanish. At this time the company launched three new products: Kikko Shoyu: *Salsa de Soya*, *Salsa Mensi* (*mensi* / *mien shih* seasoned with spices), and *Ajoikion* (soy sauce seasoned with ginger and garlic; in Peruvian, *kión* means ginger—the Spanish word is *jengibre*; in Spanish, *ajo* means garlic).

Present status: The company now makes each week: 25,000 liters of soy sauce, 2,000 liters of *Salsa Mensi*, and 2,000 liters of *Ajoikion*. Their second best-selling product is sweet and sour sauce, but it contains no soy. They still make *shiro miso* (sweet white miso) fermented for 5 months, but have discontinued red miso. The company employs 51 people, including 5 in management, 36 production workers, and 10 office and others. The current owners are Manuel Kamego, Marco Kamego, and Alejandro Kamego's heirs. Net sales last year were \$1,500,000. The net worth of the business is about \$115,000. The company's sales have grown, on average, at about 2% each year over the past 2-3 years. The building is 2,000 square meters in size: 1,800 for production and 200 for office space. As of late 1997 the factory is located at Robert Fulton 115, Lima 3, Peru. Most of the soybeans now used by the company come from Bolivia

Marco encloses attractive full-color labels for four products: Kikko Shoyu, *Salsa Mensi*, *Ajoikion*, and Kikko

Siyau. Address: Jr. Alexander Fleming 432, Ate, Lima 03, Peru. Phone: +511 326-0870 or 1200.

3944. Honda, Kyoko. 1997. *Tofu & soybean cooking: The Japanese healthy way*. Translated by Kazuhiko Nagai. Tokyo: Graph-sha Ltd. 64 p. Dec. Illust. 26 cm. [Eng]
• Summary: This full-color Japanese-style cookbook is loaded with color photos showing both steps in the process of preparing recipes and the finished dishes. Contents: Basic preparations: Parboiling soybeans, draining tofu, reconstituting Kôri-dofu, removing oil from abura-age, toasting okara. 1. Soybean cooking. 2. Tofu & natto dishes. 3. Other dishes from soybeans. Articles (summary of four articles), Chinese cheese "Furu." Address: Sc.D. (Doctor of Science), nutritionist, and lecturer at Women's Junior College of Nippon College of Physical Education.

3945. Funaki, J.; Yano, M.; Misaka, T.; Abe, K.; Aria, S. 1997. Purification and characterization of a neutral protease that contributes to the unique flavor and texture of tofumiso-zuke. *J. of Food Biochemistry* 21:191-202. * Address: Japan.

3946. **Product Name:** [Gold Label Sweet Wheat-Flour Soy Nuggets].

Foreign Name: Jinpai Mianchi.

Manufacturer's Name: Mei Wei Hsien Shihp'in.

Manufacturer's Address: National Chungshan City (Zhongshan), Southern Kwangtung (Guangdong) province.

Date of Introduction: 1997.

Ingredients: Yellow soybeans, wheat flour, salt, and sodium benzoate (as a preservative).

Wt/Vol., Packaging, Price: 500 gm.

How Stored: Shelf stable, 6 month shelf life.

New Product–Documentation: Label sent by Marco Kamego of Kikko Corporation S.A., Peru. 1998. March 8. Label is 3 inches in diameter. Red, yellow, black, and gold on white. Registered number: ZBX66019-87. Permit statement. Shelf life: 6 months. Date of production: Not filled in. Note: The word "Mianchi" does not appear in the SoyaScan database.

Talk with H.T. Huang, PhD, expert on the history of Chinese food and agriculture, about letter from William Shurtleff asking many questions about this product. This soy-based seasoning is very well known and popular in southern China, especially in the cooking of Canton (Kwangtung / Guangdong) province, but also in Fukien / Fujian province. Its equivalent in northern China is *Tou-pan Chiang*. Its characteristics are in between those of soy nuggets (*shih*) and Chinese-style soybean miso (*tou-jiang*). It is much more chunky than soybean miso, and a little sweeter than soy nuggets because of the wheat flour—though still salty. The color is brown. *Jinpai* means "gold label" or "gold brand." In Mandarin *Mianchi* is called *Mianshih*,

where *mien* (written here in simplified characters) means "wheat flour" and *shih* means "soy nuggets." Soy nuggets can be looked on as an intermediate in the making of *jiang*. Sometimes the soy nuggets are made by coating cooked soybeans with wheat flour. If you use a lot of flour, you will end up with *chiang*, but if you use only a small amount, the nuggets will keep their shape. This product is made using a two-step fermentation: (1) Cook soybeans, dehull, coat with a little wheat flour, inoculate, and allow to ferment to make soy nuggets. This first fermentation takes about 10 days in summer, or 15 days in winter. (2) Mix the soy nuggets (soybean koji) with salt and water (not too much water), place in an earthenware vat, and allow to ferment for about 4 weeks until it forms a paste that is thicker than *chiang*. This seasoning is made in Chungshan (pinyin: Zhongshan), located between Canton and Macao; the characters mean "inside/middle + mountain." Dr. Sun Yatsen, the famous Chinese statesman (1866-1925) comes from Chungshan; his name was originally Sun Chungshan.

3947. Cerquetti, Giorgio. 1997. *The vegetarian revolution*. Badger, California: Torchlight Publishing, Inc. xiv + 243 p. No index. 23 cm.

• Summary: This book is divided into two parts: Commentary (which includes many quotations about vegetarianism) and cookbook. Contents: Part A—The vegetarian revolution. 1. Join the revolution. 2. The future is vegetarian. 3. Animals deserve to be alive. 4. More evidence. 5. Proteins and vitamins. 6. Vegetarians live longer: Longevity, prana, fasting. 7. Vegetarianism and world religions: Vegetarian Jews, vegetarianism and early Christianity, Jesus was vegetarian, the new Catholic catechism, the oldest teachings, the law of karma, Buddha was vegetarian, was Mohammed vegetarian, Sikhs, Jains, speciesism: The last barrier, thought-provoking facts about vegetarianism. 8. Open letter to McDonalds.

Part B—Recipes (108 recipes). 9. Recipes of famous people. 10. Recipes of vegetarian groups. 11. Recipes of vegetarian restaurants. 12. Recipes from vegetarian cookbooks.

Part C—Resources. Vegetarian international. Alphabetical listing of recipe sources. About the author.

Giorgio Cerquetti, PhD, author and yoga practitioner, was born in Italy in 1946 and has been a vegetarian since age 16. In 1991 started to spend more time in the USA and, with Alister Taylor, he founded Vegetarians International. Address: Italy and the USA.

3948. Emmons, Didi. 1997. *Vegetarian planet: 350 big-flavor recipes for out-of-this-world food every day*. Boston, Massachusetts: The Harvard Common Press. xii + 564 p. Illust. by Melissa Sweet. Index. 24 cm.

• Summary: This hefty vegetarian cookbook contains 350 new and exciting innovations on recipes from around the

world. Didi is described as “a bold new talent!” and her book is a Beard Award nominee. Soy-related recipes include: Miso soup (p. 113-14). Thai tofu with red curry sauce over coconut-scallion rice (p. 213-15). Frozen soybeans [green vegetable] (p. 263). Many Chinese markets sell these in their freezer sections. “Packaged in Taiwan, they look a lot like lima beans, but they are delicate in flavor and especially high in protein. I keep them in my freezer and add them by the handful to various dishes, just as I would add peas or snow peas.” The names and pages of recipes to which they can be added are given.

Mu shu tofu (p. 360-63). Cooking with tofu (p. 361, including description of varieties and serving suggestions). Cooking with legumes (incl. azuki beans and soybeans, p. 368-69). Tofu and pumpkin seed burgers. Also contains many recipes using sea vegetables. Address: Chef at Pho République (a French-Vietnamese Bistro), Cambridge, Massachusetts.

3949. Grogan, Bryanna Clark. 1997. Twenty minutes to dinner: Quick, low-fat, low-calorie vegetarian meals. Summertown, Tennessee: The Book Publishing Co. 192 p. Index. 21 cm.

• **Summary:** This vegan cookbook contains a wealth of soy-related recipes. Also includes soy-free options for recipes with tofu and soymilk. Address: Denman Island, east of Vancouver, British Columbia, Canada.

3950. Jordan, Michele Anna. 1997. California home cooking: American cooking in the California style. Boston, Massachusetts: Harvard Common Press. xxv + 501 p. See p. 353-54. Illust. Index. 24 cm. [120+* ref]

• **Summary:** The recipe for Korean-style grilled steaks (p. 353-54) is an adaptation of *bulgogi*, the well-known Korean barbecue dish that features thin strips of beef. Both San Francisco and Los Angeles have large communities of Korean immigrants, with many Korean restaurants and markets. “Note: To make *samjan* sauce, mix 2 parts *dhwen-jang* [*doen-jang*], or Korean bean paste, with 1 part *gochujang*, or Korean barbecue sauce.” Both are available in Asian food stores. Miso may be substituted for *dhwen-jang* and *sambal ulek* for *gochujang*.

Note: This is the earliest English-language document seen (March 2009) that uses the word “*gochujang*” to refer to Korean-style red pepper and soybean paste (miso).

Teriyaki recipes appear on pages 318 and 327.

Contains a good bibliography, and many sidebars, on the history of California cooking. Address: California.

3951. Katzen, Mollie. 1997. Vegetable heaven. New York, NY: Hyperion. xv + 223 p. Illust. (Color by Mollie Katzen). Index. 27 cm.

• **Summary:** A handsome vegetarian cookbook. Soy-related recipes include: Vietnamese salad rolls (with firm tofu, p.

11). Kung pao lettuce cups (with firm tofu, Northern Chinese, p. 13). Eggflower soup with pasta shells (with firm tofu, p. 32). Potato soup with rosemary and roasted garlic (with silken tofu, p. 33). Coconut-lemon grass soup (with firm tofu, p. 43). Baked coated nuts sweet or savory (with soy sauce, p. 57). Basic soyburgers (with cooked soybeans and tofu, p. 76). Green beans and tofu in crunchy Thai peanut sauce (with firm tofu, p. 103). Magic carrot flans (with milk or soymilk, p. 122). Scalloped potatoes three variations (with milk or soymilk, p. 130). Sandwiches to write home about (with firm tofu, p. 136). Buckwheat soba with squash, smoked tofu, and basil (with smoked tofu and miso, p. 144). Tiny pasta stew (with firm tofu, p. 151). Horseradish aioli (with silken tofu, p. 168). Peanut-chile [chili] dressing (with soy sauce, p. 174). Homemade butterscotch pudding (with milk or soymilk, p. 194). Pumpkin mousse with gingersnap crumbs (with silken tofu, p. 196). Bittersweet chocolate-banana mouse (with silken tofu, p. 197).

A color photo on the rear cover shows Molly Katzen. Address: California.

3952. Keussink, Ruth. 1997. Soja und Sojaprodukte [Soybeans and soy products]. Bonn, Germany: Auswertungs- und Informationsdienst fuer Ernährung, Landwirtschaft und Forsten (aid) e.V. 28 p. Illust. (Color photos). 21 cm. [14 ref. Ger]

• **Summary:** Contents: Introduction. Market and utilization. Soya in the diet: Protein, fat, carbohydrates, minerals and trace minerals, vitamins. Overview—Soy products: Whole soybeans, soy sprouts, soy oil, soy beverage, tofu, natto, sufu, tempeh, soy sauces, miso, soy lecithin, soy sausages, TVP. Processing soybeans. Soy ingredients and additives: Soy protein isolate, concentrate, soy bulk / fiber (*sojaballastoffe*), fatty acids, lecithin, vitamin E (tocopherol). Product safety. Genetically engineered soybeans. Tips for buying and storing. Recipes. Address: Konstantinstr. 124, 53179, Bonn, Germany.

3953. Messina, Virginia Kisch; Messina, Mark. 1997. Soy to the world. In: 1997 Medical and Health Annual. Published by Encyclopedia Britannica, Inc. See p. 197-202.

• **Summary:** In the section titled “Diet and Nutrition” is a long subsection on “Soy to the world.” Contents: Introduction. Sacred crop (history). Varied and versatile: Whole soybeans (incl. green vegetable soybeans), traditional soyfoods (soymilk, tofu, okara, yuba, tempeh, miso, soy sauce or shoyu), modern soy products (textured soy flour or TVP), “second-generation” soyfoods. One of nature’s most nutritious foods. Health benefits: the evidence so far: Cancer, heart disease, osteoporosis, kidney disease, menopause. Tofu on your table (how to incorporate soy into American diets; incl. TVP, soymilk, soy flour, soy nuts). Address: 1. M.P.H., R.D.; 2. Ph.D. Both: PhD, 1543 Lincoln

St., Port Townsend, Washington 98368. Phone: 360-379-9544.

3954. Nabben, Alexander. 1997. *Kochen und Backen mit Tofu: Vegetarische Rezepte ohne tierisches Eiweiss* [Cooking and baking with tofu: Vegetarian recipes without animal protein]. Darmstadt, Germany: Pala-Verlag. 139 p. Illust. Recipe index. 21 cm. [Ger]

• **Summary:** Contents: Tofu—versatile and healthful. The soybean: Cultural history, production, the world and the soybean, nutritional value of soybeans, soyfood products (soy sauce, miso, tempeh, okara, soy coffee, soynuts, soy sprouts, modern western soy protein products—soybean flour, flakes, textured soy flour, soy protein isolates, defatted soybean meal, industrial soy products), genetically engineered soybeans. Tofu. Tips, tricks, and useful information. How to make soymilk at home. How to make tofu at home. Tofu recipes and marinades. Raw foods and salads. Dressings. Sauces. Soups. Main dishes. Soufflés. Pasta. Patties / burgers. Spreads. Party snacks. Cooking and baking. Desserts and sweet delicacies (*süsse Leckereien*). Ice cream. Address: Weigandufer 38, 12059 Berlin, Germany. Phone: 30 / 6808 0686.

3955. Nutrition Education Service, Sanitarium Health Food Company. 1997. *Sensational soy cookbook*. Sydney, London, Vancouver, New York: Murdock Books. 64 p. Illust. Index. 20 cm. [32 ref]

• **Summary:** A saddle-stitched vegetarian cookbook on glossy paper loaded with color photos and lightweight text. The author and nutritionist is Cathy McDonald of Sanitarium. Recipes developed by Wendy van der Veer of Sanitarium. Contents: The story of soy. The soy family: Miso, soy beans, soy breads & cereals, soy cheese, soy drink, soy flour, soy grits & soy flakes, soy 'meats,' soy pasta, soy sauce, soy snacks, tempeh, TVP, tofu, tofu desserts (ice cream and yoghurt). Breakfasts. Soy for health (isoflavones, menopause, breast cancer, osteoporosis, prostate cancer, heart disease). Light meals. The secrets of soy. Main meals. Soy in perspective. Desserts. Sensational soy (sample menus). Snacks. Know your nutrients. Bibliography. Estimated isoflavones in soy foods (table). Address: 1 Sanitarium Drive, Berkeley Vale, NSW 2261, Australia.

3956. Oishii miso ga tabetai: herushii na miso de tsukuru shiki no ryôrishû [I want to eat delicious miso: Healthy seasonal miso cookbook]. 1997. Tokyo: Zesuto. 95 p. 26 cm. [Jap]*
Address: Japan.

3957. Rombauer, Irma S.; Becker, Marion Rombauer; Becker, Ethan. 1997. *The joy of cooking*. New York, NY:

Simon & Schuster / Scribner. xiv + 1136 p. Illust. Index. 24 cm.

• **Summary:** Soy-related subjects include (* = recipe): Soy sauce butter* (p. 77). Asian black bean sauce* (with “3 tablespoons preserved black beans” [soy nuggets], p. 83). Japanese wasabi soy sauce* (p. 83-84). Ginger soy sauce* (p. 84). Soy and sherry marinade* (p. 85). Description of miso soups and their role in the Japanese diet (p. 107-08). Light-colored miso soup with simmered vegetables and dark-colored miso soup with sautéed vegetables and Mongolian Hot Pot—a miso soup based dish* (p. 108). Ginger soy vinaigrette* (p. 238).

One long chapter is titled “Beans and Tofu” (p. 270-294). Lentils with spinach and soy sauce* (p. 280). The section titled “soybeans” (p. 287) discusses their nutritional value, health benefits (“They contain substances thought to help prevent breast and other cancers, as well as Omega-3 fatty acids, which reduce the risks of heart disease”), how to cook yellow and black soybeans, how to dry-roast [to make soynuts], many ways of processing, soy milk, okara, fermented black beans, soy sauce, tamari, miso, soy cream cheese, soy sour cream, and soy cheese. There are also substantial subsections describing the following soyfoods: (1) Soy milk, including a recipe for making it at home (p. 287-88). (2) Tofu, including silken tofu, cottage tofu, frozen tofu, sauteed or fried tofu, and smoked tofu (p. 288-89). Recipes containing tofu include: Szechuan spiced tofu, Southeast Asian curried vegetable stew, Smoked tofu burgers, and Brown rice tofu salad with orange sesame dressing (p. 289-90; the latter recipe calls for toasted sesame oil and adzuki beans, with smoked tofu being optional). (3) Tempeh, including recipes for Moo shu tempeh and Szechuan-style “hacked” tempeh. (4) About soy protein, describing textured vegetable protein and textured soy concentrate, with recipes for Dinner loaf Tex-Mex style and Lion’s head (p. 292). This is followed by a subsection describing seitan and with recipes for Root vegetable and seitan stew, and Seitan kibbe (p. 293-94).

Asparagus with mustard miso* (p. 343-44). Baby bok choy with soy ginger sauce* (p. 349). Steamed scallops or shrimp with soy sauce* (p. 513). Grilled or broiled whole red snapper with ginger soy vinaigrette* (p. 548-49). Small fish, fillets, or steaks poached in soy sauce* (p. 555-56). Chinese soy-braised chicken* (p. 601-02). The chapter titled “Know your ingredients” (1059-87) includes short descriptions of bean sauce, Hoisin sauce, miso, nori, salted and fermented black beans, sesame oil, sesame paste, soy sauce, tamari, tonkatsu sosu (dark spicy sauce based on soy), wakame, wasabi, vinegars from fruit and grains, margarines (mentions trans fatty acids, but not soy), and shortenings (p. 1065-69).

Subjects related to vegetarianism include: Discussion of vegetarian diets (positive and accurate, in Chapter 1, p. 3). List of vegetarian side-dishes and main courses in this

edition (27 recipes, p. 20). Vegetarian chili* (p. 283). Dairy-free chocolate cake* (vegan, p. 932). Ultra-orange cake* (vegan, p. 932-33).

Irma Rombauer (the grandmother of Ethan Becker) first wrote the *Joy of Cooking* in 1931, "when domestic help was fast becoming a thing of the past and women all over the country were once again heading to the kitchen."

Note: This cookbook was written by a committee of experts, put together by Maria Guarnaschelli. Many controversies and clashes of opinion arose out of this arrangement. Address: 3. Cockaign, Cincinnati, Ohio.

3958. Solomon, Charmaine. 1997. Orient express book. Melbourne, Australia: Hamlyn. 92 p. *

3959. Sullivan, Cheryl; Rhodes, Kathy. 1997. Soyfoods: A healthy profile. Revised ed. Sioux Falls, South Dakota: South Dakota Soybean Board. 118 p. Illust. Index. 22 cm.
 • **Summary:** Contents: Introducing soyfoods to your diet. The healthful soybean. Exploring soyfoods: Dried soybeans, fresh green soybeans, soy milk, tofu, textured soy protein, soy flour, soy grits, tempeh, miso, soy meat analogs. Where to find soy products. Nutrient information. Recipes: Breakfast, beverages, breads, appetizers & snacks, salads, soups, sandwiches, side dishes, main dishes, desserts. Guide to modifying recipes: A one-for-one substitution.

Talk with Betty Hansen at South Dakota Soybean Board. 2000. May 15. This cookbook (which is undated) was first published in 1996, and revised in 1997. It was reprinted by the Nebraska Soybean Board with their name and phone number on the rear cover.

Talk with Cheryl Sullivan. 2002. Aug. 12. This booklet is basically *Simply soy: A variety of choices*, with a new cover and title, plus a few pages of additional information added by the South Dakota Soybean Board in Sioux Falls. Address: 1. M.A., R.D.; Ph.D., R.D.

3960. Early soyfoods in China—Chronological (SoyaScan database search report). 1998. 12 p. incl. index. Jan. 23. Unpublished manuscript. [20 ref]

• **Summary:** This carefully customized database search was conducted for Mark Messina to document the fact that soyfoods have been widely consumed for a long time in China. Among the 20 records are the earliest Chinese-language and English-language documents that mention or discuss soyfoods in China, with emphasis on soy sauce (15 records), tofu (12 records), and Chinese-style miso (chiang, 6 records). Also includes the earliest English-language records that give significant industry or market statistics on soy sauce or tofu in China.

3961. Early soyfoods in Japan—Chronological (SoyaScan database search report). 1998. 36 p. incl. index. Jan. 23.

Unpublished manuscript. [20 ref]

• **Summary:** This carefully customized database search was conducted for Mark Messina to document the fact that soyfoods have been widely consumed for a long time in Japan. Among the 47 records are the earliest Japanese-language and English-language documents that mention or discuss soyfoods in Japan, with emphasis on tofu (27 records), soy sauce (26 records), miso (20 records), and soymilk (8 records). Also includes the earliest English-language records that give significant industry or market statistics on tofu, miso, or soy sauce in Japan.

3962. **Product Name:** Sweet White Miso, or Sweet Black Miso.

Manufacturer's Name: Fermentations. A Div. of Germinations.

Manufacturer's Address: 1173 Hearst St., Berkeley, CA 94702. Phone: 510-540-5185.

Date of Introduction: 1998. January.

Ingredients: Organic (black) soybeans, organic rice, sea salt, koji culture. Organically grown in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 8 oz round plastic deli tub. Sweet White retails for \$3.00 and Sweet Black retails for \$4.00 (Berkeley, California).

How Stored: Refrigerated.

New Product—Documentation: Alexandra Hozven calls twice. 1995. Sept. We talk for 20 minutes. She and her husband are saving up \$10,000 to travel to Japan, learn Japanese at the *Nihongo Gakko*, and study miso-making with a Japanese master. Address: 1448 Los Vecinos, Walnut Creek, California 94598.

Talk with Alexandra Hozven, who called. 1998. March 25. She is now living in Berkeley with her husband and 18-month old son. Makes 2 types of miso (which she first started selling in Jan. 1998) and sells them twice a week at Berkeley farmers' markets. The Saturday market is at Center and Martin Luther King St. The Tuesday market is at Derby and Martin Luther King St. The sweet black miso is made with black soybeans. She also makes sprouts, raw sauerkraut, and kimchi. She would like to start making a finger lickin' miso and natto miso. She and her husband were unable to go to Japan to study miso because she got pregnant.

Alex visits Soyfoods Center with samples, Labels, and prepared dishes. 1998. April 12. Alex got interested in miso via macrobiotics. She makes the koji and miso in at home with her family. Label: 3 inch diameter. Self adhesive. White on pea green. Soyfoods Center taste test: Texture: Chunky. Flavor: Good.

3963. Golbitz, Peter. 1998. Tofu & soyfoods cookery: Delicious foods for a healthy life. Summertown, Tennessee:

Book Publishing Co. 176 p. Illust. (3 photos). Recipe index. General index. 21 cm.

• **Summary:** Contents: Preface and acknowledgments. The history of soyfoods. A closer look at soybeans. Soybeans and health: Introduction, malnutrition, cardiovascular disease, cancer, osteoporosis, menopause, more to come. Using soyfoods: Whole dry soybeans, tofu, soymilk, soy flour, textured soy protein, green vegetable soybeans, tempeh, miso, soy sauce, soy protein concentrate, soy protein isolates, natto, soybean oil, second generation soyfoods, meat alternatives, cheese alternatives, soy yogurt, nondairy frozen desserts, mayonnaise and dressings, instant soups and other dry mixes, margarine, lecithin, soynuts and soynut butter, soy sprouts, okara or soy pulp. Basic recipes. Breakfast. Bread. Salads & dressings. Soups & sandwiches. Main & side dishes. Desserts & drinks. Glossary. U.S. & Canadian soyfoods companies. Sources of information on soyfoods. Nutrients in soyfoods.

Contains 125 of Peter Golbitz's favorite recipes, selected from the works of some of "the world's leading soyfoods chefs." A list of these "leading vegetarian and soyfoods pioneers" (all of whose books have been published by The Book Publishing Co.) appears on the rear cover. Peter (born in 1952) lives with his wife, Sharyn Kingma, and son on a beautiful island the coast of northern Maine. A color photo of the family appears on the rear cover. Twenty years ago (in 1978) Peter was "first introduced to tofu and the wonders of soyfoods." A photo of Peter with his book appears in the Book Publishing Catalog of Jan. 1999. Address: President and Founder, Soyatech, Inc., Bar Harbor, Maine. Phone: 207-288-4969.

3964. Greenberg, Patricia; Hartung, Helen Newton. 1998. The whole soy cookbook: 175 delicious, nutritious, easy-to-prepare recipes featuring tofu, tempeh, and various forms of nature's healthiest bean. New York, NY: Three Rivers Press (Crown Publishers / Random House). ix + 221 p. Illust. Index. 24 cm.

• **Summary:** Contents: Acknowledgments. Introduction. All about soy: Health benefits of soy (reduces the risk of heart disease, lowers the risk of breast cancer, eases the symptoms of menopause, protects against prostate cancer, prevents digestive disorders {when using whole soybeans or soy products containing high levels of fiber}, eliminates the problem of lactose intolerance, prevents the problems of milk allergy, beneficial in diabetic diets), cooking with soy products (meat analogs or meat substitutes {soy sausage, soy bacon, hamburgers and hot dogs}, miso, okara, soy cheese, soy milk, soy sour cream, soy yogurt, soy flour, whole soybeans, soybeans-green, soybeans-roasted, tempeh, textured vegetable protein (TVP), tofu & silken tofu; Soy-based foods (containing little or no protein): Egg replacers, soy margarine, soy mayonnaise, soybean oil, soy sauce) how to get optimum nutrition from soy (protein,

carbohydrates, fat, cholesterol, fiber, sodium), nutrition information. Sample menus (for 3 meals a day, 7 days a week). Recipes: 1. Appetizers, dips, and spreads. 2. Salads and vegetables. 3. Brunch and breads. 4. Pizza and sandwiches. 5. Soups and stews. 6. Main dishes. 7. Pastas and grains. 8. Desserts.

This books contains almost 200 delicious and easy ways to add that essential 25 grams of soy protein to your diet. These recipes (each of which includes a nutritional analysis) are based on more than ten years of experience and experimenting (p. 2). Address: P.O. Box 10853, Beverly Hills, California 90213. Phone: (310) 474-4539.

3965. Lehnert, Dick. 1998. Specialty soybean varieties bring premiums for a price: Markets for food-grade varieties are growing. *Soybean Digest*. Jan. p. 64-65, 68.

• **Summary:** About 120,000 tons of specialty soybeans are now shipped from the USA to Japan each year—about 10% of the food-grade soybeans the Japanese buy. The soybeans must always be kept separate—"identity preserved." Growers typically get more dollars per bushel, but sometimes get fewer bushels per acre. The soybeans are made into foods such as tofu, tempeh, natto, or miso.

Kim Nill, deputy director for international marketing at the American Soybean Association, keeps tabs on the growing opportunities for specialty soybeans. He says seed companies are finding niche markets for food-grade soybeans.

Last year, Dupont introduced a variety that produces oil high in oleic acid (naturally lower in saturated fats and more heat stable without hydrogenation). Dupont is now working on a low stachyose bean. Pioneer Hi-Bred International grew 7,000 acres of low-linolenic oil beans for a market similar to that of high-oleic acid beans.

A photo shows a combine harvesting specialty soybeans that will be made into tofu.

3966. Mitchell, Paulette. 1998. The complete soy cookbook: More than 150 simple recipes for good health and great taste. New York, NY: Macmillan Publishing (A Simon & Schuster Macmillan Co.). xlix + 270 p. Illust. Index. 24 cm.

• **Summary:** A very attractive vegetarian cookbook. Each recipe is marked with one of three symbols: V = vegan, lo = lacto-ovo vegetarian, and l = lacto vegetarian. Contents: Preface: An ancient Asian secret isn't a secret anymore. Introduction: The whys (cancer, heart disease, osteoporosis, menopause, diabetes), the hows, soy food ingredients (soybeans, sweet beans {edamame}, tofu, tempeh, texturized vegetable protein {TVP}, soy milk, soy flour, soy oil, soy sauce), other soybean products (soybean sprouts, okara, miso, roasted soynuts, isolated soy protein {ISP}, dairy and meat analogs), a note on food allergies. Soy success: Stocking your refrigerator and pantry, using the recipes, kitchen equipment. 1. Appetizers. 2. Soups. 3.

Salads. 4. Entrees. 5. Desserts. Appendix: Recipes listed by soy food categories (and within each category by recipe type—such as salads, soups, desserts): Whole soybeans (32 recipes), sweet beans (green vegetable soybeans, 7 recipes), tofu (96), frozen and thawed tofu (14, all entrées), pressed tofu (12), tempeh (14), textured vegetable protein (TVP, 4), soy milk (14). Note that tofu was used in by far the most recipes (96), followed by whole soybeans (32).

Paulette, who lives in Minneapolis, Minnesota, is a cooking instructor, restaurant consultant, and lecturer. Paulette is the author of many Macmillan books, including *The 15-Minute Vegetarian Gourmet*, *The 15-Minute Single Gourmet*, and *The Complete Book of Dressings*. This book is dedicated to her 14-year-old son, Brett. Address: Minneapolis, Minnesota. Phone: 612-941-7576.

3967. Indiana Soybean Board. 1998. Indiana soyfoods locator guide: A guide to finding soyfoods in the supermarket and health food store. Lebanon, Indiana: Indiana Soybean Development Council. 48 p. 28 cm.

• **Summary:** This is the first edition of this Guide. On the cover is a paper grocery bag resting on a bed of soybeans and chock full of foods: Veggie Slices (soy cheese), soynut butter, veggie burger, tofu, soymilk, soy flour, plus carrots, celery, and cooking oil. Contents: Food pyramid. Soyfoods descriptions—Meat the Bean: Introduction, green vegetable soybeans (edamame), hydrolyzed vegetable protein (HVP), infant formulas—soy based, lecithin, meat alternatives (meat analogs), miso, natto, nondairy soy frozen desserts, soy cheese, soy fiber (okara, soy bran, soy isolate fiber), soy flour, soy grits, soy protein concentrate, soy protein isolate (isolated soy protein), soy protein—textured (textured soy protein, textured soy flour), soy sauce (tamari, shoyu, teriyaki), soy yogurt, soybeans, soymilk—soy beverages, soynut butter, soynuts, soybean oil & products, sprouts—soy, tempeh, tofu & tofu products, whipped toppings—soy-based, yuba. A taste for health—Scientists are learning about soy's health benefits: Heart disease, osteoporosis, menopause, cancer, isoflavones. Soyfood icon chart. Soyfood facts & recipes: Meat alternatives, soybean oil, textured soy protein, whole soybeans, soy flour, soymilk, tofu. Composition and nutrient content of soyfoods. Soyfood conversion charts: description of one serving of soyfoods, guide to modifying recipes, soyfoods substitution chart. Mail order soyfood companies. Soyfoods Web site packed with information. Soy cookbooks. Soy resource books. 1-800-talksoy. Soyfoods market search map; where to find soyfoods in the supermarket (a two page color layout of a supermarket displaying where soyfoods are located). Soybeans... they're in almost everything. Finding soyfoods at the supermarket (store listings by county). Address: Indianapolis, Indiana 46205-1744. Phone: 1-800-275-7679.

3968. Lindsay, Shirley H.; Claywell, Lora G. 1998.

Considering soy: Its estrogenic effects may protect women. *Lifelines (Association of Women's Health, Obstetrics and Neonatal Nurses) (Hagerstown, Maryland)* 2(1):41-44. Feb. [14 ref]

• **Summary:** Contents: Introduction. Understanding soy. Soy and menopause. Effects on osteoporosis. Soy & breast cancer. Effects of cholesterol. One sidebar, titled "A look at popular soy foods," gives a brief definition of miso, soy cheese, soy fiber (okara, soy bran, soy isolate fiber), roasted soy flour, tempeh, tofu.

A second sidebar, titled "One woman's experience," states that author Shirley Lindsay has been a near vegetarian for two years, using soy protein as her main protein source, but also an occasional serving of fish. She consumes one 14-oz. glass of soymilk and 5-8 oz. of low-fat silken tofu daily. Her diet contains approximately 70 mg/day of isoflavones. She also eats a very low-fat diet that includes low-fat dairy products, egg whites, fruits, vegetables, and olive oils. Lindsay also bakes with soy products and flax seed; the latter is rich in lignans.

"Lindsay has successfully eliminated 90 percent of her menopausal symptoms, as well as decreased her serum lipids. When she began the diet, she eliminated animal proteins except skim milk and egg whites, and within 10 days she noted a 90 percent decrease in hot flashes and night sweats. At one point, Lindsay only ate isolated soy protein powder supplements, but her menopausal symptoms returned because a significant amount of phytoestrogen is lost in the processing of powders." Address: 1. Asst. Prof. of Maternal-Newborn Nursing; 2. Director, Associate of Science in Nursing program. Both: Deaconess College of Nursing, St. Louis, Missouri.

3969. *River Currents: News from South River Miso Company*. 1998—. Serial/periodical. South River Farm, Conway, Massachusetts. Vol. 1, No. 1. Winter 1998—. Frequency: Annual. 28 cm.

• **Summary:** This newsletter contains: News about the company, with photos. A catalog of its products with current prices and a detailed description of each type of miso and tamari. Order form. Miso recipes. Frequently asked questions about miso. Company mission statement: "Life is sacred. Food is sacred." Address: Conway, Massachusetts.

3970. Stevens & Associates, Inc. ed. and comp. 1998. U.S. 1998 soyfoods directory. Lebanon, Indiana: Indiana Soybean Development Council. 47 p. 28 cm.

• **Summary:** This third edition of the U.S. Soyfoods Directory was produced for the Indiana Soybean Board by Stevens & Associates.

Note: Nasoya Foods has its own listing but Azumaya does not. Azumaya is listed under Vitasoy USA Inc. as a brand. Address: Stevens & Associates, 4816 North

Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

3971. Farrell-Kingsley, Kathy. 1998. VT's most wanted. *Vegetarian Times* No. 247. March. p. 42. *

• **Summary:** Recipes chosen as essential by a group of polled vegetarians.

3972. **Product Name:** Finger Lickin' Miso-Hishio.

Manufacturer's Name: Fermentations. A Div. of Germinations.

Manufacturer's Address: 1173 Hearst St., Berkeley, CA 94702. Phone: 510-540-5185.

Date of Introduction: 1998. April.

Ingredients: Organic barley, organic shoyu, organic soybeans, organic carrots, organic daikon, organic burdock, kombu, ginger, horseradish, koji culture.

Wt/Vol., Packaging, Price: 9 oz. glass jar. Retail for \$5.00 (Berkeley, California).

How Stored: Refrigerated.

New Product-Documentation: Talk with Alex Hozven who visits Soyfoods Center with product and Label. 1998. April 12. This product was introduced in April 1998. It is the first hishio made in the Western World. Label: 3½ by 2½ inches. Self adhesive. White on black. A small, tan hangtag (4 panels, each 2 inches square) bears the company logo on the cover and describes the product on one panel inside. Soyfoods Center taste test: Texture: Chunky. Flavor: Good.

3973. Ryan, Nancy Ross. 1998. Oh, boy! soy! Top chefs celebrate the diversity of soyfoods with 8 show-stopping dishes. *Vegetarian Times* No. 248. April. p. 36-43.

• **Summary:** Chefs from stylish restaurants sing the praises of tofu and offer their favorite recipes: Jump start smoothie (with soymilk). Veggie Peking 'Duck' (with frozen, dried sheets of yuba). Miso risotto. Curried tofu and sweet potato wakaya. Barbecued tofu. Sweet-and-sour tempeh with cucumber and cauliflower. Golden-fried bean curd with tomatoes. Sautéed eggplant with miso sauce. Note: The word "soyfoods" is misspelled as "soy foods" throughout this article. Address: Chicago.

3974. Sass, Lorna J. 1998. The new soy cookbook: Tempting recipes for tofu, tempeh, soybeans & soymilk. San Francisco, California: Chronicle Books. 120 p. Illust. (25 color photos by Jonelle Weaver). Index. 21 x 23 cm.

• **Summary:** Contents: Introduction-The soy of cooking (descriptions of soybeans, black soybeans, soymilk, tofu, tempeh, miso, soy sauce). Appetizers and soups. Entrées. Soy on the side: Vegetables and grains; Salads, slaws and dressings; Scones and a few desserts. Mail order sources. Table of equivalents. A black-and-white photo shows the author. Note: This is not a vegetarian cookbook. Ingredients

include swordfish, shrimps, mussels, codfish, clam chowder, etc.

Letter (fax) from then talk with Lorna Sass. 1996. Sept. 8. This trade paperback book, with many full-page color photos, is scheduled to be published in the spring of 1998. Chronicle Books is now publishing a series of books titled *The Vegetarian Table*, with each book featuring the vegetarian cookery of a different country. Address: 46 West 83rd St., New York City, NY 10024. Phone: 212-799-1085.

3975. Soyfoods Association of America. 1998. Soyfoods once a day for life! (Special advertising section). *Vegetarian Times*. April. 12-page color insert after p. 58.

• **Summary:** Contains large color ads by Nasoya (tofu and TofuMate), Morningstar Farms (Chik Nuggets), Eden Foods (organic black soy beans) Vitasoy (creamy original natural soy drink), Westbrae (Westsoy soymilks), Westbrae (Vigoraid nutritional drink), Sno Pac (frozen Sweet Beans-organic green vegetable soybeans), and GeniSoy (soy protein bars). On the rear cover are additional small ads (each with a logo) for Lightlife Foods, Lisanatti, Monsanto, Soyco Foods-Div. of Galaxy Foods Co., Soyfoods Association of North America, and United Soybean Board.

Interspersed with the ads is advertorial text and "Soy facts." The text on page 1 begins: "Miracle food. Health insurance in a pod. Nutritional powerhouse. The bean supreme. Nutritionists, physicians, researchers, chefs, and food experts of all kinds are raving about the healthfulness and great taste of soyfoods, and it's no wonder; soy truly is a nutritional and culinary gift from nature.

"Soyfoods are delicious, convenient, and versatile. At breakfast, soy can make an appearance in the form of soymilk, scrambled tofu 'eggs,' or soy 'sausages.' A soy shake or veggie burger makes a great lunch. Try a tempeh stir-fry, or perhaps a creamy tofu dessert.

"So dig in... with the huge variety of soyfoods available at your local natural foods store, it's easy to get your daily intake of soy, and reap the many benefits of the bean supreme."

The inner contents: Food as medicine. Heart health. Fighting cancer. Menopause? What menopause? Strawberry smoothie. Protein punch.

Soy cooking tips (p. 4): Easy ways to incorporate soy into your baking: Use soy flour in your baking. Be aware that soy flour contains no gluten, and therefore yeast breads will not rise without the addition of some gluten-containing flour. About ¼ cup of soy flour per cup of unbleached white flour is recommended for breads, pastas, and pastries. In place of olive oil, try adding a few ounces of Nasoya Silken Tofu and a dash of lemon juice to mashed potatoes. Try mashing miso into your root vegetables in place of butter. When adding miso to dishes, add roughly 1 tablespoon per four servings. Add GeniSoy Natural Vanilla Soy Powder to your baked goods such as muffins or pancakes. Buy Eden

Organic Soybeans in a can and use them the same way you would any other canned bean: over rice, with pasta, in stir-frys, etc.

It's not only what you eat; its also what you don't eat. Making healthy eating taste great. Soy fact: soybeans were traditionally considered one of five sacred crops in China.

No time to cook? Try these quick ways of getting soy in your diet.

Strong bones... a matter of calcium retention. Miso.

Soy fact: there is no word for "hot flash" in Japan. Soy beverage.

Miraculous tofu. So soy convenient. Soy fact: Western culture discovered tempeh through the Dutch colonization of Indonesia. Soy fact: tofu was unknown to most people in the United States until Chinese immigrants came to this country in the 1800's. Tofu.

Tempeh. By the handful. Soy fact: miso was developed in China about 2,500 years ago. Where to find it. Address: Washington, DC.

3976. *Vegetarian Times*. 1998. Soyfoods once a day for life! No. 248. April. p. 59. *

• **Summary:** Includes recipes and sources for soyfood products.

3977. Hainer, Cathy. 1998. Oh, 'soy' wonderful! Shucking its hippie image, the bean goes mainstream. *USA Today*. May 29. p. 08.D. Final edition.

3978. Gotoh, T.; Yamada, K.; Yin, H.; Ito, A.; Kataoka, T.; Dohi, K. 1998. Chemoprevention of N-nitroso N-methylurea-induced rat mammary carcinogenesis by miso and tamoxifen, alone and in combination. *Japanese J. of Cancer Research (Gann)* 89(5):487-95. May. *

• **Summary:** Diets containing either 10% soybeans or 10% miso reduced mammary tumor numbers (tumors/rat) by roughly 50%, although there was little effect on tumor incidence (percentage of rats in each treatment group developing tumors).

The combination of miso and tamoxifen strongly inhibited tumor development—more than either agent alone. Moreover, when treatment was delayed until mammary tumors were already established, the combination of miso and tamoxifen inhibited tumor growth by about 50%, whereas tamoxifen by itself was ineffective. Miso by itself was not studied.

3980. Dateline. 1998. Healthline: The joy of soy. Television broadcast. NBC. June 9.

• **Summary:** The announcer from Studio 3B in New York is Stone Phillips. He has four guests: Chief medical

correspondent Dr. Bob Arnot, Bob McKeown, Keith Morrison, and chief consumer correspondent Lea Thompson. Mr. Phillips begins: "Most Americans don't know beans about soy, but that may soon change. The humble soybean is sprouting into the hottest new health food trend since oat bran, and for good reason. Scientists are learning that soy may help lower the risk of an amazing range of diseases."

Mr. Arnot then asks John Glaspy: "Which of these diseases could soy play a very positive preventive role? Heart disease?" Answer: Probably. Osteoporosis? Almost certainly. Menopause? Almost certainly. Breast cancer? Almost certainly.

Mr. Glaspy is most interested in breast cancer. He says that changing the way Americans eat could stop this killer. He believes that diet "could be a huge risk factor and could explain up to... 80 percent of breast cancer in the world."

Arnot adds that the first hint that soy may be a dietary factor begins in Japan. "Japanese women have one of the lowest breast cancer rates on earth. But when they move to Hawaii, leaving behind their native diet, their risk doubles. Doctors think the difference is soy."

Arnot says that "Debbie McCurdy is betting her future on soy. Diagnosed with breast cancer 2½ years ago, she has gone through surgery, chemotherapy, a bone marrow transplant and radiation. Now she's part of Dr. Glaspy's study to see if soy can protect her from a recurrence."

"Here's how doctors think soy works. In order for a breast cell to turn cancerous, it needs to be fed by strong hormones, like estroGen. But soy has what are called 'weak estrogens' that float through the blood and attach themselves to breast cells. That means, the strong, potentially harmful hormones have no place to attach to, and no way to turn a normal cell into a cancer cell."

"For the study, Debbie drank soy shakes three times a day and doctors took tissue samples to look for changes that might indicate the soy is working, but Debbie's not waiting for the results. Her family's menu has changed for good. They now eat lots of fruits and vegetables, as well as soy beans, miso soup, even tofu added to chili. And they seem to like it!"

3981. Farrell-Kingsley, Kathy. 1998. Celebrate summer. *Vegetarian Times* No. 250. June. p. 32. *

• **Summary:** Includes recipes.

3982. Japan Tariff Assoc. 1998. Exports of miso (bean paste): No. 2103.90-000. *Japan Exports and Imports: Commodity by Country*. June. No. 618. p. 83. [Eng; jap]

• **Summary:** For each country, gives the quantity and value for the current month, and for the cumulative year to date. Countries to which Japan exports large quantities of miso are (year to date in kg): USA 1,127,052. Taiwan 168,941. Hong Kong 156,221. South Korea 104,743. Total exported

this year: 2,235,149 kg. Address: 4-7-8, Kohji-machi, Chiyoda-ku, Tokyo 102-0083, Japan. Phone: 81-3-3263-7221.

3983. Shimbo-Beitchman, Hiroko. 1998. Magical miso. *Saveur* (New York, NY) No. 27. May/June. p. 100-08, 110, 112.

• **Summary:** A beautiful article, loaded with glossy color photographs (by Christopher Hirsheimer and Tom Wagner) and recipes. Photos show: (1) Shiromiso in a stylish bowl. (2) A Japanese worker, in clothing with traditional designs, stands on the rim of a miso vat and shovels what will become miso at Yamaki Jôzô, a miso brewery built in 1902 by the Kitani family, in Kamiizumi-mura, Honjô city, Saitama prefecture, 75 miles northwest of Tokyo, Japan (full page). *Yama* means “mountain, *ki* stands for Kitani, and *jôzô* means “brewery. Kazuhiko Morita is the brewery’s director. The company has been making three basic types of miso, plus shoyu and tofu, since 1902. Yamaki partially automated in the mid-1980s and today makes about 400 tons of a miso a year; it is not pasteurized and no alcohol is added in packaging as a preservative. (3) Looking down into a bowl of miso soup with tofu and wakame (full page). (4) The exterior of Yamaki Jôzô; a tree bearing bright orange persimmons stands in front of several traditional wooden buildings. (4) Hiroko Shimbo-Beitchman. (5) Mr. Morita, in traditional clothing, smelling the koji in a large, automated, stainless-steel koji incubation room. (6) The man shoveling the finished koji out of the incubation room onto a conveyor belt. (7) Eggplant Dengaku (with red and white miso, full page). (8) Walnuts being ground to a paste in a suribachi. (9) Steaming the soybeans at Yamaki Jôzô; 5,300 pounds of whole soybeans are steamed at a time. The company has two giant steel pressure cookers. For akamiso, the beans are cooked for about 7 hours until soft and yellow. (10) Cooling the cooked soybean on a conveyor belt. Most of the miso’s flavor comes from the beans; the aroma and sweetness come from the *kôji*. (11) Mixing the cooked soybeans and koji, with salt and a little spring water. Then the mixture is forced through a machine like a meat grinder to produce a smooth paste, which will ferment more easily than a chunky one. (12) Putting the ingredients for akamiso into 100-year-old cedar vats, which are covered with plastic sheeting then weighted. After several months it is moved to another set of barrels, then again a few months later. It can age for up to two years. (13) Three packages of commercial Japanese miso: akamiso, akadashi-miso, and shiro miso.

Recipes: Miso soup with tofu and wakame. Eggplant dengaku with two miso sauces. Green beans with miso dressing. Broiled miso-marinated black cod. Panfried miso-marinated beef. Steamed pork with mamemiso. A sidebar describes the different types of miso, with details on akamiso, mamemiso, and shiro miso. The company also

makes brown rice miso (unpasteurized), and a kit (with koji and instructions) for making your own miso at home.

Traditionally miso made at home was the source of great family pride. “*Temae miso desu ga,*” one would say—meaning “I don’t want to boast about my miso, *but...*” Today Japan’s 50 largest miso manufacturers control about 90 percent of the market. But miso connoisseurs prefer miso made by smaller companies in the traditional way; these are painstakingly preserving old-fashioned techniques and regional miso styles. Address: Teacher of Japanese cooking, Hiroko’s Kitchen, London, England. Phone: Fax: 44-171-289-0855.

3984. Yates, Ronald E. 1998. The story of the origins of Kikkoman in a woman named Shige Maki (Document part). In: Ronald E. Yates. 1998. *The Kikkoman Chronicles: A Global Company with a Japanese Soul*. New York, San Francisco & Washington, DC: McGraw-Hill. xviii + 206 p. See p. x-xi, 13-19, 62.

• **Summary:** Before we recount this story, we would like to say that we question its authenticity. Why was Shige Maki not mentioned in Mark Fruin’s classic 1983 history of Kikkoman titled *Kikkoman: Company, Clan and Community*, published by Harvard University Press? William Shurtleff asked Dr. Fruin in late 1998 if he had ever heard of Shige Maki and he replied “No.” Why has Soyfoods Center never heard this story before? Why does Mr. Yates provide no documentation to support this story—or the story that Kikkoman traces its origins back to 1630—for which we have never seen any credible evidence. We find this all very suspicious.

According to Mr. Yates, Kikkoman now traces its origins back to a woman named Shige Maki, who in 1615 was living in the Shadow of Osaka Castle, where her husband, Yorinori, was a samurai warrior (retainer) serving the warlord Hideyori Toyotomi. Hideyori (1593-1615), whose archrival was Ieyasu Tokugawa, was the son of Hideyoshi Toyotomi, one of Japan’s greatest warlords and a man credited with uniting Japan in 1590 by subjugating the five western provinces of Japan’s main island, Honshu. In 1586 Hideyoshi built the magnificent Osaka Castle—the largest and most impressive castle in Japan. For the next 5 years, Hideyoshi continued to consolidate his power via a series of battles and castle sieges. In 1591 he issued an edict establishing four distinct classes of people. At the top were samurai, followed by farmers, artisans, and merchants. That rigid social order lasted until 1868, when Japan’s emperor Meiji ended feudalism and ushered in the nation’s modern era. In 1597 Hideyoshi invaded Korea; he died there in 1598 during the campaign. His Japanese forces withdrew and in 1600 Ieyasu Tokugawa, a senior general in Hideyoshi’s army, seized power following the battle of Sekigahara when he defeated an army of Hideyoshi’s former vassals and retainers. This move was viewed as

betrayal by many of Hideyoshi's men. In 1603 Ieyasu was awarded the titled of shogun by the emperor; he was the first of Japan's powerful line of Tokugawa shoguns that would rule Japan virtually unchallenged until the mid-1800s when Commodore Matthew Perry of the United States and his squadron of black ships forced Japan to open its doors to global politics and commerce.

The Toyotomi family, now led by 19-year old Hideyori, vowed revenge on Ieyasu Tokugawa. Shige Maki and her husband, Yorinori, supported Hideyori. But in June 1615 Hideyori was defeated at Osaka Castle. Yorinori committed suicide; Shige Maki and her young son, Heizaburo, escaped from the castle and fled. For 15 years the two were on the run. "Eventually, Shige Maki and Heizaburo settled in the small farming community of Noda, about 30 miles north of Edo (now Tokyo). In the interim they had changed their name from Maki to Mogi, with Heizaburo altering his first name to Shichizaemon. No descriptions of Shige Maki exist, but she must have been one tough and resourceful lady. Not only did she survive the bloody battle of Osaka Castle and outwit the shogun's henchmen, but she spent years working in the rice fields of Noda" (p. 13-17).

On pages x-xi the author tells the end of this story somewhat differently: Because Shige Maki and "all others who had supported Toyotomi were on Tokugawa Ieyasu's death list, she changed her name to Mogi and blended in with the rice farmers in the area [of Noda]. For 15 years, she and her son cultivated rice and in the process learned the craft of brewing *shoyu*—the Japanese word for soy sauce... Using her new name of Mogi, the resourceful woman... made some refinements in the production process and more than 300 years ago began making the product that the world today knows as Kikkoman."

Continuing on p. 19: "Among the earliest recorded shoyu producers in Noda were Hyozaemon Takanashi and Shichizaemon Mogi [Shige Maki's son]. Local records show that Takanashi was producing fermented shoyu in 1661, while the Mogis were making miso [by 1662].

"A year later, on August 22, 1662, some 47 years after she had escaped from the ruins of Osaka Castle, Shige Maki died. There is no doubt that if Shige Maki had not been as intrepid and resourceful as she was, there would be no Kikkoman Corporation today."

On page 62 Yates tells this story with still another twist: "When Shige Mogi (nee Maki) and her son Shiroemon [sic, Heizaburo] began making miso and shoyu in Noda in the 1600s, it was still very much a farmhouse industry."

Note 1. Soyfoods Center believes, based on three detailed histories of Kikkoman published in Japanese, plus the excellent research of Mark Fruin and others, that Kikkoman cannot trace its connections with soy sauce back farther than 1661, when Hyozaemon Takanashi started to make shoyu in Noda. We want to emphasize that there was no connection between the Takanashi and Mogi families

until 1768 (more than 110 years after Hyozaemon Takanashi started to make shoyu in 1661). Mr. Yates presents no evidence that Shige Maki or her son ever made soy sauce (shoyu).

Mr. Yates continues (p. 19-20): In 1768 the eldest son of the Hyozaemon Takanashi clan married the "daughter of the fifth generation of the Shiroemon [sic, Shichizaemon] Mogi line. This was to be only the first of a series of alliances between the Mogi and Takanashi families."

Note 2. According to Fruin (1983, p. 16) Shichizaemon Mogi started to make miso in Noda in 1662. This was the Mogi family's earliest connection with foods or condiments made from soybeans. Address: Head, Journalism Department, Univ. of Illinois (Urbana).

• **Summary:** Three past editions of this report have been published by Business Trends Analysts, Inc. (BTA), which is located at the same address as The Leading Edge Group. BTA is the parent company. Since it was founded 20 years ago, it had published reports under two brand names, each of which has a different style. Business Trends Analysts Reports tend to contain mostly secondary research, with an abundance of charts and graphs, and less text and analysis. Leading Edge Reports are conducted by a person with a specialty in that area. The report contains much more primary research and in-depth analysis, and is roughly twice as expensive. This report was conducted by Melina Laverty.

Chapter 5 of this report is titled "Soyfoods and alternative meat products: Market dynamics.

Overall report—Contents: 1. Executive summary. 2. Overall market dynamics (including Soyfoods). 3. The market for soy foods. 4. The market for herbal teas. 5. The market for dairy foods. 6. The market for grains and cereals. 7. The market for frozen foods. 8. The market for snack foods. 9. The market for groceries. 10. The health food consumer. 11. The health/natural food store industry. 12. Competitor profiles. 13. Industry directory. Address: Commack, New York. Phone: 516-462-2410.

3987. Robertson, Robin. 1998. The soy gourmet: Improve your health the natural way with 75 delicious recipes. New York, NY: Penguin/Putnam/Dutton. xv + 191 p. July. Introduction by James W. Anderson, M.D. Index. 21 cm. A Plume book.

• **Summary:** Contents: Foreword. Introduction: Health benefits of soy protein, by James W. Anderson, M.D. 1. The soy solution. 2. Soy what? (soybeans, tofu, tempeh, textured soy protein or TVP, soy milk, miso, soy sauce, soy flour, dry-roasted soybeans or soy nuts, soy convenience foods, egg replacers). 3. Making soy protein work for you. 4. Breakfasts. 5. Let's do lunch. 6. What's for dinner? 7. Desserts. 8. Shakes and more. 9. Sample menus. Glossary (In addition to the soy foods described at Chapter 2: Gomasio, soy cheese, soy protein powder, and tamari soy sauce).

The author, who is a woman, worked as a professional chef during the 1980s, when she used large quantities of meat, eggs, and dairy products to prepare dishes in classic cuisines, such as French and Italian. In 1987 she made a dramatic change in her life, when she decided to stop working in professional kitchens, and start to pursue a healthier lifestyle, becoming a vegetarian, eliminating all meat and dairy products from her diet. Having lost both parents to heart disease and stroke, she had a personal interest in helping people learn how to cook and eat properly. Using soy products such as tofu, tempeh, and soy milk, she was able to recreate her favorite old recipes—sautéed dishes with cream sauces, rich pasta dishes, and even delicious cheesecakes—all without cholesterol. But these soy foods actually offered a double benefit, for recent scientific studies show that they actually reduce cholesterol levels.

3988. Fujimori, Ikuo. 1998. Japan's position on genetically enhanced soybeans. *Canadian Soybean Technical Bulletin (OSGMB, Chatham, Ontario, Canada)* 4(1):3. Aug.

• **Summary:** Japan needs more time and information to discuss this matter seriously. Some consumers and consumer groups are now very nervous regarding the use of these soybeans. Address: President, Takeya Miso Co. Ltd., Nagano, Japan.

3989. Ndugi Khotu, Aubry. 1998. Contribution a l'avant-projet d'une usine de production de *lait de soja* en poudre a Lubumbashi [Contribution to the rough draft for a factory for the production of soymilk at Lubumbashi, Congo]. Civil Engineer thesis, University of Lubumbashi, Polytechnic Faculty, Dep. of Industrial Chemistry. v + 154 + 16 p. Illust. 30 cm. [73 ref. Fre]

• **Summary:** Preface and dedication. Introduction. Part I: Review of the literature. 1. General information about soya and proteins: 1.1. The soybean (Botanical, origin and history, soybean production and commerce worldwide, soya in the Democratic Republic of the Congo {Congo, formerly Zaire}, structure and composition of soybean seeds, utilization of soybeans {with diagram}, food uses of soybeans {oil and meal, soy flour (4 types), soy concentrates and isolates, textured soy proteins {TVP,

thermoplastic extrusion, spun fibers}, soymilk, tofu, other uses (shoyu, miso, tempeh, yuba)}, industrial uses of soybeans {linoleum, plastics, paints, varnishes, etc.}). 1.2. Proteins (in the human body, in foods), the structure of proteins (amino acids, ionization and acid-base properties of amino acids), protein bonds, denaturation. 1.3. Soya proteins (glycinin or globulin 11S, globulin 7S, hemagglutinins or lectins, protein inhibitors and other antinutritional factors, amino acid composition of soy protein). 1.4 Factors affecting the food value of soya: Acceptability problem (food value of raw soybeans), intolerance to soy proteins, off-flavors in soya and their source, inactivation of lipoxygenase, other treatments affecting the food value of soya: Alkalis.

2. Preparation and properties of soymilk. 2.1. Properties. 2.2. Advantages and disadvantages of soymilk compared with cow's milk. 2.3. Preparation. 2.4. Commercial / industrial production using the Alfa-Laval process.

3. Reminder of certain operations required for the preparation of soymilk powder: 3.1. Homogenization. 3.2. pasteurization and sterilization. 3.3. Concentration by evaporation. 3.4. Drying by atomization. 3.5. economies of energy in dewatering operations.

4. Some ideas on the methods of sensory evaluation: 4.1. The different methods. 4.2. Results and interpretations.

5. Important ideas in the study of the market, in determining the capacity of production, and in the economic evaluation of a project: 5.1. Study of the market. 5.2. Determining the capacity of production. 5.3. Economic evaluation of a project, incl. estimating fixed capital by adding capital costs.

Part II: Experimental, industrial calculations, economic calculations. Introduction. 6. Origin and characterization of the raw materials, trials for inactivation of lipoxygenase. 7. Determination of the optimal conditions for the preparation of soymilk. 8. Results of pilot plant trials. 9. Market study and determination of the capacity of production. 10. Description and calculations for the installation. 11. Economic evaluation of the project. General conclusion.

Tables show: (1) Number of people that can be supported for 1 year by the production from one acre devoted to certain crops and animals. Fewest: Beef 190. Pork 319. Poultry 457. Most: Potatoes 5,329. Split peas 6,901. Soybeans 9,075. Algae 43,200–154,000. Yeast 3,275,000. (1.1) Leading soya producing countries in 1985 (worldwide, with area, production, and yield; USA, Brazil, China, Argentina, India). (1.2) Leading soya producing continents in 1985 (North and Central America, South America, Asia, USSR, Europe, Africa, Oceania). (1.3) Leading soya trading countries in 1985. Importers: Japan, Netherlands, R.F.A. (Republique Federal Allemagne = Germany), Spain, Italy. Exporters: USA, Brazil, Argentina, China, Paraguay. (1.4) Production of soya in the Congo, by province 1970-1978 (the leading producer by far in 1978

was Western Kasai). (1.5) Production of soya in Katanga [formerly Shaba, before that Elisabethville] (1990-1994; by far the leading producer is Tanganyika). 1.6 Total production of soya in the Congo (1,000 metric tons) from 1970-1995 (increased from 1.7 in 1970-74 to 18 in 1995). (1.7) Average composition of different parts of the soybean seed. (1.8) Physico-chemical composition of soybean seed (ranges and average). (1.9). Mineral content of soybeans. (1.10). Vitamin content of mature soybean seeds and soybean meal. (1.11) Fatty acid composition of soybean oil. (1.11A) Enzymes in the soybean: Lipoxidase, urease, lipases, beta-amylase. (1.12) Properties and characteristics of the water-soluble fractions of soybean seeds. (1.12A) Variations in the solubility of proteins from defatted soy flour at various pH levels. (1.12B) Amino acid composition of soybean protein. Address: Lubumbashi, Katanga Province, Congo.

3990. Ginsberg, Beth; Milken, Mike. 1998. *The taste for living cookbook: Mike Milken's favorite recipes for fighting cancer*. Santa Monica, California: CaP CURE. Distributed by Time-Life Books. 118 p. Illust. Index. 26 x 27 cm. [2 ref]

• **Summary:** This is a gorgeous, low-fat vegetarian cookbook in which about half the recipes use soy as a major ingredient. It is loaded with color photos (many full page), playful graphics, and good advice. Note: 100% of the proceeds from this book are used to fund prostate cancer research. The book is available at bookstores nationwide, or it can be ordered by dialing toll-free 1-877-884-5433 (LIFE). Contents: Introduction, by Michael Milken. Preface, by Beth Ginsberg. Four nutritional principles of CaP CURE to fight prostate cancer and other hormonal cancers: (1) Limit dietary fat to 15% of total energy intake (calories). (2) Eat 5 or more fruit and vegetable servings per day. (3) Consume 25 to 35 grams of dietary fiber a day. (4) Consume 40 to 60 grams of soy protein a day. "Americans have a five times higher incidence of prostate cancer than people living in Asia and eating a traditional diet. Soups. Exercise. Entrees. Soy and soybeans. Sandwiches and sides. Cruciferous vegetables. Breakfasts and shakes. Desserts. Healthy pantry. Afterword, by Donald S. Coffey, PhD, President of the American Assoc. for Cancer Research and Professor of Urology, Oncology, Pharmacology and Molecular Sciences, Johns Hopkins Hospital, Baltimore, Maryland: We are what we eat, how does food cause or protect us from cancer (ROS = reactive oxygen species), how did we lose our way?, how did our diet change ("The great apes were primarily vegetarian, consuming great quantities of vegetables that are high in fiber"), what should we do? About CaP CURE.

Soy-related recipes include: French onion soup (with soy cheese and soy sauce, p. 20). Broccoli potato soup (with grated nonfat cheddar-style soy cheese, p. 22). Shiitake

miso soup (with silken tofu and low-sodium tamari sauce, p. 22). Taco salad with a chili lime dressing (with 1½ lb fat-free soy meat, p. 26). Chinese roasted tofu salad (p. 33). Orange ginger dressing (with white miso and tamari, p. 33). Chef's salad with miso shallot dressing (and Soy Deli Slices, p. 34-35). Thousand island dressing (with tofu, p. 34-35). Chopped vegetable salad (with 1 cup edamame, p. 36). Teriyaki tofu bowl with Chinese vegetables (p. 40). Tofu dog casserole with a pretzel crust (p. 42). Soy and Soybeans (with a sidebar on "understanding tofu," p. 44-45). Lasagne with "soysage" (with fat-free vegetarian sausage, silken tofu, and soy cheese, p. 46). Spinach cannelloni with fresh tomato sauce (plus soy milk and low-fat tofu, p. 48-49). Vegetable fritatta with roasted tomato salsa (and 2 lb tofu, p. 54-55). Enchilada pie with ranchero sauce (and 1 lb soy cheese). Greek spinach pie in a phyllo nest (with tofu, p. 61; remake of spanakopita). Homemade vegetable pizza with soy cheese (p. 62-63). Vegetable reuben (with tempeh bacon strips, p. 68). Tofu egg salad sandwich (p. 72). New Deli (fat-free hot dog, p. 75). VLT with herb mustard (and fat-free tofu bologna slices, p. 76). Broccoli in soy cheese sauce (p. 78-79). Fruit shake (with soy protein isolate, p. 84). Blueberry banana multi-grain pancakes (with soy milk, p. 87). Strawberry shortcake (with soy milk, p. 96). Carrot cake (with silken tofu, p. 100-01). Devil's "fool" cake with cocoa frosting (plus silken tofu, p. 104). Tofu cheesecake with fresh berry topping (p. 106-07). Banana cream pie (with 3 cups vanilla soy milk, p. 108). Old fashioned chocolate pudding (with 2 cups cocoa soy milk, p. 109). Maple flan (with 2 cups soy milk, p. 110). Address: CaP CURE, 1250 4th St., Suite 360, Santa Monica, California 90401. Phone: 310-458-2873.

3991. Goldbeck, Nikki; Goldbeck, David. 1998. *The healthiest diet in the world: A cookbook and mentor*. New York, NY: Dutton (Penguin/Putnam Inc.). xiii + 561 p. Sept. Illust. General index. Recipe index. 25 cm. [840+* ref]

• **Summary:** This is an excellent book, with a wonderful title that lives up to its promise. Both authors are real professionals, with 25 years in the field. Contains extensive information about the importance of a wholefoods, natural foods diet, with plenty of fresh fruits, vegetables, beans, and soyfoods as sources of the many recently-discovered phytochemicals, which offer promising health benefits. The authors are fans of soyfoods, which are featured in both the text and recipes throughout the book.

In Part I: Goldbeck's Golden Guidelines, No. 5 is "Super Soy Foods" (p. 14-15) which encourages readers to "Make soy foods a regular part of your diet."

Part II is the recipe section, titled "In Nikki's kitchen: Healthiest diet recipes." The main soyfoods used in recipes are tofu (48 recipes!), tempeh (15), soy milk (14), miso (8), soybeans, whole dry (3), and soy flour (2). This book contains so many soy-related recipes that we cannot

possibly list all of their names. So here are two samplers of such recipes to give a feeling of their diversity, extent, and inviting names. (1) Salad dressings and salads: Creamy miso-mustard coleslaw (p. 178). Tofu mayonnaise (p. 190). Creamy tofu Russian dressing (p. 191). Creamy tofu ranch dressing (p. 191). Lemon-tahini dressing (with soy sauce, p. 192). Creamy miso-mustard dressing (p. 193).

(2) Tempeh recipes: Tempeh strips (p. 31). Tempeh breakfast links (p. 32). Baked Italian tempeh (p. 38). Tempeh burgers (p. 39). Skewered tempeh with orange-nut crust (mini kebabs, p. 61). Maple-pecan tempeh (p. 98). Baked corn-tempeh hash (p. 98-99). Picadillo (Latin American sloppy Joes with tempeh, p. 99). Tempeh mushroom stew (p. 100). Asian grill (with marinated tempeh, p. 101). Tempeh kebabs (p. 102). Shish kebab in a bag (p. 103). Tempeh-bean chili (p. 114-15).

In Part III: Mentor, one entire chapter is dedicated to soyfoods ("5. In praise of soybeans," p. 408-29). The contents of that chapter: Introduction. Soy's special assets. The phytochemical furor. Protein plus. Soy fiber. Vitamins and minerals. Soy concerns. Soy food selection (incl. Western-style dairy and meat alternatives; soy cheese, soy ice cream, "soy-based imitation meat"). Stick with traditional soy foods: Tofu, tempeh, soy milk, soy nuts, whole soybeans (incl. edamame or green soybeans), soy sprouts, soy flour, soy grits, soy sauce, miso, okara (soy fiber), natto. Soy for health: Introduction, cancer (breast, prostate, and other hormonally influenced cancers), heart disease, diabetes, osteoporosis, women and soy, infant feeding. Nikki's dialog boxes: Mixing and matching soy protein. Just because they call it "milk": Nondairy vs. dairy. The question of salt. How to acquire your anti-cancer soy intake. Twenty-five grams of soy protein a day?

Soybeans are also mentioned in Chapter 6, "The beauty of beans" (see p. 431, 434). The 43-page bibliography of current scientific information on the health benefits of foods is worth the price of the book.

In the chapter titled "Controversial carbohydrates" is a long section about the glycemic index of foods titled "G-Force: A new perspective on carbohydrates" (p. 280-89); it includes a 6-page table showing G-force [glycemic index] ratings for individual foods. "Foods with a high G-Force [55 and above, bad] raise blood sugar levels quickly; this is usually matched by a rapid rise in insulin. Foods with low G-Force cause blood sugar levels to rise gradually, in which case insulin is usually released more evenly." Foods that tend to have a high G-Force are: Desserts and sweets (doughnut 108, graham crackers 106), foods made from refined flours (baguette 136, bagel 103, white wheat bread 100), sweet and refined breakfast cereals (puffed rice 132, Cornflakes 119, Cheerios 106), sugars (maltose 150, glucose 137, sucrose 92). Foods groups that tend to have low G-force are: Fruits (apple 54, apple juice 58, orange juice 63, but watermelon 103), legumes (soybeans 25,

chickpeas 47), dairy products (yogurt 20, milk 46). vegetables (non-starchy). Address: Woodstock, New York.

3992. *Soya & Oilseed Bluebook*. 1998—. Serial/periodical. Bar Harbor, Maine: Soyatech, Inc. Peter Golbitz, publisher and editor. Frequency: Annual.

• **Summary:** Preceded by *Soya Bluebook Plus*. A directory and information book for the soybean processing and production industries. The first issue (shipped Sept. 1998) is subtitled "The annual directory of the world oilseed industry." On the cover, below a map of the world is printed the date "1999" in large letters, followed by "A Soyatech Publication." Crops featured on the front cover and inside are "soya, corn, cottonseed, canola, rapeseed, sunflowerseed, palm kernel, palm, coconut, and peanut."

Contents (the four main sections are marked with a fold-out tab): Translations of oilseed terminology (English, German, French, Spanish, and Portuguese). Organizations and government agencies: Complete listings by country. Oilseeds and oilseed products: White pages (Index, individual crops), catalog pages, yellow pages (complete company listing by country). Equipment supplies and services. Oilseed statistics. Oilseed reference: Oilseed glossary, standards and specifications, oilseed technical charts and tables. Indexes: Comprehensive index, internet address index, brand name index, advertiser index.

Soy-related terms appearing in the translation section (p. 9-15) are: (1) Oilseeds and products: dairy analogs, lecithin—edible, lecithin industrial, meat analogs, miso, organic soy products, soy distillate, soy fiber, soy flakes—defatted—edible, soy flakes—full fat, soy flour—defatted, soy flour—enzyme active, soy flour—full fat, soy flour—low fat, soy flour—roasted, soy flour—textured, soy grits, soy isoflavones, soy livestock feed, soy oil margarine, soy oil shortening, soy oil—crude, soy oil—edible, soy oil—hydrogenated, soy oil—industrial, soy oil—refined, soy oil-based fuel, soy protein concentrate, soy protein isolate, soy protein—hydrolyzed, soy protein—industrial, soy sauce, soy sterols & tocopherols, soy-based foods—other, soybean fatty acids, soybean hulls, soybean meal, soybean meal—full fat, soybean seed breeder, soybean seed (for planting), soybean soapstock, soybeans—food grade, soybeans genetically modified, soybeans—green vegetable, soybeans—identity preserved, soybeans—non-gmo, soybeans—organic, soybeans, whole dry, soymilk beverages, soymilk powder, soynuts, tempeh, tempeh starter cultures, textured vegetable protein, tofu & tofu products, tofu powder. (2) Equipment & services: Coagulants for tofu, soymilk & tofu processing equipment, sprouting equipment. Address: 318 Main St., P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207-288-4969.

3993. Byrd, Deborah. 1998. Soy what? Once-bland products touted as tasty, hearty protein sources. *Contra*

Costa Times. Oct. 21. p. G1, G9. [9 ref]

• **Summary:** Includes a brief review of nine new books that contain soy recipes, a discussion of the health benefits of soyfoods, a talk with William Shurtleff of Soyfoods Center, a glossary and brief description of several soyfoods (edamame, dry soybeans, tofu, tempeh, miso), and 5 recipes: Luscious lemon pie (with silken tofu). Tempeh simmered in red wine with *herbes de provence*. Tofu teriyaki. Chocolate velvet pudding (with silken tofu). Mushroom almond spread (with firm silken tofu). A huge color photo shows Chocolate velvet pudding in a stem glass with a sliced peach. Address: California.

3994. Oser, Marie. 1998. *Soy of cooking: Easy-to-make vegetarian, low-fat, fat-free, and antioxidant-rich gourmet recipes*. New York, NY: John Wiley & Sons. xviii + 264 p. Nov. Illust. Index. 23 cm. [55 ref]*

• **Summary:** The contents of this book is identical to that published by Chronimed in Oct. 1996. John Wiley & Sons began publishing it in Nov. 1998. Talk with Marie Oser. 2000. Oct. 4. The book is now in its 7th printing. John Wiley has excellent distribution and is doing a fine job with the book. Address: Agoura Hills, California 91391. Phone: 818-707-7353.

3995. Stepaniak, Joanne. 1998. *The vegan sourcebook*. Los Angeles, California: Lowell House. xvi + 352 p. Index. 24 cm. Special nutrition section by Virginia Messina. [196* ref]

• **Summary:** Contents: Preface. 1. Vegan roots. 2. The vegan identity. 3. The way the West was weaned. 4. Which came first? 5. Invisible oppression. 6. Environment in crisis. 7. Shooting the myths. 8. Animals and entertainment. 9. Science: Fact, fiction, or fantasy. 10. The compassionate consumer. 11. The body beautiful. 12. Ethics in action. 13. Of principle and practice. 14. Ascent and evolution. 15. Embracing the choice. 16. Reorienting the compass. 17. Challenges, gifts, and offerings. 18. The Vegan table. 19. Secret ingredients. 20. Vegan nutrition. Appendixes: 1. Vegan nutrition charts. 2. Menu planning using the Vegan food pyramid. 3. Special ingredients and Vegan recipes. 4. The Vegan lifeline: Resources and organizations. 5. Recommended reading. Bibliography.

Soy-related recipes or discussion: Soymilk (p. 188-89). Soy cheese, soy yogurt and sour cream (made from silken tofu), vegan cream, puddings, ice cream, and popsicles (p. 190-91). Use of tofu in place of eggs to bind or thicken (p. 192-93). Miso, tamari and shoyu (p. 256-57). Tofu, regular and silken (p. 258). Quinoa, seitan, tahini (p. 258). Sour cream and onion dip (with tofu, p. 275). Sesame-miso spread (p. 275). Tofu-vegetable spread (p. 277). Miso master dressing (p. 282). Curried tofu salad sandwiches (p. 290). Roasted vegetable pizza with tomato-tinged tofu (p. 300-01). Savory baked tofu (p. 302). Baked potatoes

Florentine (with tofu, p. 305). Tofu ricotta (p. 308). Vegan mayonnaise (with tofu, p. 310). Tofu sour cream (p. 310). Creamy fudge frosting (with tofu, p. 315). Address: Swissvale, Pennsylvania.

3996. Akihiro, Ito; Goto, T.; Yamanda, K.; Fujimoto, N.; Watanabe, H. 1998. Soy and cancer—Animal studies: Primary prevention of cancers by miso, soybean, and biochanin A on rodent tumors (Abstract). *American J. of Clinical Nutrition* 68(6S):1525S. Dec. Supplement. Address: Dep. of Cancer Research, Research Inst. for Radiation Biology and Medicine, Hiroshima Univ., Kasumi 1-2-3, Hiroshima 734, Japan.

3997. Elwell, Gaella. 1998. *About South River Miso Co. River Currents: News from South River Miso Company (Conway, Massachusetts)*. Winter. p. 1. Dec.

• **Summary:** “Twenty years ago this fall Christian and I acquired land here in Conway (South River Farm), bought the fledgling Ohio Miso Company, and learned we were expecting our first child. And that was only the beginning! Since that time, through the backing of family and the efforts of many good friends, we have built a shed for work horses, a cabin, a barn, another cabin, a traditional miso factory, and finally our own home, which is almost, but never quite finished. Our daughter Anni, now 19, is teaching English in Turkey. Isaiah, our second born, is fully into his freshman year at a nearby boarding school which leaves us with an empty nest. I review fondly the faces of so many young people who have lived and worked with us: 21 names come to mind. You all know who you are, and wherever you live now, you are the backbone of the living, breathing life at South River. Thank you.

“Currently we are blessed to have three exceptional young people living on, and working with the land: Arthur Lerner, Emily Kellert, and David Fisher. This summer their fine organic produce was sold at the local outdoor market. Our root cellar is so overflowing with carrots, rutabagas, giant leeks, and potatoes.

“Miso production is in full swing under the steady management of Yukio Doyama, now in his fourth season with us. He is energetically assisted by Andy Mathey who lives above the miso shop. They both share a great love of drumming.

“The friendly voice you hear on the phone when you call is Robin Cole, administrative manager, UPS shipper, and valued friend for fifteen years.

“Meanwhile, Christian has been put out to pasture... Gaella Elwell.”

Photos show: Christian and Gaella Elwell. Robin Cole. Andy Mathey (in a vat of miso). Yukio Doyama (scooping miso).

Other photos in this issue show: (1) “Making miso in the nourishing tradition.” Six steps: Cooking with wood fire.

Inoculating the steamed grain with koji starter culture. Two days later, harvesting the koji by scraping it from wooden koji trays; stagger-stacked koji trays are in the background. Cooling the soybeans in the treading trough (also called mixing box) with a stainless-steel mixing hoe after they've been cooked by wood fire for 20 hours. Scooping up raw miso, after the cooked beans have been mashed (by treading underfoot) and mixed with the salted grain koji. Miso aging in wooden vats. (2) View from the east in the fall showing the miso shop and home surrounded trees and bushes. In color, the sumac bushes in the foreground are brilliant red. (3) Stephen Jannetta, wearing a white hat and surrounded by steam, removing steamed grain from the cauldron. (4) Six eight-ounce glass jars of the company's miso.

Talk with Christian Elwell. 2000. Jan. 9. The cooked soybeans are still mashed by treading them underfoot—except in the case of sweet white miso, where a mechanized grinder is used. The person doing the treading wears cotton socks, then a plastic legging, then another layer of cotton socks over that. The treading trough, which is rectangular and located on the floor, resembles the box used for mixing concrete; it was built by Richard Kluding and Thom Leonard in Ohio. Christian estimates that he has walked about 3,000 miles in soft soybeans.

3998. *River Currents: News from South River Miso Company (Conway, Massachusetts)*. 1998. South River Miso Company mission statement: Life is sacred. Food is sacred. Winter. p. 10. Dec.

• **Summary:** “South River Miso Company is dedicated to the health and well being of all those it serves.

“We strive to produce and distribute the highest quality organic, unpasteurized miso and other traditional foods with the conviction that wholesome food can be our best medicine.

“We honor miso for its strengthening and rejuvenating qualities and promote its use as part of a healthy diet.

“Our aim is to create a fair-minded, open-hearted learning environment within our organization and to serve each customer honestly, warmly, and effectively.

“Our hope is that South River Miso Company and those it serves may evolve together towards greater fulfillment, wholeness and peace.

“June 1998.”

3999. Gotoh, T.; Yamada, K.; Yin, H.; Ito, A.; Kataoka, T.; Dohi, K. 1998. Chemoprevention of N-nitroso N-methylurea-induced rat mammary carcinogenesis by soy foods or biochanin A. *Japanese J. of Cancer Research (Gann)* 89:137-142. *

• **Summary:** Diets containing either 10% soybeans or 10% miso reduced mammary tumor numbers (tumors/rat) by roughly 50%, although there was little effect on tumor

incidence (percentage of rats in each treatment group developing tumors).

4000. Nikkan Keizai Tsûshin-sha (Nikkan Keizai News Agency). 1998. Miso no shuyô-meka [Japan's largest miso manufacturing companies]. Tokyo, Japan. 1 p. [1 ref. Jap]
• **Summary:** This table ranks Japan's top fifty miso manufacturers in descending order of volume produced. For each company it gives the company name, prefecture where the company is located, and tonnes (metric tons) of miso produced in 1993, 1994, 1995, 1996, and 1997.

The top ten companies (with their output in tonnes) for 1997 and 1998 are: (1) Marukome 77,000 / 81,500 (they do not export any). (2) Hanamaruki 38,800 39,200 (they export to Westbrae, Canada). (3) Kanesa 27,300 / 27,800. (4) Marusan-ai 26,230 / 26,800 (they export to Eden Foods). (5) Miyasaka Jozo 19,080 / 18,900. (6) Hikari Miso 14,700 / 16,000. (7) Yamajirushi 15,200 / 15,100 (they export to San-J). (8) Fundôkin Shoyu 13,900 / 14,100. (9) Ichibiki 13,100 / 13,000. (10) Takeya 12,000 / 11,500.

Also: (11) Marudai 11,300 / 11,400. (13) Nagano Miso 9,500 / 9,450. (16) San Jirushi Jozo 8,750 / 1,700. (25) Sendai Miso Shoyu 4,900 / ? (they export to Westbrae).

The total amount of miso produced in Japan by all companies was as follows by year (in tonnes): 1993–561,259. 1994–540,390. 1995–539,427. 1996–542,077. 1997–542,238. 1998–548,750. Address: Japan.

4001. Sugawara, Etsuko; Yonekura, Y. 1998. Comparison of aroma components in five types of miso. *Nippon Shokuhin Kagaku Kogakkai-shi (J. of the Japanese Society for Food Science and Technology)* 45:323-29. [Jap]*
Address: Japan.

4002. Beta homu kyokai [Better Homes Association]. 1998. Kantan tezukuri miso tekisuto [Easy homemade miso handbook] Tokyo: Beta homu kyokai. 48 p. 21 cm. [Jap]*
Address: Japan.

4003. Burnham, Trudie. 1998. Innovative soy cooking. Freedom, California: The Crossing Press. 95 p. No index. 15 x 18 cm.

• **Summary:** Contents: Preface. Introduction. Appetizers, snacks, and side orders. Salads. Dressings and toppings. Main dishes. Beverages. Desserts and treats.

The introduction begins: “Let's face it. In a society like ours, obsessed with fast, low-fat food, tofu is the ultimate answer.” This is a “user-friendly guide to a soya-based vegetarian diet. Many recipes are vegan, or use a minimum of dairy foods.

The glossary of ingredients includes kelp, kudzu, lecithin, mirin, miso, nutritional yeast, oils (use expeller pressed), sea vegetables, seeds (for eating and sprouting),

slippery elm powder, soy milk, soy sauce, soysage, sweeteners, tahini, tempeh, tofu, umeboshi plums, vinegars.

“Missing egg salad: I invented this and word seemed to travel fast and wide, because I saw it in a California deli a year later with the same name.” Address: New Zealand.

4004. Hayashida, Y.; Nishimura, K.; Slaughter, J.C. 1998. The importance of the furanones HDMF and HEMF in the flavour profile of Japanese barley miso and their production during fermentation. *J. of the Science of Food and Agriculture (London)* 78:88-94. *

4005. Keuneke, Robin. 1998. Total breast health: The power food solution for protection and wellness. New York: Kensington Publishing Corp. *

• **Summary:** Contains over internationally inspired 125 recipes, incl. Tofu Cote D’Azur, and Dilled Salmon in Miso-Lemon Sauce.

4006. Miso fūmi no okazu: kono kaori ga tamaranai [Side dishes flavored with miso: Their fragrance never ends]. 1998. Tokyo: Shufunotomo-sha. 95 p. 26 cm. [Jap]* Address: Japan.

4007. Rinzler, Carol Ann. 1998. The healing power of soy: The enlightened person’s guide to nature’s wonder food. Rocklin, California: Prima Publishing. xiv + 194 p. Illust. Index. 24 cm. [119 endnotes]

• **Summary:** Contents: Preface. Introduction: Not your ordinary bean, the first soybeans (history), how to talk soy (glossary of soyfoods—miso, soybean oil, soy concentrates, soy flour, soy isolates, soy milk, soy “nuts,” soy sauce {shoyu, tamari, teriyaki}, tempeh, texturized soy protein {TSP}, tofu). 1. The nutritional wonder bean: Vitamins, minerals, proteins, fats, carbohydrates, fitting soy into your diet, summing up. 2. Something special in the bean: Hormones and people and plants, fabulous phytoestrogens, the safety of phytoestrogens, summing up. 3. Soy and your heart: Heart Disease and its victims, cholesterol and your heart, soy versus cholesterol, soy’s cholesterol busters, beyond cholesterol, summing up. 4. Soy, the cancer fighter: The statistics of cancer, diet and hormone-related cancers, the Asian experience, how soy fights cancer, is soy safe?, a practical guide to your personal war on cancer, summing up. 5. Building better bones with soy: Your hormones and your bones, the hormone dilemma, soy and your bones, getting the calcium you need, summing up. 6. Hot news about hot flashes: What a hot flash is, soy and hot flashes, other plants that may relieve hot flashes, vitamins, minerals and hot flashes, simple lifestyle changes, summing up. 7. Cooking with soy: The joy of soy, whole soybeans, tofu, tempeh, texturized soy protein (TSP), soy flour, soy milk, soy sauces, soybean oil, miso. Appendix A: Shopping for soy through the mail. Appendix B: Directory of soy

manufacturers. Appendix C: Directory of soy researchers whose studies are included in this book. Sources.

The author has written seventeen books, including *Nutrition for Dummies* (IDG) and *Estrogen and Breast Cancer* (Hunter House Books). A frequent contributor to publications such as *American Health*, *Woman’s Day*, and the *New York Times*, she lives in New York.

Note: Another quick, generic book about soy and good health by one who is not very familiar with the subject—though the footnotes show that she consulted many publications; nothing new. The history chapter is full of errors. Address: New York.

4008. Sinclair, Charles Gordon. comp. 1998. International dictionary of food and cooking. Chicago: Fitzroy Dearborn. 594 p. See p. 234. 24 cm. *

4009. Tohata, Asako. 1998. Tohata Asako no karada ni oishii miso no hon: misoshiru kara wafū no miso ryōri made miso no kenkō itadakimasu! [Tohata Asako’s book of miso that is tasty for the body: From miso soup to Japanese-style miso cookery. Let’s have good health with miso!]. Tokyo: Makino Shuppan. 79 p. Illust (color). 26 cm. Series: Makino Mukku Ryori Shirizu. [10+ ref. Jap]* Address: Japan.

4010. Wise, Victoria. 1998. The vegetarian table: Japan. San Francisco: Chronicle Books; London: Hi Marketing. 156 p. Illust. (color photos by Deborah Jones). 22 x 21 cm. Series: The Vegetarian Table.

• **Summary:** Contents: Introduction. Basic ingredients and seasonings for the Japanese table. 1. Appetizers and condiments. 2. Soups. 3. Rice. 4. Noodles. 5. Vegetables. 6. Sweets. Table of equivalents.

Ingredients include: Soybeans, soy sauce, tofu (incl. silken tofu, tofu puffs, grilled tofu), miso (red, white, yellow, brown, barley), fresh soybeans, dried soybeans (incl. black soybeans), soybean sprouts, freeze-dried tofu, soybean milk skin (yuba), and soybean curd pulp [okara]. Azuki beans, sea greens [sea vegetables incl. agar, kombu, nori, wakame], sesame seeds, umeboshi (pickled plums), wasabi, saké.

Contains too many soy-related recipes to list them all. The color photos and food styling are superb—perhaps the most beautiful we have ever seen in a cookbook.

Note: Other books in this series (all published by Chronicle Books) are: France, India, Italy, Mexico, and North Africa. Address: Oakland, California.

4011. Miso Health Building Committee. 1998? What’s miso? (Leaflet). Tokyo, Japan. 6 panels. Front and back. Each panel: 21 x 10 cm. [Eng]

• **Summary:** Contents: Types and classification of miso. How miso is made. Small color photos of 13 types of rice miso, one type of soybean miso (*Tokai mame miso*), and 3 types of barley miso. Miso's value as a health food: Lowers blood pressure, increases survival rate of mucous membrane interstitial cells after X-rays. Miso in Japan. Recipes for using miso. • **Summary:** A color brochure describing, in English and Japanese, the company's main varieties of miso and instant miso-soup. Color photos show: (1) A red lacquerware bowl of miso soup. (2) Miso Dengaku. (3) Grilled salmon with miso. (4) Miso stew. (5) All 10 products. Address: 2-4-5 Nogata, Nakano-ku, Tokyo, Japan. Phone: 03-3385-2121.

4013. Broadbent, Gretchen Priest. 1999. Pioneering work with tofu in the USA and Japan, 1946 to Aug. 1971. Part I (Interview). *SoyaScan Notes*. Jan. 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Gretchen Priest was born on 29 Oct. 1946 in Boston, Massachusetts. She grew up in Marblehead, Massachusetts—which is located on the Atlantic Ocean 15 miles northeast of Boston. While in high school there she decided (entirely on her own, for reasons she no longer remembers) to become a vegetarian—even though she had never heard the word “vegetarian.” She also began a lifelong interest in art. In Sept. 1964 she started to attend Goddard College (in Plainfield, Vermont) for one semester and was almost immediately introduced to the teachings of Kirpal Singh, an Indian Sikh master. “I went through a spiritual revolution, along with many friends.” She was very sensitive and began to have spiritual experiences. At Goddard she met her husband to be, Jeffrey Broadbent, in an art class. Art is Gretchen's passion. They both found the first day of class boring, so separately they snuck out. Gretchen found the paints in the back of the room and, before they had met or spoken to each other, they ended up painting each other faces. When the teacher saw them after the class he exclaimed, “Now that's art!” At that point, Jeffrey and Gretchen introduced themselves to one another.

After the 3 months, Goddard had a work term. Gretchen went to California and experimented with psychedelics. Now all she wanted was to live a spiritual life.

Returning to Vermont in the early summer of 1965, she entered the Kirpal Ashram in Calais (pronounced KAL-us), Vermont. Only one person was living and meditating there at the time, Nina Gitana, age 37, the caretaker. The ashram was part of land and a trust that had been donated to Kirpal Singh for use as a retreat for his practices and teaching. Vegetarianism was a very important part of Kirpal Singh's

teachings, so Nina was a vegetarian. But she did not know much about preparing vegetarian foods; a diet of fruits and juices was not giving her the strength she needed. The day Gretchen arrived, Nina left to go to Boston, where she met Michio Kushi (and maybe George Ohsawa) and began to study macrobiotics. When she returned to the ashram, she taught Gretchen what she had learned and they both began to follow a vegetarian macrobiotic diet. It felt good, and Nina's strength returned. Gretchen soon became the cook. She did not use any macrobiotic recipe books, though she did study a book of macrobiotic principles. Their first basic foods included brown rice and miso, but Gretchen also prepared lots of chapatis and brown rice croquettes (regular or deep-fried). During the cold months she cooked for the two of them (and often a neighbor), but during the summer she cooked and cared for 15-20 people. It was very difficult to get macrobiotic or natural foods in those days, so they would periodically make the 5-hour drive to buy food in Boston. They would buy most of their foods at Michio's house (where they were stored in little bags on plain wooden shelves), and in this way Gretchen came to know Michio and Aveline. But they would go to Boston's Chinatown to buy tofu; it was considered a very special treat at the ashram, served only 3-4 times a year. Considered an excellent source of protein and easy to digest, it quickly disappeared—in part since it was very perishable, but also because it balanced the very *yang* daily diet. One winter Gretchen moved to Boston to earn money (odd jobs, including work at a hospital) and study macrobiotics while Nina stayed at the freezing cold ashram. Michio Kushi gave a special series of Sunday classes to teach macrobiotic philosophy to Anne Lynn, her husband, one other person, and Gretchen; these were not cooking classes. Michio and Aveline visited the ashram for a day several times. On one visit, Michio brought his father and mother.

In 1971, after 6 years at Kirpal Ashram, Gretchen left to marry Jeffrey Broadbent. Jeffrey had been practicing Zen meditation for several years as a disciple of Suzuki roshi at Tassajara Zen Mountain Center, deep in the Santa Lucia Mountains south of Carmel Valley, California. One of Jeffrey's close friends and roommate at Tassajara was William Shurtleff, who was also a disciple of Suzuki Roshi. While he was at Tassajara, Katagiri roshi encouraged Jeffrey to go back to college and finish his education. So he enrolled at the University of California at Berkeley, where he studied Chinese language. At some point he switched from Chinese to Japanese at Suzuki roshi's recommendation. Then Jeffrey applied for U.C. Berkeley's Junior Year Abroad program in Japan. Right after he was accepted, he wrote Gretchen at the Vermont ashram: “I'm going to Japan. Please marry me and let's go together.” She accepted. Jeffrey and Gretchen stayed together for a month and a half at the Berkeley Zendo, then were married

on 13 June 1971 at the San Francisco Zen Center by Shunryu Suzuki roshi in a large ceremony.

Ten days after the marriage ceremony, Jeffrey and Gretchen arrived in Japan. He had been enrolled in the intensive Japanese language course for foreigners at International Christian University (ICU) in Mitaka, just east of Tokyo. Before the school year started, they participated in the ICU summer program, where all the new students traveled to the Kumano-Nachi shrine and Nachi waterfall at the southeastern tip of the Wakayama peninsula. The program was designed to introduce the foreigners to Japanese language and culture.

Soon after arriving at Nachi, they wrote William Shurtleff, who was now taking an intensive Japanese language course at the *Nihongo Gakko* (Japanese Language School) in Kyoto and living in the home of one of his Japanese teachers. They invited him to visit them for a week at Nachi when his school semester was finished. On 1 August 1971 Shurtleff hitchhiked south and they had a nice reunion, practicing meditation together and enjoying the beautiful mountain scenery for about a week. Then Jeffrey and Gretchen went to ICU near Tokyo and Shurtleff returned to Kyoto.

At ICU, Jeffrey and Gretchen rented a small and austere Japanese-style apartment located just off campus, about 10 minutes walk away, c/o Yoda Yoshiko, Koganei-shi, Higashi-cho 1-25-13, Tokyo, 184. The two-room apartment consisted of a small kitchen (with two table-top propane burners and a sink, but no refrigerator), a minuscule toilet chamber, and a combination living room / bedroom (6-8 tatami mats in size). Outside the sliding window was a tiny porch for airing bedding and drying clothes. Jeffrey recalls that there was one small kerosene heater in the apartment; it was used only on very cold days—to save money. But Gretchen recalls that there was no heater at all. Continued. Address: RFD 1, Box 100, East Calais, Vermont 05650. Phone: 802-456-7091.

4014. Wasserman, Debra; Mangels, Reed. 1999. *Simply vegan: Quick vegetarian meals*. 3rd ed. Baltimore, Maryland: Vegetarian Resource Group. 224 p. Illust. General index. Index of tables. Jan. 23 cm. 1st ed. March 1991. 2nd ed. June 1995. [29 ref]

• **Summary:** More than a cookbook (with over 160 vegan recipes that can be prepared quickly), this is a guide to a non-violent, environmentally sound, humane life-style. Contents: Acknowledgments. Definition of vegan. Foreword. Time-saving cooking suggestions: Microwave cooking. Introducing fat as a percentage of daily value. Sample menus: Menu analysis. Top recipes for calcium and vitamin C. Top recipes for iron. Recipes: Beverages, breakfasts, sandwiches, snacks, salads, soups, side dishes, main dishes (pasta dishes), soy products (tempeh dishes, tofu dishes), desserts. Food definitions. Herbs and spices.

Vegan nutrition: Introduction, nutrition is a science, recommendations for vegans, calories, weight gain, and weight loss, protein, fat, calcium, iron, zinc, vitamin D, riboflavin and vitamin B-6, vitamin B-12, sources of vitamins and minerals, pregnancy and the vegan diet, lactation and the vegan diet, feeding vegan kids, nutrition glossary, recommended reading list. Cruelty-free shopping by mail: Vegan food through the mail, cruelty-free cosmetics, environmentally sound household products, clothing containing no animal products, personal care vegan products, educational materials, vegan books and cookbooks, vegetarian groups and internet resources. The vegetarian resource group. Address: Vegetarian Resource Group, P.O. Box 1463, Baltimore, Maryland 21203. Phone: 301-366-8343.

4015. Jack, Alex. 1999. *Let food be thy medicine: 750 scientific studies, holistic reports, and personal accounts showing the physical, mental, and environmental benefits of whole foods*. 3rd ed. Becket, Massachusetts: One Peaceful World Press. 304 p. Index. 23 cm. [8 ref]

• **Summary:** This book, organized alphabetically by subject, is a very original and creative source of information, with hundreds of interesting bibliographic references. The author believes in a natural, whole-foods diet. Includes the following subjects: Alternative medicine, amasake (amazake), Asia Diet Pyramid, azuki beans, bovine growth hormone, cancer, cholesterol, coffee, complex carbohydrates, dairy food, estrogen, evolution, exercise and fitness, fats, fiber, genetically engineered food, genetic model of health and disease, genistein, global warming, heart disease, hiziki, hunza diet, isoflavones, Japanese diet, kombu, kuzu, lignans, longevity, macrobiotics, Mad Cow Disease, meat, menopause, microwave cooking, miso, mochi, natto, nori, osteoporosis, Paleolithic diet, phytochemicals, phytoestrogens, polyps, potatoes, Price-Weston, prostate cancer, protein, rice, Schweitzer-Dr. Albert, sea vegetables, seitan, sesame, shoyu, soy foods, tempeh, tofu, umeboshi plum, vegans, vegetarians, wakame, wartime restricted (diets, incl. World War I and II), whole grains. Resources. About the author. Address: Box 10, Becket, Massachusetts 01223. Phone: (413) 623-5742.

• **Summary:** Recipes using eight soyfoods to make one Italian dinner—a veritable soy feast. The recipes are: Herb pesto (with white miso, dairy-free). Soy minestrone (with edamame). Sicilian stuffed squash (with TVP flakes and grated soy Parmesan cheese). Pasta al forno (with fat-free Italian sausage, and white miso). Chocolate almondi biscotti (with soy flour). Italian ‘cheese’ pie (with extra-firm tofu and soy margarine). Address: Food writer, New York, NY.

4022. Simonds, Nina. 1999. *A spoonful of ginger: Irresistible, health-giving recipes from Asian kitchens*. New York, NY: Alfred A. Knopf. xii + 322 p. April. Illust. Index. 24 x 21 cm. [53 ref]

• **Summary:** This beautiful hardcover book and cookbook, printed on glossy paper with many color and black-and-white photos, looks at food in two ways: As medicine, and as the source of delicious recipes. The Asian holistic approach is relaxed and non-rigid; it emphasizes balance. Soyfoods appear throughout. Tofu is used to “increase body energy, produce fluids, and lubricate the system. It is said to have yin, or cooling, properties” (p. 23). Miso chicken soup with snow peas and tofu (p. 34). Grilled miso fish fillets (p. 66). Pan-seared halibut with garlicky black bean sauce (“Seasonings: 3 tablespoons fermented or salted black beans, rinsed, drained, and minced, 2 tablespoons minced garlic, 2 tablespoons minced fresh ginger,... p. 71; “Black soybeans have been used by the Chinese for medicinal purposes for over 2,000 years”). Baked black bean shrimp (with fermented black [soy] beans, rinsed and drained, ginger, garlic, and dried chile [chili] flakes, p. 75). Stir-fried saucy shrimp (with sweet bean sauce or *jiang*, one of the earliest Chinese seasonings; if unavailable, substitute hoisin sauce, p. 81). Grilled hoisin scallops (with ½ cup hoisin sauce, p. 83). Spicy grilled squid with warm greens (with ½ cup hoisin sauce, p. 86-87). Broccoli or cauliflower with a soy-lemon dressing (p. 173). Grilled leeks in a garlic-soy dressing (p. 174). Grilled wild mushrooms with a teriyaki dressing (p. 178). Black bean acorn squash (with fermented black [soy] beans. Describes how to make “black bean sauce,” p. 179).

One chapter, titled “Soybeans and tofu” (p. 192-215), begins with a discussion of the work of Dr. Albert Leung, author of various books on Chinese herbs and food, and creator of a computerized database on Chinese herbal medicine for the National Cancer Institute. “Like a growing number of doctors, Dr. Leung feels strongly that an integrated approach should be taken in the treatment of many diseases, one that draws from the strengths of both conventional and alternative therapies. He also concurs with Henry Lu that fortifying the immune system is critical to good health. ‘Our immune system is the key to health and longevity and there are many factors that throw off our yin/yang balance,’ Dr. Leung says. ‘When this happens, Traditional Chinese Medicine often uses herbal tonics and food to help restore the balance.’

“Tofu is such a food. Chinese doctors classify its nature as cool and sweet. It is credited with clearing heat from the body, detoxifying the system, and strengthening the spleen and stomach.”

A full-page color photo (p. 192) shows tempeh being fried. Simonds notes that the earliest known recorded use of

black soybeans dates back to the middle of the eighth century.

A table titled “Soybeans and their byproducts” (p. 196) lists ten products, how each is used, and how long they will stay fresh in a refrigerator. The foods are: Fresh soybeans [as a green vegetable appetizer], soybean sprouts, miso, soybean milk, silken tofu, soft tofu, firm tofu, extra-firm tofu, 5-spice pressed tofu, and tempeh. Recipes are from many Asian countries”: Japanese-style silken tofu. Soybean sprouts and leeks in hot chile sauce. Rainbow salad with spicy peanut dressing (and tofu). Spicy garlic bean curd noodles. Vegetarian roll-ups (with tofu). Fragrant steamed pearl balls (with tofu and glutinous rice). Spicy ma po tofu. Cantonese style tofu in black bean sauce (incl. fermented black beans, garlic, ginger and hot chile paste). Vegetarian kung pao with broccoli and peanuts (with tofu. Note: Kung pao is a style of food preparation associated with Szechuan and Hunan). Curried tofu. Braised cinnamon tofu. Simmered tofu with black mushrooms. Fried tempeh with sweet and sour sauce. Spicy stir-fried tempeh with basil. Ginger teriyaki tempeh.

Also: Chicken-black bean brown rice (with fermented black [soy] beans, garlic, and fresh ginger, p. 231; Dr. Albert Leung says that making fermented black beans is a complicated process, in which small black soybeans are first soaked in water with mulberry leaves and wormwood herb, then they are fermented with salt). Vegetarian pad thai (with tofu, p. 245). Almond soy jelly with litchees and melon (with soy milk, p. 266). Two-spice vanilla tapioca pudding (with soy milk, p. 269; Soy milk lubricates the body, clears the lungs, and is often prescribed for urinary disorders and constipation). Coconut rice pudding with berries (with soy milk, p. 272). Address: Salem, Massachusetts.

4023. Product Name: Organic Miso Tamari.
Manufacturer’s Name: American Miso Co., Inc.
Manufacturer’s Address: 4225 Maple Creek Rd., Rutherfordton, NC 28139. Phone: 828-287-2940.
Date of Introduction: 1999. May.
Wt/Vol., Packaging, Price: 5 oz or 10 oz bottle.
How Stored: Refrigerated.
New Product–Documentation: Talk with John Belleme. 1999. Nov. 18. This product was first sold in about May 1999, but it did not appear in the Great Eastern Sun catalog until November.

4024. Nilsen, Laura. 1999. The best to soy. *Veggie Life (Concord, California)*. May. p. 22-28.

• **Summary:** Their “Cooking with Soy” department debuted in May 1996. This article begins: “Soy is hot. Like a cult movie that eventually shows up on prime time TV, soy has become a mainstream American commodity, an ingredient in everything from hot dogs to apple pie... The boom goes on, and for good reasons–Nutrition and taste; versatility and

economy... It’s no fairy tale–soy is a magic bean worth swapping a cow for.” This article is a collection of recipes from other sources, or from back issues of *Veggie Life*. Address: Food editor, *Veggie Life*.

4025. *River Currents: News from South River Miso Company (Conway, Massachusetts)*. 1999. Have you tried our tamari? Spring. p. 1.

• **Summary:** Miso tamari is the precious, rich liquid that collects in large pools in a vat of miso. “It takes over 2,000 pounds of miso to yield about 5 gallons of miso tamari. Our unpasteurized miso tamari is like liquid gold!... Because of its limited supply, this miso tamari is not commercially available except by direct purchase from South River. We ship miso tamari in sturdy plastic jugs but suggest you transfer it to glass. A recycled wine bottle makes an elegant container for this wonderful treasure.”

4026. *River Currents: News from South River Miso Company (Conway, Massachusetts)*. 1999. South River Miso Company: Price list–March 1, 1999. Spring. p. 5.

• **Summary:** Varieties of miso—all certified organic: (1) Three year dark miso (aged for a minimum of three full summer seasons): Hearty brown rice (with black soybeans & brown rice), Three-year barley, Black soy barley, Chick pea barley (with barley & chick peas). (2) One year light miso (aged for a minimum of one summer or three months): Sweet tasting brown rice, Chick pea, Azuki bean (with brown rice & azuki beans), Golden millet (with millet and soybeans). Special miso: Dandelion leek, Sweet white miso. Also: Miso tamari, Brown rice koji, Miso samplers.

Beautiful color labels for the 16 oz. package of eight of these miso varieties were sent with the newsletter by Robin Cole of South River.

4027. Schinner, Miyoko Nishimoto. 1999. Japanese cooking: Contemporary & traditional–Simple, delicious, and vegan. Summertown, Tennessee: Book Publishing Co. 176 p. Illust. Index. 21 cm.

• **Summary:** Contents: Introduction (incl. Japanese attitudes towards nutrition, vegetarianism and animal rights, the recipes, the Japanese meal). Sample menus (by season). Glossary: Ingredients, kitchen concepts, and tools. Rice dishes. Soups and stews. Cooking with tofu. Fried dishes. Salads and cold vegetables. Noodles. Meals in a pot. Stewed and braised dishes. Meals in a bowl. Everyday favorites. Nouvelle Japanese cuisine.

Terms in the Glossary include: Abura-age, agar agar, atsu-age, azuki, fu (made from wheat gluten), goma (sesame seeds), goma-dofu (a tofu-like cake made from sesame butter), hijiki, Inari-zushi (sushi), kanten, konbu, kuzu & kuzu-ko, miso, mochi, natto, nori, okara, sesame oil (goma abura), shoyu, soba, soy sauce, tofu (“Perhaps the most misunderstood food in Japan... American might call it bland;

the Japanese prefer to think of it as delicate in flavor”), umeboshi, wakame, yaki-dofu, yuba.

This vegan cookbook is filled with many soy-related recipes, both traditional and new. Examples of new: “Fishy Tempura Tempeh. Crispy Fried Tempeh (Kara-Age).

“Trying to dine out in a strictly vegan fashion in Japan can present challenges. Although dairy products are not found in traditional Japanese cuisine, fish-based stocks appear in a range of dishes from appetizers to soups to entrees... My advice to vegan or vegetarian visitors to Japan: find a temple or restaurant that serves traditional *kaiseki*-style *shojin-ryori* (Buddhist vegetarian cooking)—and splurge big time. You won’t regret it” (p. 10).

On the rear cover is a biographical sketch of Miyoko. “She was born in Yokohama, Japan, and graduated from St. John’s college in Maryland. Her bilingual bicultural background has endowed her with the creativity and originality of the West and the aesthetic sense of the East.” She has been a vegetarian since age 12. Address: Owner, Now and Zen Bakery and Vegetarian Restaurant, San Francisco.

4028. Shurtleff, William; Aoyagi, Akiko. 1999. The book of tofu. 2nd ed. Revised. Berkeley, California: Ten Speed Press. 336 p. May. Illust. by Akiko Aoyagi Shurtleff. Index. 28 cm. [321 ref]

• **Summary:** This edition contains a completely new “Appendix B—Directory of Tofu Makers” (p. 313-316, updated to 1 Aug. 1998). The page “About the Authors” (autobiographical) has been updated, and the original photograph has been replaced with two more recent ones—reflecting the fact that Bill and Akiko separated in Nov. 1993 and their marriage ended in May 1995.

After the first printing in Oct. 1998, the Preface was quite extensively revised (but not updated) to include more about how this book came into being (early dates and names), including the important contributions on Jeffrey and Gretchen Broadbent, and of Nahum and Beverly Stiskin. These Preface changes first appeared in the second printing of May 1999.

On page 336 is “The Best of Vegetarian Cooking from Ten Speed Press” (descriptions of eight cookbooks, with price and ISBN). The inside rear cover has been updated, and now includes current information about SoyaScan, the unique computerized database produced by Soyfoods Center. This database now contains more than 55,000 records from 1100 B.C. to the present, and more than 73% of all records have a summary / abstract averaging 128 words in length. A description of the four different types of records (published documents, commercial soy products, original interviews and overviews, and unpublished archival documents), and the number of each type, is given.

The front and rear covers, title page, table of contents, and the first page of each section have been redesigned to

give the book a much more contemporary look. Still contains 500 vegetarian recipes—both western and eastern style.

Ten Speed Press gave this book a new ISBN: 1-58009-013-8. Yet despite the many changes described above, the authors preferred not to have this called a “new edition” or “revised edition.” Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

4029. **Product Name:** Miso Tamari (Unpasteurized) [Dark, or Light].

Manufacturer’s Name: South River Miso Co. Inc.

Manufacturer’s Address: South River Farm, Conway, MA 01341. Phone: (413) 369-4057.

Date of Introduction: 1999. May.

Wt/Vol., Packaging, Price: 1 quart bottle.

How Stored: Refrigerated.

New Product—Documentation: River Currents: News from South River Miso Company (Massachusetts). 1999. Spring. p. 1. “Have you tried our tamari.”

Talk with lady who calls from Vermont. 1999. Nov. 18. She has a bottle of this product and loves it. It also appears in the most recent South River Miso Co. newsletter under “Holiday gift pack No. 3”—which shows it is now available in pints. The label (photocopied black on white) states: “Collected from the vats of South River Miso. Fermented from deep well water, brown rice, chick peas or soybeans, sun-dried sea salt, and koji culture. Aged in wood for a minimum of 3 months or one summer. Certified organic.” Now Christian is making light and dark miso tamari.

4030. Gorman, Christine. 1999. The joy of soy: Worried about high cholesterol? This versatile bean may be just what the doctor ordered. *Time*. June 7. p. 68-69.

• **Summary:** Begins with the story of a woman, age 67, who volunteered for a study to determine whether or not drinking a soy protein shake could lower blood cholesterol. She was delighted when her cholesterol level fell from 245 mg/dl to 205 mg/dl, and her LDL or “bad cholesterol” level fell from 170 mg/dl to 130 mg/dl. Now that the study is over, she still sprinkled soy protein on her breakfast and continues to see results—as more than 25 scientific studies have shown. Every little bit counts; a 1% drop in total cholesterol leads to a 2% drop in the risk of developing heart disease. For best results consume soy in minimally processed forms. Many Americans find boiled soybeans (edamame) to be delicious. Tofu is good if you find the right seasoning. Soy milk is nice on cereal but will ruin a cup of coffee. Miso soup contains quite a bit of salt. Soy powders (soy protein isolates) can be added to shakes or sprinkled on cereal. Soy isoflavone supplements are best avoided.

Many Americans are discovering that soybeans aren’t just for vegetarians and livestock anymore. They may be able to fight cancer and build healthy bones. Later this

summer or fall the FDA is expected to put soy on its short list of foods (like whole grains, and fiber-containing fruits and vegetables) that may actually reduce one's risk of heart disease.

Scientists are still not sure why soy lowers cholesterol levels. It may be the isoflavones or the soy protein or a combination of both.

In Japan, the incidence of breast cancer is much lower than in the USA and other industrialized countries. One reason may be the soy in the Japanese diet; the isoflavones in soy may act as antihormones, like the drug tamoxifen. Yet this is not yet clear. In the worst case, soy might even negate the protective effects of tamoxifen.

Photos show: Two large pods of edamame. A cake of tofu which is "a great source of nutrients." Japanese consume more than 50 lb of tofu per person per year.

4034. Kikkoman Corporation. 1999. Annual report 1998. 339 Noda, Noda-shi, Chiba 278, Japan. 30 p. 28 cm. [Eng]
 • **Summary:** The information in this English-language annual report is current as of April 1999. Contents: Financial highlights. A message from the president

(Yuzaburo Mogi): The year in review, dining pleasure and convenience, serving a global market, a source of variety, seeking new growth opportunities, promoting food culture. Global operations: The Americas, Europe, Asia and Oceania, Japan. Review of operations: Soy sauce, soy sauce derivative products, Del Monte, sake and wine. Research & development. Financial section: Consolidated balance sheets, etc. Corporate history (chronology from April 1925 to October 1998). Global network (directory of Kikkoman names, addresses, and phone numbers worldwide). Board of directors and officers. Corporate data.

Net sales were up slightly (7.1%), but net income was down for the second year in a row. Overseas sales (excluding exports from Japan) grew 15.8%, and have grown dramatically each year since 1994 (p. 16). In 1994 overseas sales accounted for about 15% of consolidated net sales; in 1998 about 28%. And operating income generated overseas accounted for 51% of Kikkoman's consolidated operating income.

In 1998 Kikkoman released *Akadare-to-Kurodare*, a steak dipping sauce based on a blend of their popular *Akadare* (miso based) and *Kurodare* (soy sauce based) dipping sauces.

"Serving a global market: In June 1998, Kikkoman Foods, Inc., our first overseas plant, celebrated 25 years of operation, thus marking a major milestone for our international activities. Over the past quarter century, the production capacity of the Kikkoman Foods plant—located in Wisconsin—has expanded more than tenfold. To further augment capacity, in October we commenced operations at our second plant in the United States, in Folsom, California, which is conveniently located near large markets on the West Coast. Similarly, in Europe, we raised the annual production capacity of our plant in the Netherlands to 5,000 kiloliters. Following these additions, total production of soy sauce and its derivative products at our overseas plants surpassed 100,000 kiloliters in 1998. This is approximately the same as the production capacity of the second largest soy sauce manufacturer in Japan."

Kikkoman's share of the soy sauce market in Japan is almost 3 times as large as that of its nearest competitor.

The Americas: On 6 Oct. 1998 Kikkoman had the formal opening of its second U.S. soy sauce manufacturing plant in Folsom, California. The 210,000 square meter facility was built at a cost of US\$46 million and has an initial soy sauce production capacity of 10,000 liters per year. The plant began operating in April 1998 and shipments of soy sauce started in October. The Kikkoman plant in Walworth, Wisconsin, is now approaching its annual soy sauce production capacity of 80,000 kiloliters.

Color photos show: Yuzaburo Mogi (president and CEO). The opening ceremony and an outside view of the plant in Folsom, California. Most of the company's products (p. 8-13). Address: Noda, Japan.

4035. Fukami, Megumi. 1999. Re: The miso industry and market in the United States. Letter to William Shurtleff at Soyfoods Center, July 26. 9 p.

• **Summary:** 1998 sales volume of miso in the USA is estimated to be 6,100 to 6,600 metric tons (tonnes). She divides this into three parts: the Asian market, commercial uses, and the non-Asian (Caucasian) market. The Asian market is 4,300 tonnes or 70.5% of the total, expected to grow to 4,650 tonnes in the year 2000. Commercial uses is 800 tonnes, expected to grow to 865 tonnes in the year 2000. The non-Asian market is 1,500 tonnes. Thus the grand total in 1998 is 6,100 to 6,600 tonnes.

Health Focus data estimates that in 1998 about 24% of all Americans were soybean consumers, but this is predicted to grow to 30-50% of the population. Or, the non-Asian market is predicted to grow by 10-15% according to predictions by American Miso Co. and Miyako Oriental Foods.

In the year 2005, the Asian market is predicted to grow to 5,934 tonnes, and the commercial market to 1,052 tonnes. In an attempt to predict the non-Asian market in the year 2005, Megumi gives four possible scenarios, with a resulting figure for each. These figures are: 3,136 tonnes, 2,553 to 3,829 tonnes, 2,915 tonnes, and 3,524 to 5,287 tonnes. Thus the total for non-Asian market is 3,000 to 5,000 tonnes and the grand total for 2005 is 10,000 to 12,000 tonnes.

Megumi's web site is www.rny2000.com/megumi. Address: New York City.

4036. Seemo (H. Shapira). 1999. Re: Dakini Health Foods Pvt. Ltd. recently moved into a new factory in Pune/Puna, India. Letter to William Shurtleff at Soyfoods Center, July 29. 1 p. Typed, without signature on letterhead.

• **Summary:** Seemo (Mr. H. Shapira from Israel), Kairava (Mrs. J. Spaelstra from the Netherlands), and the "Dakini crew" have been "intensively busy setting up our factory." They raised money through loans, brought in a new partner, got all the required government approvals, bought a plot of land, "navigated between impossible contradicting rules and regulations and corrupt officials." Then, with the help of an architect, they put up a 6,000 square foot building. They dug the first foundation in May 1998 and moved in in Feb. 1999. The process has been frustrating at times. To get an electrical connection, for example, took months, involved hundreds of signed documents, and "thousands of dollars in baksheeshes" [bribes].

They set up a pressure cooker plant for making tofu, first tested it on 17 July 1999, and "got a huge fantastic delicious cake of tofu." They plan to do a "soft launch" on Aug. 2 to some hotels, restaurants, institutions, etc., while getting their packaging systems ready. They plan to start

selling to the retail trade in about two months. Their tofu production capacity is now about 200-400 kg/day.

"All this time we kept our little incubator busy supplying a small but loyal and growing clientele about 10-30 kg of tempeh weekly." Their new incubation room (12 by 11 feet) started operation today, with the first 15 kg batch of tempeh. They estimate a capacity of 60-70 kg maximum and are planning to start with 20-25 kg batches. They also have new clients waiting. Le Meridian in Pune has already put tempeh on their buffet, and will soon include it on their menu; now they want tofu as well! "It's a great adventure." Address: Dakini Health Foods Pvt. Ltd., S.N. 33, Bhoiwasti, Keshavnagar, Mundhwa, Pune/Puna 411 036, India. Phone: +91 20-613985.

• **Summary:** Contents: Introduction. Soy industrialism. The industrial products. Global soy fights. The most recent incarnation: Spliced soy. Contains six illustrations from *The Book of Tofu*, by Shurtleff and Aoyagi. Address: Editor, Whole Earth, California. Phone: 415/256-2800.

4039. Belleme, John. 1999. The story of how the Oak Feed Miso, Inc. was established, and its relationship to the Erewhon Miso Co. Part I. 1943 to 1978 (Interview). *SoyaScan Notes*. Aug. 22. Conducted by William Shurtleff of Soyfoods Center. With updates in Nov. 1999.

• **Summary:** Without John Belleme's perseverance and determination, the American Miso Co. would almost certainly never have come to be.

John was born on 3 Jan. 1943 in Union City, New Jersey—right across the Hudson River from the Empire State Building. His father died when he was young, so he and his brothers and sisters were raised by their mother. Years later John found that he was dyslexic—but in school this undiagnosed dyslexia caused him many problems and great frustration. He failed first, second, and third grades, so he was much older than his classmates. The frustration sent him to reform school at age 13½ and at age 14 he was "kicked out of New Jersey." His mother moved the family to Miami, Florida. He was old enough to drive a full-sized motor cycle to the sixth grade. He managed to graduate from high school (just short of age 21) in Miami, went to junior college in Miami for two years, then won a scholarship to the University of Miami. He had liked biology, science, and research since age nine, so once he settled down he became a good student—though because of dyslexia he could barely read or write when he started

college. In the mid-1970s he graduated from the University of Miami after two years with high grades in science, and got a job at the Veteran's Administration (VA) hospital in downtown Miami. He was put on one of the first teams in the United States that used and did research using a Phillips electron microscope. Soon they were doing pioneering research. Soon John was quickly promoted to the position of research biologist, a title usually reserved for those with a PhD degree. Soon the team's research was being published in scientific journals. "It was very exciting." This job, which paid very good money, was mostly a photography job and the hospital had a huge, state-of-the-art darkroom. John worked with an amazing older man from Germany, who required him to carry a camera everywhere he went and to shoot and print his photos as a way of developing his photographic skills. Before long John was a very skilled photographer—and electron microscopist.

But after a while he was transferred to a chemotherapy, a job which he disliked. So he started graduate school to be a school psychologist—and first realized that he had dyslexia.

Sandy Pukel (pronounced pyu-KEL) was the center of a small but growing community of people interested in macrobiotics and natural foods in Coconut Grove, a suburb of Miami. Sandy had a tiny food store. John was with a girl who asked him to buy her some foods at this store. Before long, he was a regular shopper. Then he started to get interested in macrobiotics, and before long he found himself doing volunteer work at the little store on weekends. Sandy suggested that, to study macrobiotics in depth, he should go to Boston and study with Michio Kushi. After attending a few of Sandy's macrobiotic classes in Coconut Grove, John quit his VA job and left for Boston.

1976 July 4—John arrives in Boston and starts to live at the macrobiotic study house of Ken and Anne Burns. John wrote in 1987 that he "stayed for what was to be one of the most exciting years of my life." Ken is an exceptional teacher, and the house has a *dojo* atmosphere—like that of a martial arts practice place or Zen monastery. The temperature is kept at 40°F during the winter, and life is spare but rich and deep. Through Ken, John and Jan got very interested in wild foods, and planned to publish a book on the subject. By the fall of 1976 John is interested in miso. He had read *The Book of Miso* by Shurtleff and Aoyagi and on Nov. 17 he attends an afternoon miso class and workshop they conduct at the Burnses' house. John is intrigued by the romance of going to Japan to learn how to do something. After the workshop he decides that he wants to travel to Japan, learn all he can about making miso in the traditional way, then come back to America and help to start a miso factory. John recalls: "I wanted to go to Japan and bring something back. I was going to do this or die."

After a year in Boston, John worked at Harvard Medical School for a while. Then he and Frank and Phyllis Head drove to Mexico in Frank's van with the idea of teaching the

Mexican people about macrobiotics—with whole grain tortillas, etc. Living in a little village in rural Mexico in a house with no electricity and no running water, they managed to tough it out for one summer. Then multiple scorpion bites and general hardship drove them back to America. From Frank's father's estate in Texas, John phoned Sandy, who offered him a job.

1978—John had heard Michio Kushi talk about starting a shoyu factory in America. Michio hoped to involve Sendai Miso Shoyu Co., Erewhon, and some Oak Feed people such as Sandy Pukel and some of Sandy's investor friends. One day John—who was still a pretty small man on the totem pole—he said to Sandy, "Let's start a miso factory in America—rather than a shoyu factory." He then explained his idea about studying miso in Japan. Sandy's response was "Good! Michio and I have been wanting to do that for a long time too." John then started to take Japanese language lessons from Berlitz. Sandy established an Oak Feed Miso account on which John could write checks to pay for these lessons, for his travels related to miso in the USA, and for legal fees to form a corporation, etc. Sandy's main concern was running the Oak Feed Restaurant next to the store.

1978 Aug. 6—William Shurtleff is in Miami, Florida, visiting Robert Brooks and Mary Pung of Swan Foods, a soyfoods manufacturer. He presents a slide show (2-3 blocks from Oak Feed Store) on miso at which John Belleme, Sandy Pukel and one other person are present.

1978—Various groups come together in an attempt to start a miso company in America. The "Oak Feed group" initially consists of Sandy Pukel of Oak Feed Co., John and Jan Belleme, and a few other investors. The "Erewhon group" was composed of Michio and Aveline Kushi, Mitoku, Sendai Miso-Shoyu Co., and a few people from Erewhon. Michio communicated with the Japanese members of the "Erewhon group" (Mitoku, Sendai) by phone; they never attended meetings.

1978 Dec.—The Oak Feed and Erewhon groups meet shortly before Christmas at Michio and Aveline's home on 62 Buckminster Rd., Brookline (Boston), Massachusetts. Those present were Michio Kushi, Sandy Pukel, and John Belleme. They begin discussions about starting the "Erewhon Miso Co." Everybody agreed on that company name. John recalls: "It couldn't have been called anything else."

What was the need for a miso company in America? First, they wanted to have unpasteurized miso. All the miso being imported by Erewhon from Japan was pasteurized in sealed plastic bags. Cold Mountain miso, made near Los Angeles, California, was sold unpasteurized in 14 oz plastic tubs. So the people interested in the new company began to criticize this product as being made with machines, non-organic, etc. Where would the factory be located? What might it be called? How big might it be? Who might be involved from Japan?

Sandy, Michio, and John all deserve some credit for the original idea of starting a miso factory in America. During 1978 and 1979 every time that Sandy or John went to Boston, they would talk with Michio about the miso company idea. Continued. Address: Honto Press, P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

4040. Belleme, John. 1999. The story of how the Oak Feed Miso, Inc. was established, and its relationship to the Erewhon Miso Co. Part II. 1979 to 1980. (Interview). *SoyaScan Notes*. Aug. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1979 Jan.—John Belleme in Coconut Grove, Florida, writes Bill Shurtleff in California on Oak Feed letterhead that he and Sandy are starting to look for land for the miso company. “Bill, If you were going to make miso in the U.S., based on climate, what state would you choose?” 1979 Feb.—Oak Feed Miso, Inc. is incorporated. Sandy Pukel and John Belleme are the principals.

1979 April—Barry Evans of Coconut Grove, Florida invests money and becomes an important shareholder in the new corporation and a member of the “Oak Feed group.”

1979 spring—Members of the Oak Feed and Erewhon groups meet in North Carolina in the first attempt to locate a site for the miso plant. In attendance are Michio and Aveline Kushi, Sandy Pukel, John Belleme, Frank Head, and Junsei Yamazaki and his wife (both from California). Michio thought the Yamazakis should be there, so the group paid for their transportation. Junsei was tasting the soil, tasting the water—it was bizarre. Then Aveline insisted that they all rent a car and drive to Atlanta, Georgia, since she thought the miso factory should be near some big city like Atlanta. Every now and then Junsei would sniff the air or get out of the car and taste the soil. John recalls that this trip was disorganized, unsuccessful, and very frustrating.

Why were they looking for land in North Carolina? They knew some people who lived in North Carolina, and they knew a real estate man in North Carolina. But after the trip with Junsei Yamazaki, John began to think that it didn't really matter where they located the company. Sandy, who is from Coconut Grove (a suburb just south of Miami), Florida, does not like cold weather—not even as cold as North Carolina. John is also from Miami. Moreover, the miso factory was supposed to be a small part of the whole project, which was to be called the Oak Feed Land Project. That was Sandy's idea, and it was supposed to be an educational center, summer camp, Kushi Institute—similar to what ended up being at Becket. The Kushi's Ashburnham project had failed by this time. There is actually still a 4-by-8-foot sign on the property that says “Oak Feed Land Project.” Sandy and John wanted a “land project” in a warmer climate that was closer to Miami. They learned that there is an isothermal belt in North Carolina, an unexplained

warm stretch of land that runs through the Piedmont below the mountains in western North Carolina; this happens to be an excellent place to make miso because the warm climate brings the miso to maturity faster.

In mid-1979 Sandy Pukel, armed with this new information about the isothermal belt, went up to western North Carolina and bought one of the first pieces of land he was shown—129 acres. The land cost about \$120,000 and the down payment was probably about \$10,000 to \$15,000. Rutherfordton, North Carolina, turned out to be the perfect location. “What would be a 2-year miso in Massachusetts using Mr. Onozaki's basic formula, was a 1-year miso in North Carolina.” Moreover, Great Eastern Sun and the Macrobiotic Wholesale Company, and a large community of macrobiotic people in Asheville are in North Carolina because of this sequence of ‘accidental’ events born largely of ignorance.

After the land had been purchased, John and Jan rode to North Carolina from Miami on John's motorcycle and saw the land for the first time. They took \$20,000 cash, which belonged to the new Oak Feed Miso, Inc., and deposited it in a safe-deposit box at the BB&T Bank near Rutherfordton; John kept the key. Sandy flew up to North Carolina while John was there. John and Jan, and Sandy and Jackie (his wife) all went together to the First Citizen's Bank in Tryon, North Carolina; after signing something, they returned to Miami. John purchased two round trip tickets to Japan, and set aside \$5,000 for living expenses which he would take to Japan—using corporation funds from the safe-deposit box.

1979 Oct.—John and Jan Belleme (who have just been married) leave Florida to travel to Japan. On the way they visit Thom Leonard at his new Ohio Miso Co.; he has already made several thousand pounds of miso. Arriving in Japan in late October, they spend several weeks in Tokyo with Mr. Kazama “hanging around his office.” The plan had been for the Bellemes to study miso making at Sendai Miso Shoyu, but basically John refused because he knew they had a big factory and he wanted to learn the more traditional way that he planned to use when he returned to America. After John handcuffs himself to Mr. Kazama's desk, he arranges for the Bellemes to study miso-making with the Onozaki family 10 miles north of Yaita city, in Tochigi prefecture, northern Japan—even though Mr. Kazama had not previously known the Onozaki family. Finally Mr. Kazama drives the Bellemes northward to visit Sendai Miso Shoyu Co. On the way back he drops them off in a country village outside Yaita at the home of the Onozaki family, who run a traditional koji and miso factory. Imagine their surprise when, out of the blue, two Americans appear intent on learning the traditional Japanese art of making miso!

In November John and Jan begin to study miso making at the *Onozaki Kôji-ten*, while living with the Onozaki family. They paid the family a certain monthly fee for room and board, and an additional fee for the teaching and

training. He and Jan also received a small monthly wage. At one point John requested an additional \$5,000 from the corporation. The Onozaki family made and sold both miso and koji. About half the koji was sold, mostly 1-2 pound bags to individuals who used it at home, mostly to make amazake. When John was there, the Onozaki family made much more miso than koji. The Bellemes' study and training continue until the next summer. While in Japan, John wrote many letters back to macrobiotic friends in America as part of campaign to (1) try to prevent Sandy from giving away the miso company to the "Japanese group," (2) show that he was learning how to make the real traditional Japanese miso, and (3) argue that much of the so-called "traditional" miso being imported from Japan was actually made in modern factories.

1980 April—A letter from John Belleme, titled "Making miso in Japan" is published in *GOMF News* (Oroville, California). It is the first published account of his experiences with the Onozaki family. 1980 May—According to Mitoku's records, the first shipment of Onozaki rice miso from Onozaki Koji-ten in Tochigi prefecture is sent by Mitoku to Oak Feed Store in Miami, Florida; 84 cartons and 4 kegs. John Belleme contacted Mr. Kazama and arranged this shipment. At the time, Oak Feed Store was importing Japanese products from Mitoku and distributing to stores across the USA. Michio Kushi set up the connection and it was all done with his blessing.

1980 May—After their apprenticeship with Mr. Onozaki, John and Jan spend 3-4 weeks at Sendai Miso Shoyu—at Michio's request. Mr. Kazama drove them to Sendai. John studied the process and took lots of photographs.

1980 June—John and Jan Belleme return from Japan. The Oak Feed and Erewhon groups meet at Oak Feed Co. in Florida to determine ownership of Erewhon Miso Co. There were various contracts. In one, for example, said that Sendai Miso Shoyu and Mitoku would each own 15% of the company—even though it was not clear what they would contribute to the venture. It is finally decided that each of the two groups would own 50%.

1980 summer—John starts to locate and order the miso equipment he needs, which falls into three categories: (1) Purchased from USA: He orders wooden vats from the Arrow Tank Co. in Buffalo, New York. The pressure cookers (for soybeans) and boiler also came from the USA—mostly New Jersey. (2) Purchased from Japan: Two steamers for rice and barley, a rice milling machine, an automatic koji inoculating machine ["rice rocket"] (which they never used until many years later; John did all inoculating by hand), soybean washing machine, soybean crusher (to grind and crush the cooked soybeans), miso mixer (to mix the crushed soybeans with the koji and salt), the foot-activated piston filling machine, which originally filled bulk tubs, and later filled coffee bags and small plastic tubs. (3) Designed by John and fabricated locally: The

tilting cooling table to cool hot soybeans then dump them into the soybean crusher, the conveyor that transports raw miso from the miso mixer up into the tall wooden vats, the clam that would come down from the ceiling and lift 400-500 lb of finished miso out of the vats; John also used it to mix miso from one vat to another in mid-season. Everywhere (except in the koji-making process) that Japanese miso makers used intense labor, John tried to use machines.

1980 fall—John and Jan Belleme go on the Erewhon payroll at \$400/week, break ground, and start construction of the miso plant in Rutherfordton, North Carolina. On Sept. 29 the land for the new factory is being leveled. John pays initial expenses using funds in the BB&T safe deposit box.

1980 late—John starts to make small, experimental batches of miso in his house, in the sauna room. In his spare time, John starts to grow shiitake mushrooms, behind the main house, up on the hill. He and Jan had brought shiitake plugs from Japan. They used a chain saw to cut oak trees into logs for growing. He sold small amounts to Great Eastern Sun, but he was too busy with other things for shiitake to become a business, as he had once hoped. Continued. Address: Honto Press, P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

4041. Belleme, John. 1999. The story of how the Oak Feed Miso, Inc. was established, and its relationship to the Erewhon Miso Co. Part III. 1981. (Interview). *SoyaScan Notes*. Aug. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1981 Jan.—When it comes time to buy equipment and build buildings, the new company finds it has little or no money. It needs about \$40,000. The person constructing the building, Doug Ashley, threatens to put a padlock on the building because John is unable to pay him. He also threatens to sue John. The project comes to a complete standstill for months as Barry and Sandy are trying to settle their conflict in Miami. During this time, when John has nothing else to do, he starts to write articles about his miso apprenticeship in Japan. And Jan corrects her dyslexic husband's multitude of misspelled words and prepares the stories for publication. Eventually he and Jan wrote over 100 published articles about Japan, Japanese foods, and miso. They contain some 400 of John's photographs.

During the conflict between Sandy and Barry, John finds himself in a very difficult position—in the middle and torn. At one point Sandy, who had been John's longtime close friend and macrobiotic mentor, decides that he no longer wants to be involved with Barry Evans and the miso company. Michio Kushi and Mr. Kazama of Mitoku go along with Sandy, dropping their crucial support for the project. John barely knows Barry, but now he finds himself trying to convince Barry not to abandon the miso project.

Barry asked John: "If I'm going to trade my ownership in Oak Feed Store for the miso factory, what value does that factory have? It's a piece of land and part of a building, but can you make miso? How are we going to sell it? Is it a business with potential?" John has to answer all questions with a convincing "yes!" even though he has not yet made miso by himself and has no idea what the market was. But by building up the value of the miso and downplaying the value of Oak Feed Store, John strains his relationship with Sandy. If Barry had abandoned the miso project, all of John's work in Japan might have been in vain. Moreover it would have left the land and the new building unpaid for—a total mess.

Soon John finds that his role had changed from potential miso maker to miso promoter and educator. His articles must put the wind in the sails of a ship that has stalled in the doldrums. "Every one of those stories had all kinds of intricate purposes to it." And each is written for various audiences with different goals. John has to convince: (1) All his readers that he is an expert on miso and that his miso would be unique—the best available. (2) Potential macrobiotic customers that the lighter, sweeter misos are good tasting and good for health. He could never build a company solely on long-term salty miso. (3) Michio Kushi, and macrobiotic counselors and teachers, not to say bad things about his miso. "I kept putting pressure on them until some were afraid of me—the miso mafia." (4) Barry Evans that the company would succeed and be a good investment. John sent Barry a copy of everything he wrote. John was not sure that Barry was completely committed until about 1984.

1981 Jan.—John Belleme's first article about his miso studies in Japan, titled "The Master of Hoops," is published in *East West Journal*.

1981 April—John Belleme's second article, titled "The Miso Master's Apprentice," is published in *East West Journal*.

1981 July—John Belleme's third article, titled "The Miso Master with a Big Heart: Making Miso in a Japanese Village," is published in *Soyfoods* magazine.

1981 early spring—Increasingly, the much-needed money starts to arrive from Barry. At about this time, and perhaps again earlier, "Barry Evans' money saved the company—there is no doubt about it."

1981 May—All of the miso-making equipment has arrived in North Carolina.

1981 July—The two groups meet at the newly constructed Erewhon Miso Co. plant to have an opening ceremony and celebration. About 25 people are present. The Shinto ceremony is conducted by Michio, with salt, daikon, azuki beans, etc. He goes from door to door, putting Japanese symbols on each door. Evan Root, who was there, was deeply moved by this ceremony. The Kushi's stay on the land for 3-4 days. John remembers that there was a lot

of stress during this time. Barry and Sandy were in the middle of resolving their problem.

1981 Aug.—John and Jan start full-time, large-scale production of Erewhon Miso. They have not made any miso on a large scale for more than a year. Erewhon Trading Co. contributed the soybeans, grains, and Lima seasalt; they probably arrived a month or two earlier. Money is still in short supply.

1981 Nov. 10—Michio Kushi files a petition for Erewhon for protection under Chapter 11 of the Bankruptcy Act at the federal in court Boston. This is a disaster for the new miso company. The Bellemes' paychecks and the miso ingredients stop arriving from Erewhon. The miso company's name is soon changed to Oak Feed Miso Inc., but the company now has no means of packaging or marketing its products. None of the Belleme's miso is ever sold under the Erewhon labels or the Oak Feed label. Address: Honto Press, P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

4042. Belleme, John. 1999. The story of how the Oak Feed Miso, Inc. was established, and its relationship to the Erewhon Miso Co. Part IV. 1982 to present (Interview). *SoyaScan Notes*. Aug. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1982 Jan. 4—Barry changes the name of the company to American Miso Co. and announces that it is open for business.

1982 Jan. 31—Sandy Pukel and Barry Evans agree to an exchange of stock whereby Sandy gets out of Oak Feed Miso and Barry gets out of Oak Feed Store and Oak Feed Restaurant. They finalize the deal on Feb. 26, but it is retroactive to Jan. 31.

Barry starts The American Trading Co. (soon renamed Great Eastern Sun) to distribute their miso which would soon be ready for sale. For a while, Barry Evans and Sandy Pukel had been in a partnership in that import and distributing company. When Barry and Sandy split up, and Barry started Great Eastern Sun, Mr. Onozaki's miso started going to both companies. Marty Roth soon begins running GES.

1982 Jan.—At about the same time, during the first season, after John has made quite a bit of miso Mr. Onozaki visits the American Miso Co. in North Carolina for about 2-3 weeks at the Bellemes' invitation. They are interested in his comments on their miso plant and process, and they pay his way as a consultant and friend. He works with them making miso and gives them some very valuable suggestions (both big and subtle) for improvements—mainly in making the koji. Formal dinner is held in his honor.

1982 April—Mr. Onozaki's eldest daughter, Kaoru, and her husband, Haruo (Mr. Onozaki's adopted son), visit the miso factory and work for 3 months, living under the same roof as the Bellemes. Jan is pregnant when they arrive and

the Belleme's son, Justin, is born on 24 May 1982 in North Carolina.

1982 April 24—Richard Leviton, editor and publisher of *Soyfoods* magazine, visits the American Miso Co. in Rutherfordton, North Carolina, and writes an in-depth cover story about the miso-making process, equipment, and company, published in the summer (July) 1982 edition of his magazine. The best, most detailed coverage to date. The color cover photo (taken by Leviton) shows John, Kaoru, and Haruo making miso.

1982 fall—The Bellemes' first miso is ready for sale. It is a red miso made, Onozaki style, with approximately equal parts soybeans and rice. It is sold only in bulk. The logo is two crossed sheaves of grain in a circle—drawn by an artist friend of John Troy's. This miso is shipped to Great Eastern Sun and sold in bulk under the American Miso label.

Prior to about 1983-1984 all of the company's miso was sold in bulk through Great Eastern Sun to stores. Over the years, John had been working on selling miso refrigerated in one-pound plastic bags, each having a pressure-release valve. The unique bag was designed for coffee and made in Italy. Finally, at a food show in Atlanta, Georgia, two big refrigerated distributors—Cornucopia and Tree of Life—decided to carry the new products. Soon refrigerated distribution trucks began stopping by the miso factory in North Carolina to pick up 7 varieties of miso in 1-pound bags. It was a breakthrough. Demand increased dramatically.

1983 Oct. 1—At John and Janet's request, Barry Evans buys all their shares (900 shares, 35-45% of the ownership) in the American Miso Company. John agrees to work as a consultant for 6 months and to train a person to take his place. John Fogg has been handling the marketing account for Great Eastern Sun. John Belleme asks him to design a retail marketing program, logo, and label for American Miso. He comes up with the idea of "Miso Master." John cringes, because it implies that he is a miso master, whereas he still considers himself a beginner, and he is developing many new types of sweet miso that he has definitely not yet "mastered." Peter Harris draws the Miso Master logo, an illustration showing the head and shoulders of a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso.

1984 Feb.—At the time he sells his stock to Barry, John establishes a new marketing company named Just In Foods, Inc. (John's son is named Justin) for his miso and miso products. It is owned by John and Jan and Barry Evans. John is training Don DeBona to take his place at American Miso Co. His new responsibility will be to work as a marketing person between the miso factory and Great Eastern Sun (a distributor).

1985—John creates another entity named Institute of Fermented Foods (it was never registered or official) as part of his ongoing struggle with Barry Evans. The name

appears on the label of many creative miso products Chick Peaso (Chick Pea Miso) and Mellow Ebony Miso (with Black Soybeans).

1985 Dec.—John and Jan leave the American Miso Co. due to ongoing conflicts with Barry Evans. Over the years, John had negotiated with Barry to give him more and more ownership in the company—because he was doing all the work. He eventually owned about 30% of the shares, which Barry bought back from him a year or two before he left—at John's request.

1985—John (who has nothing to do), with Sandy and Blake Rankin form a company named Granum East, based on Sandy's wholesale company in Florida. They plan to sell macrobiotic foods to distributors. It was nothing more than a telephone in John's home office. John would call up Great Eastern Sun (GES) customers and offer them a 10% larger discount than they could get from GES. Within 18 months the company had \$700,000 worth of GES' business. Barry was forced to buy the company from them.

John reflects on Sandy's financial role in the company: Sandy has an incredible money karma; he lets it go out and come in without holding onto it, without any attachment. John was later in a seitan business with Sandy; it failed and lost about \$300,000. When Sandy found out about these losses, he hardly batted an eyelash—and he's not a rich person. He helped people out all over Miami, and not only with money. He'd give them food, or whatever they needed. It was just amazing to see. Then all of a sudden a large amount of money or good fortune would just drop in his lap. Address: Honto Press, P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

4043. Kairava (J. Spaelstra); Seemo (H. Shapira). 1999. Re: Update on Dakini Health Foods Pvt. Ltd. in Pune/Puna, India. Letter (fax) to William Shurtleff at Soyfoods Center, Aug. 22. 1 p. Typed, without signature on letterhead.

• **Summary:** Gives details on their work with tofu and tempeh. They do not yet have a recipe book nor do they vacuum pack their tempeh. They are, however, developing a nice label. They have contacted Raj Gupta of ProSoya by e-mail about soymilk equipment.

"The nutrition situation in this country and on all income levels is no good—from severe protein deficiency on the lower income rungs to fancy diseases for the rich. Developing soyfoods production here is most crucial, urgent, and possibly also a good investment!

"At a later stage, to avoid spreading ourselves too thin right now, we are interested in trying our hand at more fermentations such as Taicho, Miso, Soysauce. We are looking for more material to study." A copy of the recent article from *Citadel Pune* (full of errors) is attached. Address: Dakini Health Foods Pvt. Ltd., S.N. 33, Bhoiwasti, Keshavnagar, Mundhwa, Pune/Puna 411 036, India. Phone: +91 20-613985.

4044. Seemo (H. Shapira). 1999. Re: Another update on Dakini Health Foods Pvt. Ltd. in Pune/Puna, India. Letter (fax) to William Shurtleff at Soyfoods Center, Aug. 24. 1 p. Typed, without signature on letterhead.

• **Summary:** Their company started business in April 1996 making white tahini. Sometime later they introduced peanut butter.

The third partner in their business is Bodhi Yahaan; they call him Yahaan, and he has been with the company for nearly two years. Like Seemo, he is from Israel where his name was Mr. Natan-Ran Diamant; now he lives in Pune. He does not work in the factory, but he does get the computer to work. He brought in the much-needed finance and also organizes loans when the banks fail. "He owns 50% of the company's shares and a very good friendship is growing."

"Mr. Donnelly (our Indian partner) resigned near the end of 1996, and since last year we got all government permissions to run the company without any Indian partner."

In Goa, "a friends couple of ours, Lisa Camps and her French friend Richard, are making tofu and tempeh on a small but interesting scale. This year they are growing and opening their own retail outlet with a delicatessen counter and a salad bar. We managed to convince them to invest in a good grinder, a small screw press, and a simple dehulling device for their tempeh. Also, I am building them an incubation cabinet so they will no longer mysteriously lose so many cakes of tempeh. Also, since last year, we are supplying their tempeh starter, and, from this year, their soybeans. Their address: Lisa Camps, H.S. No. 1684 Ouneachem Baht, Anjuna Bardez, Goa, India." Address: Dakini Health Foods Pvt. Ltd., S.N. 33, Bhoiwasti, Keshavnagar, Mundhwa, Pune/Puna 411 036, India. Phone: +91 20-613985.

4045. Grogan, Bryanna Clark. 1999. Soyfoods cooking for a positive menopause. Summertown, Tennessee: Book Publishing Co. 192 p. Sept. Index. 23 cm. [31 + 49 websites ref]

• **Summary:** On the front cover: "Reduce the discomforts of menopause naturally. Lower your cholesterol. Reduce your risk of heart disease and cancer. Over 150 family pleasing recipes." Eating a diet rich in soyfoods may alleviate many of the discomforts of menopause.

Content: Introduction. Glossary. 1. The soy prescription. 2. Soy for strong bones and weight loss. 3. Preventing the number one killer of women-heart disease. 4. Can soy prevent cancer? 5. A soyfoods primer. 6. Baking and cooking with soyfoods. 7. Breakfast foods and beverages. 8. Condiments, sauces, dips, dressings, and spreads. 9. Appetizers, salads, and soups. 10. Lunch, supper, and side

dishes. 11. Dinner entrees. 12. Desserts. Bibliography and websites. Sources for ingredients.

4046. Ontario Soybean Growers. 1999. Canadian soybeans (Ad). *Soya & Oilseed Bluebook* 2000. p. 104.

• **Summary:** This one-third page black-and-white ad states: "High quality, food grade soybeans for the production of tofu, miso, natto, soymilk, soy sprouts, soy sauce, tempeh and other soya products. Soybeans for the crush market. Identify preserved (I.P.)—Specialty soybeans. Organic and transitional soybeans. Container—Bag/bulk. Bulk vessel.

"Trusted, reliable, supplier of soybeans to the world for over 25 years.

"For more information or a list of suppliers contact: Canadian Soybean Export Association." Address: P.O. Box 1199, Chatham, Ontario, Canada N7M 5L8. Phone: 519-352-7730.

4047. **Product Name:** Frozen Tofu Cubes.

Manufacturer's Name: Tendore.

Manufacturer's Address: Wakayama prefecture, Japan.

Date of Introduction: 1999. September.

How Stored: Frozen.

New Product—Documentation: Talk with Christine, co-worker with Michio Kushi. 2000. Oct. 20. Tendore makes frozen tofu. They add starch, which enables it to stay soft when added to hot miso soup. Then they flash-freeze it for about 20 minutes. Trader Joe's has carried the product.

Talk with manager of Trader Joe's in Lafayette, California. 2000. Oct. 20. This product, imported from Japan, was sold on a one-time trial basis by Trader Joe's. They discontinued the product in about April 2000 because it did not sell very well.

4048. Houck, Claudia. 1999. St. Matthews woman advocates healthier diet featuring soy products. *Times and Democrat (Orangeburg, South Carolina)*. Oct. 13.

• **Summary:** Mary Jo Wannamaker is integrating the soybean into traditional Southern fare. She and her husband, Ben Coonrod, moved back to St. Matthews about 8 years ago; she joined her father, Luther, in the family's seed business. Her father had just begun to experiment with "edible soybeans." She has since concentrated on that area. They sell their soybeans (grown on their farm or contracted with local growers) to private companies and trading companies in Japan.

The writer visited for a meal featuring soybeans and soyfoods—including edamame. Mary Jo has long been interested in nutrition and a healthy lifestyle. Contains recipes for: Miso soup. Pumpkin bread (with soy flour). Frosty strawberry shake. A large photo shows Mary Jo holding a bowl of edamame. "The boiled soybeans are eaten as finger food, much like boiled peanuts."

4049. Egan, Jeanette Parsons. 1999. *Soy! Soy! Soy! Enjoy soyfoods' benefits in delicious recipes*. Tucson, Arizona: Fisher Books. xxx + 162 p. Oct. Illust. Index. 23 cm. Simply Healthy Series.

• **Summary:** This is a soyfoods cookbook. Contents: Dedication. Acknowledgments. Why I love soyfoods: Why eat soyfoods?, soy's health benefits, reduces heart disease, helps prevent cancer, soy for your bones (osteoporosis), to flash or not to flash (menopause), what about soyfoods allergies, how much soy should I eat? (soy protein, isoflavones), where to purchase soyfoods, how to add soy to your diet, important notes about eating soy. A soyfoods glossary: Black soybeans and yellow soybeans, green soybeans (edamamé), meat alternatives or analogs, miso, soy cheeses, soy cream cheese, soy flour, soy grits, soy milk (soy beverages), soybean oil, soynuts, soynut butter (roasted soybean butter), soy protein concentrates, soy protein isolates, soy sauces (tamari, shoyu), soy yogurt, tempeh, textured soy protein (TSP), tofu. Appetizers. Soups. Salads. Main dishes. Side dishes. Breads. Breakfast dishes. Desserts. Mail order sources for soyfoods. Other sources.

Contains 8 full-page color photos showing recipes. This is not a vegetarian cookbook. Recipes call for the use of chicken (4 recipes), ground beef, ham, crab meat, etc.

4050. Fallon, Sally; Enig, Mary G. 1999. *Nourishing traditions: The cookbook that challenges politically correct nutrition and the diet dictocrats*. 2nd ed. Washington, DC: New Trends Publishing Inc. xvi + 668 p. Illust. by Marion Dearth. Subject index. Recipe index. Menu index. 26 cm. [200* ref]

• **Summary:** Contains over 700 recipes. Contents: Preface. Introduction: Politically correct nutrition, fats, carbohydrates, proteins, milk & milk products, vitamins, minerals, enzymes, salt, spices & additives, beverages, about food allergies and special diets, parting words, guide to food selection (nourishing traditional foods, compromise foods {such as tofu}, newfangled foods {such as soy protein isolates and commercial soy milk}), a word on equipment, kitchen tips & hints, references (188). Mastering the basics. Great beginnings. The main course. A catalog of vegetables. Luncheon and supper foods. Grains & legumes. Snacks and finger foods. Desserts. Beverages. Feeding babies. Tonics and superfoods. Appendixes (A-F). About the authors.

Some of the basic recommendations in this book fly in the face of modern nutritional science: Eat more meat. Eat dairy products made from raw milk; pasteurization harms the milk. The worst fats are *trans* fatty acids, produced by hydrogenation; cholesterol and saturated fats do not cause heart disease. Consume plenty of enzymes. Meat should be eaten raw, rare, or braised in stock. Moreover, the authors propose a conspiracy in which doctors, researchers, nutritionists, and spokesmen of various government

agencies are giving bad nutritional advice to the American public (p. 2). The authors wish, sentimentally, for the return of the small American farm. Moreover, they do not examine some of the non-dietary issues related to a diet based on meat and dairy products: What is its impact on the environment? How would it affect the ability of the Earth to feed more than 6 billion people? What right do humans have to kill animals?

However the authors also make a number of recommendations that many people would agree with: Eat more natural, traditional, fresh, and unrefined foods instead of refined and processed foods. Avoid sugar and hydrogenated fats. This book is strongly influenced by the observations of Dr. Weston Price, a dentist, whose important book *Nutrition and physical degeneration: A comparison of primitive and modern diets and their effects*, was published in 1939.

Concerning soyfoods, the authors favor the use of small amounts of fermented soyfoods (such as traditionally fermented soy sauce and miso) but are strongly opposed to the use of non-fermented soyfoods such as tofu and soymilk.

Soy-related recipes and information: Commercial soy formulas are low in saturated fats and devoid of cholesterol (p. 6). Today most of the fats in the American diet are polyunsaturated and derived from vegetable oils such as soy (p. 10). The cheapest oils, such as soy oil, are often hydrogenated; this creates *trans* fatty acids (p. 14-15). Cows lose valuable Activator X when fed high-protein soy-based feeds. Lecithin is found in butter (soy, the main source of lecithin worldwide, is not mentioned). Mother's milk is high in cholesterol because it is essential for growth and development (p. 16-17). Omega-6 (bad) and omega-3 (good) fatty acids in soybean oil (p. 19). Fermented soy foods contain compounds that resemble vitamin B-12 but they are not absorbed by humans (p. 28). Isolated protein powders made from soy are usually obtained by a high-temperature process that over-denatures the proteins to such an extent that they become essentially useless, while increasing nitrates and other carcinogens. These isolated soy proteins can cause osteoporosis (p. 29). Beef should not be fed soy meal for protein, but rather animal parts (p. 31). Avoid farm raised fish [aquaculture] that have been fed soy meal (p. 32). Cultured soybean products from Asia, such as natto and miso, are a good source of food enzymes if they are eaten unheated (p. 47). The natural glutamic acid in soy sauce and miso gives these foods their rich, meat-like taste (p. 49). Many processed foods contain MSG or hydrolyzed protein, "especially soy-based concoctions" (p. 50). Heavily yeasted foods, such as soy sauce and Worcestershire sauce, often exacerbate the symptoms of chronic yeast [candida] infection (p. 56). Beans cause digestive problems because they contain two complex sugars, farrinose [sic, raffinose] and stachyose (p. 60). The macrobiotic diet and soybeans:

Use only as fermented products like miso, natto, and tempeh. Problems with tofu, soy milk, and phytoestrogens in soy (p. 62). The sickening effect of soy on ruminants (p. 87). In Japan, a typical meal contains miso, soy sauce, and pickles, all fermented products. In Indonesia, they eat tempeh (p. 94). Ode to naturally brewed tamari soy sauce and teriyaki sauce (p. 147). Soy products increase the body's need for vitamin B-12 (p. 164). Soy in Chinese history. Miso soup. Tofu in fish stock and soy sauce broth (p. 201). Macrobiotic diets (p. 343). Soy foods block zinc absorption (p. 348). Eat natural salmon; farm-raised salmon are fed inappropriate soy meal (p. 418). Problems with soy flour and modern soy products: phytates, antinutrients, omega-3 fatty acids, disagreeable taste, phytoestrogens, phytic acid, enzyme inhibitors (p. 477, 495). Soybeans are low in two essential amino acids (p. 496). Textured soy protein contains three antinutrients: Phytic acid, trypsin inhibitors, and isoflavones (p. 502). Person fed soybean milk as an infant had a spleen filled with ceroid (p. 546). Infants should not be fed soy-based formulas which contain phytic acid and estrogen compounds (p. 599, 603-04).

Note: The first edition was apparently published in 1995 by ProMotion Publishing (San Diego, California). Address: California. Phone: (877) 707-1776.

4051. Kluger, Jeffrey. 1999. What's for dinner? Our chef whips up a tasty meatless meal that's good for you—and for nature. *Time*. Nov. 8.

• **Summary:** In the “health and environment” section: The article begins: “If the human race becomes vegetarian in the next century, animal-rights activists will be ecstatic. But what about the rest of us? Can we possibly enjoy a meat-free, dairy-free [sic] future when hunter-gatherer appetites will still be hard-wired into our genes?”

Time has chosen Louis Lanza, executive chef at and owner of Josie's Restaurant and Juice Bar in New York City, to prepare a dinner for the year “2025 that would be good for the body—and the planet. In his tasty menu, liver pate gives way to lentil pate, steak is replaced by tofu cutlet and a banana-and-ice-cream dessert is made with rice milk instead of cow's milk.”

The dinner includes: “Soup and salad: Chick-pea miso soup with salad of organic baby greens, heirloom tomatoes and toasted soy nuts.

“Entree: Seared tofu cutlets in an orange chipotle glaze with mushrooms, butternut squash and wheatberries.” For dessert is a sundae of rice “ice cream” [Rice Dream].

4052. Pukel, Sandy. 1999. History of interest in macrobiotics and miso. Part I. 1945-1974 (Interview). *SoyaScan Notes*. Nov. 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sandy was born on 10 Sept. 1945 in Queens, New York City. In 1967 he graduated from the University of

Wisconsin, majoring in political science, then went to law school at the University of Tulsa in Oklahoma. After two years he realized he did not want to be a lawyer, and dropped out—at a time when many other young Americans were also dropping out of college or “straight” jobs. For the next two years he passed his leisure time like many other young Americans. In August 1969 he was at Woodstock and appears in the movie—naked. Knowing he wanted to be an entrepreneur, he worked on Wall Street for a while.

In April 1970 a childhood friend from Queens, Willy Rosenfeld, introduced Sandy to macrobiotics. Willy had gone to Harper College (SUNY) at Binghamton, New York, where he met Michel Abehsera. Sandy went to a lecture in New York City by Rebecca Dubawsky. “From that night on I became macrobiotic; I went ‘cold turkey.’” He stopped using psychedelics and quickly got interested in the philosophy of macrobiotics; he wanted to “turn the world on” and saw this as one way to do it. That summer he went to a macrobiotic summer camp / retreat at Awosting in upstate New York with 30-50 other people. There he first met Michio Kushi, who was in short pants and knee-socks. This deepened his interest.

In August 1970 Sandy and five of his closest friends decided move to the island of Jamaica, where they would live a simple life and practice macrobiotics—in paradise. They stopped by Greenberg's Natural Foods at 125 1st Ave. in New York City. Located on the lower east side of Manhattan, it probably had the largest selection of macrobiotic foods in America. There they bought provisions for the trip: a 100-lb sack of brown rice, a keg of Hatcho miso, aduki beans, and soba noodles. They got non-tourist visas, and settled down in a lovely rural spot. The dentists in the group had hoped to open a clinic. But it didn't work out; the local people saw them as white hippies so they kept trying (unsuccessfully) to sell them drugs. The local people just wouldn't let them alone, so after about 6 months, one by one, they returned to the United States. Sandy was the last to leave. He went to Coconut Grove, to stay with one of his roommates in law school, Roger Schindler, happened to live there. But there was no place to eat or to buy macrobiotic foods. So in Nov. 1970 Sandy and two of his close friends started Oak Feed Store. One partner was Leon Matsil, a dentist and Sandy's boyhood friend from Queens; the other was Joel Magazine, an attorney and public defender in Miami, who also went to law school with Sandy in Oklahoma and who Sandy turned on to macrobiotics. They just wanted to have food available. They did not go into it thinking it would be a business—Sandy's father lent them \$4,000 to start the store. It was named Oak Feed Store because the law library was on Oak Avenue. The word “Feed” was used because the purpose of the store was “to feed the people the good food.” They name came spontaneously; no one person thought of it. This was the first of many enterprises that Sandy would help to finance.

It was located on the second floor walk-up of the law library of the lawyer of one of his friends. The room was about 10 by 15 feet. This was the first macrobiotic food store or organization in the greater Miami area. They ordered their foods via common carrier (truck) from Akin, a distributor in Jacksonville, Florida. Akin distributed many Erewhon products. They also ordered quite a bit of food via mail order direct. They relatively few foods: Bulk brown rice, almonds, miso, noodles, noodles, apple juice, plus one cosmetic (Oregene shampoo). "It was really a strict, strict macro kind of place." There was a commune in Coconut Grove named the Maya House, and its members were regular workers at Oak Feed Store. Sandy also worked there regularly.

Also in about 1970 Sandy and his two friends started another communal affiliation that they called LJZ Enterprises—Leon, Joel, and Zuni; Sandy's nickname was Zuni. Everything went into one pool and they shared everything 100%—totally. All money from Joel's law salary, all money from Leon's dental practice and investments, all money Sandy earned from the store went into this pool, and each person took whatever they needed. This included purchases of houses, cars, clothing—everything. This lasted for the next 7 years and worked very well. To this day, they are all still close friends.

Oak Feed Co. became increasingly popular. After about one year they moved to a street-level retail store in the same building. Then in late 1971 or early 1972 they moved around the corner to a bigger store at 3030 Grand Avenue—where they stayed for the next 20 years. By this time they were running a real business—in spite of themselves.

Sandy recalls: "Once I got into macrobiotics I was a zealot about it—preaching, teaching, everything." In 1972 he began to give the first macrobiotic cooking classes in the area out of a rented home in Coral Gables, where he and Leon lived. A macrobiotic community began to evolve, with Sandy at its center. Sandy got to know Neal Loeb, who had studied macrobiotics in Boston, Massachusetts, and was Michio Kushi's driver. He was planning to bring Michio to Florida for a seminar, but he "flaked out" and couldn't get it together, so in about 1973-74 Sandy organized the weekend seminar. Michio's students in Boston sent Sandy detailed information about how Michio was to be treated, where he was to stay (hotel or motel only), what he was to eat, his detailed schedule, etc. "They were incredibly protective." The seminar was very successful, with a good turnout at a local church or private school auditorium. Michio stayed at Sandy's house and did individual consultations. Sandy and Michio got along very well, and Sandy gave Michio all they money they collected—in part because he didn't care about the money. Soon he and Michio became lifelong very close friends, and Michio started to give seminars in the Miami area on a regular basis.

In about 1973 LJZ bought a very nice house, communally, in Pinecrest a very nice neighborhood of Miami; there the three friends continued living together for a year. Macrobiotic visitors and friends stayed in the guest house on the property. In 1974 Sandy bought his own house (with a lake in his back yard) on 63rd Avenue in Miami, about 4 miles from Oak Feed Store.

In about 1974 Sandy started the Macrobiotic Foundation of Florida. Its purpose was to spread macrobiotics. Edmund Benson was on the board of directors. The cooking classes continued at Sandy's house in Coral Gables. Anyone passing through Florida who knew macrobiotic cooking was invited to be a guest teacher at the cooking class. Tim Redmond taught the first class on macrobiotic desserts—featuring apple pie. Sandy's repertoire didn't include desserts, except perhaps those made from agar or kuzu. Jay Pinsky, from Philadelphia, Pennsylvania, asked if Sandy had any apple butter, peanut butter, or sesame butter; he didn't. "We still ate basically rice, vegetables, miso soup, and aduki beans. We were as close to a Number 7 diet as you can imagine." Continued. Address: Owner, Oak Feed Store and Restaurant, 4500 S.W. 63 Ave., Miami, Florida 33133. Phone: 305-446-9036.

4053. Pukel, Sandy. 1999. History of interest in macrobiotics, miso, and the Oak Feed Miso Co. Part II. 1975 to Aug. 1979 (Interview). *SoyaScan Notes*. Nov. 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Over the years Michio Kushi had talked about having a factory that made shoyu (natural Japanese-style soy sauce) in the United States. In about 1975, Sandy decided to do something about Michio's dream. He was increasingly an entrepreneur, but only in the sense that he liked to help make things happen. He still did not see himself as a businessman, in that he had little interest in money except insofar as it was important for making things happen. Oak Feed Co. was now a thriving enterprise. But why? "Because we didn't do it to make money, and because nobody took any money out of the company. So all the earnings were put back into the business. My job was to keep the philosophy going." Sandy's living expenses came from other investments. In the early 1970s, most young people Sandy knew who were interested in macrobiotics were dropouts with no money. He lived in a very nice house in Pinecrest (near Miami) and had the money he needed. In 1976 he began looking at the idea of a shoyu factory more seriously, but he soon realized that the complex equipment and buildings would make it too expensive.

Then John Belleme started coming to the macrobiotic cooking classes and other events at Sandy's house on 63rd Avenue. Though he came on his motorcycle, John had a "straight" job in electron microscopy at the Veterans Administration Hospital in Miami. Soon he was deeply

interested in macrobiotics and wanted to learn more and more. So Sandy suggested that John go to Boston to study macrobiotics with Michio. John did that, moving into a Ken Burns' study house. He stayed for about a year, then went to Mexico with Frank Head, and finally returned to Miami.

He asked Sandy for a job at the Oak Feed Store, and Sandy said "Fine." He was a responsible and knowledgeable person. John soon became the store manager, while also taking macrobiotic cooking classes at Sandy's house, but he did not see his future in a retail food store, thus he wasn't very happy with the job—though he was a very good worker. John was more a creator than a manager, and he and Jan had become sweethearts—great people and good workers. Jan used to make delicious seitan there. One day in about late 1977 John went to Sandy and suggested they do some kind of a project together. One of the ideas that came out of their brainstorming session was starting a miso factory in America.

A new idea was born, and Sandy responded by making John a deal. If John would work in the Oak Feed Store, in retail, for a total of three years (1976-79), Sandy would take care of the money necessary for making a miso factory happen and he would pay John's expenses related to starting the factory, pay for John's trip to Japan to study traditional miso making, and pay for John's share of ownership in the new miso company—\$25,000 in shares. John would be responsible for doing the research, learning how to make miso in Japan, etc. John accepted and began to manage the store.

In the fall of 1978 Sandy and John visited Michio in Boston to discuss the idea; Michio was very supportive, but he wanted the miso company to be in Massachusetts—perhaps on land at Becket or Ashburnham. Sandy didn't like the idea of Massachusetts—too much macrobiotic politics and the weather was too cold. Sandy put money from the Oak Feed Store into a separate account that John used to pay his miso-related expenses. Soon he began taking Japanese language lessons.

In 1977 Sandy started the Oak Feed Restaurant, and at about the same time Leon got married. These two events led to the three partners dividing up the properties of the communal LJZ Enterprises. Sandy ended up as the sole owner of the Oak Feed Store and his friends ended up with other businesses. Sandy took in partners in the restaurant; Michael Henry (a friend), and Wayne Neal and his wife. They invested and owned shares in the restaurant. Sandy got Yozo Masuda to be the chef at the restaurant. For many years Yozo had been the right-hand man of Hiroshi Hayashi at Sanae, an early macrobiotic restaurant in Boston. Sandy brought him and his whole family from Japan, and got him a green card so he could cook at the Oak Feed Restaurant.

1979 (early)—At some point, Sandy began looking for land for the miso company—using specifications related to the climate and temperature that John Belleme had given

him. But he was also looking for land for another reason—the Oak Feed Land Project. This was Sandy's dream of a macrobiotic educational center where various people would build homes and apprentice with John at the miso plant, and where various macrobiotic retreats and workshops and a summer camp with classes could be held on the land. Sandy spent about two months looking at catalogs, talking to realtors, etc.

1979 Feb.—Oak Feed Miso, Inc. is incorporated. By this time two groups have formed and begun to discuss their potential ownership of shares in the miso company: The Oak Feed group and the Erewhon group. It was agreed that the company would be named the Erewhon Miso Company. In the Erewhon group were Michio and Aveline Kushi, Sendai Miso-Shoyu, and maybe Mr. Kazama of Mitoku. In the Oak feed group were Sandy and John Belleme. It was expected that the Japanese would play a very important role in this company; they would assist the Americans in making miso in the United States. Sandy recalls meeting only once with some representative of Sendai Miso-Shoyu, probably at some natural foods trade show. Michio had most of the contact with them. At about this time the first of many of drafts concerning ownership of shares was placed on the table. None of the drafts was ever signed.

1979 April—Barry Evans becomes a major investor in the miso company.

1979 summer—After extensive research, Sandy flies up to North Carolina (Asheville) alone, looks at several pieces of property that a real estate agent has suggested, finds exactly the piece of land and house he had been looking for, makes a deposit or down payment of \$10,000 to \$15,000, agrees to assume the mortgage of the previous owners at the Tryon National Bank, North Carolina, and flies home alone the same evening. The roughly 90-95 acres of land in Rutherfordton cost about \$100,000 to \$120,000. The mortgage payments were \$500/month for 30 years. It was a lovely but very rural piece of property with rolling green hills. The Sears-style prefab 5-bedroom house on the property was basically thrown in free of charge. The land had become available because someone had died recently. With the new land and house, Sandy's Macrobiotic Foundation could do things that were impossible in metropolitan Florida.

1979 Aug. 7—Sandy closes / finalizes the purchase of the land for Oak Feed Miso in Rutherfordton, North Carolina. He and John Belleme both sign the closing documents. Now the new miso company would have to find the money to make the monthly mortgage payments, plus additional monthly payments to two officers of the bank totalling \$23,000. Barry Evans' money was important in making these payments but it was not essential. The miso company definitely would have been able to pay for the land in Rutherfordton and send John and Jan to Japan without the money Barry invested at this time. The investments Barry

made after construction of the factory began in mid-1980 and after Erewhon filed for bankruptcy were more important to the company's survival. Sandy put in the first money; Barry's came later. Sandy told John that if John took care of all the technical matters, Sandy would take care of all the financial matters to make the new company happen. Continued. Address: Owner, Oak Feed Store and Restaurant, 4500 S.W. 63 Ave., Miami, Florida 33133. Phone: 305-446-9036.

4054. Pukel, Sandy. 1999. History of interest in macrobiotics, miso, and the Oak Feed Miso Co. Part III. Aug. 1979 to 1982 (Interview). *SoyaScan Notes*. Nov. 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1979 Aug. 16–A “subscribers consent” agreement is signed at a meeting in Miami. The following people, all or most of whom were present, subscribe to buy shares in Oak Feed Miso, Inc. Sandy Pukel, John Belleme (he invested sweat equity, not money; Sandy put up John's share of the money), Barry Evans, Yozo Masuda (chef in the Oak Feed Restaurant), Edmund Benson (a friend of Sandy's involved in macrobiotics), and Jim Kenney (manager of the Oak Feed Store). All these people knew each other, and all but Barry lived near Coconut Grove. John signed as the secretary. Sandy also has the original by-laws of Oak Feed Miso—more than 10 pages of typewritten boilerplate-type language. They are not dated or signed, but they were almost certainly drafted in 1979. No names or shares are given. Frank Head was never a shareholder as long as Sandy was involved.

1979 Aug. (late)—After the land deal was closed, Joseph and Patricia Carpenter (married, with children, macrobiotic friends of Sandy's from his neighborhood) moved into the main house on the miso company land at Rutherfordton, North Carolina, and lived there, rent free and getting money, throughout the time the Belleme's were in Japan. Joseph was a carpenter and fix-it guy, and he was expected to make improvements to the house and land before the Belleme's returned. Joseph was also hired to be John's assistant and head worker in running the miso company. Joseph “seemed like a hard-working guy” and Patricia was “a sweetheart lady.” Joseph now lives in California and Patricia (who now uses her maiden name, Roberts) lives in Boca Raton, Florida, where she owns an antique store. Her parents live in Lighthouse Point, Florida, and her brother, Brendon Roberts, lives in Boulder, Colorado. Things did not end up on nice terms between them and John. Because they didn't do the work that John had expected of them, he either fired them or kicked them off the land. Sandy doesn't know what they were supposed to do; John would know. The Carpenters then bought land nearby.

1979 Oct.—John Belleme (and his new wife, Jan) leave for Japan. All their expenses are paid from the Oak Feed

account Sandy had established—not from the new corporation.

Michio was supposed to arrange for John's welcome in Japan and find a place for him to learn how to be a miso maker. But the people at Sendai Miso-Shoyu didn't want to share their secrets with John, so John ended up studying with the Onozaki family—kind of by accident. It turned out to be a blessing, because Sendai was too automated for John to learn traditional miso-making there. Moreover, Sendai Miso-Shoyu wanted to send one of their people to the USA to run the new Erewhon miso factory; John would have been his assistant.

1980 June—John and Jan Belleme return from Japan. Not long afterwards, there was an important meeting at Sandy's house in Miami. Now that it was becoming clear that a miso company was actually going to happen, people began to get serious about issues of ownership and money. At the meeting were Michio and Aveline Kushi, Sandy, John Belleme, and Joseph and Patricia Carpenter. Joe Carpenter had no money; he was a handyman who was going to be a worker. Sandy recalls it as a “pretty testy” meeting. Michio looked upon the miso company as “his baby.” His contributions would be “in kind” rather than in money. He would supply the company name: Erewhon Miso Company. Moreover, since he owned Erewhon Trading Co., he stated that the Trading Company would buy all the miso, package it, and distribute it under the Erewhon brand. Barry Evans was not there. In short, Erewhon planned to play an essential role in the new miso company.

After John and Jan returned from Japan, they went right to work building the factory and purchasing equipment. John is a very talented photographer. He took many superb photographs of miso making in Japan then documented the rise of the new miso company on the land in North Carolina.

1981 Sept. 27—Sandy has the “Minutes of an Annual Stockholders Meeting of Oak Feed Miso” (3 pages). It is signed by directors John Belleme, Sanford Pukel, and Barry Evans, all of whom, of course, were in attendance. It refers to the Subscribers Consent Agreement of 16 Aug. 1979 and tells exactly who owns how many shares in the company. With the help of an attorney, Barry got his stock converted to Class A, which enabled him to vote for the first time; he also got on the board of directors. Barry and John together now own the majority of shares. Sandy was, alas, no longer in control. The company needed Barry's money, and his demands were reasonable. The changes seemed inevitable—but it hurt.

In 1981, when it became clear to Michio and Aveline that Erewhon Trading Company was in a financial crisis and needed cash quickly, they appealed to many of their close friends for help. Sandy responded by sending them \$100,000. Nevertheless, on 19 Nov. 1981 Erewhon filed for bankruptcy protection under Chapter 11 of the Federal

Bankruptcy Act. That left Sandy in need of money. Barry Evans invested a considerable sum in Oak Feed Store as part of a complex agreement. For Sandy, the Erewhon bankruptcy couldn't have come at a worse time.

1982 Feb. 26—Sandy Pukel and Barry Evans sign an agreement whereby Sandy gets out of Oak Feed Miso and Barry gets out of Oak Feed Store and Oak Feed Restaurant by an exchange of stock. Barry's financial strength won over, but this left Sandy upset and bitter at Barry. Sandy believes that there was no connection between this event and his lending \$100,000 to Michio. John was torn—caught in the middle. On the one hand, he felt great loyalty and affection for Sandy, and hated to see him out of the new company. On the other hand, he had invested years in the miso company and wanted to see it through to the end. So John continued to work with Barry, and Barry made him an offer he couldn't resist. This conflict strained Sandy and John's relationship for years afterward. About 8-10 years later, Sandy received a beautiful present in the mail of a wooden keg of special miso. It was from John (who had made the miso), accompanied by a nice note as a peace offering, with the hope that the two could renew their friendship.

The idea of the Oak Feed Land Project disappeared when Barry Evans bought out Sandy's interest in the miso company. Sandy basically held a proxy for most of the other investors; when he left, they also left, selling their shares to Barry Evans.

One sidelight: In about 1993-94 Sandy formed a non-profit organization, an offshoot of the Macrobiotic Foundation of Florida, named The Ignoramus Club. Most of the members are people who have been involved with macrobiotics for many years. It had several hundred members who paid \$100 each, including Michio, Herman Aihara, etc. No one had any authority over anyone else. At the meetings, some of which drew 50-100 people to Miami, everyone talked freely about macrobiotics. Resentment and criticisms, as well as gratitude came out. "A lot of people owe a lot to macrobiotics." The Club is no longer active. Address: Owner, Oak Feed Store and Restaurant, 4500 S.W. 63 Ave., Miami, Florida 33133. Phone: 305-446-9036.

4055. Belleme, John. 1999. Update on American Miso Co. (Interview). *SoyaScan Notes*. Nov. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John has worked for years as a consultant for and vice-president of American Miso Co. John is also on the board of directors. Two days a week, he works closely with Greg Gonzales, who has become an excellent maker of koji and miso. Previously Greg had been a dancer from Southern California.

Today their first batch of good corn koji came out. They have been working out the process for six months. He and Greg used it to make a corn miso. Other people who have

used corn in miso have used it in place of the soybeans together with a rice koji. As far as John knows, this is first miso made with corn koji. John also goes to Great Eastern Sun where he is developing new miso products, such as a freeze-dried miso soup—in three flavors.

John thinks the American Miso Company might now be the largest manufacturer of hand-made koji in the world; they produce about 600,000 pounds a year of 5-6 different types of koji which end up in 11 different types of miso. The koji types are: Short-term barley koji, long-term barley koji, mellow barley koji, brown rice koji, white rice koji, corn koji, and soybean koji.

Last year they made soybean miso experimentally for the first time—which was extremely difficult because the carbohydrate content of the soybeans is very low. The trick is to keep the soybean koji from being overrun by bacteria and turning into natto. The soybean miso is now aging.

About a year ago American Miso Co. started selling "miso tamari" in 5 oz and 10 oz bottles. Address: Honto Press, P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

4056. Schultz, Stacey. 1999. Pass the tofu tacos: Soy-based foods are disease fighters, but they can taste pretty weird. *U.S. News and World Report*. Nov. 22. p. 77-78.

• **Summary:** Another typical soy article: Soy is healthy, sales are booming, the stuff tastes awful. During the past year, soyfood sales have increased 35% to \$494 million, largely because of reports of soy's health benefits—many of which are caused by isoflavones. Studies show that older women who consume soyfoods are likely to benefit. In one recent study, post-menopausal women who ate 40 grams of isolated soy protein a day for 12 weeks experienced a 45% decrease in the number of hot flashes.

A sidebar titled "How to fit soy into your diet" gives short descriptions of some "whole soy foods" and the number of grams of protein per serving: Soy milk, whole soybeans (edamame or cooked dry soybeans), miso, textured soy protein, and tofu. A large photo shows many types of prepared soyfoods (not in packages). Contains several factual errors, e.g. soy nuts are high in cholesterol, etc.

4057. Duke, James A. 1999. Isoflavones in kudzu, soybeans, and other plants (Interview). *SoyaScan Notes*. Nov. 25. Conducted by William Shurtleff of Soyfoods Center. [2 ref]

• **Summary:** In a recent search of his FNF (Father Nature's Pharmacy) database, which is now available free of charge at the USDA website, Dr. Duke found that kudzu ("the plant that ate Alabama") is *the* richest known source of daidzein, a key isoflavone, which could be used to treat osteoporosis. Ipriflavone, a synthetic compound widely used for osteoporosis in Europe, turns into daidzein in the gut. Dr.

Duke has kudzu growing on his hillside in Maryland—which his neighbors don't appreciate. "I think if we could find yet another use for kudzu, we might harvest it for estrogenic isoflavones instead of spraying it with estrogenic pesticides. That's been a theme of mine for five years. It also rich in genistein." Dr. Duke and his coworker Peter Calhoun recently looked at 75 legumes in the FNF database for their content of genistein plus daidzein. *Psoralea* is the richest source of daidzein—50 times richer than the soybean—though it is not normally eaten; yet it is used in Indian and Chinese medicine. The soybean is roughly in the middle in terms of total genistein plus daidzein. The statements that the soybean is "the richest source of isoflavones" or "a unique source of genistein, are simply not true.

Nowadays kudzu's scientific name is most widely given as *Pueraria montana* (formerly *Pueraria lobata*). Shortly he will be analyzing an Asian species of *Pueraria* that is also rich in isoflavones.

Fermentation can raise the level of isoflavones. If an alfalfa sprout is inoculated with or attacked by a fungus, it's genistein content will rise 100-fold. The attack makes the living sprout defend itself by producing or eliciting fungicidal compounds (primarily isoflavones) that protect the plant. This response of a plant producing protective / defensive compounds of various sorts is called "fungal elicitation." Most of the genistein data in his FNF database was based on this "fungal elicitation." A stressed plant naturally produces defensive compounds—not just isoflavones. Many legumes do not have a high genistein content until they are "hit with a fungus." Dr. Duke thinks that Asians might get more estrogenic isoflavones from sprouted legumes (such as mung bean or soybean sprouts) than from tofu or miso.

Dr. Duke's favorite soy product is miso; he invariably orders miso soup when he goes to a Japanese restaurant, but he never uses miso at home.

Dr. Duke is considering filing for a patent on use of the daidzein or isoflavones in kudzu to treat osteoporosis. Such a patent might enable him to interest an entrepreneur in battling kudzu productively rather than destructively. Any royalties would revert to an Amazon foundation with which he works.

Jim knows a lactation consultant who firmly believes that longer lactation and breast feeding is one of the best ways of preventing osteoporosis. She thinks that is more important than estrogenic isoflavones in the prevention of osteoporosis. Traditionally, women breast fed longer than they do today. Address: 8210 Murphy Rd., Fulton, Maryland 20759. Phone: 301-498-1175.

4058. Oihankesni, Anpetu. 1999. Life story and work with the South River Miso Co. (Interview). *SoyaScan Notes*. Nov. 29. Followed by a 4-page handwritten letter of Nov.

29. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** Anpetu (whose name was originally Jeffrey Zellich) was born into a Russian Jewish family and grew up in Philadelphia, Pennsylvania, but later in life, while living with the Lakota Sioux, he was given the name he now uses. He has been involved with macrobiotics since 1973. Before that, in 1971-72, he lived alone in a cabin in the woods in New Brunswick, Canada, gardening and using wild plants. He also lived in a tepee in northern Maine.

In 1973 he went to Boston to study macrobiotics. He lived for a while with Jack Garvey and Jack's first wife. He left to go to Mexico, where he lived for a while with indigenous people (Indians), then in 1974 returned to Boston, where he lived in Jamaica Plain. About 40% of the macrobiotic students in the Boston area at the time were Jewish. He met Hannah Bond through a mutual interest (shared also with Ken Burns) in wild plants. Hannah was older, and came from a Quaker background. She made pickles for Erewhon and was considered to be the best pickle-maker in Boston. He found her to be "the most intellectual woman I had ever met—wonderful." She had formerly been married to a professor of Greek. They went to his cabin in New Brunswick, Canada, she proposed to him, and they were married in 1982—the ceremony took place at the Elwell's land in Conway, Massachusetts. Christian and Gaella had both previously worked at East West Journal, she as an editor and he as an artist, who also illustrated several of Michio Kushi's earlier books. They had also both worked with Alan Chadwick, the legendary teacher of French intensive, biodynamic gardening at the University of California at Santa Cruz.

Anpetu was at the South River Miso Co. in about Oct. 1982 when Thom Leonard came for a month (on contract) to teach the Elwell's how to make miso and use the equipment. Christian and Gaella were married, had a daughter, and owned 64 acres of beautiful land on both sides of the South River. Christian was able to fund the company's start-up with his inheritance; he came from an affluent family and his father had died. He and his brother, Will, initially planned to start the miso company together, but later Will left. At one point the Elwell's approached Michio Kushi to see if he wanted to buy the company. Anpetu and Hannah lived in nearby Conway for 2 years, then on the Elwell's land in a trailer across the river. Another couple, Don and Martha Wheeler, lived upstairs in the miso shop after it was completed. Don and Martha loaned \$10,000 to Christian for the miso company. Anpetu also loaned \$10,000 to the miso company (though no papers were signed), and worked there making miso for 6-9 months; Hannah was not involved with making miso. During that time they published a flyer on miso (dated spring 1983) which Anpetu still has; he designed the logo showing 3 waves in a circle. The waves symbolized South

River and the three stood for the three families who were joining together to create the miso company. He also took quite a few color photos, which he still has. Don and Martha decided to leave first. Then Anpetu's enthusiasm waned and he and Hannah decided to leave.

Anpetu recalls that many big problems took place after this decision. Christian wanted Anpetu and Hannah to leave promptly, and when they would not set a deadline for leaving, Christian took them to court to try to get them evicted. The case went before a local judge in Greenfield; he suggested they work the matter out among themselves, but said that Christian had the basic rights as a landowner. Anpetu and Hannah left one month later, in the fall of 1983. Christian paid him back the \$10,000 without interest over the next ten years. Anpetu and Hannah separated after being married for 7 years.

Today Anpetu lives a very simple life in Hotchkiss/Cedaredge, Colorado, where he runs an heirloom seed company named Sourcepoint Organic Seeds and practices Vipassana meditation. His teacher is Goenka, of Burma.

Note: Anpetu contacted Soyfoods Center today to request a review copy of *The Book of Miso* as announced in the latest edition of *River Currents: News from South River Miso Company (Conway, Massachusetts)*. Address: Founder and owner, Sourcepoint Organic Seeds, 1349 2900 Road, Hotchkiss, Colorado 81419. Phone: 970-872-4971.

4059. Buell, Paul D.; Anderson, Eugene N. trans. and ed. 1999. A soup for the Qan: Chinese dietary medicine of the Mongol era as seen in Hu Szu-hui's *Yin-shan Chêng-yao*. London: Kegan Paul International. 715 p. 25 cm. [Eng]*
 • **Summary:** The book of which this is a translation, published in 1330, is about the food and medicine of the Yuan (Mongol) dynasty (A.D. 1279-1368) court in Peking. During this dynasty, China was ruled by Mongols who had invaded China from the north. Contains a good introduction plus one reference to soybeans and tofu, and many references to jiang (though none of them are indexed under chiang, jiang, or sauce)—some of which were probably soybean jiang (for example, see p. 423; Bream gruel with sauce).

Section 3 (p. 515-17) states: "Soybeans are sweetish in flavor and neutral and lack poison. They decrease demon *qi*, control pain, and drive out water. They expel heat of the stomach, bring down blood stasis, and counteract the poisons of various drugs. They are made into tofu. Tofu is cooling and moves the *qi*." Address: 1. Seattle, Washington; 2. Dep. of Anthropology, Univ. of California, Riverside, CA 92521-0418.

4060. GeniSoy Products. 1999. The magic of soy: Healthy cooking with soy protein. Summertown, Tennessee: The Book Publishing Co. 128 p. Index. 23 cm. [18 ref]

• **Summary:** Contents: Introduction—Experience the magic of soy, about GeniSoy, about soy, soy and heart disease, prevention with soy, soy and cancer, soy and osteoporosis, soy and menopause, choosing soy products, make room for soy. Smoothies and shakes. Breakfast. Breads and baked goods. Sauces, gravies, dips, dressings, and spreads. Soups, salads, and sandwich fillings. Entrees. Desserts.

Contains many vegan recipes for using soy protein isolate, named GeniSoy Soy Protein Powder, made by GeniSoy. GeniSoy was founded in 1997 after its parent company (MLO Products) began to manufacture isolated soy protein products for use in institutional research studies. Address: Fairfield, California.

4061. South River Miso Co. 1999. Miso Happy—See You Tamari (T-shirt). South River Farm, Conway, MA 01341.

• **Summary:** This handsome T-shirt, made of 100% pre-shrunk, heavy weight cotton, comes three sizes (medium, large, extra-large), various colors (incl. deep plum, forest green, beige, black, brick red, and denim), and styles (short sleeve or long sleeve). On the front, in large uppercase letters, are the words "Miso Happy." On the back is written "See You Tamari." Below those words are the company logo and, in smaller letter, the words "South River Miso." These t-shirts are illustrated and described in the company's spring 2000 catalog (p. 2).

Talk with Robin of South River. 2000. March 20. This t-shirt was first available in Nov. 1999. An earlier version, first available in April 1998, had writing on the front only. Over the left breast was written "Miso Happy" and near that was the company's former logo. Address: Conway, Massachusetts.

4062. Elwell, Christian. 1999. Chronology of South River Miso Co. Part I. 1946-1979 (Interview). *SoyaScan Notes*. Dec. 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** 1946 Dec. 29—Christian is born at Martha's Vineyard, Massachusetts. His father is a vegetable farmer. When Christian is in grade school, he moves with his family to the Boston area and instead of vegetable farming his father opens a florist and nursery business.

1949 Aug. 3—Gaella (pronounced GAY-luh) is born Margaret B. Jett in Richmond, Virginia. Her family lives in Reedville, Virginia, on the Chesapeake Bay—where she grew up. Her father died when Gaella was 3 years old. Her mother, a school teacher in home economics, remarried to Jennings Butler, a professional fisherman with the menhaden fishing fleet of Reedville.

1969 June—Christian graduates from Cornell University (Ithaca, New York) in landscape architecture.

1969 July—Christian enters Peace Corps training in Morrison, Colorado. His group arrives in Teheran [Tehran], Iran, in Sept. 1969. He serves as a park designer for the

municipal office of the Province of Esfahan, the 17th century capital of Persia. During this time, Christian's father dies of pancreatic cancer at age 51. This event, coupled with his immersion in the traditional aesthetic and religious culture of Iran, precipitated a shift in the main stream of his life. He had graduated from Cornell with ambitions of becoming a landscape architect; he was accepted to enroll at the Harvard graduate school of design upon his return from Iran. But he finished his two years of Peace Corps service in Iran "with an altogether new orientation, burning with questions about the meaning and purpose of life."

1973 spring—Christian returns to the United States for a year. He travels (to the French island of Saint-Barthelemy in the Caribbean for several months, then to California in a Volkswagen bus), studies with a portrait artist in Boston for several months, then studies the teachings of Sri Aurobindu at a center in the Catskill Mountains.

1974 spring—Christian travels to India, where he lives in Pondicherry in association with the Sri Aurobindu ashram and Auroville. After becoming ill with hepatitis, he begins to study alternative health care and healing. After a year in Auroville, he then travels west to Scotland.

1974 May-Sept.—While at the Findhorn community in northern Scotland, Christian meets former students of Michio Kushi (teacher of macrobiotics in Boston), reads the book *Healing Ourselves* by Noboru Muramoto (teacher of macrobiotics in California) and puts its teachings to use—successfully.

1974 Dec. 29—Christian (on his 28th birthday) first attends a lecture by Michio Kushi in Boston. The subject: Right Life. He settles into the macrobiotic community in nearby Brookline and starts to work with the East West Foundation (doing everything from chauffeuring Michio around to helping with their magazine layout and design), while starting Whole Life Arts, a company to distribute French flour mills in the USA.

1976 fall—Gaella arrives in Brookline to study macrobiotics. Works at *East West Journal* as secretary to editor Sherman Goldman.

1976 Nov. to 1977 April—Christian and Gaella first meet at a massage class given by Shizuko Yamamoto. They first talk about making miso for a livelihood at an Irish pub in Brookline Village. While living in Ken and Anne Burns' macrobiotic study house (at the same time as John Belleme; they were good friends) in Brookline, they attend a miso-making workshop by Bill Shurtleff and Akiko Aoyagi. Christian wanted to farm and it seemed that making miso in the traditional way (as he had read about it in *The Book of Miso* by Shurtleff & Aoyagi) would fit into the New England farm cycle as a source of work and income during the cold months. In early 1977 they moved from the Burns' study house to the home of Michio and Aveline Kushi across the street.

1977 late summer—Christian and Gaella go to Covelo, California and work with Alan Chadwick, the legendary teacher of French intensive, biodynamic gardening. He had already left the University of Santa Cruz and set up what he called "The Garden Project" in Covelo. Christian becomes an "apprentice gardener" (later poultry manager) and Gaella is the head cook. They stay for about 6 months, until late 1977. Chadwick "blew up one day—just lost it completely." After that the Project fell apart.

1978 Jan.—Christian and Gaella leave Chadwick's garden and go to study with Noboru Muramoto at the Asunaro Institute in Glen Ellen, California. He is offering a one week "Fermented Foods Workshop" with an emphasis on miso-making. They ended up staying until April, making miso with him. That spring they make 1,000 lb of miso and write an article about it titled "Making miso in America," published in *East West Journal* in Sept. 1978. There they first met Thom Leonard, who comes to visit. Thom had already made some miso and tofu in Arkansas. Though they were together for only 2-3 days, they greatly enjoyed talking about their many mutual interests. "It was a really good connection."

1978 Feb.—Article titled "Learn natural architecture: Conversation at Cornerstones" (with Charlie Wing), by Christian (with photos by William Elwell), published in *East West Journal*. The interview took place in the fall of 1977.

1978 April or May—Christian and Gaella return to western Massachusetts, and with Christian's brother, Will, look for land in the Pioneer Valley region—within the larger Connecticut Valley.

1978 July—Review (by Christian) of five books by Rudolf Steiner published in *East West Journal*.

1978 Aug.—With financial help from their mother, Christian and Will purchase 64 acres of undeveloped land in Conway, Massachusetts, for \$50,000 cash. They name the place South River Farm; South River (20-40 feet wide) runs through the property. They buy the land with the intention of homesteading, that is building their own home, farming, leading a life that is as self-sufficient as possible. While living in a small apartment in the village of Conway, they first build a barn and several cabins, and get a pair of draft horses.

1978 Sept. 9—Christian and Gaella are married at the Old Brick Church in Old Deerfield, Mass. They learn that one of Christian's direct maternal ancestors, John Williams, was the first minister of that church in the early 1700s.

1979 March 15—Thom Leonard and Dick Kluding ladle the first batch of miso into their one-ton wooden vats at the Ohio Miso Co. in Monroeville, Ohio. They had begun construction of the shop the previous October.

1979 May 15—The Elwell's first child, Anna Deerfield Elwell ("Anni," a girl), is born. They are still living in their apartment in Conway.

1979 fall—The Elwells move onto the land from their apartment. They live in a 24-foot-long pink and white trailer. Will is already living on the land in a cabin they built next to the barn. Continued. Address: Founder and Owner, South River Miso Co., South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

4063. Elwell, Christian. 1999. Chronology of South River Miso Co. Part II. 1980-1982 (Interview). *SoyaScan Notes*. Dec. 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1980 Jan.—The Elwells receive a letter from Thom Leonard informing them that the Ohio Miso Co. is for sale.

1980 spring—The Elwells get a \$3,000 grant from the U.S. Department of Energy, Appropriate Technology small grants program—to build a rammed earth house on their property. Fred Hubbard, originally from Cape Cod, hears about this building project through his sister, who was a relative of Christian's, and offers to participate. Unmarried, he arrives in the early summer of 1980 and lives in a tent on the Elwell's land.

1980 May—The Elwells purchase the Ohio Miso Co. for \$10,000 cash from Richard Kluding.

1980 summer and fall—Christian tries to “back out of the miso business.” He feels overwhelmed by all the work that would be required. His brother, Will, who had just met his wife to be, is not sure he wants to be involved in the “miso making adventure.” He decided that he would move off the land in the summer of 1981. Christian approaches Michio Kushi, who owned Erewhon, and talks about Erewhon buying the Ohio Miso company. Michio shows a sincere interest in buying the company and in going to Ohio to look at the equipment and miso—but that never happened. A year later, in Nov. 1981, Erewhon filed for Chapter 11 bankruptcy.

1980 Nov.—With the walls of the rammed earth building finished, Christian and Fred Hubbard drive to Monroeville, Ohio, where they “stuffed the entire Ohio Miso company, all the equipment and 13 tons of miso, into the back of a huge semi truck trailer which a trucking company had delivered.” Each vat contains about 2,400 lb of miso. They empty all of the miso into 5-gallon buckets, then put the intact wooden vats into the truck, then put the 5-gallon buckets (still filled with miso) into the vats. It took 10-14 days to fill the truck. Christian and Fred drive back to South River Farm and a week later the trucking company delivers the trailer one day before a light snow storm. Christian and Fred, with help from neighbor Don Herzig and his tractor, unload the entire contents and store it in their barn—which was across the river.

1980 Dec.—Christian sends a form letter to Ohio Miso Company's former customers that begins: “Dear Friends, old and new: The Ohio Miso Company has changed

ownership. As of November, 1980, the Elwell family has purchased and moved the equipment and present stock of miso to South River Farm in Conway, Massachusetts... Eventually we want to follow a full cycle by growing the grains and beans on our own farmland... We plan to have our new shop ready for the fall season of 1981...”

1981 winter (Feb/March)—Christian sells Ohio Miso out of the barn, loading it onto a horse-drawn sled, pulling it over a logging road through the woods (the river was impassable) to the road and then on to a UPS terminal in Springfield. One of their best customers is Western Mass. Co-ops—which later became Northeast Cooperatives.

1981 June—The Elwells and partners lay the foundation of their new miso shop—1,220 square feet—and begin building a timber frame (post-and-beam) miso shop on their land. The frame is made of big, heavy timbers which are joined together with wooden pegs—no nails. This is an old English and New England method of construction. Christian had planned to construct a less expensive cinder-block building until he met master timber framer Jerry Sawma, who lives in Conway. Christian and Fred work with Jerry all that summer and fall, helping him frame the building and put the shingles on the roof. Fred and Christian take over from there, putting on the walls, etc. They had not finish by winter, so they covered it with plastic sheeting to keep out the snow.

1981 Nov. 29—Christian writes an “Historical sketch” of the South River Miso Co. on its handsome new letterhead: “There, a new shop of traditional timber-frame construction, featuring a wood-fired masonry cooking stove was completed in 1981. Production capacity is 40,000 to 120,000 pounds of miso per year. Barley miso is the standard variety offered. Others include Brown Rice, Corn, and Black Soybean miso.”

1982 Jan. 1—South River Miso Co. is incorporated.

1982 Feb. to spring—Christian was now thinking of running the miso company with two other families on a community basis; they would contribute money, labor, and community/social spirit. Christian's brother, Will, had left in the summer of 1981. Christian invites the other families to come and live on the land and work in the miso company. One couple, from the macrobiotic community in Boston, was Anpetu Oihankeshni and Hannah Bond; they were not married when they arrived but they had a wedding ceremony on the land. The other couple was Don and Marcia Wheeler, who were from families that had lived nearby in the Pioneer Valley for generations. These two couples invest \$30,000 to finish the miso shop and get the company running.

1982 spring—Christian and Fred finish building the miso shop, assisted by Don Wheeler and Anpetu. The total cost of the building was about \$80,000, including Jerry's labor expenses but not including Christian's and Fred's time. Jim Sadler later drew a nice illustration of the 5-part building

from a photograph. The main center part, which has two stories, is where the miso is made; a living space is in the loft upstairs. The koji room protrudes out toward the front. To the right of the main part is the entryway to the shop where the shipping is now done. To the right of the entryway is a 36-foot-long storage building, where the miso vats are stored. Each vat, made of recycled virgin cypress, holds about 7,500 lb of miso. To the left of the main building, under a roof that slopes downward, is more of the miso shop plus storage for smaller miso barrels. To the far left is a firewood storage shed.

1982 Oct. 25—With the miso shop just finished Christian, Gaella, Don Wheeler, and Thom Leonard hold a dedication ceremony then begin to make the first miso (actually barley koji for a 2-year barley miso) at South River Miso Co.—according to the “Production Log” which still exists. Thom arrived (from Baldwin Hill Bakery, which is a 45-minute drive away in Phillipston, Mass.) about a week before this day and stayed for about 3 weeks afterward. Part of the agreement in the purchase of Ohio Miso was that Thom would come to Conway to help them get started and teach them as much as he could about miso-making. It was a friendly and informal arrangement. Christian had to keep telling Thom to wait because it took longer than expected to finish building the miso shop; he was very patient and understanding. The organic barley and soybeans used in the first batches of miso were from Living Farms in Tracy, Minnesota. From 1980-82 Thom had taught miso-making classes in Boston. Earlier in 1982 Christian attended one of Thom’s classes at Baldwin Hill Bakery. As of December 1999 Thom has a very nice bakery in Salinas, Kansas, and he is very happy—part of a nice community. The first miso at South River is put into recycled oak whiskey barrels, purchased from Ohio Miso Co. Muramoto also used such barrels and Thom may have gotten the idea from him. The barrels had been burned on the inside so the charcoal would improve the flavor of the whiskey as it aged; the charcoal had to be scraped off before the barrels could be used for miso. Small batches went into the smaller whiskey barrels; larger batches went into cypress wood vats. Christian recalled in 1999: “Thom told me during the first week, as we were washing and soaking soybeans, ‘Miso making is about creating order. That is the main thing to keep in mind here in the shop: to create and maintain order.’ This was his way, in the spirit of Zen food craft, of breaking through the glamour and mystique of miso making.”

Gradually the men used the two horses and cart to move the miso barrels and vats from the barn, across the river, and into the new storage building that was part of the miso shop. By that time Christian had sold most of the miso made in Ohio.

1982 winter—Anpetu and Hannah live above the shop that winter; the Elwells live across the river—before there was a bridge over it. Christian would walk through the ice

cold water early each morning (until the river froze) to get the fires started each morning. Continued. Address: Founder and Owner, South River Miso Co., South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

4064. Elwell, Christian. 1999. Chronology of South River Miso Co. Part III. 1983-1999 (Interview). *SoyaScan Notes*. Dec. 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1983 spring—The miso company sends out a very interesting and poetic hand-lettered, dated leaflet and price list. The front panel, with a logo of three waves in a circle, announces the availability of three kinds of miso: Mellow Barley (6 weeks), Mellow Brown Rice (6 weeks), and Mellow Flint Corn (8 weeks). “South River Farm is the coming together of three families seeking common livelihood.” A pie chart shows the company’s costs.

1983 summer—The first in-depth story about the miso company, with five good photos, appears in *Soyfoods* magazine. The article states that the company (whose name is incorrectly given as “South River Farm Miso Company”) is owned by three families, and the names of the six owners are given. Actually, however, Christian and Gaella were (and have always been) the company’s only legal owners.

1983 fall—The community idea fails after one miso season (1982-83). The Wheelers leave first. Anpetu and Hannah leave in the fall of 1983; Anpetu writes a sad poem about falling leaves as they part. It takes the Elwells 10 years to repay the money the other two families had invested.

1983 Sept.—Christian goes to Charlie Kendall, who lives nearby, and asks if he can supply Charlie with rice koji for the amazake he makes. Charlie had been buying all his rice koji, dried and in bulk, from Miyako Oriental Foods in California. Christian offered to match Miyako’s price and make the koji from organic rice. Christian was already making rice koji for his red miso and he needed more customers. After making many trial batches and building a koji dryer, Christian begins supplying Charlie with 900 pounds (three 300-lb batches) of koji at a time. Also that second miso season (1983-84) the first apprentice, Sonia Schloeman, works at the miso shop; Christian needs help and Sonia needs a place to stay. He pays her a salary and she stays in the loft above the shop. After Sonia leaves, the Elwells move into the loft above the shop. The second intern was Dan Hornack, who came all the way from Aspen, Colorado. From then on the arrangement was room (in the cabins across the river) and board plus a small stipend in exchange for the apprenticeship. Other apprentices who worked in the shop over the years have included (in chronological order) Rich Sweitzer and Susan Gribbon (later to marry), Michelle Gemme (Montreal, Canada), Don Phillips, Michael Dessen, Tim Langdon, John and Mary

Granger, Caroline Wurts, Maggie Smith, Andrew Goodman, Tolly Gibbons (New Zealand), Anne Walsh Sullivan, Bobby (age 18 and white, from South Africa), Sean LePoutre, Maria Low, Kamil Bersky (a medical doctor from the Czech Republic), and Stephen Jannetta. Stephen worked at the shop for two seasons (Oct. 1990 to May 1991, and Sept. 1993 to May 1994), then helped others (Soyalab, and La Fonte della Vita) to start commercial miso production in Italy. His brother, Phil Jannetta, worked for Mitoku in Tokyo. Most apprentices stayed for one full miso season. Gaella cooked for everyone.

1983 Oct. 17—Isaiah, the Elwell's second child is born.

1983 Nov.—The company runs its first ad (1/3 page vertical) in *East West Journal*. The theme: "Wisely given miso gives its own wisdom." An illustration at the bottom shows the miso shop buildings. A logo at the top shows three waves in a circle.

1985—Starting this year, a group of students from the Kushi Institute at Becket, Massachusetts (which is about 1½ hours drive away) comes to visit to miso shop—even though Christian has had no personal connection with the macrobiotic movement for many years. Over the years, the number of groups has increased to 3-4 a year. In the early years, Christian would give a slide show and talk on miso-making. Now they usually come on a weekend and take a tour of the shop when it is not in production, and Christian will share with them what he has learned about miso.

1989-90—The Elwells, with the help of Fred Hubbard, design and begin building a timber-frame home located behind the miso shop—about 12 feet away from it. For the previous 5 years they had lived in the loft above the miso shop. Fred eventually built his own home in Conway, where he now resides as a carpenter and builder.

1991-92—The Elwells stop taking apprentices and start with paid workers. There was a difficult period of transition as Christian began to tire of working in the shop. Workers include Larry Glanz, a former student who worked with Muramoto-sensei and Stephen Jannetta.

1995 Aug.—Christian seriously considers selling his miso company to Barry Evans, owner of American Miso Co. and Great Eastern Sun in North Carolina. He had taken training to become a Waldorf School teacher. But this would require the Elwells to give up their land, and although it was quite isolated, they did not want to leave it.

1995 fall—Yukio Doyama begins to work at the miso company, a happy, hard-working man who enjoys making miso. At the same time, Steve Freiman comes to live above the miso shop and work with Yukio. Christian was now freed up for an extended time from day to day production and packing work; he began taking a more supervisory role and handled most of the office work and shipping. Andy Mathey followed in Steve Freiman's position, working with Yukio.

1996-97—This fiscal year the miso business is computerized. In late 1997 Christian decides not to sell the miso company, and to invest much more energy, time and resources in it—"to make it come alive again" after a period of hibernation. "When we clear up things inwardly, this is reflected by outward things." Quickly, all sorts of good new things begin to happen.

1998 Feb.—The first issue of *River Currents: News from South River Miso Company* is published. This attractive newsletter contains a catalog and order form, plus news about miso and the company.

1997-98 fall and winter—Three young people come to live at South River Farm to cultivate the land—and to work on forming a community. Arthur Lerner comes first, then his partner, Emily Kellert, and soon after, David Fisher. That winter these three also work part time in the miso shop. Robin Cole, a friend of many years, arrives in early spring of 1998 and creates the position of office manager/administrative assistant.

June 1998—The Elwells and coworkers finalize a mission statement for the miso company after three months of weekly meetings. It is published in the winter (Dec.) 1998 issue of *River Currents*.

1999 Sept.—The apprenticeship program is reinstated; Maria Rossi is the first to fill the position.

1999 Dec. 16—Christian says that the miso company, about to enter its 21st year or adulthood, is taking on a life of its own. Gaella was never a regular miso maker in the shop. In the early years she was a full-time mother and cooked hundreds of meals for builders and then miso apprentices. Her role has always been one of moral support. This year she does work in the shop two afternoons a week on the packing crew. The many new people are contributing to the growth of the miso company as a "learning organization" (see *Fifth Discipline*, by Peter Senge).

South River Farm is now moving in the direction of being home to self-sustaining farmstead—"as the place in which South River Miso is planted." David Fisher has built a pole barn, gotten draft horses, pays a modest lease, and sells his organic produce. Address: Founder and Owner, South River Miso Co., South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

4065. Yoshihara, Lulu. 1999. Re: Update on Shin-Mei-Do Miso Company. Letter to William Shurtleff at Soyfoods Center, Dec. 17. 1 p. Handwritten, with signature.

• **Summary:** Last May, Lulu and Yoshi went to visit their miso mentors at Maruman Miso Company in Iida City, Nagano prefecture, Japan. Their factory was completely rebuilt. They also have a very attractive booklet describing research on the health benefits of miso—all in Japanese. Lulu is now in her third year of studies at the University of Victoria, working towards a degree in Pacific and Asian studies, with a concentration in Japanese. Their eldest son,

Hikari, is at the University of California at San Francisco doing a PhD in molecular biology.

Yoshi continues to make miso the way he always has, slow and steady. Gradually Shin-Mei-Do has more Japanese customers seeking out their miso, but the health food stores are their mainstay. The company's new website is Shinmeidomiso.com.

Their friend Jerry Lewycky is "getting into miso in a big way. He should be very successful. Sincerely, Susan Marie (aka Lulu) Yoshihara."

Talk with Yasuo (nickname "Yoshi") Yoshihara. 2000. Jan. 13. Lulu's maiden name is Susan Marie Pritt. Jerry Lewycky (pronounced le-WIK-ee) used to run a wholesale company in Toronto that used to distribute Yasuo's miso. He sold his company, studied miso making with Yasuo for about a week, then started to make miso last summer in Claremont (near Toronto), Ontario. He wants to run a small company that makes miso in the traditional way. Yasuo does not consider Jerry a competitor. Address: Shin-Mei-Do Miso Co., 3906 Wren Rd., Denman Island, BC, Canada, V0R 1T0. Phone: 250-335-0253.

4066. Skiff, James. 1999. New Japanese law concerning labeling of foods made with genetically engineered ingredients (Interview). *SoyaScan Notes*. Dec. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jim is aware of this Japanese law, which was passed in Oct. 1999 but does not take effect until 1 April 2001. Jim Echle, head of the American Soybean Association office in Tokyo, told Jim about the law; Echle is extremely receptive to the needs of his Japanese customers, such as tofu makers. ASA is also getting more involved with issues involving identity preserved (IP) soybeans; they are organizing an IP conference on Jan. 17 in St. Louis, Missouri.

Skiff then faxes Shurtleff a provisional translation of the labeling guidelines, in the form of a 1-page table. The translation was done by ASA-Tokyo and sent to Skiff by Jim Echle. There are three columns: (1) Classification of food: A. Not equivalent to conventional foods with regard to composition, nutrients, or intended use. B. Equivalent to conventional foods, but modified DNA or protein produced therefrom remains after the manufacturing process. C. Equivalent to conventional foods, but modified DNA or protein produced therefrom is removed or decomposed and no longer exists in the in the final food. (2) Examples of the three types of foods: A. High oleic acid soybean oil. B. Tofu and tofu products, soybean sprouts, natto, soymilk, miso, soybean flour, roasted soybeans, corn, popcorn, potatoes, etc. C. Soy sauce, soybean oil, high fructose corn syrup. (3) Method of labeling: "Soybean (genetically modified),..." Address: US Soy, 2808 Thomason Dr., Mattoon, Illinois 61938. Phone: 217-235-1020.

4067. Kerlin, Katherine. 1999. Soy baby blues: Can we trust alternatives to milk-based formulas? *E Magazine*. Nov/Dec. p. 42-43.

• **Summary:** Babies handle the phytoestrogens in soy-based infant formula differently than adults. Half the phytoestrogens in adult bodies are freed into the bloodstream to bind to estrogen receptors, but in infant bodies less than 5% are available to bind to receptors. It is not clear how the remaining phytoestrogens affect infants.

On 1996 Dr. Kenneth Setchell studied five leading brands of soy-based infant formula. He found they contained the phytoestrogen levels equivalent to several contraceptive pills each day, about 6 to 11 times the amount needed to alter the menstrual cycle.

According to Dr. Naomi Baumslag, professor of pediatrics at Georgetown University Medical School [Washington, DC], infants consuming soy-based formula are 2-3 times more likely to develop thyroid disease than if they were cow's milk formula or breast milk.

Another concern is the genetically engineered soybeans used in infant formula. "But before you throw out your miso soup and Tofutti ice cream, remember that soy has many positive benefits." Address: Journalism student at Univ. of Missouri and intern at E Magazine.

4068. Key, T.J.; Sharp, G.B.; Appleby, P.N.; Beral, V.; Goodman, M.T.; Soda, M.; Mabuchi, K. 1999. Soya foods and breast cancer risk: a prospective study in Hiroshima and Nagasaki, Japan. *British J. of Cancer* 81(7):1248-56. Dec. *

• **Summary:** The association between soya foods and breast cancer risk was investigated in a prospective study of 34,759 women in Hiroshima and Nagasaki, Japan. Women completed dietary questionnaires in 1969-1970 and/or in 1979-1981 and were followed for incident breast cancer until 1993. For miso soup, relative risks were 1.03 (0.81-1.31) for consumption two to four times per week and 0.87 (0.68-1.12) for consumption five or more times per week, relative to consumption once a week or less. Thus, women who consumed miso soup five or more times a week were 13% less likely to get breast cancer than those who consumed it once a week or less. The reason for this protective effect is not known.

4069. *River Currents: News from South River Miso Company (Conway, Massachusetts)*. 1999. Meet Yukio Doyama. Winter. p. 2. Dec.

• **Summary:** Yukio was born in Tokyo, Japan, in 1949. This fall marks his fifth consecutive season as a miso maker at South River. "This kind and energetic man has brought a great deal of stability and continuity to our company. If you are grateful for its existence, you can be sure he has a lot to do with it." A photo shows Yukio. A sidebar shows a small photo of Maria Rossi, who is now an apprentice at the company.

Other photos in this issue show: (1) The miso shop and the Elwell's house in the winter, decked with snow at evening. (2) Six steps in the miso-making process. (4) Six jars of different types of miso.

4070. Ang, Catharina Yung-Kang Wang; Liu, KeShun; Huang, Yao-Wen. 1999. *Asian foods: Science & technology*. Lancaster, Pennsylvania: Technomic Publishing Co. 546 p. See p. 468. Illust. 24 cm. *

• **Summary:** Page 234: In Korea, meats are often flavored with *denjang*, a fermented soybean paste. *Gochu jang*, is a very hot fermented chili paste. Tofu is called *tofu*.

4071. Bladholm, Linda. 1999. *The Asian grocery store demystified: A food lover's guide to all the best ingredients*. Los Angeles, California: Renaissance Books. 234 p. Foreword by Jonathan Eismann. Illust. Index. 23 x 13 cm. Series: A Take it With You Guide.

• **Summary:** An original, well-researched and well-written book—though some of the terminology (such as “beancurd”) is outdated. Soyfood products include: Beancurd noodles (p. 38). Kinako (p. 47). Soy sauce, mushroom soy sauce, kecap manis (p. 53). Hoisin sauce (p. 54).

Chapter 10, titled “Soybean products” (p. 93-99) includes: Black bean sauce, dried soybeans, tempeh, beancurd (pressed beancurd, deep-fried beancurd, savory grilled beancurd {yaki-tofu}, freeze-dried beancurd {koyadofu}, bean curd sheets {yuba}), fermented beans (preserved black beans {tau see}, bean sauce, toen-jang, chili/hot bean sauce, fermented beancurd), okara, edamame, soybean sprouts, soy milk.

Note: This is the earliest English-language document seen (March 2009) that uses the word “toen-jang” (or “toen jang”) to refer to Korean-style soybean jang (miso).

Concerning preserved black beans: “Also called salted or fermented black beans or ‘tau see,’ this is made by steaming small black soybeans, then fermenting them with salt and spices. Used in a variety of dishes to add a pleasant rich aroma and salty taste... Crush or mash beans slightly to release more flavor or mix with garlic, fresh ginger, or chilies. Available in small glass jars, cans, and plastic bags. They should feel soft and not be dried out... Look for Pearl River Bridge brand labeled ‘Yang Jiang Preserved Beans’ in a 1-pound yellow canister, and Koon Chun Sauce Factory, Double Parrot, and Zu Miao Trademark brands all in 8-ounce bags.” Note: This is the earliest English-language document seen (Oct. 2008) that uses the term “tau see” to refer to Chinese-style soy nuggets (preserved black beans).

Concerning bean sauce: “Varieties of this Asian staple include yellow bean sauce, brown bean sauce, bean paste (tau jeong), or sweet bean condiment. All are made from yellow or black soybeans, fermented with salt and in the sweet Northern Chinese type, with sugar-sweetened crushed yellow [soy] beans. Two forms are found: whole beans in a

thick sauce and bean paste, which is mashed, ground or pureed beans. The whole bean type has a rounder flavor and adds texture, while the pastes are very salty and should be used sparingly... The yellow bean paste is tau cheo... Sold in glass jars and cans. Look for Koon Chun Sauce Factory, Kon Yick Wah Kee bean sauce, Amoy, or Yeo's.

Chapter 18, titled “Japanese food products” (p. 168-81) includes: Tsukemono (pickled in miso), miso paste, shiromiso, akamiso, mamemiso, natto, miso soup, noodle dipping sauce base (memmi), tamari sauce, teriyaki sauce, tonkatsu sauce.

Interesting non-soy products include: Sesame paste (p. 57). Satay sauce (with peanuts), gado-gado-dressing (p. 58). Peanut oil (p. 64). Sesame oil (p. 65). Amaranth (vegetable, p. 72). Winged beans (p. 76). Pickled wheat gluten (p. 108). Sesame seeds, peanuts, roasted peanuts (p. 118). Red/azuki beans, agar-agar (p. 121). Wheat gluten (p. 127). Sesame candy, peanut roll (p. 136). Sesame seed and peanut cookies (p. 137). Sweet red bean paste (azuki *an*, p. 139). Coix seed (Job's tears, p. 165). Japanese seaweed and kelp (p. 169-70). Umeboshi (p. 171). Fu (dried wheat gluten cakes), mochi (p. 177). Address: Writer, designer, illustrator and photographer, Miami Beach, Florida.

4072. Davidson, Alan. 1999. *The Oxford companion to food*. New York, NY and Oxford, England: Oxford University Press. xviii + 892 p. Illust. by Soun Vannithone. Index. 29 cm. [1500+* ref]

• **Summary:** The 2,650 alphabetical entries in this excellent encyclopedia and cornucopia represent 20 years of Davidson's work. The 175 illustrations by Laotian artist Soun Vannithone are superb. There are 39 longer entries about staple foods such as rice, noodles, and apples. A comprehensive bibliography provides access to further information. The book does not contain recipes.

Soy-related entries include: Bean sprouts (p. 64). Black beans, fermented (*chi*, p. 79). Kecap (Indonesian soy sauce, made “basically from soya beans and palm sugar only.” “The word ‘kecap’ has passed into the English language as catchup or catsup and then as Ketchup, which now means something quite different.” p. 429). Ketchup (“probably via the Malay word *kechap*, now spelled *kecap*, which means soy sauce. The word was brought back to Europe by Dutch traders who also brought the oriental sauce itself. The sauce has changed far more than has the word, although the name has appeared in a large number of variations such as catchup and catsup.” Discusses tomato ketchup, mushroom ketchup, and ketchup made from oysters, mussels, walnuts, etc., p. 430-31). Koji (p. 435). Lecithin (p. 447). Miso (p. 509). Natto (p. 530). Soybean (p. 739). Soy milk (p. 739-40). Soy sauce (p. 740). Tempe (or tempeh, p. 788). Tofu (p. 798-99). Yuba (p. 860-61).

Also discusses: Alfalfa (p. 10). Almond (p. 12-13, incl. “almond milk”). Amaranth (p. 13). American cookbooks,

history (p. 15-17). Azuki beans (p. 44-45). Barley, barley breads, and barley sugar (p. 58-60). Beef-BSE (mad cow disease, p. 68). Chia (p. 166). Cowpea (p. 230-31). Chufa (p. 185). English cookery books, history (p. 276-80). Five grains of China (p. 305). Gluten (p. 341). Groundnuts (or peanuts, p. 356-57). Hemp (p. 377-78). Hydrogenation (p. 391). Japanese culinary terms (p. 415-17). Kudzu (p. 437). Linseed (p. 454-55). Lupin (p. 463). Margarine (p. 478-79). Mung bean (p. 518). Nori (p. 534). Noodles of China (p. 537, incl. "Gan si {soya bean noodles}" and "Fen si {also fen-szu} {mung bean vermicelli})." Oncom (p. 553-54). Quark (p. 644). Quinoa (p. 645). Seaweeds (incl. hijiki, kombu/konbu, nori, wakame, etc., p. 712). Sesame (p. 713). Shortening (p. 721-22). Sprouts (no listing). Tahini (p. 779). Toast (p. 797, incl. Melba toast). Ume and umeboshi (p. 817). Winged bean (p. 849). A brief biography and nice portrait photo of Alan Davidson, a man of extraordinary knowledge in the world of food, appear on the rear dust jacket.

• **Summary:** Discusses tofu, miso, edamame, soy sprouts, and roasted soybeans, with recipes for each. *Edamame*, or soybeans in the shell, are becoming popular, partly because they are fun to eat, tasty, and rich in protein. They are showing up in Asian restaurants and appetizer menus, and can be found in specialty and health food stores, and in the produce section of some supermarkets and farmers markets. A photo shows edamame. Address: Times Test Kitchen Director.

4085. Jannetta, Stephen. 2000. Re: Making miso at South River Miso Co. in Massachusetts, and at Soyalab and La Fonte della Vita in Italy. Letter to William Shurtleff at Soyfoods Center, Jan. 12—in reply to inquiry. 2 p. Typed, with signature on letterhead.
• **Summary:** Stephen worked with Christian Elwell at South River Miso Co. in Conway, Massachusetts, for two seasons: (1) Oct. 1990 to May 1991, and (2) Sept. 1993 to May 1994. After the first season he traveled to Italy.

The first miso that he produced in Italy was for Soyalab (located near Florence) during a period between February and May of 1992. This was basically experimental. They made about 500 kg of shiro miso and about 1,500 kg of barley miso. The shiro miso was packaged [in 350 gm glass

jars] and distributed under the Soyalab label in the spring of 1992.

Soyalab was purchased by La Fonte della Vita (located near Cuneo, Italy) in 1994 and Stephen went there in October of that year after his second season at South River Miso Co. He began production the third week of November and finished the last week of April 1995. He had to start from scratch [since the equipment from Soyalab was jury-rigged and small]. The equipment had to be designed and fabricated—everything from a large-capacity stainless steel steamer to the miso fermentation vats and koji crib. Some things had to be improvised. For instance, they had a small, free-standing movable “office,” about 7 by 11 feet, which Stephen insulated with foam board and used as a koji incubation room.

“In total [at La Fonte della Vita] we produced approximately 13,000 kg of barley miso and 2,100 kg of rice miso using organic soybeans and grains, and sea salt. All the miso produced at both companies was made from organic soybeans and grains. Also at about this time the 1,500 kg of barley miso that was produced at Soyalab in 1992 was packaged and distributed, I believe, under the Soyalab label.”

Stephen encloses 24 color prints, each 4 by 6 inches, all taken at La Fonte Della Vita (60 miles southwest of Torino) in 1995. These include: (1) Exterior view of the factory. (2-3) Stainless steel steamer and mixer used to combine koji and sea salt. (4) Wooden koji crib on wheels next to grain steamer. (5) Koji cooling tables (waist height). (6) Koji crib by koji incubation room with wooden trays inside. (7) Stephen harvesting koji from one tray. He is wearing a hair net, plastic gloves, surgical mask (he developed allergies, perhaps to the mold spores), and white robe. (8) Close-up of a chunk of koji held in one hand. (9-11) Barley koji in a wooden tray—at 3 stages of development. (12-13) Stephen foot treading raw miso. (14) Using a forklift to transport raw miso to aging vat. (15-18) Stephen shoveling raw miso into vat—4 views. (19) Stephen standing next to first vat, filled with 4,200 kg of barley miso. The top of the vat is at eye level. (20-21) Moving the third vat into place using a forklift. The two vats behind it are filled with miso and weighted with concrete blocks. (22) Looking down into an empty wooden vat. (23) Domenico, a maintenance man and co-worker, waving, with vats in the background. (24) A small vat used for 2,100 kg of rice miso.

Talk with Stephen Jannetta. 2000. Jan. 20. Soyalab was founded by Matteo Iacovelli. Then Marco Lamonica arrived, bought the company, and ran it for 2-3 years. He got some encouragement, ideas, and help from his friend Martin/Marty Halsey, an American who was active with macrobiotics and lived for a while in Italy; Marty also worked for quite a while with the macrobiotic institute in Switzerland [and founded and ran Soy Joy in Nyon, where he made tofu {from 1982} and miso {from 1983}]. Stephen

does not know who Marcello Panchetti was; he may have provided financing for the company. Address: 349 W. Woods Dr., Lititz, Pennsylvania 17543. Phone: 717-626-2049.

4086. Photographs taken at South River Miso Co. 2000. Conway, Massachusetts.

• **Summary:** These three color photographs (each 5 by 5 inches) were sent to Soyfoods Center on 13 Jan. 2000 by Christian Elwell. All three have appeared (in black and white) in past issues of South River Miso Co. newsletters and brochures. They show: (1) The miso shop and the Elwell's house in the winter, decked with snow at evening; white smoke rises from four chimneys. Superb photo—by Will Elwell! (2) Christian Elwell, standing by a wooden door wearing a blue bandana head-cover, rimless glasses, and a white apron. On the wall is a small color framed painting of the Madonna and child. These first two are from: A gift from the gods (Brochure; March 1988).

(3) A view from the east in the fall showing the miso shop and home surrounded trees and bushes. The sumac bushes in the foreground are brilliant red. From: *River Currents* newsletter (Winter 1998, December). Address: Conway, Massachusetts.

4087. Lewycky, Jerry. 2000. Starting a new miso company in Canada (Interview). *SoyaScan Notes*. Feb. 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jerry (whose last name is pronounced luh-WIK-ee) learned how to make miso from Yasuo Yoshihara. He started making miso in April 1999 and now has about 20,000 lb “brewing” in vats, each of which contains about 7,000 lb of raw miso. He has two vats full of 2-year barley miso and one vat full of 2-year brown rice miso. These will be ready for sale in the fall of 2000. He would also like to make a short-term white miso. He has not yet decided the name of his company, but he is considering “Miso Tradition.” Jerry also has another miso teacher—Don DeBona. He visited Don several times in North Carolina—after he was no longer employed by American Miso Co.—and Don visited Jerry once in Claremont, Canada; he has been very helpful. Don still lives in his house right beside the miso factory in Rutherfordton, and is now working as a forest ranger for the Forest Service in North Carolina, but he has expressed an interest in making miso again, perhaps with Jerry. Jerry has traveled to Japan several times when he was co-owner of Timbuktu Natural Foods. He sold the company for a good price to a guy who bought it hoping to make a lot of money; he ruined the company. Jerry plans to sell his miso in glass jars. He believes he can take over much of the Canadian miso market now owned by South River Miso Co., because their miso is very expensive in Canada. Address: R.R. #4-2090, Claremont, ON L1Y 1A1, Canada. Phone: 905-649-1988.

4088. Purvis, Kathleen. 2000. Say soy! New foods and drinks keep sprouting from these magic beans. *Post-Dispatch* (St. Louis, Missouri). Feb. 14.

• **Summary:** Perhaps the tastiest form of soy is edamame. These green soybeans, boiled, salted, and served chilled, are the “latest craze in the chi-chi [“chic”] cocktail set.” In Japan they are served as snacks with beer or sake.

In the six months before June 1999, sales of soyfoods have grown 34.4%, according to data from SPINS. Sue Havala notes that soymilk is now available at mainstream food stores / supermarkets. A full-page color photo shows bright green edamame, with the pods both opened and closed. Contains four recipes and a glossary of the following: Green soybeans, soymilk, soy flour, soy nuts, canned soybeans, soynut butter, miso, tofu, tempeh, soy sauce. Address: Knight Ridder Newspapers.

4089. Ono, Tadashi; Bittman, Mark. 2000. The chef: A glossy coat of miso adds flavor to a steak. *New York Times*. Feb. 16. p. F5 (L), col. 1.

• **Summary:** “During the last few years, fish marinated in miso has become a popular dish in restaurants all over town.” Contains a recipe for Beef with miso-chili glaze. Address: 1. Chef, Sono Restaurant, Manhattan, New York.

4090. Jessop, Doug; Mullin, John. 2000. How their Canadian miso won a prize in the Japanese miso contest (Interview). *SoyaScan Notes*. Feb. 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Canada has been working for many years to develop food-grade soybeans that are especially well suited for making Japanese soyfoods, such as miso. This year Doug and John entered their miso in the Japanese national contest and won two Special Participation awards. Doug explains: They started by making miso using three Canadian soybean varieties: Harovinton (released in 1989), AC Onrei (released in 1997; “AC” stands for Agriculture Canada), and AC 756 (a double lipoxigenase null variety). They made miso from each of these three soybean varieties and sent it for evaluation to the Nagano Research Institute. NRI said that, of these three, the miso made from the AC Onrei variety was the best, so they concentrated on making miso from that soybean for competition. AC Onrei is a very large-seeded, long-season, white hilum, buff colored soybean, one of whose parents is Enrei—a large-seeded Japanese variety. Most of the miso they entered was red miso; some of it was rough (unground) and some was finished/fine (smooth/ground). They entered their miso in two different contests: The All-Japan content and the Nagano contest, and they won an award for each. This was surprising because AC Onrei was not bred as a miso-type soybean; it has a high protein content and was originally developed as a soymilk and tofu bean. For miso soybeans, the Japanese always look

for high sucrose—over 7%; AC Onrei has 6.8%. They also look for total free sugars, of which AC Onrei contains about 10.5-11% (about average). Even though about half the sugars are probably bound up in pectins or cellulose and have no effect on the miso flavor, they still like to know the total sugar content.

Entering and winning this contest was a new step forward for the Canadian soybean folks. “It’s really something special.” Doug has been taking Japanese language lessons. The miso group of which John is the project leader is now starting to log in soybean variables on a database, which has fields for sucrose, total free sugars, color, etc. For miso soybeans (including red miso or long-term soybean miso), the Japanese prefer a yellow color to a whiter color—which the tofu and soymilk makers look for.

John explains that he is a food scientist, not a soybean breeder. We talked about 6 years ago when he was starting to work on miso, and he ordered a search on miso from the SoyaScan database. The breeders are the key to the process; at Harrow they breed mostly food-type or food-grade soybeans rather than commodity-type or oilseed-types—which are bred mostly at Ottawa and Guelph.

John’s miso group at Harrow has developed a close working relationship with the Food Research Institute in Nagano; they now work directly with one another. About two years ago, Mr. Fujimori, a miso maker with whom they have developed strong ties over the years, was in Canada on one of his trips. John gave him (for the first time) some homemade miso that his group had produced. He sniffed it and looked at it and said “This isn’t too bad.” He took it back to Japan, where it was evaluated and the results were sent to John—with Mr. Fujimori’s interpretation. The conclusion was: “It’s okay but... don’t give up your day job.” John wrote back asking how his group could improve the miso. That was they key! Mr. Fujimori came to Harrow again with another person, gave John’s group a lot of technical information, suggested that he use that information to make more miso—and to enter the miso in the annual Japanese miso contest! Mr. Fujimori provided the koji and John got a microbiologist involved. John’s group now made miso from three different soybeans (see above) and the scientists and judges at the FRI in Japan “were quite surprised.” They said “This isn’t bad.” They chose the best one. So John’s group made larger batches and sent them to Japan in October 1999 for entry in the annual contest. In November John went to Japan to be present at the contest—although nobody can observe the judging. He learned that this was the first miso ever entered by foreigners in the Japanese contest. He also learned that the Canadian miso was not being judged with or against the Japanese miso. They were judging it separately in a special category—of which it was the only entry. Both awards for an “E” for effort and for reaching a high standard. “Miso is kind of a religion in Japan and it for an upstart like us to come in

might not go down too well. But we found it interesting that they used our presence there for publicity—in a big way.” John also discovered that the koji in all miso entries *must* be made from Japanese rice—even though a lot of Thai rice is used in making commercial miso in Japan. “Our real mission there was to raise the profile of Canadian-grown soybeans and to increase exports of Canadian soybeans. We want to breed soybeans that are very well suited for making miso in Japan. We are not interested in making miso to sell to Japan. However there is a good possibility of developing a domestic market for miso in Canada.”

John is also deeply involved in trying to understand “stone seeds” or hard-seeded soybeans that do not absorb water well. Part of the problem seems to be related to weather/environmental conditions during the growing season. John hopes to try to understand the problem at the genetic level. “We now have a very heavy experimental stone-seed line.”

John enjoys miso at home and he has served miso soup at the research station on several occasions. Last week he had it served at the Rotary Club. In each case, everybody liked it. “Fermented foods add such a variety of textures and flavors that people enjoy.” Address: 1. Food Processing Technologist; 2. Food Scientist: Both: Agriculture and Agri-Food Canada, Greenhouse and Processing Crops Research Centre (GPCRC), Highway 18 East, Harrow, ON N0R 1G0, Canada. Phone: 519-738-2251.

4091. *Ontario Soybean Growers Newsletter*. 2000. Japanese miso awards presented. Feb. p. 3.

• **Summary:** “Agriculture and Agri-Food Canada scientists at the Greenhouse and Processing Crops Research Centre (GPCRC) in Harrow recently received two Special Participation Awards for the first foreign entries in miso competitions in Nagano and Tokyo, Japan... Japan requires approximately 160,000 tonnes of soybeans annually to produce miso, some of which comes from Canada.

“The miso production test program at the federal research centre at Harrow began in March 1998 to support the centre’s soybean breeding program and to evaluate the suitability of Canadian soybeans for making miso.”

“Dr. John Mullin, the miso project leader, said it was a great honour to receive the awards, which recognize the effort and progress that the Canadian researchers have made in making miso. Dr. Mullin traveled to Japan to submit the miso for competition and was on hand to accept the awards.

“The soybean breeding program at the GPCRC is known throughout the world for its research on food-grade soybeans. Harovinton was the first food-grade soybean variety developed in Canada for the Japanese tofu industry, and helped pave the way in establishing Canadian food-grade soybeans as a premium quality product in Asia.”

A photo shows Dr. Jonn Mullin and Food Processing Technologist Doug Jessop, each holding a framed plaque

(written in Japanese). On a table in front of them are samples of their award-winning miso. Address: Box 1199, Chatham, ONT, Canada N7M 5L8. Phone: 519-352-7730.

4092. McMahon, Mae. 2000. History of the American Miso Company property (Interview). *SoyaScan Notes*. March 27. Conducted by William Shurtleff of Soyfoods Center. [3 ref]
 • **Summary:** In Sept. 1975 Robert Warren Deakin and his wife, Karen Ann, purchased two tracts [pieces] of land (48.3 acres and 44.08 acres = 92.38 acres total) in Green Hill township, Rutherford County, from Grover K. Carver and his wife Lyla H. To do so, they borrowed \$89,325.50 from the Tryon Federal Savings and Loan Assoc. on 19 Sept. 1975. This is recorded as a deed of trust (a loan made with land as collateral) of that date found in book 223, page 411.

Then on 26 Jan. 1979, Robert W. Deakin and his wife deeded [sold] the same two tracts of land to Lawrence L. Bridges and E. Milton Singletary. The deed is recorded in Deed Book 401 on page 146, Rutherford County Register. Recorded Jan. 31.

On 5 Feb. 1979 Bridges and Singletary got a deed of trust (borrowed money against the land), recorded in deed of trust book 262 on p. 695. Apparently Bridges and Singletary assumed a deed of trust (agreed to take over the land payments and pay the balance due) that Robert Deakin had taken out from Tryon Federal Savings, plus they gave him \$8,000. That loan of \$8,000 was paid off on 13 Aug. 1979.

Then on 7 Aug. 1979 the names of Oak Feed Miso, Sandy Pukel, or any Belleme are first mentioned on any document we can find. On that date Lawrence L. Bridges and E. Milton Singletary deeded the two parcels of land totaling 92.38 acres to Oak Feed Miso. This deed is recorded in book 405 on page 727. At this time Oak Feed Miso assumed the deed of trust to Tryon Federal Savings (see book 223, p. 411) and also paid \$10,000 (as shown by a real estate excise stamp at the bottom of the deed). Note: In North Carolina, houses located on land are not usually mentioned on the land deeds.

On 19 May 1986 some 7.05 acres of the property were sold.

On 4 Dec. 1992 the deed of trust was paid off, i.e., the land was completely paid for.

On 1 Sept. 1995 some 19.11 acres were sold.

As of today (27 May 2000) American Miso Co. owns 66.97 acres. Address: Rutherford County records room, Rutherfordton, North Carolina. Phone: 828-287-6195.

4093. Bittman, Mark. 2000. Faster than you can say soup: The minimalist. *New York Times*. March 29. p. F3, or p. B12 (National ed.).

• **Summary:** “It would be hard to find a more powerfully complex natural convenience food than miso.” Miso, which is more intense than soy sauce, but not saltier, can be used

to make dressings and sauces, or toppings for tofu. “But miso’s most amazing feat is turning a cup of hot water into soup in about 30 seconds.” Contains a recipe for “Nearly instant miso soup,” with tofu, carrots and scallions.

4094. **Product Name:** Sesame Miso Dressing.
Manufacturer’s Name: Follow Your Heart Natural Foods Market and Vegetarian Restaurant (Marketer-Distributor).
Manufacturer’s Address: California. Phone: 1-800-40-Salad.

Date of Introduction: 2000. March.

Ingredients: -

Wt/Vol., Packaging, Price: -

How Stored: -

Nutrition: -

New Product–Documentation: Sell sheet sent by Patricia Smith from Natural Products Expo, Anaheim. 2000. March. “Follow Your Heart–Fresh & Natural Dressings.” Glossy, color, both sides. They opened for business in Southern California in 1970.

4095. **Product Name:** Japanese Miso Dressing, Sesame Soy Dressing, Teriyaki Sauce.

Manufacturer’s Name: Red Shell Foods Inc. (Marketer-Distributor).

Manufacturer’s Address: 825 Baldwin Park Blvd., City of Industry, CA 91746. Phone: 1-800-40-Salad.

Date of Introduction: 2000. March.

Ingredients: Miso dressing: Soy bean oil, rice vinegar, soy bean paste (soy beans, rice, salt), white wine vinegar, sugar, etc.

Wt/Vol., Packaging, Price: -

How Stored: -

Nutrition: -

New Product–Documentation: Sell sheet sent by Patricia Smith from Natural Products Expo, Anaheim. 2000. March.

4096. Stephens, Roger; Stephens, Jane Ade. ed. and comp. 2000. Soyfoods guide 2000: Helpful tips and information for using soyfoods. Indianapolis, Indiana: Stevens & Associates, Inc. Distributed by the Soy Protein Partners. 24 p. Illust. No index. 28 cm. [23 ref]

• **Summary:** This guide is available only on a limited basis to dietitians and health professionals. Contents: Health: Add soy to diet to reduce heart disease (FDA recommends 25 grams of soy protein a day to reduce blood cholesterol levels), sample day soy meal planner (easy ways to add 25 grams of soy protein). Daily soyfood guide pyramid. Soy and your health–Scientists are learning about soy’s health benefits: Isoflavones, heart disease, menopause & osteoporosis, cancer, allergies, diabetes & kidney disease, fat. Soyfood Descriptions: Meet the bean: Green vegetable soybeans (edamame), hydrolyzed vegetable protein (HVP), infant formulas, soy-based, lecithin, meat alternatives (meat

analogs), miso, natto, nondairy soy frozen desserts, soy cheese, soy fiber (okara, soy bran, soy isolate fiber), soy flour (50% protein), soy grits, soy protein concentrate, soy protein isolate (isolated soy protein, 90% protein), soy protein, textured (flour or concentrate), soy sauce (tamari, shoyu, teriyaki), soy yogurt, soybeans, soymilk, soy beverages, soynut butter, soynuts, soybean oil & products, sprouts, soy, tamari (see soy sauce), tempeh, Teriyaki sauce (see soy sauce), tofu & tofu products, whipped toppings, soy-based, yuba. Helpful charts: Soyfood substitutions, soyfood isoflavone content. Soyfoods web site. Soyfood composition. Recipes using: Meat alternatives, textured soy protein, whole soybeans, soy flour, soynut butter, soymilk, tofu. Address: 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

4100. Spiller, Cheryl Solomon. 2000. Fermented food: In the natural kitchen. *Vegetarian Times*. April. p. 147.

• **Summary:** A table gives basic information about four fermented foods, including miso. Look for: Unpasteurized miso, sold in the refrigerated section. Nutrients of note: Isoflavones (genistein and daidzein). A color photo shows red miso in a small white bowl.

4101. Spiller, Cheryl Solomon. 2000. Fermented food. *Natural Health* 30(3):147. April. *

4102. *Vegetarian Times*. 2000. Glossary. April. p. 119.

• **Summary:** Five of the seven entries are for soyfoods: Hoisin sauce, edamame, miso, tempeh, and tofu. The pronunciation of each is given.

4103. Pukel, Sandy. 2000. Why were Patricia and Joseph Carpenter kicked off the miso company land in Rutherfordton, North Carolina, and denied their share of ownership in the company? (Interview). *SoyaScan Notes*. May 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sandy has just finished talking with John Belleme on the phone to compare their memories of this unpleasant incident. Their memories were exactly the same. "John remembered even more things that the Carpenters didn't do than I remembered." "If they were upset or felt they were owed money, why did they wait 20 years to tell me about it? That's pretty bizarre."

It was very clear to everyone else why they were kicked off the land. The miso company bought the land. Joseph was hired as a carpenter-handy man and paid a salary to build the factory there and to oversee things. They had their kid in private school, and they lived rent-free. "We paid for everything. John got back and nothing was done. They lived the life of Riley [a carefree, comfortable way of living] for a year."

Sandy says that his job was not at all to tell them what to do. Before he left for Japan, John gave them specific instructions for specific projects. It was very clear, and John is very meticulous. Anything he didn't tell them before he left, he certainly would have communicated to them from Japan. "When John got home, he totally freaked out. He

absolutely had a heart attack. He couldn't believe it. They had done nothing. They knew very clearly what they were supposed to do and they didn't do it. No ifs, and, or buts about it." This put the miso company 6-12 months behind schedule. Moreover, "they got paid a serious salary to do it—and they lived rent-free, in a beautiful set-up there."

Question: "Why do you think Joseph didn't do the required work?" Sandy's answer: "I guess he wasn't motivated or he wasn't capable. I don't really know why. I haven't seen him in many, many years. He's a nice guy but I think he needed more direction." Patricia wanted to be part of the miso company more than Joseph did. "She's very outgoing and aggressive, and maybe she oversold him. He was more of a laid back Hippy carpenter." Sandy made John Belleme a deal that if he went to Japan, learned how to make miso in the traditional way, then came back and made miso for the new company, Sandy would give him \$25,000 in stock. He did what was expected, and got what he was promised. Actually John got his \$25,000 in stock even before he left for Japan, because there was no question that he was going to do what he said he would do. Address: Owner, Oak Feed Store and Restaurant, 4500 S.W. 63 Ave., Miami, Florida 33133. Phone: 305-446-9036.

4104. Roberts, Patricia. 2000. History of interest in macrobiotics. Living on the Oak Feed Miso Co. land in Rutherfordton, North Carolina from 1979 to 1980. Part I (Interview). *SoyaScan Notes*. May 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** 1972—Patricia meets Joseph Carpenter (a native of California) in Oregon on a farm where she went to do yoga; she was very involved with yoga and meditation. Joseph is a very friendly and personable fellow, and he has an "incredible memory. Most people are in awe of his brain." They went together to Tucson, Arizona, to pick oranges. She was living on oranges and bananas, had lost much of her memory, and was very spaced out and emotional. They went into a place named The Granary, where they met Jack Garvey, who brought them into the macrobiotic community. She first met Michio Kushi in Tucson, when he came there to lecture.

1973 Sept. 15—Patricia and Joseph Carpenter are married in Arkansas. They were invited to Arkansas to do a little farming by some friends who had some property there. Their friends were deeply involved with Stephen Gaskin and The Farm in Summertown, Tennessee. They arrived with all of their macrobiotic "judgments" and that led to conflicts. They built a little house on the land in Arkansas, and Thom Leonard came to visit them there in 1973. He took care of their house for the winter when the Carpenters went to visit Patricia's parents in Florida.

1973 Nov. 11—Their first child, Yana, a girl, is born in Arkansas. They leave to go to "Snowflake," the first macrobiotic conference in Arizona. It was held on property

near a Hopi reservation that a group of people in the macrobiotic community, including Michio, purchased.

1974—Patricia goes to a macrobiotic conference in Miami and meets Sandy Pukel for the first time. She becomes friends with Sandy and his wife, and saw Michio for the second time.

1975 fall—Patricia arrives (with her daughter, Yana) in Brookline, Massachusetts, and lives in the macrobiotic study house run by Ken and Ann Burns. After about 3 months she moves to another study house. Joseph arrives later, in about 1976, and lives in the study house run by Jack and Barbara Garvey, on the same street as the Burns' house. Joseph Carpenter was very close to Jack Garvey. They both have a close relationship with Michio and Aveline Kushi. For Patricia, who had a Catholic upbringing, Michio was a spiritual teacher. John Belleme arrived in Brookline about mid-1976 and lived in the Burns' study house; it was at about this time that Patricia first met John—though they never lived in the same study house. Joseph designed and built an addition to the Kushi's home at 62 Buckminster Road; it was for Aveline—the bathroom of her dreams on the second floor. One day Aveline came to see Patricia in her apartment. She liked a chopping block table that Joseph had built for Patricia. Joseph is an excellent carpenter. He did much of the finish carpentry on the original Erewhon retail store on Newbury St. in Brookline, including the wooden bins for grains and beans.

1977 Christmas—Patricia and Joseph go to Florida for Christmas, one of many trips they took there. Patricia's parents and many of her friends live in Florida; she loves to visit. In early 1978 Joseph worked as a carpenter for several months in Sandy Pukel's Oak Feed Restaurant in Coconut Grove, Florida. He had gotten to know Sandy because Patricia and Sandy were close friends. During this time Sandy came to realize that Joseph was a skilled carpenter.

1979 Feb. 12—Patricia's second child, Benjamin, is born in Brookline. At about this time Patricia's sister, Christine, moved up to Boston to be near Patricia. In the spring of 1979 Patricia went to Florida to visit her parents and show them her new baby. Sandy flew Joseph down to talk business. Sandy had now decided that he wanted the Carpenters to become part owners of the company—so he offered them a deal, which, as near as Patricia can remember, was as follows. He asked them to live on the land the miso company planned to purchase while the Bellemes were in Japan learning how to make miso. If they would live and work the land, become a presence in the community, and then become owners of and workers for the company, Sandy offered to pay their expenses and give them \$25,000 worth of company shares for each year they stayed and worked on the land—including the first year, of course. But this agreement was verbal; nothing was put in writing. Back in those days, Patricia, recalls, people were less businesslike than they are today.

Looking back, Patricia believes that she and Joseph failed in their negotiation of this deal. Joseph is an artist, and he is much better at self expression than at negotiating agreements. Sandy is very good at negotiating.

1979 May—On Memorial Day weekend, at the end of May, after four years in Brookline (near Boston), the Carpenters leave and move to Florida for the summer, to be near Sandy, to work out the details of beginning the miso company. In leaving Boston, they were giving up a lot, including many friends (“We were very plugged in. My sister, Christine, was quite upset that we were leaving”) and Joseph’s good carpentry job. But they believed that Sandy’s deal made the move worthwhile.

Patricia flew to Florida with her two young children. At Sandy’s request, Joseph drove their van so that he could go to Hendersonville to meet with several real estate agents. The miso company property had not yet been decided on or purchased. The realtors took Joseph to visit several areas on the isothermal belt, but they didn’t find the property at that time. The isothermal belt means “never too hot, never too cold.” But it freezes and snows a little during the winter.

Patricia recalls that they bought the property from Bob Deakin. Joseph knew Bob Deakin. Bob was driving with his wife and daughter at about that time, on a holiday, to chimney rock. A truck was coming toward Bob’s car and suddenly a bee flew into the cab of the truck. When the truck driver started to swat the bee, his truck swerved across the road and killed Bob Deakin’s daughter. Bob kindly refrained from suing the truck driver or truck company, and somehow, because of the accident (or perhaps because of big hospital bills) he lost his property—which the miso company later purchased.

In Florida, Patricia and Joseph rented a place for the summer on Highland Beach near Boca Raton. They had visits with Sandy and learned more about his plans for the miso company. That summer, Michio came down and did a seminar, which they attended. Michio wanted the land to be used as a summer camp and a place to garden; he also wanted to build a dam and lake. John and Jan Belleme were preparing to go to Japan. Continued. Address: Grass Valley, California.

4105. Roberts, Patricia. 2000. History of interest in macrobiotics. Living on the Oak Feed Miso Co. land in Rutherfordton, North Carolina from 1979 to 1980. Part II (Interview). *SoyaScan Notes*. May 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1979 Aug. 1—A special election is held on alcoholic beverage control in the town of Rutherfordton, North Carolina. Called the ABC Referendum, it would decide whether alcoholic beverages in containers could be sold in special “ABC Stores” and whether off-premises sales of malt liquor (mostly beer) would be permitted. Note: Before that election, a person had

to go to South Carolina to buy such beverages. To this day, all cities in Rutherford County except Rutherfordton and Lake Lure are “dry”—one cannot buy alcoholic beverages there. Throughout the county one cannot buy any alcoholic beverages (except wine) by the drink or glass. No sales of any alcoholic beverages are allowed on Sundays.

1979 Aug. (late)—The Carpenters and their two children arrive (in separate vehicles) in Rutherfordton from Florida and move onto the miso company land. Patricia remembers the date clearly because people in town were buying beer to celebrate the implementation of the ABC Referendum. The Carpenters were the first people to live on the land after it had been purchased by Oak Feed Miso.

Two months later, in Oct. 1979 John and Jan Belleme leave for Japan. Patricia recalls that the Bellemes stopped by the land briefly on their way to Japan and left some things in the house. Patricia recalls that there was no discussion at this time about the work that Joseph was supposed to do during the coming year. There was no list of things Joseph was supposed to do. John never asked: “Is everything clear? Do you have any questions?” “We were all in our twenties and we all had a dream. Nobody knew exactly how it was going to happen, but we had a very nice relationship with John at the time. We were close friends.” It is also important to remember that Sandy was in charge of the miso company, not John.

During the time Patricia and Joseph lived on the land, they were very happy. Patricia recalls: “It was a wonderful time for us.” Joseph worked hard every day, out on the land, while they were there. He cut down trees and cleared lots of land, for the miso factory and warehouse, for planting the soybeans, and for their own home. Then he spent days rototilling and planted many acres of soybeans on the land he had prepared. He worked with local soil and agricultural departments in preparation for a dam that was to be built on the property. He also worked with the Farm Bureau and the water department—to get the basic groundwork done for the miso company. But he didn’t do any carpentry at all when he was on the land, because he was waiting for John Belleme to send the plans, measurements, kinds of wood, where to build, the orientation of the buildings (*Feng-shui*), etc. Patricia recalls no communication with the Bellemes after they were in Japan. Joseph was in regular communication with Sandy Pukel in Florida. Sandy would say “Hang on” but never sent the needed information.

In exchange for their work, the Carpenters got use of the house for free of charge plus the electricity and food expenses. Patricia taught cooking weekly classes to local people, and about 40 typical Americans came to class after class. Michio and Aveline Kushi came once to visit while the Carpenters were there; Patricia remembers his black suits, his cigarettes, and the fact that he liked her rice.

“Joseph is a very laid-back guy. He’s an incredible artist. He’s not threatening. He always follows through with

things. He has a very unique constitution and spirit. He doesn't talk about other people; he's not a schmoozer."

1980 June—John and Jan Belleme return from Japan. Patricia recalls that "When John and Jan came back from Japan, they were very, very different people." John had been rigid in Boston, but now he was much more rigid. After several weeks of sharing their house with the Bellemes, the Carpenters are told to leave the land. Patricia thinks it was John Belleme who actually told them this, but she is quite sure that it was Sandy who made the decision. She recalls that Sandy phoned Joseph several times after the Bellemes returned to discuss problems. For example, the Carpenters had a new truck that was owned by the miso company but that was registered in Joseph's name. Patricia recalls that a settlement deal was made: "When you turn over all the legal papers, then we'll give you the money we promised you. They gave us \$1,000, then they promised us an immediate \$8,000 more upon receipt of the truck title." Patricia is sure that the amount promised was \$8,000 but she does not know how that number was arrived at.

To this day, neither Patricia nor Joseph know why they were told to leave. She and Joseph were left in Rutherfordton without anything to do, and with two young children. Patricia was pregnant with their third child. They borrowed money from Patricia's father and bought a beautiful 50-acre farm in Rutherfordton. They had lived (uncomfortably) in the same house with the Bellemes for more than a month. Patricia recalls: "Losing the miso company was a disaster for Joseph. He never wanted to talk about it again. I think he never really got over it."

Not long thereafter, Jan Belleme come to visit Patricia and Joseph. She brought a basket of vegetables that the Carpenters had planted in the garden on the miso company land. As she arrived, Patricia clearly remembers thinking that she was bringing the money they were owed. "It was always expected."

1980 Nov. 23—The Carpenters' third child, Patrick, was born at that farm. After the birth, Patricia was thin and weak. Jack Garvey came to visit and directed her to eat differently. "It saved my life."

Patricia has nothing but good memories of the time she and Joseph lived on the miso company land. "Joseph was a very happy, healthy, and active man, with a lot of good energy, while we were living on that land." But she has bad memories from the time they were kicked off the land and not paid the money they were owed. Joseph also has very bad feelings and memories about the latter events. Joseph has an incredible memory for facts and details. Patricia notes that she doesn't hold onto things, but there was something about the way their agreement with the miso company ended that has been the only thing in her life that she has sadness about. She has tried to work it out, but she still feels badly about it. She still does not understand why

John Belleme asked Joseph to leave the land. Continued. Address: Grass Valley, California.

4106. Roberts, Patricia. 2000. History of interest in macrobiotics. Living on the Oak Feed Miso Co. land in Rutherfordton, North Carolina from 1979 to 1980. Part III (Interview). *SoyaScan Notes*. May 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** 1983 Feb.—Patricia leaves Joseph and moves away from North Carolina, to California.

1983—In California, she lived for eight years in Marin County, where she was a disciple of Bubba / Da Free John, an American-born spiritual teacher who had a community at Clear Lake. These were the best years of her life. Da Free John lived for a while on an island in Fiji and now he lives on one of the San Juan islands off the coast of Seattle, Washington. 1993—Patricia moved back to Boca Raton, Florida, to be near her family; there she ran an antique shop for 7 years. After returning to Florida, Patricia really wanted to call Sandy—but she couldn't; it was just too difficult.

1997 Nov. (late)—Patricia accidentally bumps into Sandy at a Heat basketball game in Florida. Sandy phoned her later that night, because he was so excited to see her again. asked why she had not called him—he had always really loved her. She said, "Because I have been so angry with you all these years." He said, "What about?" He did not know, so she told him a little bit about why she was still upset—but she did not hold anything over his head. He got it. On many nights thereafter they talked on the phone for hours. But they did not get together until early 1998, when they started dating. At her birthday dinner, on 28 March 1998, Sandy told her (she remembers this very clearly, as he sat across the table) that he had called John Belleme and that John had said Patricia was right—that Patricia and Joseph had been asked to leave, that they had been "screwed" (i.e. treated very unfairly), and still had not been paid the money they were owed. It wasn't clean. Patricia was happy to hear that John's recollection was the same as hers. Patricia and Sandy got involved with one another again, and Patricia recalls clearly that Sandy said something like "Stick with me, baby, and I'll be sure you get the money back." Again she believed he would rectify the unfair situation. Sandy said he was shocked at how much John remembered about how Patricia and Joseph had been treated unfairly.

Patricia again ended her relationship with Sandy on a bad note." He is the only person with whom she still has a bad relationship.

For the last eight years Patricia has lived in Boca Raton, where she ran an antique shop. Recently she moved to Grass Valley, California, to be near her children.

Sometimes Patricia sits down with her journal and reviews her whole life; she feels as if events fall into decades, and how quickly time passes. She continues to have a strong interest in meditation, yoga, and

vegetarianism. She no longer practices macrobiotics, but she has been strongly influenced by it and she loves brown rice and some other macrobiotic foods. She is now feeling an urge to start teaching cooking classes again; she enjoys it very much and is very good at it. Address: Grass Valley, California.

4107. Elwell, Christian. 2000. Using barley to make miso (Interview). *SoyaScan Notes*. May 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Naked barley (called *hadaka mugi* in Japanese) is like wheat in that the outermost husk can be easily removed, whereas this husk tends to adhere to the bran layer of regular barley. However naked barley has a rubbery skin around the endosperm which the koji cannot penetrate. Of course, the consistency of this skin is different among varieties, yet none of the ones that Christian has tested have made good koji. Apparently naked barley was the more primitive and typical grain in some indigenous cultures. Tibetans grow naked barley and grind it to make their *tsampa* or barley cereal.

Before it can be used to make koji for barley miso, regular barley must be pearled; naked barley need not be pearled before it is eaten. Barley is sold after having been pearled to different degrees, meaning that different amounts of the bran layer have been removed. Pot barley (also called “hulled barley”), which Christian uses to make barley miso, has most or all of the outer husk removed but it is hardly pearled at all, so all or most of the bran layers remain around the endosperm.

Mugi-cha (Japanese barley tea) is made from barley from which the husk has not been removed. Address: Founder and Owner, South River Miso Co., South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

• **Summary:** This is basically a reprint of Dana’s 1996 book titled *Soy! 75 Delicious Ways to Enjoy Nature’s Miracle Food*, also published by Prima Publishing. It contains no new text and no new recipes; a few small errors have been corrected and the design of both covers and the title page is new. Address: Food writer, New York, NY.

4109. Kato, Hiroko. 2000. How to eat at a Japanese restaurant the vegan way. *Vegetarian Journal* (Baltimore, Maryland). May/June. p. 20-23.

• **Summary:** Describes how to avoid fish and bonito extract and flakes. Traditional Japanese vegan cuisine, called *shojin ryori*, was created by Zen Buddhists; it is very easy to enjoy beautiful and delicious Japanese vegan dishes at such

restaurants. Sushi can include *natto maki*, *yuba maki*, or *inari-zushi* (rice wrapped in season aburage). Tofu dishes may include *yu-dofu*, *hiya yakko*, *tofu dengaku*, *agedashi-dofu*, and *goma-dofu* (made of sesame seeds; no soy). Other dishes: Edamame, miso soup, vegetable tempura, or *gyoza*.

4110. Lear, Jane Daniels. 2000. Kitchen notebook: Behind the scenes with *Gourmet’s* cooks. *Gourmet* 60(5):255-58, 261. May.

• **Summary:** The title page announces that in this article you will learn “How to work soy into your everyday culinary repertoire.” The full-page section titled “Toying with soy” (p. 256) observes that there has recently been an “explosion of soy.” It’s no longer limited to natural foods stores and Asian markets. In a typical grocery store or supermarket, you’ll find tubs of tofu in the produce section, soy milk next to the cow’s milk in the dairy case, and *edamame* soybeans in the frozen foods section.

“Well, the stuff is good for you.” So Americans are learning how to cook with it and make it delicious—as many people in East Asia have long known how to do. Focuses on four foods: Edamame (“better than beer nuts”), miso, tofu, and Chinese fermented black beans (actually salted, fermented black soybeans, sold in Asian markets and sometimes labeled “Preserved beans”). A large photo shows these four foods; the edamame are in a metal Japanese-style strainer.

“Perhaps the most irresistible, and nutritious, cocktail nibble going these days is edamame—young, tender soybeans usually eaten straight from the pod. (Gently suck the beans into your mouth, and when serving them, don’t forget to provide a bowl for the pods.)”

One recipe is given: Kemp Minifie’s panfried tofu with Chinese black bean sauce (with “2 tablespoons Chinese fermented black beans”—which is standard fare at her Sunday night suppers. “Her ten-year-old daughter loves it so much that she’s requested it as her birthday meal for several years”).

Note: This is the earliest English-language document seen (Oct. 2008) that uses the term “Chinese fermented black beans” to refer to Chinese-style soy nuggets.

4111. Vought, Liz. 2000. The celebration table: Casual cooking. *Gourmet* 60(5):234-39. May.

• **Summary:** Soy-related recipes include: Miso marinated salmon with citrus and shiitakes (p. 236). Haricot verd, edamame, and purple potato salad (p. 226; calls for 1 lb frozen or fresh *edamame* (soybeans) in the pod).

4112. Carpenter, Joseph. 2000. Living in Boston and on the Oak Feed Miso Co. land in Rutherfordton, North Carolina from 1979 to 1980. Part I (Interview). *SoyaScan Notes*. June 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Joseph was born on 5 Aug. 1948 in Oakland, California, at Providence Hospital. He lived with his family in Berkeley until he was age 10; his father, who was a carpenter by trade, died in 1954, when he was still a boy. He and his mother then moved to nearby El Sobrante (by the back gate of De Anza High School—where he graduated from high school). He attended Contra Costa Junior College for two years, moved up to Sonoma State for a year, then dropped out. At age 19-20 (1967-68), he took off to see the world. As a young man, he became a skilled carpenter, learning by doing. Several of the men he worked with were good teachers.

A hippie during the 1960s, he met Patricia Roberts who was born in March 1947 in Queens, New York, and grew up in Rockaway Beach in Queens. Her father was a New York City police officer and detective for 20-25 years. Her parents retired to Florida in the late 1960s or early 1970s. When the kids were at home, they lived in a nice big home at Whitehouse Point; after the kids were gone, they moved to Deerfield Beach. Soon after meeting Patricia, Joseph stopped using psychedelics drugs and alcohol. They picked apples together in Hood River, Oregon, and lived in an old picker's camp. Having been overweight, he lost about 80 pounds in less than 6 months—and felt great. He and Patricia and a girl friend of hers migrated to Tucson, Arizona, where they were planning to pick oranges for the winter. While looking for a place to stay, they came across a macrobiotic bakery, The Granary, run by Jack Garvey. That was their first introduction to macrobiotics. Because of their largely raw food diet, they were somewhat resistant at first, but soon became friends and students of Jack's. In 1973 Joseph and Patricia were married in Arkansas.

1977 Feb.—Joseph arrives in Boston from Northern California; he is very sure of this date. He met Charlie Kendall (a maker of traditional natto, amazake, and mochi), who had just bought a house in Brookline by the railroad tracks; Joseph helped him extensively remodel that building. Charlie's wife, Yoko, was Aveline's sister. Joseph soon became friends with Bill Painter, who was a house painter by trade and also had a small shop in the basement of the Kushi's house. Before long Joseph was working as a carpenter with Bill Eggloff, building a handsome grain bin for Erewhon's retail store on Newbury Street. Using red oak and Plexiglas, they worked on it in the basement, which had a garage door that opened onto the alley behind the store. Bill, who lived on Cape Cod, stopped working for Erewhon when the bin was finished. But the store needed more fixtures, so Joseph made a bid, signed a contract, then installed new check-out stands, new shelves, and units to hold the crocks of bulk tamari, barley malt, etc. Joseph had a family to support, and carpentry was his livelihood, so he was paid for all work he did in the Boston area. Later, over 4-day weekend, he worked to tear out old bathrooms and office spaces to open up the cramped front of the Erewhon

store. He also did some work on a new Erewhon store in Brookline. After Erewhon moved out of their old 4-story brick warehouse, he worked on the huge modern warehouse that Erewhon moved into. The Kushi's house on 62 Buckminster Road had been the headmaster's house for a private school. Upstairs there was an institutional bathroom. Aveline asked Joseph to remodel it to make a private bathroom—with lots of tile. After about a year of working for the macrobiotic community (always for pay), Joseph got "burned out" and went to work for a regular contractor unconnected to macrobiotics.

1977 Christmas—Joseph and Patricia go to Florida for Christmas, one of many trips they took there. In early 1978 Joseph worked as a carpenter for several months in Sandy Pukel's Oak Feed Restaurant in Coconut Grove, Florida. He had gotten to know Sandy because his wife, Patricia, and Sandy were close friends; they had first met when they both went to a seminar Michio Kushi gave in Coconut Grove. After the restaurant opened, in about May 1978, Joseph and Patricia took a vacation to Jamaica. During the summer and fall of 1978 Sandy came to Boston several times. Each time he and Patricia and Joseph went out to dinner together. Sandy mentioned that he was thinking of starting a miso company and asked if they might be interested in getting involved. They expressed interest, but no definite plans or offers were made.

1979 Feb.—Joseph's second child, Benjamin, is born in Boston to his wife Patricia. The Carpenters took many trips to Florida, especially during the winter, to visit Patricia's parents. In about March 1979, over a long weekend, when Patricia and their two children were vacationing in Florida (visiting her parents), Sandy Pukel paid for Joseph to fly from Boston to South Florida for a meeting to discuss the part that the Carpenters might have in the development of the new miso company. Sandy knew Joseph's skills as a carpenter. Joseph recalls that the meeting was at Edmund Benson's house. Sandy said that he wanted Patricia and Joseph to become part of the miso company. In exchange for their labor, they would be given a share of the business ownership worth \$25,000. Joseph does not recall whether they would receive the \$25,000 once or each year that they worked—but he definitely recalls the \$25,000 offer. Joseph recalls that the talk at this first meeting was very general in terms of what kind of carpentry or construction work he would do for the company.

1979 May (late)—Joseph leaves Boston in his van, headed for North Carolina—after handing over their house to the next renters. On the way, following Sandy's instructions, he stops in Hendersonville, North Carolina, for about a week to check out some real estate. With real estate agents that Sandy Pukel and/or Edmund Benson had found, Joseph looks at property the agents thought might be appropriate for the miso company in the Asheville area and in Rutherford County. As far as he knows, Joseph was the first

person to actively look for land for the miso company. They found several properties that Joseph considered borderline, so Sandy (and probably John Belleme and Edmund) flew up from Florida and they all visited these sites together. Finding nothing that was suitable, they left. Joseph continued on to Florida in his van to be with Patricia and their children. Sandy continued to work with local realtors until he found a suitable piece of property. Joseph is quite sure that just before they finally purchased the land in Rutherfordton, Sandy, Michio and he (and perhaps a few other people) all went to see the property at the same time. They walked over the roughly 100 acres of land and through the beautiful house.

During the summer of 1979 Joseph and Patricia met with Sandy and Edmund several times to discuss their living on the miso company land while John and Jan Belleme were away studying miso-making in Japan. Though nothing was put into writing, Joseph and Patricia both recall clearly that their daily expenses would be taken care of, they would work on the land, and, at the end, they would own a part of this new business. They were not given any specific list of tasks or duties they were expected to accomplish. Continued. Address: 10655 Lakeshore Dr., Clear Lake, California 95422. Phone: 707-994-3218.

4113. Carpenter, Joseph. 2000. Living in Boston and on the Oak Feed Miso Co. land in Rutherfordton, North Carolina from 1979 to 1980. Part II (Interview). *SoyaScan Notes*. June 2. Conducted by William Shurtleff of Soyfoods Center. • **Summary:** Continued: 1979 Aug. (late)—Joseph leaves from the Boca Raton area of Florida in his van, pulling a U-Haul trailer filled with mattresses and furniture, and drives to the miso company land in Rutherfordton, North Carolina. Patricia's parents drove her up a day or two later. The first day that Joseph got to Rutherfordton was the first day that anyone could legally buy alcohol. It was the day the provision from the vote on Aug. 1 took effect. He distinctly remembers stopping at a service station in Rutherfordton; they were selling beer and everybody was talking about it. Before this, although liquor could not be sold legally in the area, there was plenty of bootlegging. One local bootlegger earned enough money to send his three sons through college. Or one could drive 45 minutes to Chesney, South Carolina, to buy alcohol legally. When someone was drunk and staggering a bit, they were said to have a "Chesney lean."

Joseph began his work of settling in by cleaning the house, mowing the lawn, and generally cleaning up. After a month or so John and Jan Belleme arrived on their way to Japan. John was driving his BMW motorcycle and Jan was driving their old beat-up Volkswagen. Joseph took the VW into Charlotte to trade it in for a truck to use on the land; it broke down in the used-car lot. John and Jan dropped off some of their personal possessions, and stayed for a week or

more before they continued on across the USA on the motorcycle to California, then Japan. Joseph is very sure that while John Belleme was on the land, he never gave Joseph a specific or even a general list of work he wanted to have accomplished while he was gone. It wasn't even clear yet where the miso factory was to be located. "Everything was up in the air." Also, John was working for Sandy—just like Joseph was.

After the Bellemes left, Joseph began by painting the entire inside of the house. Most of the land was unimproved pasture with tall weeds. He arranged for a tractor and a brush-hog to keep the weeds down, both to reduce fire danger and to make the land look nicer. He started a big garden (on a nice flat area down by the paved road where the miso factory was eventually constructed), but found out later that a previous owner, Bob Deakin, had grown so much corn there that the soil had been exhausted. So his first garden failed. Later he built up the soil using a Troy-Bilt rototiller.

He cut firewood, cleaned up and burned the slash (the tangle of brush and tree tops from "Nigger Pines" that had been cut and sold for pulpwood), dealt with the kudzu, etc. He laid the groundwork for a pond and dam on the property by contacting local agencies, gathering information, and sending it to Sandy. He and Patricia were in touch with Sandy by phone and letter. The few requests for work from Sandy (mostly laying the groundwork), Joseph completed promptly. For example, he collected and sent samples of wood and wooden pipes to John in Japan. He did not do any carpentry or construction work because no such work had been authorized by Sandy. Joseph recalls: "The owners of the miso company knew what they wanted to do, but they didn't yet know *how* they were going to accomplish it, or what form it was going to take. "It was kind of vague, with few details. There was not a lot of direction, so it was a struggle to keep busy; there's nothing worse than just doing nothing."

A letter or two was exchanged with the Bellemes in Japan, but none of these contained any discussion of work for Joseph to do. Rather the Bellemes described their Spartan existence.

Joseph put in a good day's work every day—weather permitting. In exchange, he had the house to live in, all expenses paid—such as utilities, food, gasoline, home insurance, and even schooling for their eldest daughter, Yana. He thinks that he and Patricia probably also got a minimal salary so they would have some personal money—but not enough to open a personal bank account and make deposits. At one time the company bank account (at a bank in Rutherfordton, on Main Street, on a corner), replenished once a month by a check from Florida, got so low that Joseph had to go out and find a paying job.

While the Carpenters were living on the land, they practiced a healthy macrobiotic diet, with Patricia as the

cook. They were not strict, so they consumed a little chicken now and then.

They purchased their home insurance from Bob Deakin, a very nice man who worked for the North Carolina Farm Bureau Insurance Co. They soon learned from Bob that he had formerly owned this same piece of land—it was his dream place—with several creeks and hills, and a beautiful home on top of the hill, big kitchen with custom cabinets, three bedrooms downstairs, huge master bedroom upstairs with a sauna, two car garage. Joseph heard the fateful story from other people local town. One day Bob and his family was driving into town. A truck driver in a big semi [semitrailer] was swatting at a bee that had gotten into the cab. He hit Bob's vehicle head-on, killing one of his daughters and seriously injuring Bob. For some reason, either there wasn't insurance or he wouldn't sue the truck driver (he refused to profit from his daughter's death), Bob (who couldn't work) eventually lost his treasured piece of land. He sold it in 1975 to Lawrence Bridges and E. Milton Singletary. Continued. Address: 10655 Lakeshore Dr., Clear Lake, California 95422. Phone: 707-994-3218.

4114. Carpenter, Joseph. 2000. Living in Boston and on the Oak Feed Miso Co. land in Rutherfordton, North Carolina from 1979 to 1980. Part III (Interview). *SoyaScan Notes*. June 2. Conducted by William Shurtleff of Soyfoods Center. • **Summary:** 1980 spring—The Bellemes return to North Carolina from Japan. Joseph recalls there was almost “immediate antagonism. They were so *yang*, tight, salty and wound up. Maybe we had gotten used to operating on the Southern vibe. It was a clash—bad vibes from the beginning.” Patricia had come to consider the place as her home and now it had to be shared. Joseph does not recall any specific areas of conflict, and he is certain that John had no specific complaints and never said anything such as “Why haven't you done this or that?” Joseph had done everything that he had been asked to do, and he had no power to initiate any construction projects. It was understood that all those decisions would be made after John and Jan returned from Japan.

The Carpenters and Bellemes lived on the land for a month or two together. It was unpleasant, but Joseph does not recall any specific complaints by the Bellemes. Patricia is a good housekeeper, so the house was very neat and clean. Question: Did you decide to leave on your own or were you asked to leave? Joseph's answer: “We were definitely asked to leave. We didn't want to go.” The Carpenters had expected to be actively involved in founding the business, and to soon have a separate home of their own on the land. John Belleme was the one who asked them to leave, but it may well have been a decision that Sandy made—maybe with some input from John. Joseph recalls hearing of some kind of “financial shenanigans involving Sandy.” He never knew exactly what the problem was, but

he felt he had lost his support from Sandy—for whom he was working. Maybe someone decided to just have a construction company come in, pour a slab, and erect a metal building—instead of taking the time to construct a hand-made building. Both Joseph and Patricia feel that they were treated unfairly in that they believed they had some compensation coming that they never received—either a portion of the business or monetary compensation. They had lived and worked there for almost a year—basically for room, board, and expenses (including about \$1,000 for Yana, age 7, attending a local private Christian school)—with the clear understanding that a portion of the business would be theirs.

Soon Joseph began looking for a new place to live. They found a piece of land with two homes on it just outside the Rutherfordton city limits.

1980 Nov. 23—Their third child, Patrick, was born at that farm. After that, Joseph began to receive acupuncture treatments from Jack Garvey. Joseph renovated the second home and rented it out, but after Patricia left in early 1983 the tenant was murdered (by her ex-boyfriend) in the home, so he couldn't rent it out any more.

Joseph felt bad about what happened during the time he worked for the miso company, but after several years he let go of it. Life goes on, and he had new problems to deal with. Not much was to be gained by dwelling on the past.

In about 1991 or 1992, while listening to the Dean O'Dell show on KGO radio at work, he first heard the diagnosis of a sleep disorder that had started several years after he left the miso company land—sleep apnea. It means you frequently stop breathing when you are sleeping. The result is that you never get into deep REM sleep, so no matter how much you sleep, you're always tired. Joseph would often fall asleep during the day, and as soon as he got home from work. He feels that was a real problem in the later years of his marriage. He has been able to treat the problem by putting a small medical air compressor (a CNAP = Constant Nasal Air Pressure) as part of a mask over his face when he sleeps at night. This machine activates when he stops breathing at night. When he found out what the problem was, he was so glad. He had to pester the regular doctors before they would give him sleep tests, which led to a diagnosis and the machine.

Note: On 2 July 2000 William Shurtleff called John Belleme, told him that he had interviewed the Carpenters, and asked John if he would like to tell his side of the story. His response: “I'm not going to say a word about it.” He did say that he felt it was “outrageous” for Shurtleff to discuss matters of personal feeling and conflicts in a company history—especially feelings that could hurt people who are still around; the history should be limited to facts about the company. Address: 10655 Lakeshore Dr., Clear Lake, California 95422. Phone: 707-994-3218.

4115. Gonzales, Greg. 2000. Making miso and koji for American Miso Co. Inc. Part I (Interview). *SoyaScan Notes*. June 20-21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Greg was born in July 1959 in Torrance, near Los Angeles, California, in a middle-class Mexican-American Catholic family. Both his parents were born in the Los Angeles area and Greg grew up in that area. After graduating from high school at age 18-19 he became a professional dancer. In 1987 he went to Japan for 6 months to work as a dancer at a tourist hotel in a small, isolated Japanese town. He liked Japanese culture very much. During this time he wrote short stories, and decided it was time for a change of careers. After returning to the USA, he lived in Los Angeles, found several easy jobs, and went to L.A. Community College for a year to pursue his interest in writing. At that time, in 1989, he met Barry Evans who was living to Los Angeles. They met through a mutual friend, spent a lot of time together during the next year, and became good friends. Barry took a federal holiday and Greg moved to Sonoma County in northern California. There he met a woman named Manon Fancher who became his partner; she already had a child named Keith Fancher. Together they moved to a small lumber town in Plumas County, in the Sierra Nevada mountains, about 70 miles north of Lake Tahoe. Greg worked for the U.S. Forest Service on a timber salvage marketing crew and taught dance on the side. On 12 Aug. 1992 they had a baby boy named Devin.

One day, in 1995, after they had lived in mountains for about two years, Barry Evans called, said he lived and owned several businesses in and around Asheville, North Carolina, and offered Greg a job working at the miso factory; Don DeBona would be his boss. Greg said he would like to think about it, discuss it with Manon, and visit the company before making a final decision. He had enjoyed miso previously, but did not know how it was made. He liked Japanese food and culture, knew nothing about macrobiotics, and was not sure how he would like living in rural North Carolina. So Barry flew him out to North Carolina. Before his interview with Don DeBona, Greg read *The Book of Miso* to better prepare himself. He accepted the offer. He and Manon tied up loose ends in Plumas County, then drove with their kids across the country to North Carolina.

Arriving in Feb. 1995, Greg worked at Great Eastern Sun for about 8 weeks, then went to work with Don DeBona at American Miso Co. (AMC). Don had had trouble keeping workers; they were attracted by the romance of miso and making macrobiotic foods, but couldn't take the hard work or the rural environment.

Greg worked for Don for about 2½ years. When Don left the company, Greg had plenty of experience making miso but he had never made koji by himself. Greg recalls: "I suddenly found myself with the reins in my hands. There

was a lot of responsibility, and I felt tense at first." He had steamed and inoculated the rice, dug it, put it in the trays, put the trays in the koji room, etc., but he had never stayed with the koji during the night or had to make decisions about adjusting its temperature. Making koji is an art, based on being sensitive to the properties of the koji; it cannot be learned from a book. It takes a long time to "learn how to make koji happy. Newcomers always want to go by what the thermometer says, but it doesn't work that way."

About a month after Greg took over, Barry hired John Belleme, one day a week, to look carefully at the koji Greg had made the day before, and to give him tips on how to improve. John is still active in this role, which is working out very nicely for both John and Greg. "John loves this place."

Greg makes koji at least once a week; Wednesday is koji night, so Greg will be with the koji until midnight. He will check its progress every 60 to 90 minutes, depending on the season and outdoor temperature. A little after midnight, he goes to his cabin on the miso company land and sleeps until a little before 4:00 the next morning. Then he returns to the miso plant, checks the koji again, and starts cooking the soybeans. Because of the fermentation process, koji generates its own heat, and it creates increasingly more heat as it matures, and its mycelium expands and binds the rice into a cake. Each time Greg makes koji it is different, and different types of adjustments must be made. There are no thermostats in the koji room. All temperature adjustments are made by either opening or closing the koji room door or the vents in the ceiling. If the ceiling vents are opened too much, the heat will rise out but so will the humidity. Thus, the balance of opening the door vs. the ceiling vents is important in adjusting the koji room humidity. To add humidity, Greg may wet the floor of the room and close the room. He never uses a heater to heat the koji room, in part because it dries out the air. When inoculating the rice, Greg will use less inoculant in the summer than in the winter.

This koji is really made in the traditional way—all natural, nothing artificial. Most companies automate their process as their volume expands, but AMC has decided not to do that. Yuko Okada of Muso and Mr. Kazama of Mitoku (both Japanese natural food companies) told Barry Evans that they thought AMC was the largest maker of traditional koji in the world. The company makes about 300,000 lb/year of miso. Don DeBona increased the number of miso vats from 10 to about 45. Continued. Address: 4225 Maple Creek Rd., Rutherfordton, North Carolina 28139. Phone: 828-287-2940.

4116. Gonzales, Greg. 2000. Making miso and koji for American Miso Co. Inc. Part II (Interview). *SoyaScan Notes*. June 20-21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** To enter the original koji room, one had to step up a foot or so from floor level. The koji table was built into the room, and was thus immovable. The original koji room is now used for cold storage of miso tamari from the top of the vats (they bottle and sell it) and for tubs of bulk miso. The company now has two new and larger koji rooms. The floor of each is level with the floor of the building and the door is larger; thus, it is now possible to roll the koji table and racks of koji trays in and out of the room. Two koji tables can fit side by side in one new koji room. Don DeBona had the idea of putting the koji table and racks on wheels. He called it “Reinventing the wheel.” Each koji room has about the same floor area as the old one, but the ceiling is 8 feet high rather than 6 feet. The floor of the new rooms is insulated wood (rather than cement) to prevent loss of heat and humidity.

After the rice is steamed, it is put into the hopper of a machine where three things happen: Metal fingers break up any clumps, a water-cooled jacket cools it, and a small blower blows spores of koji starter over it. It comes out onto a low table, whence it is shoveled (using a stainless steel shovel) into the koji crib atop the stainless steel table. The koji crib is about 18 inches deep and is lined with organic linen cloths before the cooked rice is put in. The inoculated rice, on the table, is then wheeled into the koji room.

“The hotter it is, the harder it is to make koji,” notes Greg. So on very hot days, Greg will spread the grain by hand on the low table to cool it faster and more; then he will inoculate it by hand, and work the inoculant in evenly with his hands.

When the koji in the crib is ready, the crib (on its table) is wheeled out of the koji room. The koji is then scooped onto koji trays using a one *shô* measure. Greg does not stack the koji trays in different ways to conserve or release heat; rather he puts them on rolling racks. Once a koji tray is placed on a rack, it stays in that place on the rack until the koji is ready. When a rack is full, it is wheeled back into the koji room. This saves labor and enables Greg to make much more koji.

Greg makes miso in a three day cycle. He steams the rice on Monday, puts it in trays on Tuesday, and makes the miso on Wednesday. For most of the year, this cycle is repeated twice a week. Making miso twice a week is hard work. During the busiest times of year, the company employs about eleven people—including Greg; five in production and six in packing. Many of the packers are local women who like the miso company work better than that offered by the local mills, because there is less stress, and they can set their own hours as long as the work gets done. Greg is the general manager, in charge of these workers. He really appreciates this challenging opportunity. So far this year, Greg and his coworkers have made 119,250 lb of finished koji.

Most consumers use miso to make soups. They use more miso in the winter than in the summer. So by the beginning of summer, the vats are usually full. By October or November enough vats have been emptied of their miso, that it is time to start making more miso to refill them.

Concerning this work, Greg reflects: “I love it. I don’t mind hard work. It offers its own reward. I feel connected to everyone who went before me—part of a lineage. Also, you can’t be phony with the koji, or pretend, or get arrogant with it. If you don’t look at it carefully, and feel and smell it, then you’ll make a mistake. It’s dynamic, and it keeps you honest that way. This is an honorable thing to do, and I feel privileged to have found myself in the same wacky way that everything else happened here—to be the baby sitter for a while.”

When not making miso, Greg continues to write short stories and poetry. When he learned that Erewhon was connected with this miso company during its formative years, he joked: “That makes perfect sense. ‘Erewhon’ spelled backwards is ‘nowhere,’ and this place is out in the middle of nowhere.” Recently Louise Hagler of The Farm in Tennessee visited the American Miso Co. for three days. She is writing a miso cookbook, which will contain a brief description of koji and how it is made into miso.

Greg’s son, Devin, is now age 8, and his stepson, Keith Fancher (who is into computers and math) is age 16. Manon cares for the kids at home. They are considering home schooling for next year. Both of Greg’s parents are still alive. They have found that the corporate world is not a nurturing place. So they have come to respect his choice to follow his own path, and the fact that he is now general manager.

Talk with Barry Evans, owner of American Miso Co. 2000. June 29. Greg Gonzales’ right hand man in making (and tending) koji and miso is his brother, Dave Gonzales. Two black guys and a Honduran immigrant also make koji and miso with them. The father of Greg’s partner, Manon Fancher, is Hampton Fancher, who is a screen writer; he wrote the script for the well-known movie *Blade Runner*. Address: 4225 Maple Creek Rd., Rutherfordton, North Carolina 28139. Phone: 828-287-2940.

4117. *SoyaScan Notes*. 2000. One disaster after another leads to success: Brief history of American Miso Company (Overview). June 20. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** This story, with its many strange twists and turns, might be called “One disaster or failure after another leads to success” or “The perfection of imperfection.”

1977 Aug. 2—It was a disaster for Bob and Karen Deakin of Rutherfordton, North Carolina, when a bee flew into the cabin of a big truck near their home. As the driver tried to swat it, his truck swerved across the road and smashed into

a car driven by Bob Deakin, killing Bob's daughter (age 12½) and severely injuring Bob and his young son.

1979 Jan. 26—It was a second disaster for Bob and Karen Deakin when they were forced to give up the home they had built and the 92 acres of land they dearly loved in Rutherfordton because they could not make the mortgage payments. With Bob still injured from the car crash, the family had no steady income. The land was sold to Oak Feed Miso Co. on 7 Aug. 1979.

1979 Oct.—It was a disaster for John Belleme when he arrived in Japan to study miso and nobody knew who he was or why he was there. The arrangements that were supposed to have been made were never made.

1979 Oct.—It was a small disaster for Mr. Kazama of Mitoku when John Belleme handcuffed himself to Mr. Kazama's desk and said he would not leave until Mr. Kazama had located a miso master with whom John could learn the traditional art of making Japanese miso.

1979 Oct.—It was a disaster for miso master Takamichi Onozaki, of Yaita, Japan, when two foreigners arrived, without invitation, saying they wanted him to teach them how to make miso. He told them he was sorry, but they could not stay. They stayed in his house, under the same roof, for 6-8 months as they worked hard and learned how to make miso.

1979 Nov. 18—Barry Evans is in a disastrous bicycle accident, breaking 5 vertebrae and 9 ribs. After a 14-hour operation, he spends 6 months on his back in the hospital and 1 year in a full-body cast.

1980 June—It was a disaster for Joseph and Patricia Carpenter, who had lived on the miso company land for the past ten months and expected to be owners of the miso company, when they were told to leave and, in their opinion, not told why.

1981 Nov. 10—It was a disaster for Michio and Aveline Kushi when their company, Erewhon, is forced to file for Chapter 11 bankruptcy protection because of debts totaling \$4.3 million. The Kushis also had to give up their dream of starting a miso company (named Erewhon Miso Co.) in America. It was also a disaster for the miso company which could no longer count on Erewhon to distribute its products.

1982 Jan. 31—It was a disaster for Sandy Pukel when he has to give up his stake in Oak Feed Miso, Inc. It was his "baby" and he, more than anyone else, was responsible for bringing it to this stage. Equally sad was the fact that his good relationship with John Belleme was strained for the rest of the 1980s; they didn't talk for years after this event.

1982 Jan.—It was a small disaster for Mr. Onozaki when John Belleme begged him to come to America from Japan to check John's koji-making. He didn't want to go. He spoke no English, had never been outside of Japan, and had a business to run at home. Yet he went to help a friend in need.

1983 Oct. 1—It was a disaster when John and Jan Belleme feel they must sell all of their ownership in the American Miso Co. (900 shares) to Barry Evans. They had devoted most of the last 4-5 years working to create and build this company.

1992 Jan.—It was a disaster for Barry Evans when he is forced to take a "federal vacation" in Santa Barbara, California, for 2½ years.

2000 July 4—American Miso Co. is the largest and most successful Caucasian-run miso manufacturer in the Western world. Who is and was responsible for this success? Most of the people named above.

Note: Some of the most interesting (juiciest) stories about this company remain untold, for reasons that cannot be disclosed at this time.

4118. Schaller, Lorenz K. 2000. Husked or covered barley vs. naked or hull-less barley (Interview). *SoyaScan Notes*. June 23. Preceded by a letter dated June 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The following is based on an article that Lorenz wrote in *The Cerealists*, Issue No. 1 (1989, p. 10-11, published by Kusa Research Foundation). All the different types of barley belong to the species *Hordeum vulgare*. This species is divided into two major groups: (1) Husked or covered barley, and (2) naked or hull-less barley. These two groups are not indicated as part of the scientific name, just as winter and spring wheat are not. However, if a scientist wants to indicate the naked form, he can write... var. *nudum*. Husked or covered barley, which has a husk "cemented" to the seed, is common in the West, where it is used for brewing and livestock feed. Naked or hull-less barley, of which the husk is easily removed (like the husk of wheat or rice) is more common in Asia (in Japan it is called *hadaka mugi*; *hadaka* = naked), especially in countries where barley is used as a food. Naked barley is the type generally used to make miso. "Naked barley closely resembles the free-threshing wheats, the naked grain sitting loosely in the spikelet between the lemma and palea, which show no adherence to the grain" (M.P. Charles. 1984. "Introductory remarks on the cereals." p. 29).

A mature barley plant bears a head or spike composed of individual spikelets. Each spikelet has glumes which completely enclose the seed in an envelope of fibrous husks.

The removal of the outer skins of the kernel is called "pearling." "Pearl barley" refers to barley that has been polished to remove the husk and outer bran layers. It is a word like "white rice." Husked or covered barley is more often pearled than naked barley. More than 99% of the barley available for food in modern developed countries is pearl barley. Scientists have found that naked barley is rich in beta glucones, phytochemicals that reduce "bad" cholesterol.

“Barley is the cereal most frequently mentioned in early Sanskrit records. It was introduced into India in ancient times and was probably the principal food grain during the Vedic Period (1600 B.C.–6000 B.C.)” “Barley, a sister crop of wheat, is the staple food of much of India’s poor. In India, barley has been a poor man’s crop, chiefly grown by small and marginal farmers in economically distressed areas.” In the early 1980s, greatly improved hullless barley cultivars were developed by a brilliant Indian barley breeder, Dr. Mahabal Ram.

“Caryopsis” is a morphological term, correctly applied only to the dried seeds of grasses. It’s meaning is identical to “seed” or “grain.”

The sunken black line running the length of a seed / kernel of barley (called *fundoshi* or “loincloth” in Japanese) is called the “crease” or, more precisely the “ventral groove” or “ventral crease” in English. “These terms are of immense utility to paleobotanists, persons who specialize in identifying ancient botanical remains, as they are sifting through archaeological debris and making attempts to identify plant part remains.”

When Americans eat barley, they do so mainly in soups and stews. Address: Founder & Director, The Kusa Seed Research Foundation, P.O. Box 761, Ojai, California 93024. Phone: 805-646-0772.

4119. Troy, John. 2000. Update on Wizard’s Cauldron and work with miso (Interview). *SoyaScan Notes*. June 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John’s original organization was the Lindenself Foundation, a nonprofit organization involved with Eastern spirituality. The linden tree symbolized the heart. Out of this grew Linden’s Elfworks, then Elf Works, Ltd., whose first product was a candy bar named Wizard Baldour’s Power Pac introduced in 1976, and containing ginseng. Elf Works, Ltd. was created outside of the nonprofit corporation, and it existed only briefly (1981-1984).

In about 1980, John was first introduced to miso by Joel Dee of Edward & Sons who was introducing his Miso Cup, a dehydrated miso soup. Troy’s next product was Wizard Baldour’s Hot Stuff (in regular or blazing intensities); it was the company’s first big success. It contained miso from the day it was launched. Troy first bought this miso from Erewhon (a fairly dark salty rice/red miso), but when Erewhon filed for Chapter 11 bankruptcy in Nov. 1981, Troy started buying his miso from Barry Evans of American Miso Co. It was John Belleme and Barry Evans who really got Troy interested in and involved with miso—before American Miso Co. had any miso for sale, but after their miso plant had been constructed. Troy can’t remember how, where, or when he met Barry Evans. Belleme told him about going to Japan and apprenticing with Mr. Onozaki. Later Barry Evans introduced Troy to John Fogg in Charlotte. Troy later worked closely with Fogg; “at first I thought he

was arrogant and fussy, but he ended up being a tremendous influence in my life, and taught me so much about marketing... To this day I still draw on the wisdom of John Fogg.”

Troy now makes almost 100 different products for the natural food trade. Most of these contain miso and/or soy sauce. All of his business is private labeling, so he develops and manufactures products, which other companies market. Across the street from his office is a modern, high speed blending, bottling, labeling plant, with plenty of cold storage. He manufactures and bottles every product he develops. His company, The Wizard’s Cauldron, Ltd., run small by a small team of leaders, now does about \$2 million a year in annual sales. His products are now almost totally organic—200 ingredients. John has just a handful of customers. The biggest is Whole Foods Markets; he makes all the salad dressings and sauces sold under the Whole Foods label. Second biggest is Joel Dee of Edward & Sons. Troy makes four brands for Joel Dee: Premier Japan, The Wizard’s, Troy’s, and Rain Forest Organic. Joel’s company owns the “Wizard” brand, which Troy gave him in 1987 as part of his “recovery plan” after American Natural Foods went down the tubes. Joel said, “You make it, I’ll sell it.” At about the same time, they also both developed the Premier Japan brand and line, which is still doing extremely well. In about 1995 John developed “The Wizard’s Worcestershire Sauce,” a vegetarian sauce, for Joel Dee. It is now selling better than Hot Stuff. Ponzu is the Japanese equivalent of Worcestershire sauce; they use bonito instead of anchovies. But ponzu originated first, so “Worcestershire sauce is a Western ‘knock-off’ of ponzu.” The Ginger Tamari is still a wonderful product that is doing very well.

Troy’s third largest customer is Albert’s Organics, America’s largest organic produce distributor, for whom he makes a line of fresh, refrigerated organic dressings. Albert’s Organics recently merged with UNFI (United Natural Foods, Inc., the collection of distributors that was Stow Mills, Cornucopia, Rainbow, Mountain People’s Warehouse, etc.). UNFI is now a big publicly-owned company. Troy’s favorite product developed for Albert’s is Mellie’s Miso Mustard Dressing, launched in 1998 with a mild miso from American Miso Co. Albert’s daughter is named Mellie.

John is now developing a line of dressings under the Moosewood Restaurant brand for the people who own that restaurant. John’s favorite is the Miso Ginger Salad Dressing. A few days ago he closed a deal with Robert Tepper (formerly of The Farm, in Summertown, Tennessee) to market his Simply Delicious brand of dressings. Robert now has his own company named Sunrise Management, which is a brand management company; Simply Delicious will be the first brand he owns. Robert worked for Natural Nectar, then Blue Sky, then Annie’s (which he left in early 2000 to start his own company).

John's main work is still developing new products and naming his creations—the work he enjoys most of all things. “It's really fun.” Blessed are those who find a way to do what they love most in life. Address: The Wizard's Cauldron, 8411 Hwy. NC 86 N, Cedar Grove, North Carolina 27231. Phone: 919-732-5294.

4120. Troy, John. 2000. Update on the Macrobiotic Company of America and Bruce Macdonald (Interview). *SoyaScan Notes*. June 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce was recently kicked out of the company (MCOA), Norio Kushi is now running it, but Muso owns most of it. Bruce has filed a lawsuit against MCOA. Barry Evans and Norio are trying to work together, since Barry would like to slowly get out of the distribution business (he owns Great Eastern Sun) and move towards building branded products.

A few days ago John heard that Mr. Kazama had decided not to sell any more of his Mitoku products to MCOA. Rather, he will help Bruce start a new company in Asheville, and Mitoku will sell to Bruce.

John heard from Norio a few days ago that MCOA wants to come out with a line brandnamed “Kushi Organic” to take the place of Mitoku. They want John to develop a line of miso-based sauces, dressings, etc. for them. “Kushi” is now a registered trademark, owned by Michio Kushi, who is willing to assign it to his son, Norio. Address: The Wizard's Cauldron, 8411 Hwy. NC 86 N, Cedar Grove, North Carolina 27231. Phone: 919-732-5294.

4121. Evans, Barry. 2000. A visit with Mr. Onozaki in Japan: The story of the guests who decided to stay (Interview). *SoyaScan Notes*. June 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In 1984 Barry and John Belleme both traveled to Japan where they visited Mr. Takamichi Onozaki, with whom John and Jan Belleme had spent seven strenuous months studying miso-making in late 1979 and early 1980. Barry visited Mr. Onozaki again last month in Japan. At about age 70, he was still his same energetic self, very active and healthy and full of vitality, and his daughter and son-in-law were still there living 10 feet away (in Japanese fashion) and working hard making miso. Barry recalls: “He is a wonderful person. When we pulled up, got out of the car, and I saw him there, I broke down and started weeping. I hadn't seen him in 15 years. I think of him as the father of our miso company and I feel the same great affection and respect toward him that I do to my own father. It was very special.” Mr. Onozaki then told Barry a story he had never heard before.

When the Belleme's showed up at his house, unannounced, in 1979, it was a disaster for him. He didn't want them to stay at all. He went out for a while, but when

he came back he found to his dismay that they had moved all their baggage into the room of his daughter who was away at college, and made themselves at home. They begged him to let them stay overnight, so he relented and said okay, but only for one night. The next day they persuaded him to let them stay for one more night. The whole time they were there, he tried to get rid of them, over and over again—but they bamboozled him at every turn. They talked him into letting them stay for one week, then for one month, then for one more month, then for three months, then for two months more. At every juncture, they had to fight their way to stay the extra time. They would cry and moan. Of course, by end of their stay, television crews were coming up to cover the amazing story of Americans who had come to Japan to learn how to make miso.

But as he told the story it was clear that he was now quite proud of the fact that his disciples had started what is today the largest Caucasian-run miso factory in the Western world.

He then told Barry about how John seemed to have lost some confidence in his koji-making ability during the first season. John asked Mr. Onozaki if he would come to the United States and check that he was making the koji correctly. Mr. Onozaki said that he refused to come the first 3-4 times that John asked him. He had never been outside Japan before, and he has never left it since. He didn't want to go—at all. He didn't speak any English. How would he find his way? He had an active business to run at home. But John just kept insisting that he had to come. Mr. Onozaki said that eventually he remembered an old Japanese saying: “When a friend says he really needs your help, you've got to try to help!” So he felt that he just had to go, though he did so “kicking and screaming.” Several months later, he sent his daughter and son-in-law in his place.

On the 1984 trip to Japan, after visiting Mr. Onozaki in northern Japan, John and Barry visited the Muso Company (*Muso Shokuhin*) in Osaka (south-central Japan), then the Fujiwara Brewing Company in Hiroshima (a manufacturer of equipment for making beer, soy sauce, miso, etc.; Barry was considering making shoyu in North Carolina), then the company that makes sweet white miso for Muso in Fukuoka (on Kyushu, Japan's southernmost island).

On a 1983 trip with Robbie Swinnerton of Mitoku (John Belleme was not along) Barry visited Sendai Miso-Shoyu Co. in northern Japan. Address: Owner, American Miso Co., Inc. and Great Eastern Sun, Asheville, North Carolina 28806. Phone: 704-252-3090.

4122. American Miso Co.; Tax Dep. of Rutherford County, North Carolina 2000. Maps of American Miso Co. land and buildings. Rutherfordton, North Carolina. 7 p.

• **Summary:** These seven maps were sent by Greg Gonzales of American Miso Co. (AMC). The information on dates of sale and where those land deeds were recorded was

provided by Mae McMahan of the Rutherford County records room (Phone: 828-287-6195).

Map 1 (which is part of the larger Map 571, Block 1 of the Rutherford County Tax Dept.) shows the land owned or formerly owned by AMC—consisting of three lots. Lot 33 (tract 1), 66.97 acres, was purchased on 7 Aug. 1979 by Oak Feed Miso Inc. from Lawrence L. Bridges and E. Milton Singletary (Deed Book 405, p. 727). Lot 33-A (tract 2), 7.5 acres, was purchased on 9 March 1981 by John Belleme from American Miso Co. (Deed Book 422, p. 228). John sold this lot on 19 May 1986 to Jack Benny Lovelace (Deed Book 486, p. 335), and Mr. Lovelace now lives on that land. And lot 33-B, 19.11 acres, was purchased on 1 Sept. 1995 by Donald J. DeBona from American Miso Co. (Deed Book 656, p. 368). The total area of the three parcels is 93.58 acres. The amount purchased by American Miso Co. on 7 Aug. 1979 was 92.38 acres.

The main lot, 33, the only one presently owned by American Miso Co., is basically a rectangle, about 2.75 times as wide as it is high, with its long sides running east-west. A boundary line running north-south down the middle shows that it once consisted of two separate lots. It is bounded on the southeast corner by Maple Creek Road, and on a long, diagonal northeast corner by a boundary line. Parallel to this line, and a little southwest of it runs a stream which flows from northwest to southeast into Maple Creek, located just east of and parallel to Maple Creek Road. Between the stream and the northeast boundary is a 5-acre pasture that belongs to the company. Lot 33-A, the smallest lot, is in the northwest corner of Lot 33; it was purchased from Barry Evans by John Belleme, who built the foundation of a house on it; he later sold it to a Mr. Lovelace, who finished building the house and now lives in it. Lot 33-B, located just east of center of Lot 33, contains the large house which, with the lot, is now owned by Don DeBona. He lives there and is the American representative for an Australian import-export; he works out of his home. This is the house where Joseph and Patricia Carpenter, then John and Jan Belleme once lived.

Map 2 (drawn by Greg) is an improved version of Map 1 showing, the correct location of the stream, of the dirt road leading to the cabin where Greg stays on koji nights, of the four miso-company buildings, the two paved asphalt areas by the entranceway (for parking and where large trucks can back in and unload onto loading docks) and the well house. All water used in making miso comes from this well, which has very pure water, but is still tested regularly for purity. A lot of kudzu grows on the property.

Map 3 shows the outlines (incl. correct size and spacing) of the four American Miso Company buildings.

Map 4 shows building A, located furthest south on the property and nearest the entranceway. It contains the rice milling machine, pallets of rice, break room, and office.

Map 5 shows building B, one of the two largest buildings, in which are located the new and old koji rooms, water tank, boiler, steamers, soybean cooker, soybean cooling table, 12 miso vats and two short-term storage areas.

Map 6 shows building C, which is attached to building B, and is the packing room; it contains the incubation room, tables, miso auger and cooler.

Map 7 shows building, the other large building, which is located furthest north on the property. In it are many miso vats and pallets of soybeans, plus a cooler for refrigerating short-term miso before it is shipped. A road runs next to the four buildings along their southwest side, then curves onto lot 33-B and ends at Don DeBona's house. The miso company consists of four buildings.

4123. Stewart, Martha. 2000. Edamamé. Television broadcast. Tuesday, June 13. Martha Stewart's Living program.

• **Summary:** The first segment of this TV program is titled "Edamamé" (3 minutes, 20 seconds). Martha Stewart, one of the most famous women in America today and a leading authority on entertaining and cooking, begins by holding a package of Trader Joe's precooked, frozen edamamé and saying: "If you see edamamé in the freezer section of your grocery store, buy a package and try it. It's really fantastic. I'm always looking for healthy, easy-to-prepare snacks that are also nutritious—and these are just the answer." Inside the fuzzy green pods are soybeans. Soy sauce, miso, and tofu are among the many other yummy foods made from soybeans.

Martha demonstrates how to cook the soybeans, following the instructions on the package, by boiling them in heavily salted water for about 5 minutes. Have a bowl of iced water nearby in the sink. "Soybeans like this are packed full of vitamins, nutrients, and unsaturated fats—the kinds of fats that break down cholesterol in your body. As such, I suggest that you try 'em as a snack." Lift the edamamé out with a strainer, then lower the strainer into the iced water. Leave until cool, but not too long, lest they become soggy. Drain in the strainer, then while they are still a little bit damp, sprinkle them generously with natural sea salt—the kind with irregular crystals. Then they are ready to eat. "You just squeeze on the pod, and the little soybean pops out. Mmmm. Really good." "Keep a supply of this edamamé in your freezer, and the next time guests stop by or your children come home from school, you'll be prepared with a really healthy and delicious snack."

Talk with Tak Kimura. 2000. July 11. To prepare precooked, frozen edamamé: After the green pods are picked from the soybean plants, they are rushed to the packaging plant, blasted with steam (to clean the surface of the pods), immediately blanched in boiling water for 4-5 minutes (to help them keep their bright green color and

good flavor and texture), then quickly frozen and packaged. A large percentage of the edamamé consumed in Japan today are sold frozen like this, so that they can be enjoyed year-round. This new frozen trend started in about 1990; before that Japanese enjoyed edamamé as a seasonal food, fresh during the summer only. Nowadays quite a few companies even freeze the fresh edamamé during the summer, because they find that dealing with fresh foods is a nuisance.

Note: Martha Stewart has been able to turn her own lifestyle into a major industry. A successful model during the late 1950s and early 1960s, she was even more successful as a Wall Street stockbroker, and again very successful in a catering business she started. In 1982 she wrote a best-selling book titled *Entertaining*. Her ideas about gracious living have had a major influence. Address: Westport, Connecticut.

4124. Wollner, Joel. 2000. Mr. Kitani of Yamaki Co. in Japan has a huge new shoyu and miso factory that uses 100% organically grown ingredients (Interview). *SoyaScan Notes*. July 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In June 2000, on a trip to Japan and China, Joel (together with translator and guide Yoshi Nanabayashi) visited Mr. Tomio Kitani, owner of Yamaki Jôzô K.K. in Saitama prefecture, Japan. He is about age 60 and very healthy and vital. Several years ago he moved from the nearby town into the mountains, where he built a huge new factory where he makes miso, shoyu, tofu (fresh and instant), and pickles. The company's address is (written Japanese-style): Saitama prefecture, Kodama-gun, Kamiizumi Mura, Oaza Shimo, Akuhara 955. Phone: 0274-52-7000. Fax: 0274-52-7001. Plant manager: Morikawa Kazuhiko. The nearest railroad stop is Kodama station.

The company has about 80 huge shoyu vats filled with moromi. Most of his miso is short-term—1 to 3 months. His koji rooms are fully automated. Yamaki Co. is extremely important in the world of organic miso and shoyu in Japan. Joel thinks they make more of these products than Sendai Miso Shoyu, and may be the biggest such manufacturer in Japan. He also bottles and sells water from a spring he owns. His company is flourishing, and growing very rapidly. Some 90-95% of his market is in Japan; the rest is miso and shoyu exported to the USA. He is the 4th of 5th generation owner, and he hopes his son will take over from him within the next ten years or so. The main ingredient he uses is soybeans, but all of his ingredients are organically grown in Japan by MOA (Mokichi Okada International Association), a quasi-religious, quasi-cooperative organic farmers organization and movement. MOA is one of the pioneering and most important organic organizations in Japan.

Joel first visited Yamaki in 1985 when he, Bob Kennedy, and Herman Aihara were setting up Ohsawa America (after Kennedy had sold Chico-San to Heinz). Joel later brought in Martin Roth—who is now married, lives in Berkeley, and is head of a marketing company with Kristin Brun (who lives in El Cerrito). Ohsawa America, which traded with Ohsawa Japan, no longer exists. Address: 76 Florida Ave., Berkeley, California 94707. Phone: 510-524-4420.

4125. Wollner, Joel. 2000. Macrobiotics in America today (Interview). *SoyaScan Notes*. July 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Joel, who has been deeply involved with macrobiotics for more than 30 years, observes that in America today, “the macrobiotic movement is much smaller and less vital at its core” than it was, say, 10 years ago. “But its influence has spread enormously.” Joel can see the profound influence of macrobiotics throughout the natural foods and organic foods industries, even in the words and phrases that people use, or in basic concepts about organics—such as the number of years for transitions. Many people in these two industries today are unaware of these deep influences. Erewhon was more successful at forming an industry than at forming a viable company.

Barry Evans, owner of American Miso Co. and Great Eastern Sun, two companies that for years have had macrobiotic customers as their base, adds: “If only there were a macrobiotic community still in existence. It’s pretty well gone, but there are some remnants left.” Address: 76 Florida Ave., Berkeley, California 94707. Phone: 510-524-4420.

4126. *SoyaScan Notes*. 2000. Chronology of Erewhon Miso Co., Oak Feed Miso, Inc. and American Miso Company (Overview). July 6. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** These three companies are actually the same company whose name changed. This chronology is based largely on dated documents. Undocumented dates are usually followed by question mark. Notice the many unusual twists and turns in the story.

1977 Aug. 2—A bee flies into the cabin of a big truck near Rutherfordton, North Carolina. As the driver tries to swat it, his truck swerves across the road, smashing into a car driven by Bob Deakin, killing Bob’s daughter (age 12½) and severely injuring Bob and his young son.

1978 Dec.—Sandy Pukel, Michio Kushi, and John Belleme get together in Boston to discuss the miso factory. They agree on quite a few points. All three are deeply interested in macrobiotics.

1979 Jan. 26—The bank (Tryon Federal Savings and Loan) forecloses on Bob and Karen Deakin’s mortgage. Still injured from the car accident, he is unable to make his land payments. The land goes on the market.

1979 Feb. 28–Oak Feed Miso, Inc. is incorporated in Florida. The initial directors and officers are Sandy Pukel and John Belleme. 1979 Feb?–A contract is drafted by David Young (though never signed) showing what percentage of the proposed Erewhon Miso Co. will be owned by the Erewhon group (comprised of Sendai Miso-Shoyu Co., Michio and Aveline Kushi, and maybe Mitoku / Mr. Kazama) and by the Oak Feed Group (comprised of Sandy Pukel and John Belleme). The Erewhon group was to have the majority ownership, and Japanese companies and individuals were expected to play a major role in the new company.

1979 March–Joseph Carpenter looks for land in Rutherford County, North Carolina. Talks with several insurance agents.

1979 spring–Members of the Oak Feed and Erewhon groups meet in North Carolina in the first attempt to locate a site for the miso plant. In attendance are Michio and Aveline Kushi, Sandy Pukel, John Belleme, Frank Head, and Junsei Yamazaki and his wife (both from California).

1979 April–Barry Evans makes his first investment in the miso company, \$50,000.

1979 June?–Sandy Pukel travels to North Carolina and makes the down-payment on a piece of land in Rutherfordton. The roughly 92 acres cost about \$110,000 to \$120,000.

1979 Aug. 7–Oak Feed Miso, Inc. finalizes the purchase on the 92 acres of land by assuming the second mortgage and paying an additional \$11,500 each to Lawrence L. Bridges and E. Milton Singletary. Sandy Pukel (president) and John Belleme (secretary) sign the land deed and deed of trust.

1979 Aug. 16–Subscribers Consent Agreement executed.

1979 Aug. (late)–Joseph and Patricia Carpenter arrive in Rutherfordton from Florida to live and work on the miso company land.

1979 Oct.–John and Jan Belleme leave for Japan to begin an apprenticeship with a miso master. They stop by the land in North Carolina to visit briefly with the Carpenters, then also visit Thom Leonard at Ohio Miso Co. Arriving in Japan in late October, they visit Mr. Kazama in Tokyo then travel north with him to Yaita, where they study miso-making with the Onozaki family—which makes only dark rice miso. A good, long letter from Jan describing their experiences is published in 1980 in the book *Macrobiotic Cooking for Everyone*, by Edward and Wendy Esko.

1979 Nov. 18–Barry Evans is in a very serious bicycle accident.

1980 April–A detailed letter by John, about his miso apprenticeship with the Onozaki family in Yaita, Japan, is published in *GOMF News*, a small macrobiotic magazine from Oroville, California.

1980 June–John and Jan Belleme return to the USA from Japan. That summer John located the remaining miso equipment in New Jersey and ordered wooden vats from the Arrow Tank Co. in Buffalo, New York.

1980 fall–John and Jan go on the Erewhon payroll.

1980 Sept. 29–Work has just begun at Rutherfordton in leveling the site for miso factory, which is going to be a metal Butler building. By late 1980 John and Jan begin to make their first experimental batches of one-year rice miso, at their home, in the sauna.

1981 early–The project stalls for lack of funds. John starts writing articles about his trip to Japan. One goal is to convince Barry not to abandon the project.

1981 Jan.–“The Master of Hoops,” John’s first article, is published in *East West Journal*.

1981 March 9–John Belleme is deeded 7.5 acres of land by American Miso Co. in the northwest corner of the AMC property; later he starts to build a house there.

1981 April–“The Miso Master’s Apprentice,” John’s second article, is published in *East West Journal*.

1981 July–“The Miso Master With a Big Heart: Making Miso in a Japanese Village,” John’s third article, published in *Soyfoods* magazine. Contains many good photos of miso making in Japan.

1981 July–The beautiful and joyous opening ceremony for the Erewhon Miso Co. is held at Rutherfordton, North Carolina. Those present include Michio and Aveline Kushi, John and Jan Belleme, Sandy Pukel, Barry Evans. It is a moving experience for all. But behind the scenes, Erewhon’s financial is rapidly deteriorating—due largely to too rapid expansion.

1981 Aug.–John and Jan Belleme begin full-time large-scale production of one-year Onozaki-style red (rice) miso at their plant in Rutherfordton.

1981 Sept. 27–The annual meeting of the Oak Feed Miso Co. is held at Rutherfordton, North Carolina. Barry Evans is appointed acting chairman. Shares in company are owned as follows: Barry Evans 1,400, Sandy Pukel 1,400, John Belleme 900, Yozo Masuda 100, Edmund Benson 100, and James Kenney 50. All stock is converted to one kind, Class A, which is voting stock. Thus, for the first time, Barry gets the right to vote and becomes a member of the board of directors.

1981 Aug.–John and Jan Belleme begin fulltime, large-scale production of miso and koji at their new plant in Rutherfordton, North Carolina. Fourteen months have passed since they returned from Japan. Twelve more months must pass before this miso is ready to sell.

1981 Nov. 10–Erewhon files for bankruptcy protection under Chapter 11 of the Federal Bankruptcy Act because of debts totaling \$4.3 million. At his time, Aveline Kushi is the sole owner of Erewhon. Thus, the miso company can no longer count on Erewhon to distribute its products. Apparent disaster!

1981 Dec.—Barry Evans establishes Great Eastern Sun (GES) in Asheville, North Carolina, in part to package and market the miso made by AMC. Mitoku, almost destroyed by Erewhon's collapse, and eager to rebuild, agrees to export Japanese natural foods to GES.

1982 Jan. 4—Barry Evans sends out a letter announcing the opening of The American Miso Company in North Carolina. The company now has a new name (it was officially changed on 5 May 1982). Barry also announces that Linden's Elf Works (Rougemont, North Carolina), run by John Troy, has been appointed as AMC's sole marketing and distribution agent. Note: This arrangement was very short-lived; Elf Works never distributed any of AMC's miso. Great Eastern Sun did all the distribution.

1982 Jan.—Mr. Takamichi Onozaki comes to America from Japan to see how well his students had learned his lessons. He stays and helps make koji and miso for 2-3 weeks, until he is fully satisfied that all is well.

1982 Jan. 31—Barry Evans and Sandy Pukel agree to a swap of stock, such that Barry gets all of Sandy's stock in the miso company and Sandy gets all of Barry's stock in Oak Feed Store and Restaurant. After this, Sandy is no longer involved with the miso company. Barry and John Belleme now own all the company's shares, and Barry owns a large majority.

1982 April—Great Eastern Sun makes its first sale, of products imported from Mitoku in Japan to a natural foods store in the USA.

1982 April—Mr. Onozaki's his adopted son, Haruo, and eldest daughter, Kaoru (Haruo's wife), arrive in Rutherfordton and spend 3 months sharing the Belleme's home, helping Jan who is pregnant, and helping to make miso. The Bellemes' son, Justin, is born on May 24.

1982 July—The first detailed article about American Miso Co. and its method of making miso (with many fine photos) is published in *Soyfoods* magazine: "American Miso makes a Big Move Down South," by Richard Leviton, who visited the company in April. The company "has struck a careful balance between the traditional approach (as in making koji, which requires skill and personal attention) and labor-saving mechanization (as with bean washing, soaking, cooking, mixing, and moving)."

1982 Sept.—The first miso made by AMC is sold by Great Eastern Sun. It is one-year, Onozaki-style red miso, sold in bulk only in 4 lb, 15 lb, and 40 lb tubs.

1983 Oct. 1—John and Jan Belleme sell all their ownership in the American Miso Co. (900 shares) to Barry Evans for \$30,000. However, John continues to work making miso for AMC. Throughout the past year he has been experimenting with making mellow white and mellow barley misos. Great Eastern Sun is now selling about 50,000 lb/year of white miso from other sources.

1984 fall—AMC miso first starts to be sold in one-pound plastic coffee bags (each with a pressure release valve),

refrigerated. A full-page ad showing the bag appears in the Jan. 1985 issue of *East West Journal*. Previously, all their miso had been sold in bulk.

1985 Feb.—Don DeBona leaves his job as general manager at Great Eastern Sun and begins to work at American Miso Co., learning the process from John Belleme.

1985 April?—AMC introduces three varieties of relatively sweet, light-colored, short-term misos: Mellow White Miso, Mellow Barley Miso, and Amakuchi Mugi Miso—a shock to traditional macrobiotic followers. These light misos were sold in the plastic bags. As of July 2000, half the company's sales come of such short-term types of light miso.

1985 Dec.—Don DeBona takes over management of the company. John Belleme leaves. It was a difficult transition.

1985 Dec. 31—AMC has its first profitable year, earning \$22,000 in calendar year 1985.

1986 early—AMC miso starts to be sold in one-pound plastic cups/tubs, refrigerated. The plastic bags are phased out.

1987 fall—AMC miso starts to be sold in 8-oz plastic cups.

1988 Feb.?—New koji room designed and built by Don DeBona. Constructed at floor level with a large door and high ceiling, it enables the koji crib and racks of koji trays to be wheeled in and out. Before, all the koji had to be carried in and out by hand.

1992 Jan.—Barry Evans is required to take a "federal vacation" in Santa Barbara, California, for 2½ years. He hands the management of American Miso Co. and Great Eastern Sun over to Don DeBona.

1992—American Miso Co. builds a second factory as large as the first.

1993—American Miso Co, now has 41 huge wooden (mostly cedar) miso vats, each of which holds over 4 tons of miso. Starting with only eight vats, they added six in 1986, seven in 1989, five in 1991, and fifteen more in 1993. Also in 1993 AMC begins to export its miso to Europe, where it is distributed by Lima throughout the continent.

1995 April—Greg Gonzales starts work at American Miso Co. learning the process from Don DeBona.

1995—AMC uses up the last of tax loss carryforwards; total past financial losses go to zero.

1997 March—Greg Gonzales takes over management of the company after Don DeBona leaves.

4127. Gorman, Christine. 2000. Heart throbs. *Time*. July 10.
 • **Summary:** How does a person know that they are having a heart attack? A viselike pressure in the chest is the most common symptom. But recognizing the less common signs of a heart attack could save your life. You should be especially suspicious of any "heartburn" that gets worse if you walk around or otherwise do mild exercise.

One heart attack patient ordered “miso soup to treat what she thought was indigestion.” Fortunately her daughter noticed her ashen complexion and slurred speech, then rushed her to a hospital.

4128. Belleme, Jan. 2000. Work with American Miso Co. (Interview). *SoyaScan Notes*. July 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** After she and John had been living at the Onozaki’s home in Japan for about a month, a letter came from Mr. Kazama (of Mitoku) saying that Mr. Onozaki did not want to teach them any more about making koji—so they would have to leave any day now. This was disastrous news for them. Then, without an explanation, Mr. Onozaki changed his mind, and they ended up staying for 7 months.

After John and Jan returned from their apprenticeship with Mr. Onozaki in Japan, Jan worked side by side with John making koji and miso. In 1981, when she was pregnant, she had to increasingly take it easy. She worked up until the 7th month of her pregnancy; their son, Justin, was born on 24 May 1982. Address: P.O. Box 457, Saluda, North Carolina 28773.

4129. **Product Name:** [Tofu Mayonnaise, Miso].

Foreign Name: Tofunesa, Miso.

Manufacturer’s Name: Organica-ecotienda.

Manufacturer’s Address: Xicotencatl 653-18, Col. Centro, Veracruz, VER 91700, Mexico. Phone: 29-31-30-83.

Date of Introduction: 2000. July.

New Product–Documentation: Letter and form filled out by Pat Hayward. 2000. Aug. 25. This company is managed by Pat Hayward and Claudia Gutierrez. In July 2000 they introduced Tofunesa and are now making about 4 kg/month. “My first ever miso was packaged yesterday and although it’s not perfect yet, I was very excited that it turned out so well. It served to straighten out some kinks in the process (e.g., the problem here is not keeping the koji hot but how to keep it cool. Room temperature is about 31-34° C so I had to use my hair drier on cold blow to lower the temperature of the bundle). That batch was Red Miso, and now I’m set for the first trial of Mellow White. Will keep you posted!”

They are now developing shoyu, which they hope to start selling in Sept. 2000.

4130. Shurtleff, William; Aoyagi, Akiko. comps. 2000. *Miso and soybean chiang—Bibliography and sourcebook, first century B.C. to 2000: Detailed information on 2,619 published documents (extensively annotated bibliography), 343 commercial miso products, 304 original interviews (many full text) and overviews, 372 unpublished archival documents.* Lafayette, California: Soyfoods Center. 1026 p.

Subject/geographical index. Author/company index.

Extensively annotated. Printed July 10. 28 cm. [3198 ref]

• **Summary:** Miso, or “fermented soybean paste,” is one of East Asia’s most important soyfoods. Miso is an all-purpose high-protein seasoning, which has no counterpart among Western food or seasonings. Made from soybeans, rice or barley, and salt, its smooth or chunky texture resembles that of soft peanut butter. It comes in a wide range of warm, earthy colors ranging from light yellows to rusty reds, rich chocolate browns, or loamy blacks. Each miso has its own distinctive flavor and aroma, which for the darker, more traditional varieties is savory, and sometimes almost meaty, while for the lighter-colored types is subtly sweet and delicately refreshing. Miso’s range of flavors and colors, textures and aromas, is at least as varied as that of the world’s fine wines or cheeses.

Today miso is made by a small number of companies in the United States, Canada, Europe, and (as miso or miso products) is widely available at supermarkets, natural- and health food stores, and Asian stores.

This book contains the first detailed history of each of America’s pioneer miso manufacturers.

This is the most comprehensive book ever published about miso and/or soybean chiang. It has been compiled one record at a time, over a period of 25 years, in an attempt to document the history of this subject. Its scope includes all known information about these two seasonings, worldwide, from the first century B.C. to the present. It is also the single most current and useful source of information on this subject available today, since 86% of all references (and most of the current ones) contain a summary/abstract averaging 229 words in length.

This is one of more than 40 bibliographies on soybeans and soyfoods being compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyfoods Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features: 63 different document types, both published and unpublished, every known publication on the subject in every language—including 2,368 in English, 618 in Japanese, 120 in German, 105 in French, etc. Extensive translations of many of the Japanese and European works. 304 original Soyfood Center interviews and overviews never before published. Thus, it is a powerful tool for understanding the development of this subject from its earliest beginnings to the present, worldwide.

The bibliographic references in this book include 2,169 published documents and 372 unpublished archival documents. Each contains (in addition to the typical author, date, title, volume and pages information) the author’s address, number of references cited, original title of all non-English language publications together with an English translation of the title, month and issue of publication, and the first author’s first name (if given).

This book also includes details on 343 commercial miso products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as advertisements, articles, patents, etc.) are also given.

Details on how to make best use of this book, a complete subject/geographical index, an author/company index, a language index, and a bibliometric analysis of the composition of the book (by decade, document type, language, leading periodicals or patents, leading countries, states, and related subjects, plus a histogram by year) are also included. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

4131. Shurtleff, William; Aoyagi, Akiko. comps. 2000. Marketing miso and miso products: Labels, ads, posters & other graphics. Lafayette, California: Soyfoods Center. 158 leaves. July. Illust. (some color). No index. 28 cm. Series: Marketing soyfoods.

• **Summary:** This book is a collection of 85 color and 73 black-and-white photocopies of materials ranging in date from 1971 to 1999. The books in this series, each a unique collection of graphic materials, are designed for a number of purposes: (1) To serve as a source of ideas, ingredients, inspiration, legal specifications, and basic guidelines for companies in the process of developing their own products, designing their own graphic materials, and conceiving their own marketing strategies. (2) To document the tremendous diversity of soyfoods products and the way that each is presented and marketed. (3) By arranging the materials in chronological sequence, to help document the development and history of new product categories and soyfood types, and with them the rise of the soyfoods industry and market in the Western World. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

4132. Asimov, Eric. 2000. \$25 and under: Going beyond sushi, on an unlikely street. *New York Times*. Aug. 30. p. F9.

• **Summary:** This is a review of the Japanese restaurant Miyagi (220 West 13th St., Greenwich Village—a largely residential area on the west side of downtown {southern} Manhattan in New York City). One of the writer's favorite dishes was "greens tossed with delicate soy milk skins [yuba] in a mustard-and-miso dressing (\$4.25). The dish is so bright and winning that only on closer examination can you tell that the greens are broccoli rape."

4133. Elliott, Julia. 2000. Simply soy: Nature's own antidote. Clifton, Virginia: Pocol Press. xiv + 112 p. Aug. Index. 22 cm. [37 ref]

• **Summary:** Contents: Prologue. The problem: Menopause—a natural event, causes... and effects, my own changing. The solution: The soybean—a little bean with a big history, soy—nature's own alternative, the benefits of soy. The program: Soy food products, cooking with soy, soy recipes, cooking with tofu, tofu recipes. Guideposts for the journey: Warning, risks, and wisdoms, vitamins, minerals, and water, herbal alternatives, meditation, massage, and acupuncture. Epilogue. Appendices: Readings and resources (women's health resources, books about menopause, menopause web sites, books about soy and tofu, general information sources, soy product sources, soybean web sites), source notes, bibliography. About the author. Address: 10 Guyton St., Kingston, New York 12401. Phone: 914-338-6368.

4134. *SoyaScan Notes*. 2000. Status of the soybean in the USA and worldwide as of Sept. 2000: A few basic facts and statistics (Overview). Sept. 6. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The soybean is by far the world's most important oilseed or legume: World production in 1998 in million metric tons was: Soybeans 134.06. Cottonseed 33.52. Rapeseed 31.33. Peanut 26.37. Sunflowerseed 23.50. Total of the top 5 oilseeds: 249.14, with soybeans accounting for more than half of the total (54.0%).

The United States is by far the world's largest producer of soybeans, producing almost as much as all other countries combined! Leading world soybean producing countries in 1998-199 in million metric tons were: United States 75.028 (and 28.6 million acres). Brazil 31.000. Argentina 18.300. China 13.800. India 6.000. Paraguay 3.100. Canada 2.737.

Top four soybean producing states (million bushels) in the USA in 1998: Iowa 501. Illinois 468. Michigan 285. Indiana 235.

Value of the U.S. soybean crop in 1998: \$14.6 billion. Of the Indiana soybean crop: \$1.25 billion.

How are U.S. soybeans utilized? About 35.6% of the crop is exported as whole soybeans, 60% is crushed to make soy oil (by far the most widely used vegetable oil in America today) and soybean meal (which is fed to livestock, poultry, and aquaculture animals), about 3% is transformed from whole soybeans into various soyfoods such as tofu, soymilk, miso, etc., and the rest is used as seed to plant next year's crop. Of the crushed soybeans, about 9% goes into industrial uses (non-food, non-feed) such as soy ink, soy diesel, etc.

How is soybean oil utilized in the USA? 96.2% is used for food and 3.8% is used for industrial (nonfood) uses. Of the total food uses: Cooking and salad oils 48.7%. Shortening 37.3%. Margarine 12.9%. Other 0.5%. Of the total industrial uses: Fatty acids, soap and feed 56.94%. Resins and plastics 18.14%. Inks 17.03%. Paints and varnishes 6.31%, Biodiesel 1.42%.

A good source of current soybean statistics is the ASA (American Soybean Association) website: www.unitedsoybean.org/soystats2000.

4135. Hagler, Louise. 2000. Soja: Wandelbarste Bohne der Welt. Eine 'coole' Proteinquelle [Soya: The most versatile bean in the world. A 'cool' source of protein]. Aitrag, Germany: Windpferd. 140 p. Illust. Index. 18 cm. [Ger]
• Summary: Foreword by Peter Golbitz. Foreword by Louise Hagler. Introduction by Dr. Mark and Virginia Messina. Basic soyfoods. Feeding babies and children soyfoods. Breakfast, brunch & bread. Whole soybeans. Sauces, spreads, dips & dressings. Soup & salad. Main dishes. Desserts. Drinks & yogurt.

No dairy products or eggs are used; honey is called for in some recipes. Address: The Farm, Summertown, Tennessee.

4136. Mangels, Reed. 2000. Nutrition hotline: The phytate component of soy products. *Vegetarian Journal (Baltimore, Maryland)* 19(5):2. Sept/Oct.

• Summary: "Phytates interfere with the absorption of minerals, but do not completely prevent us from absorbing minerals like calcium and iron. The presence of phytates is not a good reason for avoiding soy products. Whole grains and other dried beans also contain phytates."

"Fermented soy products, including tempeh and miso, have a lower phytate content so that zinc from these foods is better absorbed than from unfermented soy products like tofu and soymilk." Address: PhD, R.D., Baltimore, Maryland.

4137. **Product Name:** Cold Mountain Kyoto White Miso, Kyoto Red Miso, Mellow Red Miso (Made with Organic Soybeans; GMO Free).

Manufacturer's Name: Miyako Oriental Foods, Inc.

Manufacturer's Address: 4287 Puente Ave., Baldwin Park, CA 91706. Phone: (877) 786-MISO (6476).

Date of Introduction: 2000. September.

Ingredients: Filtered water, rice, organic whole soy beans, sea salt, koji starter.

Wt/Vol., Packaging, Price: 14 oz (397 gm) plastic tub. Retail for \$4.19 (2002/10, Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 2001. Oct. 5 inches diameter at top, 2.75 inches high. Blue, black, tan, and light green on white. On the lid are recipes for: Miso soup. Miso salad dressing. Ingredients and product name are given in both English and French. "60% less sodium than regular miso."

Talk with Joe Arai at Miyako. 2002. Aug. 29. These three products were first sold in Sept. 2000. The containers for all Cold Mountain misos were redesigned and the

number of products in this line doubled to 6 from 3. This coming September, Miyako will expand into the building next door.

4138. Hirota, Akira; Taki, S.; Abe, N.; Yano, M.; Kawaii, S. 2000. Antioxidative activity and antiproliferative activity toward cancer cell lines of 8-hydroxyisoflavones from soybean miso. In: Kyoko Saio, ed. 2000. Proceedings–Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 218-219. [4 ref]
 Address: 1-3. School of Food and Nutritional Science, Univ. of Shizuoka, 52-1 Yada, Shizuoka 422-8526, Japan; 4-5. National Inst. of Fruit Tree Science, Okitsu-naka, Shimizu 424-0204, Japan.

Proceedings–Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 117-120.

• Summary: Japan is the world's largest soybean importer. Of the 4.9 million tonnes (metric tons) imported, about one million tons (actually 960,000 tonnes or 19.6%, called "food soybeans") are used for making tofu, miso, natto, soysauce, etc. The rest are crushed to make soybean oil and meal.

A table (p. 118) shows the quantity of soybeans obtained from various sources to make each of the major Japanese soyfoods in 1998, 1999, and 2000. In the year 2000, some 512,000 tonnes were used to make tofu, 168,000 tonnes for miso, 125,000 tonnes for natto, 40,000 tonnes to make soy protein and products, 30,000 tonnes to make soysauce (from whole soybeans), 6,000 tons to make soymilk, and 79,000 tons to make other products. Grand total 960,000 tonnes. Address: Marubeni Corp., Japan.

4140. Onishi, Yoshihisa. 2000. Adapting HACCP to Japanese traditional soybean food. In: Kyoko Saio, ed. 2000. Proceedings–Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 138-141.

• Summary: In 1996 Japan was hit by a series of intestinal hemorrhagic E. coli O157 cases nationwide. The Japanese are working to adopt HACCP (Hazard Analysis and Critical Control Points) to the soy sauce, miso, and tofu industries. Each food has its unique CCP. Address: Japan Food Industry Centre.

4142. Packaged Facts. Subdivision of Marketresearch.com. 2000. The U.S. soyfoods market. New York, NY. 150+ p. Oct. 28 cm. *

• **Summary:** This market study, No. LA595, retails for \$2,750. It examines the \$2.2 billion soyfoods industry, and the strategies that are used in causing this market to explode, including unique promotional programs, product innovations, and acquisitions. The report covers 5 product categories: Meat alternatives; Dairy alternatives; Snacks, cereals, and breads; Bulk soybeans; Meal replacements/protein powders. It also discusses other soyfoods (including soy sauce and miso) and profiles leading manufacturers. It projects sales trends through 2005 and gives details on distributor trends and consumer attitudes and behaviors. Available from Marketresearch.com, which has a database of over 6,000 reports from 350+ publishers.

Talk with representative of Packaged Facts. 2000. Oct. 31. Packaged Facts is no longer a subsidiary of FIND/SVP; they separated in about 1997 or 1998. FIND/SVP is, however, a strategic partner which conducts only custom market research; they have no off-the-shelf reports. Address: 625 Ave. of the Americas, New York, NY 10011. Phone: 1-800-346-3787.

4143. Paul, Donna. 2000. Made in New England: The artisanal food movement is flourishing in the Northeast... *Metropolitan Home* 32(5):213-18. Sept/Oct.

• **Summary:** "Artisanal foods—those made in a traditional, craftsmanlike manner, have long been produced in the Northeast. Today's surge in interest appears to stem from Americans' increasing desire to know more about where their food comes from... 'The human being is the missing ingredient in modern food,' says Christian Elwell, owner of the South River Miso Co. in Conway, Massachusetts. While technology speeds up the world, food artisans are slowing things down, devoting themselves to making first class food products in small quantities and by hand. Not surprisingly, the efforts of food artisans are revered by home cooks and chefs alike."

Contains "profiles of five of New England's finest artisanal food producers paired up with recipes from five of the region's best chefs." One of the companies is South River Miso. Color photos (by Donna Paul) show: (1) South River's miso aging outdoors, above green grass, in 7,500-lb. cypress vats, from 21 days to as much as 3 years. (2) Christian Elwell, using a wooden paddle, to stir steamed grains for making koji. The recipe is for Beef barbecued in white miso with icicle radish salad. A sidebar gives the company address and phone number.

4144. Watanabe, Shaw; Uesugi, S.; Zhuo, X. G.; Uehara, M.; Takamatsu, K. 2000. Effects of soy rich diet and isoflavone supplement on healthy women. In: Kyoko Saio, ed. 2000. Proceedings—Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 203-206. [8 ref]

• **Summary:** Japanese consume 20-30 mg/day of isoflavones on average. This isoflavone intake is mostly attributable to tofu, natto, and miso. Address: 1-4. Dep. of Nutritional Science, Tokyo Univ. of Agriculture, Tokyo 156-8502, Japan; 5. Research Inst. of New Materials, Fuji Oil Company.

4145. *Canadian Soybean Bulletin (OSG, Chatham, Ontario, Canada)*. 2000. Incoming Japan soybean mission. 14(2):1. Nov.

• **Summary:** Japan imports 5 million tonnes (metric tons) or 184 million bushels soybeans each year. Of that, about 1 million tonnes (20%, or 37 million bushels) are used to make soyfoods such as tofu, miso, natto, soy sauce, etc. Of the 1 million tons, 500,000 tonnes (50%) are for tofu, 160,000 tonnes (16%) are for miso, and 130,000 tonnes for natto.

Exports of Canadian have been increasing rapidly, from 36,000 tonnes in 1995, to 75,000 tonnes in 1998, to 175,000 tonnes in 2000.

In Sept. 2000, the Canadian Soybean Export Association and the Ontario Soybean Growers hosted ten Japanese from the soyfoods industry and showed them the Canadian soybean industry. These Japanese were most appreciative "of our efforts to segregate GMO and non-GMO varieties of soybeans using our Identity-Preserved, or IP program."

4146. South River Miso Co. 2000. We are now on the Web and ready to take your order (Postcard). Conway, Massachusetts. 1 p. Postmarked Nov. 21. Front and back.

• **Summary:** On the front of 4¼ by 6-inch card is a color photo of Stephen Jannetta ladling steamed grain out of a cauldron to make koji at South River Miso Co. in late 1993 or early 1994. Across the top is printed "www.southernrivermiso.com."

On the back: "For recipes. To order direct. If you would like to receive our current pricelist by mail, please let us know." Address: 888 Shelburne Falls Rd., Conway, Massachusetts 01341. Phone: (413) 369-4057.

4147. South River Miso. 2000. South River Miso (Website printout—complete). [Http://www.southernrivermiso.com](http://www.southernrivermiso.com). Printed Dec. 16.

• **Summary:** Contents: Home page (Welcome, two photos, quotation about miso from Dr. Shinichiro Akizuki). 1. About us (Our mission, our story, history; 3 p., 3 photos, 3 illustrations). 2. About miso (1 year miso, sweet-tasting brown rice miso, chick pea miso, azuki bean miso, golden millet miso, mellow barley miso, quotations from two satisfied customers; 2 p.) 3. Miso recipes (Contains no actual recipes, but the viewer can download 26 recipes using Acrobat reader; 2 p.). 4. Our products (Same as section 2, "About miso"; 2 p.). 5. Order (Order form, bulk order, order sampler, Tee shirts; 3 p.). Address: 888 Shelburne Falls Rd., Conway, Massachusetts 01341. Phone: (413) 369-4057.

4148. *SoyaScan Notes*. 2000. Chronology of major soy-related events and trends during 2000 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 8—The Kerry Group (of Wisconsin and Iowa) purchases Solnuts, a pioneer manufacturer of dry-roasted soy nuts, in Hudson, Iowa.

Jan.—Kraft Foods Inc. (Illinois) purchases Boca Burger Inc., America's third largest maker of veggie burgers, after Worthington Foods and Gardenburger.

March 6—The Hain Food Group announces that it will acquire the Celestial Seasonings tea company to become the largest natural foods company in the USA.

March 9—The USDA formally approves a rule change allowing soy protein products to completely replace meat products in the Federal School Lunch Program.

March 31—Monsanto, the world's leading agricultural biotech company, merges with Pharmacia & Upjohn (a large pharmaceutical company), and the new company is renamed Pharmacia Corporation.

April—An article by Lon White on tofu and brain aging is published in *J. of the American College of Nutrition*.

June 9–20/20 (ABC) television program, titled "Soy—The untold story," airs on Friday at 10:00 p.m. discusses many of the shortcomings of soyfoods, but in a very fair way.

June 13—Martha Stewart, on her popular nationwide TV program *Living*, has a very positive segment on edamamé.

July 14—Lightlife Foods Inc. (of Turners Falls, Massachusetts) is purchased by ConAgra Inc., a \$25 billion food company based in Omaha, Nebraska—for an undisclosed amount. Lightlife's plant, employees, and management team will stay in place. Lightlife is a leading

maker of vegetarian meat alternatives, with 150 employees and about \$25 million in annual sales.

July—At a joint meeting of ASA and USB, the International Soy Protein Program (ISPP) was born as ASA and the Illinois Soybean Program Operating Board (ISPOB) formalized their joint commitment to "Increase the international consumption of soy protein by humans in new markets—developing countries—and thereby create new opportunities for disappearance of soybeans and provide higher economic returns to U.S. soybean producers." ISPOB and its Executive Director Lyle Roberts were instrumental in conceiving the program and raising its initial funding. This program was later reamed WISHH.

Sept.—Monsanto's patent on glyphosate expires. Glyphosate is the active ingredient in *Roundup*, the world's best-selling herbicide.

Dec.—Sanitarium Foods of Australia acquires the 47% of SoyaWorld owned by Sunrise Soya Foods (Vancouver, BC, Canada).

Trends: 1. This year, the momentum created by the FDA health claim in Oct. 1999 has propelled the soyfoods industry to new heights. Existing companies are growing rapidly, and many new companies (including some of America's biggest food companies) are entering the market with new products.

2. This year, for the first time, soymilk has become a mainstream American beverage. As of May, White Wave Silk soymilk is sold in 24,000 supermarkets nationwide. Edamamé (green vegetable soybeans) have gone mainstream in California, and are rapidly becoming popular on both coasts of the USA.

3. In the United States and Europe, the tide seems to be flowing increasingly against genetic engineering of foods and food plants. More and more companies in the natural foods industry are labeling their products as "non-GMO" or "GMO-free" or "No GMOs." Monsanto has stopped its efforts to develop genetically engineered soybeans for food use and focused its attention instead on livestock feeds. It now seems likely the genetic engineering of plants has a future, but not in the area of foods—at least in developed countries.

4. Interest in "food-grade soybeans" continues to grow in the USA and has increased substantially this year. Canada began focusing on identity-preserved food-grade soybeans 10-15 years before the USA. U.S. interest began to grow in about 1995 with the introduction of genetically engineered soybeans and with the accelerating interest in food uses of soybeans.

5. While pro-soy articles (mostly about health benefits) continue to increase, so do anti-soy articles and Internet sites. The loudest anti-soy voices are those of Sally Fallon and Mary Enig of the USA (they believe traditional fermented soyfoods—such as miso, shoyu, natto, and tempeh—are good, traditional non-fermented soyfoods—such

as tofu, soymilk, and edamamé—are not very good, and modern soy protein products—such as soy protein isolates, concentrates, and textured soy flour—are the worst of all, being highly processed with chemicals such as hexane solvent), Richard and Valerie James of New Zealand, and Lon White of Hawaii. Some of the concerns they raise are legitimate and deserve further research, but the majority (we believe) are not. Nevertheless, many of the health claims made for soy in popular articles are exaggerated or somewhat sensational, and not firmly supported by scientific evidence.

6. As we are about to enter a new century and a new millennium on 1 Jan. 2001, soyfoods appear to have a bright future, worldwide. This past year has seen more activity and interest in, and media coverage of, soyfoods than at any time in the history of the United States.

4149. Fisher, Kate. 2000. Using the old bean: Commodity soybeans aren't left out of soyfoods surge. *Soybean Digest*. Dec. p. 12, 16.

• **Summary:** Walt Fehr says that in the soyfood market there are two types of beans: Specialty beans (premium market) and commodity beans (general market). Low-cost commodity beans are used for such things as soy oil plus some soy protein concentrates, soy isolates and soy flour.

Until recently, Japanese food processors bought large amounts of what they call IOM (Indiana, Ohio, Michigan) soybeans. These are commodity beans that the Japanese believe have higher protein content and are better for food uses than commodity beans grown in other parts of the USA. But biotech issues have caused IOM soybeans to lose considerable market share to identity-preserved soybeans—most of which are non-GMO.

The premium food-grade market consists of many soybeans: (1) Small seeded types for natto and soy sprouts. (2) Large-seeded soybeans for edamame, miso, and tofu. (3) Other soybeans with special traits for food use, such as high protein, lipoxygenase free, low saturated fat, low linoleic acid, etc.

Note: This article is bizarre. The words “organic” and “non-GMO” are barely mentioned.

4150. Huang, H.T. 2000. Science and civilisation in China. Vol. 6, Biology and biological technology. Part V: Fermentations and food science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. Illust. Index. 26 cm. [200+ soy ref]

• **Summary:** This is the most important book on soyfoods in China ever written, and it is especially good on their origins and early history in China. It is also one of the best books seen on food in Chinese culture and history.

The section titled “Soybean processing and fermentation” (p. 292-378) comprises 14.3% of the book's text, and has the following contents: Introduction. Soybean

sprouts. Soybean curd and related products: The origin of bean curd, transmission of *tou fu* to Japan, products associated with *tou fu* (soymilk {*tou fu chiang*}, tofu curds {*tou fu hua* or *tou fu nao*}, pressed tofu sheets {*ch'ien chang* or *pai yeh*}, yuba {*tou fu i* or *tou fu p'i*}, deep-fried tofu {*yu tou fu* or *tou fu p'ao*}, pressed tofu {*tou fu kan*}, five-spice pressed tofu {*wu hsiang tou fu kan*}, plain dried tofu [pressed tofu] {*pai tou fu gan*}, smoked tofu {*hsün tou fu*}, dried tofu soaked in brine and fermented {*ch'ou tou fu kan*}, frozen tofu {*tung tou fu*}, making fermented tofu {*fu ju*}, comparison of *tou fu* and cheese, addendum. Fermented soybeans, soy paste, and soy sauce: *Ferments* for food processing, fermented soybeans—*shih*, fermented soy paste—*chiang*, fermented soy sauce—*chiang yu*, soy fermentations in China and Japan.

Note: This is the earliest English-language document seen (Feb. 2004) that uses the term “hsün tou fu” [pinyin: *xun doufu*] to refer to smoked tofu. Soy is also discussed in other parts of the book. Address: Alexandria, Virginia.

4151. Larson, Stephanie. 2000. The soyfoods boom: What's driving the explosion? First in a series. *Soybean Digest*. Dec. p. 10-11.

• **Summary:** Mark Messina says the whole market is driven by consumer demand because of health effects. Sales of soyfoods and soy protein products was \$2.1 billion in 1999. Of that total, soymilk sales accounted for \$300 million, up 38% from 1998. A graph shows soymilk sales (in million dollars) from 1992 to 1999, with projection to 2002. These sales rose from \$100 million in 1993 to \$300 million in 1999, projected to reach \$500 million in 2001.

The United Soybean Board calculated that last year Americans consumed 37 million bushels of soybeans via soyfoods. A color photo shows many commercial soyfood products with colorful labels: Bergin Nut Company Soynuts (no salt), Fantastic Foods Tofu Scrambler, MCOA Brown Rice Miso, Spectrum Soy Oil, Health Trip Soynut Butter, Midwest Harvest Textured Soy Protein, Low-Fat Soy Flour, and Firm Tofu, Country Choice Soy Cocoa, Eden Organic Black Soy Beans, and Whole Foods Soy Ginger Sauce.

4152. **Product Name:** Organic Brown Rice Miso, or Organic Barley Miso (Aged 2 Years).

Manufacturer's Name: Tradition Miso.

Manufacturer's Address: R.R. #4-2090, Claremont, ON L1Y 1A1, Canada. Phone: 905-649-2513.

Date of Introduction: 2000. December.

Ingredients: Organic soybeans, organic rice or barley, unrefined sundried sea salt [from Brittany, France], deep well water, culture (*Aspergillus oryzae*).

Wt/Vol., Packaging, Price: 450 gm glass jar. Retail for Canadian \$10/jar (2001/04, Ontario, Canada).

How Stored: Refrigerated.

New Product–Documentation: Talk with Jerry Lewycky (whose last name is pronounced luh-WIK-ee), founder and owner. 2001. April 20. Jerry and his wife and co-worker, Suzanne Cardinal, first began selling their two long-term misos in Dec. 2000. Their company name is Tradition Miso and they sell their miso in glass jars. They now have two distributors. Jerry and his wife make two vats of miso a year. Each vat holds 7,000 lb. of miso. They have no plans for a short-term miso. His miso should be refrigerated. The jar has a special continuous-thread lid that breathes to enable gas to escape. He sells his miso only in Eastern Canada at about \$10/lb. His biggest competition is Cold Mountain Miso (from southern California) which retails in Ontario for Canadian \$7-8 for a 400 gm plastic tub. South River Miso is more expensive than his at Canadian \$14-15/lb glass jar, but South River has more varieties of miso, so Jerry's two varieties have displaced only some of South River's. The salt he uses is gray, unrefined, and wet. It comes from Brittany, France. Other misos use partially refined salt.

Labels for Organic Brown Rice Miso and for Organic Barley Miso sent by Jerry Lewycky. 2001. April 27. Brown Rice: Black and reddish brown on yellow. Barley: Black and reddish brown on silver. On each, below the large word "Miso" is printed "aged two years." The logo looks like a monk sitting in meditation.

New Labels brought to Soyinfo Center by Jerry, Suzanne Cardinal, and their two kids, Katrina and Maxim. 2007. Jan. 2. (1) Organic Barley Miso: Black and reddish brown on gray. Aged 3 years. Product with this label first sold April 2006. (2) Organic Brown Rice Miso: Black and reddish brown on light yellow. Product with this label first sold Sept. 2006. Each is certified organic by OCPRO Canada. The logo is still the black illustration of the monk.

4153. **Product Name:** [Tempeh, Amazake, Miso].

Foreign Name: Tempeh, Amazake, Miso.

Manufacturer's Name: Rui Rato Tempeh.

Manufacturer's Address: Bairro da Coopalme, Lote 291, 2727 Algueirao, Portugal. Phone: +351 21 920 2798.

Date of Introduction: 2000.

New Product–Documentation: Talk with Roy Kamiki of Nutrideas, Portugal. 2001. June 10. Ricardo currently makes tempeh, amazake, and miso, but does not have a company name. He has only one customer. He sells tempeh frozen to a big organic co-op–BioCoop–An organic farming Product Co-op is Lisbon.

"Mr. Rui Rato is a fan of yours and a great appreciator of your books. He has nearly all your publications, but does not depend on soyfoods production for his source of income. He has another steady job and makes soyfoods in his spare time."

4154. Ageru miso [Presenting miso]. 2000. Tokyo: Shibata Shoten. 175 p. 28 cm. Series: Ryori Hakka, no. 48; Shibata Shoten Mukku. [Jap]*

• **Summary:** This is a cooking magazine's special issue. Address: Japan.

4155. Evans, K. Lee; Rankin, Chris. 2000. Giant book of tofu cooking. New York, NY: Sterling Publishing Co., Inc. 256 p. Illust. (color photos). Index. 28 cm.

• **Summary:** A beautiful vegetarian cookbook, with many color photos on glossy paper, excellent use of standard terminology (except for "freeze-dried tofu"), and 350 healthful, delicious recipes. Contents: Introduction. Tofu basics and techniques: Getting started (buying tofu {soft tofu, form tofu, extra-firm tofu, silken tofu, marinated tofu, smoked tofu, freeze-dried tofu, fermented tofu}, storing tofu, preparing tofu for your recipes {draining and blotting, pressing, freezing and thawing, blending, cubing and dicing, crumbling, shredding / grating, marinating, boiling slightly sour tofu, frying, deep-frying}), other soy products (edamame, meat alternatives, miso, soy cheese, soy flour, soy ice cream, soy milk, soy sauce, soy sprouts, soy "yogurt," soynut butter, soynuts, tempeh, textured soy protein, whole dry soybeans), tofu and a healthier you (introduction, protein, heart disease, cancer, menopause, osteoporosis, our planet), simple ingredient substitutions (eggs, milk, cheese, butter, salt, sugar {honey, molasses, maple syrup, rice syrup, barley malt syrup}). Ingredient glossary: Incl. arrowroot, balsamic vinegar, bamboo shoots, barley malt syrup, fermented Chinese black beans, filé powder, galangal, garam masala, garbanzo beans, Hoisin sauce, liquid smoke, mirin, miso, nutritional yeast, phylo or filo, pickled ginger, quinoa, rice noodles, rice papers, rice syrup, sake, shoyu, tahini, toasted sesame oil, vegetarian gelatin, vegetarian Worcestershire sauce ("Just like the original, it is made of soy, vinegar, and spices, but without the anchovies"), wakame, wheat germ. Breakfast. Appetizers. Soups. Salads. Lunch and dinner. Dressings, sauces, and spreads. Desserts. Metric conversion chart. Acknowledgments.

4156. Fruehschuetz, Leo. 2000. Soja [Soya]. Schaaflheim, Germany: Bio Verlag. 144 p. With recipes by Judith Braun. Illust. Index. 15 cm. [12 ref. Ger]

• **Summary:** Contents: Forward: Portrait of the soybean: From China to the entire world, the composition of whole beans, does soya help with cancer?, protein and oil for the world economy. The original soybean and what followed: Introduction (there is not much to improve on in the soybean), the "labor-bean" (Monsanto and Roundup-Ready soybeans), the results for farmers, for the environment, for health, politics without results, for trade and the end-users, the forgotten results, soya in animal feeds. Organically grown soya–without genetic engineering and pesticides.

Versatile: Soya in the wholefoods kitchen: Soybeans: whole, ground, and sprouted, the fluid bean–milk, yogurt (fermented), and oil, tofu–the meat without bones, tempeh–the noble cultured food from Indonesia, soy sauce–aged in wooden vats, miso–soya for soups, soyameat–saved from the wolf. Recipes: Soymilk, soy flour and flakes, tofu, tempeh, soy meat and granules, miso, soy sprouts. Address: News journalist for natural foods and long-lived people, co-worker with Schrot&Korn.

4157. Fukuyama, Hideko. 2000. *Okazu tokidoki-zakana, goma miso su* [Side dishes from time to time with drinks, sesame, miso and vinegar]. Tokyo: Bunka Shuppankyoku. 95 p. Illust. (mainly color). 23 cm. [Jap]*
Address: Japan.

4158. Kouwenhoven, Arlette; Forrer, Matthi. 2000. *Siebold and Japan: His life and work*. Leiden, Netherlands: Hotei Publishing. 111 p. Illust. (Incl. color). No index. 27 cm. [40* ref. Eng]

• **Summary:** An excellent biography of Philipp Franz von Siebold (1796-1866), a German physician and naturalist who was one of the first Europeans to live in Japan. In 1823 Siebold wrote a letter to the Governor of Batavia requesting professional help at Deshima. In 1825 two men were finally dispatched: (1) Dr. Heinrich Bürger (1804-1858), a scholar, who worked as a pharmacist in Batavia, and who was to assist with scientific research, chemistry and mineralogy; and (2) Carel Hubert von Villeneuve, an auditor and artist.

On 15 Feb. 1826, Siebold departed from Deshima, accompanying the court journey to Edo (today's Tokyo) of *Opperhoofd* Johan Willem de Sturler; Siebold was joined by Dr. Bürger in the role of secretary, although Bürger's true purpose was to assist Siebold in his scientific research. These were the only three Dutchmen allowed to make the long journey. Siebold and Bürger were well prepared for the trip; they had gathered all sorts of equipment to take with them, including barometers, thermometers, hygrometers, sextants, chronometers, microscopes, crockery, furniture, silver, fine glassware, and even a piano. Some of these items were intended as gifts. En route, the inquisitive Siebold observed and wrote about practically everything. They arrived in Edo on 10 April 1826, about 2 months after leaving Nagasaki, a trip of about 1,400 km. On 1 May 1826 the three Dutchmen had an audience with the shogun. The delegation finally left Edo on 18 May 1826 and arrived at Deshima on July 7. Note: It was almost certainly on this trip that Siebold and Bürger observed soybeans and recorded their observations in the trip's log.

A 3-page chronology of Siebold (p. 100-02) includes: 1796 Feb. 17. Philipp Franz von Siebold born in Würzburg [in today's Germany]. 1815–Starts study of medicine at the University of Würzburg; subjects include chemistry, botany, and physics. 1820–Completes his studies in medicine,

surgery, and anatomy, obtains his doctorate, and establishes himself as a physician in Heidingsfeld. 1822 June 21–Appointed Surgeon-Major in the Dutch East-Indies Army. 1823 Feb. 13–Arrives in Batavia. On April 18 he is appointed to the post of physician at the trading post on Deshima, near Nagasaki, Japan. He also receives instructions to conduct research into Japanese natural history, laws, and politics.

1823 Aug. 12. Arrives on Deshima and starts teaching almost immediately. That same year he “married” Kusumoto Sonogi, also known as Otaki (1807-1865); she is 11-12 years younger than he. 1824. Starts a botanical garden on Deshima at the request of the government in Batavia. Opens his school in Narutaki, just outside Nagasaki. 1825. Dr. Heinrich Bürger arrives from Batavia to help Siebold with his geological research, accompanied by C.H. Villeneuve, the illustrator.

1826 Feb. 15 to July 7. He accompanies *Opperhoofd* De Sturler on the court journey to Edo. Bürger, Keiga and several of his Japanese students join the delegation. 1827. The government in Batavia requests his return there, with the possibility that he may have to return to Holland. Also in 1827 Von Siebold's daughter, Oine (1827-1903) is born.

1828 Sept. 18. A severe storm causes the ship, with 89 crates containing Siebold's collection, to run aground on the coast at Nagasaki. The discovery of forbidden objects leads to the detainment of Siebold, Takahashi, and many others. Siebold is placed under house arrest.

1829 Oct. 22. After being subjected to lengthy cross-examination, Siebold is banished from Japan. On Dec. 30 he leaves Japan.

1830 Jan. 18. Arrives in Batavia, then travels to Holland where he arrives on July 7. In Antwerp he meets Dr. Hoffmann, who is later to become the first professor at Leiden University.

Note: 1830. Siebold's first publication on Japanese plants appears (largely in Latin, but with many Japanese characters) in *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 12:1-74. See p. 54-57, plus first table at end. He mentions two species of soybeans: *Sooja Japonica*, the cultivated soybean, and *Sooja nomame*, the wild soybean; he says he has seen a living plant specimen of the latter. Soybeans are used to make shoyu, miso, and tofu. A note at the end of table I states that he drafted it at Deshima in November 1827.

1831 April 20. King Willem I agrees to buy Siebold's ethnographic collection and to pay an advance of 12,000 guilders. 1832. Hires a house at 19 Rapenburg in Leiden, Netherlands, where he organises his collection and opens it to the public. He maintains contact with Bürger, who still lives on Deshima. Travels to Germany in the autumn. 1833. Returns to The Netherlands in the summer. Presents the first copy of his opus *Nippon* to the Society of Dutch Letters on 26 Nov.

1835. Travels in Germany and Austria. Meets Zuccarini and others. 1836 Aug. 22. Buys the house at 19 Rapenburg. 1839. From now on he spends winters in Germany, where he meets his future wife, Helene von Gagern.

1840. Buys a piece of land at Leiderdorp, where he builds the villa, 'Nippon' and starts a nursery. 1842. Establishes the plant and seed company, Siebold & Co. with Blume and Rodbard. 1845 July 10. He marries the Lady Helene von Gagern (1820-1877) in Berlin; she is 24 years younger than he. Soon four children are born. 1859. Returns to Japan. Arrives in Nagasaki on Aug. 4. 1861 Oct. He is banished from Edo, and Japan itself. 1866 Oct. 18. Von Siebold dies in Munich, Germany; he is buried in the Alten Südlichen graveyard on the Thalkirchner Strasse.

4159. Liberty, Anne. 2000. Super soy! Protect yourself against bone loss, heart disease, cancer, menopause, high cholesterol. Boca Raton, Florida: American Media Mini Mags Inc. 66 p. 14 cm. [1 ref]

• **Summary:** This mini-book (only 5½ inches high) was sold (for \$1.19) next to the tabloid magazines at the checkout stand at Longs Drug Store in Lafayette, California. On the little cover is a color photo of a grey-haired and healthy-looking lady holding a glass of soymilk. Contents: All about soy: Inside the soybean (phytoestrogen, isoflavones, genistein, protease inhibitors), eight of soy's top health benefits (antioxidant protection from free radicals, breast cancer protection, cholesterol control, colon cancer protection, strong bones, hot flash reduction, a strong immune system, and kidney disease prevention), different soy products (green soybeans, hydrolyzed vegetable protein {HVP}, infant formula {soy-based}, lecithin, meat alternatives, miso, non-dairy frozen soy ("soy ice cream"), soy cheese, soy flour, soy grits, soy protein (incl. TSP = textured soy protein = textured soy flour), soy sauce, soy yogurt, whole soybeans, soy nut butter, soy nuts, soy oil, soy sprouts, tempeh, tofu, whipped soy-based topping, yuba), nutritional value, how much do you need? Bone loss. Heart disease and cancer: Heart disease, cancer (genistein, isoflavones, phenolic acids, phytates, protease inhibitors). Menopause. Cholesterol. Cooking with soy products: Soy flour, miso, soy milk, soy protein, tofu, tempeh. Delicious soy recipes.

The author frequently refers to Earl Mindell, PhD, but has no real scientific references. Many of the recipes were provided by the United Soybean Board. On the last page are two sources of more information and recipes: The United Soybean Board website www.talksoy.com and the Indiana Soybean Board website www.soyfoods.com.

• **Summary:** A remarkable and extremely valuable book. Partial contents: Introduction: Recent historiographical trends, center and periphery, periodization, the dynasties. I: Basics. 1. Language. 2. Dictionaries. 3. People. 4. Geography. 5. Chronology. 6. Telling the time. 7. Statistics: Numbers and order of magnitude, population, weights and measures, money, prices. 8. Guides and encyclopedias. 9. Locating books. 10. Locating secondary sources. 11. Libraries.

II: Pre-Qin sources. 12. Archaeology. 13. Pre-Qin archaeology. 14. Prehistoric signs and symbols. 15. Oracle bone inscriptions. 16. The characters: Evolution and structure. 17. Epigraphy. 18. From bamboo strips to printed books. 19. Excavated and transmitted texts.

III: Historical genres. 20. Primary and secondary sources. 21. Annals. 22. Standard histories. 23. Topically arranged histories. 24. Miscellaneous histories. 25. Government institutions. 26. Official communications. 27. Law. 28. War.

IV: Other primary sources... 35. Agriculture, food and the environment. 36. Medicine. 37. Technology and science... 42. Foreign accounts of China.

V: Primary sources by period.

In the chapter titled "Agriculture, food and the environment," section 35.2.2 on "Pre-Qin foodstuffs and cooking" (the Qin dynasty, 221-206 B.C., came just before the Han) states that the staple dishes, cooked mainly by boiling or steaming, were typically "accompanied by a savory paste (*jiang*, *misô* in Japanese) made from hydrolyzed (fermented) meat, fish, crustaceans, or, most important of all, soybeans" (Footnote 8). "The soybean is indigenous to northeast China. Its cultivation began in the Zhou period. It was a major source of protein, especially for peasants and laborers. Starting in the Yangzi valley, it was brined and hydrolyzed into the characteristic Chinese

flavoring, soy sauce (*jiangyou*) (9). By the Han, a new process had been discovered; if the production was interrupted half way and the beans dried, they became blackened and delicious. Along with savory pastes (*jiang*) and pickles (*zu*), these fermented soybeans (*chi*) were immensely popular (10)."

Footnote 8: See *Zhongguo shiqian yinshishi* (A history of Chinese prehistoric food and drink), Wang Renxiang, ed. in chief, Qingdao, 1997.

Footnote 9 (p. 638): "The origin of 'soya' in European and other languages is from either *xiyao* [soy nugget sauce] or *shōyu* (the Cantonese and Japanese for *jiangyou* [soy sauce] respectively). The early generic word was *shu* (*Glycine max*), later *dou*, and later still *dadou* to distinguish it from post-Han imported pulses."

Footnote 10: "*Chi* used to be pronounced *shi*. Other names for *chi* were *douchi*, *daku*, and *nadou* (*nattō* in Japanese)."

Section 35.2.3 on "New foodstuffs and cooking" covers the period from the beginning of the Han dynasty in 202 B.C. Noodles (*bing*) were introduced. Soybeans (in the forms of *jiang* and soy nuggets {*chi*}) remained an important source of protein. Alfalfa (*musu* or *mushu*), peas (*hudou*, modern *wandou*), and sesame (*huma*, modern *zhima* or *mazi*) are said to have been introduced by Zhang Qian, the emissary from the Former / Western Han dynasty. By the Tang "bitter fermented blackened soy beans" (*huchi*) had been introduced; *hu* means "barbarian." Tofu (*doufu*) is first mentioned in the early Song dynasty. It was imported into Japan and first appeared there in a document dated 1183. "It was used as a substitute for meat and fish in Buddhist vegetarian cooking." New World crops which made their way into China from the 16th century include peanuts (*fandou*, modern *huasheng*), chili, corn, sweet potatoes, and tomato (p. 643).

Note: The author was educated in England. Address: Head of Delegation and Ambassador to China for the European Commission.

4163. Yūmeiten no ryōrinin go oshieru miso o tanoshimu ryōri hachijippin [Chefs from famous restaurants teach 80 recipes for enjoying miso]. 2000. Tokyo: Seibido Shuppan. 129 p. 29 cm. Series: Seibido Mook. [Jap]*
Address: Japan.

4164. Hagler, Louise. 2001. Miso cookery. Summertown, Tennessee: The Book Publishing Co. 96 p. Illust. Index. 23 cm.

• **Summary:** Contains 70 recipes (each with a nutritional analysis) that use miso as an ingredient, and four full-page color photographs. Contents: Introduction. It's alive!!!! (visit to American Miso Co. in North Carolina). Soups. Spreads. Salads and dressings. Sauces and gravies. Vegetables. Main dishes. Side dishes. Sweet things.

Many recipes call for the use of tofu as an ingredient, and some call for the use of edamame, gluten, soymilk, soy yogurt, tempeh,

On the rear cover is a color photo of Louise Hagler; her vegetarian cookbooks have sold over 750,000 (or 742,000) copies worldwide. Address: Summertown, Tennessee.

4165. *Nutrition Business Journal* (San Diego, California). 2001. Edward & Sons resists would-be acquirors: Service, quality and established supplier relationships are the basis of business for niche-oriented organic food company. 6(2):16. Feb.

• **Summary:** Located in Carpinteria, California, Edward & Sons is a 24-year old firm with annual sales of \$8-\$10 million, growing at nearly 20% a year. They sell 60 items including misos, sauces, rice crackers, and organic sprinkles. All products are vegetarian and two-thirds of its sales are from organic products.

The company's original product, Miso Cup, a dry instant soup, was developed by founder and president Joel Dee in response to a dearth of instant meals for vegetarians. It remains the company's flagship product. The second product, Brown Rice Snaps, from Japan, were the first wheat-free crackers on the market. The company also introduced the first flavored soy sauces under the Premier Japan brand; they now have several other sauce brands, including Wizard Organic, Troy's, and Rainforest Organic.

4166. *River Currents: News from South River Miso Company* (Conway, Massachusetts). 2001. On the Web: www.southrivermiso.com. Spring. p. 1. March.

• **Summary:** The company's website "has been up and running Since October 2000, averaging about 15 visits per day for the past month. In our latest update, photos of the miso making process have been added. Although direct ordering is possible from our website, most of our customers still prefer to order by mail or by phone."

4167. Stephens, Roger; Stephens, Jane Ade. ed. and comp. 2001. Soyfoods guide 2001: Helpful tips and information for using soyfoods. Indianapolis, Indiana: Stevens & Associates, Inc. Distributed by the Soy Protein Partners. 24 p. Illust. No index. 28 cm. [23 ref]

• **Summary:** This guide is available only on a limited basis to dietitians and health professionals. Contents: Foreword. Keep your heart healthy: Super soy protein smoothie. Beans, beans, good for the heart: The more you eat, the better your chances of lowering your blood cholesterol levels. Cholesterol: What's in a claim. Sample soy meal planner (4 meals a day for 5 days, to get 25+ grams/day of soy protein). Dietary guidelines for Americans. Composition of soyfoods (table). The healthy bean: Isoflavones, heart disease, menopause and osteoporosis, allergies, diabetes and kidney disease, fat. Isoflavone

content of soyfoods (table). The state of soy research. Protein content of soyfoods (table). Soy resources: Web sites, books. Soyfood substitution chart. Descriptions of soyfoods: Traditional soyfoods, soy-based products, soy ingredients. Recipes: Meat alternatives. Textured soy protein. Soy flour. Whole soybeans. Soymilk. Tofu. Soy snacks and smoothies. Soy—Good for your heart.

The Foreword (p. 2) states: “The *2001 Soyfoods Guide* is distributed by the Soy Protein Partners. Partners include state soybean boards from: Alabama, Arkansas, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, North Carolina, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. Industry partners include: American Soybean Association, Archer Daniels Midland Company, Central Soya Co., Minnesota Soyfoods Association, Protein Technologies International, Soy Protein Council, Soyfoods Association of North America, Soyfoods Council and the United Soybean Board.” Address: 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

4168. Andoh, Elizabeth. 2001. Sampling seasonal delicacies, at reasonable prices, in Osaka. *New York Times*. April 1. p. TR6, TR18 (Sunday).

• **Summary:** Contains reviews of restaurants in Osaka. Yoshino Sushi offers “plump vegetable rolls stuffed with broth- and soy-simmered koya-dofu (dried tofu).

Shiru Yoshi offers “one tofu kaiseki; each menu is \$100 a person. Throughout Japan tofu is not synonymous with vegetarian cuisine. At Shiru Yoshi, it means two of the many courses that feature silky bean curd [kinugoshi; silken tofu]: in the winter a hot pot of tofu and mushrooms with a soy-based dip... and agedashi, a deep-fried block of tofu...” A “succulent chunk of miso-marinated fish was also served” to those who ordered the kobachi kaiseki dinner (literally “feast of small dishes”). Address: Tokyo, Japan.

4169. Drosihn, Bernd. 2001. Miso manufacturers in Europe. Changes at Viana (Interview). *SoyaScan Notes*. April 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Hiroshi Kozaki and Karl Selgmann who once founded and ran a miso company named Kanta Kozaki have split up. Hiroshi left the company and tries to do some importing and run a wholesale company and Japanese restaurants. Karl still makes miso in a small way, but he never returns phone calls. His company named has changed to Noka Sojamanufaktur GmbH. Bernd tries to buy miso from Noka but they are an unreliable source. He also used to buy from Paul Chapman in England, but he stopped 6-12 months ago. Paul had business troubles, so now he is planning to go to Thailand and to make miso there. Danival in Andiran, France, is now a good source of miso. Bernd is not sure whether or not Sojvita in Austria still makes miso.

They are a macrobiotic company. Günter Ebner, who knows a lot about the soy market in central Europe, would certainly know. Yakso has been sold numerous times. Bernd does not know the present owner, but he thinks they no longer makes miso or any other foods; they are now just a brand name.

Bernd is now moving his business to a new location, about 45 km away near Wiesbaum. The move will be completed early next week. The arrival of mad-cow disease in Germany has been a big help to Bernd’s company, Viana. The increased demand forced him to construct a new building with greater capacity during the last two years. He is now making both tofu and meat alternatives in the new building. This weekend snack production will start. His fastest growing product line is meat alternatives, followed by tofu and smoked tofu. All over, the demand for tofu is much bigger than the supply—thanks to mad-cow disease. Bernd has doubled his tofu-making capacity and purchased new tofu-making equipment. Address: Founder and president, Viana Naturkost GmbH, Cologne, Germany. Phone: (02233) 41323 or 221-121175.

4170. *Fine Cooking (Newton, Connecticut)*. 2001. The ancient art of making miso, practiced in New England: Artisan foods. No. 44. April/May. Back cover.

• **Summary:** About South River Miso Co. The text briefly tells the company’s history and how they make miso in the traditional Japanese way. Four excellent color photos show: (1) Christian Elwell stirring steamed grains in a large wooden crib. (2) Elwell scraping finished koji from wooden trays. (3) Elwell blending the koji with cooked soybeans by treading them underfoot in a large, rectangular metal container. He says its like a message for the beans. While treading, he wears two pairs of organic cotton socks and plastic foot coverings. (4) Six varieties of South River Miso in glass jars stacked to form a triangle: Azuki Bean, Sweet-Tasting Brown Rice, Three-Year Barley, Special Edition, Chick Pea, and Sweet White. At the top of each colorful label are the words “Since 1979.”

4171. Schneider, Sally. 2001. Soy meets girl: Our columnist proclaims her love for miso... *Food & Wine*. April. p. 60, 62, 64-65.

• **Summary:** A sidebar titled American miso (p. 62), discusses South River Miso Co., Great Eastern Sun, and the types of miso each makes. Gives the phone number and website for each. Contains three recipes that use miso. A color photos show: (1) Two recipes. (2) Sally Schneider. (3) Bowls of red miso and sweet white miso.

4172. Amano, Shig. 2001. New developments with Amano Foods Ltd. (Interview). *SoyaScan Notes*. May 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Amano Foods outgrew its former plant in Burnaby, B.C., so it built a larger plant in nearby Richmond, BC. In about Sept. 1998 the company moved into its new plant. Business is better than ever. Graham Amano, Shig's son, is in charge of the company's miso operations. The miso is kosher, organic, and uses no genetically engineered ingredients. Address: Amano Foods Ltd., 5520 No. 6 Road., Richmond, BC V6V 1Z1 Canada. Phone: 604-303-9977.

4173. Shurtleff, William; Aoyagi, Akiko. 2001. *The book of tofu*. 2nd ed. Revised. Berkeley, California: Ten Speed Press. 336 p. May. Illust. by Akiko Aoyagi Shurtleff. Index. 28 cm. [321 ref]

• **Summary:** This edition contains an updated "Appendix B—Directory of Tofu Makers" (p. 313-316, updated to 22 Feb. 2001). The copyright page and inside rear cover have also been updated. The preface has been expanded. Numerous other small changes have been made throughout the book. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

4174. Tofu Shop Specialty Foods, Inc. 2001. Wholesale price list. Arcata, California. 1 p. June 15. Front and back. 28 cm.

• **Summary:** Contents: Fresh tofu, water-pac tubs (firm nigari, regular calcium [sulfate], soft calcium). Fresh bulk tofu—institutional (firm nigari, regular calcium). Baked tofu—retail or institutional (marinated cutlets, sausage patties, Mexi patties, vegie patties). Smoked tofu—Smoked Stiks (original, BBQ, spicy). Fresh soymilk (natural, chocolate, ginger, vanilla). Tofu salad and spreads (eggless egg, basic everyday spread, garlic 'n dill everyday spread, sweet pickled beet dip, hot habañero carrot dip, smoked tofu spread).

Accompanying this price list are the following new and colorful self-adhesive labels: Organic Tofu (Regular, Firm, or Soft). Soymilk (Vanilla or Chocolate). Tofu Shop: Fine tofu products. Crafted in small batches from whole, organic, GMO-free soybeans. Also the following numbered vegetarian "Favorite seasonal tofu recipes": 1. Wild mushroom and asparagus frittata. 2. Tofu egg foo young. 3. Tofu 'ricotta' salad. 4. Creamy miso vinaigrette (with tofu). 5. Hunan style tofu. 6. Tofu turkey with herbed bread stuffing. 7. Almond orange cake (one layer). 8. Tofu apple sausage. Address: 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

4175. Miso Soups (by Aveline Kushi) (Website printout). 2001. <http://www.orientalfood.com/culture/literature/misosoups.shtml>. 3 p. Printed July 31.

• **Summary:** Describes miso and how to make delicious miso soups.

4176. Dillman, Erica. 2001. *The little soy book*. New York, NY: Time Warner. 190 p. Index. 15 x 16 cm. [58 ref]

• **Summary:** Contents: Introduction. 1. It's soy time. 2. Why eat soy? Health benefits of soy? Soy foods: Soy milk, soybean oil, soy sauce, soy meat alternatives, tofu, tempeh, miso, whole soybeans, edamame, soy nuts, soy nut butter, soy sprouts, soy ice cream, soy yogurt, soy cheese, soy flour and grits, textured soy protein (TSP), soy protein concentrate, soy protein isolate, hydrolyzed vegetable protein, infant formula, lecithin, natto, yuba, soy fiber, Cooking with soy (recipes). Notes [references]. Resources [Directory]. Glossary. Address: Seattle, Washington.

4177. **Product Name:** Trader Joe's Miso Mesquite Sauce. **Manufacturer's Name:** Trader Joe's (Marketer-Distributor).

Manufacturer's Address: Monrovia, CA 91016. Phone: 626-599-3700.

Date of Introduction: 2001. July.

Ingredients: Water, catsup (tomato paste, vinegar, high fructose corn syrup, corn syrup, salt, onion powder, spice, natural flavor), sugar, soy sauce (water, wheat, soybeans, salt), miso (fermented soybeans, rice, salt), onion powder, sesame seed oil, modified corn starch, salt, garlic powder, spices, natural hickory smoke flavor, xanthan gum.

Wt/Vol., Packaging, Price: 12 oz (340 gm) glass bottle retails for \$1.99 (2001/07, Lafayette, California).

How Stored: Shelf stable; refrigerate after opening.

New Product—Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2001. July 13. Pink, apricot, black, white and green. Color photo shows a lady in traditional Japan holding a large paper umbrella, with several more open on the ground behind her. SKU #32666.

4178. Gai, Junyi; Guo, Wentao. 2001. History of *maodou* production in China. In: T. Lumpkin, ed. 2001. Second International Vegetable Soybean Conference. Pullman, Washington: Washington State University. 202 p. See p. 41-47. [5 ref]

• **Summary:** Two books review the ancient Chinese literature on the history of soybean production: (1) *Dou Lei (Legumes)*, by Li Chang-Nian, published in 1958; (2) *History of Soybean Cultivation in China*, by Guo Wen-Tao, published in 1993. Both authors are from the Chinese Agricultural Heritage Institute (Nanjing Agricultural University, Nanjing, Jiangsu 210095, China).

The author then cites ten early mentions of soybeans in Chinese literature: The first three are from three different sections of the *Shi Jing [Shijing]* (6th century BC); the others are from the *Zhou Shu* (5th to 3rd century BC), *Zhou Li* (3rd century BC), *Meng Zi* (3rd century BC), *Mo Zi* (5th to 4th century BC), *Xun Zi* (3rd century BC), *Li Ji* (1st century BC), and *Zhan Guo Ce* (1st century BC).

Noting that the *Shi Jing* [*Shijing*] contains the oldest Chinese literature, he adds that it “is a collection of poems circulated among the people from the Western Zhou Dynasty to the Spring and Autumn Period. Some of them might be works from the Shang Dynasty [ca 1600-1045 BC]. The book was edited and finished in the middle Spring and Autumn Period (6th century BC). Mao Hêng (Western Han Dynasty, 2nd century BC), Zheng Xuan (Eastern Han Dynasty, 2nd century AD), Lu De-Ming (Tang Dynasty, early 7th century AD), and Kong Ying-Da (Tang Dynasty, 642 AD)” each wrote commentaries on the *Shi Jing* to explain its meaning. From the literature listed above, the following points about soybeans can be derived: (1) Soybeans and millet played a significant role among the five or nine major Chinese crops during the period from the Western Zhou Dynasty (6th century BC on) through the Spring and Autumn Period and Warring States, even to the Qin [221-206 BC] and Han [202 BC to 220 AD] dynasties. “This is indicated by statements about gentlemen using stewed soybeans as their major meal and even the emperor [in the *Zhou Shu*, 5th to 3rd centuries BC] taking soybeans taking soybeans and chicken as his major daily food.

“(2) The way to eat soybeans during that time was to stew the seeds as meal and to cook young green leaves as soup. These ways of preparation had a significant influence on the later adoption of eating immature green soybeans (*maodou*).

“(3) In ancient China, proverbs about soybeans existed before relevant Chinese characters were invented. Texts related to soybeans were recorded as soon as relevant characters were created from about 2700-3000 years ago. Oral works from the Shang Dynasty recorded in the *Shi Jing* date to 3600 years ago. From these records it can be inferred that soybeans existed during the Yan-Huang and Hou-Ji period, 5000 years ago” (p. 41-42). Note 1. The last three sentences are pure speculation and unsupported by any known evidence. The earliest solid evidence for soybean domestication in China dates from about the 11th century BC (Hymowitz 1970, p. 415-17).

The soybean is called “soy, soja, or soya” in Western countries, “which originates from the pronunciation of the Chinese character ‘Shu.’” Note 2. Most etymologies of the words “soy,” “soybean” and “soya” state (correctly, we believe) that they are derived from the Japanese word *shôyu* meaning “soy sauce.”

Soybeans were used and processed in 4 different ways in ancient China (for each he gives a citation): (1) The dried seeds were stewed for daily meals and the young leaves were used as a vegetable to make soup. (2) The seeds, stems, leaves, and pods were used as animal feed. (3) The soybean was used for medicinal purposes. (4) Technology was developed for making various kinds of soyfoods, such as soy nuggets, tofu, doujiang, soybean oil, soybean sprouts, etc.

The section titled “Historical textual research on *maodou* in ancient China” cites 6 early documents which are said to mention immature green soybeans. Each of these six are cited elsewhere. A 7th was the *Jie-An Man-Bi* (Ming dynasty, by Li Xu, 16th century) which states: There are some varieties [of *maodou*] with fragrant flavor and glutinous taste, and some with flavor like ginkgo seeds. Those are new varieties.

“The exact record and time of the initial utilization of green pods and beans has not been discovered in the literature.” The practice of picking green pods, shelling them for immature seeds, and even putting them on the market for sale, existed by the 12th century (Song dynasty). The term *maodou* first appeared in the literature during the 17th century (Ming dynasty).

Since then the term *maodou* has appeared extensively in the literature, for example: (1) *Nong-Pu Bian-Lan* (1755). (2) *Qi-Ming Si-Shu* (1846). (3) *Jin-Si Tu-Can Biao-Lue* (1898). (4) *Yong-Chen Tu-Can-Biao* (1899). (5) *Zhi-Wu Ming-She Tu-Kao* (19th century). These texts include statements such as: Green immature soybeans are especially delicious; the fried ones can be served as vegetable dishes. And: Yellow soybeans (*huang-dou*) are now also called *maodou*. There are different varieties. They can be used as a vegetable at an early stage, then as a major food after maturity. They are necessary for the daily life of the people.

From ancient times to the present, green vegetable soybeans (*maodou*) have been most widely cultivated and consumed in the southern half of China, especially in two areas: (1) The lower and middle Yangtze valleys and drainage systems, in the provinces of Jiangsu, Shanghai, Zhejiang, and Anhui. The total area grown here today is about 100,000 ha. (2) Southeast China along the seacoast, including Taiwan, Fujian, and Guangdong provinces. The total area grown here today is about 30,000 ha. Address: 1. Director and Professor, National Center of Soybean Improvement, Ministry of Agriculture; Soybean Research Inst., Nanjing Agricultural Univ., Nanjing, Jiangsu 210095, China. E-mail: sri@mail.njau.edu and nausri@public1.ptt.js.cn.

4179. Jacobi, Dana. 2001. *Amazing soy: A complete guide to buying and cooking this nutritional powerhouse*, with 240 recipes. New York, NY: William Morrow. An imprint of HarperCollins Publishers. xiv + 364 p. Aug. Index. 24 cm. [50 ref]

• **Summary:** Contents: Introduction. Ingredients and techniques. Breakfast. Smoothies and drinks. Dips and starters. Soups and breads. Salads and dressings. Wraps, burgers, and savory pies. Pizzas and pastas. Stews, casseroles, and chilis. Steaks, chops, skewers, and meat loaf. Stir-fries and curries. Seafood. Mainly vegetables. Desserts. Sources. Bibliography. Address: Food writer, New York, NY.

4180. Shurtleff, William; Aoyagi, Akiko. 2001. The book of miso: Savory, high-protein seasoning. 2nd ed. Revised. Berkeley, California: Ten Speed Press. 278 p. Illust. by Akiko Aoyagi Shurtleff. Index. Aug. 28 cm. [223 ref]

• **Summary:** This revision has completely new front and rear covers, designed and illustrated by Akiko. It contains a completely new “Appendix D—Miso Manufacturers in the West” (p. 255, updated to 10 May 2001). The page “About the Authors” (autobiographical) has been updated, and the original photographs have been replaced with more recent ones—reflecting the fact that Bill and Akiko separated in Nov. 1993 and their marriage ended in May 1995.

The last page, “Soyfoods Center,” has been updated.

The inside rear cover has been updated, and now includes current information about: (1) *Miso Production*, a book published by Soyfoods Center about how to start and run a company making miso on any of various scales and budgets. (2) *Miso and Soybean Chiang: Bibliography and Sourcebook*, published by Soyfoods Center. (3) SoyaScan, the unique computerized database produced by Soyfoods Center. This database now contains more than 62,000 records from 1100 B.C. to the present, and more than 76% of all records have a summary / abstract averaging 146 words in length. A description of the four different types of records (published documents, commercial soy products, original interviews and overviews, and unpublished archival documents), and the number of each type, is given.

The title page, copyright page, and table of contents have been redesigned and updated to give the book a much more contemporary look. Other small changes have been made throughout the book. Still contains 130 vegetarian recipes—both western and Indonesian.

Ten Speed Press gave this book a new ISBN: 1-58008-336-6. Yet despite the many changes described above, the authors preferred not to have this called a “new edition” or “revised edition.” Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

4181. Thym, Jolene. 2001. A twist on tofu: New, tastier food products put the joy in soy. *Oakland Tribune*. Sept. 5. Bay Area Living section. p. 1, 6.

• **Summary:** This front-page story contains a long interview with Dana Jacobi, author of *Amazing Soy*, plus a large color photo showing ten different types of soyfoods. The writer has discovered that “there’s a whole lot more to soy than plain tofu.” A sidebar titled “Name that food” is a glossary including: Edamame, silken tofu, miso, tempeh, fermented bean curd, fried tofu balls, yakidofu, yuba, soynuts, soy sauce, soy milk. Contains four recipes from Jacobi’s book. Address: Staff writer.

4182. Carter, Rachel; Kistner, Stephanie. eds. 2001. The soy alternative. Vancouver, BC, Canada: Whitecap Books Ltd.

240 p. Illust. (color). Index. 26 cm.

• **Summary:** This is an attractive book, with a full-color photo on almost every other page. However it is edited by a team of people who apparently don’t know much about the subject, since it contains many factual errors. It has no real author and many publishers, the main one being Murdoch Books, a division of Murdoch Magazines Pty. Ltd. (Sydney, Australia).

Contents: The soy story. Glossary of ingredients. Soy for breakfast. Breakfast in a glass. Soy for lunch. Soy for Sunday lunch. Soy for vegetarians. Note: The rest of the book is not vegetarian, containing recipes for beef, lamb, chicken, pork, etc. Soy for dinner. Soy for parties. Soy for dessert. Soy at teatime. Cookery terms. Address: 351 Lynn Ave., North Vancouver, BC, Canada V7J 2C4.

4183. **Product Name:** [Soy & Rice Miso].

Foreign Name: Miso de Soya et de Riz.

Manufacturer’s Name: Les Aliments Massawippi.

Manufacturer’s Address: 4530 Chemin Capelton, North Hatley, Quebec, Canada J0B 2C0. Phone: 819-842-2264.

Date of Introduction: 2001. October.

Ingredients: Organic soybeans, organic rice, salt, *Aspergillus oryzae*, natural spring water.

Wt/Vol., Packaging, Price: 200 gm, 500 gm, or 2 kg plastic tubs.

How Stored: Refrigerated.

New Product—Documentation: Elwell, Christian. 2001.

“Miso more than food: Life! Healing in Rwanda.” *River Currents: News from South River Miso Company* (Conway, Massachusetts). Fall/Winter. p. 2. Nov.

Talk with Gilbert Boulay. 2002. Nov. 24. Their miso is somewhere between a red miso and a light yellow miso. They worked for 6 months adjusting the proportions of ingredients so that, when dissolved in warm water, the broth tasted as much as possible like chicken broth / soup; it is not pasteurized. It was first presented at expos and shows in Oct. 2001 and was first sold commercially that same month; it was first distributed in Dec. 2001.

4184. Watanabe, Koichi. 2001. Re: History of La Soyarie Inc. and list of current products. Letter to William Shurtleff at Soyfoods Center, Nov. 7. 5 p. Typed, with signature on letterhead. [Eng; Fre]

• **Summary:** Each page, except the cover letter, has a color heading and is written in two columns, the left one in French, the right one in English. “About us: La Soyarie produces many food products with soya: Tofu (firm, regular, silk), Tofu burger, Soy Nuts, Tofu Nuggets, Vegetarian Pate. We also distribute other products under the following brand names: Yves Veggie Cuisine, Fontaine Sante Foods Ltd., Nutrisoya, Noble Bean. Address, phone, and fax numbers.” Mme. Jeanne d’Arc d’Astous is chief administrator.

“Company history: From very modest beginnings, La Soyarie produced its first Tofu in 1978, right in our founder’s [Koichi Watanabe’s] home kitchen. This product was supplied only to small local health food stores and friends.

“In 1979, we moved into our first real production facility at 25 St. Etienne St., Hull (Quebec). During this period, our production consisted of only 7 batches of tofu a week. Our company had 20 customers, and produced bulk tofu blocks for total sales of \$1600 a week.

“La Soyarie was incorporated on the 31st of March, 1982.

“In 1823, La Soyarie Inc. launched new product lines derived from traditional Japanese recipes, and made with tofu: the burgers and nuggets.

“On October, 1st, 1989, the business and offices moved to a brand new location, with 6000 square feet, at 94 Adrien-Robert St. in Hull. From then, the company began to prosper and grow rapidly. We now own the building and use all of its space that is 12000 square feet.

“Today, La Soyarie contracts 13 distributors that serve the regions of Montreal, Quebec and Toronto. We sell to some supermarkets chains and we supply ‘Fontaine Sante Foods Ltd’, on a weekly basis, for them to make their tofu based products.

“We serve more than 70 other businesses in the Ottawa region: Supermarkets, natural food stores, and some restaurants.

“We use more than 400,000 kg of organically grown Canadian soya beans per year.

“We currently employ 24 persons.

“The name for our company, ‘La Soyarie’ was selected from the entries in a ‘name the business’ contest. The winner received a year’s supply of tofu.

“The logo represents a soya leaf.”

A 1-page list of products shows that the company makes the following: Tofu–Regular water pack, 500 gm. Tofu–Regular vacuum pack, 454 gm. Tofu–Herb vacuum pack, 454 gm. Tofu–Vegetable vacuum pack, 454 gm. Tofu–Silk water pack, 500 gm. Tofu burger fried 300 gm. Miso burger fried 300 gm. Teriyaki burger fried 300 gm. Ganmo burger fried 300 gm. Tofu burger baked 280 gm. Miso burger baked 280 gm. Teriyaki burger baked 280 gm. Ganmo burger baked 280 gm. Imperial burger 150 gm. Oriental burger 150 gm. Nut burger 300 gm (no soya). Pinto burger 300 gm (no soya). Regular tofu nuggets 150 gm. BBQ tofu nuggets 150 gm. Soynuts 250 gm (regular, BBQ, plain, no salt). Tofu cutlets (150 gm, or 300 gm). Vege pate 220 gm (yeast free, no soya). Address: President & plant manager, 94 Adrien-Robert St., Hull, Quebec, Canada J8Y 3S2. Phone: (819) 777-6716.

4185. *River Currents: News from South River Miso Company (Conway, Massachusetts)*, 2001. The people of

South River Miso Co. (Photo caption). Fall. p. 1. Nov.

• **Summary:** This photo (3 by 5 inches), taken 7 Sept. 2001 in front of the masonry stove at the start of the company’s new season, shows: Front row, left to right: Robin Cole, Heather King, Christian Elwell, Katherine Kendall, Alia Kusmaul. Back row: Steve Freiman, Yukio Doyama, Meagan Calogeras. (Absent: Gaella Elwell).

A sidebar titled “Apprenticeship at South River” states: “We are very happy to welcome Meagan Calogeras as apprentice this year. Meagan has traveled far and wide, most recently completing a year of study in Lyons, France, for her MBA. She is fluent in English, French, German, and Japanese... She will also be part of the South River Farm community, which includes weekly community meals and a wide range of farm activities. Apprentices make a ten-month commitment...”

4186. Wilkinson, Endymion. 2001. Chinese culinary history. *China Review International (Hawaii)* 8(2):285-302. Fall. [49 ref]

• **Summary:** This article consists of reviews of three books. The first book (p. 285-91) is: H.T. Huang (Huang Hsing-Tsung). *Fermentations and Food Science*. Part 5 of *Biology and Biological Technology*, volume 6 of *Science and Civilization in China*, edited by Joseph Needham. Cambridge: Cambridge University Press, 2000. xxviii, 741 pp. Hardcover. £90. ISBN 521-65270-0. This is an excellent, positive review by a man who is deeply knowledgeable and interested in both Chinese history and Chinese food history. He was European Union Ambassador to China from 1994 to 2001 and author of one of the best books on Chinese history. He begins by noting that this book “goes to the very heart of what makes Chinese food Chinese by tracing the historical development of the chemical basis of the fermentations used in Chinese food processing. Dr. Huang is deeply qualified to write such a study...” He discusses each chapter in order. Concerning chapter (d) on soybean processing and fermentation, he observes: “From the Han to the Tang soybeans were normally cooked into granules (*doufan*) or congees (*douzhou*) and eaten as a staple (*zhushi*). By the Tang, wheat was replacing soybeans, which were increasingly used as a supplemental food (*fushi*).” Because soybeans had an unpleasant beany flavor and required a long time to cook by boiling, the Chinese experimented with other ways of processing them. Sprouting beans (*dadou huangjuan*) had been used as a medicine since at least the Han; soybean sprouts emerged as a foodstuff in the Song. “A form of soybean curd (*doufu* in Chinese, pronounced *tofu* in Japanese) may have been discovered in the Han but it only became a popular foodstuff in the Song (at which time it was imported to Japan by Buddhist monks, who at first called it Chinese curd, *Tōfu*).” Note: The first character, when pronounced *Tō* in Japanese means “China,” but when

pronounced Tang refers to that Chinese dynasty (618-907) shortly before the Song (960-1279).

“By the Former Han, salted or semi-fermented black beans (*shi*; modern pronunciation, *chi*, *douchi*) were produced by stopping the fermentation process halfway...” Huang believes that soy sauce made from jiang began to emerge during the Han dynasty but did not acquire its modern name of *jiangyou* (soy sauce) until the Song “(it is only from the Qing [1644-1912] that it became the main condiment and seasoning in Chinese cooking).”

Wilkinson is critical of the series editor for the continued use of Needham’s obsolete system of romanization.

The second work is: Xu Hairong, editor in chief. *Zhongguo yinshi shi* (The history of Chinese food and drink). 6 volumes. Beijing: Huaxia Chubanshe, 1999, 4,067 pp. Hardcover. ISBN: 7-5080-1958-X. Since the 1980s, much excellent research has been done on Chinese culinary history, and this 6-volume Chinese-language work sums up much of this scholarship. More than 4,000 pages long (with plenty of illustrations), it is by far the largest history of Chinese food and drink available. Most of the authors are professional historians and several have already made important contributions in this field. A brief analysis of each volume is given. Unfortunately, the absence of an index makes this large work difficult to use as a reference. It is followed by an overview of other valuable works (mostly in Chinese) in the field.

The third book is *The Cambridge World History of Food*, 2 vols. (2000). Wilkinson is sharply critical of this work, both because so little material on Chinese culinary history is presented, and because that material contains so many errors and inconsistencies—examples of which he presents one by one for 4 pages! Address: Harvard Univ. [Cambridge, Massachusetts].

4187. *SoyaScan Notes*. 2001. Chronology of major soy-related events and trends during 2001 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** April 12—Bill Bolduc, founder of Eden Foods and natural foods pioneer, dies in Southern California.

April 17—Martha Stewart, on her popular nationwide TV program *Living*, has a very positive segment on South River Miso Co.

April 18—Richard Rose, a soyfoods pioneer, sells Rella Good Cheese Co. to Tree of Life. He retains his company HempNut, Inc. in Santa Rosa, California. His Hempheh (hempseed tempeh) still contains soy.

May 11—The Kerry Group (of Wisconsin and Iowa) purchases Iowa Soy Specialties, LLC of Vinton, Iowa.

June 12—The Hain Celestial Group acquires Yves Veggie Cuisine (Vancouver, BC, Canada).

Aug. 24—Wildwood Natural Foods (Fairfax and Santa Cruz, California) and Midwest Harvest, Inc. (Grinnell,

Iowa) merge to form Wildwood Harvest, Inc. Iowa Agricultural Finance Corporation (IAFC) invests \$3.3 million in the new company, and the Iowa Farm Bureau Federation (IFBF) invests an additional \$700,000. This investment will be used to build and equip a 20,000 square foot soyfoods plant in Grinnell and to remodel and equip another 20,000 square foot soyfoods plant in Watsonville, California.

Aug.—Bunge, in its initial public offering (IPO), raised \$278 million by floating 23% of its shares on the New York Stock Exchange. Bunge has been a private grain trading company since it was founded in 1818 in the Netherlands by Johann Peter Gottlieb Bunge.

Sept.—SunRich’s new soymilk plant in Wyoming starts production. By Nov. the plant is at full capacity and expansion begins.

Oct.—The Coca-Cola Co. acquires Odwalla, Inc. of California for \$181 million. Odwalla has annual sales of about \$130 million, mostly in fresh, refrigerated juices plus some delectable soy beverages.

Oct. 21—The U.S. National Organic Program and its standards take effect.

Nov. 4–7—Fourth International Symposium on the Role of Soy in Preventing and Treating Chronic Disease held at San Diego, California. General chairpersons and proceedings editors: Stephen Barnes and Mark Messina.

Dec. 10—The Hain Celestial Group, Inc. acquires Lima NV, the leading Belgian natural and organic foods manufacturer and marketer, and its Biomarché operations. Hain appoints Lima’s Chairman, Philippe Woitrin, as Managing Director of Hain Celestial Europe. Lima is also a European pioneer in macrobiotic foods and soyfoods.

Dec. 11—Ralston Purina Co. (St. Louis, Missouri, a soy pioneer) is acquired by Nestle SA for \$10.1 billion cash; on this date the deal is approved by the U.S. Federal Trade Commission. The new company is named Nestlé Purina. The merger brings together such household names as Ralston’s Dog and Cat Chow and Nestle’s Friskies cat food and Mighty Dog brands.

Dec. 24—The Federal Trade Commission approves the merger of Dean Foods and Suiza Foods Corp. (which owns 14% of Horizon Organic Dairy). A federal judge throws out White Wave’s lawsuit arguing that White Wave has the right to buy back its own stock at the market price before the merger.

In 2001, for the first time in modern history, the USA lost the distinction of supplying more soybeans and soybean products (oil and meal) than all other countries combined. This year it supplied about 46% of the world’s soybean exports. South America (mainly Brazil and Argentina) now supply more than 50%. Devalued currencies in Brazil (the *real*) and Argentina (the *peso*), plus the strong U.S. dollar, make it difficult for U.S. exporters to compete based solely

on price. To compete in the future, U.S. growers must find a new strategy, which will focus on soybean quality.

4188. Dionne, Suzanne. 2001. *Miso—More than food: Life*. Quebec, Canada: Les Aliments Massawippi, Inc. 82 p. Illust. 22 cm. Spiral bound. [49 ref. Eng]

• **Summary:** Contents: Acknowledgements. About the author. Introduction. What is miso? The art of making miso. Exceptional nutritive qualities. Non-pasteurized miso: a living food. Miso, provider of physical well-being, healing and longevity agent. Recipes—Entrees. Broths and soups. Salads. Main dishes. Vegetables and side dishes. Sauces and vinaigrettes. Other useful recipes. Address: North Hatley, Quebec, JOB 2C0, Canada.

4189. Dionne, Suzanne. 2001. *Le miso—plus qu'un aliment... la vie [Miso—More than food: Life]*. Quebec, Canada: Les Aliments Massawippi, Inc. 82 p. Illust. 22 cm. Spiral bound. [49 ref. Fre]

• **Summary:** For contents, see the English-language edition. Address: North Hatley, Quebec, JOB 2C0, Canada.

4190. Weed, Susun S. 2001. *New menopausal years: The wise woman way*. Woodstock, New York: Ash Tree Publishing. xxiii + 280 p. Dec. Illust. Index. 22 cm. [102* ref]

• **Summary:** Soy is discussed throughout this book but sources are rarely cited. When they are cited, we insert them below. For heavy bleeding (flooding) during the menopausal years: To nourish and tonify, avoid tofu, soy drinks, and soy protein powders (p. 9-10). For uterine fibroids: Consume lignans, which are anti-estrogenic phytoestrogens, found in all whole grains and beans—including soy (p. 15). Building better bones: Exercise regularly, eat calcium-rich foods, and avoid calcium-leaching foods such as soy “milk,” tofu, coffee, alcohol, and white flour products (p. 24). Calcium: Caution—“Unfermented soy (e.g. tofu) is especially detrimental to bone health being protein-rich, naturally deficient in calcium, and a calcium antagonist to boot (p. 28). Beware of calcium antagonists, foods that interfere with calcium utilization. Avoid consistent use of unfermented soy products, including tofu, soy beverages, and soy burgers (p. 29; see p. 163).

Phytosterolic, phytoestrogenic foods: Whole grains and beans are good sources. “Caution: Beans must be cooked or fermented to remove anti-nutritional substances. Tofu and soy ‘milk’ are not recommended” (p. 70).

Red clover has ten times more phytoestrogens than soy, as well as much more bone-building minerals, such as calcium and magnesium (p. 71). Sea vegetables are second only to flax in concentration of lignans. Seaweeds, not soy, are the real secret of health in the Japanese diet (p. 72). “The phytoestrogens in dong quai, like those in soy,

promote the growth of cancer cells in petri dishes” (p. 73). Phytoestrogenic herbs: Fermented soy products (miso, tamari, tempeh), ground flax seeds, whole grains, etc. are rich in hormonal precursors and phytoestrogens. Use daily to ease menopausal symptoms, prevent cancer, and lower heart disease risk (p. 94). Lack of vitamin B-12 doubles the risk of severe depression for older women; tofu and soy beverages interfere with its absorption (Fallon 1999) (p. 114).

Preventing breast cancer: 75% of all breast cancers occur in women over age 50. Reduce use of seed oils, such as soy oil. For each 5 gm of polyunsaturated fat (from vegetable oils), risk of breast cancer rose by 70% (Wolk 1997 [sic, 1998]) (p. 145). Eat more beans: “There is a relationship between the large amount of *fermented* soy products (miso and tamari) in the Japanese diet and low incidence of breast cancer. But no relationship has ever been shown between the consumption of processed, fake, imitation soy foods, and breast cancer reduction. Soy beverage is used moderately, or not at all, depending on the specific Asian country” (p. 146).

Herbal allies: Red clover is everything you thought soy would be with none of soy’s drawbacks. It contributes to bone health, normalizes the thyroid, and prevents and counters breast cancer. “So do miso and tamari, but not other soy foods. Red clover contains more active phytoestrogens in greater quantity than soy... Red clover contains all four of the major estrogenic isoflavones; soy has only two of them. A cup of red clover infusion (not tea) contains ten times more phytoestrogens than a cup of soy beverage, is richer in calcium, has less calories, and contains no added sugars” (p. 161).

The section titled “Soy” (p. 163-64) praises fermented soy foods (miso, tamari, tempeh, natto) but is quite critical of tofu, soy milk, and “fake soy foods” (burgers, hot dogs, soy cheese, etc.). Soy can reduce hot flashes and prevent heart disease; fermented soy foods can protect against breast cancer. Soy is not a good source of calcium and it is deficient in fats needed for healthy brain/memory functioning. “Soy protein isolate, textured vegetable protein, isolated isoflavones—processed soy foods come in more forms than I can list. I eat miso and tamari freely, tofu and tempeh occasionally, and other soy products not at all. Dosage: 50-200 grams of isoflavones per day, preferably from food. Caution: Excess soy can cause liver damage and is said to feminize men. Soy may be difficult to digest, may cause allergic reactions.”

Interstitial cystitis: Tofu may cause problems (Ford 1999).

Heart healthy: Soy, whole grains, vitamin E (from foods), essential fatty acids, and seaweeds are helpful (p. 210).

Osteoporosis risk factors: Being a vegetarian or vegan who eats a lot of tofu or soy beverage (p. 218). “Eliminate

soy products except tamari and miso. (Unfermented soy prevents you from utilizing calcium.)” (p. 220).

Aching joints: A tofu poultice may help (p. 229).

Vitamins and minerals for the menopausal years:

Vitamin B-12, calcium, and iron are depleted by unfermented soy products (p. 248, 250-51).

Note: The author does not cite a single scientific publication to support her many criticisms of soyfoods. In fact, the scientific literature does not support her criticisms. It is well known that the author is an admirer of Sally Fallon. Address: P.O. Box 64, Woodstock, New York 12498-0064.

4191. Bittman, Mark. 2001. *The minimalist cooks dinner*. New York, NY: Broadway Books. *

• **Summary:** This book collects two years of recipes from Bittman’s popular *New York Times* column “The Minimalist,” which cleverly caters to the modern gourmet whose expectations are high but whose time is limited. Includes a recipe for miso soup. Address: New York Times food writer.

4192. Davis, Brenda; Grogan, Bryanna Clark; Stepaniak, Joanne. 2001. *Dairy-free & delicious*. Summertown, Tennessee: The Book Publishing Co. 160 p. Index. 21 x 18 cm.

• **Summary:** Contains over 100 creative vegan recipes for managing milk allergy and lactose intolerance. Nutritional information by Brenda Davis, R.D. Recipes by Grogan and Stepaniak. Contents: Introduction. 1. Lactose intolerance. 2. Milk allergy. 3. Building strong, milk-free bodies. 4. Superb substitutes. 5. Dairy-free dining: Travel tips. Natural foods for dairy-free cooking [glossary]: Agar, arrowroot, brown rice syrup, liquid smoke, mirin, miso, nutritional yeast, seitan, soy flour, soy protein isolate powder, soy sauce (tamari), tahini, tempeh, tofu. Dairy-free & delicious recipes: Homemade dairy-free spreads, uncheeses, and milk. Sauces. Breakfast. Salads and dressings. Soups. Main dishes. Desserts.

With this book, you can make any “dairy product” you can imagine without using dairy. The most widely used ingredients are: Tofu (used in more than 70 recipes!). Soy milk, rice milk, and other dairy-free milks. Nutritional yeast.

4193. Geiskopf-Hadler, Susan; Toomay, Mindy. 2001. *The complete vegan cookbook: Over 200 tantalizing recipes plus plenty of kitchen wisdom for beginners and experienced cooks*. Rocklin, California: Prima Publishing. xvi + 318 p. Illust. Index. 22 cm.

• **Summary:** Contains more than 200 vegan recipes, including many recipes for miso (3 recipes), soy cheese (9), tempeh (7), tofu (regular, 22), tofu (silken, 6), and soy yogurt (2). The “Glossary of special ingredients” contains

definitions of miso, soy mayonnaise, soy milk, tempeh, and tofu. For nutritional information about soy foods, see p. 20-21. Tamari soy sauce is frequently used as a seasoning.

Contents: Acknowledgements. Introduction. 1. Cooking fundamentals. 2. Stocking the vegan pantry. 3. Menus for entertaining and everyday meals. 4. Appetizers. 5. Salads. 6. Soups and stews. 7. Vegetable side dishes. 8. Pasta dishes. 9. Grain and bean dishes. 10. Sautés and stir fries. 11. Baked and grilled entrées. 12. Sandwiches and wraps. 13. Morning meals. 14. Deserts. 15. Frequently used ingredients. Appendix: Nutrition fundamentals. Glossary of Specialty ingredients. Address: Northern California.

4194. Hayter, Kurumi. 2001. *The soy for health cookbook: Recipes with style and taste*. Alexandria, Virginia: Time-Life Books. 144 p. Illust. (color). Index. 25 x 19 cm.

• **Summary:** This is a beautiful and strange book, designed and produced by Quintet Publishing Ltd. (London). Beautiful in that almost every other page is a stylish full-color photo of a recipe. Strange in that: (1) Tofu is probably the most common soy ingredient used, yet it does not even appear in the index. Nor does tempeh which is also called for. Yet miso is in the index. (2) A number of the soyfood terms are bizarre and unconventional—such as “beancurd pouches” [abura-age or deep-fried tofu pouches], “sticky beans (natto).” (3) On the inside front cover, the book’s title is given as “The Tofu for Health Cookbook.”

Contents: Introduction: Nutrition and health, lactose (dairy intolerance), prevention against heart disease, prevention against cancer, prevention of other disorders. How to use this book. Glossary of soyfoods and other ingredients. Basic recipes. 1. Soups and stews. 2. Salads and appetizers. 3. Main dishes. 4. Snacks and side dishes. 5. Desserts.

This book is not vegetarian; some recipes call for beef, pork, chicken, fish, etc.—but none call for dairy products.

4195. Hepinstall, Hi So Shin. 2001. *Growing up in a Korean kitchen: A cookbook*. Berkeley, California: Ten Speed Press. 254 p. Illust. Index. 26 cm.

• **Summary:** The best book seen to date for information and recipes on soyfoods in Korea. The author grew up in Cheongju, South Korea, in her ancestral home. Families made sauces in earthenware crocks (p. 7). A list of ingredients with descriptions includes: Bean curd (Tubu [tofu]). Beans, dried (K’ong, incl. yellow and black soybeans, mung beans and red [azuki] beans). Koch’ujang (Korean hot red pepper paste [with soybeans]). Kudzu (Ch’ik). Meju (Korean fermented soybean paste block [soybean koji]). Piji (Bean curd dregs [okara]). Red bean paste (P’at komul). Soy sauce (Kanjang). Soybean powder (K’ong karu; a yellow powder sold in 1-lb plastic bags). Soybean sprouts (K’ong namul). Toenjang (Korean fermented soybean paste).

Essential sauces and pastes: Recipe for: “Homemade soy sauce and fermented soybean paste: Kanjang and toenjang.” It makes 10 gallons and takes about 2 months to prepare. Unusual ingredients include: 3 pieces oak wood charcoal, 1 gallon white grain syrup (choch’ung), 10 toasted jujubes, and 5 dried hot red peppers. For about 60 days, let the crock stand in the open without a lid; cover when it rains. At the end of 60 days the mash is filtered through a bamboo basket lined with a fine-mesh cloth into a crock to yield two products: The fermented soybean paste (toenjang) remains in the strainer, whereas the soy sauce filters through into the crock. Store the paste in a sterilized crock; sprinkle a thin layer of coarse salt on top. “Pour the soy sauce liquid into a caldron, bring to a boil, and allow to simmer over low heat until it is reduced to one-third of its original volume.” Adjust saltiness. The paste and the sauce or now ready to be aged, but we are not told for how long.

Soy sauce at this stage (unaged) is called *ch’ongjang* (clear soy sauce) or *Choson* kanjang (Korean soy sauce). A plain and somewhat salty brown sauce, it is used mostly in base seasonings and clear soups. To make *chin kanjang*, a superior thin, syrupy, jet-black soy sauce, similar to the dark soy sauce sold in today’s markets, submerge a large-mesh cloth pouch containing black soybeans, p’yogo mushrooms, and strips of kelp (*Miyok*) in the clear, unaged soy sauce and simmer over low heat for about an hour. The longer it is aged, the mellower it becomes, and the more intense the flavor.

Homemade hot red pepper paste (*Koch’ujang*, with 1 cup fine meju powder and ½ cup soy sauce). Instant fermented soybean paste (*Makjang*; uses 5 cups powdered meju and takes 10 days to mature). Vinegar soy sauce (*Ch’o kanjang*). T’ang soybean paste (*T’angjukjang*; “the best tasting soybean paste among all toenjang). Fermented soybean paste with garlic and bean curd (*Ssamjang*; “Probably the tastiest soybean paste made in the Korean kitchen,” p. 32).

Main dishes: Five grain rice (*Ogkpap* or *Chapgokbap*, with ½ cup dried black soybeans, p. 41). Koreans traditionally eat this dish on the 15th day of the 1st month of the lunar year). Soybean sprouts with steamed rice (*K’ongnamulbap*, p. 44). Ceremonial soup (*T’ang*, with medium firm tofu, p. 62). Seaweed soup (*Miyokguk*, with tofu, p. 65). Kimchi soup (*Kimchiguk*, with tofu and soybean sprouts, p. 67). Soybean porridge (*K’ongjuk*, with 1 cup soybean powder, p. 78). Noodles in chilled soybean milk (*K’ong kusu*, with 1 quart soy milk, p. 86). Stuffed dumplings (*Mandu*, with medium-firm tofu, p. 90-91). Soy sauce kimchi (*Chang kimchi*, p. 103).

Side dishes: Seasoned soybean sprouts (*K’ong namul*, p. 122, incl. Chilled soybean sprouts, and Soybean sprout soup). Sauteed cabbage kimchi with beancurd and pork (p. 130). Bean curd and vegetable stew with fermented soybean paste (*Tabu toenjang tchigae*, p. 138). Bean curd and

vegetable hot pot (p. 152). Soybean pancakes (p. 163). Stuffed pan-fried bean curd (p. 167). Stuffed pan-fried p’yogo mushrooms (with bean curd, p. 168). Stuffed pan-fried peppers (with bean curd, p. 169).

More tofu recipes are on pages 170, 171, 172, 196-97, 199, 200, 204-05, 217. Many recipes call for kelp, kim (laver, nori) or seaweed (see index). Address: Washington, DC.

4196. Ishige, Naomichi. 2001. The history and culture of Japanese food. London, New York, Bahrain: Kegan Paul. x + 273 p. Illust. Maps. No index. 24 cm. [59 ref. Eng]

• **Summary:** This book is crippled by the lack of an index. Moreover, the sources of most of the interesting material in the text are not cited. Otherwise it is very well researched and well written.

Contents: Introduction–The historical framework. Part I: The dietary history of Japan. 1. The prehistoric era: The Paleolithic age, the advent of earthenware, Jōmon society and dietary culture. 2. Establishment of a rice-growing society: A crop held in special regard, the dissemination and development of rice, rice cooking, sake brewing, fermented fish and flavourings. 3. The formative period of Japanese dietary culture: Historical setting, the taboo on meat eating, the lack of a dairy industry, annual observances and rites of passage, place settings and table settings, cooking and banquet styles, the roles of the monasteries, the popularization of noodles.

4. The age of change: Historical setting, the diffusion of tea, the impact of the ‘Southern Barbarians’ (*nanban*; first came the Portuguese and Spaniards, Catholics from Iberia, then the Dutch and English, Protestants from northwest Europe called *kōmōjin* {“redheads”} to distinguish them from the Iberians, Saint Francis Xavier, introduction of meat eating {beef} by Catholics by 1557 in the town of Oita in northwest Kyushu, expansion of meat eating by non-Christians in Nagasaki and Hirado island {northeast Kyushu}, in 1612 Christianity and meat eating are prohibited by the Tokugawa shogunate but the Chinese colony in Nagasaki is exempted, Dutch traders are the only Europeans allowed to remain in Japan after the country is closed but they are isolated on a tiny island in Nagasaki harbor and barred from contact with ordinary citizens, dishes with nanban influence include fried tofu patties {called *ganmodoki* in the east of Japan, or *hirōsu* or *hiryōzu* in the east}, tempura, nanban confectionary {such as *kasutera*} is especially popular, introduction of new crops by Europeans {incl. sweet potato, two types of pumpkin squash, cayenne pepper, kidney beans, peanuts}, formation of a new style (banquet-style meals {honzen ryōri}, *kaiseki*), change in the frequency of meals (from two to three). 5. The maturing of traditional Japanese cuisine: Historical setting town and country, the spread of soy sauce, the emergence of the restaurant, snack shops, books on

cooking and restaurants, the Ainu, the Ryukyu Islanders. 6. Changes in the modern age: Historical setting, the resumption of meat eating, milk and dairy products, entry of foreign foods, zenith and nadir, new meal patterns, integration of foreign foods—a model.

Part II: The dietary culture of the Japanese. 7. At the table: Gohan—framework of the meal, the rise of the table, the tabletop as landscape, chopsticks and table manners, etiquette—as you like it. 8. In the kitchen: The secularization of fire and water, from wood fire to electric rice cooker, the knife—a sword in the kitchen, restaurants—the public kitchen. 9. On the menu: Soup and umami flavouring. Sashimi—Cuisine that isn't cooked, Sushi—from preserved food to fast food, sukiyaki and nabemono, tofu and nattō—meat for vegetarians, vegetarian temple food, tempura and oil, noodles and regional tastes, pickled and preserved seafood, mochi, confectionery and tea, the dynamics of sake and tea.

Teriyaki developed during the Edo / Tokugawa period (1600-1867) (p. 116; However no citation for the source of this information is given).

During the Edo period, most commoners living in Japan's cities ate plain and repetitive meals. In Edo (later Tokyo) most had a breakfast of rice, miso soup, and pickles; for lunch and dinner they ate approximately the same thing “with the addition of one dish of simmered vegetables or tofu, or simmered or grilled fish” (p. 113). Address: National Museum of Ethnology, Osaka, Japan.

4197. Ishige, Naomichi. 2001. The spread of soy sauce [and miso]. In: N. Ishige. 2001. The History and Culture of Japanese Food. London, New York, Bahrain: Kegan Paul. x + 273 p. See p. 113-17. [59 ref. Eng]

• **Summary:** Soy sauce and miso are both made by mixing soybeans and miso with a fermenting agent named koji (see Section 2.4, p. 32-35). Prototypes of these fermented soyfoods were probably developed in China during the Han dynasty (c. 200 BCE to CE 200). The earliest record of their use in Japan appears in the Taihō Code of 701. The fermented soyfoods mentioned in those laws are: (1) Miso. (2) *Kuki*, which was similar to today's Daitokuji Natto and Hamanatto, in which the beans retain their shape and solidity in the final product. (3) *Hishio*, “a semi-liquid paste or gruel fermented from a mixture of soybean, grains, and sake.”

At least 90% of the miso consumed in Japanese households today is used in miso soup, which most people consume once a day. Miso soup is known to have existed as early as the 10th century, when it was mentioned in the *Engi Shiki*. However “during medieval times it was not part of the meals of the common people. This may have been because miso was considered a luxury and hence not made in quantities sufficient for daily cooking. Instead small amounts were typically consumed by eating a side dish of miso or of vegetables pickled with miso.” Small amounts

were also used as a flavoring. Regional varieties began to develop. In order to improve the appearance of food or to impart a lighter flavor, “miso and water (or a cooked mixture of miso and water) would be placed in a cloth bag and the liquid that trickled out would be collected. This refined miso solution was used in preparing elegant meals for the upper class, and later was replaced by soy sauce.”

As noted above, the prototype of soy sauce was *hishio*, a semi-liquid flavoring, which was probably used in Japan as early as the 8th century (Fukuo 1979). Yet it “was probably too expensive to come into general use, for it is harder to make than miso and has a more refined flavour.”

Soy sauce (shoyu) is mentioned in several 16th century documents. By the 2nd half of this century shoyu factories had been established in the Osaka-Kyoto (Kansai) area, “and some trading ships were used exclusively to distribute the product to other regions. It was as a factory-made product that soy sauce became popular, initially coming into use at daily meals among the townspeople whose lives depended upon the commodity economy.” As Edo (today's Tokyo) grew into a major city, its residents consumed large quantities of soy sauce made in the Osaka-Kyoto (Kansai) area.

Then in the late 1600s, “soy sauce aimed at the Edo market began to be made locally, in the districts that are now called Chōshi and Noda in Chiba Prefecture.” In contrast to the lighter-colored and saltier Kansai product (*usukuchi*), the plants around Edo / Tokyo used a larger proportion of wheat to make a rich, fragrant soy sauce called *koikuchi*. This suited the townspeople of Edo well and by the late 1700s, it had taken over the metropolitan market.

In the cities, by the 1700s, “soy sauce had become the principal seasoning for food and miso had come to be used almost exclusively for soup. But in remote rural districts, miso remained in use as a seasoning for daily meals until the early 20th century, while soy sauce, purchased in small quantities from local factories, was eaten [consumed] only at festival meals or when serving special guests. Many farm families made their own miso until the 1950s, whereas those families that made only soy sauce were always a rarity.

“Nothing is wasted in making miso, because all of the ingredients are turned into the paste which is eaten. Making soy sauce not only involves more work but also leaves a substantial amount of inedible lees after the liquid is strained [and the lees pressed]. The lower rate of yield from the raw materials made soy sauce a luxury item which the peasantry could not easily produce at home, and so miso remained the everyday seasoning among the rural population. What soy sauce was used was factory made. Besides the local sake brewery, every area had a small soy sauce brewery until the early 20th century, when major firms with large factories and national distribution networks created an oligopoly market for soy sauce and it came into

regular use even in poor rural households. Thus the main flavouring of Japanese cooking shifted from miso to soy sauce over a period of more than two centuries, as urban taste gradually diffused through the countryside.”

“Direct use of salt is much less common in Japan than in the West, for much salt is ingested indirectly from soy sauce and miso. A 1980 survey by the Ministry of Health and Welfare determined that soy sauce and miso supplied 27% and 16% respectively of the average daily salt intake, while salt sprinkled on food in the kitchen or at the table accounted for only 13%. In addition to saltiness, of course, soy sauce and miso add other flavour and fragrance to food. Their tastiness results notably from their high content of glutamic acid (discussed in Chapter 2) and their complex flavour structures contain tart and sweet elements as well as alcohol.”

“Soy sauce, being a liquid, is easier to use than miso.” Its greater convenience and wider range of use are key factors in its growth in popularity, which was “also connected with a change in the style of eating raw fish” (*namasu* or *sashimi*). “Sashimi now means fish that has been sliced and arranged on a plate and served with a smaller plate of soy sauce,... With this style, skill at cutting and arranging the slices in a pleasing becomes a point of pride with the chef. Besides *sashimi*, such popular and internationally known dishes as sushi (*nigiri-zushi*), tempura and teriyaki, which all developed during the Edo period [1600-1867], are also meant to be eaten with soy sauce.”

The “cooks of the Edo period were not very eager to develop new tastes. Their culinary ideal was... rather to present the natural taste of the food itself in as pure a way as possible.” Soy sauce helped them fulfill this ideal. “Cooking which concentrates on avoiding creativity and complexity in taste, and which seeks to select the finest ingredients and to slice and serve them with the most beautiful technique, is what developed among the chefs of the high-class restaurants during the Edo period.” Address: National Museum of Ethnology, Osaka, Japan.

4208. Sabaté, Joan; Ratzin-Turner, Rosemary. ed. 2001. Vegetarian nutrition. Boca Raton, Florida: CRC Press. CRC Series in Modern Nutrition. [xxiv] + 551 p. Index. 24 cm. [1732 ref]

• **Summary:** The best scholarly book seen to date on this subject. Consists of a Prologue (by Mervyn Hardinge) plus 21 chapters, in five sections, by various authors.

This book contains extensive information on soyfoods as follows: Vitamin B-12, homocysteine, meat analogues and soya milks (p. 47). Summary of epidemiologic studies of soy / tofu intake and breast cancer risk (p. 80-81). Vegetarian diets and soy in the prevention of osteoporosis, diabetes, and neurological disorders (p. 120-21, 125). Iron and soy (p. 202-03). Guidelines to achieve an optimal ratio of essential fatty acids in the diet (p. 203; soy is rich in α -linolenic acid). Zinc, calcium and soy (p. 206). Women's reproductive function, menopausal symptoms, phytoestrogens and soy (p. 232-34, 244). Health advantages of a vegetarian diet for the elderly—and soy (p. 254-55). Vegan children, protein and soy (p. 302). Iron and soy (p. 304; "While the percentage of iron absorbed from soy may be low, the total amount of iron absorbed is adequate, because soy beans naturally contain relatively large amounts of iron" (p. 304-05)). Phytoestrogens and soy (p. 312-13). Macrobiotic diets (p. 313-15). Calcium and soy (p. 316). Vitamin B-12, miso and tempeh (p. 319-22). Iodine and soy (p. 323). Health-promoting phytochemicals beyond the traditional nutrients—soyfoods and isoflavones (p. 342-45; One table shows the isoflavone content (genistein, daidzein, and glycitein) of soybeans, roasted soyflour, roasted soynuts, TVP, tofu, tempeh, miso, and soy milk). Another shows the isoflavone content of commercial soy products by the weight of a typical serving, in descending order of isoflavone content (cooked soybeans, dry TVP, dry roasted soy nuts, tofu, soy flour, soy protein isolate, soymilk, SoyBoy Breakfast Links, soybean chips, tempeh, miso, soy cheese, Ice Bean, Green Giant Harvest Burger, soy noodles, Tofutti, soy sauce, soy oil). Protection against cancer and soy (p. 346-47). Help for menopause and bone loss (p. 347-48). Protective substances and soy foods (p. 397-98). Calcium fortified products such as soy (p. 421). Consuming a wide range of vegetable oils from intact plants—soy (p. 421). Developing a vegetarian food guide—Legumes, lentils and peas (p. 428-29; "Among legumes, the soybean possesses unique nutrient characteristics." Many food guides place soy beverages in the milk-dairy category). Table: Comparison criteria for evaluating soy and grain-based beverages (p. 430). The water efficiency of food production—and soy (p. 449; "The water intensity of animal

production is much larger than the water intensity of crops. For instance, per gram dry weight, soybeans require about 0.75 liters of water" compared with about 20 liters for cattle). Note: Joan Sabaté is a man. The series editor is Ira Wolinsky, PhD, Univ. of Houston, Texas. Address: 1. Prof. of Chair, Dep. of Nutrition, and Prof. of Epidemiology, Loma Linda Univ., Loma Linda, California.

4209. Willcox, Bradley J.; Willcox, D. Craig; Suzuki, Makoto. 2001. The Okinawa Program: How the world's longest-lived people achieve everlasting health—and how you can too. New York, NY: Clarkson Potter. x + 484 p. Index. 24 cm. Foreword by Andrew Weil, M.D. [41 + 474 endnotes]

• **Summary:** A remarkable book! Written by a team of internationally renowned experts, it is based on the landmark, scientifically documented 25-year Okinawa Centenarian Study. Okinawans have the world's longest disability-free life expectancy. Their occurrence of heart disease is only one fifth that of Americans. Their rate of breast, ovarian, and prostate cancer is less than one quarter of American levels. And the number of centenarians per 100,000 is six times that of the USA. This is a book with plenty of solid, practical scientific advice. Address: 1. M.D., Div. of Aging, Harvard Medical School; 2. PhD, medical anthropologist and gerontologist, Asst. Prof., Okinawa Prefectural Univ.—College of Nursing; 3. M.D., PhD, cardiologist and geriatrician, Prof. Emeritus of Community Medicine, Univ. of the Ryukyus, and Prof. and Chair, Dep. of Gerontology, Okinawa International Univ.

4210. Source Family (The). 2001? The Source: Source restaurant "recipes" & Source family. Los Angeles, California. 157 + [20] p. Undated. Illust. No index. 22 cm.

• **Summary:** This photocopied, comb-bound book was made for Jim Baker's Source Family / community, and was never sold in bookstores. It is undated and with no copyright page. Most of the pages are numbered, but about 20 (here and there, often containing photos) are not; they were apparently inserted at the last minute. Contents: 1. The Source recipes (p. 1-17) and other family favorites (p. 18-48). 2. Alternative lifestyle choices, for the well being of body, mind and soul (p. 49-93). 3. Father / Yahowha and The Source Family: Truth behind the legends, an epic and never-ending saga (p. 94-157). All photos are courtesy of "the Source Archives." This book emphasizes on the importance of food, community, and a teacher in spiritual practice.

On the rear cover (and on p. v) is a color photo of The Source restaurant taken from across the street, above the following text: "Jim Baker opened The 'Source Restaurant' in 1969, on Sunset Blvd. One of the country's first health food restaurants. Jim's 'Spiritual Family' grew from those who worked at the Source and soon became 'The Brotherhood of the Source' and later 'The Source Family,'

living communally in the Hollywood Hills. We called Jim Father, then Father Yod and later Yahowha. We sold The Source in 1974 and moved to Hawaii, where Father left his body in August of 1975. The new owners recently closed the Source doors after 31 years, bringing a Hollywood legend and tradition to an end. We are printing the 'Source Recipes' in honor of our 'Earthly Spiritual Father' and The Family that was created."

In Section 1, recipes used at The Source restaurant include: Hi protein cereal (ground fresh from whole grains and seeds not cooked—like muesli, the raw breakfast cereal). The Source dressing (a version was later sold as Cardini Lemon Herb). Ice cream. Cheese cakes. Source special. Guacamole. Vegetable salads. Entrees: Too much crunch. Magic mushroom.

Section 2 discusses: Fish (recipes for ahi / tuna and salmon). Refined foods to avoid. Good foods (brown rice, miso, tofu, nuts, sesame seeds; p. 57-58). Fasting, enemas and elimination diets (p. 65-66). Tofu (p. 74-75). Miso (p. 75-77). Raw foods.

Section 3, the life story of Jim Baker (1922-1975), mentions: His mother, Cora. The Tarzan audition in Los Angeles. Dora Baker (of France), his second wife. His birth on July 4 in Ohio, parents, childhood, great-grandfather, growth of interest in natural healing and foods, Paul Bragg, weight training and competitive sports, University of Chicago (Illinois), graduation from Swedish School of Massage in Chicago, first big job at the Wright plant, married the boss's daughter Margaret; they had a daughter named Peggy, opened Bakers Gym, joined the Marines in World War II, received Medal of Gallantry and Silver Star, ardent archer and champion swimmer, heavyweight wrestler, and judo expert, etc. Lived in Topanga Canyon and became a Vedantic Monk, met Elaine Baker and they were married, part of Nature Boys which lead into the Hippie movement (Jack LaLanne, Gypsy Boots). Elaine and Jim had three sons and opened two famous restaurants on Sunset Blvd. They were divorced and he married Dora, a French girl who was with him at The Old World. Dora started The Source with Jim. "He finally found His Spiritual Father in a very powerful and famous Yogi Bhajan from the East who was living and teaching in L.A. Jim became a Sikh... Jim then married Robin, who was 20 and he was 47. She supported him on all levels and was a devoted wife. Slowly the small group of people who were working at the Source started to become more of a communal and family energy. Jim went to India with the Yogi and while there realized "Neither Hindu or Sikh shall I be, for my soul is universal and free!"... Jim came back to L.A. and started to teach meditation and spiritual knowledge at the restaurant on Sundays. He became known as Father. "Most of us were living in vans or other rentals but wanted to live more communally. The Mother House was rented and this was the beginning of the Source Family. Father and Robin / Ahom

lived above the Source, while the family lived at our mansion on Inverness St. (p. 98-99).

4211. Carter, Jeffrey. 2002. More research dollars needed to breed export soybeans: There's less focus on producing new lines of foodgrade soybeans than on herbicide resistant beans. *Ontario Farmer (Canada)* 34(47):16. Jan. 15.

• **Summary:** This was the message of soybean exporter Michael Loh to farmers at the Southwest Agricultural Conference at Ridgeway. Loh emphasized that the Ontario soybean industry must respond to the needs of its customers. "My vision for southwestern Ontario and Canada is for us to have the image as being the place to go for the best foodgrade soybeans."

Roundup Ready varieties tend to produce a smaller sized bean, yet many Japanese customers want larger-seeded varieties—according to Morris Sagriff, a Lambton County farmer. A photo shows Michael Loh.

4212. Huang, Hsing-Tsung. 2002. Takamine Jokichi and the transmission of ancient Chinese enzyme technology to the West. In: Alan K.L. Chan, Gregory K. Clancey and Hui-Chieh Loy, eds. 2002. *Historical Perspectives on East Asian Science, Technology and Medicine*. Singapore: World Scientific Publishing Co. See p. 525-32.

• **Summary:** "When we talk of technology transfer in the last hundred years, we tend to think of the traffic as flowing entirely from West to East. Actually, even in the 20th century significant bits of Chinese or East Asian technology were also being transmitted to America and Europe. Of these the most influential and yet least appreciated is the use of microbial enzymes in food processing and related industries."

Most of the enzymes used today are derived from 3 genera of moulds, namely *Aspergillus*, *Rhizopus* and *Mucor*. In the early 1950s Dr. Huang gained a working knowledge of the enzyme industry in the U.S. when he worked as a research chemist at the Enzyme Research Department of Rohm and Haas Co. (Philadelphia, Pennsylvania).

Table 1 shows microbial enzymes used in food processing in 2002, and Table 2 shows those used in food processing in 1951. Takamine Laboratories (Clifton, New Jersey) made and marketed Takadiastase, a digestive aid. Wallerstein & Co. (New York) produced the enzyme papain for chillproofing of beer. Rohm & Haas pioneered the application of pancreatic enzymes for the bating of hides. All 3 companies were founded at about the turn of the 19th to 20th centuries.

Jokichi Takamine's innovation was based on koji (Chinese: *qu* [pronounced ch'ü]; the Japanese word is written with the ancient Chinese character), which has been used in Japan for centuries to make saké (and other alcoholic drinks), soy sauce, and miso (both soy condiments). "Modern microbiological studies show that the

principal organisms in *qu* are grain molds of the genera *Aspergillus*, *Rhizopus*, and *Mucor*.

“The origin of *qu* is obscure. It was a known entity in the early Zhou (1000 B.C.), but it could have been in existence much earlier, perhaps even before the legendary Xia dynasty (2000 B.C.). According to the *Jiu Gao* (Wine Edict), c. 300 A.D., by Jiang Tong, *qu* was first obtained when steamed rice was inadvertently left in the open and became mouldy [endnote 3 gives the exact Chinese characters]. This view is supported by two pieces of evidence. First, rice was already cultivated extensively and pottery steamers were known around 6000 B.C. in the Hemudu culture near Hangzhou [W.-G. Hang-chou, or Hang-chow, capital of Zhejiang province in eastern China]. Second, this is precisely the way a rudimentary *qu* was prepared and used in making wine in the 1950s by the aborigines in Taiwan. Thus the earliest *qu* probably had rice as the growth substrate. Rice is still the principal substrate in South China today. But during the Zhou [1045-256 B.C.], as barley and wheat (which were considered inferior grains) grew in importance as cultivated crops in North China, they were adopted as the preferred substrates for making *qu*. Endnote 4. For further details on the origin of *qu*, see H.T. Huang’s book titled *Fermentations and Food Science* in the *Science and Civilization in China* series.

“The art of using *qu* or *koji* to make fermented drinks, i.e. *sake*, was brought to Japan from South China, probably towards the end of the Han dynasty (Shinoda Osamu 1967, p. 551-74). Their employment in the making of fermented soy condiments, such as *Jiang*, arrived later during the Tang (618-907 A.D.), accompanied by the famous agricultural treatise *Qimin Yaoshu* (Important Arts of the People’s Welfare) of 544 A.D. But the Japanese soon developed their own versions of soy condiments such as miso which is quite unlike the fermented *jiang* (soy paste) of China.” Modern microbiology has shown that the principal mould in *koji* is *Aspergillus oryzae*.

“The technology of *qu* was also transmitted, presumably by Chinese immigrants in more recent centuries, to Indonesia. It is called *raggi* [*ragi*] by the natives or *peh-khak* (‘white qu’) by the Chinese settlers. In the 1890s Dutch scientists determined that the fungi in *raggi* were species of *Mucor* and *Rhizopus*. They tried to exploit the amylolytic activity of these fungi for converting grains to alcohol commercially in Seclan [Seclin], France, and Antwerp, Belgium, but their attempts were unsuccessful.”

These early ventures might have remained forgotten were it not for the work Jokichi Takamine in the USA. There follows a summary of Takamine’s life to 1890. In his travels in the U.S. Takamine learned how the brewers and distillers there “used malt to hydrolyze grains into sugar so they could be fermented into alcohol. He realized that Japanese *koji* was much more active than malt for the hydrolysis of grains. He studied the production of ‘diastase’

(amylolytic [starch splitting] enzymes) by the *koji* mold *Aspergillus oryzae* when he returned to Japan. The results convinced him that replacing malt with *koji* enzymes would be a great improvement in the manufacture of whiskey.” In 1890, with the help of his wife’s parents, Takamine made the fateful decision to move his family to the USA and to start the Takamine Ferment Company in Peoria, Illinois, to produce diastase for a local distillery company. The initial results were very promising.

“However, Takamine’s apparent success presented an unwelcome threat to the malt producers in Peoria. They incited local xenophobia [fear and hatred of strangers or foreigners or of anything that is strange or foreign]. One night in 1894 the distillery in which his experiments were being conducted was burned down.” Note 1. There is no evidence that he ever sold any of his purified enzymes in Peoria. [Three years later] “He moved his family to Chicago, where he continued to promote his diastase preparation. Fortunately, by this time, he had obtained a patent (U.S. 525,820) on the use of his diastase as a cure for dyspepsia.” Parke, Davis & Co. (Michigan) agreed to make and market the product under the brand name Takadiastase. In 1897 he moved his family and research laboratory to New York City. Address: Goodwin House, 4800 Fillmore Ave., Alexandria, Virginia 22311.

4213. The Mail Order Catalog for healthy eating. Winter 2002. 2002. P.O. Box 180, Summertown, TN 38483. 36 p.

• **Summary:** The book section of this mail order catalog contains listings for an excellent selection of vegetarian and vegan cookbooks, vegetarian soyfood cookbooks, plus books on food nutrition & health, alternative healthcare, women’s healthcare, native Americans and their cultures, animal rights, and sustainability.

The vegetarian food products section offers TVP granules and chunks, Response textured soy protein concentrates (misleadingly called “Response TVP flakes”), miso soup mixes, wheat free soy pasta, soy & rice pudding mixes, soy & nondairy beverages and beverage mixes, soy protein powders & shake mixes, soynut butters, sea vegetables, vegetarian jerky, soynuts, plus foods from Worthington and Loma Linda, Jyoti India Cuisine, and Dr. John McDougall. Address: Summertown, Tennessee. Phone: 800-695-2241.

4214. Hirsch, J.M. 2002. Tofu not the only way to get benefits of soy; try using miso. *Advocate* (Baton Rouge, Louisiana). Feb. 21.

• **Summary:** “The vegetarian love affair with tofu has done as much harm as good for the reputation of the rather mild-mannered soybean.” But tofu is not the only source of healthy soy protein. Miso is another tasty source, best known as the primary ingredient in Japanese miso soups. Contains

a recipe for “Shish kebabs with miso sauce” from *The Book of Miso*, by Shurtleff and Aoyagi (Ten Speed Press).

Other soy products besides tofu include: Tempeh, toasted and salted soy nuts, soy milk, breakfast cereals and breads that contain soy, soy flours, soy protein powders, and edamame (fresh soybeans still in the pods; often served at Asian restaurants).

Also appeared in the Press (Ashbury Park, New Jersey). Address: Associated Press.

4215. Asimov, Eric. 2002. \$25 and under: Japanese noodles make you forget sushi. *New York Times*. April 10. p. F10.

• **Summary:** This is a review of the Japanese restaurant Onyi (330 Avenue of the Americas, near West Forth St., Greenwich Village—in downtown {southern} Manhattan in New York City). Menchanko means foods mixed together in one huge bowl. “The oyster Menchanko (\$12.50), a miso broth with ramen noodles, is thick with fat, tender oysters, chunks of tofu, vegetables and billowy sheets of soy-milk skin [yuba] that look like handkerchiefs but are soft as bean curd.”

“The already spicy miso Menchanko (\$9.75) is... crammed with shrimp, chicken and balls of salmon along with tofu, soy-milk skin and vegetables.”

After 5 p.m. you can supplement noodle dishes with “simple edamame (\$3.75), boiled green soybeans that are the Japanese equivalent of salted peanuts, to complex yuba chakin (\$6.75). crisp tofu [sic, yuba] purses stuffed with vegetables and crab meat.”

Note: The word “Oni” means devil in Japanese.

4216. Smith, Patricia J. 2002. Macrobiotic Company of America (MCOA, Asheville, North Carolina) is no longer in business. Bruce Macdonald is importing all of Mitoku’s products to the USA (Interview). *SoyaScan Notes*. April 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Patricia has heard from reliable sources that after MCOA ceased its operations, Norio Kushi left the company. Bruce Macdonald and his daughter, Crystal, both live in Asheville and run Bruce’s company.

Patricia recently visited South River Miso Company where she visited with Christian Elwell, Robin Cole, Megan Calogeras, and Charles Kendall—who is still making natto, amazake, and mochi. Address: Radical Food, P.O. Box 952, Mill Valley, California 94942-0952.

4217. Treloar, Brigid. 2002. Tofu. Singapore: Periplus Editions (HK) Ltd. Printed in Singapore. 112 p. Illust. (color). Index. 25 x 24 cm. Series: The Essential Kitchen.

• **Summary:** This is a beautiful book, with stylish and informative full-page glossy color photos on every other page. It is well researched, comprehensive, and generally uses standard tofu and soyfoods terminology. It is also strange: We are not told in which country the publisher is

located (perhaps Hong Kong or Singapore) or where the author lives. It is distributed in North America, Japan and Korea by Tuttle Publishing. On the inside rear dust jacket: www.tuttlepublishing.com. It is clearly targeted at a world market.

Contents: Introduction. Tofu glossary (introduction, firm and soft tofu, firm and regular tofu, fresh tofu, silken tofu, soft tofu, extra firm tofu, powdered tofu {or instant tofu or soy milk powder}, nigari tofu, flavored or dessert tofu, grilled tofu {yaki-dofu}, deep-fried tofu {age}, freeze-dried tofu {koya-dofu}, thin deep-fried tofu {aburaage or usuage}, thick deep-fried tofu {atsuage or namaage}, seasoned tofu pouches {for *inari-zushi*}, tempeh). Creating texture and flavor. How to use tofu: How to cut tofu, making a chrysanthemum flower, how to remove excess moisture, how to change soft tofu into firm, how to prepare tofu for cooking (marinating, grilling, pureeing or blending, parboiling / braising, panfrying / stir-frying, scrambling, steaming, deep-frying, smoking, how to reconstitute freeze-dried tofu, how to prepare deep-fried tofu for cooking, substituting tofu in recipes). Appetizers Snacks and light meals. Soups. Baked dishes. Stir-fries. Grilled dishes. Noodles, couscous and rice. Vegetables. Salads. Desserts. Glossary (of general ingredients, incl. soy sauce, Teriyaki sauce). Guide to weights and measures.

Note: This is not a vegetarian cookbook. Some recipes call for pork, chicken, fish (salmon, trout, tuna), etc.

Talk with representative of Tuttle Publishing, Vermont. 2004. May 8. Brigid lives in Australia. Periplus, created in 1997 by Tuttle, is located in Singapore and a sister company of Tuttle. Address: Food writer, stylist, consultant, and cooking instructor [Australia].

4218. Corliss, Richard. 2002. Should we all be vegetarians? Would we be healthier? Would the planet? The risks and benefits of a meat-free life. *Time*. July 15.

• **Summary:** In reference to athlete vegetarians, *Time* magazine says, “Don’t eat meat? Better learn to love tofu and lentils.” TV’s favorite vegetarian is cartoon character Lisa Simpson [of *The Simpsons*], age 8; she once had a crush on a guy who described himself as “a Level Five vegan—I don’t eat anything that casts a shadow.” Ohio Congressman and vegan celebrity Dennis Kucinich says he “feels much better starting his day with miso soup, brown rice or oat groats.”

4219. Stanchich, Lino. 2002. Work with Noboru Muramoto sensei making miso and natural salt in California (Interview). *SoyaScan Notes*. Sept. 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Lino was a business partner with Muramoto sensei, first at the Herb-T Company on 11th St. in San Francisco, and later at Great Life Co. in Escondido, California—where they imported sun-dried crude / unrefined

salt from Mexico, cleaned it by boiling, washing, and filtering (to remove the pollutants found in sea water), then sold it as different varieties of natural salt and also used the salt to make many different kinds of miso, which they sold commercially. Muramoto moved from Glen Ellen, California, south to Escondido to do research on salt. Lino thinks he moved in about 1980 or 1981. They always lost money on the salt, since it took so much time to remove the pollutants. So they tried to make up for those losses by selling miso. Lino and his wife, Jane, were with Muramoto in Escondido from August 1983 to 1985. Lino helped. Lino was never in Glen Ellen. Muramoto stayed in the USA legally in term of immigration.

The various types of miso and Lino's best guess as to the date of introduction is as follows: Chick Pea Miso (fall 1983). Barley miso (1984). Peanut Miso (1984). Green pea miso (1984). Three-year Hatcho miso (1985). They also sold tamari collected from various types of miso, and they made tamari as a separate product.

As far as Lino knows, Muramoto was the first person to make and sell chick pea miso in the USA. It was a sweet miso that fermented for about one year. The koji was always made with rice; sometimes soybeans were used with the chick peas and koji, whereas at other times no soybeans were used. He sold hundreds of pounds of Chick Pea Miso in 1-lb plastic bags, mostly by mail order, but also through a few natural foods stores—in San Francisco (California), Boston (Massachusetts), and Florida. Muramoto was in charge of food production (he had a few assistants) and Lino was in charge of sales.

Lino was born on the border between Italy and Croatia near Trieste; his first name is Italian and his surname Croatian. Address: 101 Willow Lake Dr., Asheville, North Carolina 28805. Phone: 828-299-8657.

4220. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part III (Interview). *SoyaScan Notes*. Sept. 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: In late July 1978 tofu makers from across America met for the first time in Ann Arbor, Michigan, and formed the Soycrafters Association of North America. Those announcing the meeting were unaware of The Tofu Shop in Telluride so—unfortunately—no one from Matthew's group attended, although Catherine Peterson and one other person did attend the second meeting in 1979 at Amherst College in Massachusetts.

In 1978, as an expression of their abundant energy, the group published a booklet titled "Peaking out on tofu." It was handwritten with brown ink on beige paper and contained 20 recipes. On the rear cover was the logo (dragon in a circle) and these words: "these original recipes sprouted in the kitchen of the tofu shop and are prepared with care by the telluride tofool family using our own homemade soy products. Special thanks to: Catherine

Peterson, Kathy Greene, Barton Coffman, Becca Smith, and Sharyn." The booklet was for education and publicity. There was no price on it and Matthew thinks they probably gave it away. Other key people in the "core group" were Joel Rosenbloom (Matthew's right-hand man), Christie and Laurie Mather, and Andy Kahn (who ran the sprout operation).

In Nov. 1978, Craig Boyken sculpted a Tofu Turkey from a large block of tofu made by The Tofu Shop. About 30-40 people, including all workers from The Tofu Shop, gathered in his artist's studio for a potluck vegetarian Tofu Turkey Thanksgiving dinner—probably the first in American history.

One day after Catherine Peterson arrived, the group was invited to the Navajo reservation in the four corners area and to do a tofu-making workshop. It was organized by the farm extension, home economics folks. There was a room full of traditional Navajo women and one social worker. After showing the women how to make tofu and passing out samples, a Navajo woman suggested using fine-weave Nylon paint straining bags (which are inexpensive and widely available at hardware stores) for straining the soymilk. Matthew has used that idea for years.

One day in April 1979 the president of the Bank of Telluride brought Matthew a front-page article from the *Wall Street Journal* titled "Good old bean curd is suddenly popular, but you call it tofu" (April 12). Matthew learned more about other tofu makers across America.

In the spring of 1979 Matthew and Christie Mather, a member of The Tofu Shop group, took a trip to California. In about 1977 Matthew's sister, Marna Utman, has relocated to Arcata, California (where her first child had been born) so her husband could attend Humboldt State University. They had become involved with a small group that was interested in buying land together and forming an intentional community. They had been meeting once a week for several years. They had reached the point where they want to establish a business, which would help them raise the money needed to buy the land. Marna mentioned that she had a brother who making tofu as a business. So the group invited Matthew to come to Arcata (at his own expense) and teach them how to make tofu (free of charge). So Matthew and Christie hitchhiked to California from Telluride—a sort of spring vacation, but teaching people how to make tofu on a home scale wherever they stopped—first in Arcata, then in Ashland, Oregon (where they had friends), and finally in the Dalles, Oregon. Typical attendance at each of their three "tofu workshops" was about 12 people. Each class was a combination of hands-on tofu-making and viewing the color slides that Matthew carried in his backpack—along with some nigari and booklets that he passed out at each workshop. Their efforts planted seeds. In Arcata, the group of people trying to form a community, continued for several years to make tofu and tofu burgers in

people's kitchens then sell these from a booth at fairs to raise money. In the kitchen of the Ashland Co-op, people soon began to make tofu; they were still making it several years later when Matthew returned to visit.

Matthew and Christie then hitchhiked north to Vancouver Island, then east to Glacier Park, and back home to Telluride—where they returned to their work at The Tofu Shop.

One of the small group of people who owned The Tofu Shop was Suzanne Kosciolk (pronounced kos-ee-OH-lek). In late 1978 she had moved to Telluride as a sort of tourist from Albuquerque, where she had been involved with a small yogurt business—so she came into the group with food processing and business knowledge. Matthew met her one day on the street, and she was soon involved with The Tofu Shop. Suzanne had a van; Matthew didn't.

Telluride was a beautiful town, but the population was small and it fluctuated during the year, from a low of about 1,200 permanent residents during the early spring and early fall, to perhaps triple that amount during the ski season (starting with the snows in the late fall) and the summer season of hiking, camping, enjoying the spectacular scenery, and attending various festivals such as the Bluegrass Festival, the Jazz Festival, and Film Festival. The Tofu Shop and co-op had food booths at some of these festivals.

Four interesting ads from the *Telluride Times* (1979) survive. All have a large illustration of the dragon and “Traditional vegetarian cuisine” as part of the company logo. The Tofu Shop is still located in Telluride at “116 N. Oak—on the Sheridan Mall.” One from March 1979 states: “Menus from different nationalities every night. Whatever you're in the mood for, we can probably help you out. Thurs. 3/15 [Thursday, March 15]. Tofu Turkey, Vegetable stuffing, baked potatoes, fruit salad.” Note: The Tofu Shop in Telluride is now selling “Tofu Turkey” commercially, with all the trimmings—even though it was out of season.

Fri. 3/16. Pizza, Minestrone soup, Tossed green salad.

Sat. 3/17. Ganmo (Mock Goose), Stir-fried vegetables, miso soup, etc.

A second ad from April 1979 reads: “Thank you Telluride for a successful winter season. We will be closed for a week of remodeling beginning Monday, April 9, reopening Monday, April 16. During this week, Tofu and Sprouts will be available at Winterstash and Roses.”

A full-page typed sheet titled “Our favorite tofu recipes,” undated but probably from 1979, has as its 1st recipe “Tofu Turkey with Mushroom Gravy (serves 12-16).” There are also recipes for Tofuburgers, Spicy tofu and rice burritos, and Creamy tofu salad dressing. Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

4221. Meeks, Bob. 2002. Daybreak Cafe: A successful restaurant featuring soyfoods in Arcata, California

(Interview). *SoyaScan Notes*. Sept. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bob purchased The Tofu Shop, a soy deli and restaurant, from Matthew Schmit, in 1993. It is an alternative restaurant that features soyfoods, all organic ingredients, and mostly local foods. Approximately 75% of his customers are vegetarians. Bob went to culinary school and has spent his life in the restaurant business. He has owned and run his own restaurants for almost 25 years, and has worked in restaurants for almost 32 years.

More than 20 items on his menu include soyfoods or soy substitutions—not including soymilk as a beverage, in coffee, or in smoothies. His most popular menu items that include soyfoods (in descending order of popularity) are: Vegan Florentine (with cashew gravy). Tofu Scrambler (Bob also sells the a packaged dry seasoning mix for Tofu Scrambler). Omelets with tofu instead of eggs. Other specials include Tofu Veggie Scrambler, stir fries with tofu, and curry rice with tofu. He also serves a number of tempeh recipes. Some local farmers that grow organically are too small to be certified. This restaurant is doing very well as a business. An important part of its success is the energy that Matthew put into it before Bob arrived—even though Matthew wasn't really a restaurateur—but rather an excellent tofu-maker. Bob gets all of his tofu from Matthew. After people read his menu they are free to color it!

Bob continues to make a new version of the Tofu Turkey that Matthew used to make in Arcata. Bob blends the tofu with seasonings, then stuffs it with bread, and bakes it in a bowl shape in large, medium, and small sizes. It comes with either cashew gravy or a mushroom-miso gravy. It comes out of the oven ready to go, then customers bake it again at home and baste it. “Tofu Turkeys are a pretty big thing in Arcata.” He sells it at the restaurant and also wholesales it to a few food outlets in Arcata. He likes keeping it small and local. “With Matthew's tofu its just awesome.” His best year he sold about 1,200 Tofu Turkeys from Thanksgiving to Christmas; last year the number was about 300-400. Tofurky changed so that it was more similar to Bob's product; they now have it in a bowl shape, blended and its stuffed. Bob thinks he saw Tofurky spies some years ago at his restaurant trying to steal his secrets. Address: Owner, Daybreak Cafe, 768 18th St., Arcata, California 95521. Phone: 707-826-7543.

4222. Schmit, Matthew. 2002. Tofu turkey in Telluride, Colorado, and Arcata, California (Interview). *SoyaScan Notes*. Sept. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The first tofu turkey that Matthew is aware of was made in Telluride, Colorado, in 1978 at Thanksgiving by Craig Boyken, a longtime close friend of Matthew's who loaned him \$250 to help start The Tofu Shop in Telluride in the fall of 1977. Craig is an amazing, sort of Renaissance

man—an artist, mountain climber, musician—among other things. 1978 Craig and his wife, Anne, were living in Telluride in a studio they had built inside an old deserted brick school building. He used to have big banquets in his studio. Shortly before Thanksgiving of 1978 Matthew brought Craig two large blocks of firm nigari tofu, which he sculpted into the shape of a turkey, basted it with soy sauce and oil, baked it in an oven, and continued to baste it from time to time. He probably fashioned some kind of drumsticks on the side. Matthew does not recall any stuffing inside the turkey. As the turkey baked, it shrunk/contracted and lost its distinctive turkey features. It was carved and served with a vegetarian gravy and probably cranberry sauce and stuffing on the side. It was a potluck Thanksgiving vegetarian banquet, with about 30-40 people present, including all people who worked at The Tofu Shop. It was probably the first “Tofu Turkey Thanksgiving” in American history.

After starting The Tofu Shop in Arcata, California, Matthew continued the turkey tradition each year from Thanksgiving to Christmas, starting in about 1982 or 1983. It was a major event. They started carving the turkey from two large blocks of tofu; they would hollow each out, fill the space with stuffing, then put them together and bake them. It would come out like a loaf; when you sliced it you would get a combination of the white meat plus the stuffing inside. The Tofu Turkey came in three sizes (small, medium, and large—which fed 24 people) and was sold as a special-order product via the deli—either for take-home or as a hot plate (sliced, with gravy, stuffing, and cranberry sauce) to eat at the deli; it was not sold to other retail stores. Their record year, they sold \$4,000 worth of Tofu Turkeys including mushroom gravy, and a custom stuffing with okara and miso. People could also special-order tofu pumpkin pies, cranberry sauce, etc.—a full meal. The product was last sold by The Tofu Shop in 1993. Bob Meeks now makes it at the Daybreak Cafe in Arcata, but he has improved the recipe. Also, the Arcata Co-op, which has a service deli named Spoons, has for many years made their own Tofu Turkeys in house.

Matthew met Seth Tibbott of Turtle Island Foods (home of Tofurky) years ago when he came down through Arcata doing in-store food demos for his tempeh products, and Matthew has talked with him periodically over the years.

To this day, Matthew is asked to bring Tofu Turkey to his extended family’s get-together on Thanksgiving in Arcata—for the vegetarians in the family. Address: Tofu Shop Specialty Foods Inc., 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

4223. *Iowa Soybean Review (Iowa Soybean Association, Urbandale, Iowa)*. 2002. ISU keeps consumer in mind when developing food-grade soybeans. 13(8):17. Summer.

• **Summary:** Dr. Walter Fehr, distinguished professor of agriculture at Iowa State University (ISU) and head of the university’s breeding program, has as his motto: “The consumer is always right.” The university’s involvement in breeding soybean varieties for food uses has been driven by the Asian market. In 1978 ISU developed a variety named Vinton; after 20 years it remains the standard of quality in the Japanese tofu industry.

In 1979 Fehr took his first trip to Japan to understand that market. Since that time he has worked closely with Asian food manufacturers and buyers. ISU has also developed large-seeded soybeans tailor-made for miso, vegetable soybeans (edamame), lipoxxygenase-free soybeans with no “beany flavor,” soybeans with reduced saturated fat content to eliminate the need for partial hydrogenation, varieties that are low in phytate to reduce the amount of phosphorus in animal waste.

4224. Belleme, Jan. 2002. Miso production in the USA (mainland), Hawaii, and Canada. Miso exports from Japan to the USA and the UK (Interview). *SoyaScan Notes*. Oct. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John interviewed each of the miso manufacturers in these three regions and they gave him their company’s production statistics, sometimes on the understanding that he would only publish aggregate figures—which are: USA (including Hawaii) 1,326,000 lb/year (601.5 metric tons/year). Hawaii 660,000 lb/year (299.4 metric tons/year). Canada 313,200 lb/year.

Miso exports from Japan to the USA were 5,561,160 lb/year (2,520 metric tons/year) and to the UK were 308,644 lb/year (140 metric tons/year).

Note: Comparing these figures with comparable 1982 figures published in *The Book of Miso* (1983, p. 240): Miso production in the USA (including Hawaii) has decreased 56.7% from 3,064,444 lb/year (750 metric tons/year) in 1982. Miso production in Hawaii has decreased 53.3% from 1,410,944 lb/year (640 metric tons/year) in 1982. Miso imports from Japan to the USA have increased 263% from 2,114,211 lb/year (959 metric tons/year). Address: P.O. Box 457, Saluda, North Carolina 28773.

4225. Battaglia, Evelyn. 2002. Cooking with soy products. *Martha Stewart Living*. Oct. p. 278, 280, 282, 284.

• **Summary:** Introduces fresh soybeans (edamame), tofu, soy milk, miso, soy sauce. Recipes: Miso soup with tofu, spinach, and carrots. Sesame marinated tofu with vegetables. Chai tea with soy milk. Edamame succotash.

4226. Stacey, Michelle. 2002. Weighing the health benefits of soy. *Martha Stewart Living*. Oct. p. 90, 92, 94, 96.

• **Summary:** Under “the good news” and “the bad news” discusses the benefits and possible (but unclear) disadvantages.

4227. Elwel, Christian. 2002. Small is beautiful and strong! *River Currents: News from South River Miso Company (Conway, Massachusetts)*. Fall/Winter. p. 1, 5. Nov.

• **Summary:** On 4 Nov. 2002 Matt Rulevich of nearby White Oak Farm delivered his first ton of certified organic soybeans to South River Miso Co. They were, of course, grown in Massachusetts, which is not known as a soybean producing state. He will deliver another 5,000 pounds in December. For the past 21 years South River's organic soybeans have been grown in the Midwest.

A sidebar, titled "Seed to Harvest," describes the nine main steps in growing organic soybeans at White Oak Farm. A photo shows Matt carrying a bag of his soybeans.

4228. Elwel, Christian. 2002. Miso more than food: Life! Healing in Rwanda. *River Currents: News from South River Miso Company (Conway, Massachusetts)*. Fall/Winter. p. 2. Nov.

• **Summary:** Note: Some dates and details were added to this published story by William Shurtleff based on an interview with Gilbert Boulay conducted by Shurtleff on 24 Nov. 2002.

Gilbert Boulay and Suzanne Dionne met in Quebec in about 1982. She was a student of forest engineering and she a student of food science and agronomy; they soon became a couple and shared a common interest in international development and refugee problems. In 1984 they applied to various organizations. Gilbert was hired by a volunteer organization in Quebec. In Aug. 1984 they both first arrived in the central African nation of Rwanda, where he and began to work as a Canadian volunteer with the United Nations as an advisor to the Rwandan Ministry of Agriculture and Forestry in the field of forest management and reforestation. Suzanne began working in nutrition centers introducing food products that promote health. They both soon decided to teach Rwandans how to make miso. Suzanne first learned to make miso by herself following the method in *The Book of Miso*. In about Sept/Oct. 1988 she made a quick trip to study miso making with Yoshi and Lulu Yoshihara in British Columbia; she was there 3-4 days. Back in Rwanda, she made miso at their at home in the capital, Kigali. In 1989 they returned to Quebec, where they were married. Soon the president of Rwanda, Juvénal Habyarimana became interested in miso and in July 1989 he actually mentioned it in one of his speeches. Soon thereafter, Suzanne gathered the means to rent a house and turn it into a miso workshop and neighborhood restaurant. She soon had 22 people on her staff making miso and other natural foods. Miso saved the life of a five-year-old girl who had been unable to digest food. "This and similar experiences were a major turning point for Suzanne, as she realized more fully the healing potential of miso."

In 1992 she returned to Canada to study business management with the goal of establishing an organic food-processing business.

After receiving her MBA, Suzanne Dionne and her husband Gilbert Boulay launched their business, *Les Aliments Massawippi*, at 4530 Chemin Capelton, North Hatley, Quebec, Canada J0B 2C0. Phone: 819-842-2264. In 2001 they made their first batch of commercial miso for local distribution. In June 2001 Suzanne received the *Prix Entrepreneurship Féminin* at the *Concours Québécois en Entrepreneurship* for creating two new health food products.

In Dec. 2001 she published the French-language edition of her book about miso. The English-language edition was published in June 2002.

Both Suzanne and Gilbert presently work full time at their miso company; they make the miso in their home and have one employee, a woman who is a chemical engineer from Yugoslavia.

Note: The most recent genocide in Rwanda began in April 1994.

4229. Kadokura, Tania. 2002. Sumo stew: Japan's famed wrestlers have been bulking up on chanko-nabe, a hearty, protein-rich one-pot meal, for more than a century. *Saveur (New York, NY)* No. 62. p. 68-75. Nov.

• **Summary:** Ingredients include tofu and miso. Contains recipes and color photos of sumo wrestlers and chanko-nabe. Address: Tokyo-based cooking teacher.

4230. Charney, Ken. 2002. The bold vegetarian chef: Adventures in flavor with soy, beans, vegetables, and grains. New York, NY: John Wiley & Sons. vi + 313 p. Illust. Index. 23 x 19 cm.

• **Summary:** Contents: Acknowledgments. Introduction: Vegetarian delights. 1. Starting off right: Appetizers and snacks. 2. Soups and stocks: Warm beginnings. 3. Breakfast, lunch, and brunch: From scrambles to sandwiches. 4. Burgers, fritters, and loaves: Stars of vegetarian cuisine. 5. Outrageous soy: Tempting tofu and tempeh. 6. A bold way with beans: Powerhouse dishes. 7. Pasta, risotto, and polenta: Comfort carbs. 8. Seitan: The power of wheat meat. 9. Vegetables and grains on the side: All the best accompaniments. 10. Green salads: Crisp and well dressed. 11. Just desserts: Sweetness and light.

On the rear cover is a brief bio of Ken Charney; on the front cover is a color portrait photo. Address: Seattle, Washington.

Tokyo: Nosan Gyoson Bunka Kyokai (Agricultural and Fishing Village Cultural Organization). 151 p. 21 cm. Series: Shokuhin Kako Shiirizu, no. 6. [Jap]*

• **Summary:** How to make good-quality miso on a commercial scale, and how to market it. Address: Japan.

4233. Kissel, Renate. 2002. Soja & Tofu: Die neue Vitalkueche [Soya & tofu: The new vital cookery]. Frankfurt am Main, Germany: Umschau Buchverlag. 128 p. Illust. (color photos). Recipe index. 24 cm. [Ger]

• **Summary:** Contents: Soya—the powerbean for nutrition. 1 Salads and appetizers. 2. Sauces, dips, garnishes, and spreads for bread. 3. Soups. 4. Main dishes. 5. Desserts, baked goods, and drinks. 6. Asian dishes. Glossary. Note: The majority of recipes in this cookbook use tofu.

4234. Kyô-tofu kyô-yuba kyô-miso: Kyôto de tabeyô herushii Kyôto [Kyoto's tofu, yuba and miso: Let's eat Kyoto's healthy foods]. 2002. Kyoto: Kyoto Shinbun Shupan Senta. 80 p. 26 cm. [Jap]*

• **Summary:** A book promoting soyfoods made in Kyoto. Address: Japan.

4235. Treloar, Brigid; Inge, Karen. 2002. Healthy soy: Cooking with soybeans for health and vitality. Hong Kong: Periplus Editions (HK) Ltd. Printed in Singapore. 112 p. Illust. (color). Index. 24 x 22 cm.

• **Summary:** This is a beautiful book, with stylish and informative full-page glossy color photos on every other page. It is well researched, comprehensive, and generally uses standard soyfoods terminology. It is also strange: We are not told in which country the publisher is located (perhaps Hong Kong or Singapore) or where the authors live. It is distributed in North America, Japan and Korea by Tuttle Publishing. On the inside rear dust jacket: www.tuttlepublishing.com. It is clearly targeted at a world market.

Contents: Introduction. The health benefits of soy: The heart, cancer, menopause, osteoporosis, weight control, allergies, lactose intolerance, the nutritional value of soy, protein, phytoestrogens, fats, calcium, soluble fiber, vitamins and minerals, energy, carbohydrates, how much soy do we need? (as an exchange for meat), how to use the nutrition table. Nutrition table (for various soyfoods). Soybeans: Green soybeans—fresh and frozen, dried soybeans, how to buy and prepare soybeans (selecting and storing dried soybeans, preparing dried soybeans, soaking, pan-roasting, boiling, pressure cooking, canned). Soy foods: Tofu (selecting and using, storing, freezing), bean curd sheets (yuba), deep-fried tofu (age; seasoned tofu), miso, tempeh, soya sauce (shoyu; regular, low-salt, light, tamari,

ketjap manis), soy milk, soy flour, soy nuts, soy germ powder, soy oil, soybean sprouts, soybean paste (fermented), natto, soy dairy products (soy butter, soy spread {margarine}, soy cheese {plain or flavored}, cream cheese, yogurt, mayonnaise), soy meats (meat alternatives), others (soy breads, cereals, pasta, chocolate, chips, health bars, desserts, tofu ice creams), soy grits, tips (tofu, soy dairy products). Compatible soy flavors. Preparation and cooking techniques: Draining and pressing tofu, cutting tofu, deep-frying tofu, how to reconstitute yuba, how to use deep-fried tofu pouches, how to use miso, miso tips. Soups. Appetizers and dips. Light meals and snacks. Main dishes. Seafood. Vegetables. Salads. Desserts. Soy drinks. Glossary. Guide to weights and measures.

Note: This is not a vegetarian cookbook. Some recipes call for chicken, fish (swordfish, tuna, salmon), shrimp, etc. Address: 1. Food writer, stylist, consultant, and cooking instructor [Australia]; 2. Nutritionist and nutrition correspondent for *Good Morning Australia*.

4236. Weil, Andrew; Daley, Rosie. 2002. The healthy kitchen: Recipes for a better body, life, and spirit. New York: Alfred A. Knopf; London: Ebury. xxviii + 325 p. Illust. (color photos by Sang An, Amy Haskell, and Eric Studer). Ports. Index. 24 cm.

• **Summary:** Lifelong good health starts in the kitchen. Includes 135 recipes; none require red meat, but not vegetarian. Rosie's introduction encourages: "Don't be afraid to work with new ingredients, such as... using tofu,..." The section on "Nutrition and health" contains useful information on the glycemic index (p. xx-xxi), the main sources of fat (p. xxi) and protein (p. xxiv) in the American diet. Eat more vegetable protein, especially from soybeans, "and less animal protein, especially from fish and reduced-fat dairy products. The section on "Stocking the pantry" includes Asian foods—soy sauce or tamari, and "miso paste "Made from soybeans" (p. xxxiii-iv).

Soy related recipes include: "A soy shake," with silken tofu (p. 3, for breakfast). The section "Got (too much) milk?" (p. 34-35) recommends soymilk as a healthful alternative. And in the "Poultry" section (p. 54), Weil suggests substituting baked tofu. Weil has a full page (p. 58) about "Soy sauce: Shoyu and tamari," which also mentions "rice starter (koji)." There are recipes for: "Vegetable nori rolls" with natural soy sauce (p. 72-73). Miso pâté (p. 80). Miso soup (p. 125). Meat and meat substitutes (incl. tofu and gluten) (p. 149-50). Greens with tangy miso dressing (p. 244-45). Address: 1. M.D., Clinical Prof. of Medicine, Univ. of Arizona and Director of its Program of Integrative Medicine; 2. Chef trained at the Cal-a-Vie spa near San Diego, former Oprah Winfrey chef.

4237. *ASA Today (St. Louis, Missouri)*. 2003. Soyfoods enjoy growing popularity. 9(6):4-page insert after p. 2.

April.

• **Summary:** Attractive (with 5 color photos), interesting, and original. This is the first such insert in this 4-page newsletter, and the first time this newsletter has contained a significant amount of information about soyfoods. Below the title is printed: "A special publication from the American Soybean Association." On the back page we read: "ASA thanks the sponsors of this publication...: Solae [DuPont & Bunge], Soyatech, and White Wave. Below the logo of each company is 4½-inch-long column describing the company, its history and activities.

Contents of the insert: Introduction. Soyfoods become mainstream. The most common [widely used] soyfoods. U.S. consumers more aware of soyfoods. The push for soymilk in schools. Soyfoods for the future. Export demand for food ingredient beans.

It begins: "No longer are soyfoods considered unusual or hard to find. No longer are they considered the kind of foods only eaten by so-called 'granola-crunchers' or 'health fanatics'... The menu at the recent American Soybean Association (ASA) awards banquet featured a serving of delicious edamame (sweet green soybeans) that soybean growers and guests alike enjoyed with enthusiasm."

4238. Yamamoto, S. 2003. Soy, isoflavones, and breast cancer risk in Japan. *J. of the National Cancer Institute* 95:906-13. June 18. *

• **Summary:** Breast cancer risk was reduced by one half in Japanese women who ate three or more bowls of miso soup on an almost daily basis. The report monitored 21,852 from 1990 to 2000. Post-menopausal women showed the greatest reduction of risk. Address: Japan Public Health Study of Cancer and Cardiovascular Disease.

4239. Yu, George. 2003. Most probiotic organisms taken by mouth / orally never reach the intestines. Lack of intestinal flora, caused by antibiotics, may cause cancer (Interview). *SoyaScan Notes*. June 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Dr. Yu is interested in conducting scientific studies on probiotics and miso. It well known among professionals in his field that most probiotic organisms taken orally (PO = per oral) never reach the intestines—however some beneficial enzymes may get through. The general public has many misconceptions on this subject. It is true that antibiotics do kill many of the beneficial microorganisms that naturally inhabit the intestinal tract, and it is also true that these should be replaced as soon as possible after they are killed. He is interested in trying to introduced the organisms via the rectum (PA = per anal).

Dr. Yu believes that enzymes from beneficial bacteria in the intestines break down substances which are potential carcinogens. He hopes to do research that will test his theory.

Update: 2004 Sept. 19. The National Enzyme Co. (Forsyth, Missouri), a manufacturer of supplements that contain enzymes (most of which it buys from Japan), is interested in following up on George's ideas. Address: M.D., Urologist, Eagis Medical Research Associates, Suite 200, 116 Defense Hwy., Annapolis, Maryland 21401. Phone: 410-897-0540.

4240. Belleme, Jan. 2003. New developments with Mitoku and with miso (Interview). *SoyaScan Notes*. June 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** At the end of March 2003, Mr. Kazama closed Mitoku's office in the USA which John and his wife, Jan, ran as a home business. So John is looking for other sources of income.

Rudy Shur plans to publish John's new book on miso in October or November of this year; the title will probably be *The Miso Book*. The book is a wholistic look at miso with emphasis on health benefits.

Vern Verona, a long-time macrobiotic, wrote a book titled *Cancer Preventing Food*, published in 1994 by Prentice-Hall. Vern is now writing a book about miso. John is involved in a miso-marketing venture. He and Sandy Pukel are organizing a 7-day "wholistic health" cruise to the western Caribbean.

Update: 2009. Jan 27. In the spring of 2005 Sandy Pukel and his partner, John Belleme, launched Holistic Holiday at Sea, a fun filled cruise vacation with gourmet vegan fare and extraordinary educational opportunities. The Taste of Health and Holistic Holiday cruise (as it has come to be known) has become a full-time and very successful business, with revenue of more than \$1 million a year. They do only one cruise a year—in the summer. Last year more than 1,000 people went on the cruise. This coming summer will be the 6th cruise. It is organized entirely by John and Jan Belleme and Sandy Pukel. On a typical day, John and Jan work 12 hours a day. The cruise rates per person range from \$1,195 to \$3,000.

Chris Dawson, who now owns Clearspring in London, has built it into a thriving \$10-12 million dollar a year import and distribution business. He imports from Japan and China and also distributes many natural foods made in Europe. John wrote a book for him titled *The Real Taste of Japan*, published by Cross Media. Address: P.O. Box 457, Saluda, North Carolina 28773.

4241. Egan, Anne. 2003. Edamame (eh-dah-MAH-meh): 60 tempting recipes featuring America's hottest new vegetable. Emmaus, Pennsylvania: Rodale Press. 144 p. Illust. (25 color photos by Mitch Mandel). Index. 24 cm.

• **Summary:** Contents: Introduction: Name game, history (of soybeans), the hottest health food today, selection, preparation, grow your own, sources for edamame seeds. Appetizers. Salads. Soups. Main dishes. Side dishes.

Conversion chart. An attractive non-vegetarian cookbook. Address: Executive Editor of Cookbooks, Rodale Press, 33 East Minor St., Emmaus, Pennsylvania 18049.

4242. Katz, Ellix Sandor. 2003. *Wild fermentation: The flavor, nutrition, and craft of live-culture foods*. White River Junction, Vermont: Chelsea-Green Publishing Co. xv + 187 p. July. Illust. by Robin Wimbiscus. Index. 26 cm. [78 ref]
 • **Summary:** This book introduces readers to fermented foods from around the world. Contents: List of recipes. Foreword, by Sally Fallon. Acknowledgments. Introduction. Cultural context: The making of a fermentation fetish. 1. Cultural rehabilitation: The health benefits of fermented foods. 2. Cultural theory: Human beings and the phenomenon of fermentation. 3. Cultural homogenization: Standardization, uniformity, and mass production. 4. Cultural manipulation: A do-it-yourself guide. 5. Vegetable ferments. 6. Bean ferments. 7. Dairy ferments (and vegan alternatives). 8. Breads (and pancakes). 9. Fermented-grain porridges and beverages. 10. Wines (including mead, cider, and ginger beer). 11. Beers. 12. Vinegars. 13. Cultural reincarnation: Fermentation in the cycles of life, soil fertility, and social change. Appendix: Cultural resources. Notes. Bibliography. Index.

Chapter 6, “Bean ferments,” includes details on miso, miso pickles, koji, tamari, and tempeh—with instructions for making them at home plus recipes. Other chapters discuss: Kefir, cultured soymilk, and Sunflower sour cream (p. 90). Amazake (p. 118-20). Walt Whitman’s poem on compost (p. 162). Von Liebig, whose 1845 monograph “laid the groundwork for the chemical agricultural methods that have become standard practice and that are rapidly depleting soils everywhere.”

The author believes strongly that fermented foods have helped him and several friends to survive AIDS—a fascinating hypothesis! Address: Short Mountain Sanctuary, in the hills of Tennessee.

4243. Song, Sora. 2003. *Going soy crazy*. *Time*. Sept. 1.
 • **Summary:** If even half the claims being made on behalf of the soybean are true, “it may be the closest thing on earth to a magic bean.” “I think eating soy foods—tofu, soy milk or miso—in moderation, a couple of times a week, should be fine,” says Anna Wu, professor of preventive medicine at USC’s medical school.

4244. **Product Name:** Miso Master Salad Dressings [Five Flavors].
Manufacturer’s Name: Great Eastern Sun (Marketer). Made in North Carolina by American Miso Co.
Manufacturer’s Address: 92 McIntosh Rd., Asheville, NC 28806.
Date of Introduction: 2003. September.
Wt/Vol., Packaging, Price: Bottled.

New Product–Documentation: Talk with Barry Evans of American Miso Co. 2004. Jan. 12. This line of five dressings was first sold in retail stores in Sept. 2003. They are sold in 8 oz bottles.

4245. Cook, Carla. 2003. *Dining out: An Asian trek*. A menu large enough to get lost in lets diners chart their own courses. *New York Times*. Oct. 19. p. NJ14.

• **Summary:** This is a review of a unique Chinese restaurant Sunny Garden (15 Farber Road, Princeton, New Jersey)—which also serves quite a few Japanese dishes. Recommended dishes include “Duck with black bean and ginger sauce.”

This Chinese restaurant also (amazingly) as its own sushi bar. And it serves salmon “surrounded by a shallow pool of sweet-and-sour sauce flavored with miso, mirin, and vinegar.” Also Teriyaki shrimp.

4246. Book Publishing Co. 2003. Fall 2003 fall catalog (Mail order). Summertown, Tennessee. 64 p. 25 cm.

• **Summary:** Contains sections titled Soyfoods Cooking (p. 14-17, including books on tofu, miso, tempeh, soyfoods, meatless burgers, meat substitutes, and TVP), Healthy World Cuisine (Chinese, Japanese, Korean, Indian), Vegan Cooking (p. 24-32), Vegetarian Cooking (p. 33-36), Native Voices (Native American books and authors) (p. 45-61). Address: P.O. Box 99, 415 Farm Road, Summertown, Tennessee 38483. Phone: 1-888-260-8458 or 931-964-3571.

4247. HeartHealth Partnership. 2003. *Turning over a new leaf: Your heart-healthy living guide* (Vol. 4, No. 2). Health Drivers Publishing. 29 p. Illust. No index. 19 cm. [26 ref]

• **Summary:** This booklet gives basic information is for people who want to reduce their blood cholesterol levels. It contains ads and touts specific brands. The National Cholesterol Education Program (NCEP) estimates that 52 million Americans are being treated for high cholesterol levels.

“Cholesterol is a soft fat-like substance, which in moderate amounts is essential for good health. It is part of the makeup of all cell membranes, is found in body tissue, and can be made into various hormones. Cholesterol comes from two sources. Your body produces it naturally, mostly in the liver (about 1,000 milligrams a day). The other source is the food you eat, such as meat, poultry, fish, egg yolks, and dairy products. Fruits, vegetables, nuts, seeds, and other plant-based foods do not contain cholesterol and, in fact, some of these foods have been shown to actually reduce blood cholesterol” (p. 2).

HDL (High Density Lipoprotein) is “good” cholesterol. It contains very little cholesterol in its core, but as it travels through the bloodstream it carries LDL or “bad” cholesterol away from the arteries to the liver, where it is either recycled or excreted.

LDL (Low Density Lipoprotein) is “bad” cholesterol. Its makeup is the opposite of HDL cholesterol; its core is almost all cholesterol. “If LDL levels are abnormally high, as it travels through the bloodstream it builds up on the artery walls. When LDL cholesterol combines with other substances, a plaque-like substance is produced that can clog the arteries.

“The ugly: Triglyceride is a form of fat found in food, body fat, and is also carried in the blood as part of the cholesterol molecule. The visible fat on chicken or steak is actually triglyceride. If you are overweight, your body stores the extra calories you eat as triglycerides. People with high triglyceride levels often have low HDL or ‘good’ cholesterol levels and this combination is considered by many experts to be associated with an increased risk of heart disease.”

Fats in your diet and the role they play. Saturated fats, which are higher in meat, dairy products, palm and coconut oils, tend to contribute to LDL (bad) cholesterol levels. Monounsaturated fats are liquid at room temperature but will start to become solid when refrigerated. They can be found in almond, canola, olive, and peanut oils, and seem to have the effect of lowering bad LDL without lowering protective HDL cholesterol. Polyunsaturated fats are found in corn, soybean, safflower, and sunflower oils. They are liquid at room temperature and remain liquid when refrigerated. They may lower bad LDL cholesterol levels and, if used in large enough quantities, they may also reduce protective HDL levels as well. Trans fatty acids “are fats that do not occur naturally in other words, they are created” by hydrogenation. “Hydrogenated fats act like saturated fats.” Look for them on labels; effective Jan. 1, 2006, the FDA will be putting trans-fats content on nutrition labels.

Consider substituting healthier alternatives for the following: Mayonnaise, sour cream (use fat-free), milk (try “soy-milk”), cream, cheese (“many varieties of low-fat soy cheese”), egg yolks, meat (switch to extra lean cuts), butter, and cooking oils (“Almond, canola, olive, and peanut are considered best”).

Glossary of label terms related to calories, fats, and cholesterol: Example—“Fat free” means less than ½ gram of fat per serving. Plant sterols and stanols actually help lower LDL (bad) cholesterol.

Fiber (also called roughage or bulk) is the “part of plant foods that cannot be digested or absorbed by the body, yet it plays an important role in promoting good health and protecting against some diseases—such as heart disease. Men consuming 29 grams of protein a day have been shown to have a 40% reduction in heart attacks compared to men with the lowest fiber intake. The National Academy of Sciences recommends the following daily fiber consumption: Women ages 19-50 = 25 gm. Women over age 50 = 21 gm. Men ages 19-50 = 38 gm. Men over age 50 = 30 gm. More than

90% of Americans don’t meet these recommendations; they average only about 15 gm of fiber a day (p. 12).

Physical exercise “is very likely to lower your risk of heart disease and enhance your overall sense of health and well being.” Almonds can help lower blood cholesterol. In July 2003 almonds received a qualified health claim from FDA (p. 16).

“Soy-anara cholesterol: Research has shown that consuming soy protein, rather than animal protein (meat, poultry, milk, cheese, eggs) can decrease your overall LDL (bad) cholesterol.” In 1999 the FDA ruled in favor of “heart healthy” labeling for certain soy products. “The most familiar forms of soy protein are those found in Asian cuisine; tofu, tempeh, and miso. To make soy proteins more familiar to Americans, products have been developed that closely resemble meat, poultry, and fish, in taste and texture. One of the great things about soy is that it can be flavored and shaped in an infinite number of ways.” On the facing page is a full-page color ad for Boca Burgers and other “Boca meatless products.”

4248. Tsai, Ming; Boehm, Arthur. 2003. *Simply Ming easy techniques for East-meets-West meals*. New York, NY: Random House. *

• **Summary:** Recipes include: Hoisin-lime sauce. Roasted Miso-Citrus chicken.

4249. **Product Name:** Annie Chun’s Miso Soup: FreshPak Noodle Bowl with Tofu and Scallion.

Manufacturer’s Name: Annie Chun’s, Inc.

Manufacturer’s Address: P.O. Box 2418, San Rafael, CA 94901.

Date of Introduction: 2003. November.

Ingredients: Noodles: Wheat flour [white], water, tapioca starch, lactic acid, salt. Soup: Soybean paste (water, soybean, rice, salt), sugar, rice wine, sea vegetable, yeast extract, onion, shiitake mushroom. Toppings: Tofu*, green onion*, spinach*. * = dehydrated.

Wt/Vol., Packaging, Price: 5.4 oz “biodegradable bowl. Retail for \$1.99 (2003/11, Lafayette, California).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased at Trader Joe’s in Lafayette, California. 2003. Nov. 16. Paperboard sleeve has a color photo of the noodles and soup in a white bowl. To the left are three Chinese characters. “All natural Asian cuisine.” “Microwave 1 minute.” A small round portrait photo shows Annie Chun, a working mom. www.anniechun.com. Soyfoods Center taste test: Very unsatisfying because of the refined white noodles—what are *not* natural.

4250. Hain Celestial Group, Inc. (The). 2003. *Annual report 2003: 10 years of changing the way the world eats*. Melville, New York. 32 p. Nov. 28 cm.

• **Summary:** Marks the company's 10th anniversary with a nice chronology: "1993. Irwin Simon forms 21 Century Foods with the Farm Foods brand. We acquire Kineret Foods, a specialty kosher brand. Our name becomes Kineret Acquisition Corp. and we sell 1 million shares and warrants in an initial public offering at \$3.25 per unit. We are listed on NASDAQ under the ticker symbol NOSH. The FDA issues its Nutrition Labeling and Education Act (NLEA), regulations establishing general requirements for health claims and food labeling.

"1994. We acquire Hain Pure Food Co. and Hollywood cooking oils from PET Inc. We change our name to The Hain Food Group, Inc. Our ticker symbol is changed to HAIN. Sales in our first full year are \$14 million." 1995. Sales grow to \$58 million. 1996. Sales reach \$69 million.

Net sales for the year ended 30 June 2003 were \$466.459 million, up 18% from \$395.954 million in 2002. Net income in 2003 was \$27.492 million, way up from \$2.971 million in 2002. Many new products containing soy in the product name are pictured and described incl. Imagine Organic Broth [California Miso or Soy Ginger], Westsoy Soy Slender. Lima Soya Drink.

Accompanying the annual report is a "Notice of Annual Meeting of Stockholders and Proxy Statement" (33 p.). Irwin Simon, the founder and CEO, age 45, had the following annual compensation: Salary: \$643,077. Bonus: More than \$175,000. Other compensation: \$16,000. Stock options: 600,000 shares. Note: The value of the company's stock has decreased for the last 3 years in a row. Address: 58 South Service Road, Melville, New York 11747. Phone: 516-237-6200.

4251. Soga Soyfoods [Pulmuone U.S.A.]. 2003. New grilled and marinated Soga Gourmet Tofu: You'll never think of tofu the same way again (Ad). *Natural Foods Merchandiser*. Nov. p. 11.

• **Summary:** This 8½ by 11-inch color ad shows four products in this line: Santa Fe Chili & Lime, Sicilian Tomato Basil, Ginza Ginger Miso, and Korean Barbecue. "Ready to eat! Pre-diced. Pre-seasoned. Pre-grilled."

Talk with John Sim, head of sales at Pulmuone. 2003. Nov. 10. This product should be available in retail stores by Dec. 1.

4252. **Product Name:** Grilled and Marinated Tofu [Santa Fe Chili & Lime, Sicilian Tomato Basil, Ginza Ginger Miso, and Korean Barbecue].

Manufacturer's Name: Soga Soyfoods [Pulmuone U.S.A.].

Manufacturer's Address: 4585 Firestone Blvd., South Gate, CA 90280. Phone: 866-356-2800.

Date of Introduction: 2003. November.

Ingredients: Incl. tofu. miso.

How Stored: Refrigerated.

New Product–Documentation: Ad (8½ by 11-inch color) in *Natural Foods Merchandiser*. 2003. Nov. p. 11. "New grilled and marinated Soga Gourmet Tofu: You'll never think of tofu the same way again" (Ad). Shows the labels of four products in this line: "Ready to eat! Pre-diced. Pre-seasoned. Pre-grilled."

Talk with John Sim, head of sales at Pulmuone. 2003. Nov. 10. This product should be available in retail stores by Dec. 1. Note: The company answers the phone: Pulmuone USA and Soga Soyfoods R&D Center.

Product [Ginger Miso—"Ginza" is not mentioned] with Label purchased at Trader Joe's in Lafayette, California. 2004. July 11. 3.75 by 6 inches. Vacuum packed. White, red, dark blue, green and yellow on blue. Retail for \$2.49.

4253. **Product Name:** Garlic Red Pepper Miso (Unpasteurized).

Manufacturer's Name: South River Miso Co. Inc.

Manufacturer's Address: South River Farm, Conway, MA 01341. Phone: (413) 369-4057.

Date of Introduction: 2003. November.

Ingredients: Incl. brown rice, chickpeas, organic garlic, red pepper paste (imported from Turkey), dried nettle greens, sea vegetables, salt.

Wt/Vol., Packaging, Price: 16 oz bottle. Retail for \$10 plus shipping.

How Stored: Refrigerated.

New Product–Documentation: River Currents: News from South River Miso Company (Massachusetts). 2003. Fall/Winter (Nov). p. 1-3. "Introducing Garlic Red Pepper Miso." Made with a Chickpea Miso base, it is "soy free" and low salt (6%).

4254. **Product Name:** Trader Joe's Instant Miso Soup.

Manufacturer's Name: Trader Joe's (Marketer-Distributor). Product of China.

Manufacturer's Address: Monrovia, CA 91016.

Date of Introduction: 2003. December.

Ingredients: White miso (water, soybeans, rice, salt, *Aspergillus oryzae*), red miso (water, soybeans, rice, salt, *Aspergillus oryzae*), dextrose, clam extract, bonito powder, tangle (*konbu*) extract powder, autolyzed yeast extract, dehydrated shiitake, dehydrated tofu (soybean protein, brine [water, salt], water), dehydrated chives.

Wt/Vol., Packaging, Price: Contains 4 packets, net wt. 0.94 oz (27 gm) per packet. Retail for \$2.99 at Trader Joe's (2003/08, Lafayette, California).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2003. Dec. 14. Outer box: 6.38 by 4.75 by 1.5 inches. White, green, yellow, and black on various shades of reddish brown. The large foil packets are packed in this paperboard box. Each packet gives two 1-cup servings. The ingredients

are listed only on the outer box. A “blend of red and white freeze dried miso paste combined with fish extract powders...” Soyfoods Center evaluation. Product and packet design: Excellent. Flavor, texture, and appearance: Very good—we like the balance of red and white miso and the salt content, but we wish the product were vegetarian, without clams and fish (bonito).

4255. Choe, Ji Sook; Moriyama, Yukiko. 2003. Korean cooking for everyone. Tokyo, Japan: Joie, Inc. 112 p. See p. 95. Illust. (some color). 26 cm. *

• **Summary:** Page 95: “Born from the severe weather and environment, *kochu jang* became the Korean’s masterpiece of seasonings. Make a large amount and store as it keeps well.” The word “jang” is found in seasonings such as *kan jang* (soy sauce), *toen jang* (miso, soy bean paste), and *kochu jang* (hot fermented soy bean paste).

• **Summary:** Contents: Introduction. Kimchi: Changes during fermentation, cancer, cardiovascular disease, nitrosamines and ethyl carbonate.

Doenjang: Cancer (epidemiology, anticarcinogenic and antimutagenic activities in vitro and animal models), cardiovascular disease (inhibition of angiotensin converting enzyme, antithrombotic peptides), isoflavones. Conclusions. Conclusions. Acknowledgments.

Note: Angiotensin is an oligopeptide in the blood that causes vasoconstriction (constriction of blood vessels), increased blood pressure, and release of aldosterone from the adrenal cortex. It is a hormone. The inhibition of angiotensin converting enzyme is thought to help relieve medical conditions such as high blood pressure, heart failure, diabetic nephropathy and type 2 diabetes mellitus.

Table 12.1 titled “Fermented food consumption by the Korean population” (gm per person per day) gives statistics for the following soy based foods:

Ganjang (soy sauce): Overall 6.6, highest 8.0 in persons aged 30-49.

Gochujang (hot pepper-soybean paste): Overall 3.7, highest 5.2 in persons aged 30-49 years.

Doenjang (soybean paste): Overall 5.6, highest 8.0 in persons aged 50-64.

Jajang (black [soy] bean paste): Overall 1.1, highest 1.8 in persons aged 7-12.

Chongkukjang (soybean paste, quick fermented [Korean-style natto]): Overall 1.0, highest 2.4 in persons aged 65 or older.

Mixed bean paste: Overall 1.0, highest 1.5 in persons aged 30-49.

Total: 19.0, highest 24.4 in persons aged 30-49.

Source: Adapted from Ministry of Health and Welfare, Report on 1998 National Health and Nutrition Survey (Dietary Intake Survey), Korea Health Industry Development Industry.

Conclusion: There is presently no conclusive evidence showing human health benefits from consumption of Korean fermented soyfoods. Address: 1. PhD, Food Toxicology Div., Dep. of Food and Nutrition; 2. Research Inst. of Home Ecology; Both: Seoul National Univ., Seoul, Korea.

4261. Minamiyama, Yukiko; Okada, Shigeru. 2003. Miso: Production, properties and benefits to health. In: Edward R. Farnworth. 2003. Handbook of Fermented Functional Foods. Boca Raton, Florida: CRC Press. 390 p. See p. 277-86. [45 ref]

• **Summary:** Contents: Introduction. Miso: The history of miso, manufacturing miso, home production of miso, effects of miso on health (gastrointestinal diseases, cancer prevention, elimination of radioactive materials, effect on cholesterol levels and aging, harmful effects of tobacco). Conclusions. Acknowledgments.

Total commercial production of miso in Japan is presently about 600,000 tonnes (metric tons) per year, produced by over 1,500 miso factories and plants (p. 278).

History: At some time between 200 B.C. and 300 A.D. the soybean was probably introduced to Japan, most likely from northern China, through Korea. The earliest known book about miso is "thought to be the *Taiho-ritsyryo* compiled in A.D. 702, but by that time a type of miso was already known in Japan." The technique for preparing miso was introduced from either Korea or China. One theory is that miso developed from Chinese *jan* [sic, *jiang*]. In about 550 to 600 A.D., Japanese came to know about *jiang*, however at this time *jiang* was being made in Buddhist temples in China. It is believed that in 753, a Chinese Buddhist named Ganjin (688-763) came to Japan to promote Buddhism and at the same time brought *jiang* to Japan. Address: 1. PhD, First Dep. of Pathology, Okayama Univ. Medical School; 2. Dep. of Pathological Research, Graduate School of Medicine and Dentistry, Okayama Univ. Both: Okayama, Japan.

[Jap]*

4265. Evans, Barry. 2004. Macrobiotic foods and miso in America today (Interview). *SoyaScan Notes*. Jan. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Macrobiotic foods is no longer a product category. Awareness of macrobiotics and macrobiotic foods among consumers has slowly but steadily declined over the past 10-15 years. Even though miso is historically a macrobiotic food, it has not benefited much, if at all, from the general uplift that all soyfoods have gotten in recent years. It is still an obscure food.

Many consumers also have a poor understanding of organic foods. Whole Foods did a survey recently which showed that the average Whole Foods shopper thought that every food product sold at Whole Foods was organically grown—otherwise Whole Foods would not carry it. This, of course, is incorrect.

Barry has had to struggle and struggle every step of the way to keep American Miso Company (AMC) viable: Its two big miso competitors are Westbrae (now owned by the Hain-Celestial empire) and Miyako / Cold Mountain (which has fixed past problems in its organic labeling so that it is now accurate). AMC was not profitable in 2003; the company is still having a terrible time making a profit. Two new miso products are Miso Master dressings (Sept. 2003) and corn miso. Alberts Organics (now owned by UNFI; their produce branch) has an exclusive on the miso dressings through the end of November, but they don't operate in California and the Pacific Northwest. The dressings have sold very slowly.

Great Eastern Sun (GES) has never presented itself as a macrobiotic company, but it has always carried a full line of macrobiotic products; the two most important product categories are miso (40% of business) and seaweeds (20%). GES now carries some products that are not macrobiotic—such as sugar and black tea. Address: Owner, American Miso Co., Inc. and Great Eastern Sun, Asheville, North Carolina 28806. Phone: 704-252-3090.

historical institutional analysis. CIRJE-F-284. www.e.u-tokyo.ac.jp/cirje/research/dp/2004/2004cf284.pdf. 20 + [8] p. March. [59 ref]

• **Summary:** Shinbo and Hasegawa (1988, p. 262-63) pointed out that in 1780 a *kabu nakama* [merchant coalition] of merchants trading soy sauce from other regions was established in Kyoto; it formed a distribution system for soy sauce from the other regions and brought about soy sauce production in Tatsuno. This is an example of how a merchant coalition can contribute to forming a distribution network (p. 12).

Commodities whose prices are known during the period 1800 to 1840 in Edo (Tokyo) and Osaka are unpolished rice, polished rice, barley, soybeans, raw cotton, wax, muscovado, miso, soy sauce, and saké (p. 12-13). Note: Muscovado (also “muscavado”) is unrefined or raw sugar obtained from the juice of the sugarcane by evaporation and draining off the molasses. Address: Faculty of Economics, Univ. of Tokyo.

• **Summary:** Includes 8 recipes.

4269. Belleme, John; Belleme, Jan. 2004. *The miso book: The art of cooking with miso*. Garden City Park, New York: Square One Publishers. vi + 182 p. May. Illust. Index. 23 x 19 cm.

• **Summary:** An attractive and informative vegetarian cookbook by two experts in the field. Contents: Acknowledgments. Introduction. Part I: All about miso. 1. Shedding light on miso: Introduction, what is miso?, making miso (traditionally made, naturally aged, temperature controlled), types of miso (determining quality, when used in cooking), preserving miso, the popularity grows. Sidebar: The miso master’s apprentice: Making miso in a traditional shop (John Belleme). 2. Miso medicine: Miso and western awareness, other early studies, isoflavones—soy food’s silver bullet, the role of fermentation, a link to lowered cholesterol, miso and blood pressure, a source of antioxidants, miso and breast cancer, miso and chronic pain reduction, miso and food allergies, miso and enhanced immune function, miso and osteoporosis, miso as a natural antacid, miso and essential

fatty acids, effectiveness of miso’s brown pigment, benefits of longer-aged miso varieties, what constitutes a health dose?, let tradition be your guide. Sidebars: Lowering high cholesterol: Conventional medicine or miso? A nutritional powerhouse. Miso, macrobiotics, and Chinese medicine. Breakfast of emperors: Making miso in a traditional factory. 3. Making miso at home. Part II: Cooking with miso. 4. Cooking guidelines. 5. Dips and spreads. 6. The salad bowl. 7. Soup for all seasons. 8. Sauce sensations. 9. Eat your vegetables! 10. Pasta east and west. 11. Grains and beans. 12. Seafood entrées. Address: P.O. Box 457, Saluda, North Carolina 28773.

4270. Davis, Robert. 2004. Dying to the Self. Leaving Good Karma Foods and moving to Nelson, British Columbia, Canada, to create a Safe Space and make miso (Interview). *SoyaScan Notes*. June 5. Conducted by William Shurtleff of Soyfoods Center.

Address: Founder, Good Karma Foods (GKF), 4527 Hilltop Drive, Clinton, Washington 98236.

4271. Kanner, Ellen. 2004. Final verdict is still not in on the benefits of soy. *Contra Costa Times*. Aug. 11. p. G7.

• **Summary:** Some of the suggested health benefits of soy include relief of the unpleasant symptoms of menopause and improved bone mass in older women. However, a year-long study published on July 7 in the *Journal of the American Medical Association* found that soy powder did not “increase bone density, lower cholesterol or improve memory in 175 post-menopausal women.”

The article suggests that the conditions of the study may not have been optimal; a longer study on younger women might have different results. Additionally, whole soy foods provide a better dose of isoflavones than soy pills or powder. The author seconds Andrew Weil’s recommendation of a daily helping of whole soy foods such as tofu, edamame, soy milk, miso, or soy nuts. Even if the isoflavones in soy don’t have miraculous health benefits, soy is still an excellent low-fat, affordable source of protein. Soy can also lower cholesterol and thus reduce the risk of heart disease. Address: Knight Ridder Newspapers.

4272. Corliss, Richard; Lemonick, Michael D. 2004. How to live to be 100: New research suggests that a long life is no accident. So what are the secrets of the world’s centenarians? *Time*. Aug. 30.

• **Summary:** Okinawans live long and healthy lives. Take Seiryu Toguchi, age 103. He wakes at 6 a.m. For breakfast, he enjoys whole-grain rice [brown rice] and miso soup with vegetables. Then he works for 2 hours weeding his fields. For lunch, he has “goya stir-fry with egg and tofu,” then naps for an hour or so and spends several hours in the field.

4273. **Product Name:** Mellow Organic Brown Rice Miso.

Manufacturer's Name: Tradition Miso.
Manufacturer's Address: R.R. #4-2090, Claremont, ON L1Y 1A1, Canada. Phone: 905-649-2513.

Date of Introduction: 2004. September.

Ingredients: Organic soybeans, organic brown rice, unrefined sundried sea salt [from Brittany, France], deep well water, culture (*Aspergillus oryzae*).

Wt/Vol., Packaging, Price: 450 gm glass jar.

How Stored: Refrigerated.

New Product–Documentation: Labels for Mellow Organic Brown Rice Miso brought to Soyinfo Center by Jerry Lewycky, Suzanne Cardinal, and their two kids, Katrina and Maxim. 2007. Jan. 2. Self adhesive. 2.6 by 10.5 inches. Black and reddish brown on peach. Product with this label first sold Dec. 2005. Product is certified organic by OCPRO Canada. The logo is still the black illustration of the monk. Letter (e-mail) from Jerry Lewycky (whose last name is pronounced luh-WIK-ee), founder and owner. 2007. Jan. 22. Jerry and his wife and co-worker Suzanne Cardinal, first began selling this miso on 13 Sept. 2004. "I used cut-up Brown Rice Miso labels with printed stickers for the first year."

4274. United Soybean Board 2004. Great health, great taste, everyday (Compact disc–CD-ROM). Jefferson City, Missouri. 50 p.

• **Summary:** "The United Soybean Board (USB) is pleased to share with you this 52-page meal-planning tool full of recipes and helpful tips for including soyfoods in your everyday diet. USB is dedicated to helping consumers learn more about the health and nutrition of soyfoods... On this CD-ROM, you'll find an interactive version of USB's *Great Health, Great Taste, Everyday* meal-planning tool."

Contains 21 recipes, most accompanied by a color photo. Includes: Corn and soy muffins. Miso marinade. Layered tofu salad. Oven roasted tofu. Tofu satay. Lemon miso dressing. Lemon tofu cheesecake. Strawberry smoothie. Tofu jalapeno poppers.

4275. Bruni, Frank. 2004. Restaurants: A paean to tofu in a Japanese pub. *New York Times*. Nov. 24. p. F8.

• **Summary:** This is a review of En Japanese Brasserie, a restaurant in Greenwich Village, New York City, which features artisanal tofu—as well as "its dynamic cousin yuba, which is the skimmed skin of heated soy milk, omelet-esque in texture. Yuba arguably has more character than plain tofu..." It also serves house-made miso pastes. Address: Japan.

4276. GEM Cultures. 2004. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437-4127. 10 p. Undated. [4 ref]

• **Summary:** Contents: Greetings from Northern California. Soycrafters section: Powdered tempeh starter, natto starter,

koji starters, fresh koji, seed miso, tofu boxes [kit], coagulants. Bread and crepe cultures: Cultured crepes, cool rise natural leaven, rice or rye sourdough. Dairy cultures: Fil mjolk (subs for piima), viili, kefir. Tea fungus–kombucha. Kitchen items: cheesecloth, super sealers. Ordering information. Address: Fort Bragg, California. Phone: 707-964-2922.

4277. Iowa Soybean Promotion Board. 2004. Simply soy: Recipes celebrating nature's perfect bean. Urbandale, Iowa: Iowa Soybean Promotion Board. 151 p. Illust. Index. 23 cm.

• **Summary:** A gorgeous book, filled with elegant, mouth-watering full-page color photos of prepared recipes. Contents: Introduction, by Linda Funk, Executive Director, The Soyfoods Council. 1. The magical bean: Soy to the world, soy and health, the soyfoods pantry (glossary incl. soybean oil, soymilk, tofu, tempeh, edamame, soynuts, soy flour, textured soy protein, canned soybeans, miso, soy protein powder {soy protein isolates}, dried soy flakes {MicroSoy}, soy yogurt and smoothies, soy pasta {ADM}). Soyfood nutrient chart. 2. Start it up with soy: Appetizers and nibbles. 3. On the sidelines: Sides and salads. 4. Spoon fed: Comforting soups and stews. 5. Vegetarian anyone? 6. Teamwork: Pork, beef, chicken, seafood and soy. 7. The bread box: Breads and muffins. 8. Desserts: Soy and spice and everything nice. 9. Cooking with kids. Resources (Directory of members of The Soyfoods Council and their soy products; Directory of state and national soybean boards).

A smoothie (p. 133) is made at home by combining 1 cup soymilk (plain or vanilla), ½ medium banana (may be frozen, if desired), and optional nondairy ingredients, such as chocolate syrup, peanut butter, fruit juice concentrate, or frozen fruits (alone or in combinations—pineapple, orange, cranberry, raspberry, etc.). "Many of the soy smoothies and soy yogurts on the market today are probiotic, meaning they contain active, live cultures that are beneficial to intestinal health." Address: 4554 N.W. 114th Street, Urbandale, Iowa 50322-5410. Phone: 866-431-9814.

4278. Belleme, John; Belleme, Jan; Spevack, Ysanne. 2004. The real taste of Japan: Using the finest ingredients. London: Cross Media Ltd. 155 p. Illust. 19 cm. *

• **Summary:** Written and published for Clearspring, a natural foods importer and distributor in London. Address: 1-2. Saluda, North Carolina.

4279. Ebine, Hideo. 2004. Industrialization of Japanese miso fermentation. In: Keith H. Steinkraus, ed. 2004. Industrialization of Indigenous Fermented Foods. 2nd ed. Revised and Expanded. New York, NY & Basel, Switzerland: Marcel Dekker. xix + 796 p. See p. 99-147. Chap. 2. [87 ref]

• **Summary:** Contents: Introduction. History and earliest known references to miso. Indigenous process: Raw materials used in ancient times. Industrial / Commercial production today. Contrast between indigenous and modern processing. Critical steps in manufacture / fermentation. Major problems in industrialization. Optimal environmental conditions for microorganisms. Essential microorganisms for fermentation. Possible spoilage microorganisms. Chemical / Biochemical changes in miso during fermentation. Changes in physiological functions during fermentation. Forecast of the role of miso in the future.

Foods similar to miso are made in other parts of East- and Southeast Asia. They are referred to as “jiang” in China, “doenjang” in Korea, “taucho” in Indonesia, and “tao-si” in the Philippines. Address: Professional Engineer, Shishitsuka, Tsuchiura, Ibaraki-ken, Japan.

4280. Fukushima, Danji. 2004. Industrialization of fermented soy sauce production centering around Japanese shoyu. In: Keith H. Steinkraus, ed. 2004. *Industrialization of Indigenous Fermented Foods*. 2nd ed. Revised and Expanded. New York, NY & Basel, Switzerland: Marcel Dekker. xix + 796 p. See p. 1-98. Chap. 1. [179 ref]

• **Summary:** Contents: Introduction. History: Historical development of soy sauce in China (Chiang, shih), introduction of soy sauce in Japan, origin of fermented soy sauce in the United States. Present soy sauce situation: Japan (types of soy sauce, manufacturing, flavor components and quality evaluation), China, Southeast Asia, United States. Change of soy sauce manufacturing methods from indigenous to modern processing: Treatment of soybeans and wheat as materials, koji fermentation, brine fermentation, pressing, pasteurization, refining and bottling. Microbiology and biochemistry: Role of koji as an enzyme source (unique source of enzymes, peptidases in koji, role of proteinases in koji during protein digestion, role of glutaminase in koji in formation of glutamic acid during protein digestion) effect of heat treatment of soybean proteins on their digestibility and nutritive value (enzyme digestibility and yield of soy sauce, enzyme digestibility and nutritive value of protein), microorganisms during brine fermentation in soy sauce (change of microflora during brine fermentation, properties of *Tetragenococcus halophilus*, properties of *Zygosaccharomyces rouxii*, properties of *Candida species*), safety of soy sauce and physiological functional properties (Studies of mycotoxins and safety of soy sauce, studies of mutagens and safety of soy sauce, long-term animal tests and anticarcinogenicity of soy sauce, other physiologically functional properties of soy sauce). Application of new technology for soy sauce manufacture: Manufacture of soy sauce through fermentation by bioreactor with immobilized whole cells, enzymatically hydrolyzed vegetable protein, breeding of koji mold through protoplast fusion. Forecast.

Contains 68 figures and 23 tables.

The section titled “Origin of fermented soy sauce in the United States” states (p. 10) that in 1907 a plant manufacturing fermented soy sauce was opened in the United States by Shinzaburo Mogi—a relative of the Mogi family of Kikkoman fame. Note: The author does not say where this plant was, nor does he cite an evidence to support his claim. As of Jan. 2005, Soyfoods Center has been unable to find any such evidence. “After that, another soy sauce company named Oriental Show-You Company was promoted in 1917 in Columbia City, Indiana.” Shinzaburo Mogi was one of the stockholders in this company. Shinzo Ohki, a Japanese man living in the USA, began to make regular (koikuchi) shoyu in the traditional Japanese way, and at one time was making 30,000 gallons/year. In 1961 the Oriental Show-You Co. was sold to Beatrice Foods, Inc. and subsequently became part of La Choy Food Products which was also owned by Beatrice.

Figure 12 (p. 28) shows imports of soy sauce to the USA from 1947 to 1981. This graph was taken, without citing the source, from: Shurtleff & Aoyagi. 1985. *Soyfoods Industry and Market*, 5th ed. p. 103.

Concerning the soy sauce market in the United States (p. 28-31): In 1973 Kikkoman opened its first plant to make fermented soy sauce at Walworth, Wisconsin. In 1998 Kikkoman opened a 2nd such plant in California. In 2001 these two Kikkoman plants made 85,000 kiloliters and 20,000 kiloliters (kL) of soy sauce respectively, for a total of 105,000 kL. To take advantage of the rapidly growing American market for soy sauce, several other foreign manufactures also opened plants making fermented soy sauce. In about 1980, Wan Ja Shan (Taiwan) opened a plant making regular Japanese-style soy sauce (koikuchi). In 1991 San-J (San Jirushi, Japan) opened a plant making tamari soy sauce. In 1994 Yamasa (Japan) opened a plant in Salem, Oregon. In 2001 the total annual production of these 3 plants was estimated at about 20,000 kL. In addition, HVP soy sauce (unfermented) is made and sold in the USA under brands such as La Choy, Chun King, and Aloha—with total production in 2001 estimated at 15,000 kL. Thus in 2001 total soy sauce production in the USA was estimated at 140,000 kL with the following market shares: Kikkoman 75%, 3 other makers of fermented soy sauce 14.2%, and HVP 10.7%. Figure 14 shows total U.S. consumption of soy sauce from 1950 to 2001, including total domestic production, total Kikkoman U.S. production. and total imports. Address: Noda Inst. for Scientific Research, Noda-shi, Japan.

4281. Grimaldi, Polly. 2004. Quick and easy soy and tofu recipes. Hayward, California: Bristol Publishing Enterprises. (A Nitty Gritty book). iv + 155 p. Illust. Index. 14 x 21 cm.

• **Summary:** Contents: 1. An introduction to tofu and soy. 2. Breakfast. 3. Entrees. 4. Side dishes. 5. Salads. 6. Soups. 7. Sauces, spreads, dips and snacks. 8. Breads. 9. Drinks. 10. Desserts. Address: Hayward, California.

4282. Hottinger, Greg. 2004. The best natural foods on the market today: A yuppie's guide to hippy food. Vol. I. Asheville, North Carolina: Huckleberry Mountain Press. 223 p. Index. 23 cm. [94 ref]

• **Summary:** This book looks very commercial because it mentions many natural products by brand name. We wonder if companies paid to be mentioned. Contains scattered recipes for branded products, and scattered sidebars titled "Hippie wisdom." Discusses: Almonds, almond butter, almond milk, American Miso Co., antibiotics (used in agriculture in 4 different ways; prevention, treatment, and control or disease, and growth promotion. In 1998 the European Union banned the use of antibiotics to promote growth in livestock. In Oct. 2000 the FDA proposed a ban on two antibiotics also used to treat humans), antioxidants, Bifidobacterium (bifidus), bovine growth hormone, bovine somatotropin (BST), Bragg Live Foods, Bragg Liquid Aminos, breast cancer, calcium, canola oil, celiac disease, cereal & Kellogg Brothers, cheese alternatives, dulse, edamame, Eden Foods (says "Eden Foods opened shop in 1968. By 1969 they were grinding their own flours and bottling their own oils and nut butters"), FDA, flaxseed oil, Galaxy Foods (says they "started in 1972 when founder Angelo Morini invented a new way to make a cheese product free of saturated fat, cholesterol, and the milk sugar, lactose"), genetically engineered foods, ghee, ginger, gluten sensitivity, glycemic index, GMO [genetically engineered] crops, Graham-Sylvester, heart disease, hippie foods, Horizon Organic, hormones, Lactobacillus, lactose intolerance, Lappe-Francis Moore, Lightlife Foods, magnesium, Maine Coast Sea Vegetables, Messina-Mark, milk-problems with, miso, Miso Master brand, nutritional yeast, oils, olive oil, omega-3 and omega-6 fatty acids, organic farming, palm oil, phytochemicals, phytoestrogens, prostate cancer, protein, Red Star nutritional yeast, quinoa, saturated fat, sodium, soymilk, soy products, soy sauce, soy supplements and concerns, soy yogurts, spelt, Stonyfield Farm, tahini, tamari, tempeh, trans fats (hydrogenated oils), WholeSoy Company. Near the back are many color coupons for the companies mentioned in the book by name. Address: MPH, RD, Asheville, North Carolina.

4283. Smith, Fiona. 2004. Easy sushi rolls and miso soup. London and New York: Ryland Peters & Small, Inc. 64 p. Illust. (Color photos by Diana Miller). Index. 20 x 20 cm.

• **Summary:** Contents: Serving sushi rolls. Cooking rice. Vegetarian. Fish and seafood. Meat and poultry. Miso soups. Accompaniments.

The page facing each recipe is a full-page color photo. Nori is used to wrap or roll most of sushi. Contains a selection of miso soup recipes that traditionally end a sushi meal: Dashi and combination miso soup. White miso soup with wakame, tofu and lettuce. Red miso soup with pork and noodles. Red miso soup with scallions and tempura croutons.

The vegetarian sushi recipes include: Miso-marinated asparagus roll. Broiled tofu roll. Address: Food writer and food stylist, New Zealand.

4284. Steinkraus, Keith H. ed. 2004. Industrialization of indigenous fermented foods. 2nd ed. Revised and expanded. New York, NY & Basel, Switzerland: Marcel Dekker. xix + 796 p. Illust. Pseudo-Index. 24 cm. Series: Food Science and Technology No. 136. [508 soy ref]

• **Summary:** This book contains the following chapters on soyfoods: 1. Industrialization of fermented soy sauce production centering around Japanese shoyu, by Danji Fukushima. 2. Industrialization of Japanese miso fermentation, by Hideo Ebine. 4. Industrialization of Japanese natto, by Kan Kiuchi and Sugio Watanabe. 11. Industrialization of tempeh fermentation, by Kapti Rahayu Kuswanto. 12. Tempe production in Japan, by Michio Kozaki. It also contains chapters on the industrialization of the production of sake, tapai, African beers, magehu, ogi, gari, Mexican pulque, Thai fish sauce (nam pla), Thai fermented fish and related products, and Myanmar fish paste and sauce.

The final chapter is titled "Industrialization of indigenous fermented food processes: Biotechnological aspects."

Soy-related chapters are also cited separately. Address: Inst. of Food Science, Cornell Univ., Geneva, New York.

• **Summary:** Contents: Illinois Center for Soy Foods. Bringing soy foods to the American table, the international

way. Why eat soy? Soy foods: Soy flour, soy protein isolate, soymilk, tofu (sidebar: What can you do with half a carton of tofu?), textured vegetable protein, edamame, black soybeans, soy nuts, tempeh, miso, soy analogs. Nutrient information. Purchasing soy foods. Recipes. One recipe per page. Contains many excellent full-page color photos (by David Riecks) of prepared dishes. Photos (p. 57) show: Marilyn Nash, Barbara Klein, Cheryl Sullivan, Megan Puzey, and David Riecks. Address: 1. PhD, Director, Illinois Center for Soy Foods, 170 National Soybean Research Center, 1101 Peabody Dr., Univ. of Illinois, Urbana, IL 61801. Phone: (212) 244-1706 or www.soyfoodsillinois.uiuc.edu.

4288. Pulmuone U.S.A. Inc. 2005. Pulmuone USA Inc. (Website printout-part). [Http://www.pulmuone-usa.com](http://www.pulmuone-usa.com). Printed Feb. 13.

• **Summary:** Contents: Home page. 1. Company. 2. Products. 3. Recipes. 4. Food Library. 5. Community. Atop the home page is the Pulmuone logo and the Soga logo. In large letters below the menu bar: "Welcome to Pulmuone. A plate full of nature." Below that in smaller letters: "Pulmuone brings out the nature to your meals: We at Pulmuone believe in bringing the foods as close to nature's way as possible, instead of making foods. To do so, Pulmuone adheres to the following principles; 1. Use only the very best grade raw materials. 2. Never use any artificial ingredients, flavors such as MSG or preservatives. 3. Maintain immaculate, state-of-the-art manufacturing processes." Below that, under the banner "New products," are color photos of the labels of a new line of Soga products in four flavors: Grilled & Marinated Tofu in Tomato Basil, Santa Fe Chili & Lime, Korean Barbecue, and Ginger Miso. Below that: "Pulmuone donates part of its profit to various environment preservation organizations." A window shows four "Pulmuone downloads: Pulmuone Annual Report 2002, Pulmuone IR, Pulmuone Group IR, Daewoo Security Analyst Report.

Under Company is a "Pulmuone History" (actually chronology). 1981 May-Pulmuone Organic Foods opened to sell organic vegetables from its own farm. 1984 May-Pulmuone Foods Co., Ltd. incorporated. 1984 June-Tofu and Bean Sprout Plant: Yangju, east of Seoul. 1986 Nov. Mineral spring water plant: Chungju, South of Seoul. 1987 May-Pulmuone Kimchi Museum, Seoul. 1988 Dec.-Natural House opened (Natural retail chain): Korea. 1989 Jan.-Pulmuone Food Standards Committee (Establish standards for food formula, ingredients and manufacturing process): Korea.

1990 Jan.-Soybean paste plant [jang] opened in Doan, south of Seoul. 1991 Jan.-Pulmuone U.S.A. Inc. founded. 1991 June-Fresh noodle plant: Chuncheon, northeast of Seoul. 1993 Aug.-Ilsongjung Foods Ltd., Korean-Chinese joint venture: China. 1995 June-Tofu Plant #1: South Gate,

California, USA. 1995 Sept.-ISO 9002 certificate obtained. 1995 Oct. IPO at KASEC. 2002 March-Tofu Plant #2: Tappan, New York, USA. 2002 Oct.-Soga Soy Foods Center (Research & development of soy foods). 2003 Aug. Tofu Plant #3: Fullerton, California, USA. A photo shows Pulmuone's headquarters in Fullerton, California. Caption: Pulmuone was founded in 1981 with 40 employees. It has grown to become a multinational company of 2,000 employees with annual sales of \$450 million. "The secret to success lies in uncompromising commitment to better foods and better life." Address: California.

4289. Narayan, Shoba. 2005. Amuse bouche: Food fight. *Time (Asia)*. Feb. 20.

• **Summary:** In the early 1990s, Singapore was in the avant-garde of the fusion food trend. "Some combinations were daring-such as naturally sweet cod fish and salty miso-but others were mediocre at best."

4290. Hikari Miso Co., Ltd. 2005. Shinshu miso: Hikari Miso (Brochure). 4848-1, Shimosuwa-machi, Suwa-gun, Nagano-ken 393-0041, Japan. 4 p. 30 cm.

• **Summary:** This handsome color brochure has a photo of a bowl of miso soup with tofu and snow peas on the cover. Contents: About the company and its location. Types and classification of miso. How miso is made. Miso's value as a health food.

Hikari Miso was founded in 1932. Their organic miso was introduced in 1988. The Shinshu area is currently known as Nagano prefecture. The company makes light miso (Shinshu miso), dark red miso, and kome-koji miso.

Photos show: (1) The 3 types of miso made by the company. (2) Inside of the automatic koji-making machine. (3) Multi-level automated warehouse. (4) The head office and the Iijima Green Plant. An outline map shows the location of Nagano Prefecture in Japan. Address: Shimosuwa-machi, Suwa-gun, Nagano-ken, Japan. Phone: +81 266-27-8848.

4293. Beech, Hannah. 2005. The wasted asset: Japan's gender crisis. *Time (Asia)*. Aug. 22.

• **Summary:** Cover story: "Japanese society... venerates the winner dog, the housewife who waits at home with a vat of miso soup for her husband and kids." It still doesn't have much respect for women who are single, childless, happy, affluent, and independent.

4294. Shurtleff, William; Aoyagi, Akiko. 2005. *Doufu zhi shu* [The book of tofu]. Taipei, Taiwan: Persimmon Cultural Enterprise Co., Ltd. viii + 270 p. Sept. 1. Illust. by Akiko Aoyagi. No index. 26 cm. [Chi]

• **Summary:** A very attractive, complex character, Chinese-language edition of *The Book of Tofu* (2nd ed. Ten Speed Press). Address: 1. Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

4295. United Soybean Board. 2005. Consumer attitudes about nutrition—Insights into nutrition, health and soyfoods: 12th annual national report. Seattle, Washington. 8 p. Sept.

• **Summary:** This 12th annual nationwide survey, commissioned by USB, was conducted in early 2005 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers, "providing a sample that is consistent with the total American population. The study's margin of error is ± 1.9 to 3.1 percentage points and has a confidence interval of 95%."

Contents: Introduction and methodology. Nutritional habits and obesity concerns. Healthy food decisions. Cooking oil impressions. Consumer attitudes about fats. Awareness, usage, and trial of soy products. Occasion preferences for consuming soy (Of consumers who use soy products at least once a month: Dinner 40%, breakfast 27%, lunch 23%, other times 10%). Soyfoods and health: Perceived healthfulness of soy products (78% say healthy, 17% neutral, 5% unhealthy), unaided awareness of health benefits of soy (prevent obesity / promote weight loss 17%, heart health 14%, menopause relief 12%, good protein

source 11%, cancer prevention 10%, reduced risk of osteoporosis 2%). Biotechnology [genetic engineering] in food and agriculture. Restaurants and soy products.

Perceptions of biotech and food: 46% (up from 39% last year) of consumers consider themselves at least somewhat familiar with biotechnology." Of this group, 62% "report a positive perception of its role in food production."

Perceptions of biotech in agriculture: Of that 46% who are at least somewhat familiar with biotechnology: 33% feel that its role within agriculture is to improve the nutritional make-up of crops, 25% don't know enough about biotech to say what role it plays, 13% think that biotech enables farmers to use fewer pesticides, herbicides, and toxins, 13% have a negative perception, other 4%.

Restaurants and soy: A new question added to the survey this year shows that 20% of consumers would order soy products in restaurants if they were available. Types of soy actually ordered in restaurants: Plain white tofu 37%, veggie burger 28%, soymilk 11%, miso 11%, edamame 10%, other products 19%.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com/health_nutrition/pdf/.

4296. Toyama, Michiko. 2005. Nobu: Japan's celebrity chef to the stars. *Time (Asia)*. Oct. 3.

• **Summary:** This is part of a cover story titled "Asia's heroes." Nobu, a humble sushi chef from Saitama, has become one of the biggest names in the restaurant world. Of course it helps that Nobu's business partner is Robert De Niro, whose favorite recipe (made by Nobu) is "black cod with miso."

4297. Barrett, Walter. 2005. Work with soybeans in Central Asia (Interview). *SoyaScan Notes*. Oct. 4 and 6. Conducted by William Shurtleff of Soyfoods Center. Preceded by letter (e-mail) of Oct. 3.

• **Summary:** Walter has worked with soybeans in 4 Central Asian nations: Kazakhstan, Uzbekistan, Turkmenistan, and Tajikistan. Kazakhstan and Georgia have the most history with commercial soybean production, because Soviet planners made it happen there. They designated other Central Asian countries for cotton production, in part because cotton needs less water. Latitude is part of the reason. The climate is also very dry, so that all soybeans (and almost all crops) in these countries must be irrigated, but with river water carried by gravity. Of all the Central Asian countries, Kazakhstan has been the most successful at understanding a market economy and making it work.

Walter has many contacts in these countries. He is willing to help Shurtleff try to get a better history of soybeans in each of these countries. First, Shurtleff will send Walter an e-mail containing a table showing the dates he has for the earliest document seen showing soybeans in

each in each country, and soybean cultivation in each country. Then the earliest date seen for soybean cultivation in each country. Walter will forward this e-mail to an intermediary (Winrock International or Mercy Corps), who will then mail or phone or hand deliver the message to the network of indigenous researchers Walter has developed over the years. The message will encourage them to contact other researchers who might be interested; then Walter will wait for replies.

Walter believes that Korean communities in at least four of these countries (Turkmenistan, Uzbekistan, southern Kazakhstan, and Tajikistan) were growing soybeans for their own use at an early date—probably since the early 1900s and using them almost entirely for food—such as tofu, soy sprouts, Korean-style miso and soy sauce, green vegetable soybeans, etc. The Koreans raise chickens, for example, but they forage for food and are not fed soybeans. Walter has no idea when, or, why, or how these many Korean communities came to be established in Central Asia. He has no idea where the varieties they grow came from. These Korean communities are all found within a horizontal oval that cuts across national boundaries, and includes the cities of Almaty [Alma-Ata] (in southwest Kazakhstan), Tashkent [Tashkent] (capital of Kyrgyzstan), Dushanbe (capital of Tajikistan), and Ashgabat (capital of Turkmenistan). In this area are numerous Korean restaurants where Walter has eaten; but he has no idea how many Koreans live in this area. Most individual Korean communities grew only one variety, but each Korean community had its own variety. By contrast, there are not many Chinese communities in these areas.

Walter expects his next trip to Central Asia to be in the spring of 2006—probably Uzbekistan and possibly Turkmenistan or Tajikistan. He is given drivers and interpreters by the NGO sponsoring his trip. One of the ongoing problems he faces is the limited abilities of interpreters; communication is often difficult, and it is hard to pursue agricultural or academic questions with farmers. It is less difficult with educated researchers or academicians (best is Tajikistan, followed by Turkmenistan—who might help find others). The researchers in these countries don't talk much with each other, either within a country or among countries. They have few opportunities to travel, and little access to the Internet or e-mail. This is because of government restrictions, difficulty of getting visas or money, etc. Researchers are lucky if they have a working computer, but most have a telephone and some have a cell-phone.

Of all Central Asian countries, Kazakhstan is the one in which the soybean is the most important as a commercial crop—by far. They probably have at least several thousand hectares planted to soybeans. The soybeans in Kazakhstan are run through an extruder (extrusion cooker) to make soybean oil and meal. These same extruders are also used to

process cottonseed. Soybeans are grown in Central Asia largely because of the demand for meal by the local poultry industry for use in chicken feeds. Poultry is the driving force, and Central Asia is a “protein-poor” region. Walter's main reason for being there is because of poultry and (to a lesser extent) livestock; it is to help educate them about the soybean, its value for producing soybean meal and oil, and about the importance of protein. He helps farmers to grow soybeans and to develop markets for their beans. Actually, there is a ready-made market from poultry growers—who now have to pay a lot of freight to import their soybeans from Kazakhstan, Iran, Turkey, or India. The key is for Walter to serve as the bridge—to help bring the poultry growers and the potential soybean farmers together, to discover that they have a common interest, and then to work out agreements.

NGOs do lots of impact studies; they want their volunteers to work on projects that will have economic impact. They believe that increasing poultry production will have a positive impact on the economy and the people. The oil is also appreciated, and refined using modern technology within each country for use as a high-quality edible oil, sold in bottles at retail stores. Kazakhstan is about one-half the size of the United States, and is quite a progressive country with a market economy, fairly advanced education and technology. Soybeans are grown mostly in the very south. They were major crop during Soviet times (Russia was a major market for the oil and meal), but after Kazakhstan became independent in 1990, soybean production fell off to near zero. The economies of Central Asian countries plunged at about the same time (1989-91). They are now slowing getting back to where they once were.

The second most important country for soybeans (a very distant second, with maybe 300-500 hectares planted to soybeans) is the Republic of Georgia, where the western half is quite moist and the eastern half is very dry. They have a long history of growing soybeans. Walter knows of one company there that is processing soybeans using an extrusion cooker (similar to that made by Insta-Pro).

In third place might be Uzbekistan, followed by Turkmenistan, and Tajikistan—but all with only about several hundred hectares in soybeans.

Walter believes that soybeans could become a valuable double crop in Central Asia, planted after the wheat harvest in June. That would earn farmers more income, improve the soil, and break various insect and disease cycles. They need a legume in the rotation. The government does not help. They seem interested only in short term profit, keeping the status quo, and staying in power, not in innovation or long-term thinking.

In Tajikistan, he met a village farmer, Mr. Mahmaddullo, who had the ability to build machines. He already had a small business making wheat flour using two motor-powered millstones. He worked with Walter to build a

revolving soybean drum roaster; the outside was heated by natural-gas flames. After roasting a batch of about 20-25 kg of soybeans, he ground them into flour.

In Turkmenistan, Dr. Ashraf spent quite a bit of time working with a Korean community in the town of Dashoguz in making tofu. She also worked a lot with Peace Corps Volunteers (PCVs) in that same town; one of the PCVs was a Korean-American. Walter has not heard of any TVP being made in Central Asia; if its is made, it must be in very small quantity. In Uzbekistan, technologically the most developed, soybeans are being grown—often spread by volunteers. Address: 2804 Trent Drive, Fort Wayne, Indiana 46815. Phone: 260-484-7493.

4298. Shurtleff, William; Aoyagi, Akiko. 2005. *Wei ceng zhi shu* [The book of miso]. Taipei, Taiwan: Persimmon Cultural Enterprise Co., Ltd. 280 p. Nov. 14. Illust. by Akiko Aoyagi. No index. 26 cm. [Chi]

• **Summary:** A very attractive, complex character, Chinese-language edition of *The Book of Miso*. Address: 1. Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

4299. Richmond, Akasha. 2005. *Hollywood dish: More than 150 delicious, healthy recipes from Hollywood's Chef to the Stars*. New York, NY: Avery—A member of the Penguin Group (USA) Inc. xi + 310 p. Illust. Index. 25 x 20 cm. [125 ref]

• **Summary:** One of the most original and interesting cookbooks seen in decades. This book, originally titled *Healthy Hollywood*, is much more than just a collection of superb recipes and stories about Hollywood celebrities and glitterati. In carefully researched and well-written sidebars, it documents the history of health foods in Hollywood and southern California. The introduction to each chapter tells the history of that type of food, and every recipe has a long and interesting historical headnote. The acknowledgments show vividly Chef Akasha's high and wide circle of Hollywood friends. The introduction—"The Road to Hollywood" tells the story of how Akasha got interested in and researched this subject. History is woven into every page of this book—in the most palatable way. In short, this is a cookbook with a remarkable tale to tell—one to read and study—as well as one to cook from.

Sidebars and illustrations: (1): "The stars and the Hollywood Diet"—Sue Carol (lovely future wife of Alan Ladd) on the cover of *Motion Picture* magazine, Oct. 1929. (2) Mildred Lager (1908-1960). (3) Harry Chandler (1864-1944). (4) Granola (Layton Gentry, Adelle Davis, Dorothea Van Gundy Jones). (5) Photo of silent film star Anita King eating Sun Maid Raisin Pie, 1916. (6) Adelle Davis (1904-1974). (7) Clarke Irvine, 1892-1975. (8) Photo of Radiant Radish health food store, owned by Beach Boy Brian Wilson, Los Angeles, 1969. (9) Otto Carque, 1867-1935, with a photo of his health wagon, around 1912. (10)

Gayelord Hauser (1895-1984). (11) "Nature Boy"—Bill Pester and the 1948 hit song by Eden Ahbez. (12) The Ashram—Hollywood restaurant founded by Anne-Marie Bennstrom. (13) The Hollywood diet, with a photo of page 1 of the "18-Day Diet" from *Motion Picture* magazine, Oct. 1929. The sidebar begins: "The first best-selling diet book in America, *Diet and Health, with a Key to the Calories*, was written by Los Angeles-based Dr. Lulu Hunt Peters in 1918, and sold over 2 million copies. The book introduced the concept of counting calories." (14) Alan Hooker (1902-1993). The grandfather of California cuisine, he opened the Ranch House restaurant in 1956 in Ojai, California. (15) Gloria Swanson—Hollywood's Green Goddess. She "was the highest paid and most popular, influential star of the 1920s." (16) Jim Baker (1922-1975). A pioneering organic restaurateur, he Opened the Aware Inn in 1957, then the Source restaurant in 1969. (17) Raw, raw, raw (Arnold Ehret, Vera and John Richter, and raw foods). (18) Photo of silent film star Mary Pickford drinking orange juice made with Sunkist fruit and juicer. (19) The godfather of fitness—Jack LaLanne. Master chef Danny Kaye (1913-1987). (20) The Farmer's Market in Los Angeles, started in 1934. (21) Paul Bragg (1881-1976), with photo of Rita Hayworth on the cover of his *Health Builder* magazine. (22) Books and cooks—"150 Recipes of the Stars" (1928), Helen Evans Brown. (23) Health foods—Dr. John Harvey Kellogg, the rise of health food sections in the late 1800s in L.A. department stores, the rise of health food stores, Sandy Gooch. (24) Mae West (1893-1980). *Gypsy Boots* (1914-2004). Photo of Boots and Paul Bragg. (25) Food and film. (25) Photo of Donna Reed and Paul Bragg, sometime in the 1950s. (26) Bernarr Macfadden (1868-1955). (27) Celebrity stew and Leo Pearlstein. (28) Vegetables, fruits, and nuts (incl. Frieda Caplan, Albert's Organics). (28) Rancho La Puerta and the Golden Door. Photo of young Burt Lancaster baking bread at La Puerta. (29) Fred Waring (1900-1984), the blender, and smoothies. (30) Hain Pure Foods. "Harold Hain opened his first health food store in downtown Los Angeles on October 17, 1926." (31) Swamis and yogis. Paramahansa Yogananda arrived in L.A. in 1925; he advocated a healthy vegetarian diet, including in his magazine *East West*, first issued in 1926. On 8 April 1951 he opened SRF India Café at his India House compound on Sunset Boulevard. "Yogi Bhajan (1930-2004) came to Los Angeles in 1969, bringing the teachings of Kundalini Yoga and his own unique style of Indian and Ayurvedic cooking. In 1974 his students opened Golden Temple Conscious Cookery in Los Angeles. I [Akasha] was a cook there from 1979 to 1984..."

Soyfoods are used in recipes (and recipe titles) throughout this book: Edamame of fresh green soybeans (used in 2 recipes), miso (1 recipe), soymilk (many, especially in place of milk in desserts, incl. "Chocolate Jack Daniel's soy gelato" and "Soya chocolate" milk), soy flour

(1, Bill Baker's bread), soybeans (whole, 1, "Soybean casserole), tofu (10), and tempeh (4).

Also discusses: Sophie and Harry Cubbison (p. 47), El Molino Mills (p. 106). Early veggie burgers (p. 106). Silk soy milk and Steve Demos (p. 266).

The recipes in this book are largely vegetarian (including 17 vegetarian main dishes), all call for organically grown ingredients, and many are dairy-free (using soy milk instead of cow's milk). However: Beef (used in 2 recipes, incl. "Filet mignon Japanese"). Pork (used in 1 recipe, "Citrus roasted pork chops with rosemary potatoes"). Chicken (used in 6 recipes, incl. "Endive petals with curried chicken salad"). Turkey and duck (3 recipes). Fish (many recipes as for cod, halibut, salmon, whitefish). Shellfish (crab, scallops, shrimp).

Talk with Akasha Richmond, who calls. 2005. Dec. 7. Her favorite parts of the book are: The smoothie story. Otto Carque. Gloria Swanson. Yogis and Swamis, Granola. She is very happy with everything about the way the book and its promotion turned out ("It looks great")—except she wishes she could have included more photos. Address: Los Angeles, California.

4300. Andoh, Elizabeth. 2005. Washoku: Recipes from the Japanese home kitchen. Berkeley, California: Ten Speed Press. vii + 320 p. Illust. (many color). Index. 25 x 25 cm. • **Summary:** A beautiful book. Contains a section titled "Tofu and eggs" (p. 268-93), plus many recipes that use miso, shoyu, edamame, kinako, and amazake. Address: Japan.

4301. Fu, Peimei. 2005. Peimei shi pu. Di er ce [Pei Mei's Chinese cook book. Vol. II]. Taipei, Taiwan: Ju zi wen hua shi ye you xian gong si. 386 p. Illust. (color). No index. 22 cm. [Chi; Eng]

• **Summary:** Fu Pei Mei is considered by many Chinese to be one of the best Chinese chefs alive today. This book, which first appeared in July 1974, contains 110 recipes categorized by ingredients under 11 separate headings, such as chicken, duck, pork, beef, fish, shrimp and seafood. The majority of the recipes in this book are based on meat, poultry, fish or eggs (animal products). Contents: Foreword. Introduction. About the Chinese menu. About Chinese condiments and spices: Glossary includes: 1. Soysauce (made from fermented soybeans, comes in light, medium, and dark colors. Kikkoman is a good example of medium). 9. Hot bean paste ("Made from red hot peppers, flour, soybeans, salt, and other condiments"). 11. MSG. 18. Bean curd. 19. Dried bean curd sheets (skin). 20. Bean sprouts (mung or soy). 21. Bean pastes ("Thick brown pastes prepared from soy bean flour and flavorings. Sweet types have sugar added and resemble pureed dates"). 22. Sweet red bean paste ("Made from red [azuki] beans. Almost all Chinese desserts use this for the filling. Mash the cooked

beans in a strainer. The paste will come out leaving the skin"). Contents of recipes. Abbreviations, weights & measures. Contents of color photos. Index of recipes Vol. I. English-Chinese list of foodstuffs. About the author. Copyright.

Seating: The guest of honor sits in the seat at the inner side of the room, facing the entrance, while the seats on the serving side are for the host and hostess. The guest of honor always sits facing the host (p. 10).

After the "abbreviations" page are 4 full-page numbered color photos of Chinese tableware, vegetables, special ingredients, and Chinese individual place setting used in this book, and the numbered name of each item, in both Chinese and English, facing the photo. Among the vegetables is: 27. Fresh soybean (*maodou*). Among the special ingredients is: 2. Beancurd sheet (*doufu-pi*). 14. Bean curd threads (*gansi*). 21. Bean curd (*doufu*). 26. Fermented black [soy] beans.

For every recipe there is a large (often full-page) color photo with the recipe name in Chinese and English, and the page number of the recipe. All the recipe photos come in a block before the recipes themselves. Each Chinese recipe is on the left page of the 2-page spread, and its English counterpart is on the right page. The ingredients for each recipe are in two rows at the top, in exactly the same relative place, to make finding the Chinese characters easy.

Recipes include: Braised soysauce duck (p. 157). Spareribs with fermented black beans (*Shih chih p'ai ku*, p. 177). Shredded pork with bean sauce (*Ching chiang jou szu*, with 2 tablespoons "sweet bean paste," *t'ien mien chiang* [pinyin: *tian mian jiang*], and soysauce, p. 186-87). Diced fish with fermented black beans (*Shih chih yü ch'iu*, p. 216-17). Steamed fish with fermented black beans and hot pepper (*Tou shih la chiao cheng yü*, with 2 tablespoons *dou shih* / fermented dried black beans," p. 226-27).

The chapter titled "Egg and bean curd" (p. 256-75) contains 10 recipes. Examples of the descriptions of bean curd in the ingredients listing are: "6 squares bean curd (3" x 3")." "8 pcs. [pieces] bean curd (1" x 2" x 1")." "4 pcs. tender bean curd (3" x 3")." "10 oz. thin dried bean curd strips" (*gansi*). On p. 276 is a half-page description of bean curd and related products.

More recipes: Assorted vegetarian dish (*Lo han chai*, with "1 bean curd stick," *fu chu / fuzhu* [bamboo yuba], p. 289). Spinach and bean curd soup (*Po ts'ai tou fu keng*, p. 317). Chicken, ham and shrimp with bean curd shreds soup (*San hsien kan szu t'ang*, p. 319). Yu-T'iau ([crullers] p. 335). Noodles with minced pork and bean sauce (*Pei fan cha chiang mien*, with *maodou* / green beans, p. 339). Fried taro dumplings with sweet bean filling (*Tou sha yü tsao*, with "sweet [azuki] bean paste," p. 349).

A good portrait photo of Miss Fu appears on p. 371. Taiwan's popular T.V. chef, she "is also a producer and director. She has demonstrated over 600 different recipes

from 1964 to the present. In 1955 Pei Mei's Chinese Cooking Institute was founded, In 1962 Taiwan's first television station was established. She accepted an offer to teach a demonstration cooking program once a week, starting in 1967. In 1969 she wrote her first volume, *Pei Mei's Chinese Cookbook*. The dishes were divided according to the geographical areas of China—North, East, South, and West. In 1977 Miss Fu began a weekly program on Japanese television.

The copyright page states that this book was published in the 80th year, 9th month of the Chinese calendar. Address: Cooking teacher, Taipei, Taiwan.

4302. Fu, Peimei. 2005. Peimei shi pu. Di san ce [Pei Mei's Chinese cook book. Vol. III]. Taipei, Taiwan: Ju zi wen hua shi ye you xian gong si. 388 p. Illust. (color). 22 cm. [Chi; Eng]

• **Summary:** Chinese cooking can be divided clearly into five major schools or branches: Shanghainese, Cantonese, Szechuanese, Peking-style, and Hunanese. These correspond roughly to Eastern, Southern, Western, Northern, and Central China. This 3rd volume, containing 130 recipes, consists of nine complete formal Chinese banquet dinners from different provinces: Kiangche (Shanghai style), Canton, Szuchuan [Szechwan], Peiping, Hunan, Fuk-ien, Taiwan, Vegetarian style, and Buffet dinner.

The number of special ingredients in the numbered color photo has been increased to 47 from 32. Interesting new ingredients include: 29. Sweet red bean paste [azuki]. 31. Green sea weed. 32. Laver [sheets of nori]. 34. Fresh bean curd skin. 35. Dried bean stick [dried bamboo yuba, fuzhu]. 36. Bean curd sheets. 37. Bean curd, dried. 39. Wheat gluten. 40. Steamed wheat gluten. 41. Fried gluten puff.

The basic format of this book is quite similar to that of Vol. II, but the color photos of recipes are arranged together in a group of about 12 pages at the beginning of each of the nine sections, and quite a few pages have two recipes per page.

Recipes include: Sauteed black mushrooms with soy sauce (p. 35). Stir-fried crab with bean sauce (*Chiang pao ch'ing shieh*, with 1 tablespoon "sweet soy bean paste" / *t'ien mien chiang* / *tian mian jiang*, p. 46-47). Stewed beef with hot bean sauce (*Yu hsiang nyu nan*, with 1 tablespoon "hot bean paste," (*la dou ban jiang*), p. 122-23).

The introduction to the section on vegetarian dishes notes: "Centuries ago in China, devout Buddhists and Taoists followed a strictly vegetarian diet, in keeping with their religious sanctions against the killing of sentient beings." The recipes in this section call for: Soy sauce (almost all). Soy bean soup stock (p. 313). Wheat gluten sticks (*su chang*) (each of which is made by rolling up a big sheet of wheat gluten, p. 315). Pieces of steamed wheat gluten and Pressed bean curd (*dou fu gan*) (p. 317). Cooked

green vegetable soybeans (*shu mao dou*, p. 323). Sheets of bean curd skin, fresh or dried [*yuba*] (*toufu p'i* / *dou fu pi*, p. 323, 325, 331). Shredded dried bean curd (p. 327). Bean curd (p. 328).

More recipes: Braised beef with brown sauce (with 1 tablespoon "hot bean paste" (*la dou ban jiang*) and ½ tablespoon "soybean paste" (*tian mian jiang*), p. 360-61). Sautéed bean curd balls (p. 369). Two good portrait photos of Fu Pei Mei appear on page 296. Address: Cooking teacher, Taipei, Taiwan.

4303. Hellmiss, Margot. 2005. Mit Soja durch die Wechseljahre [Using soy through the menopause years]. Munich, Germany: Suedwest Verlag. 96 p. Illust. (color). Index. 20 x 18 cm. [Ger]

• **Summary:** An attractive book, with many fine color photos on glossy paper. Contents: Soybeans—Tradition and history (Healing plant from China): Productive source of protein, tofu—quark with a longer tradition, triumphal procession around the world, great economic significance, soya and genetic engineering. Fundamental changes of the menopause years (What happens during these years?): Hormonal changes, the right attitude helps, the new understanding of women, many hormones influence the body, men also experience menopause, questionable preparations, Hormone Replacement Therapy—Pros and cons. Natural help from soy isoflavones (remarkable phytoestrogens): The active agent of plant hormones, the effectiveness of isoflavones, natural SERMs, safeguard against osteoporosis, estrogen protects the circulatory system, soy hormones as free-radical catchers, the end of hot flashes, strong powers of resistance and smooth skin, isoflavones will take good care of you.

Soyfoods that contain isoflavones (A great variety): Whole dry soybeans, soymilk, tofu, soy oil, soy flour (*Sojamehl*), soy flakes (*Sojaflocken*), soy bran (*Sojakleie*), tempeh, natto, soy granules, soy sauce, shoyu and tamari, miso, lignans. Soybeans: A powerful package for your health (Plant protein as an alternative): Indispensable protein, lecithin, minerals, B vitamins for strong nerves, vitamin E—the fountain of youth. Recipes for enjoying soya (Basic recipes): Hors d'oeuvres and salads, soups, pasta, main dishes, sauces, dips, and bread spreads, mueslis, desserts, and backed goods, beverages.

Address: Japan.

4305. Khachatourians, George G.; Arora, Dilip P.; Bera, Randy M. eds. 2005. Applied mycology and biotechnology.

Vol. 5: Genes and genomics. Amsterdam, New York: Elsevier. 428 p. See p. 163. *

• **Summary:** Contents: Fermented soybean products: Korean kanjang and doenjang: Page 162: The ripening of *kanjang* mash in the brine is ended in 1-2 months... Fig. 12 is a combination and flowsheet showing the process of making Korean kanjang and doenjang.

4306. Mullin, W.J. 2005. Miso as a functional food. In: John Shi, C.-T. Ho, and F. Shahidi. 2005. Asian Functional Foods. Boca Raton, Florida: CRC Press. xxi + 647 p. See p. 537-53. Chap. 19. [34 ref]

• **Summary:** Contents: Introduction. Raw materials: Soybeans (preferred qualities), rice, barley, salt, water, [yeast and] bacterial cultures (halophilic yeasts: *Zygosaccharomyces rouxii*, *Candida versalitis*; lactic-acid producing bacteria: *Tetragenococcus halophilus*), koji starter (*tane-koji*). Processing technology: Organoleptic properties. Nutritional properties. Standards and regulations.

Of the macronutrients in soybeans, the carbohydrate content is the most important, particularly the level of oligosaccharides.

Page 242: Traditionally, making miso was a family operation that took place after the fall harvest; the food was preserved in times of plenty, which were followed by times of uncertainty in the food supply.

Miso cooperatives: The system of miso cooperatives is very well organized. Local cooperatives throughout Japan are organized into 51 unions, and these are grouped into eight national blocs based on geographical location. The blocs have joined to form a national organization called the Japan Federation of Miso Manufacturers Cooperatives (JFMMC) [*Zenkoku Miso Kogyo Kyodo Kumiai Rengokai*], with headquarters in Tokyo. JFMMC represents about 1,400 miso manufacturers of all sizes. All miso makers are eligible to become members of the local organization, and the vast majority take advantage of the membership, which can provide many benefits. "The JFMMC operates the Central Miso Research Institute, which conducts basic research, tests new domestic and imported varieties, troubleshoots processing problems, and prepares and distributes cultures for fermentation." The JFMMC is very active in public relations and publicity; it also sponsors research into the health benefits and nutritional value of miso. It publishes an annual report which includes detailed statistics on miso production in Japan, as well as discoveries based on new miso research.

Annual miso competitions are held at the local and national level to keep miso in the spotlight; they do much to maintain and improve the quality of miso. Most take place in the fall, with the national JFMMC competition held last of all in early November in Tokyo—a climax of the miso production year. "The competitions are keenly contested with several hundred entries and are widely reported in the

national and local media." "Winning a class can be of great promotional benefit to the winner." New uses for miso are also on display with leading chefs preparing dishes that are offered to members of the JFMMC, competition participants, and to the media. Address: Agriculture and Agri-Food Canada, Ottawa, Ontario, Canada.

Address: Japan.

4308. Park, Kun-Young; Jung, Keun-Ok. 2005. Fermented soybean products as functional foods: Functional properties of doenjang (fermented soybean paste). In: John Shi, C.-T. Ho, and F. Shahidi. 2005. Asian Functional Foods. Boca Raton, Florida: CRC Press. xxi + 647 p. See p. 555-96. Chap. 20. [121 ref]

• **Summary:** Contents: Introduction. History of Korean soybean fermented foods. Manufacturing methods and characteristics of doenjang fermentation. Functional properties of doenjang: Nutritional and functional components in soybean and doenjang, safety of doenjang, antimutagenic activity of doenjang. Anticancer effect of doenjang. Increased chemopreventive effect of doenjang: Antioxidant effects, reduced cardiovascular diseases (fibrinolytic effect {as in chungkookjang and natto which secrete strong fibrinolytic enzymes}, antihypertensive effects, reduced serum cholesterol level), other possible functions of doenjang. Conclusion.

Doenjang is "Korean fermented soy paste" and kanjang is Korean-style fermented soy sauce that is obtained by filtering off the liquid from doenjang. "Historically soybeans and processed soybean foods have been the main protein sources in the Korean diet" (p. 555). "The medicinal functions of doenjang were first described in the *Dongeuibogam* [*Dongui Bogam* (RR), *Tongui Pogam* (MR)] (1613 A.D.), which was a popular traditional Korean medical text" [no citation given].

The section titled "History of Korean soybean fermented foods" contains what promise to be a number references to early and possibly very interesting documents that mention soybeans and soyfoods in Korea. Yet the authors fail to cite any of them properly, so for the time being, we must accept their account of what the documents say. The problems are: (1) None of these documents (except one, Ref. #46) is cited in the long list of references at the end of the chapter. (2) The title of all these documents is given only in Korean, even though at least two should have Chinese titles; one of those two (described as "The Chinese agricultural technology book, *Jeminyosul* {A.D. 530 to 550} written by a governor, Maaeunsa,...") is actually the famous *Qimin*

Yaoshu, by Jia Sixie. (3) We are never told in what language the original document referred to is written. (4) The page number(s) on which the ancient, important information appears is not given for any of these documents. (5) For some documents no date is given, whereas for others no author is given. (6) It is not clear what names were used to refer to each of the various soyfoods in the original documents. (7) The authors never tell us whether they examined the original document, or read a contemporary version, or simply got the information from a secondary source.

For example (all dates are A.D.): 99—It has been reported [by what document?] that soybeans were cultivated—Where were they cultivated?

530-550—The *Jeminyosul [Quimin Yaoshu]* states (in Chinese) that shi [soy nuggets], soybeans fermented with bacteria, in Korea were disseminated to China and Japan.

683 Feb.—An article [no title given] by King Sinmoon, that appeared in the 3rd year of his reign (during the Silla dynasty), mentioned the words *jang* (mold-fermented soybeans) and *shi* (bacteria-fermented soybeans).

701—*Daeboyulryong* mentioned the words *jang*, *shi*, and *maljang*, which referred to soybean products.

739—*Jungchang Wonmooseu* also mentioned the word *maljang*.

Donga (no date given), which was written by Shinjungbaesuk (is that the writer's real name?) in Japan, "indicated that *maljang* was imported from Korye (the old name of Korea);" it was renamed "miso" (Source: Ref. #46—35th Chronicle of Korea Soy Sauce Industrial Cooperative. 1997. Seoul. p. 27-32). Korean *jang* is said to have developed into traditional Japanese miso using *meju* made of soybeans and rice instead of *maljang*, which was made from soybeans only.

918-1392—During the Korye [Goryeo] dynasty, [in Korea] the name "*maljang*" changed to "*maejyo*" and then to "*meju*" [meaning soybean koji in the shape of balls or cones]; it was soaked in brine in a clay pot and ripened [then filtered]. The liquid was called *kanjang* (soy sauce) and the solid sediment was called *doenjang* (soy paste).

1613—*Donguebogam* [see above], written by Hurjun, described how to make medicinal *doenjang* using soybeans and how to fix soured *doenjang*.

1760—*Jungbosan Limkyunge*, written by Yojungim, "introduced 45 different processing methods for soybean foods, describing how many days fermentation for *jang*, selection of water, salt quality, how to handle the pottery, fixing *jang* with an off-taste, etc."

1790 ca.—*Kyuhap Chongseo*, written by Madam Lee (lived 1759-1824) described the proper methods for making the various types of *jang* in great detail.

1930 ca.—Commercial production of fermented soybean products ("jang" in Korean) started in Japanese-built *jang*

factories in Korea during the occupation (1909-1945) to supply soybean products for the Japanese in Japan.

1945—After gaining independence from Japan, Koreans took over the factories. Since the Korean war (1950-1953) military personnel and people living in large cities have mostly consumed commercial fermented soybean products, whereas families living in rural areas still prepare their own. Address: Pusan National University, Busan, Korea.

4309. Shi, John; Ho, Chi-Tang; Shahidi, Fereidoon. 2005. *Asian functional foods*. Boca Raton, Florida: CRC Press. xxi + 647 p. Illust. Index. 24 cm. Series: Nutraceutical Science and Technology.

• **Summary:** Contents: Preface. About the editors. Series introduction. Contributors. Table of contents. 1. Functional foods and their impact on nutrition and health: Opportunities in the Asia Pacific... Contains two chapters on fermented soyfoods (Chap. 19, Miso, and Chap. 20, Doenjang) which are cited separately.

The Preface begins (p. v): "Health and 'healing' foods have a long history in Asian cultures." Asians such as the Chinese and Indians have long known that food and medicine come from the same source; they can treat illnesses and build a healthy life. Since ancient times, Chinese have compiled a remarkable amount of information about the materia medica, the use of natural substances—plants, animals, and chemical—to treat illness.

Kudzu (*Pueraria lobata, ge geng*), one of the earliest medicinal plants used in traditional Chinese herbal medicine, is discussed on pages 83-86.

In chapter 7 titled "Traditional Functional Foods in Korea," the section on "Fermented soybean foods" (p. 165-66) states that typical daily per capita consumption of these foods are: Soy sauce 20 ml, soy paste 20 gm, and hot soy paste 10 gm. In recent years there has been a decrease in soy intake due to increased use of Western seasonings such as mayonnaise, tomato ketchup, meat sauces, etc.

In Chapter 8, titled "Evolution of Korean dietary culture and health food concepts," the section on "Food as medicine" begins (p. 210): In traditional Korean culture, food was regarded as the basic source of health. It was believed that all diseases could be cured by foods. Korean knowledge of the medicinal effects of foods came, not through the sciences of nutrition, medicine, chemistry, or physiology, but through long human experience. Moreover, a key practice and discipline has long been to eat only when hungry, and not to overeat. The enormous size of the health food market in Korea today reflects the country's long tradition of 'food as medicine.'"

Page 229: "Micronutrients." Asian fish sauces are good sources of vitamin B-12 (cobalamine) because they are made from animal protein. Fish sauce from Thailand contains 1.91 mcg (micrograms) per 100 ml. This amount protects the Thai population from megaloblastic anemia

caused by vitamin B-12 deficiency. The estimated average requirement for vitamin B-12 is only 2 mcg per day. However fermented soybean sauce contains very little (0.14 mcg per 100 ml); the small amount present is attributed to microbial synthesis.

Page 230: “The high salt problem.” Japanese men rank highest in daily per capita sodium intake at 5.4 gm; the United States, Thailand, and New Zealand each average about 3.9 gm.—72% as much. Some cultures consume as little as 0.69 gm / day.

Pages 248-49: “Future potential for fish sauce.” It is unclear whether fish sauce was first developed in Asia or Europe. But while it has vanished in Europe, it has become a thriving industry in Southeast Asia—perhaps because the extensive use of bland-tasting rice requires a salty and tasty protein-rich seasoning. Several species of anchovy are the preferred raw material for fish sauce. Some say that soy sauce was first developed in Japan. Address: 1. Research Scientist, Federal Dep. of Agriculture and Agri-Food Canada, Ottawa, Ontario, Canada; 2. Rutgers Univ., Rutgers, New Jersey; 3. Memorial Univ. of Newfoundland, St. John’s, Newfoundland, Canada.

4310. Shipp, Steve. comp. 2005. North Korea in quotation: A worldwide dictionary, 1948-2004. Jefferson, North Carolina: McFarland & Co., Inc. v + 384 p. See p. 149. 25 cm. [1 soy ref]

• **Summary:** The chapter on “Kim Il Sung” states (p. 149) that he can be found in every village, town, and city of North Korea. He is everywhere!—even “simply averring (in the National Folk Museum) that ‘Koreans can hardly be Korean if they don’t eat *toenjang*’ (fermented bean paste).”

Quoted from: Cummings, Bruce. 1997. *Korea’s Place in the Sun: A Modern History* (Observation in 1997).

4311. Gandhi, A.P. 2006. The ‘greater bean’: Scientists continue to find new food and industrial uses for soybeans. *World Grain* 24(2):59-62. Feb.

• **Summary:** About 70% of world soybean production is crushed to make oil and meal, 20% is used directly for food, and the rest for seeds. Soybean meal used for human food “must be devoid of residual solvents that may cause various psychological disorders in humans. The International Standard Organization (ISO) recommends a maximum level of 50 parts per million (ppm) of residual hexane, which is used in the solvent extraction process.”

A pie chart shows world soybean production in 2004.

4312. **Product Name:** Tempeh (bulk for Restaurants and Institutions).

Manufacturer’s Name: Arto Moro Inc.

Manufacturer’s Address: 125 N.W. 23rd Ave. #17, Gainesville, FL 32601. Phone: 352-226-5561..

Date of Introduction: 2006. March.

Ingredients: Organic soybeans, water, tempeh culture (*Rhizopus oligosporus*).

Wt/Vol., Packaging, Price: Frozen: 5 x 4 lb cakes, or 10 x 2 lb cakes (20 lb per package).

New Product–Documentation: Talk with Sam Guy. 2008. Dec. 29. His son is Art and the tempeh business was Art’s idea. First Art bought a microbrewery, then a small restaurant in the early 1990s. He started making tempeh for the restaurant. The tempeh did well, so he sold the restaurant (which is still in business) to focus on the tempeh. For the first 3-4 months they sold their tempeh only locally, in Gainesville; then they expanded to Jacksonville and Tallahassee. His son delivers his tempeh locally on a bicycle—which has attracted media attention. The business provides detailed nutritional, health inspection, and microbiological info on its product; this as made it possible to attract large customers, such as Aramark food service, a university cafeteria, Mexican restaurants, and vegetarian restaurants. Their tempeh is frozen but not pasteurized. Sam’s two favorite ways of serving tempeh: (1) Saute squares in olive oil with miso. (2) Little chunks of crispy fried tempeh in a salad with Mandarin orange pieces, cranberries, walnuts, and Veganaise.

Artie’s Tempeh Burgers color postcard. The front has a bold heading with a large photo of the burger and a rayed sun in the background. Text: “Artie’s Tempeh is made the traditional way, using a slow fermentation method unlike any other commercial varieties.” On the rear is a “Nutritional facts” panel, the company address (factory) and phone number, the ingredients, and round logo, and “12 oz. A vegan food.”

4313. Source Foods. 2006. Source Foods: Organic miso makers (Website printout—part). [Http://www.miso.co.uk](http://www.miso.co.uk). Printed May 12. [Eng]

• **Summary:** Home: New products. Miso products. How miso is made. Recipes. Info link. Various links.

Home: Source Foods started making Miso Mustard & Wild Horseradish in 1988 and in 1991 the first production of Miso began a whole new way of miso. Organic ingredients have always been a priority. Reducing the sea salt content a mission. We use whole brown rice, soy and also use local ingredients e.g., Field bean & Barley Miso, Hemp Miso, and soon Organic Soy beans from UK. We Do Not Use Genetically Manipulated Crops as Ingredients.

New products: Instant Miso Soup. Oh So Organic Yummo Sesame Miso (240 gm). Low Salt Organic Miso (Sweet Brown Rice & Soy, Mellow Brown Rice & Soy). Herbs of the Sea is a mix of nori, dulse, and sea lettuce [not a type of miso].

Miso products (Organic fresh live miso, handmade in Wales): Misos are sold in 213g/240g yogurt style pots with clip lid for retail and bulk 500g upwards packed in simple plain plastic bag. Organic Solo Low Sodium Sea Salt

Brown Rice Miso. Organic Solo Low Sodium Sea Salt Mellow Brown Miso. Organic Sweet Brown Miso. Organic Mellow Brown Miso. Organic Mellow Barley Miso. Organic Mellow Field Bean Barley Miso. Organic Ginger Miso. Organic Mex Chilli Miso. Organic Hemp Miso. Address: 9 Cwm, Business Centre, Marine Street, Cwm, Ebbw vale, NP3 6TB, Wales, UK.

4314. Aihara, Cornellia. 2006. The secret of cooking, from *The Do of Cooking. Macrobiotics Today (Oroville, California)* 46(3):22-27. May/June.

• **Summary:** Contents: Eat locally grown foods in season. Do not waste. The yin yang game / principle in selection of foods. The three stages of cooking (beginner, skillful, master). Don't hurry. Basic suggestions (Main foods should be whole grains. For seasonings use traditional, naturally fermented miso and soy sauce. Tekka, gomashio, hiziki [hijiki], shio kombu). Condiments and spices (incl. soy sauce and miso). Food combination (based on yin and yang). Lunchbox and other tips. Kitchen hints.

Photos show: (1) Portrait of Cornellia. (2) Lima Ohsawa and Cornellia standing together. (3) Cornellia teaching foot massage to David Hammon.

4315. Thottam, Jyoti 2006. Catering to the melting pot. *Time*. June 12. Published online only.

• **Summary:** David Overton is founder and CEO of the Cheesecake Factory—a famous chain of restaurants that begin in Beverly Hills in 1978. Overton is changing the way America eats, by traveling the world with a team of experts to find the most delicious recipes. A man of Falstaffian proportions, he is famous for his fine taste—and business abilities. “Not everyone can afford the \$30 miso-glazed black cod made famous by Nobu, but the Cheesecake Factory’s best-selling miso salmon is only \$18 and three times the size.”

4316. United Soybean Board (USB). 2006. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 13th annual national report. Seattle, Washington. 8 p. Oct. 28 cm.

• **Summary:** The methodology used in this survey changed significantly in 2006. Previously, random telephone interviews were completed with 1,000 consumers. This year an online self-administered survey was used. “Conducted by an independent research firm [in Seattle, Washington] in February and March 2006, the study includes 1,000 random surveys, providing a sample that is consistent with the total American population. The study’s margin of error remains \pm 1.9 to 3.1%, with a confidence interval of 95 percent.”

Contents: Introduction. Methodology. About USB. Nutritional habits and obesity concerns. Healthy food decisions. Cooking oil impressions. Consumer attitudes about fats. Awareness and usage of soy products. Occasion

preferences for consuming soy. Restaurants and soy products. Soyfoods in health.

Awareness and usage: 30% of Americans consume soyfoods or soy beverages once a month or more. A table shows the “Top 20 soy products by awareness.” Soymilk 87%. Soybean oil 61%. Soy veggie burger 60%. Plain white tofu 59%. Soy infant formula 44%. Soy nuts 43%. Soy latte 35% (Soymilk in espresso coffee drinks [as at Starbucks]). Soy protein bars 32%. Soy hot dogs 30%. Soy yogurt 29%. Dried or canned soybeans 29%. Soy flour 28%. Soy ice cream / cheese 28%. Cereal bar / Energy bar 28%. Flavored / Marinated tofu 26%. Miso 24%. Soy supplements 23%. Soy breakfast cereal 23%. Textured soy protein. Edamame 17%. All others mentioned 12% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 40%, breakfast 29%, lunch 22%, mid-morning snack 16%, mid-afternoon snack 16%, etc.

Soy products ordered in restaurants: Soy veggie burger 29%. Tofu 29%. Soymilk 28%. Miso 14%. Edamame 8%. Tofu (prepared) 6%, etc.

“In 2006, 82% of consumers rate soy products as healthy, significantly more than in previous years” (78% in 2005, 74% in 2004, 67% in 1998). Why? Low-fat profile 20%. Protein content 15%. Heart health 15%. Cholesterol-lowering properties 12%. “Being good for you” 10%. “A lactose-free option 10%.”

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com/health_nutrition/pdf/.

4317. Hymowitz, Ted. 2006. Why did the West (Europe and the Middle East) know so little about China in the 12th and 13th centuries? (Interview). *SoyaScan Notes*. Sept. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Because the Arabs blocked most European travel over the Silk Road / Route from about the 7th century until the 12th or 13th century. The Arab conquest blocked the overland route, in part to control the trade. There were actually two phases in the history of the Silk Road. The first phase ended in about the 6th or 7th century, before the origin of Islam.

Note: Both of these “Silk Roads” was actually a series of interconnected routes than ran from about Xian (Chang’an) in eastern China, along the northern part of China, branching into today’s Central Asia, south of the Caspian Sea, through today’s Turkmenistan, Iran (formerly Persia), and Iraq, to Damascus (today’s Syria) and Antioch (in today’s Turkey). The first famous and documented Chinese traveler, Zhang Qian (W.-G. Chang Ch’ien) led two expeditions to the Western Regions in the 2nd century BC, during the Former / Western Han dynasty.

As early as the 1st century AD, there were already some oceanic routes that were part of the “Silk Road.” They

hugged the coast from central China, around India, into the Persian Gulf and the Red Sea, then on to Italy!

This Arab blockade was one of the reasons for the search for a water route to China. The blockade began to fail as sea routes were developed. For example, in May 1498, Vasco da Gama was the first European to discover a sea route to India.

Another reason it took so long for information about the soybean to reach Europe from China was that the soybean is unlike rice, wheat, and maize / corn, where the product of the crop is associated very closely with what is growing in the field; everyone knows what rice, wheat and corn look like because they are so widely consumed as food. The main products of the soybean, especially those in commerce (such as soy sauce), bear no resemblance to the seed or plant from which they are made. It took a long time before Europeans realized that soy sauce (for example), which was known in Europe by the late 1600s, was made from the soybean—which did not arrive in Europe until the late 1730s. Even in Asia, the various names of the soybean were very different from the names of its major products. For example in China: Soybean is *dadou* or *huangdou*, soy sauce is *jiangyou*, tofu is *doufu*, and soymilk is *dounai* or *doujiang*. In Japan: Soybean is *daizu*, soy sauce is *shoyu*, tofu is *tofu*, soymilk is *tonyu*, miso is *miso*, natto is *natto*, and green vegetable soybeans are *edamamé*. In Indonesia, *tempé* is *tempé*. Even in the Western World today, many of these traditional foods and condiments do not have “soy” as part of their name. Moreover, the foods look totally different from the seed / bean from which they are made.

The first European to understand the connection between the soybean and its products was Engelbert Kaempfer; he made this clear in his book *Amoenitatum exoticarum...* vol. 5. Yet most Westerners did not understand this connection until more than a century later, and quite a few even today don't realize that tofu (for example) is made from soybeans.

Ted is convinced that Marco Polo and the various early Western missionaries who traveled to China probably tasted soyfoods over and over again—but they didn't realize they were made from soybeans. A good example is milk. The early Western travelers in China often mentioned that Chinese drank milk; in some cases they were probably drinking soymilk. Address: Prof. of Plant Genetics (retired), Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

4318. *SoyaScan Notes*. 2006. Another dimension of the macrobiotic and natural foods movements: Preserving traditional ways of making foods (Overview). Oct. 10. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** George Ohsawa, and the founders of Nippon C.I. and Muso Shokuhin—both Japanese-run companies based in Japan—were the first to seek out these Japanese

makers of traditional foods. Soon Mr. Akiyoshi Kazama, founder of Mitoku Trading Co., joined them in the search.

In the mid-1960s, Paul Hawken of Erewhon went to Japan to find and place orders from companies and craftspeople who made foods in the traditional, natural way. Many of these companies were facing financial difficulties as modernization was sweeping Japan, and this new business and new market gave them a new lease on life.

Phase 2 began when companies in the USA and Europe started making Japanese foods (such as miso) and European foods (such as whole wheat bread) in the traditional, natural way.

4319. Dee, Joel. 2006. History and present status of Edward & Sons Trading Co. (his company) and of his work with miso and tamari (Interview). *SoyaScan Notes*. Oct. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** A far-ranging interview on his many important innovations and success. Joel appears to have been the first person in the Western world to add flavor to soy sauce, with Lemon Tamari (Aug. 1985), Ginger Tamari (Feb. 1988), and many other related products.

Joel developed the Premier Japan line because he believed the two main importers from Japan (Eden Foods and Westbrae) both defined their market too narrowly—as macrobiotic. He soon came up with the tagline “Traditional Gourmet,” just as the specialty foods market was taking off in the USA. But the macrobiotics criticized this line as not being “medicinal quality” so it never took off in the macro or natural foods markets.

Joel does not supply Trader Joe's with their Instant Miso Soup; he is not at liberty to reveal the name of the supplier. The TJ product contains dextrose, clam extract, and bonito powder (all for flavor) which Joel's Miso Cup does not contain.

The main segments of his company are now: Soy seasonings (miso and tamari), rice crackers, organic canned foods (coconut milk, pineapple, etc.), candy, and baked goods. Address: President, P.O. Box 1326, Carpinteria, California 93014-1326. Phone: 805-684-8500.

4320. Budra, Beth. 2006. Magic miso: A guide to Japanese soybean pastes and how to use them. *San Francisco Chronicle*. Nov. 1. p. F1, F6.

• **Summary:** “In my quest to make the most of miso, I turned to Ayaki [sic, Ayako] Iino, who teaches Japanese cooking classes in the East Bay” (www.ayakoiino.com). The title of p. F6 is “Discovering the secrets of miso.” Gives the names of some miso varieties and their uses. Contains recipes for: Orange almond miso vinaigrette. Miso-broiled black cod. Sesame-miso dipping sauce (with Japanese sesame paste, tahini, or natural peanut butter, and sweet white miso).

4321. Itoi, Lydia. 2006. A Zen palette. *Time (Europe and Asia)*. Nov. 20 and 27.

• **Summary:** Umu is London's most ambitious kaiseki restaurant. Executive chef Ichiro Kubota goes to great lengths to bring the refined taste of Kyoto to the land of fish and chips. "Dishes like sesame tofu are nods to Kyoto's Buddhist vegetarian cuisine. At the end comes the spiritual heart of the meal: rice, pickles and the best miso soup around."

4322. Mutual Trading Co., Inc. 2006. *Kyôdô Bôeki K.K. 80 nenshi: Nihon no aji o sekai no hitobito ni* [Mutual Trading Company, Inc.: An eighty years' journey]. Los Angeles, California. 56 p. 28 cm. [Eng; Jap]

• **Summary:** This excellent history of Mutual Trading Co. (MTC) is divided into two parts, each written in both Japanese and English on facing pages. Part I is the general company history (p. 1-27). Part II is the very interesting "Chronology" (p. 28-56), which starts in 1635 (the year of Japan's self-imposed national isolation and ban on Japanese traveling abroad), contains numerous photos, and gives a chronology of the company in the context of major world events, with an "Economic overview" for each year from 1996 to 2006. On page 56 are two large bar graphs related to Mutual Trading Co. Group: (1) Annual sales from 1950 to 2005. (2) No. of employees in 5-year periods from 1950 to 2005. The inside rear cover give the contact information for MTC's 9 offices in the USA (6), Hawaii (1), and Japan (2).

Located in Los Angeles, Mutual was a pioneer in bringing Japanese foods to America. See also the company's 70th anniversary history. Address: 431 Crocker St., Los Angeles, California 90013. Phone: 213-626-9458.

4323. **Product Name:** Miso-Cup: Japanese Restaurant Style Natural Instant Soup (Soft-Pack Miso Soup).

Manufacturer's Name: Edward & Sons Trading Co., Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 1326, Carpinteria, CA 93014.

Date of Introduction: 2006. December.

Ingredients: Soft-Pack: Organic miso (Organic soybeans, cultured organic rice, sea salt, yeast), water, kombu seaweed extract, salt, shiitake mushroom extract, onion powder, yeast extract, alcohol. Tofu and vegetable packet. Freeze dried tofu (water, soybeans, calcium sulfate, rice starch), wakame seaweed, freeze-dried green onions.

Wt/Vol., Packaging, Price: Three 8-oz. servings.

How Stored: Shelf stable.

New Product-Documentation: Product with Label sent by Joel Dee of Edward and sons. 2006. Dec. 8. Gusseted plastic stand-up pack 6 by 7.75 inches. Green, yellow and white on red and black. A color photo on the front shows a bowl of miso soup. A small illustration to right of bowl

shows a Japanese lady serving miso soup. Text on front panel: "Made with organic miso. 3 individual servings. Convenience without compromise. 60 calories per serving. No MSG. Vegan logo. Gluten-free logo. Delicious miso soup-To go. Just add hot water. Back panel text. The story of miso cup. Directions. Source: The Book of Miso by Shurtleff & Aoyagi, Ten Speed Press. Ingredients. Copyright Edward & Sons Trading Co., Inc. a vegetarian company." Nutrition facts. Special offer for Miso-Cup Travel Mug.

4324. Golbitz, Peter; Jordan, Joe. 2006. Soyfoods: Market and products. In: Mian A. Riaz, ed. 2006. *Soy Applications in Food*. Boca Raton, Florida, London, New York: CRC Press (Taylor & Francis Group). [x] + 288 p. See p. 1-21.

• **Summary:** Contents: History of soyfoods: Growth and development in the Western world, soybean industry blossoms in the United States, soybeans grow around the world. Soybean production and utilization for food: Soyfoods in Asia, soyfoods in Europe, soyfoods in Africa, soyfoods in the United States: Development of the U.S. soyfoods industry, Americanization of soyfoods. Soybean nutritional components: Soy protein, soy oil, carbohydrates and fiber, vitamins and minerals, isoflavones. Soyfoods and protein ingredients: Whole dry soybeans, tofu, soymilk, tempeh, soymilk yogurt, miso, soy sauce, okara, natto, soynuts, meat alternatives, cheese alternatives, nondairy frozen desserts, green vegetable soybeans (edamame), soy sprouts, full-fat soy flour, defatted soy flour, textured soy flour, soy protein concentrate, soy protein isolate.

Conclusions.

Tables: (1) World soybean production by major producers. (2) Annual per capita consumption (2001) of soybeans for direct food. (3) U.S. soyfoods market (1996 to 2005).

This chapter suffers from a lack of references, and contains several basic errors concerning the early history of the soybean. Contrary to what Mr. Golbitz says: (1) The Chinese have not considered the soybean a basic source of nutrition for almost 5000 years (see Hymowitz 1970, "On the domestication of the soybean"). (2) The first reference to soybeans in Chinese literature does not date back to 2853 B.C. (see Hymowitz 1970, and Hymowitz and Shurtleff 2005, "Debunking soybean myths and legends in the historical and popular literature"). (3) Natto was not developed at least 3000 years ago in Japan (the earliest known document that mentions natto dates from 1450 CE— or about 560 years ago). Address: Soyatech, Inc., Bar Harbour, Maine.

4325. Chalmers, Elizabeth. 2007. Business history of the Chalmers family: Making soyfoods in New Zealand (Interview). *SoyaScan Notes*. Jan. 16. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** At Easter 1980 Rick & Elizabeth Chalmers, together with Rick's brother Greg (his formal name is "Stephen"), opened Harvest Wholefoods, 403 Richmond Road, Grey Lynn, Auckland. They borrowed the money from Elizabeth's mother, and were all equal owners. It was New Zealand's first wholefoods / natural foods store as well as the country's first macrobiotic foods retail store. They were idealists and purists, refusing to sell any vitamins, or minerals, or dairy products.

They started the store partly as a result of becoming interested in macrobiotics, and partly because Elizabeth and Rick had a 3 year old son (Daniel) who could not tolerate dairy products. As the Chalmers could not get the food they wanted anywhere, they thought that they would open a shop to also provide it to others. Moreover, Greg, who had been overseas in London (where he had worked in a restaurant) and the USA, was a pioneer in bringing macrobiotics to New Zealand. "He brought home miso and some seaweeds—foods we had never seen before."

After about six months, in Oct. 1980, in order to attract customers to the shop, they started to make nigari tofu (for their own store only) in a small room at the back of the store, designated just for that purpose. They made the simple equipment themselves, and they learned the process from *The Book of Tofu*, by Shurtleff and Aoyagi.

After another six months they were inundated with other store owners, and cafe & restaurant owners from all over New Zealand wanting to buy their tofu. "It was just amazing." The tofu was completely unpackaged and they sold under water it in bulk buckets only. So in about April 1981 they started to sell their tofu outside of Harvest Whole Foods. "Sometimes they would pick it up, and sometimes we would deliver it."

Sanitarium Health Food Co. was making many kinds of breakfast cereals and canned nut meats, but no soyfoods. Several Chinese restaurants were making tofu (they called it "bean curd"), but only for use in their own restaurants; they did not sell it elsewhere. One of these was named Sun Sun, located in Khyber Pass, Auckland.

Their daughter, Jesse, was born on 1st October 1981, and by this time it was becoming difficult to manage both the shop and making tofu. So they sold the shop and with the capital gained they brought in special tofu making equipment from Japan, moved to new premises at 1 Wallingford St., Auckland, and started Harvest Soyfoods. Harvest Whole Foods is still at its same original location today; it is going strong and doing well financially.

Harvest Soyfoods' first product was nigari tofu; to this they soon added Tofu Spreads (Feb. 1981) then Tempeh (April 1981). The business grew very rapidly, and during this period Greg also had a child, so they all had very young children and were trying to manage their lives as well as an extremely rapidly increasing business.

Greg's partner decided that she wanted to leave Auckland, and as they could not picture another partner in his place and were feeling very overloaded anyway they decided in 1983 to sell the business to Paul and Trevor Johnston, who renamed it Bean Supreme. The Johnstons paid half the money at the time of sale and the remainder a year later; Elizabeth and Rick Chalmers worked for the Johnstons during that year. This business is also still in existence, although it was bought out by Sanitarium Health Food Co. in about Aug. 1986. Note: Trevor is no longer with the company; Paul sold the company to Sanitarium Health Foods.

From 1983 to 1986 Rick and Elizabeth had a commercial cleaning business, which suited the family structure very well, but was very unsatisfying workwise and environmentally.

In about 1980 or 1981 Austin Holden had started a largely macrobiotic import and wholesale business, Kiaora Naturals, at 374 West Coast Road, Glen Eden, in west Auckland. Holden soon started a very small shop in the corner of his warehouse and called it East West Wholefoods. For the first few years, his only customer was Harvest Wholefoods. "We kept him going."

Then in 1986 Rick and Elizabeth started East West Organics, taking over the building (and business) formerly occupied by Austin Holden and Kiaora Naturals. They knocked out all the walls, resulting in a much larger shop that specialised in organic food, with a big emphasis on fruit and vegetables.

They had no intention of making soyfoods. However there was suddenly an influx of Asian immigrants to New Zealand and Asian Tofu (usually made with calcium sulfate in aluminum pots) became widely available. By this time organics was really growing in New Zealand. Elizabeth and Rick wanted to stock organic tofu in their store, but they couldn't find a source. They talked with Trevor and Paul Johnston about making it for them, but the brothers felt there was no future in it, so they declined to do it.

So in 1996 Elizabeth and Rick started The Organic Soy Company, again in a small food factory out the back of East West Organics. They started making nigari tofu again—for their own store only. For the first time, they started to use organic soybeans, and as many other organic ingredients as they needed and could get. "We were right back where we started. And then exactly the same thing happened again. Once the word got out that organic nigari tofu was available again, people started coming from everywhere to buy it. It was not our intention to get back into the soyfoods business; we'd already sold our company. But we wanted the quality, so we had to make it ourselves." East West Organics is still operating today, although out of new premises (outgrew old one), and has just moved up the road slightly.

Their son Daniel joined them in January 1998, and in October of 1998, they sold East West Organics and moved

the Organic Soy Company to their current premises at Unit A, 2 Corban Avenue, Henderson, Auckland.

Elizabeth and Rick separated the same year, but continued on in the family business together. In 2001 their daughter Jesse returned from Europe and also joined us in the business. Later that same year Rick left the business to go to University and currently, Elizabeth, Daniel and Jesse are in joint ownership, with Rick still having a 10% share. They started using the brand names (the first being Tonzu) in 2002.

The business is growing slowly, currently producing tofu, tempeh, soy yoghurt, tofu burgers and teriyaki sauce, all 100% organic. Elizabeth has moved to part time as the younger generation are taking on the responsibility for the business. They currently have 3 full time employees as well as themselves, so are still reasonably small.

“We see a great future for the business and will probably outgrow our current premises within the next few years. We love making traditional soy products, and eventually hope to make miso and tamari, which will be export products as well as for the domestic market.”

First sold commercially by the organic soy company: Tofu (1996), Teriyaki Tofu (1999), Tempeh (1999), Tofu Burgers (2001), Teriyaki sauce (2003).

All current labels and packaging are new, and have changed very much from the original. They once made two tofu spreads, one teriyaki and the other curry flavour. However it was hard to get a good enough shelf life out of them to make them viable, so reluctantly they discontinued them. They have also changed their burgers significantly. When they first produced a burger in 2001, they had 3 varieties: Garlic and Cheese, Sundried Tomato, and Feta, and Vegan. They have discontinued them all and now just make one that is actually Vegan, although they do not call it that. The burgers did not sell well; they are not certain why that was, maybe they were too expensive with all the organic ingredients and very labour intensive. So they have simplified and streamlined our current burger making the whole process more viable.

As the population of the whole of New Zealand is around 4 million and only 15% of them are vegetarian, they are playing to quite a small market, this can sometimes be quite a challenge. In the long term it will be sensible to develop products that they can export. Address: Founder and owner, The Organic Soy Company, Ltd., Unit A, 2 Corban Ave., Henderson, Waitakere, Auckland 0612, New Zealand. Phone: +64 9 835 3617.

4326. Conklin, Dave. 2007. History of Japanese food in Portland, Oregon until 1941 (Interview). *SoyaScan Notes*. March 23. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Dave is writing his master’s thesis at Portland State University on the social history of Japanese food in

Oregon; it looks at the Japanese culture through the lens of food. He has been reading Japanese-language newspapers in Portland and he found an ad that mentioned Ota Tofu (at 86½ N. 5th Street, Portland) on 1 Jan. 1915 in the *Oshû Nippô* (*The Oregon News*). It mentions “Ota Kyodai” (Ota brothers), as if they owned the shop at that time. The newspaper started about 1908 and was published in Portland 6 days a week, usually 6 pages per issue, and he found the 1915 issues on a roll of microfilm from the University of Washington. This special New Year’s Day issue was about 30 pages long. He has most issues of the *Oshu Nippo* printed between 1917 and 1928. Using a grant, they were recently put on a CD for the Oregon Nikkei Legacy Center in Portland (NW 2nd St.); they are not digitized. The center is open most weekdays. Becky Patchett is the archivist.

After the Japanese invaded Manchuria and China in the 1930s, there was a great deal of conflict between Japanese and Chinese in Portland. The children would have to walk to school on opposite sides of the street. They weren’t allowed to play with each other. However certain Chinese grocers would still sell particular foods, such as bean sprouts, to Japanese customers. The Japanese wouldn’t eat at the Chinese restaurants—maybe because they wouldn’t be served. So Japanese restaurants started serving Chinese food. In the 1920s *Shina udon* (“China noodles,” which we now call “ramen noodles”) was common in all the Japanese restaurants—as shown by ads. But by the late 1930s this food was no longer mentioned in ads by Japanese restaurants.

Dave is also interested in how American anti-Japanese racism played out through food. In 1924 Congress passed the National Origins Act (also known as the Immigration Act of 1924, the Asian Exclusion Act, or the Johnson-Reed Act). A sweeping law to keep out “undesirables,” it limited the number of immigrants who could be admitted from any country in any given year to 2% of the number of people from that country living in the United States in 1890, according to the 1890 U.S. census. Essentially, it put an end to all immigration from Asia. Moreover, all Asians were forbidden from being naturalized as citizens, and it had the effect of preventing Japanese Americans from legally owning land. From 1924 on anti-Japanese racism rose steadily in the USA even though Japanese were making huge contributions to American life and the economy in areas such as farming. They also paid taxes. The Seattle City Council [in Washington state], for example, passed laws attempting to put Chinese hog farmers out of existence. Other laws made it illegal for Japanese to fish for salmon in the Columbia River, or to obtain hunting licenses. The whole Pacific oyster industry came from Japan; laws shut it down. Dave is not sure why they did this. It could have been resentment that they were successful, or it could have been harassment.

Nobuo Harada is a leading Japanese food scholar, who writes mostly in Japanese; his focus is the mid-Edo period. He has one article in English titled "Culinary Culture and its Transmission in the Late Edo Period," in *Written Texts–Visual Texts: Woodblock-Printed Media in Early Modern Japan*, edited by Susanne Formanek and Sepp Linhart (2005, p. 141-158).

Dave has studied numerous editions of *Zaibei Nippon-jin Kan (Directory of Japanese in the USA)*, published by Shin Sekai-sha. The 1912 edition is at Waseda University in Tokyo. The 1916, 1928, and 1936 editions are at University of Washington (Seattle). Several other universities (UCLA, Univ. of Oregon) also have the 1936 edition. He has not seen the 1922 ed.

Another interesting source of information are the old guide books for coming to the USA; they were published in Japan, mostly in Japanese but with some English-language ads from hotels, food suppliers and importers, and labor contractors in the USA. Until 1912 the rice consumed in Oregon was grown in either Hawaii or Japan; then in 1912 Japanese-style rice started to be grown in commercial quantities in and around Sacramento, California. Rice had been milled in California since about the 1860s.

Hood River is a city on the Columbia River about 60 miles east of Portland. The Yasui Brothers Store (a general store) existed in Hood River from about 1907 until the internment in 1941. The store was the center of the Japanese community. Masuo Yasui, who owned the store with his brother, never threw any documents away for his entire life. He kept order sheets, cancelled checks, letters, telegrams—everything. These documents are now at the Oregon Historical Society, but they are just starting to be cataloged. Several scholarly books about this Yasui family have been published in English, such as *Stubborn Twig: Three Generations in the Life of a Japanese American Family*, by Lauren Kessler (1993).

Early soyfoods manufacturers in Portland that David has found include: (1) Asahi Tofu, 52 North 3rd St. Source: Oshû Nippo. 1922. May 4. p. 5. (2) Sanyo Co., which advertised miso (from Jan. 1915) and shoyu, and probably made them. (3) Kuge Tofu in the late 1930s and early 1940s until the internment.

Good books on Japanese rice in America are: (1) *A History of the American Rice Industry, 1685-1985* by Henry C. Dethloff (1988). (2) *Rice in California*, by Jack H. Willson (1979). Address: Portland, Oregon.

4327. Black, Jane. 2007. Good miso: It's all about the journey. *New York Times*. April 11. p. F6.

• **Summary:** A good introduction to and brief history of South River Miso Co in Conway, Massachusetts. Describes in detail how they make miso in the traditional way. Contains 5 photos of people making miso.

4328. Sullivan, Cheryl L.; Nash, Marilyn. 2007. Soy on the menu: Recipes for foodservice. Champaign-Urbana, Illinois: Illinois Center for Soy Foods. 52 p. Illust. No index. 26 cm. Series: Soy in the American Kitchen.

• **Summary:** This book has a creative format: (1) An outer color cover folds over the white spiral binding. (2) The pages are spiral bound across the top. (3) The bottom unfolds like a gusset so the book stands up by itself on a table with the pages angles slightly back on a table. (4) A CD-ROM comes with the book. Remarkably, the whole package sells for only \$3.00!

Contents: Bringing soy foods to the American table: Soy in foodservice, why choose soy?, soy foods, vegetarian and vegan recipes [in this book], recipe information, nutrient information, acknowledgements. Recipes: Appetizers. Breakfast. Breads. Salads. Soups. Side dishes. Main dishes. Desserts.

The recipes in this book use: Soy flour, soymilk, tofu, textured vegetable protein / TVP [texture soy flour], edamame, black soybeans, soy analogs [meat and dairy analogs].

Sidebars include: Biodiesel (p. 10). Research shows kids like soy in school lunches (p. 11). Uncommon soy foods: Tempeh, miso, okara, natto. Are you soy savvy?: Why is soy flour added to baked goods? (p. 14) U.S. soybean production, yield, exports, and domestic usage (1979 vs. 2004) (p. 16). Industrial uses of soybeans: Soy candles, ink, biodiesel, soy cleaners, waterproofing sealants, soy silk (fabric). Are you soy savvy? Edamame (p. 19). INTSOY (p. 22). NSRL (p. 24). What is the soybean checkoff? (p. 27). WISHH initiative for soy in human health (p. 29, 30). Illinois Soybean Association (p. 34). What is okara? Why should you shake up a carton of soymilk? (p. 39). Make your own tofu (p. 47). Address: 1. M.A., R.D., Research Dietitian; 2. Ph.D., Project coordinator. Both: 170 National Soybean Research Center, 1101 W. Peabody Dr., Urbana, Illinois 61801. Phone: (217) 244-1706 or www.soyfoodsillinois.uiuc.edu.

4329. Shurtleff, William; Aoyagi, Akiko. comps. 2007. Marketing miso and miso products: Labels, ads, sell sheets and other graphics, 1941-2006. Lafayette, California: Soyinfo Center. 267 leaves. May. Illust. (some color). 28 cm. Series: Marketing soyfoods.

• **Summary:** This book is a collection of 151 color and 90 black-and-white photocopies of materials. Contents: Introduction: Marketing soyfoods. Miso: Early documents. Graphics—Chronological. Company name index—Alphabetical. Other books in this marketing soyfoods series.

The books in this series, each a unique collection of graphic materials, are designed for a number of purposes: (1) To serve as a source of ideas, ingredients, inspiration, legal specifications, and basic guidelines for companies in the process of developing their own products, designing

their own graphic materials, and conceiving their own marketing strategies. (2) To document the tremendous diversity of soyfoods products and the way that each is presented and marketed. (3) By arranging the materials in chronological sequence, to help document the development and history of new product categories and soyfood types, and with them the rise of the soyfoods industry and market in the Western World. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549.

4330. **Product Name:** [Manna Unpasteurized Organic Barley Miso].

Foreign Name: Manna Ongepasteuriseerde Bio Gerstenmiso "Mugi."

Manufacturer's Name: Natuproducs BV.

Manufacturer's Address: P.O. Box 376, 3840 AJ Harderwijk, Netherlands.

Date of Introduction: 2007. June.

Ingredients: Water, soybeans*, barley (31%)*, sea salt, *Aspergillus oryzae* (koji).

Wt/Vol., Packaging, Price: 400 gm. glass jar.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Sjon Welters from the Netherlands. 2007. June. Red, black, and white on yellow. An illustration shows two white cranes flying in front of a red moon. 4 by 3 inches.

4331. United Soybean Board (USB). 2007. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 14th annual national report. Seattle, Washington: USB. 12 p. Oct. 28 cm.

• **Summary:** Methodology: "This year represents the second year we have adopted an online self-administered survey as our methodology, a significant change from random telephone interviews. The survey, conducted by an independent research firm [in Seattle, Washington] in February and March 2007, includes 1,000 random surveys, providing a sample that is consistent with the total American population. The study's margin of error remains ± 1.9 to 3.1%, with a confidence interval of 95 percent."

Contents: Introduction. Methodology. About USB. Nutritional habits & obesity concerns. Healthy food decisions. Improving overall health. Cooking oil impressions. Consumer attitudes about fats. Awareness and usage of soy products. Occasion preferences for consuming soy. Restaurants and soy products. Soyfoods and health. Special health benefits of soy

Awareness and usage: 33% of Americans consume soyfoods or soy beverages once a month or more. "For the fourth year in a row, consumers reported the most familiarity with soymilk, soybean oil, soy veggie burgers and tofu."

A table shows the "Top 20 soy products by awareness." Soymilk 90%. Soybean oil 66%. Soy veggie burger 63%.

Tofu (unspecified) 60%. Soy infant formula 51%. Soy nuts 47%. Soy latte / soymilk in espresso coffee drinks [as at Starbucks] 41%. Soy protein bars 34%. Dried or canned soybeans 34%. Soy yogurt 32%. Soy flour 31%. Soy ice cream / cheese 30%. Soy hot dogs 29%. Flavored / marinated tofu 28%. Miso 28%. Soy supplements 28%. Cereal bar / Energy bar 28%. Edamame 23%. Soy breakfast cereal 21%. Textured soy protein 21%. All others mentioned 14% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 41%, breakfast 28%, lunch 27%, mid-afternoon snacking 19%, late evening snacking 14%, mid-morning snacking 10%, desserts 6%.

Restaurants and soy products: "Over half of consumers have tried soyfoods in restaurants." Tofu 25%. Soymilk 24%. Veggie burgers 22%. "Over one-third would order soy products in restaurants... if they could find soy on their restaurant's menu."

"In 2007, 85% of consumers rate soy products as healthy, up three percentage points from 2006." A graph (p. 7) shows this increase in awareness (82% in 2006, 78% in 2005, 74% in 2004, 74% in 2003, 74% in 2002, 69% in 2001, 76% in 2000, 71% in 1999, 67% in 1998).

Why? Low-fat profile 18%. Protein content 17%. Heart health function 16%. Cholesterol-lowering properties 11%. "Being good for you" 11%. Potentially providing relief for menopause symptoms 10%.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com/health_nutrition/pdf/.

4332. Fitzpatrick, Liam. 2007. Hong Kong's Zuma nights. *Time (Asia)*. Sept. 20.

• **Summary:** Zuma, a large and fancy restaurant in Hong Kong, serves "baby chicken marinated in barley miso and roasted on cedar wood, or fresh cold tofu with grated wasabi and other condiments."

4333. Belleme, John; Belleme, Jan. 2007. Japanese foods that heal: Using traditional ingredients to promote health, longevity, and well-being. Tokyo, Rutland, Vermont, Singapore: Tuttle Publishing. 224 p. Illust. Index. 26 cm.

• **Summary:** On the dedication page is a portrait photo of Takamichi Onozaki. Contents: Pronunciation guide: Foreword, by Christina Pirela. Preface, by John and Jan Belleme. Introduction: Food is medicine. 1. Miso: A health secret to savor. 2. Toasted sesame oil: The cooking oil supreme. 3. Shoyu: King of condiments. 4. Tamari: Wheat-free soy sauce. 5. Amazake: Sweet ambrosia. 6. Kuzu: The wonder root. 7. Brown rice vinegar. 8. Shiitake: Miracle mushroom. 9. Brown rice malt syrup: Heavenly sweet water. 10. Umeboshi: Venerable pickled plumbs. 11. Mochi: Sweet rice cakes. 12. Noodles. 13. Tofu: The square egg. 14. Seitan: The vegetarian alternative. 15. Sea vegetables:

Underwater harvest. 16. Mirin: Sweet rice wine. 17. Maitake: The king of mushrooms. 18. Japanese tea: A healthy tonic. Acknowledgments. Shopping resources. Glossary. Recipe index.

Note: Tuttle Publishing is an imprint of Periplus Editions (HK) Ltd., with editorial offices at 364 Innovation Dr., North Clarendon, Vermont, 05759. Address: P.O. Box 457, Saluda, North Carolina 28773.

4334. Elwell, Christian. 2008. Business is good at South River Miso Co. (Interview). *SoyaScan Notes*. Jan. 10. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** Over the last seven years, annual sales have tripled. Over the last five years, production, annual production has doubled. His company makes about 100,000 lb/year of miso; that is about the maximum they can produce at their present site. Fourteen people are now on the payroll.

Christian is now starting to think about what will eventually become of his land and his miso company as he grows older.

He first met Sally Fallon at a conference at which he was talking about miso. Since that time, her attitude toward miso and other fermented soyfoods has been very positive. She sponsors conferences; Christian attended one recently, where he met Dr. Yu, an MD and surgeon who is doing research on miso. Address: Founder and Owner, South River Miso Co., South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

4335. Shurtleff, William; Aoyagi, Akiko. 2008. *Le livre du tofu: La source de protéines de l'avenir—dès maintenant!* [The book of tofu: Protein source of the future—now! Translated from the English by Nathalie Tremblay]. Varennes, Quebec, Canada: Éditions AdA Inc. 430 p. Illust. by Akiko Aoyagi. Index. Feb. 28 cm. [53 ref. Fre]

• **Summary:** Contents: Preface. Acknowledgements. Part I. Tofu: Food for mankind. 1. Protein East and West. 2. Tofu as a food. 3. Getting started. Our favorite tofu recipes (lists about 80 recipe names for each of the different types of tofu, plus soymilk, yuba, whole soybeans, gô, okara, and curds; very favorites that are also quick and easy to prepare are preceded by an asterisk).

Part II. Cooking with tofu: Recipes from East and West (500 recipes). 4. Soybeans: History, cooking with whole dry soybeans, roasted soybeans (*iri-mame*), fresh green soybeans (*edamame*), kinako (roasted full-fat soy flour), soybean sprouts (*daizu no moyashi*), natto (sticky fermented whole soybeans, with “gossamer threads”), tempeh (fermented soybean cakes), Hamanatto and Daitokuji natto (raisin-like natto), modern western soybean foods (natural soy flour [full-fat], soy granules, defatted soy flour and grits, soy protein concentrates, soy protein isolates, spun protein fibers, textured vegetable protein (TVP), soy oil

products). 5. Gô (a thick white puree of well-soaked uncooked soybeans). 6. Okara or Unohana. 7. Curds and whey. 8. Tofu (includes history, and preparatory techniques: Parboiling, draining, pressing {towel and fridge method, slanting press method, sliced tofu method}, squeezing, scrambling, reshaping, crumbling, grinding).

9. Deep-fried tofu: Thick agé or nama agé, ganmo or ganmodoki (incl. *hiryozu* / *hirosu*), agé or aburagé (incl. “Smoked tofu,” p. 197). 10. Soymilk. 11. Kinugoshi (“*Kinu* means ‘silk’; *kosu* means ‘to strain’; well named, kinugoshi tofu has a texture so smooth that it seems to have been strained through silk”). 12. Grilled tofu. 13. Frozen and dried-frozen tofu. 14. Yuba (incl. many meat alternatives such as Yuba mock broiled eels, Buddha’s chicken, Buddha’s ham, sausage). 15. Tofu and yuba in China, Taiwan, and Korea (incl. Savory tofu {*wu-hsiang kan*}; see p. 258 for illustrations of many meat alternatives, incl. Buddha’s fish, chicken, drumsticks, and duck, plus vegetarian liver and tripe, molded pig’s head, and molded ham). 16. Special tofu.

Part III—Japanese farmhouse tofu: Making tofu for more and more people. 17. The quest. 18. Making community tofu. 19. The traditional craftsman. 20. Making tofu in the traditional way. Appendices: A. Tofu restaurants in Japan (many are vegetarian). B. Tofu shops in the West (Directory of 43 shops in the USA, 3 in Europe, and 3 in Latin America). C. People and institutions connected with tofu. D. Table of equivalents. Bibliography. Glossary. Index. About the authors (autobiographical sketches; a photo shows Shurtleff and Aoyagi, and gives their address as New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo, Japan 177). Sending tofu in the four directions.

pudding recipes include: Rice pudding with gô and apple (p. 76, incl. 2 cups soymilk). Tofu chawan-mushi (p. 147; Steamed egg-vegetable custard with tofu). Tofu fruit whips (p. 148). Tofu rice pudding (p. 150, incl. 1 cup soymilk). Tofu custard pudding (p. 152). Soymilk custard pudding (p. 208). Brown rice pudding (p. 208, with 2 cups soymilk). Soymilk chawan-mushi (p. 209). Chawan-mushi with yuba (p. 249).

Dessert recipes include: Tofu whipped cream or yogurt (p. 148; resembles a pudding or parfait). Tofu ice cream (p. 149, with chilled tofu, honey, vanilla extract and salt). Banana-tofu milkshake (p. 149). Tofu cream cheese dessert balls (p. 149). Tofu icing (for cake, p. 149). Tofu cheesecake (p. 150). Tofu-pineapple sherbet (p. 151). Also: Soymilk yogurt (cultured, p. 205). Healthy banana milkshake (p. 206). On p. 160 is a recipe for “Mock tuna salad with deep fried tofu.” Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549 USA. Phone: 925-283-2991.

4336. Ishige, Naomichi. 2008. Re: Early history of tataki natto, itohiki natto, and natto-jiro in Edo city, Japan. Letter

(e-mail) to William Shurtleff at Soyinfo Center, March 16. 2 p. [Eng]

• **Summary:** “Tataki natto is minced itohiki natto, chopped with a cooking knife.

“In about the 1830s, eating granulated [regular] itohiki natto started to become popular in central Edo city (today’s Tokyo). When people had granulated itohiki natto, they stirred it and put it on hot rice with soy sauce. Before that period, itohiki natto was commonly eaten as natto-jiru, which was a kind of miso soup with tataki natto, greens, and tofu. Because of this eating style, peddlers started to sell tataki natto with greens and tofu so that people could make their own natto jiru more easily and inexpensively.

“Natto-jiru was the soup for the winter season. Starting in about the 1830s in Edo city, granulated [regular] itohiki natto began to be sold instead of tataki natto. Once people got familiar with eating granulated itohiki natto with soy sauce, peddlers started to sell itohiki natto even in the summer.

“In the well-known book *Morisada Mankô*, the author, KITAGAWA Morisada, compared the way of life in Edo, Kyoto, and Osaka in the late Edo period. He wrote that natto sellers disappeared from Kyoto and Osaka in the late Edo period. Thus, people who wanted to eat natto in the region needed to make it by themselves. Even now, although natto is popular in Kanto region, which developed around Edo city, people in Kansai region, to which Kyoto and Osaka belong, do not eat natto so much.

“I do not know any record by which the origin of tataki natto can be traced. However, it is thought that tataki natto was made from olden times as one of the basic ways of eating natto.

“Today, natto-jiru is not popular for Japanese, so tataki natto is usually not sold. If you want to have natto-jiru, you need to mince natto by yourself.” Address: National Museum of Ethnology, Osaka, Japan.

4337. Liu, KeShun. 2008. Food use of whole soybeans. In: Lawrence A. Johnson et al. eds. 2008. *Soybeans: Chemistry, Production, Processing, and Utilization*. Urbana, Illinois: AOCS Press. viii + 842 p. See p. 441-481. Chap. 14. [85 ref]

• **Summary:** Contents: Introduction. Non-fermented soyfoods: Soymilk (traditional soymilk, modern soymilk {techniques to reduce beany flavors, formulation and fortification, homogenization, thermal processing, and packaging}), tofu (preparation methods, factors involved in tofu-making {soybean varieties, storage and pretreatment, solids concentration, heating, type of coagulants, coagulant concentration, coagulation temperature, coagulation time, process automation, packaging}), varieties of tofu {silken tofu, regular and firm tofus, varieties of tofu products}), green vegetable soybeans, soybean sprouts, yuba, okara, roasted or cooked soybeans. Fermented soyfoods: Terms

(Koji {fermentation, koji starter, inoculum}), fermented soy paste (preparation method {preparing rice koji, treating soybeans, mixing and mashing, fermenting, pasteurizing and packaging}), processing principles), soy sauce (preparation method {treating raw materials, koji making, brine fermentation, pressing, refining}), processing principles, chemical soy sauce), Japanese natto (preparation method, processing principles), Indonesia tempeh (processing method, processing principles), fermented soymilk, fermented tofu (preparation method, processing principles), soy nuggets (Chinese douchi, Japanese hamanatto). Conclusion.

Figures show: (1) Flowchart of a traditional Chinese method for making soymilk and tofu. (2) Photo of savory tofu dices. (3) Photo of soy sprouts. (4) Photo of yuba (soymilk film). (5) Photo of Chinese jiang and Japanese white and red miso. (6) Flow chart of a common method for making Japanese rice miso. (7) Photo of Japanese natto. (8) Flow chart of a traditional Indonesian method for making tempeh. (9) Photo of Chinese douchi (soy nuggets or fermented whole soybeans). Address: Research Chemist, U.S. Dep. of Agriculture, Agricultural Research Service, Grain Chemistry and Utilization Lab., Aberdeen, ID 83210.

4338. Bakkum, Leila. 2008. Update on Barry Evans and American Miso Co. (Interview). *SoyaScan Notes*. July 1. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** Barry Evans has moved to China and is now living and traveling there and in Thailand. He is traveling throughout the country, visiting existing suppliers, trying to find new ones, and working to be able to go direct, to eliminate middle-men. He seems to be having the best time of his life.

American Miso Co., Inc. (Rutherfordton, NC) will soon be celebrating its 30th anniversary. Greg Gonzales, a former miso maker, has moved on, and Joe Kato is now the main miso maker.

Update: e-mail from Barry Evans. 2008. July 2. “I have had the most interesting, most exciting three years of my life here in Asia. I don’t know why I didn’t leave the US long ago! He has found the top expert on Thai massage and has had over 100 two-hour superb treatments from her at \$6/hour. He has also become an expert on and grown to love Thai cuisine.

“Thai people don’t like to leave Thailand because they can’t get real Thai food abroad and they never really like other cuisines very much. Now I know why.”

“I have had a chance to travel widely through much of East Asia in search of the best sources of organic food and I can state unequivocally that in my own experience the Chinese especially are quite conscientious in their devotion to organic standards and have a keenly developed ecological consciousness.” Address: Great Eastern Sun Trading Co., 92

Macintosh Rd., Asheville / Enka, North Carolina 28806.
Phone: 828-665-7790.

4339. Yoshihara, Susan-Marie ["Lulu"]; Yoshihara, Yasuo ["Yoshi"]. 2008. Re: History of Shin-Mei-Do Miso Company. Letter to William Shurtleff at Soyinfo Center, Aug. 12. 3 p. Typed, with signature.

• **Summary:** "Dear Bill, In 1977 I met you and Akiko in Tokyo. Our miso making journey began a year before when I found "The Book of Miso" in Uwajima-ya department store in Seattle. Your book, "The Book of Tofu," was already my favourite cookbook and I was looking forward to new culinary adventures. It may sound trite but what I found in the "The Book of Miso" literally changed my life.

"Inside the book was not only a wealth of miso lore and recipes, complete and detailed instructions for making miso at home and on a commercial scale were there in the back of the book, too. With this information I knew that our family could set up our own miso business.

"In 1976 we had just moved to rural Denman Island but still had no idea of how we would make our living. My husband, Yoshi, was from a Japanese farm family and he remembered how his family had made miso at home every fall. But he was only a child then and knew only some of the details involved. Nevertheless, we were interested and in the fall of 1977, accompanied by our 4 year old son, I went to Japan.

"Thanks to an amazing bit of luck I received an introduction to Yaeko Nakata, sister of the president of Maruman Miso Company in Nagano prefecture. Ms. Nakata was in charge of the hand-made division of the company. She and miso maker Chisato Kobayashi allowed me to observe and participate in the koji making process. Because I was able to experience the making of koji, so crucial to the making of good miso, I felt that Yoshi and I would be able to succeed in miso making.

"With very little capital but with youth and enthusiasm on our side we started work. It was 1979 and we had a 5 year old and a new baby boy. We made our first few batches in a woodshed. Our beans and grains were steamed in ½ whiskey barrels over a wood fire in a maple syrup cooker that we found in an antiques store. The upper part of our 10 acre property had been clear-cut some years before we bought it, so Yoshi used the logging slash to stoke the fires.

"That summer we built a new building. About once a month Yoshi drove our little red Datsun pickup truck to Vancouver where he bought sea salt and organically grown rice and soybeans. He also bought large oak barrels from Sweeney Cooperage in Vancouver. Two of the barrels could just squeeze into the back of the pickup and the bags of salt and grains and soybeans fit inside the barrels.

"We had no machines—no grinder, no mixer. Using a ½ barrel and a special pair of clean new gum boots, Yoshi and I took turns smashing cooked soybeans while the other

poured in the salted koji and turned the miso-to-be with an extra large rice paddle that Yoshi carved from Douglas fir. Often one of us was carrying the baby on our back. Our elder son played in the shop while we worked. Over about 3 years we made 22 tons of miso that way.

"Did I tell you that Yoshi's first carpentry project ever was to build the koji incubation room in the woodshed? Our neighbours made the koji boxes from red alder wood and those boxes are still in good condition, nearly 30 years later.

"It is amazing what you can do when you are young, healthy, idealistic and ignorant! Even so, we realized soon enough that we'd have to have mechanical help to make a living. In 1982 we built an addition to the building and added 8 large wooden tanks from Arrow Tank Company of Buffalo, New York. By that time Sweeney Cooperage had already been torn down for Expo 86 in Vancouver. We also imported a miso mixing machine from Japan and bought a used grinder. A neighbour helped us set up a low pressure steam boiler by adapting a wood-fired house furnace. Used stainless steel steam kettles completed the production equipment.

"Every summer Yoshi bucked, split and stacked firewood for the boiler. He made an extra long wooden spoon to harvest the finished miso from the large tanks. He packed the miso by hand no matter how hot or cold the weather was. Only the koji incubation room was heated, yet even in mid-winter Yoshi stood there at the packaging table for hours in the freezing cold. Yoshi is very strong and fit for a man his age.

"In September of 2006 Yoshi broke his collarbone in a bicycle accident. It never healed properly. In the meantime the cost of doing business had gone up incredibly. Ferry fares to the islands more than doubled. In 2008 we decided to retire and shut down our business after producing 220 tons of miso in nearly 30 years of business.

"If you would like to know more about how we made miso please don't hesitate to contact us. We are enclosing newspaper articles, 9 photographs and captions that explain them. Please keep these copies as we have backup copies of them.

"Sincerely,..."

4345. Huang, H.T. (Hsing-Tsung). 2008. Re: Various types of black bean sauce and soy sauce in China. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 30. 2 p.

• **Summary:** William Shurtleff writes: “I have been reading quite a few Chinese cookbooks and articles about Chinese foods during the period 1960 to the present. I am confused about the meaning of several widely-used terms in Chinese cookery. In all of the following the ‘black beans’ are actually black soybeans.

A common term is “Black Bean Sauce.” This sauce is usually made in the kitchen by crushing (for example) 4 tablespoons of salty, fermented black beans with 3 tablespoons dry sherry or shao hsing wine. The two key points for me are: (1) It is not an extract like Kikkoman soy sauce; the whole salted black beans end up in the final sauce. (2) It can be made in the kitchen as part of a recipe, quickly and easily; just combine and mash. It is most widely used to add a delicious flavor to recipes for chicken, shrimps, clams, fish, etc.

Question 1. What is THIS “Black bean sauce” called in Mandarin, pinyin, and Cantonese?

“Answer 1. It seems to me this sauce is not the invention of a particular chef; it is not a commercial product.

“Then there is a canned product that is sometimes sold as “Black Bean Paste.” I have seen the Chinese names *hei chiang* (pinyin: *heijiang*) or *hei touban chiang* (pinyin: *heidouban jiang*).

“Question 2. Is this canned product basically the same as product #1, which can be made so easily in the kitchen—but in convenient canned form? Or are there some differences?

“Answer 2: This is simply *jiang* (pinyin) or *chiang* (W.-G.). *Hei chiang* is simply black chiang.

Question 3. What is the canned product called in Cantonese? Ans. 3: “If I remember right, “jiang” is pronounced “jiong” in Cantonese.

“Question 4. How is *Tou chiang* (pinyin: *doujiang*) related to product No. 2? Ans. 4. They are the same product.

“Then there are two extracts—like our typical “soy sauce,” where the residue is separated and either discarded

or used as a low-value product. Shizhi (pinyin) / Shi Chih (W.-G.) is an ancient extract of chih = fermented, salted black soybeans.

“Shiyou (pinyin) / Shih-yu (W.-G.), Shi-yau, (Cantonese), or (Japanese) Kuki-jiru is an extract of fermented black beans.

“Question 5. Am I basically correct in saying that products 1 and 2 are closely related and that products 3 and 4 are also closely related but are very different from products 1 and 2.

“Ans 5. Product 1 is a chef’s concoction. 2. is a commercial product. When you extract shi with water you get Shih Chih. When you ferment shi further, the run-off juice is shiyou.

“Question 6. Am I basically correct that product 3 is now extinct and that product 4 is no longer very widely made or used? Or is it still made in certain regions of China?

Answer 6: Check my book in the Needham series (2000, pages 365-66). Both shiyou and jiangyou are translated as soy sauce. Both are made in China. The term “shiyou is more popular in south China. In Fujian it is preferred. In Guangdong the product is called “shiyu” but it is often made from jiang.

Basically, shiyou is “tamari” and chiangyou /jiangyou is shoyu. Address: PhD, Alexandria, Virginia.

4346. O’Connor, Anahad. 2008. Really?: The tongue is mapped into four areas of taste. *New York Times*. Nov. 11. p. D6.

• **Summary:** Many high school textbooks contain a map of the tongue, dividing it into four areas based on what it taste. But now we know of a 5th taste—umami, a Japanese word that means “savory,” and can be detected in miso and soy sauce. We have also learned that receptors for different tastes are not confined to certain parts of the tongue. Address: New York Times.

4347. Welters, Sjon. 2008. Re: History of work with amazake. Letter (e-mail) to William Shurtleff at Soyinfo Center, Dec. 17. In reply to specific questions. 4 p. 28 cm.

• **Summary:** “When I started to study macrobiotics in 1973 in The Netherlands I became aware of a product called amazake. It was not for sale at the time in The Netherlands. I learned how to make it, using koji, from cooking classes at the [macrobiotic] East West Center in Amsterdam. We always used Cold Mountain Koji, made and sold by Miyako Oriental Foods (owned by Mutual Trading Co.) in Los Angeles. We made a few gallons of amazake a week initially. I did not do much with it, aside from teaching how to make it during cooking classes I gave all over the Netherlands from 1977-1983. When I went to the USA in 1980 I saw the Mitoku pouch pack amazake from Japan.”

Q: When and where and why did you start making and selling amazake? Ans: “In Alkmaar [a city in The Netherlands in the province of Noord Holland] we had a natural food store and restaurant between 1977 and 1983, and made amazake from koji imported from Japan. We made desserts with it and experimented with making our own sake and miso with the koji. It was just a fascinating sweetener and food that I loved from the first day I tasted it.

“In late 1982 I started to experiment with making my own domestic kind of amazake. But I did not use koji because it was expensive, foreign, and hard to get. So I used sprouted wheat and barley at first, but did not like the aftertaste the hulls of the grains gave. I then started to work with pure enzymes that I got from a European enzyme company; bacterial and fungal amylase and other enzymes, that worked well. I continued to make it off and on, with koji or enzymes, for home use but did not sell the koji-made amazake commercially until many years later.

“I took this knowledge and the enzymes to the USA when we emigrated to Fayetteville, Arkansas, in October of 1983, where I continued to experiment using enzymes from American companies. I told Joel Wollner, an old friend of mine and the reason we ended up in Arkansas, about my work with amazake and enzymes. During the winter of 1983-84 we came up with a plan to start a company that would produce (among other things) seitan, of which we would use its byproduct, the starch, as the raw ingredient for an amazake-like product. Bob Kennedy, owner of the Chico San rice cake company, who’s company was also making rice syrup using enzymes at the time, was approached as a possible financier. He came to Fayetteville to talk and I eventually ended up at his rice syrup plant looking at ways to improve the process and see if we could work together. Nothing came of this however, as Chico San got sold to Heinz shortly thereafter and I moved to Massachusetts and became a partner in Nasoya [a company that made tofu].

“(Note on the side: Joel took Bob to a facility of the University of Arkansas where they were shown UA’s work on a “pounded sweet glutinous rice food”, they, according to Joel, being totally oblivious to the fact that such a product already existed in Japan.)

“However, during our time in Arkansas, the founders of Rice Dream (Robert Nissenbaum and Ken Becker) were running experiments while they were living at an intentional community [Moniteau Farm] north of us in Jamestown, Missouri, trying to figure out how to make amazake ice cream. They were stuck with koji as being an ineffective and expensive way of turning this big kettle full of cooked brown rice into a sweet base for their rice ice cream. Joel and I visited them there and saw what they were doing. Afterward Joel continued his contact with Chico San and spoke to Peter Mulberry (who after Chico San’s sale started to work for Lundberg Farms) there about my experiments

with enzymes. The word was out and no sooner Robert and Ken started to experiment with enzymes, too. They eventually developed what we now know as Rice Dream, the non dairy ice cream, and Rice Dream the drink, both amazake-inspired products widely available in the US.

“In about 1993, while working in Aveline Kushi’s sushi restaurant in Stockbridge, Massachusetts, I learned that Mutual Trading Company had a branch in New York, and that they sold Cold Mountain koji—although I think it was still made in California.

“In 1997 we started our restaurant in the back of State Street Market at 20 State Street, Montpelier, Vermont. It was named ‘The Wrap’ until April 2002, when the name was changed to ‘Rhapsody,’ the present name. We started making and selling amazake at the same time we opened the restaurant. Although this amazake was unflavored it was naturally fortified with kombu—just like Eden soymilk. It was sold in 12 fl. oz. plastic bottles in the natural food store cooler, without a label on the bottle; the label or sign was on the shelf just below the bottles.

On 3 May 2002 we expanded into our own restaurant at 28 Main Street in Montpelier, and changed our name to “Rhapsody” from “The Wrap.” In early 2003 we introduced three flavors of amazake in larger (16 fl. oz.) plastic bottles and discontinued the original amazake fortified with kombu. These had nice color labels and were sold in our cooler.

“Currently one of our people at Rhapsody makes about 80 pints per week in our restaurant kitchen, but the demand is much higher. We are just not set up yet to produce more. We cook the amazake and bottle it hot and freeze it to give it its shelf life of one year (at least). Refrigerated it lasts about 3 weeks. Hopefully somewhere in 2009 we will be able to produce at least enough for the New England market.

“Our restaurant, Rhapsody, is self-serve. Therefore, our amazake is not on our menu (we have no menu) and we do not serve it (hot or cold) in cups to people as they are dining. Rather, we sell it as a drink from our beverage cooler (three flavors: I will send you the labels) for \$3.50 per pint, and to stores in Central Vermont. Recently Associated Buyers of Barrington, New Hampshire, has started to distribute the products, too. It is a special, yet exclusive product that deserves wider acceptance, which will come over time as people will start to embrace a more natural diet. I’d be happy to assist the regional development of amazake production.

“The Bridge of Connecticut sells their original amazake in Whole Foods in the Boston area. Charlie Kendall stopped making it as far as I know quite a while ago.”

Note: Sjon has never learned how to make koji starter, so he has always had to buy ready-made koji for his amazake. Address: Founder and owner, Rhapsody, 28 Main St., Montpelier, Vermont 05062. Phone: 802-229-6112.

4352. Uyttenhove, Chantal. 2009. Re: Lima Seasalt was being sold by 1957. Letter (e-mail) to William Shurtleff at Soyinfo Center, Jan. 27. 1 p.

• **Summary:** “Indeed, we were the exporters of Lima seasalt to the US. As far as I can remember, Eden Foods did import the salt and before that, it was Pierre Gevaert himself who had contacts with Erewhon. EdenSoy has long be produced with Lima sea salt and yes, we delivered salt to the American Miso company.

“In those days, Lima seasalt came from France, from the Isle of Noirmoutier. The so called ‘grey’ seasalt because it is/was harvested from handmade clay pans—*salières*. The gray clay interacts with the salt and thus gives it its color. Today, we still have Lima seasalt but years ago, I decided to step away from Noirmoutier salt because of some issues we had. Today, the Lima seasalt comes from South Portugal, from a company who, years ago, decided to repair and restore century-old *salinas* [salt fields] and started cultivating sea salt the old way. They have hand harvested salt, traditionally sun dried and have been rewarded as a

'slow food company' several times. Their 'Fleur de sel' is a real 'delice.'

"The only difference: the salt is white. There is a much longer harvesting season in Portugal so that they don't have to scrape the salt to the bottom of the salinas. And so, the salt stays pure white because it does not interact with the clay. That company in Portugal is a real beauty." Note: Chantal encloses two color photos of the white seasalt being harvested in Portugal.

Update: Jan. 29 e-mail. "I started working for Lima in January 1985. Since Lima started in 1957, there is a lot of history before me.

"We are planning on moving to a new building at the end of this year—an ecological friendly building with the least possible footprint—so, I'm in charge to make sure we don't throw away the old things. I'm sitting on the first ever Lima-Tamari packaging (brown plastic bottle, actually a cosmetic bottle) and all sorts of things. There are a lot of old documents that I still have to go through. There is also a very old movie from before my time which needs to be digitalised. (When finished, I can send you that if you are interested. There is a French and a Flemish version).

"The oldest document I have referring to the sea salt is a handwritten order from 1962. So my guess is that we started with the salt even before that as we have contracts older than that. I did not go through old invoices nor do I have a price list but I'm sure we have that somewhere. Later this year, those things will 'surface' again."

Follow-up e-mail from Chantal. 2009. Feb. 2. "Dear Bill, We do have a well documented history—there is the start of a book; it begins with the engagement of the father of Pierre, Edgar Gevaert, his work for world peace, first contacts with Ohsawa—and with the start of the Lima production in the kitchen and the opening of the first store to the start the company Lima. One catch: it's all in Flemish ! I'm so sorry.

"Here it says that Pierre Gevaert made a trip to Ile de Ré in France to buy seasalt and that only later, in 1957, he bought machinery. That would mean he started even before 1957 with buying seasalt for the production of tahini and gomashio which was produced in the kitchen.

"The history is so rich Bill, that I could put my job aside and do only this. Unfortunately, that is not possible. I wish more was available in another language but then Flemish and French were the languages at the time so all the documents are in those languages.

"Should something come up during the move, of course we'll think of you. Thank you and kindest regards, Chantal." Address: Purchasing Manager, Hain Celestial Europe [Belgium] (formerly Lima Foods N.V.).

4353. Clearspring, Ltd. 2009. Clearspring (Website printout—part). [Http://www.clearspring.co.uk](http://www.clearspring.co.uk). Printed Jan. 28.

• **Summary:** Contents: Home page. About us. Awards. Glossary. FAQ. News. Books. Links. Stocklists. Trade. Contact. Food quality. Producers. Health. Recipes. Where to buy.

"Introducing the chairman: Christopher Dawson was born 19 September 1953, at New Plymouth Hospital, New Zealand and grew up in Opunake, a rural town in New Zealand. He is the third son of William Geoffrey and Joan Dawson.

"Education: He did his primary, secondary and tertiary education in New Zealand. He first started independently studying vegetarianism and organic agriculture at the age of 18. In 1974 he came to London to further his studies of organic agriculture, both at the Henry Doubleday Horticulture and Nutrition Research Centre in Braintree and the Bio Dynamic Agriculture section at the Rudolf Steiner Emerson College, Sussex.

"Beginning Organic Food Distribution: In 1977, he opened and managed the East West Natural Foods Store at the Community Health Foundation, Old Street, London. He developed this shop into a distribution centre for traditional natural / macrobiotic foods, sourced from both local organic farms and from abroad, especially from Japan.

"From August 1978 through to January 1980 he traveled extensively throughout Europe, America, Australia and Asia, investigating the traditional dietary practices and food-processing techniques. He studied at the East West Foundation in Boston, Mass, U.S.A. about Far Eastern philosophical principles and traditions and studied the distribution network of the natural foods movement in both America & Europe, as well as Australia and New Zealand.

"Eighteen Years in Japan: Christopher made his first trip to Japan in July 1979, visiting natural food enterprises throughout Japan with Mr. A. Kazama, president of Mitoku Co. Ltd. He returned to Japan in January 1980 and began extensive studies into the daily life and cultural and dietary practices of the Japanese people.

"At the end of 1980 he commenced full-time employment at Mitoku Co. Ltd., the major exporter of traditional, natural Japanese foods. During the eighteen years he spent with the company Christopher studied Japanese Foods & production, worked with the producers to develop products to suit the needs of customers abroad and help the producers become compliant with EU organic certification. He also travelled extensively to introduce the foods to markets worldwide, with the intention to see if Japanese foods could really become international foods.

"Building Clearspring in the UK, Europe and the Middle East: In September 1993, Christopher bought the Clearspring Ltd. company, which was then a London based wholesaler with one shop, the very shop that Christopher started in 1977! By 1998, he felt he had sufficient knowledge of traditional, top quality Japanese food and decided it was the right time to come back to UK and to

focus on marketing organic and authentic Japanese foods under the Clearspring brand.

“Recognition from the Japanese government: On 25 May 2007, Christopher received the Award for Overseas Promotion of Japanese Food 2007 from the Ministry of Agriculture, Forestry and Fisheries of Japan, for his distinguished contribution to the promotion of Japanese organic food worldwide.”

Down the right side of this page are the following photos: (1) Christopher seated at a desk, writing in a notebook, looking very happy, at an early age (about 6), already a promoter of the written word. (2) Christopher at the East West Natural Foods Store in 1977. (3) Christopher with his mother at home in New Zealand. (4) Christopher at Mitoku in Japan (with Mr. Kazama and staff) in the late 1980s. (5) Photo taken 11 Oct. 1990 with Lima Ohsawa, then 91, the wife of macrobiotic teacher George Ohsawa and Aveline Kushi, then 67, the wife of macrobiotic teacher Michio Kushi. (6) Christopher with his young family (Japanese wife and 3 children) in Japan in the early 1990s. (7) Christopher, with his wife and two sons in Spain in 2006. (8) Christopher now regularly visits Clearspring’s suppliers in Japan, here with team of Sendai Miso Shoyu Company and Mr. Yoshida from Mitoku. (9) Christopher in Japan with Onozaki san, miso producer. (10) Christopher at the Organic & Natural Products Show, London 2007. 4354. Yoshihara, Akino. 2009. The temptations of tempeh. *Daily Yomiuri Online (Japan)*. Feb. 19. www.yomiuri.co.jp/dy/features/culture/20090219TDY16002.htm.

• **Summary:** Tempeh was introduced to Japan about 30 years ago, but it has not become widely popular since there are now few tempeh manufacturers in Japan. Yet tempeh is made in Shiroishicho in Saga prefecture, Tokyo, Nagano prefecture and Okayama prefecture (located in southwestern Japan, just north of Shikoku Island). In Okayama prefecture about 20 firms make tempeh and 2nd generation tempeh products such as ramen noodles with tempeh or miso with tempeh. Moreover, many tempeh-related events have been organized, including cooking classes.

In 1987 the Japanese Society of Tempe was organized. Today it is headed by Masaharu Horii, professor in the Graduate School of Human Life Sciences, Notre Dame Seishin University, Okayama. The society promotes tempeh “to both the food industry and individual consumers through an annual conference featuring expert lectures and a cooking workshop.”

“The society is trying to popularize consumption of tempeh as part of people’s daily diet. We plan to publish a book containing useful information for consumers, such as the health benefits and a buyer’s guide.”

In Indonesia, long popular among the working classes, tempeh has recently become popular among the upper classes because of its many health benefits.

Note: Masaharu Horii, born in March 1939 and a researcher in the field of eating habits and food science, can be contacted at: Notre Dame Seishin University, Graduate School of Human Life Sciences, 2-16-9 Ifukucho, Okayama-shi, Okayama 700-8516 Japan. Fax: +81-86-252-5042 Address: Staff writer, Japan.

4355. Centraalbureau voor Schimmelcultures. 2009. CBS Fungal Biodiversity Centre (Website printout-part). [Http://www.cbs.knaw.nl](http://www.cbs.knaw.nl). Printed April 6.

• **Summary:** Contents: Home (incl. current news). About CBS. Research. Collections. Databases (18). Publications. Service. Links.

When we searched the 1st database, the “Filamentous fungi database,” it was very slow to load and to search. It “contains data on more than 38,000 strains in the CBS collection,” we got interesting results searching for: (1) Tempeh—14 hits = records found. In each record, tempeh appears in the field “Substrate.” The “Taxon name” (scientific name) of *Rhizopus oligosporus* has been changed to *Rhizopus microsporus var. oligosporus* (Saito) Schipper & Stalpers. In some records the name of the collector and date collected are given. Country and locality (where collected): Indonesia.

Other organisms used to make tempeh are: *Rhizopus oryzae* Went & Prinsen Geerlig. *Rhizopus stolonifer var. stolonifer*. *Cladosporium oxysporum* Berkeley & M.A. Curtis. *Rhizopus azygosporus* G.F. Yuan & S.C. Jong. One culture typically costs “150 Euro (65.0 Euro for Academies, Universities, Education).”

(2) *Rhizopus oligosporus*: 5 hits.

(3) Miso: 3 hits. One substrate was soy sauce and another was koji starter culture. The fungi were: *Aspergillus oryzae var. oryzae*. *Aspergillus sojae* Sakaguchi & K. Yamada ex Murakami.

(4) Soy sauce: 13 hits. In addition to the two molds used to make miso, there was also: *Aspergillus oryzae var. effusus* (Tiraboschi) Y. Ohara.

(5) Chinese cheese: No hits.

(6) Fermented tofu: No hits.

(7) Sufu: 9 hits. The molds used are: *Mucor racemosus f. racemosus*. *Mucor indicus* Lendner. *Mucor hiemalis* Wehmer. *Actinomucor elegans* (Eidam) C.R. Benjamin & Hesseltine. *Mucor circinelloides f. circinelloides*. *Rhizopus microsporus var. microsporus* Tieghem.

(8) Douchi or doushi or doushih or dowsee or dowsi or toudshih or tou-shih or fermented black beans or preserved black beans: No hits.

(9) *Aspergillus*: 1,213 hits.

(10) Soybeans: 1 hit. Substrate: Soybeans. Taxon name: *Aspergillus wentii* Wehmer. Country and locality: Indonesia,

Java.

(11) Soybean: 18 hits. Substrate is usually “soil from soybean field.” Molds are *Penicillium* and *Aspergillus* species.

(12) Koji: 36 hits. Molds: *Aspergillus oryzae* var. *oryzae*. *Aspergillus oryzae* var. *brunneus* Murakami. *Aspergillus tamarii* Kita. *Rhizopus microsporus* var. *tuberosus* R.Y. Zheng & G.Q. Chen (koji from China). Address: Utrecht, Netherlands. Phone: +31 (0)30 212-2600.

4356. Katz, Ellix Sandor. 2009. Re: Making tempeh, koji, and miso. Letter (e-mail) to friends, Feb. 6. 1 p.

• **Summary:** “I’ve been busy creating a new teaching kitchen at a friend’s farm a few miles from my home. With a dedicated incubator (rather than one improvised in the oven I share with twenty people), I’ve made more tempeh in the past couple of months than in the 15 years before. I’ve been experimenting with different beans and grains, and we’ve been eating lots of tempeh. Yummmm! I’ve also scaled up my koji-making and miso-making. And I’m trying my hand dry-curing venison in the style of prosciutto. All very exciting.

“I’m pleased to announce that I will be hosting my first workshops in the new space this upcoming spring. Four-day hands-on fermentation production. Details below. I will continue spreading fermentation fervor elsewhere, but in a much more limited way (only occasionally).” Address: Foundation for Fermentation Fervor, 247 Sanctuary Lane, Liberty, Tennessee 37095.

Address: Japan.

4359. *SoyaScan Notes*. 2009. Soyfoods historical research and writing wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1. Early history of Chinese soyfoods companies and products in America and Europe. Especially Chinese tofu manufacturers in San Francisco and Los Angeles from 1850 to 1910. 2. Statistics on soyfoods in China during the 1980s. 3. The Swedish trading mission in Canton during the 1700s and 1800s and its work with soy sauce. 4. A lengthy, scholarly history (with an extensive bibliography) of soybeans and soyfoods in China written by a Chinese. 5. A lengthy, scholarly history (with an extensive

bibliography) of soybeans and soyfoods in Japan written by a Japanese. 6. A lengthy, scholarly history (with an extensive bibliography) of soybeans and soyfoods in Korea written by a Korean. 7. A history of the health foods industry in America, 1930-1980. 8. A book on mochi or how mochi came to the West, with a clear chronology of commercial mochi manufacturers in the western world.

9. A scholarly history (with an extensive bibliography) of each of the following soyfoods in Japan, written by a Japanese with a long-term involvement in the field: natto, miso, shoyu, tofu. 10. Explain why Linnaeus stated in *Hortus Cliffortianus* (1737, p. 499) that the soy bean was grown in the colony of Virginia in North America. 11. A lengthy, scholarly history (with a good bibliography) of Chinese growing and processing soybeans in California. They must have grown them between 1849 and 1899! (13 Sept. 1991)

12. Visit the best libraries and centers in Germany for doing research on soybeans and soyfoods (See #37465) and try to get missing old documents.

13. Try to document the statement that the soybean was used as a coffee substitute during the Civil War in the USA (1861-1865).

14. Use the Coker family archives in South Carolina to write a history of the company’s pioneering work with the soybean.

15. A history of early experimental gardens such as those that the Portuguese developed on the Cape Verde Islands, the British at Kew, Nairobi, Singapore, and the colony of Georgia (the Trustees’ Garden of Georgia, a government experimental farm at Savannah, laid out in 1733), the Spanish (under Cortez / Cortés) in today’s Mexico, etc.

4360. *SoyaScan Notes*. 2009. Chronology of Soyfoods Center: The work of William Shurtleff and Akiko Aoyagi. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1. Introducing soyfoods to the West: Popular books (1972 Oct.–1979 July).

The Book of Tofu:

1972 Oct. 22–First visit to San-gen-ya tofu shop in Tokyo. Mr. Toshio Arai begins to teach William Shurtleff the traditional art of making tofu.

1972 Dec. 22–Meet Nahum Stiskin of Autumn Press. Start to write tofu booklet.

1973 Jan. 13–Sign contract for *Book of Tofu* with Autumn Press.

1973 March 2–Visit Sasa-no-yuki tofu restaurant in Tokyo.

1975 Dec. 12–*The Book of Tofu** published by Autumn Press.

* = Book illustrated by Akiko Aoyagi.

1978 Dec. 22–*The Book of Tofu** published by Ballantine Books in a mass-market pocketbook edition that

retails for \$2.95.

The Book of Miso

1974 Feb/March—Study miso and shoyu in Japan on trip with Bob Gerner, head of Westbrae Natural Foods.

1974 May 7—Start to write *The Book of Miso*, table of contents.

1975 April—Autumn Press accepts idea of publishing *The Book of Miso*. Contract signed Aug. 18.

1976 Sept. 23—*The Book of Miso** published by Autumn Press.

1976 Sept. 29—1977 Feb. 3—Tofu & Miso America Tour. We do 70 public programs, many TV and radio interviews, drive our van 15,000 miles in 17 weeks.

The Book of Tempeh

1977 May—To Indonesia for one month of tempeh research.

1978 Feb. 27—Sign contract with Harper & Row.

1979 July 14—*The Book of Tempeh** published by Harper & Row.

2. Working to build a soyfoods industry in the Western world (1977 April—present)

1977 April 5—Establish Takai Tofu and Soymilk Equipment Co.

1977 Aug. 16—First Takai catalog of tofu and soymilk equipment published.

1977 Aug. 16—*Miso Production** published by Soyfoods Center—the first book we self-published.

1978 July 28-30—The Soycrafters' Association of North America is founded in Ann Arbor, Michigan. William Shurtleff helps to organize the inaugural meeting, is a founding member, and a member of the first board of directors.

1978—Soyfoods Center starts to develop a mailing list (typed so as to fit on pressure sensitive labels) of all people who have purchased books or contacted us.

1979 July 15—*Tofu and Soymilk Production** published by Soyfoods Center.

1979 July—The first issue of *Soycraft* magazine is published by Richard Leviton, director of Soycrafters' Association in Massachusetts. Each mailing is based on the use of Soyfood Center's mailing list—free of charge.

1980 March 10—*Tempeh Production** published by Soyfoods Center.

1980 Sept.-Dec.—Our mailing list of about 5,000 names and addresses, divided into 70 coded categories, is computerized by Parallel Procedures in San Francisco. This was done primarily to help Richard Leviton of *Soycraft* magazine.

1981 Dec.—There are now 10,900 names on our computerized Soyfoods mailing list, rising to 13,800 names by May 1982.

3. Documenting the history of soybeans and soyfoods (1980 Oct.—present)

1980 Sept. 10—Start to build what we hope will become a large library at Soyfoods Center with regular trips to the University of California at Berkeley library system.

1980 Oct. 22—Start writing *History of Soybeans and Soyfoods*.

1984 June 1—History book manuscript is now completely in our word processor: 2,500+ pages, 70+ chapters.

1984 June 21—Soyfood Center's annual summer intern program begins. Irene Yen, a Stanford student starting her senior year, is our first summer intern.

1984 July 17—*History of Tempeh* published—our first history book.

4. Studying the burgeoning soyfoods industry and market (1982 Sept.—1985 Feb.)

1982 May 16—*Soyfoods Directory and Databook* (1st edition) published. Renamed *Soyfoods Industry and Market: Directory and Databook* on 26 Feb. 1983. 3rd edition.

1982 Sept. 10—*Soyfoods Labels, Posters, and Other Graphics* published.

1984 Feb. 25—*Soymilk Industry and Market* published.

1985 Feb. 22—*Tofutti and Other Soy Ice Creams* published.

1990 May 8—*Tofu Industry and Market in Europe* published.

1990 July 17—*Soymilk Industry and Market in Europe* published.

1994 Jan.—*Soyfoods Industry and Market: Bibliography and Sourcebook* published.

5. Foreign language editions of our books are published (1980 -)

1980 July—*Das Miso Buch** (hardcover and paperback) published by Ahorn Verlag (Wolfgang and Gabriella Furth-Kuby) in Germany.

1981 Aug.—*Das Tofu Buch** (hardcover) published by Ahorn Verlag in Germany.

1988 Nov.—*Das Tempeh Buch** (hardcover) published by Ahorn Verlag in Germany—6 years after the project started.

1988 Nov.—New German pocketbook editions of *Das Tofu Buch* and *Das Miso Buch* (paperback) published by Goldmann Verlag.

6. Developing a computerized information center (1980 Dec.—present).

1980 Dec. 12—Mailing lists of Soyfoods Center and Soyfoods magazine merged and computerized by Parallel Procedures in San Francisco. 5,500 names in 50 categories.

1983 Sept. 28—Install first computer at Soyfoods Center, IBM-PC with 20 MB hard disk and word processing software to use for writing our book on *History of Soybeans and Soyfoods*.

1985 May 9—Install Revelation database manager software for developing a computerized bibliographic database on soya.

1985 July 31—Finish keying all 6,677 file cards (3x5 inch) into our computerized database. Our library is now computerized.

1985 Aug. 30—Our computerized database, containing 9,500 bibliographic records, is now available for use by the public.

1986 Sept. 1-16—The first of many trips to do library research at the USDA National Agricultural Library, Library of Congress, and National Library of Medicine—America's three national libraries, all located in and about Washington, DC.

1987 July 6—Start entering Commercial Soy Products into our database.

1987 Oct. 11—*Bibliography of Soymilk, from 1578 to 1987: With 1,584 References* published—our first bibliography.

1987 Oct. 19—Coin the name SoyaScan, start using it to refer to our computerized database, and apply for a registered trademark, which we are issued on 19 July 1988.

1993 Feb.—Install a Novell 5-user network to link our various computers.

1995 Feb. 11—We enter the 50,000th record into our SoyaScan database.

1997 Nov. 24—We enter the 55,000th record into our SoyaScan database.

7. Current status of computerized information—2000 January 1

SoyaScan database now contains 59,440 records from 1100 B.C. to the present, including 48,318 published documents, 12,683 commercial soy products, 4,628 original interviews and overviews, and 41,584 unpublished archival documents.

More than 75% of all SoyaScan records have a summary/abstract averaging 143 words in length.

More than 26,000 records (44% of the total) are for documents published before 1970.

Thirty five major books in the series Bibliographies and Sourcebooks on Soya, produced from the SoyaScan database, are now available, published by Soyfoods Center.

Soyfoods Center Library owns about 54,000 documents, almost all of which have a record in the SoyaScan database.

SoyaScan Directory now contains the name, address, and phone number of 17,300 people and organizations worldwide actively involved with soyfoods and soybeans. Each entry is coded to show the type of activity, e.g. 2A = Tofu manufacturers.

8. Collecting and Publishing Information on Vegetarianism and Other Non-Soy Food Products that can Replace Animal Products.

1984 Oct. 31—Create our first vegetarian keyword (subject heading) *VegeAnim* = Vegetarian Diets and Animal Rights.

1988 Feb. 21—*Amazake and Amazake Frozen Desserts: Industry and Market in North America* published. Updated

bibliographic supplement published in March 1995.

1992 Oct.—Start actively collecting information specifically on vegetarianism and veganism, and entering it into our new *VegeScan* database.

1992 March 4—*Bibliography of Vegetarianism: 1,755 References from A.D. 1170 to 1992, Extensively Annotated* published (360 p. large format, preliminary edition).

1992 June 12—*Sourcebook on Wheat Gluten Foods and Seitan* published. Expanded edition published in Jan. 1994.

2000 Jan. 1—*VegeScan* database now contains 5,500 bibliographic records on vegetarianism and veganism from 238 B.C. to the present.

Best selling books from Soyfoods Center (English-language editions only, as of Jan. 2000).

The Book of Tofu—557,000 copies sold.

The Book of Miso—115,900 copies sold.

The Book of Tempeh—47,950 copies sold.

Tofu & Soymilk Production—5,020 copies sold.

Other—9,200 copies sold.

Total—775,070 copies sold. Address: Lafayette, California. Phone: 925-283-2991.

4361. *SoyaScan Notes*. 2009. Translations of documents on soya from Asian languages to English, wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1. Translate from Chinese: C.N. Li, comp. 1958. *Dou-lei [Varieties of beans]*. This book contains every known quotation about soybeans published in China from 1100 B.C. to recent times—100 pages total on soybeans. It is a treasury of key historical information that has never been translated into English.

2. Translate from Japanese: Wataru Kawamura. 1958. *Miso enkakushi [History of miso]*. 817 p. 22 cm. The definitive book on this subject. Pages 187-213 list all early Japanese books mentioning miso, with a summary of what each says.

4362. *SoyaScan Notes*. 2009. Chronology of miso and soybean chiang. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1st century B.C.—Soybean chiang is first mentioned in China in the *Shih chi [Historical records]* by Ssu-ma Ch'ien, and in the *Chi chiu p'ien [Primer on addressing matters]*, by Shih Yu.

535 A.D.—The *Ch'i min yao shu* in China gives the first detailed descriptions of making soybean chiang—and other soyfoods.

701—Soybean hishio, miso, and soy nuggets start to be made in Japan by the *Hishio Tsukasa*, a government bureau. References to these seasonings are found in documents published between 730 and 748.

901-08—The modern word for *miso* first appears in Japan in the *Sandai Jitsuroku*.

927—The *Engi Shiki* gives the first details about the production of soybean hishio-miso in Japan.

1597—Miso is first mentioned by a Westerner, the Florentine Francesco Carletti; he calls it *misol*.

1712—Englebert Kaempfer, a German who lived in Japan, is the first European to give detailed descriptions of how miso and shoyu are made in Japan. Also mentions koji.

1727—Miso is first mentioned in an English-language publication, *The History of Japan*, by E. Kaempfer. He spells it “*Midsu*, a mealy Pap, which they dress their Victuals withal, as we do butter.”

1779—The word “miso” (“that is used as butter”) first appears in an English-language publication, the *Encyclopaedia Britannica*. 1847—The word “miso” first appears in print in the United States, in a letter from T.W.H. of Cambridge, Massachusetts, to the *Farmers’ Cabinet and Herd Book*.

1908—Miso is first made commercially in the continental United States by the Fujimoto Co. of San Francisco, California. Brand name: Kanemasa Miso.

1921—The term “bean paste” is first used to refer to miso by J.L. North of England in the *Illustrated London News*.

1929—Amano Brothers, Canada’s first commercial miso maker, starts in Vancouver, British Columbia. Founder: Mr. Teiichi Amano. 1960—Dr. C.W. Hesseltine and K. Shibasaki, of the Northern Regional Research Laboratory in Peoria, Illinois, publish the first of many important scientific articles on miso.

1963—Michio and Aveline Kushi, teachers of macrobiotics in Boston, start to teach Americans about miso.

1966 April—Aveline Kushi (with Evan Root) starts Erewhon, a pioneering retailer in Boston, that soon starts selling miso.

1968—Erewhon expands to become an importer and distributor of natural and macrobiotic food. Their first two misos, Mugi Miso and Hacho Miso, are imported from Japan.

1976 June—Miyako Oriental Foods, a division of Yamajirushi Miso Co. in Japan, starts making miso in Los Angeles. Owned by Noritoshi Kanai. Brands: Yamajirushi, Kanemasa, Yamaizumi.

1976 Sept.—*The Book of Miso*, by Shurtleff and Aoyagi, is published by Autumn Press of Hayama, Japan. This is the first book about miso in the Western world.

1978 Oct.—The Ohio Miso Co., the first Caucasian-run miso company in the Western world, is founded by Thom Leonard and Richard Kluding. They begin miso production on 13 March 1979.

1978 Nov.—Joel Dee of Edward & Sons (New Jersey) launches Natural Instant Miso Cup, an instant miso soup made with freeze-dried miso from Japan.

1978 Dec.—Miyako Oriental Foods of Los Angeles introduces Cold Mountain Firm Granular Rice Koji, the first

koji sold commercially in the USA. In 1979 they start selling Cold Mountain Miso, the first miso with an American-style brand.

1979 Oct.—John and Jan Belleme arrive in Japan to study traditional miso—and koji-making with the Onozaki family in Yaita, Japan. They are the first Caucasians to do this, and then to return to the West to start making miso commercially. From 1981 on they write many superb articles about miso, published in America.

1979 April—Shin-Mei-Do Miso is founded by Lulu and Yasuo Yoshihara in British Columbia, Canada.

1981 April—John Troy of Elf Works, Ltd. in Chapel Hill, North Carolina, launches Hot Stuff, an early and very successful American miso product. He first learned about miso from Joel Dee.

1981 Aug.—John and Jan Belleme begin full-time, large-scale production of miso and koji at Erewhon Miso Co. in Rutherfordton, North Carolina. By early 1982 their company is renamed American Miso Co. with Barry Evans as the new owner.

1982 Oct. 25—Christian and Gaella Elwell start making miso and koji at South River Miso Co. in Conway, Massachusetts. Earlier that year they purchased The Ohio Miso Co. Address: Lafayette, California. Phone: 925-283-2991.

An asterisk (*) at the end of the record means that SOYFOODS CENTER does not own that document.

A plus after eng (eng+) means that SOYFOODS CENTER has done a partial or complete translation into English of that document.

An asterisk in a listing of number of references [23* ref] means that most of these references are not about soybeans or soyfoods.

- Enzyme active soy flour. *See* Soy Flour, Grits, and Flakes–Enzyme Active
- Enzymes (General). 319, 348, 452, 465, 591, 617, 1310, 1566, 2332, 3431, 3562
- Enzymes–Commercial Enzyme Preparations Used in Making Soyfoods by Hydrolyzing or Modifying Soy Protein, Carbohydrates, or Lipids (Including Phosphatides). 775, 907, 1363, 1472, 1473, 1602, 1669, 1727, 1752, 2449, 3082, 3308
- Enzymes Produced During Fermentations Involving Koji or *Aspergillus Oryzae* (Including Enzymes in Miso and Fermented Soy Sauce). 279, 281, 298, 328, 337, 347, 358, 377, 451, 452, 465, 643, 644, 663, 688, 702, 706, 753, 776, 822, 847, 852, 923, 1023, 1069, 1125, 1131, 1160, 1222, 1306, 1343, 1377, 1421, 1468, 1542, 1611, 1689, 1756, 1877, 1928, 1959, 1966, 1968, 2066, 2182, 2193, 2243, 2255, 2260, 2308, 2315, 2399, 2449, 2651, 2866, 2881, 2882, 2966, 2978, 3002, 3024, 3088, 3165, 3201, 3220, 3227, 3240, 3250, 3253, 3271, 3276, 3279, 3383, 3392, 3453, 3479, 3598, 3765, 4090
- Enzymes Produced During Fermentations Involving Tempeh, Natto, Fermented Tofu, or Soy Nuggets. 319, 347, 451, 476, 477, 547, 644, 663, 706, 847, 1144, 1468, 1877, 1959, 1968, 2066, 2255, 2379, 2651, 3070, 3227, 3347, 3383, 3510, 3598
- Enzymes in Soybean Seeds–Lipoxygenase (Formerly Called Lipoxidase) and Its Inactivation. 1270, 1385, 3425, 3718, 3883, 3928, 3939, 3992, 4090, 4149, 4223
- Enzymes in Soybean Seeds–Other. 566, 641, 649, 782, 1286, 1388, 1630, 2084, 3721
- Enzymes in Soybean Seeds–Urease and Its Inactivation. 649, 1623, 1631, 3718
- Equipment for Soybean Processing (Not Including Farm Machinery). 1484, 1895, 1946, 2802, 3025
- Equipment for making tofu. *See* Tofu Equipment
- Equipment for soybean crushing–manufacturers. *See* Anderson International Corp., Blaw-Knox Co. and Rotocel, French Oil Mill Machinery Co.
- Erewhon (Boston, Massachusetts). Founded April 1966 by Aveline and Michio Kushi in Boston. Merged with U.S. Mills in 1986. 999, 1354, 1422, 1423, 1457, 1458, 1459, 1485, 1488, 1495, 1498, 1499, 1519, 1533, 1536, 1540, 1541, 1579, 1595, 1597, 1646, 1658, 1659, 1677, 1696, 1697, 1706, 1748, 1771, 1772, 1773, 1776, 1797, 1843, 1850, 1852, 1867, 1879, 1927, 1931, 1939, 1940, 1941, 1948, 1949, 2043, 2120, 2148, 2186, 2240, 2242, 2251, 2350, 2384, 2387, 2439, 2446, 2447, 2448, 2458, 2459, 2470, 2471, 2527, 2590, 2641, 2686, 2687, 2740, 2746, 2751, 2846, 2947, 2996, 3179, 3265, 3289, 3298, 3337, 3338, 3374, 3500, 3560, 3562, 3577, 3585, 3615, 3618, 3619, 3620, 3629, 3630, 3631, 3632, 3633, 3637, 3647, 3649, 3655, 3775, 3807, 3818, 3819, 3820, 3859, 4039, 4040, 4041, 4042, 4052, 4053, 4054, 4058, 4063, 4104, 4112, 4117, 4119, 4125, 4126, 4362
- Erewhon–Los Angeles / West. Established Sept. 1969. Purchased from Erewhon (Boston) by John Fountain & John Deming on 1 Aug. 1975, then Broken Up and Re-Sold in 1979. Part Became Erewhon West. 1519, 1579, 1595, 1659, 1767, 1773, 1797, 1941, 2447, 2471, 2641, 2947, 3618, 3619, 3620
- Essene Traditional Foods (Philadelphia, Pennsylvania). 1522, 1579, 2447, 3655, 3902
- Estrogens (in Plants–Phytoestrogens, Especially in Soybeans and Soyfoods), Including Isoflavones (Including Genistein, Daidzein, Glycetein, Coumestrol, Genistin, and Daidzin). 1857, 3072, 3473, 3474, 3503, 3549, 3559, 3573, 3679, 3696, 3721, 3737, 3742, 3748, 3750, 3751, 3756, 3760, 3771, 3777, 3784, 3787, 3791, 3795, 3803, 3817, 3825, 3832, 3838, 3851, 3856, 3857, 3866, 3878, 3888, 3898, 3901, 3916, 3918, 3922, 3955, 3967, 3968, 3978, 3980, 3991, 3992, 4007, 4015, 4030, 4049, 4050, 4056,

4057, 4067, 4096, 4097, 4100, 4133, 4144, 4159, 4160, 4167, 4190, 4235, 4238, 4269, 4271, 4282, 4303, 4324

Ethanol (ethyl alcohol). *See* Solvents

Etymology (General) of Soybean Products or Closely Related Terms (Such as “Protein”). 3405, 3703

Etymology of the Word “Soy” and its Cognates / Relatives in English. 1385

Etymology of the Word “Soyfoods” and its Cognates / Relatives in Various Languages. 347, 562, 1502, 2030, 2104, 2134, 2902

Etymology of the Words “Soya,” “Soy,” and “Soybean” and their Cognates / Relatives in Various Languages. 1, 13, 15, 16, 32, 57, 90, 124, 127, 129, 130, 139, 140, 142, 145, 148, 154, 161, 163, 164, 165, 171, 178, 184, 185, 186, 194, 195, 197, 198, 228, 232, 235, 242, 243, 245, 271, 273, 280, 282, 295, 308, 316, 331, 332, 349, 392, 414, 436, 445, 446, 455, 524, 532, 548, 549, 575, 641, 650, 664, 695, 786, 856, 893, 1132, 1179, 1781, 1875, 2072, 2285, 2487, 2765

Etymology of vegetarianism. *See* Vegetarianism–Etymology

Etymology. *See* the specific product concerned (e.g. soybeans, tofu, soybean meal, etc.)

Euronature (Paris, France). *See* Lima N.V. / Lima Foods (Sint-Martens-Latem, Belgium; and Mezin, France)

Europe, Eastern–Bulgaria. 912, 1013

Europe, Eastern–Croatia (Hrvatska; Declared Independence from Yugoslavia on 21 June 1991; Includes Istria or Istrian Peninsula and Rijeka (formerly Fiume)). 211, 227, 562, 912, 2875, 3568

Europe, Eastern–Czech Republic (Ceská Republika; Including Bohemia or Cechy, and Moravia or Morava. From 1918 until 1 Jan. 1993, Western Part of Czechoslovakia, which also included Slovakia or Slovensko). 211, 219, 220, 227, 228, 275, 279, 393, 477, 561, 691, 693, 2855

Europe, Eastern–Czechoslovakia (From 1918 until 1 Jan. 1993; then divided into The Czech Republic [formerly Bohemia and Moravia], and Slovakia [officially “The Slovak Republic”]). 666, 691, 693, 856, 876, 893, 1013, 2855, 3615, 3650, 4064

Europe, Eastern–Hungary (Magyar Köztársaság). 198, 211, 219, 220, 222, 226, 228, 233, 239, 243, 279, 280, 287, 288, 312, 324, 333, 417, 453, 477, 491, 524, 562, 641, 660, 856, 912, 930, 1013, 2691, 3615

Europe, Eastern–Introduction of Soybeans to. Earliest document seen concerning soybeans or soyfoods in connection with (but not yet in) a certain Eastern European country. 162, 198

Europe, Eastern–Introduction of Soybeans to. This document contains the earliest date seen for soybeans in a certain Eastern European country. 339

Europe, Eastern–Introduction of Soybeans to. This document contains the earliest date seen for the cultivation of soybeans in a certain Eastern European country. 339

Europe, Eastern–Moldova (Moldavia until Aug. 1991; Formerly Moldavian SSR, a Soviet Republic from 1917 to 26 Dec. 1991). 1013

Europe, Eastern–Poland. 255, 339, 524, 641, 856, 876, 912, 1013, 1031, 1239, 1251, 3615

Europe, Eastern–Romania (Including Moldavia and Bessarabia until 1940-44). 524, 856, 912, 1013

Europe, Eastern–Russia (Russian Federation; Formerly Russian SFSR, a Soviet Republic from 1917 to Dec. 1991). 162, 192, 194, 196, 227, 234, 237, 241, 244, 247, 260, 336, 338, 339, 355, 420, 421, 426, 435, 443, 446, 453, 456, 469, 477, 491, 513, 524, 534, 535, 649, 751, 858, 865, 874, 912, 930, 980, 1013, 2534, 3146, 3516, 3561, 3565, 3631, 4082, 4359

Europe, Eastern–Serbia and Montenegro (Named Yugoslavia before 13 March 2002). Composed of Serbia and Montenegro (Plus Autonomous Provinces of Vojvodina and Kosovo) since 17 April 1992. 3568, 3783, 3885, 3886, 3908

Europe, Eastern–Slovakia (Slovak Republic, or Slovensko; Eastern Part of Czechoslovakia from 1918 until 1 Jan. 1993). 893

Europe, Eastern–Slovenia (Slovenija; Declared Independence from Yugoslavia on 21 June 1991). 211, 227, 562, 912, 3287, 3568, 3788

Europe, Eastern–USSR (Union of Soviet Socialist Republics or Soviet Union; called Russia before 1917. Ceased to exist in Dec. 1991). 641, 649, 696, 712, 751, 856, 858, 865, 874, 876, 912, 980, 1013, 1020, 1384, 2102, 2534, 2535, 3062, 3146, 3325, 3412, 3516, 3561, 3565

Europe, Eastern–Ukraine (Ukrayina; Formerly Ukrainian SSR, a Soviet Republic from 1917 to Dec. 1991). 336, 338, 339, 393, 414, 477, 524, 912, 1013, 3062, 3325, 3516, 3561

Europe, Eastern–Yugoslavia. Composed of Serbia and Montenegro from 17 April 1992 to 13 March 2002. From 1918-1991 included the 6 Republics of Serbia / Servia, Croatia, Bosnia and Herzegovina, Slovenia, Macedonia, and Montenegro. Included Carnaro, Fiume / Rijeka / Rieka 1947-1992; Formerly Also Spelled Yugoslavia. *See* also Serbia and Montenegro. 912, 1013, 2875, 3287, 3561, 3568, 3615, 3908

Europe, Western–Andorra, Principality of. 3615

Europe, Western–Austria (Österreich). 198, 210, 211, 219, 220, 222, 226, 228, 230, 233, 239, 243, 256, 261, 279, 280, 287, 288, 295, 299, 319, 328, 333, 334, 338, 339, 348, 372, 399, 400, 446, 451, 452, 456, 465, 477, 524, 526, 527, 534, 535, 561, 562, 608, 619, 638, 641, 649, 751, 856, 874, 876, 912, 1013, 1460, 1677,

2218, 2473, 2975, 3017, 3244, 3354, 3371, 3408, 3410, 3615, 3908, 4082, 4158, 4169

Europe, Western–Belgium, Kingdom of. 318, 435, 456, 524, 534, 598, 638, 641, 686, 749, 856, 1013, 1130, 1141, 1155, 1183, 1440, 1441, 1496, 1526, 1527, 1579, 1659, 1677, 1836, 1861, 1876, 1880, 1916, 2220, 2278, 2380, 2383, 2437, 2445, 2469, 2470, 2471, 2592, 2619, 2691, 2698, 2757, 2831, 2929, 2930, 2996, 3017, 3121, 3134, 3193, 3310, 3328, 3379, 3407, 3408, 3410, 3416, 3434, 3463, 3464, 3483, 3560, 3579, 3613, 3615, 3634, 3646, 3720, 3740, 4082

Europe, Western–Denmark (Danmark; Including the Province of Greenland [Kalaallit Nunaat]). 166, 420, 451, 456, 524, 534, 641, 649, 724, 767, 874, 912, 1579, 1615, 1677, 1916, 2295, 2469, 2564, 2619, 2701, 3408, 3410, 3551, 4082

Europe, Western–Finland (Suomen Tasavalta). 1239, 2469, 3615, 4082

Europe, Western–France (République Française). 130, 132, 135, 142, 146, 168, 174, 178, 192, 194, 202, 209, 215, 216, 219, 220, 222, 224, 226, 228, 231, 233, 236, 239, 262, 275, 283, 287, 288, 295, 318, 326, 331, 333, 352, 354, 372, 381, 392, 393, 397, 406, 414, 420, 422, 427, 435, 438, 439, 440, 445, 446, 453, 456, 460, 465, 474, 475, 477, 503, 504, 524, 534, 535, 550, 560, 561, 562, 572, 575, 597, 598, 636, 638, 641, 649, 686, 703, 724, 767, 772, 836, 856, 858, 867, 873, 874, 876, 893, 912, 929, 930, 940, 948, 951, 955, 956, 969, 1013, 1038, 1081, 1082, 1086, 1130, 1144, 1155, 1183, 1268, 1270, 1298, 1344, 1375, 1388, 1440, 1441, 1478, 1487, 1501, 1560, 1579, 1660, 1677, 1789, 1836, 1843, 1867, 1916, 1975, 2183, 2220, 2243, 2259, 2268, 2278, 2285, 2307, 2348, 2349, 2371, 2383, 2388, 2397, 2437, 2464, 2469, 2528, 2577, 2592, 2619, 2672, 2675, 2676, 2687, 2691, 2715, 2739, 2757, 2830, 2862, 2887, 2928, 2929, 2930, 2965, 2967, 2997, 3002, 3013, 3014, 3133, 3134, 3163, 3211, 3328, 3408, 3410, 3422, 3440, 3441, 3465, 3466, 3467, 3468, 3483, 3499, 3548, 3551, 3613, 3615, 3634, 3687, 3688, 3697, 3736, 3740, 3757, 3773, 3864, 3893, 3908, 3909, 3917, 3920, 3992, 4081, 4082, 4130, 4352

Europe, Western–Germany (Deutschland; Including East and West Germany, Oct. 1949–July 1990). 127, 129, 141, 165, 171, 194, 198, 203, 208, 210, 212, 223, 226, 227, 233, 238, 239, 240, 241, 242, 243, 248, 249, 250, 255, 261, 263, 264, 267, 268, 269, 273, 275, 276, 277, 278, 279, 280, 281, 284, 291, 294, 298, 299, 300, 301, 309, 310, 311, 313, 316, 319, 324, 332, 334, 348, 350, 355, 356, 375, 376, 386, 399, 400, 414, 420, 432, 435, 439, 446, 448, 449, 456, 458, 471, 488, 489, 494, 495, 504, 510, 516, 522, 524, 527, 534, 535, 537, 538, 561, 562, 570, 575, 598, 608, 619, 638, 641, 649, 652, 662, 663, 667, 684, 686, 690, 691, 692, 724, 735, 751, 767, 847, 856, 858, 874, 876, 882, 893, 912, 948, 961, 971, 977, 1017, 1031, 1108, 1125, 1130, 1223, 1268, 1329, 1373, 1579, 1618, 1664, 1677, 1916, 1945, 1969, 2028, 2116, 2182, 2232, 2278, 2295, 2360, 2371, 2419, 2437, 2445, 2469, 2490, 2519, 2559, 2619, 2645, 2656, 2691, 2721, 2722, 2849, 2867, 2981, 3017, 3056, 3234, 3267, 3306, 3321, 3336, 3360, 3363, 3389, 3408, 3410, 3443, 3447, 3477, 3482, 3483, 3489, 3490, 3522, 3526, 3527, 3528, 3529, 3558, 3566, 3635, 3654, 3696, 3710, 3724, 3725, 3726, 3727, 3729, 3736, 3740, 3751, 3752, 3757,

3768, 3776, 3849, 3864, 3875, 3891, 3908, 3914, 3952, 3954, 3989, 3992, 4077, 4082, 4130, 4135, 4156, 4158, 4169, 4233, 4303, 4359, 4360, 4362

Europe, Western–Greece (Hellenic Republic–Elliniki Dimokratia–Hellas. Including Crete, Krite, Kriti, or Creta, and Epirus or Epeiros). 912, 1511, 3400

Europe, Western–Iceland (Lydhveldidh or Lyoveldio Island). 3615

Europe, Western–Introduction of Soy Products to. Earliest document seen concerning soybean products in a certain western European country. Soybeans as such have not yet been reported in this country. 420

Europe, Western–Introduction of Soybeans to. Earliest document seen concerning soybeans in a certain Western European country. 194, 318, 836

Europe, Western–Introduction of Soybeans to. Earliest document seen concerning soybeans or soyfoods in connection with (but not yet in) a certain Western European country. 87, 90, 127

Europe, Western–Introduction of Soybeans to. Earliest document seen concerning the cultivation of soybeans in a certain Western European country. 318, 836

Europe, Western–Introduction of Soybeans to. This document contains the earliest date seen for soybeans in a certain Western European country. 194, 318, 597, 836

Europe, Western–Introduction of Soybeans to. This document contains the earliest date seen for the cultivation of soybeans in a certain Western European country. 318, 597, 836

Europe, Western–Ireland, Republic of (Éire; Also Called Irish Republic). 420, 1677, 2469, 2602, 2619, 2631, 2740, 3615

Europe, Western–Italy (Repubblica Italiana). 87, 95, 125, 194, 239, 288, 393, 405, 414, 420, 435, 446, 456, 481, 488, 524, 534, 535, 597, 616, 638, 641, 649, 686, 735, 751, 856, 874, 876, 912, 993, 1044, 1147, 1239, 1251, 1268, 1294, 1320, 1384, 1579, 1677, 1916, 2024, 2185, 2278, 2360, 2371, 2437, 2559, 2619, 2691, 3159, 3408, 3410, 3586, 3613, 3615, 3641, 3711, 3808, 3839, 3947, 4082, 4085

Europe, Western–Netherlands, Kingdom of the (Koninkrijk der Nederlanden), Including Holland. 100, 101, 102, 103, 104, 105, 108, 109, 110, 111, 113, 114, 129, 145, 146, 147, 157, 164, 165, 166, 168, 192, 245, 288, 302, 304, 310, 311, 343, 347, 349, 361, 387, 420, 435, 456, 477, 496, 507, 508, 524, 534, 540, 547, 574, 641, 649, 650, 652, 670, 686, 695, 724, 751, 759, 760, 765, 766, 767, 828, 856, 874, 876, 912, 918, 964, 987, 1013, 1017, 1064, 1066, 1441, 1486, 1579, 1677, 1790, 1846, 1875, 1916, 1979, 2190, 2295, 2307, 2407, 2408, 2428, 2437, 2445, 2469, 2520, 2526, 2562, 2619, 2623, 2636, 2658, 2659, 2699, 2711, 2768, 2829, 2830, 2831, 2866, 2871, 2887, 2891, 2973, 3163, 3246, 3292, 3310, 3345, 3352, 3379, 3407, 3408, 3410, 3416, 3418, 3454, 3483, 3496, 3560, 3628, 3740, 3824, 3840, 3864, 3989, 4034, 4036, 4072, 4082, 4158, 4187, 4212, 4330, 4347, 4355

- Europe, Western–Norway, Kingdom of (Kongeriket Norge). 194, 420, 446, 456, 724, 874, 1031, 1677, 3615

- Feeds—Efficiency of Animals in Converting Feeds into Human Foods. 1538, 1783, 1787, 1849, 1853, 1855, 2134, 2493, 2661, 4028, 4173, 4294, 4298, 4335
- Feeds—Soybeans, soybean forage, or soy products fed to various types of animals. *See* The type of animal—chickens, pigs, cows, horses, etc.
- Feeds / Forage from Soybean Plants—Hay (Whole Dried Soybean Plants, Foliage and Immature Seed Included). 228, 239, 262, 265, 273, 317, 318, 320, 326, 346, 449, 469, 477, 513, 524, 641, 667, 732, 734, 1197, 1631, 2072, 3939
- Feeds / Forage from Soybean Plants—Pasture, Grazing or Foraging. 346, 446, 641, 732, 734, 798, 856
- Feeds / Forage from Soybean Plants—Pastures & Grazing—Hogging Down / Off, Pasturing Down, Grazing Down, Lambing Down / Off, and Sheeping-Down / Off. 446, 641, 732, 734, 798
- Feeds / Forage from Soybean Plants—Silage / Ensilage Made in a Silo. 219, 222, 228, 317, 346, 469, 524, 641, 732, 734, 736, 798, 856, 910, 951, 1047
- Feeds / Forage from Soybean Plants—Soilage and Soiling (Green Crops Cut for Feeding Confined Animals). 641, 732, 734, 798, 2758
- Feeds / Forage from Soybean Plants—Straw (Stems of Whole Dried Soybean Plants). Also Fertilizing Value, Other Uses, Yields, and Chemical Composition. 211, 226, 227, 238, 239, 244, 248, 267, 280, 317, 346, 449, 477, 524, 732, 734, 736, 836, 1047
- Feeds / Forage from Soybean Plants or Full-Fat Seeds (Including Forage, Fodder {Green Plants}, or Ground Seeds). 21, 22, 52, 61, 62, 67, 73, 92, 93, 129, 177, 209, 223, 224, 229, 231, 232, 233, 245, 260, 282, 290, 338, 339, 370, 372, 405, 412, 417, 420, 423, 431, 435, 448, 459, 491, 534, 542, 543, 554, 560, 561, 562, 577, 606, 649, 696, 726, 754, 767, 782, 786, 858, 873, 874, 876, 940, 955, 962, 980, 1013, 1366
- Feeds Made from Soybean Meal (Defatted). 265, 320, 412, 420, 421, 442, 449, 454, 469, 477, 515, 534, 542, 543, 609, 616, 649, 696, 782, 858, 865, 1012, 1113, 1164, 1239, 1446, 1538, 1629, 1775, 2288, 2324, 2483, 2493, 2990, 3139, 3150, 3405, 3438, 3460, 3703
- Feeds, Other Types (Okara, Calf Milk Replacers, Soybean Hulls, etc.). 2072, 2404
- Fermented Soyfoods and Their Fermentation (General). *See also:* Microbiology and Bacteriology—History of Early Discoveries. 203, 208, 277, 298, 300, 302, 319, 348, 350, 430, 451, 452, 465, 527, 547, 620, 621, 644, 681, 688, 706, 713, 847, 923, 957, 988, 1003, 1084, 1085, 1116, 1125, 1160, 1186, 1230, 1321, 1343, 1361, 1367, 1393, 1406, 1442, 1462, 1497, 1504, 1515, 1549, 1551, 1553, 1555, 1570, 1580, 1586, 1613, 1621, 1622, 1626, 1630, 1635, 1674, 1679, 1762, 1788, 1808, 1813, 1844, 1849, 1853, 1855, 1865, 1896, 1956, 1959, 1963, 1966, 1982, 1993, 2026, 2066, 2067, 2073, 2079, 2084, 2087, 2095, 2099, 2109, 2121, 2181, 2182, 2184, 2188, 2224, 2226, 2244, 2269, 2306, 2308, 2321, 2343, 2351, 2353, 2409, 2419, 2431, 2435, 2553, 2562, 2571, 2572, 2573, 2579, 2580, 2582, 2635, 2638, 2673, 2722, 2732, 2733, 2734, 2737, 2866, 2871, 2874, 2923, 2965, 2966, 2967, 3002, 3037, 3085, 3088, 3093, 3094, 3095, 3096, 3097, 3106, 3110, 3111, 3113, 3227, 3228, 3361, 3455, 3459, 3461, 3479, 3536, 3540, 3603, 3896, 3917, 4242, 4257, 4284, 4298, 4342
- Fermented Specialty Soyfoods—Soy Wine, Cantonese Wine Starter (Kiu-Tsee / Tsée), Soy Fermentation Pellicle or Bean Ferment (Tou Huang), Meitauza (Mei-Tou-Cha), Soyidli, Dosa / Dosai, Dhokla, and Soy Ogi. 19, 21, 22, 25, 26, 27, 56, 83, 84, 86, 222, 231, 262, 287, 333, 475, 477, 575, 670, 699, 708, 759, 760, 857, 912, 1321, 1341, 1442, 1449, 1474, 1497, 1553, 1679, 1912, 1913, 2067, 2102, 2133, 2134, 2184, 2226, 2409, 2413, 2424, 2571, 2572, 2582, 2638, 2733, 2796, 2862, 2965, 2971, 2989, 3106, 3110, 3111, 3172, 3233, 3455, 3461, 3713, 3896, 4284
- Fermented black beans (dow see). *See* Soy Nuggets
- Fermented tofu. *See* Tofu, Fermented
- Fermented whole soybeans. *See* Natto, Dawa-dawa, Kinema, Thua-nao
- Fertilizer, soybean meal used as. *See* Soybean Meal / Cake, Fiber (as from Okara), or Shoyu Presscake as a Fertilizer or Manure for the Soil
- Fertilizers / Fertilizer (Incl. Foliar Sprays), Fertilization, Plant Nutrition, Mineral Needs, and Nutritional / Physiological Disorders of Soybeans (Including Chlorosis). 198, 291, 443, 444, 453, 507, 508, 1474, 2182, 3126

Fiber–Okara or Soy Pulp–Etymology of This Term and Its Cognates / Relatives in Various Languages. 186, 200, 266, 271, 291, 363, 372, 375, 567, 788, 860, 912, 1518, 3437

Fiber–Okara or Soy Pulp, Used as an Ingredient in Commercial Soyfood Products. 913, 2210, 2880

Fiber–Okara or Soy Pulp, from Making Soymilk or Tofu–Value Added Uses (Not Including Livestock Feeds) and Solutions to Disposal Problems. 92, 372, 788, 1270, 1704, 1783, 1787, 2378, 2772, 3115, 3184, 3441, 3510, 4335

Fiber–Okara or Soy Pulp, from Making Soymilk or Tofu. 84, 92, 186, 192, 200, 253, 266, 269, 271, 291, 318, 330, 363, 372, 375, 376, 392, 405, 406, 407, 433, 455, 477, 567, 570, 606, 641, 684, 685, 690, 703, 705, 732, 734, 788, 820, 860, 912, 931, 958, 960, 964, 978, 1021, 1022, 1121, 1158, 1169, 1209, 1270, 1288, 1335, 1373, 1518, 1557, 1558, 1571, 1598, 1606, 1607, 1608, 1612, 1672, 1676, 1679, 1704, 1743, 1749, 1750, 1783, 1787, 1796, 1813, 1823, 1871, 1889, 1892, 1901, 1902, 1912, 1922, 1954, 2061, 2065, 2074, 2094, 2098, 2100, 2102, 2115, 2130, 2133, 2134, 2136, 2146, 2158, 2159, 2173, 2180, 2186, 2211, 2259, 2307, 2358, 2371, 2376, 2378, 2409, 2412, 2415, 2416, 2418, 2420, 2424, 2432, 2467, 2482, 2498, 2502, 2538, 2559, 2560, 2565, 2583, 2585, 2620, 2631, 2661, 2662, 2679, 2715, 2720, 2738, 2772, 2796, 2798, 2862, 2863, 2865, 2867, 2895, 2918, 2981, 3064, 3071, 3093, 3104, 3110, 3111, 3115, 3172, 3184, 3185, 3186, 3213, 3231, 3241, 3306, 3307, 3308, 3344, 3363, 3399, 3425, 3437, 3441, 3482, 3510, 3511, 3522, 3543, 3559, 3568, 3569, 3574, 3596, 3611, 3664, 3684, 3695, 3711, 3712, 3718, 3777, 3781, 3822, 3823, 3826, 3833, 3837, 3848, 3856, 3879, 3881, 3898, 3899, 3939, 3942, 3944, 3953, 3954, 3957, 3963, 3964, 3966, 3967, 3968, 3990, 3991, 4003, 4010, 4027, 4028, 4071, 4077, 4096, 4108, 4135, 4160, 4173, 4179, 4222, 4294, 4335

Fiber–Presscake, Residue or Dregs from Making Soy Sauce. 209, 217, 223, 291, 298, 300, 304, 334, 347, 349, 419, 448, 618, 910, 964, 1267, 1335, 3035

Fiber–Seventh-day Adventist Writings or Products (Especially Early) Related to Dietary Fiber. 3732

Fiber–Soy Cotyledon Fiber / Polysaccharides (from Making Soy Protein Isolates). 3802, 3968

Fiber, Soy–Bran (Pulverized Soybean Hulls / Seed Coats) and Other Uses of Soybean Hulls. 590, 641, 857, 1630, 2084, 2971, 3425, 3879

Fiber, Soy–Bran–Etymology of This Term and Its Cognates / Relatives in Various Languages. 590, 641, 857

Fiber, Soy–General, for Food Use (Specific Type Unknown). 3488, 3841, 4160

Fiber. *See* Carbohydrates–Dietary Fiber

Fibers (Artificial Wool or Textiles Made from Spun Soy Protein Fibers, Including Azlon and Soylo)–Industrial Uses of Soy

Proteins. 856, 1629, 3627, 3771, 3939

Fiji. *See* Oceania–Fiji

Fish or Crustaceans (e.g., Shrimp) Fed Soybean Meal or Oil as Feed Using Aquaculture or Mariculture. 4050, 4134

Fish or Crustaceans raised by Aquaculture / Fish Culture–Early–Soy Is Not Mentioned. 1, 25, 26, 27, 1989

Soy Nugget Extract (*Shizhi / Shih Chih*), and Soy Nugget Sauce (*Shiyu / Shih-yu, Shi-yau, or Kuki-jiru*). See also Black Bean Sauce. 21, 22, 25, 26, 27, 28, 32, 54, 55, 62, 66, 70, 82, 112, 126, 176, 179, 184, 204, 289, 470, 1875, 2170, 2304, 2638, 2792, 2971, 3076, 3940, 4071, 4162, 4345

Soy Nuggets—Etymology of This Term and Its Cognates / Relatives in Various Languages. 9, 10, 28, 33, 75, 78, 160, 178, 179, 330, 343, 351, 653, 703, 783, 854, 972, 1561, 1610, 2337, 3111, 4071, 4110

Soy Nuggets—Whole Soybeans Fermented with Salt—Also called Fermented Black Beans, Salted Black Beans, Salty Black Beans, Black Fermented Beans, Black Beans, Black Bean Sauce, Black Bean and Ginger Sauce, Chinese Black Beans, or Preserved Black Beans. In China (Mandarin): Shi, Doushi, or Douchi (pinyin), Tou-shih, Touthih, or Tou-ch'ih (Wade-Giles). Cantonese: Dow see, Dow si, Dow-si, Dowsi, or Do shih. In the Philippines: Tausi

or Taosi / Tao-si. In Malaysia or Thailand: Tao si. In Indonesia: Tao dji, Tao-dji, or Tao-djie. In Japan: Hamanatto, Daitokuji Natto, Shiokara Natto, and Tera Natto. 9, 10, 12, 13, 16, 18, 19, 21, 22, 24, 25, 26, 27, 28, 30, 31, 32, 33, 34, 38, 44, 46, 54, 55, 56, 62, 65, 66, 68, 69, 70, 75, 77, 78, 83, 84, 86, 92, 115, 123, 124, 126, 128, 133, 137, 138, 159, 160, 178, 179, 200, 204, 222, 231, 262, 286, 287, 307, 314, 330, 333, 343, 351, 357, 387, 419, 463, 470, 477, 480, 548, 549, 575, 641, 642, 653, 667, 670, 673, 674, 699, 703, 715, 726, 738, 745, 759, 760, 783, 854, 856, 857, 874, 910, 952, 957, 972, 978, 987, 988, 989, 991, 1007, 1014, 1015, 1020, 1043, 1061, 1097, 1109, 1123, 1124, 1141, 1174, 1201, 1207, 1209, 1234, 1263, 1321, 1334, 1335, 1336, 1337, 1341, 1361, 1368, 1374, 1386, 1393, 1404, 1437, 1440, 1441, 1442, 1449, 1462, 1477, 1487, 1497, 1504, 1553, 1561, 1562, 1591, 1610, 1613, 1629, 1630, 1634, 1664, 1674, 1678, 1679, 1684, 1710, 1728, 1746, 1747, 1751, 1783, 1787, 1792, 1795, 1818, 1823, 1824, 1827, 1841, 1842, 1854, 1860, 1875, 1881, 1883, 1884, 1902, 1907, 1909, 1910, 1912, 1922, 1969, 1977, 1989, 1995, 2006, 2021, 2039, 2065, 2067, 2082, 2084, 2099, 2100, 2108, 2121, 2163, 2184, 2188, 2224, 2263, 2264, 2265, 2287, 2288, 2294, 2303, 2304, 2311, 2321, 2326, 2337, 2344, 2353, 2354, 2372, 2409, 2424, 2433, 2465, 2481, 2484, 2534, 2552, 2558, 2572, 2582, 2638, 2652, 2661, 2662, 2679, 2714, 2774, 2792, 2798, 2799, 2826, 2862, 2865, 2872, 2883, 2891, 2923, 2965, 2971, 2977, 2984, 2991, 3016, 3076, 3085, 3088, 3090, 3096, 3110, 3111, 3147, 3172, 3228, 3262, 3287, 3297, 3306, 3358, 3359, 3366, 3414, 3425, 3452, 3453, 3454, 3455, 3461, 3496, 3502, 3557, 3569, 3603, 3633, 3677, 3684, 3713, 3718, 3728, 3770, 3809, 3840, 3848, 3860, 3879, 3896, 3906, 3923, 3943, 3946, 3957, 4019, 4022, 4028, 4071, 4072, 4110, 4150, 4155, 4162, 4173, 4178, 4182, 4186, 4197, 4245, 4280, 4284, 4294, 4301, 4335, 4337, 4342

Soy Nuggets, Unsalted or Bland (Soybean Koji)—Whole Soybeans Fermented without Salt in China (Danshi / Danchi in pinyin, or Tanshih, Tan-shih, or Tan-ch'ih in Wade-Giles). 19, 25, 44, 84, 133, 1624, 2534, 3076, 3453, 3889, 3890

Soy Oil—Etymology of This Term and Its Cognates / Relatives in Various Languages. 52, 83, 177, 184, 185, 195, 222, 227, 288, 415, 488, 924

Soy Oil Constants—Iodine Number / Value. 312, 415, 458, 566, 661, 1674

Soy Oil Constants. Includes Index of Refraction, Refractive Index, Solidification Point (*Erstarrungspunkt*), Specific Gravity. See also Iodine Number. 312, 415, 661, 3939

Soy Oil as a Commodity, Product, or Ingredient for Food Use (in Cookery or Foods). Its Manufacture, Refining, Trade, and Use. See Also: Industrial Uses of Soy Oil, and Nutrition: Lipids. 52, 54, 55, 83, 86, 92, 93, 115, 159, 167, 177, 178, 184, 185, 195, 196, 210, 211, 215, 222, 224, 227, 231, 236, 237, 238, 239, 243, 247, 262, 265, 267, 282, 283, 286, 287, 288, 289, 305, 312, 314, 318, 320, 326, 333, 336, 338, 370, 375, 381, 392, 397, 405, 406, 407, 412, 415, 416, 417, 418, 420, 421, 426, 433, 435, 448, 449, 454, 455, 456, 458, 469, 477, 480, 481, 488, 493, 510, 514, 524, 526, 531, 532, 534, 535, 541, 542, 543, 546, 554, 559, 560, 561, 562, 566, 567, 568, 570, 571, 572, 575, 577, 596, 597, 603, 609, 616,

618, 620, 621, 636, 638, 641, 642, 649, 652, 661, 664, 673, 683, 685, 690, 691, 692, 693, 696, 703, 708, 718, 724, 732, 734, 736, 754, 767, 774, 782, 798, 848, 855, 857, 858, 864, 865, 873, 874, 876, 882, 893, 912, 924, 929, 955, 956, 962, 971, 978, 980, 989, 991, 998, 1012, 1013, 1038, 1047, 1048, 1108, 1132, 1139, 1160, 1163, 1164, 1197, 1207, 1208, 1224, 1229, 1239, 1270, 1289, 1341, 1357, 1368, 1374, 1438, 1446, 1471, 1474, 1486, 1593, 1629, 1630, 1631, 1651, 1656, 1659, 1664, 1673, 1674, 1783, 1787, 1817, 1977, 1979, 2004, 2065, 2084, 2100, 2203, 2305, 2324, 2344, 2366, 2375, 2395, 2412, 2622, 2652, 2660, 2661, 2744, 2760, 2761, 2763, 2766, 2831, 2862, 2863, 2869, 2870, 2883, 2902, 2918, 2981, 2990, 2998, 3051, 3056, 3064, 3090, 3117, 3133, 3139, 3150, 3172, 3183, 3195, 3200, 3234, 3258, 3295, 3302, 3305, 3306, 3314, 3368, 3405, 3417, 3438, 3460, 3481, 3487, 3488, 3538, 3625, 3635, 3675, 3678, 3681, 3703, 3712, 3718, 3719, 3736, 3744, 3749, 3756, 3826, 3833, 3834, 3835, 3838, 3848, 3884, 3899, 3939, 4028, 4135, 4156, 4159, 4173, 4182, 4233, 4277, 4281, 4294, 4324, 4335

Soy Plant (The) (Ann Arbor, Michigan). See Tofu International Ltd.

Soy Protein Concentrates, Textured. 2809, 3939, 3957, 4213

Soy Protein Council (Food Protein Council from 1971 to Dec. 1981). 2755, 4167

Soy Protein Isolates, Concentrates, or Textured Soy Protein Products—Industry and Market Statistics, Trends, and Analyses—By Geographical Region. 1286, 2344, 2366, 2395, 2397, 2831, 2887, 2902, 2921, 3205, 3302, 3487, 3661, 3740, 4139

Soy Protein Isolates, Concentrates, or Textured Soy Protein Products—Industry and Market Statistics, Trends, and Analyses—Individual Companies. 2902, 3740

Soy Protein Isolates, Textured (For Food Use Only, Including Spun Soy Protein Fibers or Soy Isolate Gels). See also: Industrial Uses of Soy Proteins—Fibers (Artificial Wool Made from Spun Soy Protein Fibers). 1369, 1385, 1394, 1588, 1623, 1674, 1783, 1787, 1979, 2072, 2081, 2888, 3305, 3675, 3939, 3989, 4335

Soy Protein Products (General, or Modern Products). See also: Nutrition—Protein, Protein Quality, and Amino Acid Composition. 691, 693, 1118, 1201, 1231, 1286, 1487, 1588, 1629, 1630, 1690, 1734, 1752, 1907, 2006, 2072, 2084, 2112, 2174, 2338, 2346, 2366, 2371, 2396, 2487, 2513, 2618, 2777, 2798, 2809, 2891, 2902, 2918, 2919, 2921, 2981, 3011, 3090, 3137, 3150, 3258, 3302, 3581, 3740, 3834, 3884, 3957, 4151, 4160

Soy Protein and Proteins—Etymology of These Terms and Their Cognates / Relatives in Various Languages. 199, 217, 273, 393, 1132, 1198

Soy Proteins—Concentrates—Etymology of These Terms and Their Cognates / Relatives in Various Languages. 1201

Soy Proteins—Concentrates. 1201, 1286, 1369, 1385, 1471, 1623, 1630, 1631, 1674, 1783, 1787, 1857, 1911, 2081, 2084, 2268, 2344, 2395, 2397, 2721, 2831, 2887, 2928, 2998, 3040, 3071,

3090, 3121, 3172, 3195, 3415, 3675, 3677, 3718, 3721, 3741, 3742, 3760, 3777, 3805, 3817, 3825, 3826, 3833, 3835, 3856, 3879, 3898, 3899, 3942, 3952, 3963, 3967, 3989, 4007, 4049, 4096, 4135, 4148, 4149, 4176, 4335

Soy Proteins—Hydrolyzed and Hydrolysates (General), as in Flavourings, HVP, Cosmetics, Personal Care Products, Predigested Milk Replacers, etc. 3112

Soy Proteins—Isolates—Enzyme-Modified Soy Protein with Whipping / Foaming Properties Used to Replace Egg Albumen, and Early Related Whipping / Aerating Agents or Products. 1020, 1385

Soy Proteins—Isolates—Etymology of These Terms and Their Cognates / Relatives in Various Languages. 1198

Soy Proteins—Isolates, for Food Use. See also: Isolates, for Industrial (Non-Food) Use. 620, 621, 641, 929, 1020, 1109, 1197, 1198, 1201, 1251, 1286, 1305, 1360, 1369, 1471, 1623, 1630, 1631, 1664, 1674, 1857, 1909, 1911, 1979, 2081, 2084, 2344, 2371, 2395, 2397, 2691, 2831, 2887, 2918, 2924, 2928, 2998, 3007, 3071, 3090, 3121, 3172, 3195, 3205, 3305, 3314, 3362, 3368, 3415, 3487, 3514, 3675, 3677, 3678, 3718, 3721, 3736, 3740, 3741, 3742, 3760, 3777, 3791, 3805, 3825, 3826, 3833, 3834, 3835, 3855, 3856, 3879, 3881, 3898, 3899, 3916, 3918, 3939, 3942, 3952, 3954, 3963, 3966, 3967, 3968, 3970, 3990, 3992, 4007, 4016, 4030, 4049, 4050, 4056, 4060, 4096, 4108, 4135, 4148, 4149, 4160, 4167, 4176, 4179, 4190, 4192, 4237, 4277, 4287, 4292, 4328

Soy Proteins—Isolates, for Industrial (Non-Food) Use. See also: Isolates, for Food Use. 620, 621, 856, 1286

Soy Proteins—Properties (Including Types {Globulins, Glycinin, Beta- and Gamma-Conglycinin} Protein Fractions and Subunits, Sedimentation Coefficients, Nitrogen Solubility, and Rheology). 217, 223, 239, 249, 255, 263, 267, 280, 304, 306, 375, 514, 547, 620, 621, 978, 1630, 1631, 2084, 3172, 3177, 3928, 3989

Soy Proteins, Textured (General). 1630, 1735, 1857, 2044, 2084, 2268, 2757, 2766, 3172, 3195, 3205, 3425, 3644, 3675, 3708, 3720, 3749, 3918, 3924, 3959, 4159, 4160, 4277

Soy Puddings, Custards, Parfaits, or Mousses (Usually made from Soymilk or Tofu). See also Soy Yogurt—Not Fermented. 550, 724, 782, 783, 855, 1180, 1228, 1538, 1697, 1746, 1747, 1748, 1783, 1785, 1787, 1905, 1910, 2009, 2020, 2061, 2421, 2550, 2560, 2577, 2585, 2631, 2723, 2757, 2826, 3023, 3069, 3104, 3109, 3123, 3233, 3275, 3287, 3310, 3349, 3366, 3407, 3416, 3485, 3503, 3520, 3539, 3611, 3699, 3788, 3942, 3951, 3990, 3993, 3995, 4022, 4335

Soy Sauce (Including Shoyu)—Imports, Exports, International Trade. 100, 101, 102, 103, 104, 105, 108, 109, 110, 111, 113, 114, 124, 129, 145, 146, 173, 177, 184, 192, 210, 242, 257, 354, 379, 380, 389, 403, 405, 413, 418, 420, 424, 425, 428, 433, 438, 439, 448, 458, 459, 464, 470, 482, 487, 499, 501, 509, 514, 518, 557, 601, 609, 617, 618, 619, 653, 743, 828, 918, 927, 932, 995, 1066, 1079, 1440, 1441, 1469, 1485, 1489, 1495, 1618, 1677, 1714,

1771, 1924, 2039, 2243, 2445, 2472, 2475, 2528, 2590, 2595, 2596, 2629, 2630, 2632, 2701, 2742, 2947, 2963, 3013, 3133, 3163, 3245, 3263, 3304, 3312, 3324, 3329, 3333, 3337, 3338, 3370, 3379, 3403, 3407, 3417, 3418, 3437, 3454, 3482, 3483, 3496, 3545, 3548, 3562, 3577, 3628, 3697, 3747

Soy Sauce (Including Shoyu). - Soybean Seeds—Black in Color—Etymology of This Term and Its Cognates / Relatives in Various Languages. 18, 194
- Soybean Seeds—Black in Color. Food Use is Not Mentioned. 18, 54, 55, 62, 67, 73, 93, 94, 115, 127, 129, 137, 159, 165, 167, 194, 202, 209, 211, 224, 226, 228, 233, 236, 239, 245, 261, 262, 282, 286, 287, 288, 295, 314, 324, 331, 333, 336, 339, 343, 346, 349, 375, 399, 414, 417, 427, 437, 446, 453, 455, 459, 469, 471, 480, 493, 508, 534, 554, 565, 568, 570, 574, 598, 603, 609, 641, 652, 653, 703, 718, 749, 782, 786, 798, 930, 1123, 1335, 1337, 1374, 1547, 1639, 2527, 2557, 2638, 3076, 3732, 3800, 3881, 4226, 4287, 4291, 4292, 4328
- Soybean Seeds—Black in Color. Used as Food (Including in Soy Nuggets and Inyu), Beverage, Feed, or Medicine, or Their

- Nutritional Value. 18, 52, 56, 57, 61, 83, 84, 85, 86, 92, 123, 130, 139, 148, 161, 163, 178, 195, 196, 198, 222, 238, 267, 279, 280, 304, 305, 327, 330, 373, 387, 392, 393, 406, 412, 448, 463, 477, 510, 517, 547, 550, 575, 620, 621, 642, 670, 705, 759, 857, 1021, 1043, 1132, 1172, 1174, 1183, 1209, 1297, 1321, 1341, 1361, 1368, 1391, 1395, 1470, 1482, 1485, 1495, 1497, 1511, 1541, 1557, 1561, 1564, 1579, 1606, 1627, 1655, 1675, 1676, 1746, 1747, 1749, 1772, 1783, 1787, 1795, 1824, 1827, 1838, 1843, 1902, 1905, 1910, 1981, 1990, 1991, 2039, 2111, 2146, 2170, 2173, 2186, 2211, 2259, 2287, 2303, 2304, 2315, 2350, 2385, 2424, 2475, 2549, 2602, 2647, 2661, 2686, 2726, 2753, 2840, 2861, 2898, 2901, 2911, 2923, 2977, 3023, 3088, 3111, 3193, 3225, 3287, 3368, 3379, 3381, 3407, 3455, 3494, 3504, 3569, 3570, 3582, 3647, 3684, 3766, 3770, 3824, 3837, 3848, 3860, 3865, 3880, 3883, 3906, 3913, 3940, 3944, 3957, 3962, 3974, 3975, 4010, 4018, 4022, 4026, 4028, 4042, 4049, 4063, 4071, 4072, 4110, 4151, 4155, 4173, 4186, 4294, 4335
- Soybean Seeds—Brown in Color. Especially Early Records. 52, 54, 61, 115, 159, 194, 222, 224, 226, 228, 238, 239, 245, 261, 279, 280, 326, 336, 339, 393, 399, 414, 417, 446, 448, 469, 477, 493, 547, 554, 568, 930
- Soybean Seeds—Green in Color. Food Use is Not Mentioned. Early Named Varieties Include Aoda, Columbia, Giant Green, Guelph or Medium Green, Medium Early Green, Medium Green, Samarow, Sonoma, and Tashing. 21, 47, 61, 83, 84, 86, 115, 194, 209, 222, 224, 243, 245, 262, 267, 280, 305, 346, 393, 404, 414, 415, 417, 423, 446, 453, 463, 469, 477, 554, 568, 653, 718, 1341
- Soybean Seeds—Green in Color. Used as Food, Beverage, Feed, or Medicine, or Their Nutritional Value. 280, 417, 517, 705, 718
- Soybean Seeds—Mottled, Speckled, Spotted, Striped, Banded, Flecked, Variegated, or Bicolored. 52, 54, 61, 83, 115, 159, 178, 194, 209, 222, 224, 236, 245, 262, 267, 280, 446, 453, 554, 621
- Soybean Seeds—Red in Color. 52, 54, 224, 227, 236, 245, 262, 267, 280, 453, 568
- Soybean Seeds—White in Color. 18, 21, 52, 54, 55, 61, 62, 83, 84, 115, 127, 130, 139, 140, 159, 165, 166, 177, 178, 186, 195, 196, 197, 199, 209, 222, 223, 224, 236, 243, 245, 262, 266, 267, 271, 280, 282, 305, 327, 373, 375, 399, 412, 508, 517, 547, 568, 575, 576, 603, 642, 1438
- Soybean Seeds—Yellow in Color. Including Yellowish White, Cream Colored, and Pale (*Pallida*). Especially Early Records. See also: Soybean Seeds—White. 21, 22, 32, 44, 54, 55, 61, 62, 82, 83, 92, 93, 115, 123, 133, 159, 165, 167, 178, 194, 195, 196, 202, 209, 211, 215, 222, 224, 226, 227, 228, 236, 237, 238, 239, 243, 245, 257, 261, 262, 265, 267, 279, 280, 286, 305, 314, 326, 327, 331, 343, 346, 349, 361, 375, 404, 414, 417, 423, 427, 446, 448, 453, 455, 459, 469, 477, 480, 493, 532, 534, 541, 554, 559, 562, 598, 606, 620, 621, 642, 653
- Soybean Varieties Canada—Harovinton—Large-Seeded and / or Vegetable-Type. 3797, 3928, 4090, 4091
- Soybean Varieties Europe—Gelbe Riesen (“Yellow Giant” / Giant Yellow)—Early Introduction. 393, 414
- Soybean Varieties USA—Acme—Early Introduction. 446, 459, 1142
- Soybean Varieties USA—Agate—Large-Seeded and / or Vegetable-Type. 3533
- Soybean Varieties USA—American Coffee Berry—Early Introduction. Renamed Ito-San by about 1902. 346
- Soybean Varieties USA—Auburn—Early Selection (1907). 446
- Soybean Varieties USA—Austin—Early Introduction. 446
- Soybean Varieties USA—Baird—Early Introduction. 414
- Soybean Varieties USA—Bansei—Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA—Barchet—Early Introduction. 446, 459, 493, 534, 598
- Soybean Varieties USA—Biloxi—Early Introduction. 534, 798
- Soybean Varieties USA—Black Eyebrow—Early Introduction. 534, 598
- Soybean Varieties USA—Brindle—Early Introduction. 446
- Soybean Varieties USA—Brooks—Early Introduction. 446
- Soybean Varieties USA—Brownie—Early Introduction. 414
- Soybean Varieties USA—Buckshot—Early Introduction. 414, 417, 446, 469, 641
- Soybean Varieties USA—Butterball—Early Introduction. 414, 446, 641
- Soybean Varieties USA—Chernie—Early Introduction. 446
- Soybean Varieties USA—Chestnut—Early Selection (1907). 446
- Soybean Varieties USA—Chiquita—Early Introduction. 534
- Soybean Varieties USA—Cloud—Early Introduction. 446
- Soybean Varieties USA—Disoy—Large-Seeded and / or Vegetable-Type. 1390, 3661
- Soybean Varieties USA—Duggar—Early Introduction. 493
- Soybean Varieties USA—Early Brown—Early Introduction. 446
- Soybean Varieties USA—Early Green—Early Introduction. 469
- Soybean Varieties USA—Early Yellow—Early Introduction. Renamed Ito San by about 1902. 554

- Soybean Varieties USA–Easycook / Easy Cook–Early Introduction. Large-Seeded and/or Vegetable-Type. 732, 734, 924, 1142
- Soybean Varieties USA–Ebony–Early Introduction. 446
- Soybean Varieties USA–Eda–Early Introduction. 446, 641
- Soybean Varieties USA–Edward–Early Introduction. 446, 459
- Soybean Varieties USA–Elton–Early Introduction. 446, 459
- Soybean Varieties USA–Emerald–Large-Seeded and / or Vegetable-Type. 3661
- Soybean Varieties USA–Emperor–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Extra Early Dwarf–Early Introduction. 346
- Soybean Varieties USA–Farnham–Early Introduction. 446
- Soybean Varieties USA–Flat King–Early Introduction. 446
- Soybean Varieties USA–Flava–Early Selection (1907). 446
- Soybean Varieties USA–Fuji–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Funk Delicious–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Giant Green–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Grande–Large-Seeded and / or Vegetable-Type. 3661
- Soybean Varieties USA–Guelph–Early Introduction. 417, 446, 469, 534, 598, 641
- Soybean Varieties USA–Haberlandt–Early Introduction. 446, 451, 493, 534, 598, 606
- Soybean Varieties USA–Hahto–Early Introduction. Large-Seeded and / or Vegetable-Type. 598, 732, 734, 924, 3533
- Soybean Varieties USA–Higan–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Hokkaido–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Hollybrook–Early Introduction. 414, 417, 446, 459, 469, 493, 534, 598
- Soybean Varieties USA–Hope–Early Selection (1905). 446
- Soybean Varieties USA–Illington–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Imperial–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Ito San–Early Introduction. Synonyms–Medium Early Yellow, Early White, Early Yellow, Kaiyuski Daizu, Kiyusuki Daidzu, Kysuki, Yellow Eda Mame, Dwarf Early Yellow, Early, Eda Mame, Coffee Berry. 414, 417, 446, 459, 534, 598, 641
- Soybean Varieties USA–Jackson–Large-Seeded and / or Vegetable-Type. 1142, 1169
- Soybean Varieties USA–Jogun–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Kanrich–Large-Seeded and / or Vegetable-Type. 1142, 1390, 1572, 1585, 1611, 1937, 3533, 3661, 3797
- Soybean Varieties USA–Kim–Large-Seeded and / or Vegetable-Type. 1142, 1390, 3661
- Soybean Varieties USA–Kingston–Early Introduction. 446, 641
- Soybean Varieties USA–Laredo–Early Introduction. 798
- Soybean Varieties USA–Lexington–Early Introduction. 534
- Soybean Varieties USA–Lowrie–Early Selection (1908). 446
- Soybean Varieties USA–Magna–Large-Seeded and / or Vegetable-Type. 1390, 3661
- Soybean Varieties USA–Mammoth–Early Introduction. 446, 469, 493, 532, 534, 598, 641
- Soybean Varieties USA–Mammoth Yellow–Early Introduction. 417, 532, 534, 606
- Soybean Varieties USA–Manchu–Early Introduction. 534, 598, 798
- Soybean Varieties USA–Mandarin–Early Introduction. 1142, 1572, 1585, 1611
- Soybean Varieties USA–Manhattan–Early Introduction. 459
- Soybean Varieties USA–Medium Green–Early Introduction. 346, 415, 446, 641
- Soybean Varieties USA–Medium Yellow–Early Selection (1905). Renamed Midwest by 1923. 446, 534, 598
- Soybean Varieties USA–Merko–Early Introduction. 446
- Soybean Varieties USA–Merrimax–Large-Seeded and / or Vegetable-Type. 3661

- Soybean Varieties USA–Meyer–Early Introduction. 417, 446
- Soybean Varieties USA–Nuttall–Early Introduction. 469
- Soybean Varieties USA–Ogemaw / Ogema–Early Development. Synonym–Dwarf Brown (Morse 1948). 414, 417, 446, 641
- Soybean Varieties USA–Otootan / O-too-tan–Early Introduction. 513, 749
- Soybean Varieties USA–Peking / Pekin–Early Selection (1907). 446, 493, 534, 598
- Soybean Varieties USA–Pingsu–Early Introduction. 446
- Soybean Varieties USA–Prize–Large-Seeded and / or Vegetable-Type. 1390, 1879, 1940, 2637, 3143, 3251, 3533, 3661
- Soybean Varieties USA–Proto–Specialty, High Protein. 3661
- Soybean Varieties USA–Provar–Specialty, High Protein. 3661
- Soybean Varieties USA–Riceland–Early Introduction. 446, 459, 493
- Soybean Varieties USA–Samarow–Early Introduction. 414, 417, 446, 469, 641
- Soybean Varieties USA–Sedo–Early Introduction. 446
- Soybean Varieties USA–Shanghai–Early Introduction. 534
- Soybean Varieties USA–Shingto–Early Introduction. 446
- Soybean Varieties USA–Stuart–Early Introduction. 642
- Soybean Varieties USA–Swan–Early Introduction. 446, 459
- Soybean Varieties USA–Taha–Early Introduction. 446
- Soybean Varieties USA–Tashing–Early Introduction. 446
- Soybean Varieties USA–Tokyo / Tokio–Early Introduction. 446, 534, 598
- Soybean Varieties USA–Verde–Large-Seeded and / or Vegetable-Type. 3143, 3661
- Soybean Varieties USA–Vinton–Large-Seeded and / or Vegetable-Type. 3117, 3251, 3309, 3661, 3797, 3801, 3831, 3928
- Soybean Varieties USA–Vinton 81–Large-Seeded and / or Vegetable-Type. 3661, 3760, 3880, 3887
- Soybean Varieties USA–Vireo–Early Introduction. 446
- Soybean Varieties USA–Virginia–Early Selection (1907). 534, 798
- Soybean Varieties USA–Willomi–Large-Seeded and / or Vegetable-Type. 1142
- Soybean Varieties USA–Wilson–Early Introduction. 446, 534, 598
- Soybean Varieties USA–Yoshioka–Early Introduction. Renamed Yoshō by May 1907. 621

United States–States–Tennessee. 446, 534, 784, 855, 1503, 1583, 1748, 1850, 1852, 1867, 1912, 1959, 2020, 2044, 2074, 2177, 2186, 2466, 2500, 2559, 2560, 2689, 2772, 2843, 2887, 3226, 3367, 3430, 3694, 3769, 3847, 3856, 4073, 4116, 4119, 4135, 4164, 4167, 4213, 4242, 4246, 4356

United States–States–Texas. 484, 534, 915, 1408, 1457, 1458, 1459, 1533, 1579, 1629, 1630, 1646, 1647, 1658, 1659, 1676, 1711, 1748, 1767, 1772, 1773, 1796, 1797, 1850, 1852, 2084,

2186, 2317, 2447, 2470, 3027, 3428, 3430, 3514, 3669, 3739, 4160, 4167

United States–States–Utah. 359, 429, 484, 506, 558, 954, 966, 1026, 1540, 1579, 1668, 1852, 3459, 3486, 3508, 3563, 3572, 3584

United States–States–Vermont. 1407, 1579, 1595, 1614, 1850, 3290, 4013

United States–States–Virginia. 414, 417, 446, 524, 534, 577, 619, 718, 915, 1579, 1850, 2169, 2192, 2571, 2744, 2805, 3106, 3298, 3333, 3437, 3616, 3801, 3900, 4062, 4150, 4167, 4212, 4359

United States–States–Washington state. 429, 455, 484, 500, 506, 514, 532, 570, 844, 855, 1238, 1354, 1458, 1511, 1565, 1595, 1646, 1659, 1677, 1680, 1733, 1748, 1754, 1797, 1846, 1850, 1852, 1858, 1935, 1947, 2020, 2135, 2140, 2143, 2265, 2607, 2619, 2666, 2947, 3163, 3225, 3330, 3338, 3373, 3400, 3548, 3777, 3862, 3869, 3884, 3892, 3953, 4059, 4176, 4230, 4270, 4295, 4316, 4326, 4331

United States–States–West Virginia. 856, 3927

United States–States–Wisconsin. 446, 641, 855, 856, 1238, 1334, 1343, 1563, 1567, 1579, 1618, 1920, 1996, 2157, 2184, 2288, 2445, 2615, 2651, 2704, 2705, 2850, 2908, 3275, 3437, 3513, 3521, 3698, 3782, 3836, 3883, 3984, 4034, 4148, 4167, 4187, 4280

United States–States–Wyoming. 484, 1680, 4187

United States Department of Agriculture (USDA)–Agricultural Research Service (ARS, Established 1953). Including Agricultural Research Administration (1942-1953). 980, 1090, 1109, 1110, 1111, 1163, 1174, 1207, 1230, 1231, 1238, 1251, 1305, 1319, 1384, 1386, 1390, 1442, 1912, 2695, 2923, 2971, 3150, 3598

United States Department of Agriculture (USDA)–Arlington Experimental Farm at Arlington, Virginia (1900-1942). 414, 446, 534, 619, 718

United States Department of Agriculture (USDA)–Bureau of Agricultural and Industrial Chemistry (1943-1953). Including Bureau of Agricultural Chemistry and Engineering (1938-1943), Bureau of Chemistry and Soils (1927-1938), and Bureau of Chemistry (1901-1927). Transferred to the Agricultural Research Service (ARS) in 1953. 514, 586, 587, 588, 589, 591, 610, 617, 644, 645, 673, 688, 855, 979, 981, 984, 991

United States Department of Agriculture (USDA)–Bureau of Human Nutrition and Home Economics (1943-1953). Including Bureau of Home Economics (1923-1943), Office of Home Economics (1915-1923), and Nutrition and Home Economics Work in the Office of Experiment Stations (1894-1915). Transferred to the Agricultural Research Service in 1953. 316, 317, 332, 340, 392, 436, 460, 586

United States Department of Agriculture (USDA)–Bureau of Plant Industry, Soils, and Agricultural Engineering (1943-1953).

Including Bureau of Plant Industry (1901-1943), Office of Plant Industry (1900-1901), and Division of Agrostology (1895-1901). Transferred to Agricultural Research Service in 1953. 414, 423, 446, 493, 513, 534, 535, 548, 549, 554, 568, 598, 599, 641, 643, 644, 708, 715, 718, 719, 729, 730, 731, 732, 733, 734, 736, 737, 738, 747, 748, 750, 751, 754, 767, 784, 798, 855, 915, 958, 972, 980, 1013, 2731, 3677

United States Department of Agriculture (USDA)–Foreign Agricultural Service (FAS, Est. 1953) Including Office of Foreign Agricultural Relations (1939-1953). Foreign Agricultural Service (1938-1939). 1070, 1090, 1093, 1109, 1110, 1111, 1142, 1171, 1208, 1446, 1453, 1937, 3429

United States Department of Agriculture (USDA)–Office of Experiment Stations (1888-1955). Transferred to the Cooperative State Experiment Station Service in 1961. 306, 316, 327, 332, 340, 375, 376, 377, 436, 642

United States Department of Agriculture (USDA)–Section of Foreign Seed and Plant Introduction (Established 1898 within the USDA with David Fairchild in Charge). Transferred to Bureau of Plant Industry (1 July 1901). Later Referred to as the Office of Foreign Seed and Plant Introduction and then the Office of Foreign Plant Introduction. 414, 446, 534, 554, 568, 599, 708, 715, 719, 730, 731, 735, 737, 738, 747, 958

United States Department of Agriculture (USDA; Including Federal Grain Inspection Service [FGIS], and War Food Administration [WFA]). See also: Agricultural Marketing Service, Agricultural Research Service (ARS), Bureau of Plant Industry, Economic Research Service, Food and Nutrition Service, Foreign Agricultural Service, and Section of Foreign Seed and Plant Introduction. 341, 360, 382, 477, 493, 511, 532, 542, 543, 544, 550, 551, 651, 682, 691, 693, 696, 702, 784, 855, 989, 1037, 1068, 1085, 1091, 1092, 1095, 1114, 1162, 1187, 1196, 1211, 1252, 1307, 1343, 1471, 2072, 2102, 2233, 2237, 2308, 2325, 2332, 2335, 2346, 2375, 2378, 2391, 2396, 2409, 2413, 2556, 2771, 2870, 3071, 3111, 3290, 3479, 3696, 3736, 3789, 3869, 4057, 4148, 4360

United States of America (USA). 173, 177, 180, 194, 204, 205, 218, 232, 243, 263, 264, 305, 306, 312, 316, 317, 321, 325, 326, 327, 328, 332, 340, 341, 353, 359, 360, 371, 374, 379, 380, 382, 383, 384, 385, 388, 389, 390, 391, 395, 397, 398, 400, 401, 404, 408, 409, 410, 413, 414, 415, 417, 420, 423, 424, 425, 428, 429, 431, 433, 434, 435, 436, 438, 439, 441, 443, 444, 445, 446, 447, 448, 451, 455, 456, 458, 459, 464, 466, 467, 471, 472, 477, 479, 482, 483, 484, 487, 488, 490, 493, 497, 498, 499, 500, 501, 505, 506, 509, 511, 512, 513, 514, 516, 518, 519, 524, 532, 534, 535, 539, 542, 543, 544, 545, 546, 549, 550, 551, 553, 554, 555, 556, 558, 563, 564, 565, 566, 567, 568, 569, 570, 573, 575, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 593, 594, 596, 599, 600, 601, 602, 603, 604, 607, 609, 610, 611, 612, 613, 614, 615, 616, 617, 619, 622, 623, 625, 626, 627, 629, 630, 635, 637, 638, 639, 640, 641, 644, 645, 646, 647, 648, 649, 651, 652, 654, 655, 656, 657, 658, 664, 665, 667, 668, 669, 673, 675, 682, 688, 691, 693, 696, 697, 709, 711, 714, 715, 718, 722, 724, 725, 729, 730, 731, 732, 733, 734, 735, 737, 740, 741, 742, 743, 744, 746, 750, 751, 753, 754, 757, 758, 762, 763, 768, 784,

788, 797, 798, 799, 800, 827, 831, 834, 837, 840, 841, 842, 844, 848, 853, 855, 856, 858, 861, 862, 865, 868, 869, 870, 871, 872, 874, 876, 878, 891, 893, 894, 896, 897, 912, 913, 914, 915, 918, 923, 924, 926, 927, 928, 931, 932, 933, 949, 950, 952, 954, 959, 960, 962, 964, 965, 966, 969, 970, 973, 974, 975, 976, 979, 980, 981, 984, 985, 986, 989, 991, 994, 995, 999, 1002, 1013, 1014, 1015, 1019, 1020, 1021, 1026, 1027, 1028, 1029, 1037, 1044, 1046, 1052, 1063, 1071, 1074, 1079, 1082, 1085, 1089, 1090, 1091, 1092, 1095, 1107, 1109, 1110, 1111, 1113, 1114, 1117, 1123, 1125, 1127, 1130, 1132, 1134, 1138, 1139, 1142, 1143, 1158, 1159, 1160, 1162, 1163, 1167, 1169, 1174, 1177, 1182, 1183, 1184, 1187, 1196, 1197, 1201, 1202, 1205, 1206, 1207, 1208, 1210, 1211, 1212, 1215, 1219, 1220, 1222, 1226, 1227, 1230, 1231, 1238, 1239, 1243, 1244, 1251, 1252, 1255, 1256, 1261, 1265, 1267, 1268, 1269, 1284, 1286, 1289, 1291, 1297, 1302, 1305, 1307, 1321, 1322, 1325, 1326, 1329, 1330, 1333, 1334, 1342, 1343, 1344, 1345, 1354, 1358, 1361, 1366, 1368, 1369, 1371, 1375, 1384, 1385, 1386, 1387, 1388, 1390, 1391, 1393, 1394, 1395, 1400, 1401, 1407, 1408, 1409, 1412, 1416, 1419, 1420, 1421, 1425, 1432, 1434, 1438, 1440, 1441, 1442, 1446, 1449, 1450, 1453, 1455, 1457, 1458, 1459, 1462, 1463, 1465, 1466, 1467, 1470, 1471, 1475, 1478, 1479, 1482, 1485, 1490, 1491, 1492, 1493, 1494, 1495, 1497, 1498, 1499, 1501, 1503, 1504, 1511, 1512, 1517, 1518, 1519, 1521, 1522, 1526, 1527, 1528, 1530, 1531, 1532, 1533, 1534, 1535, 1536, 1538, 1540, 1541, 1542, 1543, 1544, 1545, 1546, 1547, 1549, 1552, 1553, 1556, 1557, 1558, 1563, 1564, 1565, 1567, 1568, 1570, 1571, 1572, 1573, 1574, 1578, 1579, 1583, 1584, 1585, 1589, 1590, 1592, 1593, 1594, 1595, 1596, 1597, 1606, 1607, 1608, 1609, 1610, 1611, 1613, 1614, 1618, 1623, 1629, 1630, 1631, 1636, 1637, 1638, 1639, 1641, 1646, 1647, 1649, 1650, 1651, 1652, 1653, 1655, 1657, 1658, 1659, 1660, 1661, 1662, 1663, 1666, 1667, 1668, 1670, 1671, 1672, 1673, 1674, 1675, 1676, 1677, 1679, 1680, 1682, 1685, 1686, 1691, 1692, 1693, 1694, 1695, 1696, 1697, 1700, 1703, 1705, 1706, 1707, 1709, 1711, 1712, 1713, 1733, 1734, 1737, 1738, 1739, 1741, 1743, 1748, 1749, 1750, 1754, 1755, 1756, 1757, 1758, 1759, 1760, 1761, 1763, 1764, 1765, 1767, 1768, 1770, 1771, 1772, 1773, 1774, 1775, 1776, 1777, 1778, 1780, 1782, 1783, 1784, 1785, 1787, 1796, 1797, 1802, 1805, 1810, 1811, 1812, 1814, 1815, 1816, 1817, 1818, 1819, 1820, 1824, 1825, 1826, 1829, 1831, 1832, 1833, 1834, 1835, 1839, 1840, 1841, 1842, 1843, 1845, 1846, 1847, 1848, 1849, 1850, 1851, 1852, 1853, 1855, 1856, 1857, 1858, 1859, 1860, 1862, 1863, 1864, 1867, 1868, 1870, 1872, 1873, 1875, 1876, 1878, 1887, 1889, 1890, 1892, 1893, 1896, 1900, 1905, 1908, 1911, 1912, 1915, 1917, 1918, 1919, 1920, 1921, 1923, 1925, 1926, 1927, 1929, 1930, 1931, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1944, 1946, 1947, 1948, 1949, 1950, 1951, 1953, 1954, 1956, 1958, 1959, 1961, 1963, 1964, 1967, 1970, 1976, 1977, 1978, 1979, 1980, 1983, 1984, 1986, 1991, 1995, 1996, 1998, 1999, 2000, 2002, 2003, 2005, 2007, 2009, 2011, 2012, 2014, 2016, 2017, 2018, 2019, 2020, 2021, 2023, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2066, 2067, 2068, 2071, 2072, 2073, 2074, 2078, 2080, 2081, 2083, 2084, 2085, 2088, 2091, 2092, 2093, 2094, 2095, 2098, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2109, 2111, 2113, 2115, 2116, 2118, 2119, 2120, 2121, 2122, 2123, 2124,
