• **Summary:** This is a briefly annotated list of useful books about soy products: (1) *Soybeans for Health and Longevity*, by Philip S. Chen. (2) *The Soybean Book: Growing and Using Nature's Miracle Protein*, by Phyllis Dobson. (3) *The Farm Vegetarian Cookbook*, edited by Louise Hagler. See recipes for making ice bean, soy yogurt, and soysage. (4) *The Book of Tofu*, William Shurtleff and Akiko Aoyagi. Profusely illustrated, with hundreds of recipes. "There is no more thorough book on the history and myriad Oriental forms of tofu... First published in 1975, it is credited by most tofu cookbooks as the one that 'spread the light.'" (5) *The Tofu Cookbook*, by Cathy Bauer and Juel Anderson. Incorporates tofu artfully into familiar international dishes. Many recipes assume access to the by-products of making tofu at home: okara (soy pulp) and whey. (6) *The Great American Tofu Cookbook*, by Patricia McGruter. (7) *Tofu Goes West*, by Gary Landgrebe. For those who enjoy the chewy texture of "frozen tofu." (8) *The Book of Miso*, by Shurtleff & Aoyagi. The best-known book about miso. (9) *The Book of Tempeh*, by Shurtleff & Aoyagi. A thorough study of this traditional Indonesian food.

2377. **Product Name:** Red Miso.

Manufacturer's Name: American Miso Co., Inc.

Manufacturer's Address: Box 541, Route 3, Rutherfordton, NC 28139.

Date of Introduction: 1981. October.

New Product-Documentation: Leviton. 1982. Soyfoods. Summer. p. 18-22. The company was founded in October

1981 by John Belleme; Ad in *East West Journal*. 1985. Jan. "The secret of Japanese miso comes to America." Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 238, 240. By 1983 they were America's third largest miso maker, with 125 tonnes a year.

2378. *East West Journal*. 1981. A soyfoods trailblazer looks back... & ahead [Interview with Dr. C.W. Hesseltine]. Oct. p. 30, 32-33.

• **Summary:** This interview was conducted by William Shurtleff of Soyfoods Center. Dr. Hesseltine's lab has sent out 30,00 to 40,000 packets of tempeh starter to approximately 20,000 different people over the past 5 years. "Shurtleff: Has there been an interest comparable to that for any other [NRRC] food project that you know of? Hesseltine: No, nothing on that scale. Even back in the penicillin days, there was no such response." A photo shows Dr. Hesseltine talking with people at the 1981 Soycrafters Association Convention.

Note: Dr. Hesseltine says that okara can be used as a feedstock for making ethanol (ethyl alcohol) and methanol. Address: Chief, Fermentation Lab., USDA/NRRC, Peoria, Illinois.

2379. Greenwood, Rebecca. 1981. Irresistible soy cuisine: Discover soy yogurt and prepare old favorites. *East West Journal*. Oct. p. 64, 66-69.

• **Summary:** The author prefers fermented soyfoods, finding them more digestible, and richer in enzymes and vitamins. She describes how to prepare homemade soy vilia (a yogurt-like product whose starter culture is available from GEM Cultures in Fort Bragg, California), homemade miso, homemade natto and natto condiment, tofu and natto sandwich spread, an autumn meal with natto, amasake, and a pecan pie sweetened with thick amasake. She predicts a bright future for tempeh. Address: Colorado.

2380. Lima N.V. 1981. Lima natural foods pricelist. Lima Foods, Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium. 12 p. Catalog. 30 cm. [Eng]

• **Summary:** Lima has been making organic, unrefined foods, without additives, for 20 years. Organic quality is guaranteed. Contents: Whole cereal grains. Stone-ground whole flours (incl. soya flour, 500 gm). Whole pulses (incl. soya, and azuki, each 500 gm). Coffee substitutes (incl. Yannoh with azuki, Dandelio [dandelion root], roasted barley, and chicory). Lima specialties (incl. Kokoh with azuki flour, Seitanpast [Vegetable spread with seitan]). Oriental specialties: Tamari-shoyu (from soya and wheat), Tamari, Hacho miso, Barley miso, rice miso, instant miso soup (with dried vegetables), Kozou (kuzu), Mebosi (umeboshi), Tekka (natural seasoning with miso). Seaweeds. Unrefined oils. Sea salt. Vegetable protein products: Seitan (vegetable protein concentrate, 150 gm

jar), Seitan goulash (seitan with vegetables), Soya filtrate (soyamilk), Tofu (curdled soya filtrate). Concentrated soups (incl. azuki soup). Books (incl. 2 cookbooks by Anette Gevaert). Address: Lima Foods, Edgar Gevaertdreef 10, Sint-Martens-Latem 9830, Belgium.

2381. Miller, Roger W. 1981. The case for moderating sodium consumption. *FDA Consumer*. Oct. p. 9-13. Reprinted in *Sourcebook on Food and Nutrition*, 3rd ed. 1982. p. 140-43.

2382. Soy Plant (The). 1981. An all-soy deli: Tofu, miso, soymilk, tamari, tempeh (Ad). *Ann Arbor Calendar (Michigan)*. Oct. p. 21.

• **Summary:** At the top of this small ad (2½ by 1.75 inches) is the collective's logo. At the bottom: "Present this ad for a 10% discount on listed items through 10/31/81. Limit one per customer." Address: 211 East Ann St., Ann Arbor, Michigan 48104. Phone: 663-0500.

2383. Gevaert, Pierre. 1981. Re: Pioneering production of miso and soy sauce in Europe. Letter to William Shurtleff at Soyfoods Center, Nov. 19—in reply to inquiry. 1 p.

• **Summary:** Lima Foods first began commercial production of miso and soy sauce in 1959. They stopped in 1966 and began again in early 1981 (3-1-81) at Lima Andiran in France. They also plan to make shoyu there in early 1982. They were the first company in Europe that they know of to make these two products. They now make 1,200 kg/month of barley miso and 800 liters/month of shoyu. All ingredients are organically grown. Address: Lima Foods, Edgar Gevaertdreef 10, Sint-Martens-Latem 9830, Belgium. Phone: 09-52-4176.

2384. Belleme, John. 1981. Update on work with miso in North Carolina (Interview). *SoyaScan Notes*. Nov. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Erewhon Trading Co. recently filed for Chapter 11 bankruptcy protection. They are in receivership and on the verge of bankruptcy; they are no longer delivering products to stores, only manufacturing. Erewhon owes Mr. Kazama of Mitoku \$400,000 plus the shipments on the docks.

John plans to sell a miso fermentation kit, consisting of koji plus instructions for making miso at home. Address: Route 5, Box 258, Rutherfordton, North Carolina 28139. Phone: 704-749-9537.

2385. Elwell, Christian. 1981. Re: Historical sketch of South River Miso Co. Letter to William Shurtleff at Soyfoods Center, Nov. 29. 2 p. Handwritten, with signature on letterhead.

• **Summary:** "South River Miso Co. is a continuation of the Ohio Miso Co., begun by Thom Leonard and Richard

Kluding in Monroeville, Ohio, in 1979. 26,000 pounds of Barley and Rice miso along with equipment was transferred to South River Farm in Conway, Massachusetts, in 1980. There, a new shop of traditional timber-frame construction, featuring a wood-fired masonry cooking stove was completed in 1981. Production capacity is 40,000 to 120,000 pounds of miso per year. Barley miso is the standard variety offered. Others include Brown Rice, Corn, and Black Soybean miso. Deep well water and organically grown ingredients are used. Christian and Gaella Elwell plan to make the shop part of an agriculturally based village."

An attached letter by Christian on lined paper adds: "Last year we sold about 6 tons of barley and 1 ton of brown rice miso—all that was ready for sale from Ohio. We have about 5 tons of two-year barley for sale this year, half of which is already spoken for.

"The new shop is quite exciting. The masonry stove is also part of a masonry heating system. I hope you will visit... We are just twelve miles from Greenfield." Address: South River Miso Co., South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

2386. Suzuki, Tsuguyoshi; Okazaki, M.; Kashiwazaki, H.; Moriyama, M.; Takemoto, T-I. 1981. Changing food consumption of Japanese immigrants in the lowland of Bolivia. *Ecology of Food and Nutrition* 11(2):103-16. Nov. [13 ref. Eng]

• **Summary:** During a 3-day period in July and August 1975, dietary records of 34 households of Japanese immigrants in the lowlands of Bolivia were analyzed for the amounts and types of food consumed. The colony of Japanese immigrants, *Colonia San Juan de Yapacaní*, was established in 1955 on the basis of a governmental agreement between Bolivia and Japan. From 1955 until 1974 a total of 297 households, including 1,649 individuals, immigrated into the colony; the majority came during the first ten years. Among the items consumed were soybean products (not including soy sauce; consumed by 79.4% of the households), *tsukudani* (small fish cooked in soy sauce), wakame, nori, and kombu (3 sea vegetables), *furikake* (a seasoning containing nori), and azuki beans. "Among legumes, soybeans occupied the top position even after excluding the consumption of soybean sauce. The usual preparation was miso (soybean paste fermented and salted) and tofu (soybean curd), raw or fried, which the colonists could buy from a tofu shop in the colony."

Adzuki beans were boiled with glutinous rice and served at celebrations. "Immigrants procured the seed from Japan or Brazil and cultivated the beans." Also served was *kintsuba* (a sweet adzuki bean cake). One of the most widely used seasonings was soybean sauce, used in 85.3% of the households. Address: 1. Dep. of Human Ecology,

School of Health Sciences, The Univ. of Tokyo, Tokyo, Japan.

2387. Burns, Ken. 1981. Re: George Ohsawa and history of macrobiotics in America. Letter to William Shurtleff at Soyfoods Center, Dec. 9—in reply to inquiry. 7 p. Typed, with signature. [1 ref]

• **Summary:** An excellent, in-depth history by a very knowledgeable source. Numerous fond personal recollections and character sketch of Ohsawa. 1959 Dec.—Ohsawa first visited the USA. 1960 Jan.—He published, in mimeograph form, his astonishing book *Zen Macrobiotics* in English in New York City. "Although not in great detail, here he introduced miso, tamari, and tofu to the general public. The first two especially quickly become essential ingredients in the diet of almost all macrobiotic people in the US.

"During January, February, and March [1960] he lectured extensively at the Buddhist Academy in New York City. He returned to the US in July and lectured at the First American Summer Camp on Long Island daily for two months.

"The Second American Summer Camp was held in July and August of 1961. I am not sure whether he was present or not. This was in Wurtsboro, New York. In that year also, thirteen macrobiotic families left New York and moved to Chico, California on his advice. The next year, 1962, they founded the first American macrobiotic food distribution and processing center in this country.

"In 1963, in the summer he came to the US again and lectured in Boston, NYC, and at the Chico Summer Camp.

"In 1964, he lectured at the Big Sur Summer Camp.

"In 1965, he lectured at Mayoro Lodge near Pulga, California.

"In 1966, on April 24th he died in Japan.

"All in all, George Ohsawa visited this country either five or six times, each time lecturing, and speaking to the people individually without rest. He was ceaselessly active. I have heard many anecdotes concerning him during that period. As best I can determine, his affect on people was quite simply shattering—they had never seen anything like it."

Also discusses Michio and Aveline Kushi, Boston, Erewhon, East West Journal, East West Foundation (est. 1972), Amherst Summer Program (since 1974), Kushi Institute (fall 1978), Herman Aihara, Musubi, Ohsawa Foundation, GOMF (1970), French Meadows Summer Camps, Shizuko Yamamoto, Masahiro Oki, Michel Abehsera. Address: Boston, Massachusetts.

2388. Hoang, Van Chi. 1981. Re: Vietnamese soy sauce, xi dau, and nuoc tuong. Questions answered on Soyfoods Center letterhead (dated 9 Dec. 1981) and returned to SC. 1 p. Plus 2 enclosures.

• **Summary:** Upon receiving Mr. Hoang's answers by mail, Shurtleff called him on 6 March 6 1982 to ask for clarification on some points. The two sets of answers are merged below.

Xi dau (pronounced "si zao") is the Vietnamese term for *siyu* or black soy sauce served mostly in Chinese restaurants in Vietnam. It is made in Vietnam, but only by Chinese, in both North- and South Vietnam. It is exposed to air for many months to make it dark.

Nuoc Tuong (pronounced "Nuc Tung"—"Nuoc means "liquid") is the water in which soybeans are soaked, typically for about 9 days, but sometimes as long as 30 days. This soak water (also called "soybean self-autolysis water") is removed because otherwise (many believe) it would lower the quality of the finished Tuong. The soak water contains some soluble soybean nutrients and is pale yellow to clear in color. The Japanese discard this water, but some Vietnamese add salt and use it for pickling eggplants, etc.

There is no filtered soy sauce in Vietnam. Of the soy "sauces" made in Vietnam, about 60% is tuong cuda (ground jiang) and 40% is tuong ban (not ground; made in the village of ban). The origin of these two fermented Vietnamese soy products is unknown, but Mr. Hoang suspects they are of ancient origin. Mahayana Buddhists must be vegetarian. Buddhism went to Vietnam (from India) before it went to China, because Vietnam was an international port, trading with India. In about the 3rd century AD Buddhist monks came to Vietnam and spread Buddhism. They ate tofu and soy sauce.

What percent salt (sodium chloride) exists in your finished tuong? 10% in Tuong Cu Da for Vietnamese consumers. 6% in Bodhi Sauce for those who follow a low-salt diet.

In Vietnam are there any traditional soy sauces that have the liquid separated from the solids like Japanese soy sauce? If so, what are they called? Ans: Yes, Tuong Ban; it is usually used for cooking and is made in the Ban village.

One of the enclosures is from the International Register of Profiles. Born on 1 Oct. 1915 in Thanh-hoa province in Vietnam, Hoang Van Chi descended from a long line of Confucian scholars. He attended the best universities in Vietnam (1928-1940) earning a Baccalaureate in mathematics and another degree in physics, chemistry, and biology. He studied Oriental philosophies with a critical and non-dogmatic mind. Like his father and grandfather, he persistently opposed the French colonial rule. In 1940 he married Le Han Phan. In 1945 he joined the resistance and served the Ho Chi Minh government in many high offices, including Director of the National Mint. In 1948 he won an award for his brilliant work from Ho Chi Minh. But in 1955 he fled Saigon when the regime turned towards a full Communist dictatorship. He went into voluntary exile in Europe, settling in Paris from 1960-65 where he wrote his

book "From Colonialism to Communism." Address: Bowie, Maryland.

2389. Jootla, Susan Elbaum. 1981. Re: Making miso and tofu at home in India. Letter to William Shurtleff at Soyfoods Center, Dec. 15. 2 p. Typed, with signature.

• **Summary:** She and her husband have used up their first batch of homemade white miso and are now consuming a great pot of modified red miso. She thanks William and Akiko Shurtleff for the guidance their Book of Miso and Book of Tofu have given them in making these soybean products over the past few years.

She gives details of their experiments making tofu and miso 7,000 feet up in India's western Himalayas. Her husband had been trying unsuccessfully ever since he worked in Indonesia in the 1950s. Finally a friend who worked in a Florida health food store sent them The Book of Tofu. Using Epsom salts and an electric blender they succeeded in making good tofu. Susan then wrote an article on making tofu in India for an Indian woman's magazine, which was published in the spring of 1979. She is working on another longer article.

Having conquered tofu, she turned to miso. The big problem was getting koji starter, which she eventually obtained from Kikkoman in Tokyo.

Susan is now thinking of making tofu commercially on a small scale to cater to the interest evinced by several boarding houses in town. There are already a few soyamilk producers in India. In India, Susan uses tofu as "a substitute for paneer, which is the fresh cheese from milk, drained and pressed briefly to a compact solid texture. Tofu can be used in curries and pakoras (a very common snack, spicy fritters) in almost the same way as paneer is traditionally prepared, thus decreasing the problem of tofu's novel taste.

"We have also found that okara can be incorporated into dough for chapaties [chapatis], in equal proportions to the wholewheat flour. When the dough is seasoned with salt and ground cumin and coriander seeds, and baked as a chapati on a cast iron griddle, the resultant thick bread should be attractive for Indian cooks who begin to make tofu but are reluctant to waste the residue.

"As you can see, we are tofu enthusiasts and are trying to spread an appreciation of soyfoods in this country in a small way. So far, texturized soy protein is the only product that seems to have caught on here." Doubtless, this is because it does not require refrigeration, is not affected by heat or moisture, and is a useful and inexpensive meal stretcher.

Note: As of April 2008, Susan has long practiced Buddhist meditation and is the author of many related books. Google "Susan Elbaum Jootle" and you will see. Address: Jeet Villa, Dalhousie, H.P. [Himchal Pradesh], India.

2390. Kim, Gai W. 1981. Re: Introducing tofu to Sri Lanka. Letter to William Shurtleff at Soyfoods Center, Dec. 18—in reply to inquiry of Nov. 18. 1 p. Typed, with signature.

• **Summary:** “I sincerely hope that you and your wife will come to Sri Lanka in the near future to teach me how to make aburaage [deep-fried tofu pouches], which I simply fail to make although I tried all the instructions written in your *The Book of Tofu*.

“As for my project, at present, Tofu, which I named Boncheese here because ‘bean’ in Sinhalese is Bonchi and the method of making tofu is just like making cheese. Soy Bread are daily sold at the Cornel’s, the only Super Market in Colombo. I managed to make Miso out of Tempeh within a week’s time and you have to taste it to appreciate its beauty. The biggest breakthrough is to supply about 50 pounds of *soyamesh* [soybeans ground in water; soybase or soy puree] every morning to the Colombo General Hospitals and the Welikada Prison to be used in lieu of coconut milk for the daily curry cooked in their kitchen. The plant I helped to set up is using about 1.5 to 2 tons of de-hulled [soya] beans a month at the moment.

“I am enclosing a report from the Super Intendent [superintendent] of the Welikade Prison in Colombo for your perusal. If you are really interested in my project in can send you some correspondence and newspaper cutouts [clippings] upon request.

“I just finished writing a letter to BMI regarding an order of BMI 100 for the expansion of the project.”

A handwritten note says that Kim is contacting the Navy and Air Force canteens for her soy project.

Attached are two letters which are cited separately: (1) From H.G. Dharmadasa, Superintendent of Welikada / Welikade Prison (Oct. 1981). (2) From Dr. W.S. Weerasooria, Secretary, Ministry of Plan Implementation (16. Oct. 1981). Address: c/o UNDP in Sri Lanka, P.O. Box 1505, Colombo, Sri Lanka.

2391. Brown, Judy. 1981. Soyfoods: Catching on in the U.S. diet. *National Food Review*. Winter. p. 10-11. [6 ref] Address: USDA Economics, Statistics, and Cooperatives Service. Phone: (202) 447-6364.

2392. Elwell, Christian. 1981. Re: Inventory of miso at South River Miso Co. as of Feb. 10, 1981 (Catalog, mail order). Letter to wholesale customers of Ohio Miso Co., Dec. 3 p.

• **Summary:** This inventory and price list, the first offered by South River Miso Co., is handwritten with black ink on tan paper. On page 1 is a logo of a large miso vat in a square. Above the vat: “South River Farm Miso.” 1981. Below the vat: “One year barley: Golden yellow-brown mugi miso.” On this page is a table showing the price per bucket and price per pound based on the number of 5 gallon (45 lb) or 2 gallon (18 lb) buckets ordered. For example, if

you order 1-5 2 gallon buckets, the price per bucket is \$19.75 and the price per pound of miso is \$1.097. These prices are F.O.B. Conway, Massachusetts. The shipping via UPS of each 2 lb bucket to California is \$8.95. “Ingredients: Organically grown soybeans, barley koji, unrefined sea salt, deep well water. Naturally aged in wooden vats for one year, this miso is an unpasteurized living food. Best kept in a cool room or under refrigeration during summer months. Individual orders are shipped by U.P.S. on a weekly basis. Larger orders to retail stores, co-ops, distributors, and communities are shipped by common carrier on Wednesdays.”

Page 2 is a table showing that three products are available: (1) One year barley miso. 2,200 lbs available now. Wholesale price per pound: \$0.847 in 18 lb buckets or \$0.817 in 45 lb buckets. (2) One year brown rice miso (spring batch). 1,440 lbs available on 15 March 1981. Wholesale price per pound: \$0.98 in 18 lb buckets or \$0.95 in 45 lb buckets. (3) Two year brown barley miso. 3,000 lbs available on 15 March 1981. Two varieties are sold out: 18 month barley miso, and one year brown rice miso (fall batch).

Wholesale price per pound: \$1.03 in 18 lb buckets or \$1.00 in 45 lb buckets. Minimum wholesale order: 270 lbs. “No shipments will be made after May 1st until the next season, October, 1981.”

Also includes: Notice to our wholesale customers. About our production schedule and supply for next year, ’81-’82. About our two year barley miso available this year. Address: South River Miso Co., South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

2393. Hoang, Van Chi. 1981. How to make Tuong (Vietnamese unfiltered, ground soy sauce) (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 1 p. transcript.

• **Summary:** 1. Prepare soybeans: Dehull 10 lb soybeans with a mill and remove hulls with a seed cleaner. Roast the cotyledons at 450°F (232°C) for 15 minutes in any type of roaster. Pressure cook the roasted cotyledons with adequate water at 5 lb pressure for 30 minutes. Transfer the contents of the cooker (beans and water) into a plastic 40 liter (10.6 gallon) container, place in a warm room (80°F or 26.5°C) for 10 days; this enables the soybeans to undergo auto-hydrolysis. Each day skim off any surface foam.

2. Make glutinous rice koji: On the 3rd day of the soybean fermentation, soak 10 lb of glutinous rice overnight. Drain and steam at atmospheric pressure for 30 minutes, then cool to body temperature. Mix koji starter (*Aspergillus oryzae* mold spores propagated on glutinous rice) with water, sprinkle over rice, then drain on a perforated tray. Transfer inoculated rice into shallow wooden trays (each 10 by 15 by 4 inches deep) and place them in a warm koji room (80°F or 26.5°C) for 6 days. Do

not stir during this time. Finally the mold-fermented rice koji (*moc*) will be floating in a glucose syrup. Mix the koji with 7.5 lb salt, grind the mixture in a mill, then transfer ground mixture to a plastic vat and leave for 2 days to stop the fermentation.

3. Combine and ferment: Place the fermented soybeans and their water in a Hobart VCM (Vertical Cutter Mixer) and blend until smooth. Mix in the ground salted koji and allow the mixture to stand at room temperature for 3 days. Bottle and cap without heating. Use as a dipping sauce for fresh or fried tofu, or as a pickling medium. In Vietnam, Tuong is also used as a dipping sauce for roast beef, as a cooking sauce for fish, or as a pickling sauce for pork.

Hoang adds: There are less than 200,000 Vietnamese in the USA, and about the same number in France. Traditionally, soy sauce was made and used mostly in North Vietnam. But for the last 30 years (i.e., since about 1951) there has been no soy sauce in North Vietnam due to two factors: (1) The shortage of soybeans and rice; (2) The fact that those who formerly made it were classified as "landlords" by the Communist regime. Today in Vietnam people try to make it using peanut- or cottonseed presscake instead of soybeans. Address: Bowie, Maryland. Phone: (415) 253-1065.

2394. Shurtleff, William; Aoyagi, Akiko. 1981. *La soya y sus derivados: Tofu, miso, tempeh* [The soybean and its products: Tofu, miso, tempeh]. *Quadernos de Natura (Editorial Posada, Mexico)* No. 20. 87 p. Dec. [3 ref. Spa] • **Summary:** Contents: Introduction: The miracle of soya, by Ma. Teresa Piazza. 1. Soya: Source of protein. Ten reasons that soy will be the protein source of the future. 2. Tofu: Introduction A family of distinctive foods. A storehouse of high-quality protein. Cost of protein from different sources. Low in saturated fats: free of cholesterol; an ideal diet food. Natural backbone of the meatless diet. Buying and storing tofu. Making tofu at home and in communities. Soybeans, tofu, and the world food crisis. Table of different tofu varieties. Tofu shops in Japan. Our favorite tofu recipes.

3. Miso: Introduction. Delightfully varied; highly versatile. A nutritional treasure trove. The varieties of miso (including a table). The preparation of miso. Traditional natural miso and quick modern miso. A brief history of miso. Buying, storing, and using miso. Miso in Japan. Traditional Japanese miso shops and modern factories. Making miso at home. Our favorite miso recipes (contains 16 recipes).

4. Tempeh: Introduction. Rich in protein and vitamin B-12. Tempeh comes west (a brief history). How tempeh is made. The miracle of fermentation. Buying and storing tempeh. Tempeh for Latin America. Our favorite tempeh recipes (contains 8 recipes).

Note: This book is largely a Spanish-language translation of three English-language brochures written by

the authors in the late 1970s: What is tofu? What is miso? What is tempeh? Chapter 1 is summarized from the first chapter of *The Book of Tempeh*. Address: Soyfoods Center, P.O. Box 234, Lafayette, California.

2395. Soycrafters Assoc. of North America. Soyfoods Center. 1981. Per capita use of soyfoods grows to nearly 9 lbs. in U.S. *Vegetarian Times* No. 52. Dec. p. 6.

• **Summary:** Based on a Sept. 1981 news release copyrighted by the Soyfoods Center and the Soycrafters Assoc. of North America, this summary of a market study gives for each major soyfood product the number of manufacturers in the USA, Canada, and worldwide. The tons/year of raw soybeans used. And (in the USA only) the tons of food produced, wholesale value, retail value, and number of employees.

In the USA, the number of manufacturers, tons of product produced, and retail value in million dollars are as follows for low technology, traditional: Tofu and tofu products (154, 22,700, \$50.4), tempeh (32, 494, \$1.78), soymilk and soymilk products (14, 148,000, \$118.0), soy sauce, shoyu & tamari (15, 54,837, \$203.0), soynuts and soynut butter (12, 2,750, \$4.6), miso (10, 2,000, \$4.8), soy sprouts (5, 360, \$0.25), etc. Subtotals for low tech (284 manufacturers, 231,305 tons produced, \$392.25 retail value).

For high-technology, modern: Soy flour & grits, defatted (12, 400,000, \$190.4), textured, extruded soy flour (TSP/TVP) (2, 200,000, \$179.2), soy protein concentrates (3, 45,000, \$56.7), soy protein isolates (3, 45,000, \$126.0), meat analogs (secondary products) (6, 20,000, \$55,000). Subtotals for high tech (26 manufacturers, 710,000 tons produced, \$615.6 retail value). Total low and high tech: 310 manufacturers, 941,305 tons produced, and \$1,007.85 million dollars.

Also published in *New Age* (Jan. 1982, p. 17) under the title "Tofu Takes Over."

2396. Wolf, Walter J. 1981. Foreign travel report. Peoria, Illinois. 4 p. Dec. 18. Typed, with signature.

• **Summary:** "Country visited: Japan, Oct. 10-21, 1981. Purpose of trip: (a) Participate in the U.S./Japan Cooperative Program in Natural Resources (UJNR), Protein Resources Panel Meeting; (b) participate in UJNR panel study tour; (c) visit research institutes and industrial laboratories working on soybean proteins; and (d) participate in symposium on soy protein foods. **Summary:** The UJNR meeting in Tsukuba included 10 presentations by seven Japanese research workers from six different research institutes and three U.S. scientists from three USDA regional research centers. Topics discussed included... (f) single cell protein production from soybean cooking waste waters; (g) soybean storage; (h) food uses of soy protein; and (i) nutritional evaluation of soy proteins. The study tour

included a visit to a miso and soy milk factory which was impressive and confirms earlier reports that soy milk has become very popular in Japan in the past 5 years. Visits to industrial laboratories revealed that soy proteins are now used in a large variety of foods. Flavor is one of the last problems holding back development of soy protein-based foods.”

The UJNR program, initiated in 1964, plays an important role in implementing the policy of scientific cooperation between the United States and Japan. The protein panel was organized in 1968, and there are now 17 different panels in UJNR.

Dr. Ebine reported that about 790,000 metric tons (29 million bushels) of soybeans are used in traditional Japanese foods—miso, natto, tofu. Organizations visited included Okazaki Marusan Co. Ltd (makes miso, soy milk, and soy yogurt), Research Institute for Food Science of Kyoto University at Uji, Nisshin Oil Mills Ltd., Ajinomoto Co., Inc., Fujipurina Protein Ltd. (Fuji Oil Co. has a joint venture with Ralston Purina Co.). Address: Leader, Meal Products Research, Oilseed Crops Lab., Northern Regional Research Center, Peoria, Illinois 61604.

2397. Dronne, Yves. 1981. Le problème mondial du soja [The problem of soybean worldwide]. Paris: Institute National de la Recherche Agronomique. [Fre]*

• **Summary:** Gives details on Japanese consumption of industrially processed plant proteins (tons/year of defatted soybean meal equivalent): Unfermented: Tofu 84,200, Dried-frozen tofu 22,400, Other products. including texturized soy protein 87,800. Fermented: Soy sauce 173,000, miso 157,400, natto 55,200. Total: 580,000

Concerning Japanese consumption of new “purified” protein in tons/year. In 1971/1977 total consumption was 27,300/44,000. Of this the amount made from soybeans was 15,900/17,000 and the amount made from wheat gluten was 11,400/27,000. As for the texture, the amount sold in the form of a powder was 17,400/19,600 and the amount sold in textured form was 9,600/24,400.

In 1977, of powdered products, the amount from soybeans was 9,500 (6,000 isolates and 3,500 concentrates) and from gluten 10,100. Of the textured products, the amount from soybeans was 7,500 (6,000 dry extruded, 1,500 moist, and no paste), whereas the amount from gluten was 16,900 (200 dry extruded, 12,000 moist, and 4,700 paste). Address: Paris, France.

2398. Hirayama, Takeshi. 1981. [Does daily intake of miso reduce gastric cancer risk?]. Paper presented at 40th Annual Meeting, Japan Cancer Assoc. 1 p. English abstract. [Jap; Eng]

• **Summary:** Daily intake of miso was found to significantly reduce gastric cancer in an ongoing study of 122,261 males and 142,857 females aged 40 or above in 29 health center

districts in Japan 1966-78, the rates being 171.9, 210.2, 246.0, and 255.9 in males and 77.8, 85.3, 97.5, and 113.6 in females in daily, occasional, rare, and non-consumers respectively. These relationships remained significant when observed by smoking habit and socio-economic status. The observed beneficial effect could come from substances in the miso, but it is also possible that this just reflects the effects of some other substance(s) closely associated with the intake of miso soup, such as green-yellow vegetables. Address: Epidemiology Div., National Cancer Center Research Inst., Tokyo, Japan.

2399. Hoang, Van Chi. 1981. The Vietnamese and their favorite sauces. 7 p. Unpublished manuscript.

• **Summary:** Fish too small to be sold were made into a sauce called *nuoc mam*. Since the climate is much warmer in South Vietnam, fish were more abundant there than in the North. Also, because the *nuoc mam* manufacturing process is the action of an enzyme that exists in the stomach of the fish and the efficiency of that enzymic action depends on the average night temperature, *nuoc mam* produced in the South was of better quality. Unfortunately, neither *nuoc mam* nor soy sauce is produced in either parts of Vietnam. There is no more *nuoc mam* because there are no more fish.

The Vietnamese brand of soy sauce is called *tuong*. *Tuong* production has always been a cottage industry practiced in a few villages. Making koji, or *moc* in Vietnamese was the most difficult and tedious part of the soy sauce manufacturing process. *Tuong* disappeared from existence in North Vietnam after 1955 and in South Vietnam after 1975 due to 3 factors: 1. Shortage of food. 2. Shortage of rice. Since soybeans are considered a luxury because “they do not fill the stomach,” peanut or cottonseed presscakes are suggested instead. 3. Manufacturing was limited to a few villages. The professional *tuong*-makers were better off than other villagers. Since manufacturing required a large courtyard, scores of porcelain jars and enough capital to store soybeans and sweet rice for many months, they were classified as exploiters and their houses and belongings were confiscated. Address: Bowie, Maryland.

2400. **Product Name:** [House Mabo-dofu Seasoning Sauce Mix].

Foreign Name: Hausu Maaboo-dôfu no Moto.

Manufacturer’s Name: House Shokuhin Kogyo.

Manufacturer’s Address: Japan.

Date of Introduction: 1981.

Ingredients: Sugar, sesame oil, spices, soy sauce, lard, starch, oyster sauce, salt, monosodium glutamate, soy bean paste, red pepper, beef extract, citric acid.

Wt/Vol., Packaging, Price: 7 oz (200 gm). In foil packet in paperboard box with full-color photo on cover.

How Stored: Shelf stable.

New Product–Documentation: Label in Japanese. Distributed in the USA by Nishimoto Trading Co., Los Angeles, CA 90058. Mix diced tofu with this sauce to make the popular Chinese recipe, Mabo-dofu.

2401. Kawamura, Wataru. 1981. Amerika-ban Miso no hon [The Book of Miso published in America]. *Shin Eiyō (New Nutrition)* p. 62-66. Month unknown. [1 ref. Jap]
Address: Japan.

2402. **Product Name:** Takuan Daikon Pickles (with Miso).
Manufacturer's Name: Macrobiotic Kitchens Unlimited.
Manufacturer's Address: Melrose Ave., Los Angeles, California.

Date of Introduction: 1981.

Ingredients: Daikon, nuka (rice bran), water, kombu, miso, salt.

Wt/Vol., Packaging, Price: ½ to 1 lb, retails for \$4 per lb (1981).

How Stored: Refrigerated.

New Product–Documentation: Talk with R. Bruce Paine of Boston, Massachusetts. 1992. Oct. 1. In Los Angeles he made daikon nuka pickles, with a little miso added to the nuka (rice bran) help the fermentation. He became known throughout the Los Angeles area as the “nuka pickle maker.” At one time, in the summer of 1983, he had about 50 containers fermenting at one time.

Talk with R. Bruce Paine. 1993. Dec. 8. Bruce arrived at the macrobiotic community in Los Angeles in 1981. Roy Steevensz was the first person to make these pickles in Los Angeles; he was making and selling these pickles before Bruce arrived, so they could have been introduced as early as 1980. He bought the daikon in Los Angeles, and he was amazed to see how many were sold there and how huge they were—some being up to 6-8 inches in diameter. The daikon were air dried under an overhang outdoors. He dried the nuka in pans in a large rotating oven at Macrobiotic Kitchens Unlimited. Then he made a mash by mixing the nuka with miso dissolved in water, kombu, and salt. In the tubs he placed alternate layers of daikon and nuka until each tub was full. On the lid he wrote that day's date and the date of expected harvest. The pickles were made in white plastic tubs, each 5½-6 gallons in capacity; they were allowed to cure for 3-4 months in a warehouse (or later outside in the shade) behind Grain Country, a macrobiotic and natural food store on Melrose Ave. The takuan were sold refrigerated in ½ to 1 lb sizes for about \$4/lb.

2403. **Product Name:** [Mitsukan Ma-Bo Tofu Seasoning Mix].

Foreign Name: Mitsukan Ma-Bo Tōfu no Moto.

Manufacturer's Name: Nakano Vinegar Co. Ltd.

Manufacturer's Address: Japan.

Date of Introduction: 1981.

Ingredients: Dehydrated soy sauce, powdered miso, sugar, potato starch, salt, powdered chili paste, dehydrated chicken extract, dehydrated garlic, dehydrated ginger, dehydrated oyster extract, monosodium glutamate (to enhance flavor).

Wt/Vol., Packaging, Price: 1.89 oz (54 gm). 2 foil packets in paperboard box with color photo of recipe on front. \$1.08.

How Stored: Shelf stable.

New Product–Documentation: Label in Japanese. Mix diced tofu with this sauce to make the popular Chinese recipe, Mabo-dofu. Recipe on back.

2404. **Product Name:** [Nikko-Mame Defatted Soybean Flakes for Shoyu and Miso, Sakae-Mame Soy Flour for Tofu, ProtFlour Soy Flour for Food and Milk Replacer, Nikoprotein High Protein for Food].

Manufacturer's Name: Nihon Koyu Co. Ltd.

Manufacturer's Address: No. 32 Bungocho, Higashi-ku, Osaka, Japan.

Date of Introduction: 1981.

New Product–Documentation: Soya Bluebook. 1981. p. 63.

2405. **Product Name:** [Nikko-Mame {Defatted Soybean Meal for Shoyu and Miso}, and Sakae-Mame {Soybean Meal for Tofu}].

Manufacturer's Name: Nikko Oil Mills Co. Ltd.

Manufacturer's Address: Kanda Ogawamachi 2-12, Chiyoda-ku, Tokyo, Japan.

Date of Introduction: 1981.

New Product–Documentation: Soya Bluebook. 1981. p. 63; 1982. p. 67, 76.

2406. **Product Name:** Tempeh Burger (with Miso).

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: c/o Cleveland Tofu Co, 8021 Euclid Ave., Cleveland, OH 44121.

Date of Introduction: 1981.

Ingredients: Tempeh (organic soybeans, water, *Rhizopus* culture), tamari, barley miso, spring water, corn oil, rice vinegar, spices.

Wt/Vol., Packaging, Price: 8 oz (3 burgers).

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1982. 4.25 inch diameter. Red, green, blue, and yellow on white. Logo of Jack and the Beanstalk. “No cholesterol. All natural. Pan Fry, Bake, Steam, or Grill.” Jeff Narten. 1987. “History of North Coast Tempeh and its Products.” 4 p. Dec. 7. “Our tempeh burger is our number one product after tempeh. It is unique to my knowledge in that it is a fairly complicated marinade and depends less on tamari than many I've tasted.”

2407. **Product Name:** [Manna Tofu-Based Spreads (Natural, Dill, Sandwich), and Soyanaise (Imitation Mayonnaise)].

Foreign Name: Manna Tofu Spreads (Naturel), Soyanaise.

Manufacturer's Name: Stichting Natuurvoeding Amsterdam. Renamed Manna Natuurvoeding B.V. in 1982.

Manufacturer's Address: Meeuwenlaan 70, 1021JK, Amsterdam, The Netherlands.

Date of Introduction: 1981.

Ingredients: Naturel: Manna's tofu-soycheese (sojakaas)*, unrefined cold-pressed vegetable oil, grain [corn] syrup (graanstroop), demeter-apple cider vinegar*, ume (Japanese plum) paste, mustard, white seasalt, guar vegetable binder (* = van biologische grondstoffen of teelt = from organically grown raw materials or agriculture).

Wt/Vol., Packaging, Price: 215 gm glass jar.

How Stored: Shelf stable.

New Product–Documentation: Letter from Sjon Welters. 1982. April 16. "Manna started this month to market tofu spreads, which are a great success right now. It lasts for at least 3 months refrigerated, with no chemicals or artificial additives." Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 25. "Manna started to make tofu spreads in 1981. They are now made in a Hobart blender. 200 kg/week of tofu is used to make 1,000 x 250 gm bottles of spreads. Some are pasteurized at 85°C and some sterilized at 100°C. The flavor of the spreads is lost at temperatures higher than 85°C. The Manna spreads are 3.45 guilders per 45 gm jar for 3 flavors. The natural spread contains tofu, unrefined oil, miso, apple vinegar, corn syrup, sea salt, guar." Soya Bluebook. 1987. p. 100. Label. 16.5 cm by 3.5 cm.

2408. **Product Name:** [Tofurin Tofu Cheese (With Miso)].

Foreign Name: Tofurin.

Manufacturer's Name: Stichting Natuurvoeding Amsterdam. Renamed Manna Natuurvoeding B.V. in 1982.

Manufacturer's Address: Meeuwenlaan 70, 1021JK, Amsterdam, The Netherlands.

Date of Introduction: 1981.

Ingredients: Tofu, miso.

New Product–Documentation: Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 25. "Tofurin tastes like cheese. It is tofu fermented with miso, then sterilized at 100°C for 1 hour." Letter from Sjon Welters. 1989. July 24. Tofurin was developed by Sjon Welters for Manna and introduced together with Manna's tofu spreads [in 1981], in the same size glass jar. It was not really fermented, just tofu mixed with miso.

Manna Bulletin. 1983. 5(4):1. June. The price of Tofurin has been reduced from 3.90 to 3.45 guilders.

2409. Wang, H.L.; Fang, S.F. 1981. History of Chinese fermented foods. *USDA Miscellaneous Publication FL-MS-333*. Reprinted in 1986 in C.W. Hesseltine and H.L. Wang, eds. *Mycologia Memoir No. 11, Indigenous Fermented Food of Non-Western Origin*. [6 ref]*

• **Summary:** Discusses the early history of numerous types of chu (similar to koji, grown on wheat, barley, millet, and/or rice), chiang (salted sauce), shi or tou-shi (soy nuggets), chiang-you, tou-yu and shi-tche (the liquid from shi), tou-fu-ru (fermented tofu or sufu), La-pa-tou (Mucor fermented beans), Mei-tou-tcha (Meitauza, fermented okara), tsu (vinegar), yan-tsai (salted vegetables). Address: 1. USDA/NRRC, 1815 N. University St., Peoria, Illinois 61604; 2. Inst. of Microbiology, Academia Sinica, Beijing, China.

2410. Akizuki, Tatsuichiro. 1981. *Nagasaki 1945: The first full-length eyewitness account of the atomic bomb on Nagasaki*. Translated by Keiichi Nagata. London, Melbourne, and New York: Quartet Books. 158 p. Edited and with an introduction by Gordon Honeycombe. [Eng]

• **Summary:** In the chaos that followed the explosion of the atomic bomb over Nagasaki, Dr. Akizuki tirelessly tended nearly 200 seriously-ill patients. Today he still works in that hospital. The book describes Dr. Akizuki's feelings that miso helps alleviate the effects of radiation. A powerful and moving account. Address: Japan.

2411. Altman, Nathaniel. 1981. *Nathaniel Altman's total vegetarian cooking*. New Canaan, Connecticut: Keats Publishing, Inc. 229 p. Index. 18 cm. Series: A Pivot Original Health Book. [180 ref]

• **Summary:** The author was born in 1948. The first page of the book begins: "It's not just spinach. The vegetarian way of eating is incredibly varied, employing such exotic, appealing foods as calcium-rich hijiki, tempeh from Indonesia, and tofu."

The glossary (p. 139-44) describes: Lecithin, milk (soy), miso, soybeans, soy grits, sprouts (incl. soy), tamari, tempeh, tofu, and textured vegetable protein (TVP).

Chapter 11, titled "A vegetarian diet can save you money" (p. 146-51) mentions soybeans and soyfoods (incl. soy milk powder, dry tofu [probably dried-frozen tofu], soy sprouts, soy flour, soy sauce, tofu) repeatedly as low-cost sources of protein.

The book has several very interesting appendixes: C. The vegetarian bookshelf (p. 208-10). D. Vegetarian contacts—Some vegetarian societies and publications (p. 211-12). Bibliography by chapter (p. 213-20).

2412. Aoki, Hiroshi. 1981. *Misoshiru sanbai kenkô-hô* [Three bowls of miso soup daily for good health]. Tokyo: Goma Books. 220 p. Illust. 20 cm. [Jap]

• **Summary:** Miso soups and health recipes. He worked for food companies, including Ajinomoto, for 30 years on

development of new soy protein foods. A popularizing book. Discusses Hirayama.

Contents: Preface. Why are miso soups and soyfoods appreciated again now? 1. The many benefits from eating miso soups and soyfoods every day. 2. The Japanese people have forgotten the goodness of miso soups and soyfoods. 3. Healthy soyfoods: From miso to soymilk (miso, natto, shoyu, tofu, deep-fried tofu pouches, dried-frozen tofu, yuba, okara, roasted whole soy flour or kinako, soymilk, soy oil). 4. Miso soups and soybean cooking make a healthy body. Soybean recipes which are suited to people in the younger generation. Mother's favorite recipes are good for health, too. Appendix. Maps of Japan showing areas of miso soups and natto.

2413. Batra, L.R. 1981. Fermented cereals and grain legumes of India and vicinity. *Advances in Biotechnology* 2:547-53. [12 ref]

• **Summary:** Waries, a black gram paste, made from *Phaseolus mungo* fermented with *Leuconostoc mesenteroides*, is somewhat like Japanese miso. Punjabi waries and chunna waries are used as adjuncts in cooking. The paste is heavily salted and fermented for 2-8 days, in North India or Pakistan.

Also describes rice beer, pachwai, murcha, bakhar, jalebies, na (flat leavened bread), pool waries, black gram products, idli (small fermented steamed cakes), dosa (pancakes), and hoppers (pancakes). Address: Mycology Lab., Plant Production Inst., USDA, Beltsville Agricultural Research Center, Beltsville, Maryland.

2414. Beasley, Sonia. 1981. The spirulina cookbook: Recipes for rejuvenating the body. Boulder Creek, California: University of the Trees Press. viii + 184 p. Illust. by Reenie Haughey. Background by Dr. Christopher Hills. Index. 15 x 23 cm.

• **Summary:** Contains over 100 recipes using spirulina, a type of fresh-water algae. Soy-related recipes include: Scrambled eggs with tofu (p. 2). Pam's green goop (with tofu and miso; p. 18). Spirulina Aztec soup (with miso; p. 29). Chris's spirulina soup (with miso; p. 41). Pam's dressing (with miso; p. 166).

Note: Sonia was born in 1941 in Ceylon. She is a gourmet cook with her own catering business specializing in international cuisine. On the rear cover is a color photo of Sonia Beasley and Dr. Christopher Hills.

2415. Cadwell, Jane. 1981. O Livro da Soja [The book of soya]. Sao Paulo, Brazil: Editora Ground Ltda. 79 p. Illust. Index. 21 cm. [Por]

• **Summary:** Contents: Preface. Introduction. The soybean. Soybeans and health (nutritional composition). Our daily foods and our health. Auxiliary foods and ingredients (incl. miso). Kitchen utensils. Recipes: Whole soybeans (incl.

cooked ground soybeans, green vegetable soybeans {*Soja fresca (verde)*}, soynuts {*castanhas de soja*}) Soymilk (incl. homemade using the Cornell method, soymilk yogurt), okara, tofu (incl. homemade, tofu miso soup, cakes, pies, baby foods).

Jane writes in a letter dated 5 July 1982 of her book: "My book is the first one [published in Brazil] exclusively on soyfoods. The intent was to show people all the varieties of things that they could make starting principally from whole dry soybeans. Consequently I did not include the topics of miso, soyflour, and textured proteins. I began writing the book as a result of a government campaign last year to get people to use soybeans in place of regular beans. As you probably know, rice and beans is really the principal dish at the noon and evening meals. There was a shortage of the regular beans and the price was very high... Consequently the government campaign to introduce soybeans. They were ridiculously cheap, yet there was hardly any information on how to use them. Thus—my book... Soybeans are now available in many supermarkets and well as health food stores and oriental shops." Address: Brazil.

2416. Ford, Richard. 1981. Soy foodery cookbook: Tofu, tempeh, miso, sea vegetable recipes and resources. Santa Barbara, California: Published by the author. ii + 78 p. Illust. No index. 22 cm. Spiral bound. [20+ ref]

• **Summary:** Contents: Introduction: Creative balance. Soyfoods: Foods for the future. Soyfoods resources. Tofu: A soy product catching on. Tempeh: The super soy. Soysage. Sea vegetables: The tide is rising. Miso: A food doing it with culture. Soyfood travelers guide. Contains many recipes using tofu, tempeh, sea vegetables, and miso. At the end of each chapter is a bibliography. Address: Santa Barbara, California.

2417. Forster, Dorothy. 1981. Cooking with Tvp: Exciting, nutritious and economic dishes using textured soya protein. Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. 96 p. Recipe index. 18 cm.

• **Summary:** Contents: Introduction. 1. Soups. 2. Sea food favorites [vegetarian, with dulse often used as a seasoning]. 3. Main meals with mince. 4. Main meals with chiplets. 5. Main meals with chunks. 6. Main meals with slices (or chunks). 7. Some dishes with soya grits.

Tvp is made from de-fatted soya flour which is extruded through a die, under pressure, to make the different sizes of particles. "There are several varieties and we suggest you experiment until you find the type you are happy with... When reconstituted, Tvp can absorb twice its own weight in liquid. Thus 150g (5 oz) will be equal 450g (1 lb) of meat, when soaked."

Soya grits (with 2 recipes) and soya milk are also discussed. "There are several makes of soya milk on the

market in either liquid or powder form as a useful alternative to milk.” Miso is mentioned as a seasoning for TVP.

Suppliers of Tvp in the UK are: Lotus Foods Ltd. in London (formed by the author, Dorothy Foster), Direct Foods Limited in Petersfield, Hampshire (Proto-veg Tvp), Itona Products Ltd. in Wigan, Lancs., Life and Health Foods in Norwich, and Marigold Health Foods Ltd. in London (Vitpro Tvp). Address: England.

2418. Gandjar, I. 1981. Soybean fermentation in Indonesia. *Advances in Biotechnology* 2:531-34. [9 ref]

• **Summary:** Discusses various kinds of tempeh, taoco (Indonesian miso), kecap (Indonesian soy sauce), tempe gembus (okara tempeh; sold in every market and village in Central and Eastern Java), oncom tahu (okara onchom), and traditional fermentation processes. Address: Dep. of Biology, Faculty of Mathematics and Natural Sciences, Univ. of Indonesia, Jakarta, Indonesia.

2419. Hesseltine, Clifford W. 1981. Thom Award Address: A microbe’s view of fermentation. *Developments in Industrial Microbiology* 22:xv-xvi, 1-18. [21 ref]

• **Summary:** Pages xv to xvi give a brief biography and photo of Dr. Clifford W. Hesseltine, winner of the tenth Charles Thom Award on 14 Aug. 1980, presented by the Society for Industrial Microbiology. Dr. Hesseltine knew Dr. Charles Thom and was strongly influenced by him, even though the two men never worked together.

“Dr. Hesseltine’s studies on the taxonomy of the Mucorales have resulted in a classification now in worldwide use... The research of Dr. Hesseltine on mycotoxins is world famous. He has directed the aflatoxin project of the Fermentation Laboratory, NRRC...

“Dr. Hesseltine’s studies on fermented foods are equally well known. Included in this research has been the use of soybeans and cereals in Oriental fermented foods including tempeh, miso, Chinese cheese, and shoyu.”

Just 100 years ago the first pure cultures of fungi were made by Brefeld, a German, who published his results in 1881. The development of submerged culture of penicillin production began in 1941 at the NRRL. The USA lost its leading role in industrial fermentation early in the 1960s due to weakness in research in many fields. Address: NRRC, Peoria, Illinois.

2420. Hoshijo, Kathy. 1981. Kathy cooks... naturally. The Self Sufficiency Assoc., P.O. Box 1122, Glendale, CA 91209. 497 p. Illust. Index. 28 cm.

• **Summary:** This excellent natural-foods, vegetarian cookbook, written with a nice balance of heart and mind, contains over 1,000 recipes—many written from an Hawaiian viewpoint. The lovely and talented author is the hostess of a popular TV series “Kathy’s Kitchen.” In the long chapter

titled “Soybeans” (p. 349-92) is an introduction to the nutritional value of soybeans and soyfoods, plus many recipes for using and making the following at home: Whole dry soybeans (often cooked and mashed; 13 recipes), soy nuts (deep-fried or dry roasted), kinako (roasted soybean flour; how to make + 1 recipe), soy milk (how to make + 19 recipes), yuba (how to make + 11 recipes) okara (15 recipes), tofu (how to make + 50 recipes), frozen tofu (“Homemade TVP”—how to make + 7 recipes), miso (18 recipes). Address: Self-Sufficiency Assoc., 2525 South King St., Honolulu, Hawaii 96826, or P.O. Box 1122, Glendale, California 91209.

2421. Jaffrey, Madhur. 1981. Madhur Jaffrey’s World-of-the-East vegetarian cookery. New York, NY: Alfred A. Knopf, Inc. 461 p. Illust. by Susan Gaber. Index. 20 x 20 cm. A second edition was published in 1983 in London by J. Cape.

• **Summary:** The Indian woman author of this creative book presents 21 recipes for bean curd (tofu), 7 for tempeh, and some for yuba and miso. Green soy beans with sauce (p. 7). Cabbage with miso (p. 15). Eggplant slices with white miso (p. 22-23). Fresh soy beans, steamed (p. 57). Spinach with fermented bean curd (p. 59). Stuffed yellow squash (with yuba, p. 62-64). Pecel (Vegetable salad with spicy peanut sauce, plus tofu and tempeh; p. 73-74). Tempura (with tofu; p. 75-77). Soy bean sprouts (how to grow; p. 100). Soy-bean and mung-bean sprouts seasoned with sesame oil (p. 105). Tempeh, Fried tempeh, Fried, preseasoned tempeh, Sambal goreng tempeh kering (Sweet and sour tempeh), Tempeh cooked in coconut milk (p. 108-110). Thai fried rice (with red fermented tofu; p. 150-51).

One chapter (p. 160-89) is titled “Soy milk, bean curd, and wheat gluten.” Making your own soy milk. Making your own bean curd. Udoфу (*Yudofu*, simmering bean curd with seasonings). Bean curd with watercress. Korean-style bean curd in a hot water bath. *Hiya-yakko* (Chilled bean curd). Bean curd with Chinese parsley. Bean curd with broccoli. Cabbage cooked with bean curd. Bean curd with a deliciously spicy sauce. Carrots and beans with bean curd dressing. Bean curd, mushrooms, and peanuts in hoisin sauce. Sautéed bean curd. Tofu dengaku (Toasted bean curd with a miso topping). Fried bean curd cubes, soy-bean sprouts sautéed with fried bean curd. Fried bean curd with a sweet-and-sour sauce. Fried bean curd cakes with a mustard surprise. Inari-zushi (“Bags” of fried bean curd stuffed with sushi rice). Pressed bean curd with cabbage. Salad of pressed bean curd, mung-bean sprouts, and agar-agar. How to make fried and baked wheat gluten balls (plus 5 gluten recipes). Buddha’s delight (with yuba and fried bean curd).

Chawanmushi (Steamed savory custards, with tofu; p. 192-94). Omelette with bean curd (p. 198-99). Soy sauce eggs (p. 209). Paneer (milk cheese; p. 237-40). Hot or cold noodles with a soy-sauce dressing (p. 248). Noodles with a

hot-and-sour bean sauce (p. 250). Vegetarian mee krob (Crisp noodles with pressed bean curd and eggs, from Thailand, p. 255-56). Noodles with quail eggs, mushrooms, spinach, and yuba (Japan; p. 256-57). Hoppers (yeast pancakes from Sri Lanka). Roti (Flat whole-wheat bread). Delicious stock made with soy-bean sprouts. Clear soup with enok mushrooms, bean curd skins [yuba], and spinach (p. 297). Clear soup with soft bean curd and celery cabbage (p. 298). Miso soup with bean curd (p. 307). Miso soup with carrots and mushrooms (p. 308). Fried, munchable soy beans [soynuts] (p. 321-22). Potato and tempeh patties (p. 339). Dipping sauces (with soy sauce; p. 357-59). Kombu relish (with soy sauce, p. 374). Shoyu daikon (White radish pickled in soy sauce). Ginger quick-pickled soy sauce (p. 375). Aomidaikon (Quick pickled small white radishes, with slightly sweet yellow miso; p. 377-78). Chinese-style jellied bean-curd sweetmeat with a peanut topping (p. 399-400).

General information (p. 418-36; lots on soyfoods, see: bean curd [regular, fried, fermented, pressed, pressed seasoned], kochu chang [jang], miso, soy-, tempeh, yuba). Sources (of ingredients; p. 437-40). Address: New York City, NY.

2422. Kimura, Yuko. comp. 1981. *Amerika-jin no kangaeta miso ryôri* [Miso recipes developed by an American (William Shurtleff)]. Tokyo. vii +108 p. Illust. 13 x 19 cm. Translated by the Ajisai Group, in Ms. Kimura's English class. [1 ref. Jap]

• **Summary:** Contents: Forward (preface). Menu. Dips. Hors d'oeuvres. Spreads. Sandwiches. Dressings for salads. Salads. Sauces. Desserts. Address: 1-10-3, Tamagawa Gakuen, Machida-shi, Tokyo 194, Japan.

2423. Kusumoto, Kenkichi. 1981. *Miso raisan* [In praise of miso]. Tokyo: Kobunsha. 262 p. Illust. 18 cm. [22 ref. Jap]

• **Summary:** Superficial talks/essays. About famous Japanese favorite miso soups and miso soups in each season.

Contents: Preface. 1. In praise of miso soups! 2. Miso soups throughout the four seasons. 3. Country village miso soups. 4. Topography/geography of miso. 5. Topography/geography of miso soups. 6. Miso soups and Haiku (poems). Address: Professor, Tanaka Chiyo Junior College, Meguro-ku, Tokyo, Japan.

2424. McCallum, Cass. 1981. *The real food guide*. Vol. 2: Pulses, grains and seeds. Glasgow, Scotland: The Molendinar Press. 196 p. Index. 20 cm.

• **Summary:** The section on "Anti-nutritional factors in pulses" discusses those found in many legumes (such as haemagglutinins, trypsin inhibitors, phytic acid, flatulence factors) and those of importance in specific legumes; for soybeans, only heat-resistant trypsin inhibitors are mentioned. The section on "Basic bean cookery" gives

general guidelines and tips (never add salt until beans are cooked tender). A table (p. 54) shows that soybeans require the longest cooking time of any bean listed.

The section titled "A-Z pulses" gives details (incl. the scientific name) concerning many legumes listed alphabetically. Includes adzuki, kura mame [sic, kuro mame = black soybeans] (p. 65), and winged beans. By far the longest section is on soy beans (p. 71-82). Contents: Introduction. Nutritional values. Dried soy bean products: Soy grits, soy coffee, soy flour (full fat, medium fat, fat free), soy nuts, soy milk, soy yolk (a concentrated form of soy flour), textured vegetable protein, soy splits, tofu powder. Fermented soy bean products: Black beans—fermented, chao, chee-fan, chiang (Chinese miso), Hamanatto, ketjap, koji, meitauza, miso, mame miso, Hatcho miso, kome miso, mugi miso, natto, okara. Soy sauces: Introduction, Chinese soy sauce, ketjap, synthetic sauce, tamari. Sofu [sic, sufu], tahuri, tamari, tao-cho, taokoan or tao koan, taotjo or tao dji, tempeh, tofu. Tofu from whole beans (homemade recipe). Tofu from powdered [soy] milk.

The part titled "Recipes" (p. 129-92) is divided into three sections. Soy-related recipes in each are listed here: (1) Soups and starters: Iced tofu (p. 134). miso soup (p. 138). Adzuki bean soup (p. 141). (2) Main dishes: Deep-fried tofu (p. 167). Szechuan bean curd (p. 168). (3) Bread, side dishes, sauces and desserts: Miso lemon sauce (p. 186). Miso ginger sauce (p. 187). Peanut butter (homemade recipe, p. 191).

The rear cover states: "These books fight a war against junk food—and win." The author is a woman.

Note: This is the earliest English-language document seen (Feb. 2004) that uses the word "tao koan" (or "tao-koan") to refer to tofu. Address: United Kingdom.

2425. Mogi, Masatoshi. 1981. *Miso to gojûnen* [Miso and fifty years]. Noda, Japan: Published by the author. 232 p. [Jap]*

Address: Kikkoman Central Research Lab.

2426. Omura, Yoshiaki. 1981. *The tofu-miso high efficiency diet*. New York, NY: Arco Publishing, Inc. xvi + 221 p. Index. 21 cm. [70 ref]

• **Summary:** Contents: Acknowledgments. Foreword. A natural, balanced diet for health, weight loss, and longevity. 1. The benefits of a diet based on traditional Japanese foods. 2. How being overweight affects your health. 3. Why certain foods? What is needed to maintain health (The key concept is balance). The diet plan: Changing your eating habits. 4. What is misoshuru? Miso, tofu, and seaweed. 5. The first two weeks: Rapid weight loss. 6. The third week: Transition. 7. The maintenance diet. How to calculate your individual calorie requirements. Food plan. Adapting Japanese foods and cooking methods. 8. Representative

Japanese and American menus. 9. Japanese foods and how to shop for them. 10. Some Japanese cooking methods which you can adapt to American foods. 11. Some recipes for Japanese dishes. Changing your lifestyle. 12. Exercise. 13. The mental side of losing weight: How your mind can help your body. Appendices: 1. Charts and records for your personal use. 2. Nutritional information on miso, tofu, seaweed, and green tea. 3. Vitamins. 4. Distributors of Japanese foods. Bibliography: Cookbooks and foodbooks, nutrition books and articles, books in Japanese, books and articles on health and weight control by alternative approaches. Notes.

2427. Shandler, Michael; Shandler, Nina. 1981. The complete guide and cookbook for raising your child as a vegetarian. New York, NY: Schocken Books. xiv + 337 p. Index. 24 cm. [65 ref]

• **Summary:** On p. 22 soybeans and rice are used to illustrate protein complementarity. Fats survival plan (p. 70-71): Describes how to make clarified butter (ghee); it is superior to other fats for frying purposes and is not subject to the same polymerization as vegetable oils. "Eggs do not constitute a cholesterol risk," but "soy milk and tofu are... excellent high-protein substitutes for eggs if your children are allergic." Good sources of protein during pregnancy include beans, grains, tofu, gluten, dairy products, and soy products. Use complementary proteins together. Tofu can be blended into creamy salad dressings.

"Homemade soy milk is deficient in vitamin B-12, vitamin D, and calcium. Commercial soy drinks for infants [infant formulas] are fortified with these and other nutrients but often contain sugar and other detrimental additives" (p. 110).

"After approximately 1 month of eating solid foods, a second series of foods can be introduced to your infant." These may include puréed tofu or light miso soups (p. 116-17).

Soy-related recipes include: Whole wheat soy flakes (p. 206). Tamari broth with dumplings (and soy flour, p. 216). Nondairy cream of vegetable soup (with tofu, p. 216). Summer cucumber tofu soup (p. 218). Soyburgers (with whole soybeans, p. 222-23). Barbecued tofu sandwiches (p. 226). Tofu cheesie macaroni (p. 232). Tofu noodle casserole. Fried tofu over rice. Tomato tofu lo mien (p. 233-34). Tofu and rice seaweed rolls (p. 236). Pizza (with soy flour and gluten flour, p. 236-37). Creamed spinach with tofu (p. 254). Tamari-glazed "trees" (Broccoli, p. 255). Vegan dips (p. 264-65): Avocado tofu dip. Cucumber tofu dip. Nondairy dressings (p. 271-72): Tofu dressing. Nut and soy milks (p. 311-13): Fortified soy milk. Carob soy milk. Spiced soy milk. Almond milk. Cashew milk. Coconut milk. Tahini milk. Nondairy sandwich fillers (p. 320-21): Soy sandwich "meat" (with whole soybeans and tamari soy sauce). Tofu sandwich spread.

2428. Shurtleff, William; Aoyagi, Akiko. 1981. Wat is miso? Nederlandse bewerking: Robby de Nies & Sjon Welters [What is miso? Translated into Dutch by Robby de Nies and Sjon Welters]. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 16 p. [3 ref. Dut]

• **Summary:** Contents: Introduction. Delightfully varied; highly versatile. A nutritional treasure trove. The varieties of miso (including a full-page table). The preparation of miso. Traditional natural miso and quick modern miso. A brief history of miso. Buying, storing, and using miso. Miso in Japan. Traditional Japanese miso shops and modern factories. Making miso at home. Favorite miso recipes (17 recipes). Address: Authors: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. De Nies: c/o Tenmi, Sakuragaoka 4-3, Shibuya-ku, Tokyo, Japan. Welters: c/o Manna Natuurlijke Levensmiddelen, Meeuwenlaan 70, 1021 JK Amsterdam, Netherlands.

2429. Shurtleff, William; Aoyagi, Akiko. 1981. Miso soup protects against cancer. Lafayette, California. 3 p. 28 cm.

• **Summary:** This is mostly a translation by Aoyagi of an article about "Miso soup's unexpected good effects" from *Asahi Shinbun*, 27 Sept. 1981. A heavily edited version was published in *East West Journal* (Jan. 1982, p. 42-43). Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2430. Stobart, Tom; Owen, Millie. 1981. The cook's encyclopedia: Ingredients and processes. New York, NY: Harper & Row, Publishers, Inc. xii + 547 p. Illust. 25 cm. [20 ref]

• **Summary:** Soy related entries include: Bean curd (incl. tofu). Bean-curd cheese [fermented tofu]. Bean paste and bean sauce (incl. Red bean paste) is sweet and made from adzuki beans. Yellow bean paste is made from soybeans and is salty and pungent. "Fermented salted black beans" is made from a black variety of soybeans; these salted black beans can be used to make "black bean sauce" which can be used as a flavoring in fish, lobster, chicken, and pork dishes.

Soybean (incl. soya bean, soja bean, flour {"pork soya links" used in Britain during World War II}, sprouts, soy oil, soy sauce, soymilk, vegetable yogurt [soy yogurt], vegetable cheese [soy cheese], tempeh, bean curd skin [yuba], miso, tamari, soy sauce, soy protein isolate, soy granules or grits, textured plant protein [textured soy protein]). The name in four European languages is given.

Soy sauce or shoyu (It "is said to be one of the ingredients of Worcestershire sauce." Incl. the "very heavy Indonesian *ketjap* {*ketjap manis* or *ketjap benteg*}, which is a type of soy sauce,..."). The name in four European languages is given.

Textured plant protein (a high-protein foodstuff manufactured from plants (soybeans, peanuts, wheat,

cottonseed, etc.). “Originally it was aimed at the vegetarian market.” Also called “textured vegetable protein” in the USA. Incl. textured soy flour, textured soy protein gel and fibers).

Worcestershire sauce: Begins with a history (starting in 1837) based on the fanciful story so widely known. “Thus was born what is probably the world’s best-known and most ubiquitous bottled sauce, one which has become a standard ingredient.” Note: How about soy sauce? “The exact formula is secret. Although it is much imitated, nobody seems to be able to get quite the taste of the original.”

Also contains entries for adzuki, ketchup (“Javanese katjap [ketjap], for example, is a very sweet soy sauce”), peanut (groundnut or monkey nut), pulses, seaweed, sesame seed, tahini.

Note: Millie Owen prepared the American edition of this book. Address: 1. Hassocks, Sussex, England; 2. Northfield, Vermont.

2431. Wood, B.J.B. 1981. Introduction of new fermented foods into Western culture. *Advances in Biotechnology* 2:467-72. Also in Proceedings of the VIth International Fermentation Symposium; London, Ontario. Academic Press, New York, pp. 467-472. [6 ref]

• **Summary:** Discusses soy sauce, shoyu, miso, tempeh, sake, and soy milk. Address: Dep. of Applied Microbiology, Univ. of Strathclyde, George Street, Glasgow G1 1XW, Scotland.

2432. World of God. 1981. The cookbook for people who love animals. Route 2, Box 98E, Brooksville, Florida 33512. 176 p. Edited by Butterflies. Illust. and cover design by Flowers. Recipe index. 26 cm. Spiral bound. The 4th edition was copyright in 1987. [31 ref]

• **Summary:** The top of the title page reads: “Over 300 totally vegetarian recipes. From beginner to gourmet. No meat. No eggs. No dairy. No honey.” At the bottom of the title page is a field of red and orange flowers, with butterflies around them, and a rayed sun overhead against a light yellow background. This is a good, spiral-bound collection of vegan recipes, which are straightforward, appetizing, and nutritious. Special section includes recipes for cat and dog food. The book is interspersed with nice quotes about vegetarianism, veganism, and animal rights from great thinkers such as Longfellow, Emerson, Schopenhauer, John Galsworthy, Jeremy Bentham, Cicero, Herbert M. Shelton, John Ruskin, John Stuart Mill, Tagore, Plutarch, Tolstoy, Cardinal Newman, George Bernard Shaw, Thoreau, St. Francis, Leonardo da Vinci, Harriet Beecher Stowe, Romain Rolland, and Friedrich W. Nietzsche.

The glossary of ingredients lists okara, soy powder, tamari, tofu. “Soy powder [whole soy flour]—Made from cooked soybeans, it contains all the natural oil of the soybean. Used in casseroles, sweets, and for making soy

milk. It can also be used as an egg substitute. Use 1 heaping tablespoon soy powder and 2 tablespoons water in place of 1 egg.”

Recipes with soyfood terms in the title include: Quick instant soy milk (p. 12). Soy milk. Soy yogurt [non-fermented]. Soy margarine (p. 13). Soy tofu. Scrambled tofu. Tofu cottage cheese (p. 14). Tofu cream cheese (p. 15). Bran muffins (with soymilk, p. 22). Most baked goods include soymilk in place of dairy milk. Miso soup (p. 37). Tofu eggless salad. Okara salad (p. 54). Tofu potato salad (p. 56). Tomato tofu salad (p. 57). Tofu tahini dressing. Blond miso dressing (p. 67). Orange tamari dressing. Soy mayonnaise (p. 68). Miso spread (p. 69). Hot miso dressing (p. 73). Tahini-tamari sauce (p. 75). Stuffed tomato with soybeans (p. 92). Tofu saute (p. 104). Potatoes with tofu. Noodle tofu (p. 105). Tofu bean-thread saute (p. 106). Matzoh tofu bake (p. 124). Soy burgers (p. 131). Okara cylinders (p. 132). Tofu cheesecake (p. 141). Carob tofu cream pie (p. 143). Recipes for dogs and cats: Okara delight (p. 163). Soybean mash (p. 164). Instant soybean-meal dinner (p. 165).

At the back is a 6-page section titled “The Spirit of Ahimsa” by H. Jay Dinshah, president of the American Vegan Society. It is excerpted from his books “Out of the Jungle” and “Here’s Harmlessness.” Address: Brooksville, Florida.

2433. Yan, Martin. 1981. The Yan can cook book. Garden City, New York: Doubleday & Company Inc. 355 p. Illust.

• **Summary:** This Chinese cookbook, published in both hardcover and paperback, contains at least 15 recipes using bean curd (tofu), especially in the chapter titled “Bean Curd, Eggs, and Other Protein-Rich Foods” (p. 179-99). Tofu is usually referred to as “soybean curd” or “bean curd.” Pages 185-87 contain a recipe for making tofu at home, and give a nutritional comparison of firm bean curd, chicken eggs, ground beef, and cottage cheese. In the chapter “Saucy Dips” is a recipe for “Black Bean Sauce” using “salted black beans” [soy nuggets].

The glossary (p. 313-) gives good descriptions of the following soyfoods: Black beans salted, brown soy sauce, Hoisin sauce, Hot bean paste, MSG (monosodium glutamate), soy sauce, bean curd, and soybean sheets dried (yuba).

The author is the star of a popular daily Chinese cooking show named “Yan Can,” which he has hosted since 1978. Born and raised in Kwongchow, China, he left China in 1963 and began cooking at the age of 13 as an apprentice in a popular Hong Kong Restaurant (owned by his uncle) and at age 18 he had earned a diploma from the Overseas Institute of Cookery. Arriving in the USA in 1969, he earned a masters degree from the University of California at Davis.

2434. Yepson, Roger B. ed. 1981. Home food systems. Emmaus, Pennsylvania: Rodale Press, Inc. 475 p. Illust. Index. 29 cm. [15 ref]

• **Summary:** Extensive, positive information on soyfoods is contained in the chapters on Grains (and bread, see p. 35), Beans (p. 94-95, 99-115; tofu, tempeh), Sprouting (p. 120, 125, 127), Canning (p. 203), and The Home Dairy (p. 298; soymilk, soy yogurt). Reviews and photos of many soyfoods books are given, with a sample recipe from most.

Pages 298 notes: "Soymilk is low in riboflavin (vitamin B-2), totally lacking in vitamin B-12, and has drastically less calcium than dairy milk. On the other hand, soymilk is lower in carbohydrates, has 12% fewer calories, 25% less fat, no cholesterol, and contains 15 times more iron than cow's milk." Address: Emmaus, Pennsylvania.

2435. Yokotsuka, T.; Sasaki, M. 1981. Risks of mycotoxin in fermented foods. *Advances in Biotechnology* 2:461-66. [37 ref. Eng]

• **Summary:** "In the production of Japanese fermented foods such as shoyu, miso, and sake, the major enzyme source is *Aspergillus* molds such as *A. oryzae* and *A. sojae*. Many investigators have failed to find a single aflatoxin producer among the *Aspergillus* molds used for food fermentation. Some cultures produced fluorescent compounds having Rf values resembling those of aflatoxins, further investigations, however, indicated that these compounds were 7 kinds of nontoxic pyrazine compounds including flacacol, isocoumarin compounds, lumichrome, and other compounds than aflatoxins. *Aspergillus* molds were also checked for their production of Aspergillilic acid, β -nitropropionic acid, kojic acid, and oxalic acid. Results indicated no possible hazard caused by these compounds in Japanese fermented foods." Address: Kikkoman Corp., Noda-shi, Chiba-ken, Japan.

2436. Young, Mala. 1981. Main dishes. Newton Abbot, Devon, England: David & Charles. 48 p. Illust. No index. 21 cm. Series: Health Food Cooking.

• **Summary:** Page 8 notes that miso and tamari, both fermented soya products, are useful ingredients—as are aduki beans and seaweeds. Soy-related recipes include: Mixed bean and grain stew (with miso and tamari, p. 20). Soya beans and vegetables in miso sauce (p. 22-23). Aduki pâté and salad (p. 24-25). Winter vegetable and miso pie (p. 38).

2437. [Japan miso export statistics]. 1981. In: Okura-sho Yushutsu Tsukan Tokei-hyo. Tokyo, Japan.

• **Summary:** Gives miso export statistics for 15 countries. For each country gives: 1980 weight and 1981 weight (in kg). Percentage increase. 1980 and 1981 price in yen. Percentage price increase. The top countries, in descending order of amount exported are (with the 1981 weight in kg for each): USA 834,303. Singapore 94,988. Netherlands

67,767. Canada 46,178. England 40,371. West Germany 39,966. Australia 39,432. Iraq 34,509. Indonesia 30,620. Hong Kong 28,940. France 27,959. Belgium 26,625. Taiwan 25,238. Italy 18,755. Saudi Arabia 18,627. Total for all miso exports to all countries 1,524,008. Address: Tokyo, Japan.

2438. *Tetra News*. 1981? Soymilk becomes new mainstay of product lines at Okazaki Marusan Co. Undated.

• **Summary:** Okazaki Marusan Co. was established in 1952 and has grown rapidly in the past 3 decades to become one of Japan's five major miso manufacturers. Miso presently accounts for over 80% of the company's total sales revenues. Mr. Michinobu Nabeta, Managing Director, says the company's short-term objective is "to become a health foods manufacturer."

"The first product resulting from Marusan's R&D program for soymilk launched a decade ago was 'Doujan' (Chinese for soymilk) which was commercialized eight years ago. 'Doujan contains the essence extracted from pearl barley and kelp and is a health food that is marketed through a health-conscious consumer organization that has a good reputation,' Mr. Nabeta comments.

"It's Marusan Tonyu (soymilk) in a 250 ml gable-top carton went on sale 2 years ago, and last year Tonyu in a Tetra Brik Aseptic 200 ml carton was introduced... The company's 'Tonyu,' 'Orange Tonyu' and 'Malt & Tonyu,' all in Tetra AB cartons [and on the market by 21 July 1981 in 200 ml cartons] are distributed nationwide to supermarkets; thus, the sale of these products is growing.

"In recent years the soymilk market [in Japan] has expanded steadily, and it is estimated that the market will grow from ¥3,100 million in 1980 to ¥5,000 to ¥6,000 million this year. 'The market will reach ¥6,000 million or thereabouts this year; many believe the market will grow by 30% in 1983, though part of the industry predicts a ¥10,000 million market. In the future we expect the market to grow to a ¥50,000 million to ¥60,000 million market, or comparable to the tomato juice market. Our company and other soymilk suppliers hope that the soymilk market will eventually share 10% of the cow's milk market,' Mr. Nabeta says."

"The company has been tapped by some U.S. companies [including Eden Foods] for soymilk manufacturing ventures in the U.S., but Mr. Nabeta believes the company should concentrate on the domestic market, at least for the time being."

2439. Evans, Barry. 1982. Re: The American Miso Company announces the opening of its miso shop in North Carolina. Linden's Elf Works is sole agent in marketing and distribution. Letter to Friends of The American Miso Company, Jan. 4. 1 p. Typeset, with signature on letterhead.

• **Summary:** “Dear Friends—We at The American Miso Company are proud to announce the opening of our miso shop in Western North Carolina. This long awaited dream of making American miso has evolved from a genuine need here in the United States for an unpasteurized miso made with organic ingredients and fermented under natural conditions in large wooden vats.”

“Through the joint efforts of producer John Belleme and his teacher, Takamichi Onozaki from Yaita, Japan, we are now making absolutely delicious miso that will strengthen the body and delight the palate.

“The Lindenself Foundation, doing their business as Linden’s Elf Works, located in Piedmont, North Carolina, has been appointed as the sole agent in marketing and distribution of The American Miso Company brand products... Their address is Route 1, Box 43-D, Rougemont, North Carolina. Your phone contact is John Troy at... 919/364-2723. Enclosed is the Linden’s Elf Works distributor price sheet which includes all the pertinent information for your upcoming Spring catalogue. With kindest regards, Barry Evans, President.”

Note 1. This letter was precipitated by Erewhon Trading Company’s announcement in Nov. 1981 that it was filing for Chapter 11 bankruptcy. Note 2. This is the earliest document seen (June 2000) that mentions the company’s new name, “The American Miso Company.” Note 3. This is the earliest document seen (July 2000) that John Troy of Elf Works in connection with miso or soy.

Note 4. Talk with Barry Evans, owner of American Miso Co. 2000. June 29. Linden’s Elf Works never distributed any miso made by AMC; Great Eastern Sun, Barry’s new company, was the distributor. During the first year or two, John Troy purchased a significant percentage of the miso made by AMC for his sauces and dressings. To this day, he remains an important friend and advisor, but the percentage of miso he buys is now quite small. Joel Dee, a pioneer with his Miso Cup, worked with John Troy. Joel lived in the little town Saluda, North Carolina, where John Belleme lives today. Last year, Joel introduced Organic Miso Cup using miso from AMC; he is now a significant customer. Address: President, The American Miso Company, Rutherfordton, North Carolina.

2440. Krieger, Verena. 1982. Re: Dr. Johannes Kuhl and fermented foods in Switzerland. Letter to William Shurtleff at Soyfoods Center, Jan. 19. 1 p. Typed, with signature. [1 ref]

• **Summary:** Dr. Kuhl, who wrote in the 1950s and is no longer living, advocated a natural-foods diet containing large amounts of fermented foods (one-third to one-half of all foods consumed). He believed that such a diet is the best protection against cancer and radioactivity. “His publisher, who keeps re-editing his books thinks that miso and tempeh

would fit perfectly into his theory (K. himself had probably never heard of fermented soybeans).

“I have always been fascinated by fermented foods and feel that they will have to become an important part of the diet, especially with people moving away from meat eating. I hope that I shall be able to write a cookbook some day as a tool on how to integrate them into a practicable diet.”

Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.

2441. Oka, Hideki; Itoga, Keiji; Mochizuki, Tsutomu. Nagano Miso K.K. (Nagano, Japan). 1982. Method of preparing albumin rich foodstuff raw materials. *U.S. Patent* 4,311,715. Jan. 19. 8 p. Application filed 3 March 1980. [6 ref]

• **Summary:** “In preparing miso like albumin rich foodstuff raw material, malt of rice or the like is sterilized with ethyl alcohol or an aqueous solution thereof, the sterilized malt is admixed with steamed or boiled soya beans and the resulting mixture is aged at a temperature of 20°C-50°C for about one week or more.” Address: 1. Ueda, Japan; 2-3. Nagano, Japan.

2442. Jaccard, Anne-Marie; Krieger, Verena. 1982. Une graine pour l’an 2000 [A grain for the year 2000]. *Illustré (Lausanne, Switzerland)* No. 4. p. 59-63. Jan. 27. [Fre]

• **Summary:** This grain is the soybean, which is imported in huge quantities from the USA to Europe. The article discusses the soybean plant, tofu, miso, tamari and shoyu, tempeh, homemade soy sprouts, and yuba.

A photo shows Paul Simon, a specialist in macrobiotic food at Lausanne. He makes tofu in the traditional way using nigari, and serves it with tamari and ginger. “Fresh tofu, prepared on the spot, is difficult to find in Switzerland. In the French-speaking cantons of Switzerland, there are only two places: (1) The macrobiotic Center of Lausanne, 7 ruelle de Bourg, and (2) Le Grain d’Or, 7 rue Voltaire, Geneva.” Recently a factory opened at Zurich, and another will open soon at Nyon. In the two macrobiotic restaurants of French-speaking Switzerland (Romandie), tofu is found regularly à la carte: at “The Bio” in Lausanne, and “La Moisson” in Geneva.

2443. Shurtleff, William; Aoyagi, Akiko. 1982. Miso soup: Safeguard against cancer. *East West Journal*. Jan. p. 42-43.

• **Summary:** This article is mostly a translation by Akiko Aoyagi of an article about “Miso soup’s unexpected good effects” from *Asahi Shinbun*, 27 Sept. 1981. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2444. Westbrae Natural Foods. 1982. Distributor catalog and pricelist: Jan. 1982. Emeryville, California: Westbrae. 16 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue on a tan background. Address: 4240 Hollis St., Emeryville, California 94608. Phone: (415) 658-7518 (orders).

2445. Wood, Brian J.B. 1982. Soy sauce and miso. *Economic Microbiology* 7:39-86. Jan. A.H. Rose, ed. Fermented Foods. [50 ref]

• **Summary:** Contents: 1. Introduction. 2. The preparation of soy sauce: Introduction, preparation of raw materials (the beans, wheat), mixing, koji, moromi. 3. Of beans, microbes, and miso: Beans, microbes, miso. 4. Trade in soy sauce: Introduction, statistics. Table 1 (p. 64-66) shows exports of soy sauce in 1978, in tonnes (metric tons) from Hong Kong, Korean Republic, Singapore, Japan, and total, to almost every country in the world (with each country's population in millions), grouped by region as follows: 1. North America: Canada, USA (#1)–Regional total imports: 6,052.3 tonnes. 2. South and Central America [and Caribbean]: Argentina (#3 in region), Bolivia, Brazil, Chile, Costa Rica, Ecuador, El Salvador, Guatemala, Guyana, Honduras, Mexico (#2), Nicaragua, Panama, Paraguay, Surinam, Venezuela (#1), Granada, Jamaica, Trinidad and Tobago, total. Former Dutch West Indies–Regional total imports: 1,046.4 tonnes. 3. Europe: Austria, Belgium, Czechoslovakia, Denmark, Finland, France (#4 in region), Germany (West #3), Greece, Italy, Netherlands (#2), Norway, Portugal, Spain, Sweden, Switzerland, UK (#1), USSR–Regional total imports: 3,017.7 tonnes. 4. Near and Middle East: Bahrain (#3), Egypt, India, Iran (#2), Iraq, Jordan, Kuwait, Oman, Qatar, Saudi Arabia (#1), United Arab Emirates, Yemen Arab Republic–Regional total imports: 1,193.5 tonnes. 5. Far East and Western Pacific: Brunei, Hong Kong (#3 in region), Indonesia, Japan, Korea (South), Macao, Malaysia (#2), Philippines, Sabah (#1; A state of Malaysia from 1963; Formerly British North Borneo), Sarawak (A state of Malaysia from 1963), Singapore, Taiwan, Thailand–Regional total imports: 3,139.4. 6. Pacific and Australasia: Australia (#1 in region), Cook Islands, Christmas Islands, Fiji, Guam (#2), Nauru, New Caledonia, New Hebrides, New Zealand, Oceania n.c.s. (#3), Papua New Guinea, Portuguese Timor, Samoa and Tonga, Solomon Islands, Tuvalu (Ellis Island), U.S. Oceania–Regional total imports: 1,647.5 tonnes.

Note: This is the earliest document seen (July 2008) concerning soybean products (soy sauce) in Kiribati (Christmas Islands), in Nauru, in Qatar, or in Tuvalu. This document contains the earliest date seen for soybean products in Kiribati (Christmas Islands), in Nauru, in Qatar, or in Tuvalu (1978); soybeans as such have not yet been reported.

7. Africa: Algeria, Canary Islands, Ethiopia, Gambia, Ghana, Kenya, Libya, Malagasy, Malawi, Mauritius (#2 in region), Nigeria, South Africa (Republic of, #1), Sudan, Réunion Islands (#3), Tanzania, Zaire. Other African

countries–Regional total imports: 365.7 tonnes. World total imports: 15,731.5 tonnes, of which 6,192.8 tonnes from Hong Kong, 1,233.5 tonnes from South Korea, 1,713.6 tonnes from Singapore, 6,591.6 tonnes from Japan. The value in pounds sterling and in pounds sterling per tons of soy sauce is given for each exporter.

Other tables show: (2) Soy sauce exports (in tonnes and value) each year from 1976 to 1976 from Hong Kong, South Korea, Singapore, and Japan. A large percentage of Hong Kong's exports are re-exports (probably from China). (3) Total soy sauce exports from Japan, 1976-1978, by container type, with amount and value. (4) Soy sauce and miso production in Japan every 5 years from 1965 to 1978 (in tonnes). (5) Soy sauce and miso production in Japan for export in 1976, 1977, and 1978. Miso production (in tonnes) averaged about 40% of soy sauce production, and miso exports (in tonnes) averaged about 13% of soy sauce exports. (6) Imports of soy sauce into Hong Kong, Singapore, and the USA from exporting countries in 1978 (with figures for exports from China in 1976 and 1977). (7) Re-exports of soy sauce (made in China) from Hong Kong and Singapore in 1978 to major importing countries worldwide, by region, by country. Small countries that are the destination of this soy sauce include: Honduras, Nicaragua, Panama, Venezuela, Trinidad and Tobago, Former Dutch West Indies [also called Netherlands Antilles; they are part of the Lesser Antilles and consist of two groups of islands in the Caribbean Sea: Curaçao and Bonaire, just off the Venezuelan coast, and Sint Eustatius, Saba and Sint Maarten, located southeast of the Virgin Islands. The islands form an autonomous part of the Kingdom of the Netherlands], Pakistan, Saudi Arabia, United Arab Emirates, Brunei, Sabah, Sarawak, Fiji, Nauru, Oceania (non-U.S.), Oceania (U.S.), Papua, Samoa and Tonga, Solomon Islands, Ghana, Malagasy Republic, Togo. Total from Hong Kong: 2,945.3 tonnes, and from Singapore 109.5 tonnes.

(8) Exports of miso (in tonnes) from South Korea and Japan in 1978 to major importing countries worldwide, by region, by country. The leading importers are: USA (622), Saudi Arabia (353), Singapore (66), Bahrain (64), Netherlands (38), Iran (29), Iraq (29) France (28), German Federal Republic (23). Smaller importers include: Chile, Guyana, Surinam, Bangladesh, Iran, Iraq, Jordan, Kuwait, Qatar, Saudi Arabia, United Arab Emirates, Yemen Arab Republic, Sabah, Fiji, Guam, New Hebrides, Papua New Guinea, Samoa, Solomon Islands, Algeria, Canary Islands, Ghana, Kenya, Libya, Mozambique, South Africa Republic, Zaire.

Note: This is the earliest document seen (June 2007) concerning soybean products (miso) in Qatar. This document contains the earliest date seen for soybean products in Qatar (1978); soybeans as such have not yet been reported.

(9) Exports of miso from South Korea and Japan in 1976, 1977, and 1978 (quantity and value each year; no importing country names are given).

5. Tour of South East Asia: Technical and scientific aspects, trade aspects. 6. Acknowledgments. References

The chapter on Trade states: Soy sauce and soy paste (miso) are traded between all countries of South East Asia. The Korean Republic's exports nearly quadrupled in tonnage. The Kikkoman Company's production facility in Wisconsin produced 21,6000 tonnes of soy sauce in 1978. This was equal to 3 times the total exports from Japan in the same year. Japan's total share of the world soy sauce market remains very healthy. Miso exports are still small in comparison with soy sauce. On a rising market Japan's exports still only represent 0.2% of its annual miso production; "clearly there is considerable room for expansion here."

Miso is of greater relative importance to Korea than it is to Japan. Among the European countries, Belgium and Holland import the greatest amount of miso on a per capita basis. Spain imports a fair amount of miso. The U.S.A. and Canada had total miso imports totaling about 10% of their soy sauce imports.

"In Thailand, there are about 50 soy sauce factories, the majority of which are small, producing less than 100 kilolitres per year, although it should be noted that most of them also produce soybean paste and soybean cheese [probably tofu]. The total annual consumption of soy sauce in Thailand is estimated at about 6,000 kilolitres (about 7,200 tonnes).

"In Malaysia, there are about 140 soy sauce factories producing in total an estimated 5.5 million gallons of soy sauce per year according to the proprietor of a leading brewery in Kuala Lumpur. This is about 21,000 tonnes per annum" (p. 84). Address: Dep. of Applied Microbiology, Univ., of Strathclyde, Glasgow [Scotland], U.K.

2446. Wollner, Joel. 1982. History of Erewhon, macrobiotics, and soyfoods in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 2. 2 p. transcript.

• **Summary:** Discusses Evan Root, Redwing Books, Erewhon's first tofu, Charles Kendall, tempeh. Address: Boston, Massachusetts.

2447. Hillyard, Roger. 1982. History of Erewhon, natural foods, and macrobiotics in America. Part I (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 7. 2 p. transcript.

• **Summary:** Roger got involved with macrobiotics in San Francisco in about 1965. He lived in San Francisco, was doing light shows at the Avalon Ballroom, read the book *You are All Sanpaku* [by Sakurazawa Nyoiti (George Ohsawa)]; English version by William Dufty], and got

involved. Also in about 1965, Herman Aihara and Bob Kennedy used to come to town to lecture in a church on Oak Street. Bill Tara and Paul Hawken, who were filmmakers, lived in a warehouse on lower Mission St. described in the *Electric Kool-Aid Acid Test*, by Tom Wolfe (largely about Ken Kesey and the Merry Pranksters). "A little macro scene started. We heard that Boston was macro Mecca."

Roger arrived in Boston in Oct. 1969. Erewhon started when Michio and Aveline Kushi were living in Cambridge, Massachusetts; in their basement they had a little food, which they would sell to people who came to hear Michio lecture. "The food was but a vehicle to the larger teaching. The food is like an asana or yoga posture, but the goal is enlightenment. You can get stuck on the food. That is why Michio had very, very little involvement in Erewhon's food business, His focus was on the philosophy of macrobiotics and spreading it."

The Erewhon store was (at the time) in the basement of today's Redwing Books. Evan Root started the store, but he wanted to get out of it into a restaurant. Paul Hawken took over the sleepy little store. Bill Tara (who was from Santa Cruz) also worked there for a while. The tiny store had few customers, a very limited selection of products, and a little mail order business. Shortly after Roger arrived, the Erewhon store at 342 Newbury Street opened—in Nov. or Dec. 1969. Bruce Macdonald and Jim Docker helped to renovate the new store. The whole thing was called Erewhon Trading Co. In Feb. 1970 Roger started to work in this retail store.

Shortly thereafter, Paul Hawken went to Japan. At that time the only companies importing food from Japan were Chico-San and Infinity Foods in New York; both were macrobiotic. Erewhon bought from them, and then started doing a little wholesaling. After Paul went to Japan, Erewhon started importing directly from Japan. Paul got in touch with Mr. Kazama and helped to get Mitoku into the natural food export business. Kazama was an old friend of Obiyashi, who was an old friend of Michio Kushi's from Columbia University. Muso was shipping to Chico-San and Infinity. Erewhon imported from Muso and Kazama. Roger thinks Mitoku started in about 1970-71. Before that they sold soccer shoes and cranes. The fact that Paul was in Japan was instrumental in getting Erewhon's imports started.

The Erewhon retail store would sometimes get huge shipments, such as a 40-foot-long truck of rice that filled up the whole Erewhon storeroom. It was something like Kokuho Rose [a brand of short grain brown rice grown by Koda Bros. in Dos Palos, California]; it is not organically grown. There was really no room for it, and no refrigeration. At about this time the Lundberg Brothers in California started growing brown rice organically. At one time a boxcar of 100,000 lb of Lundberg rice arrived, so

Erewhon needed more warehouse space. Also involved were Jean Allison (from California) and Wally Gorell (from the Straight Theater, Haight-Ashbury district, San Francisco). In about mid-1970 Erewhon leased a 10,000 square foot warehouse space on the 5th floor of 33 Farnsworth St. [a big brick warehouse] in Boston. The space had a nice milling room. Then the wholesale business took off. Roger left Boston in April 1971. He had been running both the distributing company and the wholesale company, but there was a store manager. The retail store expanded into its back room. Then the wholesale business grew like mad. Orders came from non-macro natural foods stores, from new macro groups, etc.

How did the natural food movement get started? As Roger recalls, it was not started by macros. In about 1966 or 1967 Sunset Natural Foods became New Age Foods, an early natural foods store run by Fred Rohe. The natural food movement sprung out of the new consciousness—the counterculture—as did macrobiotics. The macrobiotic movement fed the natural foods movement. One Erewhon customer was Mr. Natural in Carbondale, Illinois. Although he was not a macro, he bought miso, tamari, rice, etc. There were lots of other non-macro stores like that too. But there were also lots of macro stores. Bill Tara opened a store and macro center on the 14th floor of a downtown building in Chicago; out of that grew Food for Life. Tom Waxman started Essene in Philadelphia, Pennsylvania. These were two mini-Erewhons. Each started as a small retail store, then became a wholesaler. Erewhon provided the model.

Erewhon set up a branch distributor in Canada, which later became Manna, with Gene Newman, a macro. Westbrae was a Berkeley political organization started by Bob Gerner, making granola. Erewhon West was connected with Bruce Macdonald. Bill Tara, with Aveline Kushi's prodding, started the Erewhon store in Los Angeles; it did a little distributing. Bruce Macdonald went to Los Angeles, then Bill Tara left for England—Roger doesn't know why. Erewhon West started growing. Jimmy Silver ran the Big Sanae, which became the Seventh Inn. Roger then went to Texas and in Jan. 1972 he worked with Deaf Smith for about a year. Later Erewhon West was sold to John Fountain, but really to John Demming—as a separate business from Erewhon.

The Well [a wholesale and distribution company in San Jose, California] was an offshoot of Fred Rohe's New Age Foods, ca. 1969-1970. It was never macrobiotic. Fred sold stock in his business, had 2 stores in San Francisco, then opened a big natural foods store [actually a supermarket] named New Age Natural Foods on California Street in Palo Alto. The whole thing was a fiasco; the Palo Alto store never made money.

Deaf Smith Farms was established as a joint venture between Erewhon and Arrowhead Mills; it never worked out. In April 1971 Bruce Macdonald started a marketing

company named Pure & Simple. In March 1972 Roger started working at the Well in San Jose. Bruce went to Green Mountain Grinery in Boulder, Colorado. Gradually The Well became Pure & Simple, and started importing from Mr. Kazama an Muso.

Paul Hawken was the first person to work with farmers to get them to grow grain organically for Erewhon. One of these was Carl Garrich of Lone Pine, Arkansas—after Erewhon moved to 33 Farnsworth Street. Roger did a lot of work with farmers at Arrowhead Mills, but not connected with macrobiotics.

Major macrobiotic wholesale distributors: Erewhon East and West, Laurelbrook (later), Food for Health, Essene, Manna in Canada (later). Llama (later) was not macro.

Macrobiotics played the major, primary role in introducing soyfoods to America. A little was also coming through Japan Foods [San Francisco] and Nishimoto [Trading Co., Los Angeles]. The macros made these foods available, but don't overcredit it; the time was ripe and it just happened. The main contribution of macrobiotics was simply making these foods available and teaching about them. Michio always said that macrobiotics is not just about food and the diet.

"It was frightening when we stopped to think about it. The business was doubling and tripling at a crazy rate." Roger still has his early notes but no accounting books. Continued. Address: California.

2448. Hillyard, Roger. 1982. History of Erewhon, natural foods, and macrobiotics in America. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 7. 2 p. transcript.

• **Summary:** While Roger was in Boston, no tofu was sold at the Erewhon retail store at 342 Newbury St.—since there was no refrigeration and no room. He thinks tofu was introduced after Erewhon got 33 Farnsworth St.

The trickiest question, which has no place in this book, is about work as a disciple / discipline vs. for money / as business. Work can be a spiritual practice (*karma yoga*), and that is how many of the early workers at Erewhon viewed it.

Roger does not know why so many people left Erewhon. Maybe Michio planned it that way. He does not know why Erewhon went bankrupt; maybe it was because the company was undercapitalized, there was no worker equity, and Michio did not know American business. "Maybe Michio did not care so much. Distributing foods was always a minor focus for Michio."

Other macrobiotic food distributors outside the U.S. were Lima in Belgium (by far the earliest), Harmony and Sunwheel in England, and some company in Italy. Address: California.

2449. Hayashi, Kazuya. 1982. [Re: Use of enzymes in modern shoyu production in Japan]. Letter to William

Shurtleff at Soyfoods Center, Feb. 15. 5 p. [Jap; eng]

• **Summary:** Dr. Hayashi specializes in the use of enzymes (especially protease) in shoyu at Kikkoman's Central Research Laboratory. 1. Use of enzymes with shoyu in Japan: The use of added commercial enzymes was approved by the newly revised Japan Agricultural Standard (JAS, 1980). The use of an enzyme-treated solution in "new-type shoyu" [*Shinshiki*] and amino-acids mixed type shoyu was approved. However only a few commercial products in Japan today are actually made with the use of commercial enzymes because (1) the enzymes are too expensive, (2) the effect of the enzymes is not significant since most manufacturers use the "all-koji" method, and (3) in a salt solution of high concentration, the effect of the enzymes is greatly reduced. Examples of actual current use: The Shono Starch Co. Ltd. uses enzymes for making a product named "Umamigen." Corn is treated with an enzyme solution in making shoyu. Kikkoman has a patent on making shoyu using 100% enzyme solution. It calls for the use of yellow koji enzyme (peptidase) and glutaminase. The quality is fine but the product is too expensive. This method is good when the presence of aflatoxins could be a problem. In the future a low-salt, high-temperature digestion method may allow the use of enzymes (cellulase digestion, peptidase digestion).

2. High temperature fermentation method: This research was started in about the 1920s. The research on low-temperature fermentation began in about the 1930s. In the early period, this was called the *sokujo* or "rapid method" of fermentation; the temperature was raised to 30-35°C. The quality was bad due to elution of some key flavor components, and because the glutamic acid content was lower. Also, the environment was not favorable to microbial growth. Use of the low-temperature method produces better quality shoyu. Use salt water (less than 5°C) for starting. For the first 15-30 days, keep at 15°C. After one month, raise the temperature to 25-27°C to complete the fermentation, then maintain at about 20°C. This is suitable for the breakdown of the material by bacteria.

3. Addition of yeasts and lactic acid bacteria to the shoyu fermentation process began around the 1960s. Only the yeast *Saccharomyces rouxii* is used in practice. *Torulopsis* is for experimental use only. Lactic acid bacteria are not yet adapted to actual production. Use of epoxy-lined tanks is also important.

4. Bansui (using a second pressing of the shoyu): Only a few shoyu makers use this method since the product quality is bad and it cannot be sold. For details, see Kimura 1914.

5. Chemical shoyu: During the Taisho period (1912-1926) and Showa period (1926+) Dr. K. Kurono/Koruna Kanraku at the Fermentation Research Institute did early work. The use of amino acids spread. In the early Showa period Ajinomoto company was a leader under Dr. Hori Shinichi. During the period 1945-55 Mieki, a glutamic acid

solution, was produced in large quantities (180,000 kiloliters). Improvement of amino acid solution purification led to cheap but tasty shoyu. Then came new-type (*Shinshiki*) shoyu. Bunzo Rokusho and the Mantetsu [Manchurian Railway] Research Institute did research in the early Showa period. During the period 1945-55 new-type shoyu making became widespread. Defatted soybean meal was digested with a weak acid and wheat koji was added to make shoyu.

6. History of the use of POBB (Para-oxy Butyl Benzoate): 1924-Sabalitscka discovered this food preservative. 1934-Dr. Kurono tested the effect on shoyu. 1937-Its use was approved for use in shoyu by the Japanese government. 1948-Use was approved as a food additive. The effect is great but the solubility is low.

7. Making koji for miso: The use of koji boxes is more popular, but the rotary drum is also used.

8. The future of the shoyu manufacturing process: Treatment of raw material and koji making will be spontaneous and automatic. Use of outdoor fermentation tanks. Continuous pressing. Improve sanitation by using a closed system. Digestion without salt. Liquid fermentation. Automatic control of microorganisms. Introduction of computerized system. Use of new raw materials and new microorganisms. Introduction of the fixed-enzyme method. Use of membrane filtration method. Address: Central Research Lab., Kikkoman, Noda, Japan.

2450. Ishii, Masaaki. 1982. Miso production and consumption in the United States (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** As of Sept. 1981 Miyako Oriental Foods makes more than 500 tonnes (metric tons) of miso a year. U.S. mainland miso consumption is about 1,500 tonnes. Of this, 834 tonnes is imported from Japan. Address: Manager, Agriculture, JETRO, Japan Trade Center, Bank of America Tower, 555 S. Flower St. 24th Floor, Los Angeles, California 90071.

2451. Pukel, Sanford; Evans, Barry. 1982. Agreement for exchange of stock and resolution of corporate interests. Rutherfordton, North Carolina. 4 p. Feb. 26. Unpublished typescript. 36 cm.

• **Summary:** In this agreement Sandy Pukel gets out of Oak Feed Miso and Barry Evans gets out of Oak Feed Store and Oak Feed Restaurant by an exchange of stock.

Pukel and Evans have heretofore been shareholders in Oak Feed Store, Inc., Oak Feed Restaurant, Inc., and Oak Feed Miso, Inc. The parties agree that Barry Evans owns 50 shares of outstanding common stock (30% of total outstanding) in Oak Feed Store, and 100 shares of common stock (30% of total outstanding) in Oak Feed Restaurant. Sanford Pukel owns 1,500 shares of common stock in Oak

Feed Miso. For the purposes of this agreement, the parties agree that the cost or other basis of Evans' stock was \$180,000. and the cost of other basis of Pukel's stock was \$91,500.

The parties desire to separate their above-stated stock interests by a mutual exchange of the shares of stock in the respective corporations. They agree that this transaction is effective as of 31 Jan. 1982, even though certain transfers and signing of documents may take place subsequent to that date.

Signed: Sandy Pukel and Barry E. Evans. Address: Rutherfordton, North Carolina.

2452. Edward & Sons Trading Co. 1982. Edward & Sons advances the theory of natural selection [Miso-Cup and Brown Rice Snaps] (Ad). *New Age Journal* (Massachusetts). Feb. Inside front cover.

• **Summary:** A large photo in this full-page color ad shows a bowl of steaming miso soup surrounded by Brown Rice Snaps. Note: This ad also appeared in *Vegetarian Times* (March 1982, p. 31—black and white; and Nov. 1983, p. 27—color). Address: Saluda, North Carolina 28773.

2453. Leviton, Richard. 1982. Traditional soy sauce ferments in Maryland. *Soyfoods*. Winter. p. 68-69.

• **Summary:** About Hoang Van Chi and his company Vietnam Food and Drink, founded in June 1979 in Maryland. They make Bodhi Sauce and Tuong Cu-Da. Photos by Leviton show 6 steps in the process of making this Vietnamese soy sauce, including one of Phan and Van Chi Hoang. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2454. Leviton, Richard. 1982. Soy delis: Fast, natural, and growing. *Soyfoods*. Winter. p. 35-37.

• **Summary:** Discusses the Well Bean Deli in Santa Cruz; Real Food Tofu Cafe in Redwood Valley; and The Tofu Shop in Arcata. All in California. Two photos show each location.

Concerning The Tofu Shop (768 18th St., Arcata, CA 95521): It "combines retail take-out with small scale tofu production and bakery products in a wood-lined airy storefront. Owner Matthew Schmit (who earlier managed a soy deli in Telluride, Colorado) has filled his 1,000 square feet with a small commercial cauldron-style tofu shop, small bakery, and 200 square foot retail front, all of which he launched on \$11,000 investment on December 15, 1980. The cozy retail space features racks of soy cookbooks and crackers, teas, packaged miso, tofu and tempeh kits, noodles, seaweed, and a handsome reach-in cooler where the tofu herb burgers, tofu spinach pies, vegetable tofu sushi rolls, tofu tahini salad, tofu herb dip, tofu cream pies, and bottled soymilk are displayed. Monthly sales average \$3,500 with some outside distribution of tofu, soymilk, and

burgers. The deli attracts walk-in customers from the nearby Humboldt branch of the University of California while tofu burgers and tofu spinach turnovers are probably the most popular products at the deli." Photos show: (1) Matthew Schmit standing at the wood-lined counter. (2) Matthew and Susan [Suzanne] Schmit with their shop's specialties.

Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2455. **Product Name:** [Malvabo Barley Miso, Rice Miso].

Foreign Name: Malvabo Kornmiso, Rismiso.

Manufacturer's Name: Malvabo.

Manufacturer's Address: Malvabo, 19 063 Örsundsbro, Sweden. Phone: 0171-60456.

Date of Introduction: 1982. February.

Wt/Vol., Packaging, Price: 400 gm. Packed in a plastic tofu package.

How Stored: Shelf stable.

New Product—Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255. The company is listed as Aros Sojaprodukter, Bergsvagen 1, 19063 Örsundsbro, Sweden. Run by Ted Nordquist & Tim Ohlund. Phone: 01-716-0456.

Talk with Ted Nordquist. 1985. Jan. 7. The miso is made in 12-15 crocks, each containing 30 liters. Tim Ohlund handles it. He opens one crock every 3rd or 4th month. The contents is sold when he opens it. Ted thinks it tastes fantastic, better than imports. Tim reads and experiments a lot. It is a mellow miso, mild and not very salty.

Talk with Ted Nordquist. 1988. March 27. Tim Ohlund is making miso in the basement of Ted's plant, Aros Sojaprodukter. He has been making it since about 1979, but Ted is not sure when Tim started to sell it commercially. His company is Malvabo, which is the name of the town where he lives. He is very interested in microbiology. He makes many different kinds of miso: wheat, oat, etc. He has about 20 crocks with 30 kg in each crock. He used to be an owner of Aros, but Ted bought him out in 1984.

Talk with Ted Nordquist. 1990. Nov. 23. The miso company has always been owned by Tim, never by Aros. From the beginning, Tim made the koji at home in Malvabo near Örsundsbro, then cooked the soybeans and mixed and ground them with the koji and salt at Aros. He fermented the miso in the basement of Aros in 30-100 liter ceramic crocks. Initially Tim operated without a company name and sold the miso directly to stores and individual customers. Then in late 1988 he started and registered his first company, named Timoteus, which makes and sells two products: miso and koji. Tim is now employed by Ted, manufacturing and delivering tofu, but Tim still makes miso; he does not make tempeh.

Letter from, then talk with, then letter from Tim Ohlund, founder and owner of Malvabo and of Timoteus Kojiprodukter HB. 1991. May 14 and May 30 and June 5.

Tim was born in Seattle, Washington, and raised in America, but with Swedish ancestry. He first visited Sweden as a tourist in Dec. 1967 and liked it so much he decided to live there some day. But he was drafted into the U.S. Army for 2 years, spending 1 year in Vietnam. After being discharged in Fort Lewis, USA, he traveled directly to Japan to pursue his interest in Zen Buddhism. He spent 10½ months in Japan practicing Zen meditation. There, in Aug. 1970, he also became acquainted with miso (he was very interested in it, but didn't learn how to make it) and with macrobiotics. He left Japan and took the train across the USSR to meet his parents in Sweden. He has lived in Sweden since that time (1971). In Sweden his interest in both miso and macrobiotics grew. He started reading about miso, then he decided to return to Japan in the summer of 1973 to study food processing (including miso and tofu making) for 2½ months. He lived in Kyoto and learned a little about miso there and in Hida Takayama—but not enough to make his own miso. Back in Sweden he read books on miso by macrobiotic teachers Herman Aihara and Michio Kushi. Using their instructions, he started to experiment with making miso and koji at his home named Malvabo (pronounced MAL-vuh-bo), at 19063 Örsundsbro, Sweden in Jan. 1975. The instructions didn't work and for the first 2 years the results were "quite disastrous." He first was able to make koji and miso after reading *The Book of Miso* by Shurtleff and Aoyagi, and scientific journal articles by Hesseltine and Steinkraus.

When Aros Sojaprodukter began making tofu in Örsundsbro in Feb. 1981, Tim was a part owner and he was able to expand his miso production using space in the Aros basement. But production was still on a small, experimental scale and none of the miso was sold.

In Feb. 1982 Tim first started to sell the barley miso and rice miso he was making at home; initially he sold only very small amounts, and only directly to friends. The first year he sold about 35 kg of rice and barley miso to friends. Tim wanted to sell organic miso made with all organically grown ingredients, but initially he could not obtain organic polished rice or barley. In Sept. 1983 he first produced an organic miso using oat koji and yellow peas—but not for sale. In April 1984 he started using the brand and company name "Malvabo" (address 19063 Örsundsbro, Sweden) and first sold miso to a retail food store—actually to several stores. The brand "Malvabo" appeared on the hand-written labels for his rice and barley miso. Tim was the first person in Sweden or in Scandinavia to make miso commercially. At the time he started, two types of miso were being imported from Japan: Regular miso by Japanese food stores in Stockholm, and macrobiotic/natural food miso via Lima in Belgium. Natural Hatcho miso had been in Sweden in small quantities since at least 1971.

In Sept. 1985 Tim first sold the organic miso he had developed in late 1983. Then in 1986 he and his family

moved from the house name Malvabo to another house on the same farm named Härvstagård. In Nov. 1988 Tim registered his company: Timoteus Kojiprodukter Handelsbolag (HB), Härvstagård, 19 063 Örsundsbro, Sweden. Phone: 0171-65106. The largest amount of miso he has ever sold in one year is about 1,000 kg. He has never made any other fermented soyfoods commercially, except tempeh. Tim wasn't able to register his company name (after waiting nearly 2 years for the bureaucratic processing) as a trademark. Now he may have to change the name or remain small and lay low. Another big multinational company has a product with a similar name and also a grain-based foodstuff.

Innovations: Tim has been developing an oat koji since 1977, and has been making an oat-yellow pea miso, and a barley-yellow pea miso since 1978. In Feb. 1980 he started using water-lock stoneware crocks with superior results. His products have succeeded because of better flavor, use of organic ingredients, and because they are produced in Sweden and not pasteurized. See also Timoteus Kojiprodukter. 1988, Nov.

2456. Ontario Soya-Bean Growers' Marketing Board. 1982. Canadian soyabean mission, South East Asia, Feb. 12th–27th, 1982: Mission member reports. Chatham, Ontario: Ontario Soya-Bean Growers' Marketing Board. 12 p. Feb. 24 x 11 cm. [Eng]

• **Summary:** Contents: Comments, by Peter H. Epp, Chairman. Japan: Home Shokuhin Tofu Manufacturing Co., Komatsuya Shokuhin (natto mfg. plant), Nihon Miso (manufacturing plant), Japan Miso Assoc., Japan Tofu Assoc., Federation of Japan Natto Manufacturers' Cooperative Society, Wako Shokuryo Co. (makes natto; Jacob Hartz in Arkansas supplies them with "936X" variety small-sized natto soybeans; Wako also supplies Nihon Miso Mfg. Plant), X-Can Far East Ltd. Korea: Seoul meeting at embassy, Chung's Food Ltd., Agriculture and Fisheries Development Corp., Korean Soybean Curd Cooperative Manufacturing Assoc. Singapore: Okura & Company Ltd., Eng Huat Pte. Ltd., Intraco. Malaysia: Yeo Hiap Seng Co. Ltd. (the largest manufacturer of soymilk in Malaysia and Singapore). Follow-up. Conclusion.

Each of the following members of the mission wrote a chapter in this book, discussing each visit mentioned in the contents: Peter H. Epp, Bernard Calhoun, Otis McGregor, Richard I. Buzzell, M.D. Pennell (General Manager, R&D, H.J. Heinz Company of Canada Ltd.), Michael Loh (Export Development Specialist, Ontario Ministry of Agriculture and Food).

Details are given on the soybean characteristics desired for each type of soyfood product, especially in the chapter by Dr. Buzzell. Popular soybean varieties include: For Miso: Enlei [Enrei], Fujimejiro, Harcor. For natto: Jizuka, Suzuhime, Nattawa. For tofu: Amsoy, Coles, Harcor.

Letter from Fred Brandenburg of OSGMB. 1994. Nov. 9. "Regarding export promotion before 1982, any activities would have been part of larger government sponsored trade missions. For example, in 1979 Otis McGregor participated in a mission to Asia which was co-ordinated by Michael Loh. It included a number of marketing boards and associations from Canada."

Note: This is the earliest document seen (Dec. 1998) that (apparently) mentions the soybean variety Enrei. Address: P.O. Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

2457. Funcación Tao-Fu. 1982. Proyecto piloto para la produccion e introduccion de los productos derivados de la soya en Quito, Ecuador [Pilot project for the production and introduction of soyfoods to Quito, Ecuador]. Quito, Ecuador. iii + 21 p. March 1. Unpublished manuscript. [Spa]

• **Summary:** Proposal submitted by Richard Jennings and Ismael Janisch. In Feb. 1980 la Fundacion Tao-Fu began its work to introduce soy protein foods to Ecuador. To date, they have developed tofu (seasoned and natural), tempeh, soy yogurt, and soymilk. Address: Casilla 252-A, Quito, Ecuador.

2458. Belleme, John. 1982. Re: New developments at American Miso Co. Letter to William Shurtleff at Soyfoods Center, March 3. 2 p. Typed, without signature or letterhead.

• **Summary:** "We got a really good response from our light miso. People reported using it for dressings, dips and even desserts. We have decided to market our white miso through our wholesale company in bulk only during the winter. We also plan to market a mellow barley and a mellow rice miso, both of which should have a good shelflife.

"Mr. Onozaki just visited our factory for two weeks. He said our koji is some of the best he has ever seen. I was really worried about our koji and his comments settled my anxious mind. He also said our long-term miso is developing fine.

"The ownership of our factory is finally settled. The following will not be participating: Erewhon, Michio [Kushi], Mitoku, Johsen, Oak Feed and Sandy Pukel. This leaves only Barry Evans and myself, we are now the sole owners."

"I am sending you 10 pounds of Mr. Onozaki's rice miso. It is hopefully just like the miso we are making. We are getting a really good response from the East Coast macros; they love Mr. Onozaki's miso. Last year we imported 20,000 pounds.

"Barry and I are starting a wholesale company in Asheville. It's tentatively called Great Eastern Sun Trading Company. We are specializing in hard-to-get macrobiotic foods--will send you a catalog in a few weeks."

Note 1. This is the earliest document seen (March 2006) that mentions Great Eastern Sun, a macrobiotic trading company in North Carolina.

Note 2. On 31 May 1982 John wrote a 2-page typed letter to Dr. Hiroshi Ito at the National Food Research Institute asking for help in making a white miso. Address: Route 3, Box 541, Rutherfordton, North Carolina. Phone: (704) 287-2940.

2459. Root, Evan. 1982. Re: History of macrobiotics. Letter to William Shurtleff at Soyfoods Center, March 4--in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** "Here is my reply to your questionnaire." Discusses Sanae, Erewhon, Paul Hawken, Michio Kushi. The original Erewhon store started in April 1966 at 303 Newbury St. Prior to that, some food sales were done from the Kushi's home on a very small scale.

In Oct. 1967, Paul Hawken took over the management of Evan Root moved up the street to commence renovations for Sanae Restaurant. Paul was the main force in expanding and developing Erewhon in the early days. Prior to him it was mainly a cracker barrel style store where people came in to talk philosophy and swap recipes, whether or not they bought anything.

Sanae opened its doors to the public in Feb. 1968.

In the early days of Erewhon one of the suppliers not to be overlooked is Japan Food Corporation. From them we bought seaweeds, fish flakes, gourd strips, and most importantly from your point of view, Hatcho miso. Chico-san and Infinity Foods were in operation before Erewhon and we got most of the Japanese items from them except for a couple of kegs of miso that Junsei Yamaguchi put up in the Kushi's basement.

I do not know this for a fact, but I have speculated that the early tamari that was available when I first got into macrobiotics in 1964 may have been, in fact, real tamari as I distinctly remember that it was thicker and richer than what became available a little later. Address: Relationships, 39 Harvard St., Brookline, Massachusetts 02146. Phone: 617-739-3300.

2460. Aihara, Herman. 1982. Re: Introducing miso and soy sauce to America. Letter to William Shurtleff at Soyfoods Center, March 15--in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** "Miso and 'tamari' were imported in America by Ginza, Inc., managed by H. Aihara, in 1961 in New York City. The brand name was not remembered.

"After 16 families moved to Chico and started Chico-San, Chico-San imported Marushin soy sauce and miso. Ohsawa arranged the manufacture and export in Japan. Ohsawa always supervised and examined the products.

"Ohsawa told us to call natural soy sauce 'tamari'. The reason is, he named natural soy sauce 'Ohsawa Soy Sauce'

in Europe and gave its sole agency to someone else. This guy started to import bad soy sauce and called it 'Ohsawa Soy Sauce.' Then, Ohsawa began importing a good one by himself, but could not use the name 'Ohsawa Soy Sauce.' Therefore, he called soy sauce 'tamari.' (A mistake, I think.) Chico-San has been importing the best quality of miso and soy sauce (named 'tamari') even though the cost was higher than other, lower grades." Address: President GOMF, P.O. Box 426, Oroville, California 95965.

2461. Rothman, Sandy. 1982. Re: History of work with macrobiotics and soyfoods in America. Focus on Herman and Cornelia Aihara, and Chico-San. Letter to William Shurtleff at Soyfoods Center, March 17. 5 p.

• **Summary:** Also discusses Alcan Yamaguchi, Zen Teahouse, Paradox, Michio Kushi, Musubi, Irma Paule. Address: GOMF, Oroville, California.

2462. Kushi, Michio; Kushi, Aveline. 1982. Re: History of work with macrobiotics and soyfoods in Boston. Letter to William Shurtleff at Soyfoods Center, March 29. 2 p. Typed, without signature on letterhead.

Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

2463. *Better Homes and Gardens*. 1982. Cooking with miso. 60:Z5. March. *

• **Summary:** Includes recipes.

2464. **Product Name:** [Barley Miso].

Manufacturer's Name: Lima-Andiran.

Manufacturer's Address: Moulin d'Andiran, 47170 Mezin, France. Phone: 58-651-002.

Date of Introduction: 1982. March.

New Product–Documentation: Letter from Pierre Gevaert. 1981. Nov. 19. Letter from Sjon Welters. 1982. April 16. "Important news is that Lima started to market their miso. It is made in their own plant and farm in the southwest of France." Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 233. This miso plant, which started in 1981, was powered by hydropower. *Soya Bluebook*. 1986. p. 111. "Lima France. Affiliate of Lima Belgium. Le Moulin d'Andiran, 47170 Mezin, France. Mr. Stevens, Sales Mgr."

Talk with Don DeBona of American Miso Co. 1997. March 25. Lima-Andiran was acquired in early 1990 by Pierre Gevaert's son (Daniel) and his wife (Valérie), and renamed Danival. The location of their factory in Mézin, France, has not changed.

2465. Quebral, Florenco C. 1982. [Soybeans in] The Philippines. *INTSOY Series* No. 22. p. 166-71. J.B. Sinclair and J.A. Jackobs, eds. Soybean Seed Quality and Stand Establishment (College of Agric., Univ. of Illinois at Urbana-Champaign).

• **Summary:** Contents: Introduction. Cultivar improvement. Planting. Inoculation and fertilization. Pests and diseases. Intensive cropping. Utilization. Costs and returns. Marketing. Marketing program. Areas that need attention. Cooperating agencies.

"The domestic supply of soybeans has never been sufficient to meet national demands for food, feed, and industrial uses. Total domestic soybean production in 1978 was reported to be 7,099 metric tons. Approximately 176,000 metric tons of soybeans, costing \$30.8 million, were imported.

"To boost domestic production, the government has launched projects like Masaganang Maisan, the white corn and feed grains program, and the National Soybean Development Program...

"Researchers at the University of the Philippines at Los Baños have produced bottled soymilk (Philsoy) using the hot water grind technique... Fermented soybean products, such as soy sauce, soy cheese (tokwa [tofu]), soy paste (miso), soy curds (tahuri [tofu in brine]), and canned salted beans (tausi) are the most common soybean products used as ingredients in traditional Filipino dishes. A cheese-like product served with sugar syrup (taho) is sold by ambulant peddlers in urban centers." Address: Prof. of Plant Pathology, College of Agriculture, the Univ. of the Philippines at Los Baños.

2466. Shurtleff, William; Aoyagi, Akiko. 1982. History of the soyfoods movement in North America. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 50 p. March. Unpublished typescript.

• **Summary:** A comprehensive history of the subject. Contents: New image of soyfoods and causes of interest: Good health, nutrition and fatness, weight loss diets, low-cost protein, meatless and vegetarian diets, world hunger, appropriate technology and right livelihood, voluntary simplicity, ecology and conservation, interest in East Asian cultures, spiritual practices, and cuisines.

Allied movements: Macrobiotics, natural foods, Rodale Press, vegetarianism.

Characteristics of the soyfoods movement: Major foods and types of products, comparison of soy protein industry (high tech) and soyfoods industry (low tech), appropriate technology, relevance to the Third World, conclusion.

The Farm in Tennessee. *The Book of Tofu* and Soyfoods Center. Early soyfoods manufacturers. Soyfoods delis and restaurants. Second-generation soyfoods manufacturers and distributors (e.g. Swan Foods in Florida). Tofu kits and equipment. Soyfoods terminology. Founding of the Soycrafters/Soyfoods Association of North America: Richard Leviton. Growth of the Soyfoods Association: First conference, Soyfoods magazine, subsequent conferences, SANA problems, The New Soyfoods Association–Gary Barat and Michael Austin of New York City.

Soyfoods books and booklets. Media coverage. Growth of the soyfoods industry, including the Soycrafters Apprenticeship Program. Soyfoods Marketer/Distributors: Yellow Bean Trading Co., Garden of Eatin', Jolly Licks. Soyfoods in foodservice institutions. Influence and activities abroad. The future.

Note: This is the earliest document seen (Oct. 2008) that uses the term "Second-generation" in connection with soyfoods to refer to a soyfood product which uses a basic soyfood as its major ingredient. Thus, Tofu Cheesecake, Tempeh Lasagne, and Instant Miso Soup are all commercial "second-generation soyfood products." If made at home for home use, they would be "second-generation soyfoods." For some products, the line between basic and second-generation soyfood products is blurred, since some second-generation products that have as long history have come to be thought of as basic. For example: Deep-fried tofu burgers (*ganmodoki*), teriyaki sauce, etc. Address: Lafayette, California. Phone: 415-283-2991.

2467. Soy Plant Co-op Inc. (The). 1982. Price list effective 3/22/82 [22 March 1982]. Ann Arbor, Michigan. 1 p. 28 cm.
 • **Summary:** This typewritten sheet contains three columns: Supplier, product, and price. The Soy Plant is supplier of (packaged or in bulk): Tofu (1 lb tub), plain soy milk and flavored soy milk (quarts), tempeh (8 oz), soysage (8 oz), miso garlic dressing (16 oz), Soyanaise (soy mayo, 16 oz), carob tofu pies, missing egg salad, tofu spinach quiche, gomaseao [gomashio]. Other suppliers are Micro Farms (alfalfa- or mung bean sprouts), Westbrae Foods (miso-3 types), The Grocery (The Tofu Cookbooklet), and Learning Tree (tofu kit, \$13.50 each).

New products available soon: Tempeh salad. Tofu tahini spread. Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: (313) 663-8638.

2468. *SoyaScan Notes*. 1982. Chronology of Great Eastern Sun Trading Company in North Carolina. 26 Jan. 1994. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1982 March—The company is founded by Barry Evans. Martin Roth is the first manager. The original purpose is to be a distributor for the miso made by American Miso Company. But the company soon decides to import Japanese macrobiotic products from Mitoku (the first order was placed in Jan. 1982) and later to become a manufacturer.

1984 July—Great Eastern Sun starts to import Ah Soy (soymilk, in chocolate, vanilla, and original flavors). Made in Japan by San-iku Foods, and sold in a stand-up foil retort pouch, it soon becomes very popular. Don DeBona is the first product manager. Address: 92 Macintosh Rd., Asheville, North Carolina 28806.

2469. Welters, Sjon. 1982. Re: Recent developments with soyfoods in Europe, and ties with macrobiotics. Letter to William Shurtleff at Soyfoods Center, April 16. 6 p.

• **Summary:** This letter, whose letterhead reads "Manna Natuurlijke Levensmiddelen," contains names and addresses of many new soyfoods companies, many of them started by people interested in macrobiotics. Names and addresses of the following companies are given: Tofu Denmark (in Valby, run by Per Fruergaard, a macrobiotic), Bernard Storup, Ab & Paulien Schaft (Dutch, setting up a small shop in Baillestavy, France, to make miso, shoyu, natto, and koji), Traditions du Grain (Jean Luc Alonso is setting up a macrobiotic tempeh shop in Ivry France; they will start this summer), Paul Jones (Tofu shop in London), Saskia de Jong (may make miso in Ireland), de Brandnetel (tofu shop in Antwerp, Belgium), Jonathan (makes tofu, ganmo, seitan, mochi in Ekeren, Belgium. Run by J. v. Ponsele), Seven Arrows (Leuven, Netherlands; making tofu), Lima Foods (now sell miso made at their plant and farm in France), Witte Wonder (Den Haag, Netherlands), De Morgenstond (Bakkeveen, Netherlands), Jakso (Heerewarden, Netherlands. Run by Peter Dekker. The first and only shop making tempeh from organic soybeans), Firma Lembekker (Amsterdam), Unimave (Lisbon, Portugal), Jose Parracho (Setubal, Portugal), Swame [sic, Swami] Anand Svadesha (Furth im Wald, West Germany), Bittersuess (Cologne, West Germany. Attn: Thomas Kasas/Karas). Three distributors of soyfoods and natural foods in Germany are YinYang (Berlin), Rapunzel (Heimraadshofe), and Mutter Erde (Werbelen). In Finland: Luonnonruokakauppa AUMA (Helsinki). In Switzerland: Verena Krieger of Sojalade (Engelberg, tofu shop), Hans Rudolph Opplinger (Cham, tofu shop), Marty Halsley (Nyon, tofu & tempeh), Restaurant Sesam (Bern). P. Ton van Oers is a Dutch priest who works in Kananga, Zaire. The natives have grown soya for 10 years and he is thinking of making tofu and soymilk from them.

"In Great Britain the East West Centre is very active in promoting soyfoods. As a part of the Kushi Institute program they have home-scale processing, in which tofu, tempeh, and miso-making are taught by Jon Sandler [Sandifer?]. He is the tempehmaker of the EWC too at Community Health Foundation, 188 Old St., London EC1. In the Netherlands, a great deal of soyfoods promotion is done by the East West Center and Manna. As you probably know, Manna was the first to introduce miso, tamari, shoyu, tempeh, tofu and koji to the larger public and we are still the main promoters of soyfoods as part of a more natural, vegetarian, and economic diet. Manna has been followed by a lot of other distributors of natural and health foods. We have two competitors in the tofu business: Witte Wonder and De Morgenstond.

"At the moment I'm the only teacher giving lectures on homescale miso-, tofu-, tempeh-, shoyu-, tamari-, natto-,

and koji-making in the Netherlands. Mainly at the East West Centre and sometimes at different places in the country. People are starting to get interested.”

Note: This is the earliest document seen (Jan. 2003) concerning the work of Swami Anand Svadesha of West Germany, and of Thomas Karas of Bittersuess (Cologne, West Germany). Address: Stichting Natuurvoeding Amsterdam, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands. Phone: 020-323977.

2470. Hawken, Paul. 1982. History of Erewhon and macrobiotics in America. Part I (Interview). Conducted by William Shurtleff of Soyfoods Center, April 18. 3 p. and 5 p. transcripts.

• **Summary:** Hawken played an important and very innovative role in establishing the natural foods industry in America and in building Erewhon into a major distributor of macrobiotic and natural foods.

Chico-San imported foods from Tokyo CI (Centre Ignoramus); Muso didn't exist at that time.

The Kushi's never made tofu or nigari tofu. They were not big tofu eaters, largely because tofu was considered too yin—ridiculous. Then people started craving it, and buying it from Chinatown. But the tofu they bought was not made with nigari.

By the mid-1960s there were roughly 300 to 2,000 people actively involved with macrobiotics in the USA—including Michio Kushi's students, Herman Aihara's students, and those in New York and Boston.

Beth Ann Simon had started using heroin again before she died [on her No. 7 macrobiotic diet]. The family covered it up, blaming Japanese and tamari. But she was not the only one who died. George and Lima Ohsawa's only child died within a year of being born in Tokyo (according to Lima) from excess salt.

Erewhon was started by Aveline Kushi, not by Evan Root. Paul does not know who gave Erewhon its name [it was Aveline Kushi]; of course, it is “Nowhere” scrambled, as in the title of the famous 1872 novel by Samuel Butler about a utopian island divested of machinery. Originally various people would drive to Pennsylvania to see the Mennonites and Walnut Acres. It was a buying club for students who lived in the Kushi's house in Cambridge, Massachusetts. Foods such as wheat, [whole-wheat] flour, oatmeal. Nothing imported from Japan. It was started with \$500 cash in the basement of the Kushi's house. It backed into being a store since it was cheaper to buy larger quantities. The food was divided up into little bags and a price was written on each. It was sort of a way of buying food for people at the Kushi's house, like Aveline doing her shopping for 10-12 people in the first big macrobiotic study house. It began to outgrow the house and outside students wanted good food. It was never seen as a business or a

money-making venture. Good food was so difficult to get in those days.

Another source of good food was Infinity Foods in New York City, started and owned by Howard Rower; they had a warehouse and were wholesaling by mid-1965. Soon Howard was importing miso and tamari (shoyu / soy sauce) from Tokyo CI. “This ‘guaranteed’ its quasi-medicinal effects. Otherwise it didn't work. It was actually the best food—really.” Then Howard started to import directly from the manufacturers of miso and shoyu in Japan: Hacho miso and Marushima shoyu (whose owner knew Ohsawa intimately). Paul visited Marushima in 1969. Paul thinks Marushima bought their shoyu from other shoyu factories on the island, or maybe they made it in the early days. Paul thinks there is a big difference in taste between shoyu made from whole soybeans and that made from defatted soybean meal (*dashi daizu*). Paul was suspicious of Marushima shoyu in 1970; he demanded that Muso Shokuhin change to Johsen [Sendai Miso Shoyu] as their source; Johsen has a long history and the owner was also one of Ohsawa's cronies.

Paul left Erewhon in 1973. He went to Japan three times. The first trip was in March 1969, when he set up Mitoku in the natural foods business; before that they were an importer or hockey equipment. Muso was called Osaka CI; neither of those two companies were exporters before that time.

In the early days of the below-ground store in Boston, more of the foods came from Lima Foods in Belgium than from Japan. The miso and shoyu in those days came from Infinity Foods in New York City. They did not carry tofu because there was no refrigeration. None of the food was sent by the Kushis' friends.

In the early days of that store, Evan Root just tended the store, which had sales of about \$20–\$30 a day. The store was Aveline's idea. Evan was Aveline's lover—and not the only one. The store was originally called simply “Erewhon.” Paul later added the words “Trading Co.” when he incorporated it in the late fall of 1967. Paul and Aveline each owned 50% of the corporation. During its first year as a corporation, sales went from \$1,000/month to \$9,000/month—and not because it was macrobiotic. Erewhon was the first natural food store (as opposed to health food store) in America. It sold no pills. Many of the customers were not macros; they wanted whole foods. In mid-1968, as Paul was ready to leave Erewhon, someone came into the store and asked: “How do you know the oil is cold-pressed? And how do you know the grains are organically grown? He couldn't answer. So he wrote letters and found out that most were not what they claimed to be. Then Paul decided to use Erewhon to create a true food supply. He went directly to farmers. He didn't trust anyone. The idea was to know where the food came from and to have no middlemen between Erewhon and the producers.

In Oct. 1968 the little Erewhon retail store moved up and across the street to a new location at 342 Newbury Street. At that time they began to sell wholesale and to import from Japan, by correspondence with Mr. Kazama. The first import order from Japan, dated Aug. 1968, was *aka miso* (red rice miso—superb) from Sendai Miso Shoyu and Marushima shoyu. Soon customers who used to drive 400 miles to buy staples from Erewhon started to open their own stores. The natural foods business mushroomed. Erewhon started selling tofu in 1968 at 342 Newbury; they got it from a Chinese tofu maker in Boston. Nigari came in much later, after 1973. Neither Evan nor anyone else wanted to work at or run Erewhon; they all wanted to teach macrobiotics.

Paul was selling whole dry soybeans at that, but mostly non-macros were eating those soybeans. Erewhon's first supplier, in mid-1968, was a wheat grower in North Dakota. Carl Garrich in Lone Pine, Arkansas, was much later. Paul got his first soybeans from a guy in a boxcar who was an insurance salesman, but who worked one day a week selling soybeans and wheat. Paul also bought soybeans from Deaf Smith County, Texas. Paul knew Frank Ford of Deaf Smith County in the early days. Paul was vice president of Arrowhead Mills before Roger Hillyard even worked for them. He ground his flour in a boxcar.

Paul wrote a long and detailed article about the early history of Erewhon titled "Erewhon: A biography. The view within," published in the Aug. 1973 issue of *East West Journal*. He was upset at the time. It was critical of the Kushis, and Paul explained why he was about to leave Erewhon. Robert Hargrove, editor of the journal, ran it anyway. Since then, Erewhon's history has been sanitized. Continued. Address: California.

2471. Hawken, Paul. 1982. History of Erewhon and macrobiotics in America. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, April 18. 3 p.

• **Summary:** Continued: Erewhon grew rapidly. One year after moving to the new location they had sales of \$35,000 to \$40,000 a month, both wholesale and retail. Paul thinks Erewhon had a retail catalog from 1967 to 1970. Paul was president (until 1973, when he left) and half owner. Then he left for Japan. Before leaving he made a great error, by signing over his half of the stock to the corporation in case something happened to him. It was put in escrow, but he could never get it back. When Paul left for Japan, Roger Hillyard, Bill Tara, Bruce Macdonald, and Jim Docker were all working for Erewhon. He had hired many or all of them, and everything was in place for takeoff. Erewhon did not get its big brick warehouse until July 1970.

When Paul first went to Japan in the spring of 1969, He traveled with Mr. Kazama of Mitoku, visited many factories, and set up sources. He tried to find out where

Tokyo CI and Osaka CI were getting their foods. He was in Japan for about 9 months, from March to December.

When he returned, he opened Erewhon in Los Angeles; Roger Hillyard was still in charge of Erewhon in Boston. Then he started Organic Merchants with Fred Rohe, and started writing "The Sugar Story," "The Oil Story," and other leaflets. His main interest was now in providing accurate information about foods. In mid-1970 Erewhon stopped its mail order catalog and business when it moved into the brick warehouse.

Originally Erewhon Los Angeles and Erewhon Boston were one; about 4 years later they split in two.

When Paul left in 1973, Erewhon was contracting directly with something like 57 farms in 35 states producing organically grown foods, including lots of produce. This program began in 1968, included the Lundberg Brothers (who grew brown rice organically in Northern California), and led to the wholesale business. Paul and Erewhon helped many other natural food companies to get started.

The Natural Food Distributors Association [Organic Merchants] was not successful because it was Paul's idea and he left. Lack of money and fundraising were secondary. His goal was to see cooperation in the industry.

In conclusion Paul says: "Read the article [in *East West Journal*] and then we should talk again. You'll have a lot more questions." He asks Shurtleff to send him a photocopy of the article as well as the final draft of the chapter on the history of macrobiotics (including Erewhon); he'll be glad to recheck it. Address: California.

2472. Okada, Teizo. 1982. Re: History of Muso Co. Ltd. (Muso Shokuhin) in Japan. Letter to William Shurtleff at Soyfoods Center, April 22. 2 p. [Eng]

• **Summary:** Muso was started in 1959 by Mr. Shuzo Okada, president of the World Macrobiotic Association in Osaka. George Ohsawa was not involved in establishing the company, but he was very much involved in the company's direction as an Associate. Muso started exporting soyfoods to the West in 1963. The first foods were shipped to Lima N.V. in Belgium. The first soyfoods were shipped to America in 1966, when mugi (barley) miso was shipped to Chico-San Inc. in Chico, California.

Note: Compare this history with that given by Ronald Kotsch. 1984. "Made in Japan—naturally: Natural foods from the Muso Company are popular worldwide." *East West Journal*. Dec. p. 14-21. Kotsch states that Muso was founded in 1966 and began to export macrobiotic foods from Japan to the West in 1969. Address: Export Dep., Otedori 2-5-1, Higashi-ku, Osaka, Japan. Phone: 06-945-0511.

2473. Dreyer, Lawrence. 1982. Re: International fair and symposium on soya products in Salzburg. Letter to William

Shurtleff at Soyfoods Center, April 27. 2 p. Typed, with signature. [Eng]

• **Summary:** “The Way of Nature (*Weg der Natur*), a foundation, was established in Austria with the express purpose of disseminating information about macrobiotics, food, and their relationship to our health. Each of the founding members have had at least 2 months training at a temple in Japan.” The foundation plans to hold an international fair named Bio Life 2000 in Salzburg from 17-20 Nov. 1982. “The foundation has, for the past two years been linked to a Natural Food Shop and has been, for this period, producing tofu and miso. This shop will be represented at the Fair and will be exhibiting and selling macrobiotic foods, snacks, and drinks. To run concurrently with the Fair, the Foundation is also planning a symposium on Soya products, Miso, Tofu, Tempeh, etc.

“The program will include lectures and discussions on planting and growing soya beans, making soya products, the suitability and advantages of soya products in the diet of Mankind with particular emphasis on the peoples of the West, and the substitution of soya products for animal products as a source of protein. There will also be demonstrations on cooking natural foods and the production of tofu and miso.

“The symposium will be conducted in both English and German and possibly also in French. The media, press, radio and TV have all expressed a keen interest in this fair, so a wide coverage is assured. We would be delighted if you, as the initiator of the use of tofu in the West, would be prepared to participate in this fair.”

Note: A handwritten letter from Lawrence Dreyer (1983 Feb. 15) states that this fair was never held. His company is still producing tofu with equipment purchased in Japan a couple of years ago. Address: Director.

2474. Endo, Y. 1982. [Re: Yamashin shiro shoyu (clear shoyu)]. Letter to William Shurtleff at Soyfoods Center, April 30—in reply to inquiry. 2 p. [Jap; eng+]

• **Summary:** Shiro shōyu was invented by the people of Mikawa-koku, Shinkawa-machi (presently Aichi-ken / Aichi prefecture, Hekinan-shi), after getting a hint from the seasoning liquid (*uwajiru*) that rises from Kinzanji-miso. The latter is a type of finger lickin’ miso (*namémiso*) which was tasty, light colored and was made about 180 years ago—at the end of the Edo / Tokugawa period, Kansei-Bunka. That are is well known for making tamari (which has a dark color and strong flavor) and red miso (*akamiso*) from the old days. It was probably from necessity that the local people worked to develop a seasoning that brings out the flavor of each food.

Therefore shiro shōyu is a very local product. It is made mainly in Aichi prefecture. At present, the largest manufacturer is Yamashin Shoyu K.K. [the writer’s company].

Shiro shōyu is different from regular Japanese [*koikuchi*] shōyu in that it has less fragrance and a lighter color. Therefore it is used in foods that require a subtle flavor, such as *nimono*, *chawanmushi*, *suimono* (clear soups), noodle dishes, etc. In early times, it was considered to be the best seasoning for enhancing the flavor in the food itself, and was used only in high class restaurants, noodle shops, etc. More recently, it has become popular among regular householders. For Japanese love subtle tastes and the natural colors of foods; this shōyu doesn’t mess up either of these. In Western-style cooking it is good in soups, stews, cabbage rolls, gratin, etc. In Chinese cooking try it in ramen noodles, sweet and sour pork (*subuta*), *happosai*, stir-fried vegetables, etc. In Japanese cooking it is tasty in clear soups, soba (buckwheat noodles), udon noodle broth (*tsuyu*), vegetable cooking, omelets (*tamago yaki*), and *zoni* (meatless soup with mochi and vegetables).

“Although you asked for early documents, we are not aware of any. Nor do we know how shiro shōyu was used in the olden days. In our company we have no old records; they were destroyed by fire. We are very sorry that we cannot help you on that.

“We have heard one interesting story. At the end of the Edo / Tokugawa period, in 1857 (Ansei 4), Townsend Harris, the United States’ ambassador, brought a letter from president James Buchanan [president 1857-1861] and visited Edo Castle to meet with the 13th shogun, Tokugawa Iesada (ruled 1853-1858). In the Willow Room (*yanagi no ma*) of Edo Castle they had a meal and shiro shōyu made by our company was used, under the name of Mikawa Shiro Tamari.

“Instead of answering your individual questions, we would like to give you this overview. Please excuse us. If you need further details, please let us know.” Address: Yamashin Shoyu K.K., 3-36 Nishiyama-cho, Hekinan-shi, Aichi-ken 447, Japan.

2475. Chico-San, Inc. 1982. Choice imported natural foods (Ad). *Bestways*. April. p. 65.

• **Summary:** A half-page black-and-white photo shows Lima Ohsawa, wearing a kimono and carrying a tray of Japanese foods, including Lima Soy Sauce. “Top quality natural foods and condiments are imported from Japan under the supervision of Mrs. Lima Ohsawa, Chico-San’s specialist in macrobiotic foods.”

Chico-San imports from Japan include Lima Soy Sauce, soybean puree (miso), mineral-rich mercury-tested seaweeds, azuki beans, black soybeans, barley koji, kuzu, nigari, and tekka. “Soon, a companion for Lima Soy Sauce—Lima Tamari—Wheat Free—Whole soy beans—Rice & zestful—Naturally brewed in wooden casks for about 2 years.” Address: Chico, California 95926.

2476. *East West Journal*. 1982. Bookshelf (Ad). April. p. 70-72.

• **Summary:** This mail order catalog includes four types of books; the first two are related to macrobiotics. 1. Getting started. 2. Cooking. 3. Exercise. 4. General topics: Incl. *The Book of Tofu* and *The Book of Miso* by Shurtleff & Aoyagi.

2477. Jacobs, Leonard. 1982. The Chico-San story: Popularizing rice cakes in America. *East West Journal*. April. p. 58-61.

• **Summary:** A history of Chico-San, including Bob Kennedy. In October 1961 Kennedy and 31 other pioneers left New York for California. Chico-San was founded that year by Kennedy and Herman Aihara. They soon began importing miso and shoyu from Japan. In 1968 Kennedy began negotiations for the Lundberg Brothers of Wehah Farm, Richvale, California, to grow brown rice for him organically. In 1974 Kennedy brought Junsei Yamazaki into the company to begin making miso and tamari soy sauce according to Chico-San's standards.

2478. Leviton, Richard. 1982. A new soy sauce from an old culture. *East West Journal*. April. p. 42-44.

• **Summary:** Hoang Van Chi, a native of Vietnam, makes Bodhi Sauce or tuong cu-da in Bowie, Maryland. Photos show: (1) Phan and Hoang Van Chi with bottles of both the sauces they make. (2) Hoang checking glutinous rice that has been steaming overnight. (3) Phan and Hoang involved in four steps in the preparation of sweet rice koji. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

2479. Shieh, Y.-S. Carol; Beuchat, L.R. 1982. Microbial changes in fermented peanut and soybean pastes containing kojis prepared using *Aspergillus oryzae* and *Rhizopus oligosporus*. *J. of Food Science* 47(2):518-22. March/April. [14 ref]

Address: Dep. of Food Science, Univ. of Georgia, Athens, GA 30602.

2480. Evans, Barry. 1982. Amendment to Articles of Incorporation of Oak Feed Miso, Inc. Dade County, Florida. 3 p. May 5. Unpublished typescript.

• **Summary:** This amendment officially changes the name of the corporation to American Miso Company from Oak Feed Miso, Inc. The change was approved by the stockholders and board of directors at the annual meeting of the shareholders held on 19 April 1982 at the North Carolina office of the company in Rutherfordton, North Carolina. Signed on 5 May 1982 by Barry Evans, President, and Janet Belleme, Secretary.

A separate one-page document on State of Florida letterhead shows that this Amendment was filed with the State of Florida Department of State on 19 May 1982. The

charter number of this corporation is 613063. Address: Dade County, Florida.

2481. Deakin, Doris. 1982. Hand-me-down recipes that taste of tradition. *Washington Post*. May 26. p. E1, E8, E10.

• **Summary:** In this era of fast foods, we have lost the tradition of mothers handing down to daughters their favorite recipes—often handwritten and often together with stories about the family. These recipes and stories are a special kind of nourishment.

Yet many other cultures have their traditional dishes and story accompanies many of them. In China, one such dish is Ma-Po Tofu. Victoria Chen, formerly of Shanghai and Taiwan, who teaches Chinese cooking in Montgomery County, tells her students this story. “Ma” means smallpox scar and “Po” means woman. “Tofu” is bean curd. After this woman contracted smallpox, her face was scarred. Then her brother died, leaving a widow and two children. The family land was so small that they could not earn a living from it. To help her brother's family, the scarred woman tried to find a husband, but she could not. So the sisters-in-law developed this recipe, and sold it to passers by. In this way all were able to survive.

The recipe calls for “1 pound bean curd... 1 tablespoon black fermented beans, chopped... 2 tablespoons soy sauce... 1 tablespoon hot doe-ban paste [douban-jiang] for hot bean sauce.” Cut the “tofu” into 1 by 1 by ½-inch pieces. Saute the “black beans” for a few minutes but do not crush.

2482. Pautz, Jane Abe Cadwell. 1982. Re: Directory of soyfoods manufacturers in Sao Paulo, Brazil, and comments on the availability of these foods. Letter to William Shurtleff at Soyfoods Center, May 29. 3 p. Typed.

• **Summary:** List all known companies in Sao Paulo that may soyfood products A separate listing is given for each product with the full company name and address. Address: Rua Spinagés 1971 Apto. 61, 01258 Sao Paulo, Brazil.

2483. Krieger, Verena. 1982. Die tausend Talente von Tofu [The thousand talents of tofu]. *Natuerlich* 2(5):69-73. May. [Ger]

• **Summary:** An excellent overview, with numerous color photos of recipes, products, and plants. “Tofu found its way to Europe not over the steppes of Asia but through the kitchens of North America, starting with *The Book of Tofu* by Shurtleff and Aoyagi.”

Contents: What is tofu? Why tofu? Soya—king of the beans (Switzerland imports 100,000 tonnes of soybeans each year to feed to animals). Tofu and its brothers. Is soy an exotic plant? The most important traditional soyfoods of East Asia: Tofu, miso, soymilk, tamari, shoyu and soy sauce (*sojasauce*), tempeh, soy sprouts (*sojakeime*).

2484. Leviton, Richard. 1982. Discovering Japanese soyfoods. *Vegetarian Times* No. 57. May. p. 60-62, 65. [1 ref]

• **Summary:** Recently Richard Leviton traveled to Japan with a group of Americans to get a firsthand look at the Japanese soyfoods industry. He discusses tofu (the Japanese consume 10 million cakes a day) and tofu manufacturers (large and small), Takatsuka Marugo (a large tofu maker that churns out 100,000 lb/day of tofu), Yuba Han (a traditional yuba shop in Kyoto), Asahimatsu Kori-dofu Co., natto, Hamanatto, soymilk, cooked soybeans with wakame, soy sprouts, kinako powder, packaged green soybeans in the pods, miso (fresh and freeze-dried), Linda Barber (an American home economist who is teaching at Kobe Girl's College in Nishinomiya, and also teaching American-style tofu recipes to Japanese housewives via television and the print media), and Sasa-no-Yuki, a 279-year old restaurant that specializes in tofu cookery. Photos show dishes served at Sasa-no-Yuki, a man hanging up fresh yuba at Yuba Han, and the group enjoying a Japanese meal. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2485. Leviton, Richard. 1982. Tour: April 21-28, 1982. Itinerary and notes from trip to study soyfoods on the East Coast and in the Midwest. Colrain, Massachusetts. 21 p. Unpublished typescript. 28 cm.

• **Summary:** Visited: Nature's Grace (Honesdale, Pennsylvania), Real Foods (Allentown, PA), Cricklewood Soyfoods (Mertztown, PA), Kingdom Foods (Washington, DC), Sam Sung Tofu Co. (Washington, DC), Edward & Sons Trading Co. (Saluda, North Carolina), American Miso Co. (Rutherfordton, NC; April 24), Blue Ridge Soyfoods (Fletcher, NC), The Farm (Summertown, Tennessee), Everybody's Restaurant (Nashville, TN), Soya Food Products (Cincinnati, Ohio), Rising Sun Soy Farms (Columbus, OH), Hip Pocket Tofu Deli (Columbus, OH), Legume (Verona, New Jersey), The Bridge (Middletown, Connecticut). Includes directions by car to each place. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2486. Mori, H. 1982. Shôwa 56 nendo ni okeru shôyu, miso no kenkyû gyôseki [Review of annual achievements in shoyu and miso research]. *Nippon Jozo Kyokai Zasshi (J. of the Society of Brewing, Japan)* 77(5):281-312. [743 ref. Jap]

• **Summary:** This important Japanese-language article, published each year in the May issue of this periodical, has two parts: (1) A review of the past year's major discoveries and developments in the fields of miso and soy sauce in Japan. (2) A bibliography related to those discoveries and developments. Address: Noda Sangyo Kagaku Kenkyusho.

2487. Shurtleff, William; Aoyagi, Akiko. 1982. Soyfoods directory and databook. 1st ed. Lafayette, California: Soyfoods Center. 21 p. May. 28 cm. [0 ref]. 2nd ed. published in June as Soyfoods Industry: Directory and Databook. 52 p. [24 ref]

• **Summary:** A detailed study of the rapidly emerging soyfoods industry and market. Contains original statistics compiled by the Soyfoods Center through interviews with companies. Contents of 2nd edition: 1. Terminology: The many types of soyfoods, traditional and modern. 2. Soyfoods industry directory: Names and addresses of over 850 soyfoods manufacturers in the Western world, plus major soymilk, miso, shoyu, and yuba manufacturers in East Asia. 3. Analysis of the soyfoods industry in the U.S. 4. Trends in U.S. and world soybean production. 5. Analysis of the tofu industry in the West. 6. Analysis of the tempeh industry in the West. 7. Analysis of the worldwide soymilk industry. 8. Analysis of the soy sauce/shoyu and miso industries worldwide. 9. Other: Analysis of the soy nuts industry in the U.S., North America's larger soyfoods delis, cafes & restaurants, soybean crushing industry; overview. 10. Soyfoods terminology and standards. 11. Names of soyfoods around the world: 40 products. 12. Key institutions working with soyfoods in the West.

Note: This is the first market study published by Shurtleff. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2488. Switzer, Larry. 1982. Spirulina: The whole food revolution. New York, NY: Bantam Books. vii + 135 p. Illust. by Akiko Aoyagi Shurtleff. No index. 18 cm. [78* ref]

• **Summary:** Contents: Acknowledgements. Why spirulina? 1. Introducing your venerable ancestors: The microalgae. 2. The history and rediscovery of spirulina. 3. Nutritional value. 4. A natural way to weight control: The diet of no-diet. 5. From vitamin food to vegetable protein breakthrough. 6. Survive and thrive: Food reserves and future microfarms. 7. Cooking with spirulina: Three favorites and thirty recipes. 8. State of the art: Algae farming around the world. 9. Marketing spirulina: Breaking the food barrier. 10. Spirulina and world protein politics. 11. The future: Farming deserts, oceans, and planets. Appendix A: The Proteus-Earthrise story. Appendix B: Product standards and quality controls.

Soy-related recipes include: Instant spirulina miso soup (p. 51). Aquamole dip or dressing (with tofu and tamari soy sauce, p. 53-54). Tofu dip (p. 54). Pro-miso canape (p. 56). Pro-miso soup (p. 57). Tofu eggless salad (p. 63). Miso salad dressing (p. 65). Pastalina (with tofu chunks, p. 68).

"Nature's oldest protein is now a perfect food supplement for diet, energy, and total health." Appendix A expands on the history of Proteus-Earthrise from the 1980 edition of this book. In 1979 Proteus launched the first U.S.

market test of spirulina, first in aquatic specialty feeds and then in the health foods market, under the Earthrise brand. Earthrise products have been marketed through Spruce Street Marketing of Boulder, Colorado, run by Bob Bellows and Terry Cohen, formerly of Celestial Seasonings.

Pages 126-27 note: "One possible criticism of single-cell proteins, such as microalgae and yeast, is their relatively high level of nucleic acid (RNA and DNA) compared to other common foods. The ingestion of large amounts of nucleic acid can raise the uric acid level in the body and increase the chances of kidney stones and gout. The Protein Advisory Group of the United Nations currently recommends that daily nucleic acid intake be limited to 2 grams. These levels are conservative. They allow significant intake with no ill effects. Two grams would be found in 45 grams of Spirulina, which provides 45% of the U.S. RDA adult protein intake. Spirulina will present no problem when taken at the 10 to 20 gram level daily, as suggested by Earthrise." Address: Founder and President, Proteus Corp.

2489. **Product Name:** [Shoyu, and Miso].

Manufacturer's Name: Tozan.

Manufacturer's Address: Bairro Carolos Gomes s/nº, Campinas (SP), Brazil. Phone: (011) 278-2495 or 5826.

Date of Introduction: 1982. May.

New Product–Documentation: Letter from Jane Cadwell Pautz. 1982. May 29. "The misso is called 'misso.'" Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

Letter from Luiz Simas and Bobbi Joels. 1986. Jan. 7. A large company named Tozan claims to devote part of its production to naturally-fermented miso and shoyu, with no sugar. The same address is given, plus a phone number.

2490. Re: First International Natural Food and Health Exhibition. 1982. Letter to William Shurtleff at Soyfoods Center, June 21. 1 p. Typed, on letterhead. [Eng]

• **Summary:** "We were introduced to you by Mr. Lawrence Dreyer from "Weg der Natur" in Austria who forwarded us all the mail received from you.

"At the moment we are organizing the "First International Natural Food and Health Exhibition, Conference, Seminar and Film Festival," which will be held in West Germany in autumn 1984, with the expected attendance of over 40,000 persons.

"We will appreciate very much if you join us to organize within our exhibit the "First International Soyaproducts Conference."

"For this matter we would urgently need your "Soyfood directory" and "Data Book" as well as the "Soyfood Mailing List."

"Also we are very interested to establish a Soya Food Center in Munich, Germany. Please send us information and application forms.

"Also we want a one year subscription to the "Soyfoods Magazine." When possible we want to buy a camera-ready copy of pamphlets about Tofu and Miso in German." Address: Weg der Natur, Amalienstrasse 45, D-8000 Munich 40, West Germany. Phone: (089) 28 37 51.

2491. Bunka Shuppan Kyoku. 1982. *Miso no hon: Tsukutte tabeyō*. The miso [The book of miso: Let's make and eat]. Tokyo: BSK. 96 p. June. Illust. 25 cm. [Jap]

• **Summary:** This colorful book, with many color and black-and-white photos, is packed with Japanese miso recipes. Pages 18-21 describe how to make koji at home in a home-made incubator. Pages 30-31 are a review by Wataru Kawamura of *The Book of Miso* by Shurtleff and Aoyagi; includes a photo of the two authors. Page 22 describes how to use koji to make amazake. Address: Shibuya-ku, Tokyo, Japan.

2492. Chico-San, Inc. 1982. Mail order–Price list. P.O. Box 1004, Chico, CA 95927. 4 p. June. 28 cm.

• **Summary:** Products include: Rice Cakes (6 varieties, with 4 new ones coming soon); all in 3 different packages. Carob coated rice cakes in plain or mint flavors. Yinnies brand products: Taffy, Caramel, or Rice Syrup. Grains, beans, and seeds: Incl. Sweet brown rice, azuki beans, black [soy] beans (the latter two imported from Japan since 1962). Tea. Natural condiments from Japan (some imported since 1962): Lima soy sauce. Mugi (barley) miso. Kome (rice) miso. Rice malt vinegar. Tekka (soy plus). Nigari (for tofu making). Kuzu (wild arrowroot). Salt plums (umeboshi). Sesame oil (dark). Koji, barley. Seaweeds from the Orient: Wakame (curly dulse). Kombu. Hijiki. Kanten (gel). Nori. Household goods: Incl. The Yinnies Brand Rice Syrup Cookbook.

Introducing a new Chico-San Product: Tamari Soy Sauce. Address: Chico, California. Phone: 916-891-6271.

2493. Lappé, Frances Moore. 1982. *Diet for a small planet*. Tenth anniversary edition. Completely revised and updated. New York, NY: Ballantine Books. xiv + 498 p. Illust. by Marika Hahn. Index. 21 cm. [250* ref]

• **Summary:** Listings of soyfoods in index: Soy flour & grits p. 16, Tofu p. 14, Soybeans p. 7, Soy foods (tofu, tempeh) p. 229. Tempeh p. 3. The section titled "Recommended paperback cookbooks" (p. 454-55) includes *The Book of Tofu*, *The Book of Miso*, and *The Book of Tempeh*, by William Shurtleff and Akiko Aoyagi, and an invitation to send a long, self-addressed stamped envelope to their Soyfoods Center in Lafayette, California. Address: Inst. for Food & Development Policy, San Francisco, California.

2494. Leviton, Richard. 1982. *Tofu, tempeh, miso and other soyfoods*. New Canaan, Connecticut: Keats Publishing Inc. 26 p. June. No index. 22 cm. [46 ref]

• **Summary:** Contents: The neighborhood soy deli. What are soyfoods? Soybeans from China. Soyfoods have marched west. The nutritional side of soyfoods. Soyfoods in your kitchen (3 recipes from other cookbooks). The future. Bibliography. A list of soyfoods cookbooks. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2495. Tamura, Shôzaburo. 1982. Re: History of the Japan National Miso Association. Letter to William Shurtleff at Soyfoods Center, June—in reply to inquiry. 3 p. [Jap; eng+]

• **Summary:** The Japan National Miso Association (*Zenkoku Miso Kogyô Kyôdô Kumiai Rengôkai*) was founded on 17 Nov. 1960. Japan's first nationwide miso trade association was founded on 11 Jan. 1940. Its name was *Zenkoku Miso Kogyô Kumiai Rengôkai*. In 1944 [during World War II] it became a controlled company (*Tôsei Gaisha*), and in 1948 its name was changed to *Zenkoku Miso Kogyô Kyôkai*. Finally in 1960 it became the present *Zenkoku Miso Kogyô Kyôdô Kumiai Rengôkai*.

According to Dr. Hideo Ebine, the earliest known article on miso published in a scientific journal was: Kellner, O. [Oskar Johann]; Nagaoka, M.; Kurashima, Y. 1889. "Researches on the manufacture and composition of miso." *Bulletin of the College of Agriculture, Tokyo Imperial University* 1(6):1-24. Dec. Dr. Ebine is head of the Central Miso Research Center, which is in the same building as the miso association.

Concerning statistics on the amount of miso produced in Japan over the past century: There are good statistics on shoyu since it has been taxed nationwide since the Meiji period, but there are no such reliable statistics on miso because it was not taxed, and also because a great deal of miso was made in individual homes in the early days. Address: *Zenkoku Miso Kogyô Kyôdô Kumiai Rengôkai*, Tokyo, Japan.

2496. Tofu Shop (The). 1982. Take-out deli (Menu). 768 18th St., Arcata, CA 95521. 6 panels. Undated. Front and back.

• **Summary:** This 6-panel leaflet and menu is mostly hand-written but partly printed. On the front cover is the logo of a dragon in a circle. "9-6 Monday–Saturday. Hot food served 12-6 daily. In a hurry? Call ahead: 822-7409. Your local soyfoods producer." One panel, titled "Welcome to the tofu shop," states that this is "one of only a handful of traditional-style tofu shops in the Western Hemisphere."

Another titled "Inside our sandwiches" lists the ingredients in each sandwich. Soy-related menu items include: Sandwiches: Tofuburger. Dragonburger. Tofucadoburger. Spinach turnover (with tofu filling). Sesame tofu pocket. Mexican pastry (a mini-burrito filled with spicy tofu). Fuji roll (with rice, [mung] bean sprouts, tofu, and miso). Sushi roll (with nattoh miso filling). Tofu

burrito. Salads: Potato-tofu. Tahini-tofu. Desserts. Beverages: Soymilk. Sides: Tamari, olive and lemon. Sesame tofu dressing. Miso onion sauce. Tofu veggie patty. Baked tofu cutlet. Specialty groceries: Tofu, miso, condiments, crackers, recipes, supplies for tofu and miso making. Address: Arcata, California. Phone: 707-822-7409.

2497. Bhatnagar, P.S. 1982. Re: Request for proforma invoice for publications and materials. Letter to William Shurtleff at Soyfoods Center, July 8. 1 p. Typed, with signature on letterhead.

• **Summary:** He would like to order popular books on miso, tofu, and tempeh. Address: Project Coordinator, All-India Coordinated Research Project on Soybean, G.B. Pant Univ. of Agriculture and Technology, Pantnagar (Uttar Pradesh), India. Phone: 291-292 Rudrapur.

2498. Chen, Shu-hua. 1982. [Utilization of soy bean extracted residue]. *Nung Lin Hsueh Pao [Kuo Li Chung Hsing Ta Hsueh] (J. of Agriculture and Forestry [National Chung Hsing University])* 31(1):27-43. July. [13 ref. Chi; eng]

• **Summary:** Fresh okara was collected from a tofu factory, dried with hot air, and milled into powders, which could be used at levels of 15-50% to fortify flours or other ingredients to make western- or Chinese-style snacks, bread, hot pepper sauce, or miso. Address: Assoc. Prof., Dep. of Food Science, College of Agriculture, National Chung-Hsing University, Taiwan.

2499. Leviton, Richard. 1982. American Miso makes a big move down south. *Soyfoods*. Summer. p. 18-22.

• **Summary:** A feature cover story about John and Jan Belleme and their American Miso Co. in North Carolina. Richard Leviton visited the company in April. "Jan and John Belleme are serious about making miso. After a strenuous 8 months apprenticeship in Japan with master misomaker Takamichi Onozaki and a \$300,000 investment in buildings, land, and equipment, the Bellemes began fulltime, large scale miso production at their Rutherfordton, North Carolina, plant in August, 1981."

Situated on 100 acres in the rural southwestern corner of North Carolina, the occupies two buildings, including a 3,400 square foot Butler style metal-frame concrete base structure for miso processing and a smaller 1,000 square foot garage-style building for rice polishing and storage. The Bellemes live in a comfortable farmhouse up the hill, just a 5-minute walk away. Its important to be near the koji room when you are trying to carefully monitor the growth of 1,200 pounds of rice koji in a traditional koji room with no thermostat. The company "has struck a careful balance between the traditional approach (as with koji, which requires skill and personal attention) and labor-saving mechanization (as with bean washing, soaking, cooking,

mixing,” and moving). The company has the capacity to make 500,000 lb/year [226.8 metric tons/year] of miso. They presently make 3,000 to 4,800 lb/week of light and dark misos. A color photo on the cover shows John Belleme making miso with Kaoru Onozaki (Mr. Onozaki’s eldest daughter) and Haruo (his adopted son—since he had no sons of his own).

Minnesota-grown Prize soybeans are mechanically washed, then transported by conveyor into a 200-gallon (400 lb capacity) pressure cooker, which is controlled by a push button. When done, the removable steamer basket inside the cooker is moved by overhead crane and the soybeans are discharged through the bottom onto a large cooling table, where they are spread by shovels then allowed to cool—with the aid of at least one electrical fan. A push button then causes the table to tilt; the beans are then run into an extruder, and ground to a paste, which is later mixed with the handmade koji. “Belleme’s koji room combines both traditional and automatic features, from manually operated vents to complex humidity and temperature monitors. The koji room is actually two adjoining rooms with a connecting door.”

This excellent article concludes: “For the American Miso Company, the immediate future is replete with energetic plans. The Bellemes will convert their present home into a summer residential center for students interested in studying fermented foods and natural living. Meanwhile John and Jan will build another house for themselves elsewhere on the property. A new plant for packaging prepared miso products is envisioned and there is much talk of shoyu production in a few years. With misomakers as serious about their venture as the Bellemes, the American Miso Company will certainly have a major influence on miso awareness in America.”

Thirteen black-and-white photos show in detail how miso is made at American Miso Co.

A full-page sidebar (p. 22), titled “Roots of the American Miso Company,” tells about the family of Takamichi Onozaki and shows a magnificent half-page black-and-white photo the family—16 members strong.

Talk with Barry Evans, owner of American Miso Co. 2000. July 6. In 1982 the company’s capacity was far less than 500,000 lb/year; there were only eight vats, each of which held about 6,000 lb of miso (which took one year to mature), for a total capacity of about 50,000 lb/year—or roughly one-tenth of what the article says. Moreover Bellemes made much less than 3,000–4,800 pounds of miso per week. Nor did the company make any light miso during the first few years. Address: Colrain, Massachusetts.

2500. Leviton, Richard. 1982. Touring for soyfoods. *Soyfoods*. Summer. p. 32–37, 41.

• **Summary:** At The Farm in Tennessee, the soy dairy, managed by Chuck Haren, “operates 3 days a week, turning

out 7,500 lb/week of calcium sulfate tofu for immediate consumption by the Farm’s 1,300 soyfood lovers.”

Legume: “Gary and Chandri Barat and Robert Shapiro have a booming company on their hands after 1 year of business with an impressive line of prepared frozen tofu entrees and desserts. Jan. 1981 rented facility in Verona, New Jersey. May 1981 Celantano started co-packing. Photos show: Chandri Barat, Gary Barat, and Robert Shapiro of Legume (see also photo on p. 3).

The following people and their companies are also discussed, with photos: Tim Nusser of Rising Sun Soy Farms (Columbus, Ohio). Jim Saunders of Real Foods (tofu shop in a supermarket in Allentown, Pennsylvania). Renate and Karl Krummenoehl of Cricklewood Soyfoods. Jamie and Nancy Stunkard of Nature’s Grace. Joel Dee of Edward & Sons in Saluda, North Carolina (marketers of Miso-Cup). Henry Salazar of Sam Sung Tofu Co. Eileen Foote and Eileen Judge of Kingdom Foods. Bob Hunt of Blue Ridge Soyfoods. Soya Food Products in Cincinnati (Ben & Nina Yamaguchi). Rising Sun Soy Farms. Bill Lutz of Hip Pocket Tofu Deli (Columbus, Ohio). Robert Marrochessi and Bill Spear of The Bridge (Middletown, Connecticut). Suzy Jenkins and Laurie Praskin of Plenty (Summertown, Tennessee). Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2501. **Product Name:** Tree of Life Miso [Mugi Miso, Genmai Miso, Hatcho Miso, Kome Miso].

Manufacturer’s Name: Tree of Life, Inc. (Importer/Distributor). Made in Japan.

Manufacturer’s Address: 315 Industrial Dr., P.O. Box 410, St. Augustine, FL 32084. Phone: 904-829-3483.

Date of Introduction: 1982. July.

How Stored: Shelf stable.

New Product–Documentation: Brochure. Undated. Tree of Life natural foods of Japan. Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. These 4 miso products were introduced in April 1982. Talk with Greg Leonard of Tree of Life. The miso products were launched on 15 July 1982.

2502. Brown, Judy A. 1982. Soyfoods are catching on. The soyfoods industry has shown astonishing growth. Who created the boom and why? *Whole Life Times* No. 20. p. 34–36. July/Aug.

• **Summary:** Contents: Introduction. Idealism guides many soycrafters. Soybean goldmine. Tofu. Tempeh. Miso. Soymilk. Soy inhibitions. Wave of the future. Photos show: William Shurtleff and Akiko Aoyagi. Richard Leviton. Michael Cohen.

2503. **Product Name:** Miso+Plus. All Natural Dip Mix [Chive, or Jalapeno].

Manufacturer’s Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: Route 1, Box 153, Saluda, NC 28773.

Date of Introduction: 1982. August.

Ingredients: Jalapeno: Miso (soybeans, rice, seasalt), onion, garlic, parsley, oregano, cumin, turmeric, jalapeno pepper. Chive: Miso, onion, parsley, garlic, chives, nutmeg, ginger, dill weed.

Wt/Vol., Packaging, Price: 6 oz (17 gm).

How Stored: Shelf stable.

New Product–Documentation: Spot in Soyfoods. 1983. Winter. p. 49. "Miso Dips Without Compromise." Slogan: "Convenience Without Compromise." Prepare by adding sour cream, yogurt, avocado, etc. Leaflet. 8½ by 11 inches, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Label. 1986. 8 by 6 inches. Plastic packet. Red, green, orange, yellow, black. Chive has an olive-green background. Jalapeno has a burgundy background. Both have color photo of vegetables surrounding dip. "No additives. No preservatives. Convenience without compromise." Gives serving ideas. "The story of Miso+Plus: Miso (pronounced mee'-so) is one of East Asia's most important soy foods. Recipes for this savory vegetarian delicacy date back over 2,000 years! Miso's flavor and versatility have been prized for centuries as the foundation for soups, stews, and many traditional dishes..."

2504. McGregor, Otis. 1982. Soybeans—The human consumption approach. *Notes on Agriculture (Guelph, Ontario)* 18(1):13-14. Aug.

• **Summary:** "In 1974 the Ontario Soya-bean Growers' Marketing Board launched a program directed to the human consumption market... In 1974 the Ontario soybean export market represented a single shipment of white hilum soybeans to Japan for processing into tofu, miso and natto. Today tofu and miso are becoming popular in Ontario.

"Since 1975 the Ontario Soy-Bean Board has experienced remarkable success in moving soybeans into the human consumption market and the diets of Canadians. Two cookbooks have been printed by the Board and distribution has exceeded 70,000. Tofu shops have emerged in Ontario, to the extent that franchising is in the offing. Toronto has restaurants serving soybean meals... Today, the Ontario Soya-Bean Growers' Marketing Board actively promotes whole soybeans in one pound bags in various supermarkets." Address: Ontario Soya-bean Growers' Marketing Board, Chatham, ONT, Canada.

2505. Sattilaro, Anthony; Monte, Tom. 1982. Physician, heal thyself: A doctor's remarkable recovery from cancer and the diet he's convinced was responsible. *Life*. Aug. p. 62, 64, 68, 70. [1 ref]

• **Summary:** "This article was excerpted from *Recalled by Life: The Story of a Recovery from Cancer*, (c) 1982 by

Anthony J. Sattilaro with Tom Monte, due from Houghton Mifflin in September."

Four years ago, Dr. Sattilaro, President of the Methodist Hospital in Philadelphia, was dying of cancer. Today, after changing his lifestyle [primarily by adopting a macrobiotic diet, including brown rice, miso soup, and sea vegetables,], prescribed by Deny Waxman and Michio Kushi, he is totally free of this disease. Several photos show Dr. Sattilaro—and two x-rays of his upper body. Address: 1. M.D., Philadelphia.

2506. Martin, Debra. 1982. 1000 years old and very new [Shin-Mei-Do Miso]. *Comox District Free Press (Canada)*. Sept. 17. Friday.

• **Summary:** Six years ago, Lulu and her husband, Yoshi Yoshihara moved to Denman Island from Vancouver, where Yoshi worked as a projectionist for Pacific Cinematheque. He continued to commute from the Island to work, seeing his family only once a week—an arrangement that was not satisfactory. So they both decided to figure out a way to make a living on the island.

An idea came from a cookbook [The Book of Miso] she purchased in Seattle at a Japanese supermarket. They already knew about miso, so they tried making some small experimental batches at home. But they soon decided the only way to really learn the process would be from a Japanese master.

"Lulu took their four-year-old son and went off to Japan for eight months, staying with Yoshi's mother, and then with a family that operated a large miso factory in Iida City, located in a mountainous part of Japan with a climate similar to Denman Island's.

"She was fortunate to be taken under the wings of a miso master who had worked at the factory for 40 years and was in charge of the hand-made miso division there."

"This hands-on experience gave her an idea of what the koji should look like, taste like, and smell like, knowledge hard to gain from books.

Lulu and Yoshi started making miso in earnest from 1979. Photos show: (1) Yoshi standing by a stack of koji trays in sauna-like koji incubation room. (2) Lulu at her stove making miso soup. (3) Yoshi standing on a ladder by a wooden vat of miso, handing a pail down to Lulu. (4) Different Shin-Mei-Do miso products, packaged and bulk.

2507. Corn Country Whole Foods, Inc. 1982. Fall-winter 1982: New & improved (Catalog). 132 South Market St., Champaign, IL 61820. iv + 26 p. No index. 28 cm.

• **Summary:** The cover of this natural foods, vegetarian catalog is printed on orange paper with brown ink. Corn Country has increased the number of products it distributes, both those under its own Market Street brand and those made by many other companies. Corn Country trucks deliver throughout the Midwest: Freight is free with a

minimum order of \$400. Product categories: Refrigerated products. Bulk foods. Packaged foods. Snacks. Other.

Interesting products: (1) Tofu: Packaged (\$0.82/lb) or bulk (\$80/lb). (2) Market Street bread: Cinnamon raisin and Whole wheat both contain “whole soy flour.” (3) Stoneground flours: Soy flour-full fat (OG = Organically Grown) (\$0.42/lb). Corn Country uses old fashioned granite stone mills to keep the temperature low, which “preserves the nutritional value and flavor of the whole grain... Whole soy flour is milled from soybeans which have been heated first to destroy an enzyme which interferes with protein digestion. It is milder tasting compared to the defatted soy flour typically sold commercially.” (4) Market Street granolas: Of the 7 varieties, 6 contain small amounts of “soy flour.” (5) Beans, peas, and lentils: Soybeans OG (\$0.28/lb). Azuki beans. Chickpeas (Garbanzos). Lentils (green or red). Mung beans. (6) Market Street meals (vegetarian): Nutburger (incl. soy flour). Soyburger (soy flour is main ingredient). (7) Sea vegetables (9 types). (8) Westbrae miso (6 types). (9) Market Street nut butters: Peanut butter (“coarsely ground to retard oil separation”). Almond butter. Sesame tahini. (10) Natural oils: Sesame oil. Safflower oil. (11) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Tamari (with dispenser to quarts). (12) Seeds: Alfalfa seeds. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. Pepitas. (13) Market Street snack nuts: Shoyu almonds. Shoyu suns (sunflower), Shoyu cashew pieces. (14) Soy & corn snacks: Soy nuts salted. Soy nuts unsalted. (15) Market street mixes (unsulfured dried fruits, nuts and seeds): Sweet & shoyu mix (ingreds: Raisins, date pieces, dried bananas, shoyu almonds, shoyu cashews, shoyu sunflower seeds). Flatland mix (incl. unsalted “soynuts” {soybeans, vegetable oil}, fancy cashew pieces, and pumpkin seeds). (16) Health and beauty aids: Dr. Bronner soap (14 types). (17) Literature: 25 Talking Foods pads. (18) Traditional medicinal herb teas (27 types). (19) Celestial Seasonings teas (38 types); (20) Packaging supplies and kitchen help: Tofu kit (\$12.56). Address: Champaign, Illinois. Phone: 217-359-8843.

2508. Fantastic Foods. 1982. It's 6:15. You're home and hungry for something quick and wholesome (Ad). *Natural Foods Merchandiser*. Sept. p. 55.

• **Summary:** This full-page color ad is for Quick Pilaf: Brown Rice with Miso. The text begins: “And the last thing you want is the mess of cooking from scratch. This is the perfect time to open a package of Quick Pilaf from Fantastic Foods. Just pour it into boiling water, add butter, and simmer. In twenty minutes you'll be savoring the flavor of brown rice and whole grain pasta cooked in our special blend of seasonings.” A color photo shows the package between a glass quart of milk and a brown paper shopping bag, with some car keys and dark glasses to one side.

Address: 106 Galli Dr., Novato, California 94947. Phone: (415) 883-7718.

2509. Leviton, Richard. 1982. In a small bright building: Cottage soy industries on Vancouver Island. Colrain, Massachusetts. 15 p. Sept. Unpublished typescript.

• **Summary:** Discusses Sooke Soyfoods (Wayne Jolley), Thistledown Soyfoods, Shin Mei Do Miso, and Metta Tofu. Note: This article was commissioned by *East West Journal* but never paid for or published. For a good summary, see: *Soyfoods*. 1983. Winter. p. 36-37. “Cottage soy industries thrive on Vancouver Island.”

Concerning Shin Mei Do on Denman Island: Lulu Yoshihara recalls: In 1976 we picked up *The Book of Miso* at Uwjimaya department store in Seattle. It didn't look like it would be all that hard [to make miso] or take that much time or technology. Plus miso wasn't perishable and didn't need to be marketed right away. Ray [Lipovsky] was already here doing tofu and that gave us the idea we could do a little home soy business on the island and make a living. So I went to Japan in 1977 to find a miso teacher. We've been together since 1971. Address: Colrain, Massachusetts 01340.

2510. Miyako Oriental Foods, Inc. 1982. Re: Invitation to open house of new miso factory (Folded card). Baldwin Park, California. 2 panels. [Eng; Jap]

• **Summary:** One panel is in English, the facing panel in Japanese. “You are cordially invited to an open house of our new Miso factory... on Friday, September 24, 1982 5:00 p.m. to 7:00 p.m., 4287 Puente Avenue, Baldwin Park, California 91706. Phone: (213) 962-9633. Sadao Nakagaki, Chairman. Noritoshi Kanai, President. Teruo Shimizu, Factory Manager.” At the bottom of the English panel is a map showing the way to the new facility. Address: Baldwin Park, California.

2511. Photographs taken at South River Miso Co. 1982. Conway, Massachusetts.

• **Summary:** Four color photocopies of color photographs (each 3½ by 5 inches) were sent to Soyfoods Center on 1 Dec. 1999 by Anpetu Oihankesni, who took the photos while living and working at South River Miso Co. in 1982-83. They show: (1) Two strong Belgian draft horses pulling a cart carrying about ten recycled empty oak whiskey barrels—originally from Ohio Miso Co. The barrels are being moved to the shop from a barn across the river. Each barrel will later hold about 400 lb of special types of miso. From left to right: Christian (in front of the horses), Don Wheeler standing on the cart with his son on his shoulders, Thom Leonard (seated atop a barrel; he came for 3-4 weeks to teach miso making in Oct/Nov. 1982), and Anpetu. In the background is the front of the miso shop—post and beam construction with cedar shakes. The building has five main

parts. The koji is made downstairs in the center part; upstairs is a small living space or loft. The koji room protrudes out toward the front. To the right of the main part is a low-roofed entryway to the shop where the shipping is now done. To the right of the entryway is a 36-foot-long storage building, where the miso vats are stored. Each vat, made of recycled virgin cypress, holds about 4,500 lb of miso. To the left of the main building, under a roof that slopes downward, is more of the miso shop plus storage for smaller miso barrels. To the far left is a firewood storage shed. The Ellwells live in a trailer across the river—out of view (Fall 1982). (2) Anpetu seated at a wooden table, making *miso dama* (balls), and wrapping them in rice straw from rice grown in the field (Dec. 1982). (3) Christian and Anpetu ladling cooked soybeans from a cauldron into long rectangular stainless steel container; here they will cool, then be mixed with koji. Hannah Bond is in shadows to the left. “The cauldron was recycled from a dairy, part of the original equipment from Ohio Miso Co. Originally we left spirit holes in the floor and the koji room to allow *ki* to rise up from the earth... The upper part of the shop is where Hannah and I lived the first year of miso production. All of us used to enjoy steaming buns in the cauldron from the residual heat after cooking and saving the rich soy steaming water to use like lecithin.” (4) A view of the back of the miso shop with snow on the roofs, surrounded by snow. Two empty cypress vats lie on their sides to the left in the snow (Winter 1982-83). Address: Conway, Massachusetts.

2512. Quirk, Beatrice Taylor. 1982. Ah, so you want to try miso: A mountain couple is practicing the ancient art of making this Japanese food. *Carolina Lifestyle*. Sept. p. 23-25.

• **Summary:** Describes the work of John and Jan Belleme, and their American Miso Co. in Rutherford County, North Carolina. John Belleme is a 39-year-old Florida native who worked as a research biologist for the Veterans Administration in Miami, dealing mostly with cancer and chemotherapy. Thinking that there had to be a better way to deal with it, John started reading about natural foods, natural lifestyles, and traditional medicines in traditional cultures. In the mid-1970s the Bellemes adopted a macrobiotic diet, which is based on grains and includes only foods from the local environment. They eat no animal foods or dairy products, but they do eat fish.

Then in 1979 they left for Japan to study miso making with Takamichi Onozaki and his family, with whom they lived and worked for 8 months—in their 300-year-old home. They then returned to North Carolina, and spent almost a year building their miso factory, which began production in Sept. 1981. They made about 90,000 lb of light and dark miso in the first 9 months of operation.

A photo shows Jan Belleme and Japanese helpers preparing rice to make koji. Contains recipes for Light miso

dressings for salad, Miso-broiled fish, and miso soup. Address: Charlotte, North Carolina.

2513. Shurtleff, William; Aoyagi, Akiko. comps. 1982. Soyfoods labels, posters & other graphics. Lafayette, California: Soyfoods Center. 185 p. Sept. Illust. No index. 28 cm. 2nd ed. 1984. 6 vols. 685 p. total.

• **Summary:** Contents: 1. Tofu. 2. Other tofu types. 3. Secondary tofu products. 4. Tempeh. 5. Secondary tempeh products. 6. Soymilk. 7. Soymilk products. 8. Soy sauce, shoyu & tamari. 9. Miso. 10. Soynuts. 11. Other soyfoods. 12. Letterheads & business cards. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2514. Asunaro Eastern Studies Institute. 1982. Natural foods preparation with Sensei Noboru Muramoto (Poster). P.O. Box 2546, Escondido, CA 92025. 1 p.

• **Summary:** Noboru Muramoto, author of *Healing Ourselves*, will be presenting a series of 2 week classes on natural foods preparation at the Asunaro Institute in rural southern California. Students will participate in the preparation of miso, tamari, koji, amasake, mochi, tofu, and tekka. Address: Escondido, California.

2515. Elwell, Christian. 1982. Log of miso made at South River Miso Co. (Log—unpublished). Conway, Massachusetts. Unpublished log. 28 cm.

• **Summary:** The first entry on the first day reads: Variety: Two year barley—10/10/4.6/7.5. Starting date: 25 Oct. '82. Age: Two years. Used red rice koji starter. Lot #1-1. Container #B1, B2. Packed, covered 27 Oct. '82. Don & Thom [co-workers Don Wheeler and Thom Leonard].

Day & time: Day one, 11:30—Wash & soak 180 lb, barley (Living Farms—Fan next batch). 13:35—Fire lit, barley drained. 14:45—Steam through barley. 15:30—Barley cooked. 16:25—Koji 100°. Inoculate after cooling with 4 tsp. red rice starter. Put in crib.

Day two, 7:00—Koji 103°. Stir koji in crib. 9:00—Koji 94°. Koji room 85°. Koji put in trays. 9:50—Koji 101°. Trays staggered, koji heating up quickly... etc. Address: Founder and Owner, South River Miso Co., South River Farm, Conway, Massachusetts 01341.

2516. Leviton, Richard. 1982. The Perriers of soy foods: With large initial capital investments and national marketing plans, these companies are positioned for rapid growth. *In Business*. Sept/Oct. p. 53-56.

• **Summary:** Discusses three soyfoods companies: Legume, Soyfoods Unlimited, and American Miso Co. “While most companies in the industry operate on local or regional levels at best, these three progressive firms uphold nationwide market goals, have tied up large amounts of capital, and nurture vigorous plans to capture the American mainstream market. Legume, located in Caldwell, New Jersey, and run

by Gary and Chandri Barat, and Robert Shapiro, “distributes an impressive line of tastefully packaged, prepared convenience soyfoods in 40 states. Legume practically invented the product category, which includes tofu pizza, lasagna, ravioli, egg-plant Parmesan, tofu-vegetable pot pies, muffins, cakes, and tofu cheese-cakes. Currently the company, with weekly sales of \$8,000, contracts out all its food production, thereby allowing its lean staff of three to concentrate on sales and marketing. The Barats expect 1982 sales to top \$1 million with three employees, and \$3 million by 1983 with only five workers.” A good history of Legume begins: “Gary and Chandri Barat first caught wind of the swelling enthusiasm for soy products in July, 1979 at the Second Soycrafters Conference in Amherst, Massachusetts. They gathered over 500 pages of industry documentation and while uncertain of a specific product line, they were convinced that soyfoods, particularly prepared convenience offerings, were to be *the growth* area of the general food industry. Yet in their search for venture capital, holding only their prospectus as bait, they experienced difficulty... ‘Let’s taste the product,’ potential investors demanded.

“The Barats lacked a track record in the food industry,... But today, investment money firmly in hand, Gary reflects: ‘When raising money, make it a learning experience.’ Ask a lot of questions. Find out why people say no, listen carefully, study their answers, then make adjustments to address their concerns. Then ask again. Never take the rejections personally. Developing a business plan is an ongoing venture; it never stops and never ends. In the summer of 1980 the Barats took their fledgling concept to the streets of New York City, where they served their new line of prepared tofu products to a series of street fairs. “They served over 10,00 meals of tempeh chili, tofu chocolate mousse, and tofu cutlets, and studied faces carefully for reactions. Buoyed by the positive response,” they added tofu muffins, then vegetarian quiche to their line. The “R&D Taste Testing” at the street fairs eventually secured them \$50,000 in capital and \$100,00 in loans. They still managed to hang on to 51% ownership in their new company. They did careful market research using the influential SAMI (Standard Area Marketing Index) data, read reports, and interviewed industry leaders. They began to promote frozen tofu entrees but the profit margins were too slim. Their latest 1982 plan “calls for introducing six or eight boxed, frozen tofu entrees for national distribution.”

Valerie, John and Gary Robertson launched Soyfoods Unlimited in San Leandro, California in Feb. 1981. They focus on making and marketing selling. A big break came when New England Soy Dairy in Massachusetts bid to distribute 2,700 lb/month of their tempeh burgers. Once a week Valerie delivers the cases of frozen tempeh to the San Francisco airport.

John and Jan Belleme started the American Miso Co. in Aug. 1981 in Rutherfordton, North Carolina, after a

\$300,000 investment in plant and equipment. They hope to produce 500,000 lb/year of miso. They did an 8-month apprenticeship in Japan with a master misomaker.

Photos (by Richard Leviton) show: (1) Valerie Robertson of Soyfoods Unlimited with a tray of freshly-made tempeh. (2) John, Valerie, and Gary Robertson; the two men are wearing masks. (3) John Belleme of American Miso Co. empties hot, steaming soybeans. Address: Colrain, Massachusetts.

2517. Product Name: Mellow Barley Miso, Mellow Brown Rice Miso, Mellow Flint Corn Miso. The Mellow Brown Rice Miso was renamed in 1990 to Sweet Tasting Brown Rice Miso.

Manufacturer’s Name: South River Miso Co. Inc.

Manufacturer’s Address: South River Farm, Conway, MA 01341. Phone: (413) 369-4057.

Date of Introduction: 1982. October.

Ingredients: In 3/92: Deep well water, organically grown brown rice and soybeans*, and unrefined sea salt. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 9 lb, 18 lb, and 45 lb white plastic buckets.

How Stored: Refrigerated preferably (at home).

New Product–Documentation: Letters from Christian Elwell. 1981. Feb. 12 and Nov. 29. “Historical Sketch.”

Catalog and price list for spring 1983. 1983. Feb. Lists Mellow barley miso, Mellow brown rice miso, and Mellow flint corn miso. This hand-lettered catalog is (according to a letter from Christian Elwell of 28 May 1992) the company’s first catalog, which was sent out to a few hundred people in late 1982 and/or early 1983.

Ad in East West Journal. 1983. Nov. p. 87. “Wisely given miso gives its own wisdom.”

Soyfoods. 1983. Summer. p. 40-41. “Rural Miso Making.” Shurtleff & Aoyagi. 1983. Book of Miso. 2nd ed. p. 238. “Having bought out Ohio Miso Co. in Nov. 1980, Christian and Gaella Elwell started their own production in October 1982.”

Hill. 1986. Hampshire Gazette. March 14. “Making Miso.”

Product with Label sent by Christian Elwell. 1992. March 13. 1 lb beige plastic tub with black and brown text. “Unpasteurized. Please refrigerate. Vintage. Winter 1987.” There is a statement about traditional miso making signed by Christian and Gaella Elwell, a recipe for everyday miso soup, and an illustration of a silhouette of a mother handing a bowl of soup to her son seated across the table.

Talk with Christian Elwell. 1999. Nov. 3. South River Miso Company originally sold miso only in bulk, in 9 lb, 18 lb, and 45 lb white plastic tubs. Each tub had a plastic lid and heavy plastic bag liner. The label was on the side of each tub. The company sent some entire tubs to customers

via UPS, and advised that the miso be refrigerated at home—especially the sweet and mellow misos. The tubs were not refrigerated in the retail stores, but the same advice about refrigeration was given to consumers.

Letter from Anpetu Oihankesni. 1999. Nov. “The Flint corn miso was especially good. The oil from the maize seemed to temper the salt in a way neither rice or barley did, more mellow. We cooked the corn with pickling lime or hardwood ash (as hominy is prepared) before inoculating with rice koji culture. The growth was not as abundant appearing as with rice and because of the extra labor Christian eventually discontinued it. It was a uniquely ‘American’ miso. Longfellow Flint, a deep golden translucent maize, native to New England for centuries, from the original Algonquian peoples. We also used the corn koji to make a deeply satisfying amasake—all corn.”

2518. Belleme, John. 1982. Re: Developing a white miso. Letter to William Shurtleff at Soyfoods Center, Nov. 4. 1 p. Typed, without signature or letterhead.

• **Summary:** John would like to develop and sell white miso in a one-pound package, unrefrigerated, like Cold Mountain. John was a bit disappointed with the story about American Miso Co. that appeared recently in *East West Journal*. Richard Leviton had many good photos, but they used only one. Address: Route 3, Box 541, Rutherfordton, North Carolina. Phone: (704) 287-2940.

2519. Furth-Kuby, Wolfgang. 1982. Re: New developments with tofu and soyfoods in Europe. Letter to William Shurtleff at Soyfoods Center, Nov. 4. 2 p. Typed, with signature on letterhead. [Eng]

• **Summary:** “The term ‘Tofurei’ was invented by Gabriele Furth-Kuby. We thought it would be nice to have a similar name as ‘Backerei’ for bakery, ‘Metzgerei’ for butchery, etc. Consequently a miso shop would be called ‘Misorei’ or a soy foods shop ‘Sojarei’ or a Tempeh shop ‘Tempehrei.’

To date, the German edition of *The Book of Tofu* has sold 2,203 copies and *The Book of Miso* 3,040 copies. There are two new books about soyfoods out in German. One is *Kochen mit Tofu* (originally published by Autumn Press), the other *Soja Total* the new Farm cookbook. Sojaquelle has a full-page ad in each of them. Advertising our Tofu-kit we will get the addresses of people interested in soyfoods and then they will also buy our soybooks.

Wolfgang will see Herr Wolf in Vienna [Austria] “within the next two weeks and then will get copies of the two soybooks [that Shurtleff requested]. As soon as I have them I will send them to you.”

In December the German TV will broadcast a six-minute film about Tofu. Gabriele’s brother has done the film and we expect a breakthrough with it.”

Note: Sojaquelle became inactive in 1986.

Letter from Bernd Drosihn of Viana. 1995. April 19. Wolfgang Furth-Kuby’s new address is: Nelkenstrasse 11, 83125 Eggstätt, Germany. Phone: 08056 240. Fax: 836. “Wolfgang is now working as a consultant mostly for natural food stores and seems to be a little bit disappointed by the soyfoods business. He wants to get in contact with you again.” Address: President Sojaquelle and Ahorn Verlag, Weidgarten 2, D-8091 Soyen, West Germany. Phone: 08071-4220.

2520. Nelissen, Tomas. 1982. Re: Jakso and soyfoods in the Netherlands. Letter to William Shurtleff at Soyfoods Center, Nov. 9. 2 p. Typed, with signature on letterhead.

• **Summary:** “Maybe you still remember me from the time we were in Japan; once we met at Kichijoji station, next to Mitaka station. You tasted my genmai [brown rice] miso at a coffee-bar (next door).

“At this moment I am living in Holland with my wife Yvonne and two children. We set up a farm called Jakso. The whole idea is about becoming self-sufficient from the 30 hectares of land (including 6 hectares of fruit trees), a sourdough bakery, a soyfoods workshop, a futon workshop and educational activities.

“For the three workshops we “cut” the big barn into two halves and made a third floor. We built a very nice wood-burning bakery which produces all kinds of bread, cookies and savorys. The soyfoods workshop makes tempeh and tofu, as well as seitan. Year-round we produce an average of about 1,500 pieces of tempeh a week at 210 grams each, about 50 kg of tofu a day and a little less than 100 kg of seitan.

“We distribute our products all over Holland... in a 100 km circle around the farm. Our future products will be miso, shoyu, amasake and mushrooms. These are the products we studied in Japan for about 4 years...

“There are 12 people working on the farm (plus 7 children)... The meals are on a macrobiotic base.” Address: Director, Jakso, St. Natuurlijke Land- en Tuinbouw, Voorne 13, 6624 KL Heerewarden, Netherlands. Phone: 08877-2189.

2521. Aihara, Herman. 1982. History of work with macrobiotics and Chico-San (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 29. 5 p. transcript. Address: Oroville, California.

2522. Greenwood, Rebecca. 1982. Smokey Mountain miso: Traditional and modern methods unite to create a fine domestic miso. *East West Journal*. Nov. p. 50-53.

• **Summary:** About John and Jan Belleme and the American Miso Co., located in the Smokey Mountains [sic, Great Smoky Mountains] in the small town of Rutherfordton, North Carolina. The company started making miso in

August 1981 and now makes 5,000 pounds a month. "John has a determined air about him. You get a sense that here is a man who, if he's going to do anything, is going to do it all the way." John's main interest is in making high-quality miso.

Almost all miso sold in the U.S. today is made by a fully automated process and pasteurized. The Bellemes spent seven strenuous months studying miso-making with Takamichi Onozaki in Japan. They now have three goals in making miso: (1) Sell unpasteurized miso—which should be refrigerated. (2) Produce miso using traditional methods, including wooden vats, handmade koji, and slow, natural fermentation—rather than the faster and more commonly used forced heat method. (3) Use the high quality ingredients, including certified organically grown soybeans and rice, unrefined sea salt, and deep well water. This miso will be distributed by Great Eastern Sun Trading Co. which is partially owned by the Bellemes' friend and fellow investor, Barry Evans, of Miami, Florida.

The American Miso Co. is located on 100 acres of rural land and consists of two buildings totalling some 3,400 square feet. The small building is used for storage and milling rice. The big one is where the miso is made and aged—for up to 18 months in huge, custom-made cypress vats which hold 8,000 pounds of miso each. When each vat is full, it is topped with 1,000 pounds of rocks which add pressure during the fermentation. Presently three types of miso are aging here: three short term (Sweet White Miso, Mellow Rice Miso, and Mellow Barley Miso) and one long term (Red Brown Rice Miso).

The secret of good miso lies in making good koji—by hand. John removes up to 90% of the bran from the rice for short-term miso, but only 10-30% for long-term miso. The company's pride is its koji room.

The Bellemes' dream is greater than just making miso. They have started constructing another home on their rural property to accommodate students in a living and learning environment. Each summer they plan to hold workshops which will include miso-making, gardening, natural foods cooking, philosophy, and meditation. A large photo shows John Belleme standing by the soybean cooling table and as the huge steamer basket overhead discharges a load of freshly cooked soybeans.

Note: The Great Smoky Mountains (often shortened to Great Smokies) is a range of the Appalachian Mountains extending along the North Carolina-Tennessee boundary. A part has been set aside as Great Smoky Mountains National Park. Address: Co-director, Rocky Mountain Inst. of Macrobiotics, Boulder, Colorado.

2523. JETRO (Japan External Trade Organization). 1982. *Beikoku no miso shijō* [The American miso market]. Los Angeles, California: Nihon Boeki Shinkokai. 32 p. Nov. [7 ref. Jap]

• **Summary:** Contains detailed statistics on the total U.S. market and on individual miso manufacturers in the contiguous 48 states and Hawaii. Of the miso consumed in the USA, about 63% is consumed by Asian Americans and 37% by Caucasian Americans. The age of miso consumers: 20s 10%. 30s 32%. 40s 26%. Fifties 32%. Sixties 10%. Address: Nihon Boeki Shinkokai, Los Angeles, California.

• **Summary:** Contents: Foreword, by Michio Kushi. Foreword by Edward Esko. 1. The macrobiotic approach, by Michio Kushi. 2. Cancer and diet. 3. Diet and heart disease. 4. Macrobiotics, preventive medicine, and society. 5. Case histories. Appendixes: Food policy recommendations for the United States, by Michio Kushi. East West Foundation—Diet and health related activities, 1972-1982. Bibliography.

Many of the subchapters in this book are written by physicians. For example, William P. Castelli, M.D., contributed a 5-page original article titled "Lessons of the Framingham Heart Study." There are also articles by Robert S. Mendelsohn, M.D., Keith Block, M.D., and Christiane Northrup, M.D. Miso, tempeh, natto, tofu, and soy sauce are all discussed as foods that can be used to help in the prevention and cure of these two major diseases. Address: Brookline, Massachusetts.

2525. Leviton, Richard. 1982. Soyfoods come of age. *Vegetarian Times*. Nov. p. 28-29, 31. [1 ref]

• **Summary:** "Soybean based foods made with simple technology are gradually replacing meat in America diets. Originally developed in the Far East, foods like miso, tofu, and tempeh are becoming Westernized as manufacturers add convenient packaging, modern marketing and pizzazz to their soyfoods. Discusses: New tofu marketing techniques, the impact of *The Book of Tofu* by Shurtleff & Aoyagi and other tofu cookbooks, secondary soy products (prepared, convenient soyfoods), Legume, Quong Hop, Garden of Eatin', Edward & Sons, the soy deli, interest in tofu by large American food companies (Del Monte and Kraft).

Includes "A Guide to Soyfoods" the briefly defines miso, soy sauce, texturized soy protein, tofu, and tempeh. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2526. *Manna Bulletin (Amsterdam, Netherlands)*. 1982. Fermentatieprodukten essentiële aanvulling op plantaardige dieet [Fermented products, an essential supplement to a vegetarian diet]. 4(3):9-11. Autumn. [Dut]

• **Summary:** Mentions tamari soy sauce (*Tamari-sojasaus*, fermented for 2 years), miso (*Miso-sojapasta*, fermented for 2 years), tempeh, and natto.

2527. Oak Feed. 1982. Catalog and price list. Coconut Grove, Florida. 1 p. Back to back. 36 cm.

• **Summary:** At top of page 1: “Your Japanese connection: Importers and wholesale distributors of macrobiotic foods. Lowest wholesale prices available. Abbreviations: E = Erewhon. M = Mitoku. W = Westbrae. * = New product. Contents: Miso and tamari. Sea vegetables. Tea. Noodles. Condiments. Vinegars, pickles & mirin. Beans. Crackers. Miscellaneous foods. Kitchen utensils. Body care products. Medicinal products.

Miso and tamari: Onozaki miso (11 lb or 44 lb). Tamari-filled dispenser (W). Organic shoyu (Lima Ohsawa). Authentic tamari (4.75 gal. or dispenser). Hatcho miso (M). Soybean mame miso (M). Mugi (barley) miso (unpasteurized). Mugi miso (W). Genmai (brown rice) miso (W). Genmai (brown rice) miso (unpasteurized, 44 lb). Organic brown rice miso (unpasteurized, 22 lb). Kome (white rice) miso (W). Instant miso soup (light or red, M). Soba (buckwheat) miso (M). Natto miso (22 lb or 2.2 lb).

Condiments: Goma muso. Goma muso furikake (M). Tekka. Jinenjo tekka (M). Seitan condiment. Umeboshi. Roasted sesame oil. Black sesame salt. Black tahini.

Also: Barley miso pickles. Aduki beans [azuki]. Black soybeans. Kuzu. Address: 3030 Grand Ave., Coconut Grove, Florida 31333. Phone: (305) 448-7595.

2528. Cauwenberghe, Marc van. 1982. Re: George Ohsawa’s early work with soyfoods from 1956, especially miso and soy sauce. Letter to William Shurtleff at Soyfoods Center, Dec. 2. 5 p. [12 ref]

• **Summary:** The earliest document seen, written by Ohsawa, that mentions miso is the *Guide Pratique de la Medicine Macrobiotique d’Extreme-Orient*, which appeared in 1956. He arranged for miso and soy sauce to be imported to Europe from Japan and he organized the production of miso and soy sauce in France and Belgium in the Lima Foods factory by putting two of his Japanese students, Clim Yoshimi and “Jim” Takanami, to work there. Both are still living in Belgium. Clim’s address: c/o Kusa, Sportstraat, 319, 9000 Gent, Belgium. The home-made tofu he sells at his store is known as the best.

Klim wrote a book in Japanese on macrobiotics titled *Shin Shokuryo-ho*, which he translated into English as *Macrobiotics—The biological and physiological foundation of Zen*. It contains recipes using miso, tamari, soy sauce, and tofu. “In 1972 I attended cooking classes by Aveline Kushi where she was teaching tofu making and tofu recipes. In 1974 Michio Kushi gave a month long seminar on natural agriculture and food processing. This included the preparation of tofu and miso. The seminar was published in the series ‘Michio Kushi Seminar Reports.’” Address: East West Foundation, 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-734-3853.

2529. Aihara, Cornelia. 1982. Traditional barley miso and koji. *GOMF News (Oroville, California)*. Dec. p. 3.

• **Summary:** Describes how to make each on a home scale yielding about 100 pounds. Address: GOMF, 902 14th St., Oroville, California 95965.

2530. **Product Name:** Natto Miso (Aged & Fermented Soybeans with Kombu & Ginger).

Manufacturer’s Name: Eden Foods, Inc. (Importer from Muso). Made in Japan.

Manufacturer’s Address: Clinton, MI 49236.

Date of Introduction: 1982. December.

Ingredients: Barley miso—soybeans, barley, water, sea salt, and *Aspergillus oryzae* (Koji)—barley malt, kombu (edible seaweed), ginger.

Wt/Vol., Packaging, Price: 22 lb (10 kg) plastic tub. Retail for about \$80 (1/92, Boulder, Colorado).

How Stored: Shelf stable.

New Product—Documentation: Richard Leviton. 1984. *East West Journal*. April. p. 20. “The organic Garden of Eden.” In 1982 Eden imported 25 container loads (each weighing 35,000 lb) of Japanese natural foods, including natto miso and buckwheat miso.

Eden Foods catalog. 1987. Nov. Includes: Natto miso “Kinzanji.”

Talk with Scott Stoltz of Nederland, Colorado. 1992. Jan. 6. This product has been available from Eden for at least 6 years. The price in stores is typically about \$6/lb. He reads off the ingredients and container type.

Label sent by Scott Stoltz. 1991. 8 by 6 inches. Self adhesive. Black, red, and green on white. Multi-colored Eden crane logo and green sprouts logo. “A condiment with a sweet, spicy flavor. Use on grains, noodles, mochi, beans, vegetables, and as a spread or dip.”

2531. **Product Name:** Eden Hacho Miso, and Soba Miso.

Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer’s Address: Clinton, MI 49236.

Date of Introduction: 1982. December.

New Product—Documentation: AD in *Vegetarian Times*. 1982. Dec. p. 24.

2532. Eden Foods, Inc. 1982. George Ohsawa first introduced “tamari” to North America. The product he gave us was a traditionally brewed SHOYU... (Ad). *East West Journal*. Dec. p. 11. Also in *Vegetarian Times*, Jan. 1983, p. 36.

• **Summary:** “... made of soybeans, wheat, water & sea salt, fermented for many months and pressed.

“He called it Tamari because he thought that Shoyu was too difficult a word for Westerners to say and because it

would differentiate Shoyu from commercial, chemical soy sauces.

“In Japan, Tamari is the by-product of making soybean miso, from soybeans, sea salt, and water. A very small amount of this is made compared to the amount of Shoyu brewed. In Japan, Tamari is most commonly used in food processing while Shoyu is used in cooking and on the table. Both are excellent foods. The original ‘Eden Tamari-Shoyu’ is macrobiotic soy sauce. This is the product Eden has marketed as Tamari since 1967, because George Ohsawa called it ‘Tamari.’

“Recently, real Tamari (Wheat Free) has been imported into the U.S.A. Mr. Ohsawa did not anticipate this. Now there are two products on the market being called Tamari. Shoyu & Tamari”

Note: This is an early macrobiotic effort to distinguish between tamari and shoyu. “Eden offers: Tamari Natural (Shoyu) Soy Sauce and Tamari Wheat Free.” Address: Clinton, Michigan 49236.

2533. Eden Foods, Inc.; Muso Shokuhin. 1982. What was once a flight of fancy... (Ad). *Vegetarian Times*. Dec. p. 24.
 • **Summary:** This full-page color ad shows the colorful Muso crane logo flying at the top. Across the bottom in bold letters is written “Eden.” The page is filled with boxes of macrobiotic natural food products imported by Eden from Muso in Japan. These include: Bulk miso, bulk kuzu, ramen, bulk sea vegetables, bancha tea, natural soy sauce (tamari), umeboshi, soba miso, Hacho miso, and vegetable brush. In the background is a landscape of terraced rice paddies. Address: [Clinton, Michigan].

2534. Bo, Thi-an. 1982. Hishio to shōyu no engen to sono seisan gijutsu ni tsuite. I. [On the origins of chiang and shoyu, and their production technology. I.]. *Nippon Jozo Kyokai Zasshi (J. of the Society of Brewing, Japan)* 77(6):365-71. [9 ref. Jap; eng]

• **Summary:** This is one of the most interesting and carefully researched articles seen up to this time on this subject. The author (Ho Keian in Japanese), is a Chinese graduate of Iwate University in Japan. He sent this article to the university alumni association on the university’s 80th anniversary. Shoyu has become a world-class seasoning. Even in Moscow they have built plants to produce soy sauce and chiang (miso).

The earliest chiang was made with meat, fish, and shellfish; later, as agriculture advanced, beans and grains were used. The two main types of chiang are (I) those made using flesh as a main ingredient and (II) those made solely from plants. The flesh chiangs can be further subdivided: IA. Those made from animal and bird flesh. IA1. Made without bones (mentioned in the Shih Ching [Classic of Food], the Chou Li [Rituals of the Chou Dynasty, 3rd century B.C.], the Li Chi [Book of Rites, 2nd to 3rd century

B.C.], and the I Li); IA2., Made with a large amount of liquid (mentioned in the Chou Li and Li Chi); IA3. Made with flesh and bones (mentioned in the Chou Li, I Li, and Ch’i-min Yao-shu [Essential techniques for the peasantry of Ch’i, written by Chia Ssu-hsieh in A.D. 535]); IB. Made with fish or shellfish, including IB1. Fish chiang (mentioned in the Chou Li, Ch’i-min Yao-shu), and IB2. Fish intestine chiang (mentioned in the Ch’i-min Yao-shu). The non-flesh or vegetable chiangs (II) can be divided into: IIA. Those made with beans including IIA1. Chiang (mentioned in the Chou Li (3rd century B.C.), Lun Yu [Analects of Confucius, after 479 B.C.], Shih Chi [The Historical Record by Ssu-ma Ch’ien, ca. 90 B.C.], and Chi Chiu P’ien [48 to 33 B.C.]). IIA2. Bean (Soybean) chiang (tou-chiang, mentioned in the Ch’i-min Yao-shu). IIA3. Small (Red/Azuki) bean chiang (mentioned in the Nung Sang I Shih Chi Yao [+1314]). IIB. Chiang made from other vegetable materials including: IIB1. Wheat chiang (mentioned in the Shih Ching); IIB2. Wheat flour chiang (mentioned in the Pen-ts’ao Kang-mu [Compendium of Materia Medica, by Li Shih-chen, A.D. 1578-97] and the Chü Chia Pi Yung Shih Lei Ch’uan Chi [+1301]); IIB3. Coconut chiang (Mentioned in the Ch’i-min Yao-shu); IIB4. Barley chiang (mentioned in the Pen-ts’ao Kang-mu); and IIB5. Mustard chiang (mentioned in the Li Chi and Chih Ching).

It is interesting to note that the earliest meat and fish chiang was made with koji, typically millet koji. Koji is also used today to make some of the fish sauce called Shottsuru in Akita prefecture in Japan. Shottsuru has a 3,000 year history.

The use of the terms “hai” (meat chiang) and “chiang” in the Chou Li imply that some chiang was made from ingredients other than meat. An illustration from the Han dynasty shows a hole in the bottom of a chiang pot for drawing off soy sauce. The *Ssu Min Yüeh Ling* by Ts’ui Shih from the Later Han (25-220 A.D.) uses the term “ch’ang chiang” to refer to refined/filtered soy sauce. The *Ch’i-min Yao-shu* also uses two terms for refined chiang that seem to be referring to types of soy sauce. Thus it seems relatively sure that chiang has a history of about 3,000 years from the Chou dynasty (1122-256 B.C.) and soy sauce has a history of over 2,000 years since the Ch’in (221-206 B.C.) or Han (206 B.C.–A.D. 220). In the literature of the T’ang dynasty it is not rare to use soy sauce for medicinal purposes.

Soy sauce came from chiang, which was made from soybeans and wheat flour or wheat; it is still widely produced today. But from shih (soy nuggets) came tamari and kuan-tou soy sauce (kuan-tou is a region in Fukien/Fujian in southeast China). Only soybeans were used to make these types of soy sauce. The first tou-shih (soy nuggets) was made from soybeans only, with *Aspergillus oryzae* mold. If salt was added, the product was called hsien tou-shih; if none was added, it was called tan tou-shih. Later

they started to use *Mucor* (as in Szechuan tou-shih) or *Rhizopus* species. Today most tou-shih is made with *Aspergillus*. This is the ancestor of tamari shoyu and kuan-tou soy sauce. Address: Iwate Daigaku Nôgaku-bu, Sogaku 80 shunen no gosukuji ni kaete; Present address, China.

2535. Bo, Thi-an. 1982. Hishio to shôyu no engen to sono seisan gijutsu ni tsuite. II. [On the origins of chiang and shoyu, and their production technology. II.]. *Nippon Jozo Kyokai Zasshi (J. of the Society of Brewing, Japan)* 77(7):439-45. [9 ref. Jap; eng]
Address: Iwate Daigaku Nôgaku-bu, Sogaku 80 shunen no gosukuji ni kaete; Present address, China.

2536. Eden Foods, Inc. 1982. Catalog 1983. 701 Tecumseh Rd., Clinton, MI 49236. 70 p.
• **Summary:** "Founded in July 1967, Eden Foods began as a small retail outlet of macrobiotic foods in Ann Arbor, Michigan." Address: Clinton, Michigan.

2537. **Product Name:** Quick Pilaf: Brown Rice with Miso.
Manufacturer's Name: Fantastic Foods.
Manufacturer's Address: 106 Galli Dr., Novato, CA 94947. Phone: 415-883-7718.
Date of Introduction: 1982.
New Product-Documentation: Ad (full page, color) in Natural Foods Merchandiser. 1982. Sept. p. 55. "It's 6:15. You're home and hungry for something quick and wholesome." Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 239; Spot in *Gourmet Today/Telefood*. 1985. Nov/Dec. p. 18. With photo of package. 7 oz.; Leaflet. 8½ by 11 inches. Color. "It's 6:15. You're home and hungry for something quick and wholesome."

2538. Far Pavilions. 1982. Menu. 116 N. Oak Street (Box 69), Telluride, CO 81435.
• **Summary:** The front panel of this 8-panel menu (Green on tan paper) states: "International vegetarian cuisine. Welcome hospitality. Located below the opera house." The menu (which gives no prices) begins: "Our recipes are traditional as well as our own creations, all using pure and natural foods." Gives a definition of tofu and how it is made, then notes: "We make tofu in this traditional way regularly at Far Pavilions. In our kitchens, tofu is prepared in a wide variety of ways to show how this new high-protein, non-dairy food can be included in your menu. We also make regular use of the nutritious by-products of tofu-making: the soymilk and the soy fiber (okara)."

Soy-related menu items include: Soup of the day. Salad (dressings include "tamari sauce"): Mixed vegetable and sprouts with guacamole, full (or half) plate salad with tofu and guacamole. Salad specialties: Tofu and vegetable, okara salad, hummus, tabouli. Daily specials from the wok: Stir-fried tofu, rice, and vegetables, tofu and vegetables, stir-

fried okara and vegetables. Stuffed pitas: Grilled tofu and vegetables, guacamole and tofu, falafels. Burgers: Soy burger, tofu burger, okara burger. Burritos: Spicy tofu and rice filling with guacamole. Extras: Fresh tofu, grilled tofu. Smoothies: Carob shake (with banana and sesame). Carob-honey soymilk. Nutritional yeast-20 cents extra. Other refreshments: Hot miso broth (cup). Soy milk. Desserts: Ask us! "For reservations, catering, or take out, call 728-4441." Address: Telluride, Colorado. Phone: 728-4441.

2539. Gilman Street Gourmet: Natural Foods & Delicatessen. 1982. Menu. Berkeley, California. 1 p.
• **Summary:** In the Deli Menu, soy related items include: Tofu miso ginger. Tofu burgers. Tofu "meat" balls. There is also a bakery menu. Hours: Monday-Friday 10-7. Sat. 10-6. Closed Sundays. Address: 1334 Gilman St., Berkeley, California 94706. Phone: 415-524-0505.

2540. **Product Name:** Vegetarian Baked Beans with Miso.
Manufacturer's Name: Health Valley Natural Foods.
Manufacturer's Address: 700 Union St., Montebello, CA 90640.
Date of Introduction: 1982.
New Product-Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 239.

2541. **Product Name:** Corn Chips with Miso.
Manufacturer's Name: Health Valley Natural Foods.
Manufacturer's Address: 700 Union St., Montebello, CA 90640.
Date of Introduction: 1982.
New Product-Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 239.

2542. **Product Name:** Miso [One Year Rice, Four Season Barley, Two Year Corn Miso, or Moromi].
Manufacturer's Name: Imagine Foods, Inc.
Manufacturer's Address: Moniteau Farm, R.R. 1, Box 11, Jamestown, MO 65046. Phone: 816-849-2583.
Date of Introduction: 1982.
New Product-Documentation: Form filled out by David Carlson, ca. 1982. They opened on 6 Jan. 1982 and now produce tempeh, tofu, and miso. Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 238. Dale Deraps of Imagine Foods/Moniteau Farm began making miso in 1982; Leaflet. 1984, undated. Talk with Robert Nissenbaum. 1988. Jan. 5. Dale Deraps made miso at home before Imagine Foods was founded. After 1982, Imagine then distributed some of his products, both packaged and in bulk.

2543. **Product Name:** [Kikkoman Instant Shiro Miso Soup (Soybean Paste Soup, White)].
Foreign Name: Shiro Misoshiru.
Manufacturer's Name: Kikkoman Corporation.

Manufacturer's Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1982.

Ingredients: Powdered miso, dried seaweed, wheat gluten, bonito powder, monosodium glutamate, dried green onions, disodium inosinate, disodium guanylate.

Wt/Vol., Packaging, Price: 1.4 oz (40 gm). Foil packed containing 4 individual packets. Each makes 2/3 cup.

How Stored: Shelf stable.

New Product–Documentation: Label. 1982. 5.5 by 7 inches. Plastic packet. Orange, red, brown and green on white. Full color picture of wooden bowl of soup on tray. Foil packets inside are 2.75 by 4 inches. Red, brown and black on white. Bowl of soup on front, instructions on back. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. "Distributed by Kikkoman Corporation, Noda 278, Japan." Text on label in both English and Japanese.

2544. **Product Name:** [Kikkoman Instant Aka Miso Soup (Soybean Paste Soup, Red)].

Foreign Name: Aka Misoshiru.

Manufacturer's Name: Kikkoman Corporation.

Manufacturer's Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1982.

Ingredients: Powdered miso, dried seaweed, wheat gluten, bonito powder, monosodium glutamate, dried green onions, disodium inosinate, disodium guanylate.

Wt/Vol., Packaging, Price: 1.4 oz (40 gm). Foil packet containing 4 individual foil packets. Each makes 2/3 cup.

How Stored: Shelf stable.

New Product–Documentation: Label. 1983. 5.5 by 7 inches. Plastic packet. Red, purple, black and brown on white. Full color picture of wooden bowl of soup on tray. Individual packets are 2.75 by 4 inch foil. Red, brown and black on white. Picture of bowl of soup on front, instructions on back. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. "Distributed by Kikkoman Corporation, Noda 278, Japan." Text on label in both English and Japanese.

2545. Maki, Toshio. 1982. Shokuhin oyobi kankyô-chû no N-nitroso kagô-butsumo-ganryô to bakuro-ryô ni tsuite [N-nitroso compounds in foods and the environment—the occurrence and exposures]. *Eisei Kagaku (J. of Hygienic Chemistry)* 28(5):249-58. [Jap]*

• **Summary:** Volatile and non-volatile N-nitrosamines were sampled in foods. The highest volatiles were in broiled dried fish, chewing tobacco, niboshi (dried small sardines), and smoked and flavored fish.

0.1 to 0.8 micrograms per kilogram (parts per billion, ppb) of N-nitroso-dimethylamine (NDMA) was detected in miso and shoyu. Similar amounts were also found in other Japanese foods. The author thinks that there is no danger in consuming these foods because of the very small amounts of NDMA, mostly less than 1 ppb.

2546. **Product Name:** Cold Mountain Freeze Dried Miso, and Spray Dried Miso [Red, or Light Yellow].

Manufacturer's Name: Miyako Oriental Foods, Inc.

Manufacturer's Address: 4287 Puente Ave., Baldwin Park, CA 91706.

Date of Introduction: 1982.

New Product–Documentation: Food Technology. 1986. Jan. Talk with Mr. Teruo Shimizu of Miyako Oriental Foods. 1995. May 3. These two products were first introduced at the IFT show in 1982. For many years Miyako imported them from Yamajirushi, its parent company in Japan. But Yamajirushi no longer makes the products and the high cost of Japanese imports resulting from the steady decrease in the value of the U.S. dollar has led Miyako to develop its own freeze-dried product in California. They are working with Mercer Processing Inc. in Palo Alto, which does the freeze drying. They also plan to develop a spray-dried miso (which is lower quality and less expensive, and contains maltodextrins). For years they sold both freeze dried and spray-dried miso to Fantastic Foods for use in their products. But Fantastic now buys these products from Japan—even though the price is very high (over \$4/lb) and increasing. Fantastic would like to buy from Miyako again.

2547. **Product Name:** The New Deli Brown Rice & Tofu (Sandwich in a Chapati).

Manufacturer's Name: New Deli (The).

Manufacturer's Address: Del Monte Plaza, 624A San Pablo Ave., Pinole, California. Phone: 415-724-5335.

Date of Introduction: 1982.

Ingredients: Brown rice, tofu, sprouts, carrot & miso, on whole wheat tortilla.

How Stored: Unrefrigerated and perishable.

New Product–Documentation: Talk with Paul Duchesne. 1989. July 31. They made this product from about 1982-85. Label sent by Paul Duchesne. 1989. Aug. 11. 3 by 2.25 inches. Black on gray-green. "No added fats or oils."

2548. Shin-Mei-Do Miso Company. 1982. What is miso (Leaflet). Denman Island, British Columbia, Canada. 2 p. Front and back. 28 cm.

• **Summary:** Side 1 is an introduction to miso. Side 2 is recipes, plus a plug for *The Book of Miso*, by Shurtleff & Aoyagi. Address: Denman Island, BC, Canada, V0R 1T0. Phone: 335-0253.

2549. **Product Name:** Black Barley Miso (made with black soybeans). Later renamed Black Soy Barley Miso.

Manufacturer's Name: South River Miso Co. Inc.

Manufacturer's Address: South River Farm, Conway, MA 01341. Phone: (413) 369-4057.

Date of Introduction: 1982.

Ingredients: Incl. Black soybeans, barley.

New Product–Documentation: Ad in East West Journal. 1983. Nov. p. 88. “South River Miso. Wisely given miso gives its own wisdom.” Mentions Black Barley (made with black soybeans).

Brochure from South River Miso Co. 1991. Sept. “Varieties available this year.” “Black Soy Barley” was introduced in 1982. “Black soybeans are known for their deep, rich sweetness and, in Oriental medicine, for their healing properties.”

2550. Tofu Shop (The). 1982. Take-out deli foods–Naturally (Menu). 768 18th St., Arcata, CA 95521.

• **Summary:** “In our coolers and ready to go. Ready to eat or take home to reheat.” Tofu burgers. Tofu-spinach pies. Vegetable pastries (arabian rice, hijiki, burritos). Avocado sandwiches (On 9-grain bread). Vegetable sushi rolls (brown rice, tofu, carrot, green onion, flavored with miso). Tofu-tahini salad. Tofu-herb dip (for chips, raw vegies or as salad dressing). Tofu cream pie (with real maple syrup and fresh fruit). Tofu pumpkin pie (on whole wheat crust with walnuts). Carob-soy pudding (creamy, topped with coconut & nuts). Plus more! The logo is a circular dragon by a circle. “Mon-Sat 9-6. Makers of fine tofu and other soyfoods.” Address: Arcata, California. Phone: 822-7409.

2551. Abiose, Sumbo H.; Allan, M.C.; Wood, B.J.B. 1982. Microbiology and biochemistry of miso (soy paste) fermentation. *Advances in Applied Microbiology* 28:239-65. [135 ref]

• **Summary:** Contents: Introduction. Fermented soy products. Fermented rice products. History of miso production. Types of miso. Raw materials for miso production: Soybeans, rice, barley, salt. Ratio of raw materials. Treatment of raw materials. Koji. Moromi. Chemical composition of miso. Future developments of miso production.

The first author, a woman, acknowledges the generous support given to her by the Government of Nigeria. Address: Dep. of Applied Microbiology, Univ. of Strathclyde, Glasgow, Scotland.

2552. Adachi, Iwao. 1982. *Nihon shokumotsu bunka no kigen* [Origins of Japanese food culture]. Tokyo: Jiyu Kokuminsha. 470 p. See p. 69-70, 113. [Jap; eng+]

• **Summary:** Kinako (Yayoi period): Also called “mametsuki” in Japanese, kinako is written with characters that mean “yellow soy flour.” In the *Wamyosho*, it is called “Daizu-iri” or “Mametsuki.” From these expressions we can learn that since ancient times, people have pounded soybeans in a mortar (*usu*). Stone mortars came to Japan during the Nara period (A.D. 710-784) and finally became popular among the people in about the middle of the Edo/Tokugawa period. Kinako was brought to Japan from China through Korea. Kinako is probably mentioned in the *Engi*

Shiki. At a certain festival the people served at the altar 5 measures each of magarimochiki and mametsuki, and 10 measures of daizumochiki. These may have been the early names for kinako-mochi and/or azuki mochi.

Tamari: The original form of shoyu was tamari. The by-product of tamari was miso. And the original form of miso was *kuki* [soy nuggets], which was a seasoning developed in China. More on the history of *kuki* is given under “miso.” The government office (*yakusho*) for miso was built at the imperial court (*kyutei*) in A.D. 701 (Taiho 1). Therefore tamari started there at the same time. In the book *Yamato Honso* (Japanese materia medica) by Ekiken Kaibara, tamari (written with the characters for bean + oil) was mentioned. But on the sign board (*kanban*) of Yuasa Shoyu (which was started in the Tenshō period, 1573-1592), Tamari Shoyu was written (and “tamari” was written with the single character for “tamaru”). In the *Vocabulary of the language of Japan* (1603; Nippo Jisho) tamari was defined in Portuguese: “Tamari, a very delicious liquid taken from miso which can be used as a seasoning when cooking foods.” Furthermore, in the *Oshufushi* (1684) it is written that “The liquid from shoyu is tamari.” During the Middle Ages (*chūsei*) in Japan, shoyu was written with the characters for bean + oil, but during the Tenshō period (1573-1592) it came to be written with the single character for “tamaru.” Tamari and shoyu were first distinguished during the Kyōhō period (1716-1735). In the Chubu region of central Japan (Chūbu-chiho; Toyama, Ishikawa, Fukui, Yamanashi, Nagano, Gifu, Shizuoka, and Aichi prefectures) one special kind of miso, which is a by-product of shoyu, is called “tamari-miso.”

2553. Aidoo, K.E.; Hendry, R.; Wood, B.J.B. 1982. Solid substrate fermentations. *Advances in Applied Microbiology* 28:201-37. [144 ref]

• **Summary:** Contents: Introduction. History of solid-substrate fermentations: Pre-Pasteur period, post-Pasteur period and current developments. Design considerations and types of solid-state fermentors. Characteristics of solid-state fermentations: Physiological aspects of microbial growth on solid substrates. Advantages and disadvantages of solid-state fermentation. Future developments of solid-state fermentation systems. Conclusions. Address: Biotechnology Unit, Univ. of Strathclyde, Glasgow, Scotland.

2554. Aihara, Cornellia. 1982. *Macrobiotic kitchen: Key to good health*. Tokyo: Japan Publications, Inc. 140 p. Illust. Index. 26 cm. A revised edition of *The Chico-san Cookbook* (1972).

Address: Chico, California.

2555. Aihara, Cornellia. 1982. *The dō of cooking: Complete macrobiotic cooking for the seasons*. Oroville, California: GOMF Press (George Ohsawa Macrobiotic Foundation). 230 p. Illust. by Carl Campbell. Index. 28 cm.

• **Summary:** This is a compendium of four seasonal cookbooks, each with the title *The Dô of Cooking (Ryorido)*, first published individually in 1971. Contents: Preface. Introduction. Selecting good foods. The secret of cooking. Spring. Summer. Autumn. Winter. Glossary. Cutting styles. Topical index (within each major food category {grains, grains with vegetables, seaweeds, beans and tofu, etc. }, recipes are listed alphabetically). Recipe index (of all recipes).

Contains many recipes calling for: Miso, natto, tofu (regular, deep-fried, and frozen). Also: Amazake, azuki beans, kuzu, mochi, sea vegetables, seitan (wheat gluten), sesame seeds and gomashio.

Near the front of the book is a biographical sketch and photo of Cornelia Aihara. She was born in 1926 in Fukushima, Northern Japan. She learned macrobiotics from George Ohsawa when he came to her town (Aizuwakamatsu) for lectures; this changed her life. While in school, she began corresponding with Herman Aihara, who was living in New York. In 1955 he invited her to New York. Although they had never met, she trusted him and went to America with only ten dollars in her pocket. They were married soon after her arrival in New York. There they engaged in retail business. When Mr. and Mrs. Ohsawa came to the USA from Europe, Cornelia studied macrobiotic cooking by helping Mrs. Lima Ohsawa at the first macrobiotic summer camps on Long Island in 1960; in the Catskill Mountains in 1961; at the University of California at Chico in 1963; and at the Big Sur Camp in 1964. Since 1961 Cornelia has devoted her life to the teaching of macrobiotic cooking, childcare, home remedies, and philosophy. Since 1965 Cornelia and Herman Aihara have organized fourteen macrobiotic summer camps in California; her cooking has been the biggest attraction.

On the cover is a large color photo of freshly prepared food, including deep-fried tofu slices. Address: 902 14th St., Oroville, California 95965.

2556. American Soybean Assoc. 1982. Tofu and the American soybean. *Checkoff Successfile*. Japan #105. 2 p.

• **Summary:** Contents: Summary. The problem. ASA's program and execution. Results. "In 1958 Japan's tofu industry used only 955,000 bushels of U.S. soybeans. Government restrictions and the tofu industry's quality standards held back the growth of U.S. imports by the tofu industry." Meanwhile Japanese tofu makers were using nearly 8 million bushels of soybeans grown in Japan or imported from China.

Step 1. ASA arranged for two senior Japanese food scientists to spend several months at USDA's Northern Regional Research Lab in Peoria, Illinois. They conducted research on tofu and miso to determine which U.S. soybean varieties worked best. "At the same time, ASA, the Japan Tofu Association, and the Food Research Lab of the

Japanese Ministry of Agriculture repeated the tests using various varieties of U.S. soybeans.

"The result was the development of a soft tofu production method, which gave reduced loss of water-soluble proteins and higher yields of tofu [because the tofu contained more water]. "Most important to U.S. farmers it was discovered that U.S. soybeans were the most suitable to the new process."

Next a "series of technical seminars were held in which demonstrations were presented to illustrate the superior quality of U.S. soybeans and the new processing methods." Gil Griffis, ASA director for Asia, says, "We succeeded in destroying the myth that only Japanese and Chinese soybeans could serve the tofu market."

ASA's next goal was to increase tofu consumption in Japan. In cooperation with the Japan Tofu Association, ASA conducted a nationwide series of cooking classes from the back of a kitchen-equipped bus that traveled from city to city. New tofu recipes were developed to appeal to the young homemaker. Several of the cooking seminars were televised, thus expanding the audience. "In addition, attractive posters were created and displayed outside nearly 25,000 tofu shops in Japan.

"Results: After 22 years of promoting U.S. soybeans to the Japanese tofu industry, the U.S. has made great inroads into the market. Last year Japan's tofu industry used nearly 17 million bushels of soybeans. Nearly 16 million bushels of the total industry purchases [about 94%] came from the U.S.—the production of over half a million acres of U.S. soybeans."

A large graph shows "Consumption of whole soybeans in foods" from 1975 to 1980 [in Japan]. Tofu and others has risen from 525,000 tonnes (metric tons) to about 590,000 tonnes. Miso has remained unchanged at about 180,000 tonnes. Photos show: (1) ASA's Ms. Kojima with a Japanese man making tofu in a traditional shop. (2) An ASA cooking class attended by women. (3) A Kentucky Fried Chicken outlet in Japan. Address: St. Louis, Missouri 63141.

2557. Coyle, L. Patrick, Jr. 1982. The world encyclopedia of food. New York, NY: Facts on File, Inc. xv + 790 p. Illust. Index. 28 cm.

• **Summary:** Contains basic information (sometimes interesting, often superficial, with quite a few errors) about some 4,000 foods and beverages, including worldwide staples (potatoes, soybeans, apples), local specialties, delicacies, major brand-name products (Coca-Cola) and oddities (penguin eggs, grasshoppers). With 200 line drawings, 150 black-and-white photos, and 50 color plates.

See entries for soybean (incl. black soybeans, fermented tofu, miso, soybean flour, soybean milk, soybean oil, soy sauce, tempeh; tofu, "white soybeans"), and Worcestershire sauce (which "is said to contain more than 100 ingredients,

including soy sauce, vinegar, molasses, chili, anchovies, garlic, shallots, tamarinds, limes and many spices”).

Also has entries for: Almond, chufa, peanut, peanut butter, peanut oil, seaweed (incl. algae, dulse, laver, rock weed / sea wrack, agar-agar, carrageen, kelp), sesame (with illustration of leaves, flower, and pods). Address: Freelance writer, Oceanside, California.

2558. Ebine, Hideo. 1982. Fermented soybean foods in Japan. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 41-52. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia.

• **Summary:** Production statistics for miso and natto from 1970-1979 were presented. Miso increased from 552,207 tonnes in 1970 to a peak of 590,137 tones in 1973, followed by a gradual decrease to 567,776 tons in 1979. Natto production increased from 100,000 tonnes in 1970 to 158,000 tonnes in 1979. Statistics on the production of soy nuggets (Tera Natto or Hama Natto) are not available, but are roughly estimated at 10,000 tons.

An outline is then given of the chemical composition of the different types of miso and natto as well as their methods of manufacturing. Of the many beneficial characteristics of miso, the following are worthy of note: it has strong antioxidative activity, a strong buffering activity, and a bactericidal like effect against pathogens.

“Natto is one of the typical and popular soybean foods in the Japanese diet. It is classified into 2 major types; one is called Hama Natto which resembles soybean miso in colour and flavour; the other is called itohiki natto. When referred to simply as natto, it generally means itohiki natto. Natto is a unique soybean food, fermented by *Bacillus natto*. The surface of fermented natto is covered with characteristic viscous and slimy substances consisting of *B. natto* cells and polymers of glutamic acid.” Address: Applied Microbiology Div., National Food Research Inst., Ministry of Agriculture, Forestry and Fisheries, Yatabe, Ibaraki-ken, Japan.

2559. Hagler, Louise. 1982. *Soja Total. Das vegetarische Kochbuch der Tennessee-Farm [Total soya. The vegetarian cookbook of the Tennessee-Farm]*. Hamburg, West Germany: Papyrus Verlag. 200 p. Translation by Elizabeth Leih of *The Farm Vegetarian Cookbook* (1978, English). Illust. 21 cm. [Ger]

• **Summary:** This interesting vegan cookbook book is loaded with creative recipes, illustrations (line drawings), and black-and-white photos. Contents: Beans. Soyameat (TVP). Italian dishes. Chili rellenos, nixatamal and masa. Nutritional yeast. Knishes. Soups. Uncle Bill’s recipes. Gluten. Tempeh. Miso. Soymilk. Ice Bean (Soymilk ice cream, p. 4, 96-98). Soy yogurt. Tofu. Pureed tofu. Yuba.

Soy coffee. Soynuts. Soya pulp (okara). Soy flour. Vegetables. Bread. Cereal grain recipes. Breakfast breads and pancakes. Desserts. Nutritional advice.

Note: This is the earliest German-language document seen (March 2007) that mentions soy ice cream, which it calls *Soja-Eiskrem*, *Eis-Bohnen*, or *Schokoladen-Bohnen-Eiskrem*. Address: Summertown, Tennessee.

2560. Henderson, Bruce R. 1982. *Oakland organic: A vegan primer*. Albany, New York: Caboose Press. 200 p. Illust. 23 cm. [24 ref]

• **Summary:** This is a book about veganism which contains a few vegan recipes near the back. It focuses on the San Francisco Bay Area and urban areas, and contains extensive information about soybeans and soyfoods, much of it inspired by *Yay Soybeans*, from The Farm in Summertown, Tennessee. As follows: Miso, and Soya-Mineral Bouillon (Dr. Bronner’s) (p. 19). Soy as an alternative protein source (p. 37-43). Soymilk (p. 53-56; Jethro Kloss). More soy (p. 57-61; soy pulp [okara] pudding, soysage, Garden of Eatin’ Soy Jerky (illustration of package), Brightsong Missing Egg Tofu Salad (illustration), soy yogurt (fermented), soy tofu—hard, baked, or fried). Sprouting (p. 67-70; incl. soybeans). Fermented foods (p. 71-74; incl. tempeh, raw tofu). Snacks & quick foods (p. 88-96; incl. Ice Bean—soy ice cream, Ice-C-Bean). Miso and soy sauce (p. 120-21). Soy-related recipes: Baked apples with miso (p. 185-86). Tofu cheesecake (p. 188-89). Soysage (p. 193). Soy ice bean (p. 195). Note: Bruce Henderson was born in 1946. Address: Oakland, California.

2561. Hirayama, Takeshi. 1982. Relationship of soybean paste soup [miso soup] intake to gastric cancer risk. *Nutrition and Cancer* 3(4):223-33. [15 ref. Eng]

• **Summary:** Consumption of miso soup was found to protect against stomach cancer, as long as the soup’s salt concentration was kept to a minimum. “Daily intake of soybean paste soup was found to significantly reduce standardized mortality rates for gastric cancer in an ongoing large-scale prospective study of 122,261 males and 142,857 females aged 40 and above in 29 Japanese health center districts, 1966-1978. The gastric cancer standardized mortality rates were 171.9, 210.2, 240.0, and 255.9 per 100,000 males, and 77.8, 85.3, 97.5, and 113.6 per 100,000 females in daily, occasional, rare, and noningesters, respectively... The risk-reducing effect has also been observed in case-control studies in the past, for both males and females and in urban and rural areas. This beneficial effect could arise from selected compounds such as protease inhibitors and/or other nutritious substances included in the soybean, but it is also possible that it merely reflects the effect of some frequent accompaniment to soybean paste soup, such as green-yellow vegetables...”

“According to the national nutritional survey conducted by the Ministry of Health and Welfare in 1979 for 6,000 randomly selected households (21,000 persons), 40.5% of Japanese ingest soybean paste soup daily at breakfast. Another 6.7% ingest it at their evening meal.”

In both men and women smokers, frequent consumption of miso soup was found to protect against stomach cancer (Table 3).

“Recently, an animal experiment bearing on the present issue was conducted in Korea [Kim, J.P.: Personal Communication, Oct. 1981]. Rats were fed various gastric carcinogens, and incidence of gastric cancer was reported to be significantly lower in those animals also fed soybean paste soup.” Address: Epidemiology Div., National Cancer Center Research Inst., Tsukiji 5-1-1, Chuo-ku, Tokyo, Japan 104.

2562. Ko Swan Dijen. 1982. Indigenous fermented foods. *Economic Microbiology* 7:15-38. A.H. Rose, ed. Fermented Foods. [67 ref]

• **Summary:** Contents: 1. Introduction. 2. Foods fermented by moulds: Roles of the moulds. 3. Foods fermented by bacteria: Fermented vegetable products, fermented fish products, fermented seeds (natto, thua-nao, dagé), fermented starch-rich raw materials (fermented maize products, fermented rice products, fermented cassava), fermented plant juice.

4. Foods fermented by a mixture of moulds and yeasts: Ragi, micro-organisms, fermented starch-rich raw materials.

5. Foods firstly fermented by moulds [as in making koji], followed by a fermentation with a mixture of bacteria and yeasts (the salt-tolerant yeasts are species of *Saccharomyces* and *Torulopsis*; the bacteria are species of *Pediococcus* and *Streptococcus*): Tane koji, soy sauce, other fermented soybean products (tauco {porridge or dry consistency}, miso, hamanatto {which is soft and has a high moisture content}, tou-shih {which has a much lower water content than hamanatto and is therefore not so soft}). These “fermented soybean products are also used as flavouring agents in cooking as well as table condiments or as a side dish”.

6. Specific aspects of fermented foods: Mould species, lactic-acid bacteria, yeasts, salt. 7. Acknowledgement. References.

Concerning soy sauce (p. 30-31): “Japanese *shoyu* is made from equal amounts of soybeans and wheat.” The “raw materials are inoculated with tane koji which contains spores of selected strains of *Aspergillus oryzae* and *A. soyae*. In less sophisticated soy sauce factories throughout South East Asia, mould species grow spontaneously on the soybeans by natural contamination from the air and from the bamboo trays on which soybeans of former batches were incubated (Bhumiratana et al., 1980). The moulds involved are species of *Aspergillus*, *Rhizopus*, or *Mucor*. Some

Indonesian *kecap* manufacturers inoculated the cooked soybeans with tempe [tempeh] inoculum which contains spores of *Rhizopus oligosporus*.”

(5) Changes in the concentration (%) of basic amino acids during cooking, 3-month meju fermentation, and ripening. (6) Changes in the concentration (%) of total amino acid in the crude protein of soybean during the ripening of different types of meju-brine mixture. Address: 1. Dep. of Food Technology, Korea Univ., Seoul, Korea; 2. Dep. of Food Preservation, the Royal Veterinary and Agricultural Univ., Copenhagen, Denmark.

2565. Lie Goan Hong. 1982. Nutritional aspects of fermented foods in Indonesia: An overview. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. Traditional Food Fermentation as Industrial Resources in ASCA Countries. xvii + 259 p. See p. 115-30. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [23 ref]

• **Summary:** Discusses the preparation of tempe, oncom, taucu, kecap, tempe bongkreng (an bongkreng poisoning), tempe gembus (okara tempeh), oncom ampas tahu (okara onchom), soysauce (kecap), and fermented fish products.

Tempeh is a good source of vitamin B-12 and of certain antibacterial agents. Certain minor legumes should also be used in preparing these traditional foods.

Table I shows the most important traditional fermented foods in Indonesia, with the name and type of product, organism used, substrate, nature of product (solid, liquid), and area of production and consumption. Address: Nutrition Unit Diponegoro, National Inst. for Health Research and Development, Ministry of Health, Jakarta, Indonesia.

2566. Lifespan Community Collective Ltd. 1982. Full of beans. Sheffield, England: Lifespan. 24 p. Illust. 21 cm. [1 ref]

• **Summary:** "This is a book about cooking pulses and beans," with several vegetarian recipes for each type. Contents: Introduction. Red kidney beans. Brown lentils. Soya beans. Chick peas. Butter beans [Lima beans]. Haricot beans. Red lentils. Field beans. Aduki beans. Split peas. Marrowfat peas. Black eye beans. Mung beans. Tofu or bean curd. Miso or bean paste. Bean sprouts.

Soya bean recipes: Soya and carrot pistou. Soya bean curry. Soya swede pie. The section on tofu describes "Tofu using soya beans" and "Tofu using soya flour. There is also a section on miso.

"Who we are: Lifespan is a workers' collective registered under Industrial & Provident Society rules. We live communally in two terraces of houses and share our work including childcare, domestic work, gardening, building maintenance, craft workshops and the printing business. We are part of a network of communities, seeking to provide an alternative lifestyle to the nuclear family, patriarchy and the nuclear state." Address: Townhead, Dunford Bridge, Sheffield S30 GT6, England. Phone: Barnsley (0226) 762359.

2567. McDonnell, Christine. 1982. Toad food & measles soup. New York, NY: The Dial Press. 111 p. Illust. by Diane de Groat. 20 cm.

• **Summary:** In this children's story, "toad food" and "measle soup" are Leo Nolan's words for tofu and miso soup (see p. 14-16). Though he (secretly) liked the first miso soup with tofu that his mother made and served as part of a new family experiment with vegetarian cooking, he quickly grew to dislike them, and to dread mealtimes. Leo liked hot dogs, hamburgers, french fries, and Coke. He had his troubles at school too. "In five funny, very real episodes mischievous Leo copes with many of the problems and insecurities that beset children today." A color illustration on the cover shows Leo seated at the table, looking wryly at a bowl of miso soup with cubes of tofu floating in it. A black-and-white illustration (p. 11) shows a bowl of miso soup.

2568. Mheen, T.I.; Kwon, T.W.; Lee, C.H. 1982. Traditional fermented food products in Korea. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 63-81. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [13 ref]
- **Summary:** Discusses and gives a flow sheet and nutritional analysis for the following fermented soybean products: Meju, kochujang (soybean paste with red pepper added), doenjang, kochujang. "According to the available old literatures, the history of soybean cultivation for food uses in the Orient dates back to 4,000–5,000 years ago in China, 2,000 years ago in Korea, and 1,000 years ago in Japan (KIST, 1970; Watanabe et al. 1971)." Address: 1-2. Korea Inst. of Science and Technology, Seoul, Korea; 3. Korea Univ., Seoul, Korea.
2569. Nagai, Masaki; Hashimoto, Tsutomu; Yanagawa, Hiroshi; Yokoyama, Hideaki; Minowa, Masumi. 1982. Relationship of diet to the incidence of esophageal and stomach cancer in Japan. *Nutrition and Cancer* 3(4):257-68. [8 ref. Eng]
- **Summary:** In a study of food intake in 1,040 Japanese households, consumption of tofu was negatively related to these two cancers—after adjustment for income, population ratio of census industry, and other dietary variables. Thus, high rates of tofu consumption were associated with low rates of these cancers. An inverse association between the consumption of miso soup and stomach cancer seen in women was not significant on multivariate analysis. Address: 1-3. Dep. of Public Health, Jichi Medical School, Tochigi-ken, Japan.
2570. Nagano Miso Co. 1982. JEPRON, a protein rich food raw material. Ueda city, Nagano prefecture. 8 p.
- **Summary:** Describes production using ethyl alcohol, and composition of the three types. Address: Nagano prefecture, Japan.
2571. Reddy, N.R.; Pierson, M.D.; Sathe, S.K.; Salunkhe, D.K. 1982. Legume-based fermented foods: Their preparation and nutritional quality. *CRC Critical Reviews in Food Science and Nutrition* 17(4):335-70. [125 ref]
- **Summary:** Contents: 1. Introduction. 2. Soy sauce. 3. Tempeh. 4. Meitauza. 5. Miso. 6. Natto. 7. Sufu. 8. Fermented soybean milk and other fermented legume milk products. 9. Kenima. 10. Oncom (fermented peanut press cake). 11. Waries. 12. Papadams. 13. Dhokla. 14. Khaman. 15. Idli. 16. Dawadawa. 17. Other legume-fermented foods. 18. Future of legume-based fermented foods. References. Nutritional composition is given. Address: 1-2. Virginia Polytechnic Inst. and State Univ., Blacksburg, Virginia; 3. Univ. of Arizona, Tucson; 4. Mahatma Phule Agricultural Univ., Rahuri, Maharashtra State, India.
2572. Reed, Gerald. ed. 1982. Prescott & Dunn's industrial microbiology. 4th ed. Westport, Connecticut: AVI Publishing Co. xii + 884 p. Illust. Index. 23 cm.
- **Summary:** Chapter 12 (p. 492-538; 129 refs.), by H.L. Wang and C.W. Hesseltine, is titled "Oriental Fermented Foods." It discusses: Soy sauce, miso, tempeh, ontjom, hamanatto (known as tou-shih in China, tao-si in the Philippines, and tao-tjo in the East Indies [No! Tao-tjo is Indonesian-style miso]), sufu (also called Chinese cheese or bean cake), natto, idli, ang-kak, fermented fish products (incl. nuoc-mam), absence of mycotoxin in fermented foods, summary. Address: Vice president, Amber Labs, Milwaukee, Wisconsin.
2573. Rose, Anthony H. ed. 1982. Fermented foods. *Economic Microbiology* 7:1-337. (New York: Academic Press, Inc.)
- **Summary:** Includes: 1. History and scientific basic of microbial activity of fermented foods by Anthony H. Rose. 2. Indigenous fermented foods by Ko Swan Djien. 3. Soy sauce and miso by Brian J.B. Wood. Address: School of Biological Sciences, Univ. of Bath, Claverton Down, Bath, BA2 7AY England.
2574. Saono, Jenny K.D.; Baba, T.; Matsuyama, A. 1982. Problems to be assessed for further development of traditional food fermentation in Indonesia. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 189-99. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [6 ref. Eng]
- **Summary:** Contents: Introduction. Tape. Brem wine. Brem cake. Palm wine and vinegar. Oncom. Tauco and kecap. Tempe bongkreng (which can cause fatal food poisoning). Concluding remarks.
Unconventional substrates for tempe, oncom, and kecap include winged beans, mungbeans, cowpeas, leucaena beans, faba beans, jack beans, sesban beans, and string beans. Address: Agricultural Products Processing Pilot Plant Project, JICA-FATEMETA, IPB, Bogor, Indonesia.
2575. Saono, S.; Winarno, F.G.; Karjadi, D. eds. 1982. Traditional food fermentation as industrial resources in ASCA countries. Jakarta, Indonesia: Indonesian Institute of Sciences (LIPI). xix + 259 p. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. No index. 28 cm.
- **Summary:** ASCA, the Association for Scientific Cooperation in Asia, was established in 1970. Each of the many interesting papers from this symposium that relates to soya is cited separately. Address: Indonesia.

2576. Sattilaro, Anthony J.; Monte, Tom. 1982. Recalled by life. Boston, Massachusetts: Houghton Mifflin Co. x + 223 p. No index. 22cm.

• **Summary:** “Four years ago, Dr. Sattilaro, President of the Methodist Hospital in Philadelphia, was dying of cancer. Today, after changing his lifestyle [primarily by adopting a macrobiotic diet], prescribed by Michio Kushi, he is totally free of this disease. Before this book was published, his remarkable story appeared in *Life Magazine* and the *Saturday Evening Post*, and he has told his story on television.” Address: M.D., Philadelphia.

2577. Shulman, Martha Rose. 1982. Fast vegetarian feasts. New York, NY: The Dial Press. 312 p. Illust. Index. 24 cm.

• **Summary:** This is a book of “delicious healthful meals in under 45 minutes. It is interested in protein complementarity with a low-fat diet. Soyfoods are used extensively. Wherever a heart symbol appears next to a recipe, it is acceptable for low-salt and low-fat dishes. The ingredients section (p. 13-18) discusses and defines soybeans (“the king of beans, as far as nutrients are concerned”), soy flakes, soy grits, miso, and tofu. “Tofu is my mainstay. It is a miracle food.” Savorex, Marmite, and Vegex are three different brand names for the same product, a yeast extract that comes in the form of a dark viscous paste.” Never cook soybeans in a pressure cooker. They tend to foam and clog the safety valve, which can cause an explosion.

Page 14 states: “Soy flakes: Soybeans that have been cooked, split, and dehydrated. Because they take only 30 minutes to cook and are as high in nutrients as soybeans, they are a perfect high-protein convenience food. Soy flakes can always be substituted in recipes for soybeans.

“Soy grits: Cracked soybeans. These are a nutritious addition to grain dishes (you can cook them along with the grains), have a nutty texture and taste, and take only 40 minutes to cook—another good convenience food.”

Soy-related recipes include: Tofu mayonnaise (p. 57). Tofu cream sauce. Tofu béchamel (p. 58). Morning tofu spread or evening pudding (p. 59). Roasted soybeans [dry roasted soynuts] (p. 60). Tamari-bouillon broth (p. 62). Instant tamari-bouillon broth (p. 63). Simple miso soup (p. 68-69). Miso soup with buckwheat noodles (p. 70).

One chapter is titled “Grains, legumes, tofu, and vegetables” (p. 91). Easy hiziki [hijiki] and squash dinner with soba and soy (flakes and tamari, p. 101). Brown rice “risotto” with soy flakes. Eggplant stuffed with rice and soy “risotto” or risi e bisi (p. 110). Fried rice and soy grits with vegetables (p. 114). Spicy eggplant miso sauté with bulgur. Purple cabbage, tofu, onions, and winter squash with miso (p. 125-26). Cabbage leaves stuffed with kasha, with creamy tofu sauce (p. 130). Tofu cutlets (p. 131). Chilled tofu with dipping sauces (p. 132). Teriyaki sauce (p. 133). Tahini-tamari sauce. Miso toppings for tofu and grains (adapted from *The Book of Miso*, p. 134-35). Tofu

vegetable curry (p. 136). Chinese-style tofu with vegetables and grains (p. 138-39). Tomato sauce with soy grits (p. 205). Tofu tomato sauce. Pasta with tofu cream sauce (p. 209). Pesto with miso (p. 217). Potato, tofu, and tomato tacos (p. 226). Tofu and poblano tacos (p. 228). Green tomato, corn, and tofu tacos (p. 230). Tofu mayonnaise (p. 237). Green tofu dressing (p. 238). Watercress, mushroom, and tofu salad (p. 252). Cottage cheese and tomato salad with miso dressing (p. 256). Tofu noodle kugel (p. 279).

Note: A revised 356-page edition was published in 1986. The author is now living in Paris (May 1985) and there is an added chapter of fish recipes. She has become “a more serious fish cook...” How can a vegetarian book contain a chapter of fish recipes? Address: Paris, France.

2578. Slamet, Dewi Sabita; Ubaidillah, -; Ganjar, Indrawati. 1982. Winged bean tauco. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 221-26. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [7 ref]

• **Summary:** Tempe is also discussed. Table I. Some biochemical changes occurring in the substrate during the winged bean tempe fermentation. Table II. The total nitrogen, amino nitrogen, total acids and soluble carbohydrates of winged bean tauco prior to the addition of the ingredients (two treatments at 20% or 24% salt). Table III. The organoleptic test of winged bean tauco prepared from 1 48 hour fermented tempe, brined in 20% NaCl (salt) for 15 days. Conclusion: Winged bean tauco is acceptable for consumption. Address: 1-2. Nutrition Research and Development Centre, Dep. of Health, Bogor, Indonesia; 3. Faculty of Mathematics and Natural Sciences, Univ. of Indonesia, Jakarta, Indonesia.

2579. Steinkraus, Keith H. 1982. The indigenous fermented foods. *Nestle Research News* 1980/81. p. 23-28. [19 ref]

• **Summary:** Contents: Introduction. Classification of indigenous food fermentations. Modern methods of introducing meat textures into vegetable substrates. Indigenous methods for introducing meat-like textures into vegetable substrates. Fermented foods involving development of meat-like flavor. Fermented foods involving an acid fermentation. Fermented foods involving an alcoholic fermentation. Germination (malting). Production of sweet/sour alcoholic pastes from high starch substrates. Leavened bread without the use of wheat. References. Contains many interesting color photos of indigenous fermented foods, some of them soy-based. Address: Prof. of Microbiology and Food Science, Inst. of Food Science, Cornell Univ., Geneva/Ithaca, New York.

Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 3-16. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [30 ref]

• **Summary:** Contents: Introduction. Production of meat-like flavours from vegetable proteins. Soysauce (Japanese Shoyu) and miso fermentation. Fish/shrimp sauces and pastes. The koji principle. Meat substitutes (analogues). Indonesian tempe kedele: Traditional tempe fermentation, industrial production of tempe. A process for raising the protein content of high starch substrate. Leavened bread-like foods without the use of wheat or rye. Coconut protein as an industrial resource. Summary. Address: Prof. of Microbiology, Inst. of Food Science, Cornell Univ., Geneva, New York 14456.

2582. Wang, H.L.; Hesseltine, C.W. 1982. Oriental fermented foods. In: G. Reed, ed. 1982. *Prescott & Dunn's Industrial Microbiology*, 4th ed. Westport, CT: AVI Publishing Co. xii + 883 p. See p. 492-538. Chap. 12. [129 ref]

• **Summary:** Contents: Introduction. Soy sauce. Miso. Tempeh. Ontjom. Hamanatto. Sufu. Natto. Idli. Ang-kak. Fermented fish products (esp. nuoc mam). Absence of mycotoxin in fermented foods. Summary. Address: NRRRC, Peoria, Illinois.

2583. Winarno, F.G. 1982. The nutritional potential of fermented foods in Indonesia. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 31-40. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [5 ref]

• **Summary:** Discusses tempe, tempe fish rice (TFR), oncom (onchom), tempe bongkreng (from coconut presscake), tempeh gembus (from okara), and tauco. Indonesian tempeh may contain 30 nanograms of vitamin B-12 per gm of tempe. If average daily consumption were 60 gm per person, tempeh would provide 60% of the daily requirement of B-12. In 1978, estimated annual tempe production in Indonesia was about 75,600 tons.

“Taucu is a very popular fermented food in Indonesia particularly for people who live in West Java. So far Taucu is utilized mainly as a seasoning and is used in vegetable soups, fish and meat, to enhance their flavour...”

“A study on the development of a ‘New Taucu Product’ is now being conducted at the Food Technology Development Centre, Bogor, to make Taucu a mass consumption product, by experimenting with different soup recipes to meet the Indonesian taste, both in the urban and rural population.” Address: Food Technology Development Centre, FATEMETA-IPB, Bogor, Indonesia.

2584. Yokotsuka, Tamotsu. 1982. Industrial application of proteinous fermented foods. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 145-80. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [130 ref]

• **Summary:** Contents: Introduction. Japanese shoyu: Koikuchi, usukuchi, tamari, shiro, saishikomi, fish-soy, JAS grades. The soysauce produced in other Oriental countries (Korea, Taiwan, Singapore, southern China; Inyu, tamari-style). Miso. Manufacture: Koikuchi shoyu (treatment of raw materials, koji making, mash making and aging, pressing of the mash, refining), tamari shoyu, miso. Some recent research and technological progress in shoyu and miso manufacturing: Whole and defatted soybeans as raw materials, treatment of raw materials, koji molds, koji making, control of mash, refining (pressing of the mash, pasteurization), product (colour, flavour, flavour components).

Tables: (1) Annual production of 5 different kinds of shoyu in Japan, and total, 1979. (2) Typical composition of 6 different kinds of shoyu (analyzed by Kikkoman Shoyu Co., Ltd., 1978). For each gives: Be (Baume), NaCl, total nitrogen, formol nitrogen, reducing sugars, alcohol %, and pH. (3) Composition of 7 types of typical Japanese miso (Ebine, 1980). (4) NK cooking method of soybeans as compared to the conventional method (Tateno and Umeda, 1955). (5) Chemical analyses of shoyu fermented from soybeans denatured by methanol and by conventional cooking (Yamaguchi, 1954). (6) Analysis of liquid part of shoyu mash after 40 days prepared from defatted soybean meal denatured by ethanol, isopropanol, or NK cooking (Fukushima and Mogi, 1955, 1957). (7) Effect of cooking conditions of soybeans on the enzymatic digestibility of protein (Yokotsuka et al., 1966). (8) Cooling speed and digestibility of protein. (9) Fraction of proteases produced by *Aspergillus sojae* through Sephadex G-100 (Nakadai, 1977). (10) Changes of viable counts of yeast in shoyu mash (Mogi Keitaro et al., 1968).

Figures: (1) Flow sheet—Koikuchi shoyu fermentation. (2) Flow sheet—Miso fermentation. (3) Cross-sectional illustration—Continuous soybean cooker: Screw type and net

conveyor type. (4) Temperature change of materials during koji cultivation by the conventional method using wooden trays (Shibuya, 1969). (5) Koji cultivation at 25°C (Haga et al., 1967). (6) Preferable temperature change of the materials during 3-day koji cultivation (Haga et al., 1967). (7) Temperature change of the materials during mechanical koji cultivation with a through-flow system of aeration during 3 days (Shibuya, 1969). (8) Temperature change of the materials during mechanical koji cultivation with a through-flow system of aeration during 4 days (Shibuya, 1969). (9) Koji culturing machines with a through-flow system of aeration: Rectangular type, circular type (batch), circular type (continuous). Address: Kikkoman Corp., Noda-shi, Chiba-ken, Japan.

2585. Yoneda, Soei; Hoshino, Koei; Schuefftan, Kim. 1982. Good food from a Japanese temple. Tokyo, New York, and San Francisco: Kodansha International. 224 p. Illust. Index. 27 cm.

• **Summary:** An outstanding, beautiful book, the best seen to date on Buddhist Vegetarian Cookery (*shojin ryori*)—after you get past the poor, almost embarrassing introduction, written by Robert Farrar Capon of New York. The author, Sōei Yoneda, is a great Zen Abbess and cook, and a visit to Sankō-in, a Rinzaï nunnery, is an unforgettable experience. The recipes are arranged by season: Spring, summer, autumn, winter, all seasons. For every recipe, both a Japanese and an English-language name are given. Soy-related recipes include: Soybean rice (*mame gohan*, p. 73). Unohana rice (with fried okara, p. 75). Thick-rolled sushi (with dried-frozen tofu, p. 75). Tofu rice (p. 80). Soy bean dashi (p. 82). Miso soups (p. 85-88; 14 recipes, one for each month but two for Jan. 1 and 2—White miso Ozoni and Zen temple ozoni—and one for all seasons—Saké lees soup). Pickling with miso (p. 89). Rape blossoms with miso-mustard dressing (p. 93). Bamboo shoots with vinegar-miso dressing (p. 98-99). Quick oden (with tofu, p. 107-08). Green beans with miso dressing (p. 113-14). Eggplant with miso sauce (p. 123). Zucchini with sesame-miso sauce (p. 129). Steamed zucchini with three-color miso (p. 130-31). Jade nuggets (*kizami nattō no ao-jiso age*, p. 136). Pine cones (*matsukasa*, with tofu, p. 151). Miso-pickled vinegared konbu kelp (p. 153). Crisp turnip with sesame-miso dressing (p. 158). Amazake (p. 162). Daikon with miso sauce (*daikon oden*, p. 170). Brussels sprouts with miso sauce (p. 179-80). Dried-frozen tofu mélange (p. 181-82). Not exactly hamburger (“patties” with dried-frozen tofu and okara, p. 182). Simmered dried-frozen tofu (p. 182-83). Dried-frozen tofu tempura (p. 183). Konnyaku in miso dressing (p. 184). Fried unohana (*iri unohana*, with thin deep-fried tofu and okara, p. 187; “The mash or lees (*okara*) remaining after making tofu are inexpensive, plentiful, and nourishing—ideal everyday temple food. By itself *okara* is not interesting, but it is brought to life by the addition of a

little oil and a few other ingredients”). Inari-zushi (p. 189-90). Grilled usuage (with thin deep-fried tofu, p. 190). Deep-fried usuage (p. 190-91). Golden sushi rolls (with usuage, p. 191). Rōbai (Sanko-in fresh wheat gluten, p. 192-93). Deep-fried dried yuba (p. 195). Fried and simmered dried yuba (p. 196). Sesame “tofu” (with kuzu, p. 196-99). Almond tofu (p. 202). Salt-grilled tofu (from old Naniwa, today’s Osaka, p. 203-04). Steamed tofu loaf (p. 206). Salad with white [tofu] dressing (*shira ae*, p. 206-07). Steamed tofu cup (*otōfu no chawan mushi*, p. 208). Deep-fried tofu in thick sauce (p. 209). Tofu sauté (*yaki-dofu no atsuyaki*, p. 213). Bean flowers (*nattō no mochi gurumi*, p. 215). Buckwheat-miso topping (p. 215-16). Miso mayonnaise (with sweet white Saikyo miso, p. 216-17). Contains 17 pages of color photos showing dishes prepared from recipes in this book. The 510 delicate illustrations (both line drawings and simple brush paintings) clarify and enhance the text throughout.

In 1987 this book was re-issued with a new title: The Heart of Zen Cuisine: A 600-year Tradition of Vegetarian Cookery. Address: 1. Abbess, Sanko-in Zen temple, Honcho 3-1-36, Koganei-shi, West Tokyo (Musashi Koganei Station).

2586. **Product Name:** Meiji Seifun Miso [Mugi, or Kome]. **Manufacturer’s Name:** Chico-San, Inc. (Importer). Made in Japan. **Manufacturer’s Address:** P.O. Box 810, Chico, CA 95927.

Date of Introduction: 1982?

New Product–Documentation: Crackerbarrel. 1983. Jan. No. 1. p. 1. And Crackerbarrel. 1983. April. p. 5. Meiji Seifun is in Hiroshima.

2587. Desert Gardens. 1982? New soyfoods restaurant or deli. 702 Main St., Safford, AZ 85546.

• **Summary:** Menu sent by owner Katerina Lewis about 1982. “One of our main staples is tofu...” Soy-related recipes include—Appetizers: Eggless salad (with tofu), Brazilian bean dip (with tofu), French onion dip (with tofu & miso), California guacamole (with tofu). Side dishes: Potato tofu knish, Chili beans & tofu, Baked potatoes (with tofu sour cream), Tofu pizza. Deli: Tofu cottage cheese, Soy sour cream, Tofu cream cheese. Entrees: Sicilian eggplant Parmesan (with tofu), Tofu & fresh vegetable saute, The combo (featuring breaded tofu cutlets). Sandwiches: Tofuburger with millet, Sizzling tofu, Guacamole, Tofagel (tofu, sprouts, and tomato on a toasted bagel). Beverages: Soy milk, Soy shakes. Desserts: Tofu cheesecake. Soybean ice cream. Address: Safford, Arizona. Phone: 428-5132.

2588. **Product Name:** Brown Rice Miso, Barley Miso, Soybean Miso (Aged 1 Year).

Manufacturer’s Name: Full of Beans Wholefoods.

Manufacturer's Address: 97 High St., Lewes, East Sussex, BN7 1XH, England. Phone: 079-16-2627.

Date of Introduction: 1982?

New Product–Documentation: Form filled out by John and Sarah Gosling. ca. 1982. They started in Aug. 1978. Now make tofu, soy milk, and three types of miso.

2589. Belleme, John. 1983. Re: Developing new products at American Miso Co. Letter to William Shurtleff at Soyfoods Center, Jan. 6. 1 p. Typed, without signature or letterhead.

• **Summary:** John is developing three new types of miso: (1) Traditional red miso (with less salt and more koji than the aka-miso currently imported from Sendai Miso-Shoyu under the Johsen brand). (2) Mellow barley miso (unpasteurized, it should be refrigerated for long-term storage). (3) Mellow White Miso (unpasteurized, it should be refrigerated for long-term storage). He sends a sample of each and asks for comments. Address: Route 3, Box 541, Rutherfordton, North Carolina. Phone: (704) 287-2940.

2590. Kennedy, J. Robert. 1983. History of Chico-San and macrobiotics in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Jan. 6. 2 p. transcript.

• **Summary:** Discusses rice cake production, George Ohsawa, Paul Hawken, Michio Kushi, early relationship with Erewhon and Lundberg Brothers (rice farmers). Kennedy and his group came to California for two reasons: brown rice and nuclear safety. They started to make rice syrup (amé) in 1972. Future plans to make miso and shoyu in America. Chico-San first imported miso from Ohsawa, himself, in Tokyo starting in 1961. Herman Aihara in New York ordered 2-3 shipments. Then they started to order from Muso Shokuhin. Address: Chico, California.

2591. Sheraton, Mimi. 1983. Restaurants: Japanese fare for theater nights. *New York Times*. Jan. 14. p. C18.

• **Summary:** This is a review of Sushiko, a Japanese restaurant at 231 West 55th St., between Broadway and Eighth Ave. in New York City. They sell: “fried half-eggplant mellowed with miso sauce, topped with sesame seeds; soybean cakes [tofu] in seaweed soup with vegetables; oshitashi [o-shitashi, o-hitashi], a salad of marinated spinach with soy sauce and crunchy flakes of dried bonito, and natto, winy, fermented soybeans in an egg and scallion sauce.”

And “zaru soba, cold buckwheat noodles with soy sauce, horseradish and scallions were refreshing.” “Broiled fish, meats and poultry, done teriyaki-style are stringy and less interesting...”

2592. Gevaert, Pierre. 1983. Re: Making miso, tofu, and soy sauce in Europe. Questions answered on Soyfoods Center letterhead (26 Jan 1983) and returned to SC. 1 p.

• **Summary:** Q1. Are you now making soy sauce (shoyu or tamari) in Both Belgium and France? Please give the address and phone numbers of each plant where you are making soy sauce. When did you start making soy sauce in France?

Ans1. We will finally start making shoyu in April 1982, only in France. At Lima-Andiran, 47170 Mezin, France. Tel. 5365 1002. Lima is presently making miso at their plant in Mezin.

Q2. Do you make miso at your plant at Sint-Martens-Latem? Ans2. No.

Q3. Are you making tofu, yourselves, anywhere in Europe or is it made for you by other companies? Ans3. Jonathan at Antwerp, Belgium, makes it for us using our organic soybeans.

Q4. Can you tell me (if it is not a secret) roughly how much of the following in metric tons you produced in 1892? Ans4. Soy sauce 0. Miso 5 tons. Tofu 2/3 tons. Address: Lima Foods, Edgar Gevaertdreef 10, Sint-Martens-Latem 9830, Belgium. Phone: 09-52-4176.

2593. Hughes Markets; El Rancho Markets. 1983. Hughes Markets ham and egg sale! (Ad). *Los Angeles Times*. Jan. 27. p. J34.

• **Summary:** The section titled “Foods of the Orient—in our fresh produce dept.” includes: “19-oz. Pkg. Hinode Tofu—59¢. Ramen noodles... Yamaizumi Miso—16-oz. cup Soy Bean Paste—\$1.19. Morinaga Tofu—10 oz. Pkg. Soy Bean Curd—47¢.”

2594. Arasaki, Seibin; Arasaki, Teruko. 1983. Vegetables from the sea: Low calorie, high nutrition, to help you look and feel better. Tokyo: Japan Publications. 196 p. Illust. (color plates and line drawings). Index. Jan. 26 cm. [Eng]

• **Summary:** This is probably the best English-language book written about sea vegetables. Contents: Preface. Part I: General information. Introduction. 1. In the human diet: In general, in Japan. 2. Dietary and medical applications: Chemical composition (polysaccharides, proteins, amino acids and peptides, fats and lipids, vitamins, minerals, nutritional value, pigments), flavor and taste (specific Japanese seaweeds as foods), medical applications (antilipemic and blood-cholesterol reducing substances, blood anticoagulants, antitumoral {anti-cancer} effects, antibiotics, toxic compounds, medical uses of alginate), folk medicine, thalassotherapy and algotherapy, longevity. 3. Biology of the algae: Differences, pigment systems, photosynthetic products and storage substances, land and marine vegetation, life-spans and seasonality, generation alterations. 4. Harvesting and farming: General (Monostroma and Enteromorpha), brown algae (Laminariales and Undaria, artificial cultivation), red algae (Porphyra, Euclima and Gelidium), freshwater algae. 5. Processing and preserving: General, amanori and aonori,

green algae (*Caulerpa*, sea grapes), brown algae (wakame, kombu, arame and hijiki, mozuku), red algae, nostoc freshwater algae, domestic algae. 6. Illustrations of major sea vegetables.

Part II: Cooking with sea vegetables. Kombu (*Laminaria*). Wakame (*Undaria pinnatifida*) and Matsumo (*Analipus japonicus*). Hijiki (*Hizikia fusiforme*). Arame (*Eisenia bicyclis*). Asakusa nori (*Porphyra tenera*). Tosakanori (*Meristotheca papulosa*). Kanten (*Agar*). Green laver (*Enteromorpha*).

Index of scientific names of sea vegetables. Index of Japanese names of sea vegetables. List of recipes. Address: 1. Prof. and lecturer on Fisheries Botany and Marine Ecology, Univ. of Tokyo and Nihon Univ., Japan; 2. Prof. Kobe-Yamate Women's College, Lab. of Biochemistry.

2595. **Product Name:** Yamaki Organic Miso [Hatcho, Mugi, or Genmai], and Yamaki Organic Soy Sauce. **Manufacturer's Name:** Chico-San, Inc. (Importer). Made in Japan. **Manufacturer's Address:** P.O. Box 810, Chico, CA 95927.

Date of Introduction: 1983. January.

New Product–Documentation: Crackerbarrel. 1983. Jan. No. 1. p. 1. "Our new line of organic imports. Long awaited soy sauce and miso from organically grown ingredients introduced... The Yamaki Co. [Yamaki Jôzo], owned by Tomio Kitani, contracts directly with family farmers for his organically grown grains. Yamaki miso is unpasteurized. The organic soy sauce has 16.9% salt."

Note: The Yamaki Co. is located in Kamiizumi-mura, about 75 miles from Tokyo, Japan.

2596. Kennedy, Robert. 1983. A message from our president [History of Chico-San]. *Crackerbarrel (Chico, California)* 1(1):2. Jan.

• **Summary:** This article, which gives a brief history of Chico-San, Inc., is in the first issue of a new Chico-San newsletter. Also includes an articles on imports from Japan and winter recipes using miso and soy sauce.

Chico-San was incorporated in March 1962. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

2597. Mountain Ark Trading Company. 1983. Catalog–Jan. 1983 [Mail order]. 109 South East St., Fayetteville, AR 72701. 30 p. 27 cm.

• **Summary:** This is a mail order catalog for macrobiotic whole foods, specialty cookware, cookbooks and books on natural healing, futons, furniture, etc. A detailed description of each product is given. The owners of the company are Frank & Phyllis Head, Tom & Toby Monte, Bill & Carol Tims, and Joel & Wendy Wollner.

Concerning seitan and *fu*, we read (p. 34): "Seitan 'Wheat Meat' Condiment–Chewy chunks of wheat gluten

simmered in a savory broth of shoyu and ginger. Rich, meaty flavor. A very concentrated food: 100% wheat protein. Ready to eat or add to a favorite recipe. How about Seitan and Tofu Stew! Sweet and Sour Seitan! Seitan in Split Pea Soup! \$2.95 per 3.5 oz. jar (not incl. shipping cost). Note: This seitan was made in Japan.

"'Fu' Wheat Gluten–Steamed and dried cakes of nutritious wheat gluten, extremely light, simple to serve and easy to digest. Fu's light chewy texture and subtle wheat flavor adds new life to your cooking–and, with the greatest of ease. Soak briefly and add to your favorite recipe. Goes well with all foods. Soups. Stews. Beans. Vegetables. Sifted wheat fu rings \$1.25 per pkg. of 12. Sifted wheat fu sheets \$1.85 per pkg. of 5. Whole wheat fu rings \$1.75 per pkg. of 12." Address: Fayetteville, Arkansas. Phone: 501-442-7191.

2598. Hattori, Terumitsu. 1983. The soy sauce / shoyu industry in the United States (Interview). *SoyaScan Notes*. Feb. 4. Conducted by William Shurtleff of Soyfoods Center. • **Summary:** The production of soy sauce in the United States has been growing (on average) at 7-8% a year since about 1970, and Kikkoman production has been growing at 13% a year during that same period.

Kikkoman presently makes 20,000 kl (kiloliters) a year; estimated total U.S. production (fermented + HVP) is 40,000 kl/year. Imports of soy sauce to the USA are 10,000+ kl/year. Thus in 1982 total US consumption was 50,000 kl (58,750 metric tons) per year. Kikkoman produced about 50% of the soy sauce made in the USA; this was 40% of total U.S. consumption.

In Feb. 1983 U.S. per capita consumption was 216.1 ml = 253.9 gm = 14.65 tablespoons of shoyu.

Conversion figures–Relative density: (1) Regular shoyu: 1.17 to 1.18 (so 1 gallon weighs 9.8 lb). (2) Milder shoyu: 1.13 to 1.14. Usukuchi shoyu (20% salt): 1.19 to 1.20. 1 million gallons = 3.785 million liters = 3.785 kiloliters. 1 kiloliter = 264.18 U.S. gallons = 2,200.6 lbs of water.

Note: Comparing this with miso. In Sept. 1981 total U.S. miso consumption (production + imports) was 1,500 metric tons. This is only 2.5% as much as U.S. soy sauce consumption. So per capital U.S. miso consumption = 6.34 gm/year = 1.1 tablespoons per year. 1 level tablespoon of miso weighs 17.3 gm. 1 level teaspoon of miso weighs 5.76 gm. 1 tablespoon of regular shoyu weighs 17.33 gm. Address: Kikkoman International Inc., 50 California St. #3600, San Francisco, CA 94111. Phone: 415-956-7750.

2599. Elwell, Christian. 1983. Work with miso in America (Interview). *SoyaScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Thom Leonard plans to go to southern Ireland in the spring of 1983 with his wife, Derbhail (pronounced der-VAL) to set up a miso shop. They were married in

August 1981. Thom's wife's father is an important Irish politician.

Ask Charles Kendall about early Caucasian miso makers; he is in Ashburnham, Massachusetts.

Ira Leviton took a lot of photos while he was at the Elwell's researching an article about miso. Christian will send Shurtleff color slides; Shurtleff will pay the cost of reproducing and shipping.

Christian has now harvested "mellow corn miso," made using yellow Longfellow flint corn as the grain. He cooked the corn in water with ash and lime to dissolve the outer skin. He can make 2,400 lb/week of miso, and he plans to do six such cycles [good name] more. Next year he hopes to do 20 cycles. He is shooting for 48,000 pounds of miso production and sales a year. He has found the book *Miso Production*, by Shurtleff and Aoyagi to be "extremely helpful." Address: Conway, Massachusetts.

2600. Hawken, Paul. 1983. Erewhon and miso in America (Interview). *SoyaScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the early days, the first Erewhon retail store (located downstairs) got miso from Infinity (in New York City), Chico-san, and perhaps a little from Lima in Belgium, plus Hatcho miso from a Japanese trading company (perhaps JFC or Nishimoto).

Paul doesn't know of any early Caucasian miso makers. Address: California.

2601. Kushi, Aveline. 1983. Miso in Boston (Interview). *SoyaScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Aveline thinks Junsei Yamazaki made miso in New York then brought it to Cambridge before the group went to Chico, California. Best to ask him. Aveline and others called Yamazaki to ask him to come to Cambridge to make miso there; he came and made miso and rice cakes, then he brought the things [such as miso] he had made elsewhere. She can't remember where; it could have been, either Cambridge or New York—probably New York.

Aveline does not remember who the first Caucasian to make miso in America was. But in about 1973 Aveline held some informal miso-making classes for those interested in doing so. They brought ready-made store-bought koji and made miso using that koji. She held these classes in several places. At each class they made about 1 keg = 18 liters. They also made mochi.

Aveline always calls George Ohsawa "Sakurazawa sensei." Important.

In about 1978-79, after Aveline's book *How to Cook with Miso* was published [in Dec. 1978], Yamazaki came to Boston to teach koji-making. Address: Brookline, Massachusetts.

2602. Leonard, Thom. 1983. Pioneering work with miso in America (Interview). *SoyaScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the fall of 1974, Thom Leonard made his first batch of barley koji and barley miso using a recipe in Herman Aihara's new book titled *Soybean Diet*. The 80-pound batch of miso was aged in a soy sauce keg from Hong Kong. He then made 80-pound batches of chunky wheat miso in the fall of 1975 (he later pickled tofu in it) and of barley miso in early 1976. After moving to Fayetteville, Arkansas, he and Jim Hemminger made larger scale miso equipment and on 15 April 1977 packed their first 35-gallon cedar vat with brown-rice miso. Soon over 1,000 lb were aging in the vats. This miso was sold to and distributed by the Ozark Cooperative Warehouse.

Thom and Richard Kluding founded the first Caucasian-run miso company in North America, Ohio Miso Co. in Monroeville, Ohio. They began production on 13 March 1979. By Jan. 1980 Ohio Miso was making several varieties of miso: brown rice, barley (one or two year), mellow brown rice, mellow red, and black soybean; output was 2,400 lb/week.

Then in the spring of 1980 Leonard and Kluding split up, largely because of interpersonal problems. In the summer of 1980 Leonard taught miso classes at the macrobiotic Spiral Inn and Moniteau Farm in Missouri. Then in late 1980 he taught 2 classes on making miso, natto, tofu, and tempeh at the Kushi Institute in Boston, Massachusetts, with 30-40 people per class. In 1981 and 1982 he taught 8 similar classes out of his home in Boston, plus four 3-day residential workshops on the same subjects. All were sold out every time. In 1983 he plans to travel Ireland to start a miso plant in County Kilkenny. Friends of his own several old buildings. The Irish government will help pay startup costs, covering 45% of the required startup capital plus 25% of the rent for the first 5 years. He hopes to be start in July 1983 and be producing miso by late 1983. He hopes to make 100,000 to 200,000 pounds of mostly barley miso, both mellow barley and 12-24 month barley miso. Thom's constitution is so yang that he can't eat much miso—which is also very yang. But this week he enjoyed miso soup twice, which is more than he has had for the past year.

Note: Thom and his wife went to Ireland but they never started a miso plant or commercial miso production there. Address: Brookline, Massachusetts.

2603. Root, Evan. 1983. Miso in Boston (Interview). *SoyaScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** When Evan arrived in Boston in March 1966, there were three 18-liter kegs in the Kushi basement containing aging miso that had been made by Junsei

Yamazaki. Evan is not sure when Junsei made them, but probably on the East Coast.

He can't remember any early people making miso. Now Thom Leonard is teaching miso-making classes at the Kushi Institute and Christian Elwell is making miso on his own. It seems to Evan like lots of people are doing it now. Address: Brookline, Massachusetts.

2604. Yamazaki, Junsei. 1983. Work with miso and macrobiotics in America (Interview). *SoyaScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Junsei arrived in the U.S. in May 1963. He first went to Chico, California, to help with the installation of small rice cake machines. After the July 1963 summer camp at French Meadows, California, he went to New York, arriving in August. Initially, he did nothing with soyfoods in New York. But there was a group in New York, composed of a woman or women; he can't recall the name. It was not Irma Paule, but rather some woman whose husband had died in a car accident. They asked him to teach them how to make miso, and he taught her how to make miso.

Initially Herman Aihara (pronounced AI-ha-ra) had to work as a guard to earn money in Chico; the macrobiotic group in Chico had no income. Some group raised money for him to do something in New York or Chico.

In about Nov. 1963 Michio Kushi opened the Genpei restaurant on the first floor of the Diamond Jim Building on 46th Street in New York City. In the basement Junsei made koji, then about 100 pounds of miso. He showed the process to a Caucasian woman and child. The miso was not used in the restaurant. Junsei took it to Boston, where it was used by Michio and Aveline Kushi themselves.

In March 1964 Junsei went to Chico-san in Chico, California. While making rice cakes there, he made miso in the interim. Starting in about 1965, when Chico moved to a bigger place, he made about 20 whiskey barrels full of miso; each barrel held 320 lbs of miso. He did not really teach miso making to anyone. The real teacher among macrobiotics was Mr. Muramoto.

In Boston, Erewhon wanted to make miso within their building. They asked Yamazaki to tell them the best place, so he went to Boston. He did not teach any classes to students then, unlike what Aveline recalled.

In 1980 Junsei and his wife bought land in Orland, in northern California (Zip code 95963). He wants to make miso using good ingredients, either cooperatively or in individual homes. He is now working as a guard for a construction firm. He also wants to grow ume plum trees for making umeboshi [salt plums]; he tried this in Washington state but failed. Address: Orland, California.

2605. Kendall, Charles. 1983. Early work making miso in America (Interview). *SoyaScan Notes*. Feb. 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In about 1974 Charlie heard that someone up at Erewhon Farms in New Hampshire, a macrobiotic community, had made miso. That person was part of a group of people who tried to start a farm in New Hampshire. In 1976 Charles made a batch of miso at home using ready-made store-bought koji and following instructions from one of Michio Kushi's lectures.

Note: At Tassajara Zen Mountain Center (in the Santa Lucia Mountains, California), we made miso long before 1974. The method was transmitted by Zen priests from Japan. Ask Loring Palmer and Ed Brown for more details. Address: Ashburnham, Massachusetts.

2606. Palmer, Loring. 1983. How to make the "bean revolution" succeed in America. Miso making at Tassajara (Interview). *SoyaScan Notes*. Feb. 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** If the "bean revolution" is ever to succeed in American, we must learn the Julia Child method for getting rid of the flatulence-causing substances in beans. Loring learned this from someone at the Minneapolis, Zen Center (Minnesota), and it may also be in her book on beans.

Soak the beans in 10 times their volume of water. Then bring to a boil. Allow to cool and discard the water. Again add the same amount of water, cook the beans as required, then discard the cooking water again. Serve the beans. Since flatulence factors or oligosaccharides are water-soluble sugars, most will dissolve in the water and be discarded with it. This method can also be used in cooking the soybeans for miso.

Loring has no memories of making miso at Zen Mountain Center at Tassajara in the Santa Lucia Mountains; he was in San Francisco when we made miso at Tassajara. In 1972 Loring made miso from ready-made koji, a process he learned from Herman Aihara. Address: Boulderado Hotel, Boulder, Colorado.

2607. Rankin, Blake. 1983. Early work making miso in America (Interview). *SoyaScan Notes*. Feb. 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In late 1975 and early 1976 George Gearhardt taught a number of miso classes on the West Coast; Blake did not. But George Gearhardt and Blake made miso back in 1974-75, after Blake returned from a trip to Japan. The maximum in the works was 500 pounds—back in the days when they owned Janus Natural Foods, in Seattle. In early 1974 they made a number of small batches, then when those turned out well they made a number of larger batches at Janus. They made barley miso first using bulk dried koji from Japan, but for big batches, in 1975, he had redwood koji boxes made and they made koji themselves, using Janus' kitchen. At the end of 1975, when doing a 30-day koji run he did informal classes inviting 6 people from the Seattle Zen Center. A single big batch was 40-50 pounds;

then some people in the Zen center made miso using the groups koji. Blake also made miso using eastern Washington soft white wheat.

How did Blake learn to make miso? Probably from notes he had taken in Japan while visiting miso plants there—plus (maybe) Herman Aihara's books and maybe some comments from Junsei Yamazaki. His notes alone would not have been detailed enough. Blake does not know of any Caucasians who made miso in the USA before he did. The only person he knows who made miso in the USA before he did is Junsei Yamazaki.

Blake lost all his notes at the time of Janus' bankruptcy. When Blake returned from Japan at the end of the 1970s, the miso was all gone.

Blake does not know where George Gearhardt is now—probably in Spokane or Seattle. Cooking classes at the Federal Way Natural Food Store. He imports Taiwan tatamis for \$72 each plus shipping. Blake left in Aug. or Sept. to go to Japan. George moves a lot. Address: Washington state.

2608. Arikawa, Minoru. 1983. Work with miso in America (Interview). *SoyaScan Notes*. Feb. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The Norio Company was started in 1919 by Mr. Masaichi Norio in San Francisco, at 1531 Geary St. He made only *shiro miso* (probably sweet white, mellow white, or light yellow miso) and exported most of it to Hawaii. In about 1932 the company was moved to 1532 Post St., on the outskirts of San Francisco's Japan-town. There it was run by Mr. and Mrs. Minoru Arikawa and son, who were relatives of the founder. The U.S. government forced the family to close the business (then making about 180,000 lb of miso a year) when World War II started in late 1941. They resumed after the War but retired in 1972 and the business was closed to make room for a high-rise condominium.

In 1941 Fujimoto was the biggest miso maker in the continental USA. He thinks there were three miso manufacturing companies in the continental USA, all on the West Coast.

He thinks Yamaizumi was started in Los Angeles in the 1930s, probably by a man from Fukuoka. He thinks Yamaizumi was both the company name and the brand name. Address: San Francisco, California. Phone: 415-387-7217.

2609. Milbury, Peter. 1983. Chico-San, miso, and soy sauce (Interview). *SoyaScan Notes*. Feb. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bob Kennedy thinks that Junsei Yamazaki made a total of 20 barrels of miso from 1965 to 1972. Only 3-4 were in the building that was burned down by the fire at Chico-San. The rest came to maturity and were mixed with imported miso. Mr. Yamazaki also made about 3 barrels of fermented shoyu (soy sauce) at Chico-San in about 1965.

Chico-San feels that SANA (Soyfoods Assoc. of North America) should establish soy sauce terminology, standards, and an analysis program. Importers could help set it up to protect themselves.

Mr. Kitani is Chico-San's advisor for fermented soyfoods. He is a manufacturer in Japan. Chico-San now has a four-stage plan to make miso and shoyu in Chico. 1. Import bulk miso from Mr. Kitani and let it age in Chico. Adjust the ambient temperature by opening and closing doors and windows. 2. Make miso in Chico using koji imported from Japan under refrigeration. 3. Make koji in Chico. 4. Make shoyu in Chico. Address: Chico-San, Chico, California.

2610. Milbury, Peter. 1983. Junsei Yamazaki's work with miso and shoyu at Chico-San. Work of Mr. Kitani. (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 17. ½ p. transcript.

• **Summary:** Bob Kennedy thinks Mr. Yamazaki made a total of 20 barrels of miso from 1965 to 1972. Only 3 to 4 were destroyed by the fire. The rest came to maturity and was mixed with imported miso. Mr. Yamazaki also made about 3 barrels of fermented soy sauce at Chico-San—in about 1965.

Peter believes SANA should develop soy sauce terminology, standards, and analysis techniques. Importers would use these to protect themselves.

Mr. Kitani, as manufacturer, is Chico-San's fermented foods advisor. Chico-San now has a four-stage plan to make miso and shoyu. 1. Import bulk miso from Mr. Kitani and let it age in Chico. Adjust the ambient temperature by opening and closing doors and windows. 2. Make miso in Chico using koji imported from Japan under refrigeration. 3. Make koji in Chico. 4. Make shoyu in Chico. Address: Chico-San Inc., P.O. Box 810, 1264 Humboldt Ave., Chico, California 95927.

2611. Shurtleff, William; Aoyagi, Akiko. 1983. History of miso and soybean jiang. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 82 p. Feb. 21. Unpublished typescript.

• **Summary:** A comprehensive history of the subject. Contents: Introduction. Etymology. Part I: History of soybean jiang in China. Early Chinese non-soybean jiang. Early Chinese soybean jiang (100 B.C. to 599 A.D.). 600 to 1899. The Twentieth Century. Part II: History of soybean jiang/jang in Korea and Southeast Asia. Dissemination of jiang from China. Korea. Indonesia. Vietnam. Malaysia. Part III: History of miso in Japan. Introduction; origins not clear. Early non-soybean hishios (before 700 A.D.). The Nara period (710-784 A.D.); Ganjin 754. The Heian period (794-1160 A.D.). The Kamakura period (1185-1333). The Muromachi period (1336-1568). The Edo or Tokugawa period (1603-1867). The Meiji and pre-war periods (1867-1940). The postwar period, modern times (1941-1982). Part

IV: History of miso in Europe. Early European references (1597-1899). 1900-1949. 1950-1982. Part V: History of miso in the United States and Canada. Early developments (1896-1929). 1930-1959. Growth of interest in miso (1960-1982). Part VI: History of miso in other countries. India. Israel. Latin America. Address: Lafayette, California. Phone: 415-283-2991.

2612. Ebine, Hideo. 1983. Re: Dipicolinic acid and retirement from the National Foods Research Institute, Japan. Letter to William Shurtleff at Soyfoods Center, Feb. 22. 1 p. Typed, with signature. [Eng]

• **Summary:** Note: *The Book of Miso*, by Shurtleff and Aoyagi (1976) states (p. 26): "In 1972, a number of Japanese scientists doing agricultural research stimulated by Dr. [Shinichiro] Akizuki's writings discovered a substance in miso which they called Zybicolin. Produced by miso and natto yeasts, it has the ability to attract, absorb, and discharge from the body radioactive elements such as strontium. The discovery received front-page coverage in all of Japan's major newspapers." Yet Shurtleff never cited the actual article—in part because he learned of it just as *The Book of Miso* was about to go to press.

Director Ebine has tried to locate the article mentioned above but has not been able to find it—and he has never heard of it, although he has long been a miso research scientist. Zybicolin is probably "dipicolinic acid," which is found in miso and natto. and which has a strong combining activity to minerals including radioactive minerals such as strontium.

Ebine retired from the National Food Research Institute (NFRI) in March 1982 and immediately (in April 1982) began his present work as director of the Central Miso Research Institute. Address: Director, Central Miso Research Inst., Shinkawa 1-24-19, Chuo-ku, Tokyo 104, Japan.

2613. Nasuno, Seiichi. 1983. Re: N-nitroso compounds and nitrosamines in Japanese fermented soyfoods. Letter to William Shurtleff at Soyfoods Center, Feb. 23—in reply to inquiry. 2 p. [5 ref. Eng]

• **Summary:** "We have an official certificate from the National Institute of Health (NIH) of Japan to certify that the regular Kikkoman soy sauce is free from volatile nitrosamines on the basis of the examination of volatile N-nitroso compounds in a soy sauce product performed on January 23, 1978, at the NIH of Japan.

"The test was performed by a Shimadzu gas chromatograph equipped with an alkali-flame ionization detector and minimum detection limit for N-nitrosodimethylamine was 0.1 ng (1 ppb in soy sauce)."

"Nitrosamines are reaction products of nitrite and amines. Very small amounts of nitrite and amines were found in cereals such as rice, wheat and soybeans used as

raw materials for miso and shoyu making. Moreover, amino acids in shoyu competitively inhibit nitrosamines formation from nitrite and amines."

"In conclusion, we feel that the problem of nitrosamines in miso and shoyu is not serious and that miso and shoyu are quite safe in the viewpoint of cancer risks." Note: Five references are cited in the letter to document each point. Address: Director, Bioscience Lab., Kikkoman Corp., Central Research Laboratories, 399-Noda, Noda-Shi, Chiba-ken, Japan. Phone: 0471-24-1111.

2614. Pantry Supermarkets. 1983. Double coupons! (Ad). *Los Angeles Times*. Feb. 24. p. SG3.

• **Summary:** The section titled "Oriental foods" states: "Hinode natto (steamed soybeans) 5 oz.—49¢. Hinode Japanese tofu 19 oz.—59¢. Hinode kinugoshi tofu 12 oz.—59¢. Hinode Chinese tofu 20 oz. 59¢. Sisco koji miso 1 lb.—\$1.25. Kokuho Rose rice 15 lb. bag—\$7.99."

Note: The Pantry has 11 supermarkets in southern California: Pasadena (3), Duarte, Placentia, Arcadia, Santa Ana, Fullerton, Tustin, Costa Mesa, and Monrovia. Address: Los Angeles Co. and southern California.

2615. Shurtleff, William; Aoyagi, Akiko. 1983. History of Kikkoman. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 24 p. Feb. 26. Unpublished typescript.

• **Summary:** A comprehensive history of the subject. Contents: Introduction. Part I: Kikkoman in Japan. 1600's-1887: Mogi family starts shoyu (1754-1800), Kikkoman brand registered 1838, Tokyo Shoyu Co. new distributor 1881. The Noda Shoyu Cartel: How formed, bankruptcy of Tokyo Shoyu Co. in the 1880's, research lab and new technology 1900-09, 1910-1917: Arrival of the railroad in Noda in 1911 revolutionized transportation and provided mass distribution, early switch from water to rail, shoyu factory in Korea, miso sold in Korea and China, damaging competition, final struggle. The Noda Shoyu Co., Ltd., incorporation: Noda Shoyu Company founded 1918, history to 1920, strikes in 1923, reorganization in 1925, the 1930's and 1940's. 1947-1981: anti-monopoly hearings in the 1950's, start of U.S. promotion in 1956, socialism and internationalism in Noda in the 1960's, total figures for 1980-81, future. Part II: Kikkoman in the West. Introduction: Mostly U.S., the early years (1860's-1948). Preparing to establish roots (1949-1972): Advertising on U.S. television 1956, Kikkoman International Inc. established in San Francisco 1957, other branches, Leslie Salt Company (Oakland, California) bottled from bulk shipments from Japan (1968), Japan Foods Corp. acquired 1969. 1973-1981: Reasons for establishing first U.S. plant June 1973, new marketing approach to shoyu, 1973 cookbook (*The Kikkoman way of fine eating*, which uses the term "shoyu" throughout the book except in the recipes), two marketing decisions, change of name from shoyu to soy

sauce, use of chemical preservative, sales increase to number one by 1976, types of products, the future. Address: Lafayette, California. Phone: 415-283-2991.

2616. **Product Name:** Legume Tofu Manicotti.

Manufacturer's Name: Legume, Inc.

Manufacturer's Address: 91 Roseland Ave., Caldwell, New Jersey.

Date of Introduction: 1983. February.

Ingredients: Sauce: Crushed tomatoes, organic tofu, water, peanut oil, soy oil, garlic, onion, oregano, basil, parsley, pepper, San-J miso; For the pasta: high gluten enriched wheat flour, whole wheat flour, soy flour, DeBoles Jerusalem artichoke flour, wheat germ.

Wt/Vol., Packaging, Price: 16 oz carton.

How Stored: Frozen.

Nutrition: Per 8 oz.: 240 calories, 12 gm protein, 11 gm fat, 24 gm carbohydrates, 390 mg sodium.

New Product–Documentation: Ad in *Soyfoods*. 1983. Winter. p. 2. Spot in *Soyfoods*. 1983. Summer. p. 53, and 1984. Summer. p. 42.

2617. Leviton, Richard. 1983. Cold Mountain Miso expands [Miyako Oriental Foods in Los Angeles]. *Soyfoods*. Winter. p. 7.

• **Summary:** Leviton visited the company on 1 Oct. 1982, a week after the Grand Opening on Sept. 24, which celebrated the inauguration of their new 20,000 square foot miso factory in Baldwin Park, California. The new plant's capacity is 2,000 tons/year but current production, which is nearly all computer automated (except for packaging and koji development), and which runs 3 days/week with 6 workers, is about 600 tons/year.

Their former plant in Los Angeles had 5,500 square feet of production space and 5,500 square feet of storage space. Miyako was founded in 1976 by Mutual Trading Co. and Yamajirushi Company. Address: Colrain, Massachusetts.

2618. Shurtleff, William; Aoyagi, Akiko. 1983. Soyfoods industry and market: Directory and databook 1983. 3rd ed. Lafayette, California: Soyfoods Center. 112 p. Feb. No 28 cm. [191 ref]

• **Summary:** As of May 1982, America's four largest tempeh makers (in lb/week) are Pacific Tempeh (5,000, California, started 1980), Tempeh Works (4,250, Massachusetts, started 1979), Soyfoods Unlimited (3,000, California, started 1981), White Wave (1,900, Colorado, started 1979). About 17,455 lb/week of tempeh are sold by 15 companies in the USA.

2619. *Soyfoods*. 1983. Soyfoods mini-boom underway in Europe. Winter. p. 8-9.

• **Summary:** "This year we became aware that the kind of developments that took place in the U.S. in 1977-78 are now taking place in Europe with the sudden increase in the number of soyfoods companies," reports Bill Shurtleff of The Soyfoods Center. 'Historically speaking, this will probably be the most important event for the soyfoods industry in 1982. Europe is coming on strong and it's a tradition of soyfoods that goes back 130 years that is now being revived.'

"Most of the impetus for soyfoods in Europe apparently stems from the vigor of the macrobiotic community. Per Fruergaard started Tofu Denmark in Valby and has encountered legal problems regarding the use of nigari. In Paris, France, Bernard Storup purchased a Takai tofu system; Ab and Paulien Schaft are setting up a small plant in Baillestavy to make miso, shoyu, natto, and koji; in Ivry, Jean Luc Alonso's macrobiotic center, Traditions du Grain, prepares for tempeh production.

"In the British Isles, Paul Jones' Tofu Shop in London, England, has been active since 1981 while Community Health Foundation, also in London, promotes homescale tofu, tempeh, and misomaking. In Dublin, Ireland, Jane O'Brien gives tofu cooking classes, has published a tofu cookbook and is considering commercial production.

"The macrobiotic movement is strong in Belgium where de Brandnetel, a large Antwerp-based distributor of natural foods, operates a tofu shop in the rear of their retail store. Jonathan Company in Ekeren makes 3000 pounds of tofu weekly, along with seitan, mochi, soups, canned foods, and soymilk. Seven Arrows in Leuven is another small tofu shop in operation.

"In the Netherlands Manna was the first company to introduce soyfoods to the public and is now an important promoter. Manna's John Welters (who provided much of this information) lectures on homescale soy processing and reports interest and sales are rising as are the number of magazine articles on soyfoods. Manna itself markets tofu spreads and distributes a joint equipment price list with Takai Company of Japan. Witte Wonder in The Hague makes tofu, as does De Morgenstond in Bakkeveen, while Peter Dekker's Jakso produces tempeh. In Portugal, Unimave promotes soy as part of the macrobiotic diet and makes small amounts of tofu and soymilk; Jose Parracho in Setubal is starting a self-sufficient center involving tofu and tempeh production.

"In Soyen, West Germany, Wolfgang Furth-Kuby, who published *Das Tofu Buch* (by William Shurtleff) in German, is interested in tofu production at his Sojaquelle. Tofu producers are Swame [sic, Swami] Anand Svadesha in Furth-im-Wald, Thomas Kasas [sic, Karas] who installed a tofu system last summer at his Bittersuess [later Soyastern] in Cologne, and Alexander Nabben in Munich.

“In Sweden Tim Ohlund and Ted Nordquist have been operating Aros Sojaprodukter since early 1981 in Örsundsbro using a Takai pressure cooker system and vacuum packaging. In Rimini, Italy, Gilberto Bianchini makes tofu at Community Foods. And Switzerland is the home of four soy companies including Restaurant Sesam in Bern, an active macrobiotic center with homescale tofu and seitan production; Marty Halsey makes tofu in Nyon; Hans Opplinger produces tofu in Chan; and Verena Krieger operates Sojalade in Luzern (Lucerne).

“Sojalade, whose tofu output at mid-summer 1982 was 1000 pounds weekly, is a company launched mainly on the results of an article Ms. Krieger published (‘Yesterday Steak, Tomorrow Tofu’) in a Swiss Sunday magazine. Krieger then established her shop to meet the expected tofu demand stirred up by her article. Swiss national television ran a 30 minute feature on soybeans this year in which Krieger made a brief demonstration of 5 tofu dishes. ‘Since then tofu has been a favorite child of the media,’ she says, adding that tofu appeared in the pages of *Blick*, a mass market newspaper.”

Photos show: (1) European representatives at the international Soyfoods Come West conference in Seattle, Washington: Gilberto Bianchini, Marina Casazza (Italy); Joanna White (Switzerland); Kym Olsen (England); Wolfgang Furth-Kuby (W. Germany); Tim Ohlund (Sweden); Roger Kayes (England). (2) Ted Nordquist and Tim Ohlund of Aros Sojaprodukter, Sweden’s first tofu company.

2620. *Soyfoods*. 1983. Cottage soy industries thrive on Vancouver Island. Winter. p. 36-37.

• **Summary:** Wayne Jolley’s Sooke Soyfoods, which opened in early 1981, produces 1,800 lb/week of nigari tofu. Thistledown Soyfoods, run by Jan Norris, opened in October 1981. Each week the company produces 350 lb of tofu, 150 lb of tempeh (vacuum packed), and 75 lb of soy pate from okara. At Shin Mei Do Miso, Lulu and Yoshi Yoshihara have been making miso since 1979. They now produce 10,000 lb of 3 styles of miso each year. Metta Tofu is owned by “Ray Lipovsky, who might be North America’s original cottage tofumaker as he’s been coagulating soymilk with sea water since 1975... Besides producing 600 pounds of nigari tofu every week, Lipovsky is hot on the trail of Frozen Buddha, his multi-flavored line of frozen soymilk ice cream, already producing 360 gallons weekly.”

Also on the island in Victoria, though too large for the cottage scale, is Dayspring Soycraft Corporation, operated by Michael Hsieh. Hsieh, a trained dentist, and his brother, Steven, and their families, emigrated to British Columbia from Taiwan and decided to launch a pressure cooker tofu plant in 1982.

2621. Taira, Harue; Takagi, Hideo; Kokubun, K.; Koyama, S.; Hoshino, S.; Miyauchi, N. 1983. [Quality of soybean seeds grown in Japan. II. Differences in the chemical composition and suitability for food processing between upland and drained paddy field cultures / crops]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku (Report of the National Food Research Institute)* No. 41. p. 14-33. Feb. [33 ref. Jap; eng]

• **Summary:** The chemical composition and suitability for making tofu, miso, natto and cooked whole soybeans were investigated with 78 seed samples of 31 varieties which were grown in upland and drained paddy fields at five Agricultural Experiment Stations in 1980.

The qualities tested were chemical composition (moisture, protein, and oil content) and suitability for food processing as measured by weight of 100 seeds, weight increase ratio of soaked seed, germination ratio, solid matter content of soaking water, solid matter extractability, pH, color of soybean milk, weight increase ratio by steaming, moisture content, softness, and color of steamed seeds. Drained paddy field cultivation, as compared with upland cultivation, gave high moisture and heavy weight of 100 seeds, and low x color value of soybean milk and steamed soybean seeds.

From the results of contribution ratios, it was shown that the moisture content of soybean seeds was influenced by cultural conditions, whereas the chemical composition of protein and oil, and all the suitabilities for food processing were influenced by variety. • **Summary:** Gives figures for tofu, ganmodoki, natto, other, shoyu, miso, soy oil, and margarine. Tofu consumption is lowest in February and highest in August, followed by July, May, and June. Natto consumption is highest March then February, and lowest in August. Shoyu consumption is highest in July then May, and lowest in January then February. Miso consumption is highest in April then May, and lowest in January. Soy oil consumption is highest in July and lowest in January. Address: Japan.

2623. Welters, Sjon. 1983. Re: Brief history of Stichting Natuurvoeding Amsterdam and Manna Natuurvoeding B.V. (Manna Natural Foods) in the Netherlands. Letter to William Shurtleff at Soyfoods Center, March 2. 2 p.

• **Summary:** “Manna was started in 1971 by Adelbert and Wieke Nelissen with a few hundred guilders in a small garage where some natural food products were sold. One year later they gave it an official status by founding the Natural Foods Foundation Amsterdam [Stichting Natuurvoeding Amsterdam; this Manna started as a foundation, and Manna was their brand]. Their first store was on Rozenstraat in Amsterdam. Two years later a second store was opened and the first sourdough bakery in Holland opened. The name of the bread became ‘Manna.’ Soon after this a third and fourth store opened in other parts of Amsterdam while at the end of 1975 the distribution of bread, nutbutters, cereals and miso, tamari, shoyu, and seaweeds began all over the Netherlands. In 1976 it became clear that a warehouse should be rented. Meanwhile production grew and more and more stores carried Manna products. Again a new Manna store started. In 1977 the warehouse was moved to a bigger place. Another new store opened its doors. We began making tofu and were the first to do so with organic beans and nigari. Also soymilk and seitan were produced. In 1978 sales went steadily up. In 1979 two new stores were opened.

“Meanwhile the East West Center was founded by Adelbert and Wieke, promoting natural foods as part of a healthy and natural way of living. This was a great help for Manna. Two more stores opened in 1980 and 1981. In the beginning of 1982, Manna suffered from bankruptcy and was started one day later as Manna Natural Foods, a holding company mainly owned by the Foundation ‘Manna Natural Foods’ [Manna Natuurvoeding B.V.; B.V., pronounced Bay Fay, is an abbreviation for Besloten Vennootschap, which means a private company with limited liability]. A reorganization was necessary but the promotion and sales of quality natural foods went on.

“In 1983 Manna is going steady and probably will cooperate with other natural foods distributors to form one strong network of farmers, producers, distributors and retailers. The purpose will be to eliminate competition and put more energy into publications and promoting by cooking classes, radio and television programs and education.

“Soyfoods played quite an important role in the history of Manna because it was the soyfoods Manna promoted that made it different from the other health and natural food businesses. Because Manna is based on the macrobiotic view of life, miso, tamari, tofu and so forth were an essential part of the diet of the Manna people.

“Instead of the cheese, milk, yogurt (of which consumption is one of the highest in the Netherlands) we advise soyfoods as a healthy alternative. We did no business

in dairy foods. Soyfoods are the number one product to introduce in Netherlands. A great deal of sickness in the Netherlands is caused by the overconsumption of dairy foods, meat and eggs (and other animal products). From this point of view Manna is a unique company in Holland, even in the alternative natural foods business. This difference is a reason of conflict with them. Only by eating a diet which is based mainly on vegetable products such as grains, legumes, soyfoods, seaweeds, fruits and nuts, etc., can a healthy and peaceful world be created. No animals can be mistreated and no land wasted, or misused or destroyed.”
Address: Manna, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands.

2624. Hankin, Lester; Hanna, J. Gordon. 1983. Quality of tofu and other soy products. *Connecticut Agric. Exp. Station, Bulletin* No. 810. 4 p. March. [8 ref]

• **Summary:** This cooperative study by the Connecticut Agric. Exp. Station and the Connecticut Department of Consumer Protection analyzed the microbial and nutrient content of 17 soy products: 5 tofu products made by New England Soy Dairy (Greenfield, Massachusetts), Firm Organic Tofu, and Tofu Slices (Marinated and Broiled) made by Nasoya Foods (Leominster, MA), Soy-Moo soymilk sold by Health Valley Natural Foods (Montebello, California), Tempeh Burgers made by Soyfoods Unlimited (San Leandro, CA), Tempeh Burger made by Pacific Tempeh (Emeryville, CA), Tofu Lasagna with Sauce marketed by Legume, Inc. (Bloomfield, New Jersey), Tempeh made by Tempeh Works (Cambridge, MA), Genmai Miso distributed by Erewhon, Inc. (Cambridge, MA), Kome Miso distributed by Tree of Life (St. Augustine, Florida), and 3 tofu products made by The Bridge (Middletown, Connecticut). Ingredients of each product are given.

The study showed high levels of bacterial contamination in many of the products, much higher than for dairy products. Only 41% met the coliform bacteria standard of less than 10 per gram of product, 29% met yeast standard of less than 10/gm, 41% met the 10 mold standard of less than 10/gm, and only 12% met the standard for total aerobic bacterial count (less than 25,000/gm). In addition, soyfoods generally contained more fat than claimed.

This report had widespread repercussions for the soyfoods industry, which (in the short term) were negative. The authors had previously published studies on the microbiological quality of numerous dairy products.

2627. Sheraton, Mimi. 1983. Restaurants: Sushi and sashimi, the best in the city. *New York Times*. April 15. p. C1-2.

• **Summary:** This is a review of Hatsuhana, a Japanese restaurant at 17 East 48th St., between Fifth and Madison Ave. in New York City. “Natto, a combination of raw fish with an earthy cheeselike paste of aged soy beans, is wonderful whether you have it with a white-flesh fish, tuna, clams, squid or the most subtly flavored toro–fatty tuna. A sunny yellow vinegar sauce made of lemon juice, bean paste [miso] and sake is the basis of nuta, a salad made with plain or fatty tuna, white fish, clams or squid.”

“The eye-opening wasabi horseradish should be mixed into soy sauce before sushi and sashimi are dipped in, and lacy slivers of radish [daikon] add a nice contrast.”

2628. **Product Name:** Chico-San Lima Hishio. Finger-Lickin’ Miso (Dry Mix).

Manufacturer’s Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer’s Address: P.O. Box 810, Chico, CA 95927.

Date of Introduction: 1983. April.

New Product–Documentation: Article in *Crackerbarrel*. 1983. April. p. 4. “Hishio: ‘Instant’ natural miso in seven days.” This is a dry mix. “To make use of Chico-San Hishio, one need only add soy sauce, water and raw vegetables, place the mixture in a covered jar, allowing it to sit in a warm or sunlit place for several days with stirring. Within four to seven days it should develop a miso-like aroma, and is ready to use.

“Hishio comes packaged in a dry form, a type of koji made from barley and soybeans which have been fermented for approximately sixty days.”

Spot in *East West Journal*. 1984. Jan. p. 69. “Do it yourself miso.”

2629. Leviton, Richard. 1983. The Westbrae story. *East West Journal*. April. p. 22-26, 28-29.

• **Summary:** An excellent history of Westbrae Natural Foods. Westbrae was founded in late 1970 by Robert Gerner, Kristin Brun, and Margaret and Bob Ortiz. The foursome secured an abandoned supermarket at 1336 Gilman Street and opened for business in Feb. 1971. Their main products were granola and dried pears. In 1971 Gordon Bennett, finishing a 2-year stint as a conscientious objector, was driving a Goodwill Industries truck in Berkeley while living at Zen Center. He stopped by one day at Westbrae for lunch, asked for a job, and soon found himself hired part time to sweep and move cases. In 1972 they started distributing foods and in the late fall of 1973 the group purchased their Gilman Street store and relocated the warehousing to a new 2,000 square foot building nearby at 1224 10th St., Berkeley, California 94710.

In Feb/March 1974 Gerner (then president and chairman of the board) went to Japan and traveled the country with guide and interpreter William Shurtleff (who was studying tofu in Japan) to search for quality sources of soy sauce, miso, and other traditional Japanese natural foods. About 9 months thereafter Westbrae began to import natural foods from Japan via Mr. Kazama of Mitoku. By late 1974 annual sales had reached \$2 million. Between June and Sept. 1976 the retail store at 1336 Gilman Street was renamed from Westbrae Natural Foods to Gilman Street Gourmet. In September 1977, Westbrae Natural Foods moved its warehouse and offices to Emeryville from Berkeley, into a much larger building. “Today Westbrae is a successful, confident, and growing \$7 million corporation of 25 employees at work in a bustling 50,000 square foot warehouse sandwiched between Oakland and Berkeley in Emeryville, California.” Gordon Bennett (whose photo is shown) is president. Over the years the company has had a strong interest in soyfoods. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

2630. Makino, Jun. 1983. Imported from Japan: A visit to the Yamaki Miso-Shoyu Company. *Crackerbarrel (Chico, California)* 1(2):1, 6. April.

• **Summary:** Mr. Tomio Kitani is the company’s owner and a third generation master maker of soy sauce and miso. The factory is relatively small. It uses whole soybeans, organically grown locally, and does not pasteurize the miso. Mr. Kitani’s grandfather started the company over 58 years ago. He recommends that miso be aged for more than a year. Chico-San is now importing this miso to America.

Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

2631. O'Brien, Jane. 1983. *The magic of tofu and other soybean products*. Wellingborough, England: Thorsons Publishers Ltd. 128 p. April. Illust. by Niall Morris and Clive Birch. Index. 20 cm. [6 ref]

• **Summary:** Written in large letters at the top of the cover: "The Best of Vegetarian Cooking." Contents. Foreword. Introduction (incl. tempeh, soy flour, miso, tamari). 1. Making your own tofu. 2. A word about the recipes. 3. Recipes. 4. Soymilk. 5. Other soybean products (Okara, gô, yuba, soynuts). 6. Soybeans as beans. 7. Food value of soyfoods. 8. History of the soybean. Further reading.

Jane was a soyfoods pioneer in Ireland. In the Introduction (p. 18-21) Jane explains that "I was frequently ill as a child, and on several occasions I was very near to death's door." Yet as she got older, she grew to enjoy gourmet food and gourmet cooking. The man who became her husband gave her the first book she read on natural foods. "As soon as I became aware that food contributed to the maintenance or destruction of health, I began a lifetime of experimentation. I changed from refined foods to whole foods, gave up eating red meat, studied macrobiotics, so much so that over ten years ago I went to Boston [Massachusetts] with two children under the age of four, and pregnant with a third, to study the subject, and I continued from there to develop my own system." Her husband, an actor, is now quite happy with her cooking, after "an austerity programme involving giving up meat, cutting down on and nearly eliminating dairy food, getting rid of sugar."

"I have been working on creating meals that are increasingly more healthful for over seventeen years now [since 1966], and I find it a fascinating study. It is wonderful to witness the vast improvement in my own health..." Her son Quinn is now 15 years old. Her religion is Baha'i. "In furthering my interest in natural foods, I have given cooking classes in Dublin [Ireland] for over ten years [since 1973], not steadily, but from time to time when there were people interested. In the early days of my cooking classes, I also imported the necessary foods: whole grains, beans, miso and natural soy sauce from suppliers in England as they were not available in shops here in Dublin. There was no other way of getting these foods for my family. During the cooking classes I sold much of the stock... That led to the beginning of Ireland's first natural food store which I started with my husband's patient assistance, but which we left to someone else for many reasons."

"Several years ago I began to use tofu and soyfoods and to include them in the cooking classes. Because I was so interested in learning more about them, I attended the soyfoods conference held in Illinois in 1980 and the one in Colorado in 1981... I think that I became so excited about

tofu, soymilk and soyfoods really because I had long been a lover of puddings, custard, and creamy toppings, often made with dairy foods. However, because I needed to cut down on my use of dairy foods, I had nearly eliminated all of those things from my diet. When I discovered that it was possible, not only to make tofu and soymilk successfully in my own kitchen, but to use it for very accurate substitutions of my childhood favorites which were far more healthful than the things I had eaten as a child, I was thrilled."

Note: On 9 November 1979 Mrs. Jane M. O'Brien (7 Woodside Drive, Rathfarnham, Dublin 14, Ireland), ordered books on tofu, tofu & soymilk production, miso, and tempeh from Shurtleff & Aoyagi at Soyfoods Center in California.

Talk with Jane O'Brien. 1980. July 13. She developed the many recipes in this book using soybeans that she imported from England to Ireland, starting in about 1980.

Letter from Jane O'Brien. 1983. May 28. This book was published in April 1983. "It is presently on sale in England but not yet here in Ireland." Address: 7 Woodside Dr., Rathfarnham, Dublin 14, Ireland.

2632. Schick, Rabbi Michael. 1983. *How Chico miso and soy sauce are made kosher*. *Crackerbarrel (Chico, California)* 1(2):4-5. April.

• **Summary:** The author, traveling from San Francisco with Jun Makino (director of imports for Chico-San Inc.), visited Mizoguchi Soy Sauce Inc. in Honjo/Kimitsu, Chiba prefecture, Japan, owned by Mr. Hideo Mizoguchi. The business is over 100 years old. He gives a description of the process for making miso and shoyu at the plant, illustrated by 3 photos. He then visited Meiji Seifun Co. in Fukuyama/Hiroshima and described the miso process. He certified all products kosher, for import by Chico-San. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

2633. *Sunset international vegetarian cook book*. 1983. Menlo Park, California: Lane Publishing Co. 96 p. April. Illust. 28 cm. Retitled *Vegetarian Favorites* in 1987.

• **Summary:** This book is by the editors of *Sunset* books and *Sunset* magazine; the supervising editor is Maureen Williams Zimmerman. A table titled "Choosing nutritiously" (p. 5) shows that soybeans are a good source of thiamin (B-1), niacin, vitamin B-6, folic acid, calcium, and iron. Another table titled "Protein partnerships" (p. 7) states that soybeans and soyfoods (soybean curd/tofu, soy flour, soy milk, and tempeh), like dairy products and eggs, have no limiting amino acid. Soy-related recipes include: Miso grilled mushrooms (p. 14; Japan). Golden tofu cauliflower soup (p. 34; Thailand). Greens & tofu in peanut sauce (p. 48; Thailand). Stir-fried tofu & vegetables (p. 50; Vietnam). Whole wheat & soy pasta (p. 52). Mandarin pancakes with spicy tofu filling (p. 70; China). Address: Menlo Park. Phone: 415-321-3600.

2637. South River Miso Co. Inc. 1983. South River Miso [Mail order catalog and price list]. South River Farm, Conway, MA 01341. 6 panels. Front and back. Undated.

• **Summary:** Three similar versions of this very interesting hand-lettered leaflet/catalog are available. All bear the date of spring 1983. This was the company's first catalog, sent out to a few hundred people—according to a letter from Christian Elwell of 28 May 1992.

On the first two versions, the front consists of three panels; the company name, address, and date (spring 1983) appear at the top of the first (left) panel. Below that is the company logo (three waves in a circle) then a brief description 3 types of miso: Mellow barley (pearled barley, aged 2 months, 9% salt), Mellow brown rice (lightly polished California Lundberg short grain brown rice, aged 2 months, 7% salt), and Mellow Flint Corn (Longfellow flint corn, aged, 7% salt, cooked with hardwood ash & lime, puréed). “All made from organic grain and large seeded ‘Prize’ soybeans, deep well water, solar dried Mediterranean seasalt, and koji culture. Direct wood fired. Fermented naturally in wooden vats. Unpasteurized. Mellow miso must be stored at 40° [Fahrenheit] or less.”

On the second panel of version #1 is written: “Like a lightning rod man stands erect between heaven and earth. Simple food springs from the earth. May it cultivate in us its simplicity. Like wind-pollinated grain, we need no flowery show.

“Pure fire breathes on us from heaven. We bare ourselves before this universal One. Like the midday sun may we constantly fire each other’s spirit and nourish all our relations.

“South River Farm is the coming together of three families seeking common livelihood. Miso-making poises us at a focal point between earth’s food and heaven’s revolving seasons. Miso ferments sharing between us and you.”

On the second panel of version #2 is written: “Grain, fruit and seed one, has shared age long intimacy with man. Head erect, ears catching the wind, it puts on no flowery show for its fruition. Bowing in ripeness, it is the most abundant and sustaining of all foods. Together with legumes this provides a foundation for physical well-being.

“Miso is a living organism, greater than the sum of its parts. Although miso’s structure is more complex than any single food, as an external digestive system its essence is one of simplifying and returning to origin.” Inside of a horizontal-axis infinity sign we read in flowing words: Spring—sow aspiring. Summer—respiring grow. Fall—expiring mature. Winter—endure inspiring.” Then at the bottom: “Earth bears simple food, clothing and shelter. Heaven bares simple thought, expression and pattern. Man sets the elements of miso together. Day, season and year mature it to consummation. South River Farm is the coming together of three families seeking common livelihood. Cupped by the two hands of God, expansion and contraction may we share this flow with all our relations.” The third panels of versions #1 and 2, like the first panels, are identical. The top half, titled “Cost” gives a breakdown of the company’s costs plus a pie chart: Ingredients 17%, packaging 8%, shop overhead 20%, study and cultivation of sources 22%, livelihood [profit] 33%. The bottom half, titled “Shipping and ordering,” states: “Available in 9, 18, and 45 pound containers at \$12.60, \$25.20, and \$63.00 each, \$1.40 per pound. Mellow Flint Corn only in 9 pounds. Net shipping weights 10, 20, and 47 pounds. Prices are F.O.B. Conway, Massachusetts. We can not ship mellow miso between May 15 and October 1. We ship by UPS unless you specify otherwise. Please see rate chart and add charges accordingly. Checks payable to South River Miso.”

The back, which consists of one panel titled “Cooking with mellow miso,” contains five miso recipes.

On the third version, there is no mention of the three families. Panels 2 and 3 are merged into one, with poetical text quite like that of panel 2, of version 2. The cost panel has been moved to the back, and on it is the date: “Price list—Spring 1983.”

One of the earlier leaflets was sent by Anpetu Oihankesni in Dec. 1999. He writes: “The recipes on the flyer were written up and developed by Hannah [Bond]. I composed the logo... and did the calligraphy/printing. The text in the middle portion [second panel] was written by

Hannah and myself and edited by other folks. Hannah also had an expression which later flyers from the shop, after we left, continued to use—'Miso, wisely given, gives its own wisdom.'" Address: Conway, Massachusetts.

2638. Steinkraus, Keith H.; Cullen, R.E.; Pederson, C.S.; Nellis, L.F.; Gavitt, B.K. eds. 1983. Handbook of indigenous fermented foods. New York, NY: Marcel Dekker. ix + 671 p. May. Illust. Index. 26 cm. Microbiology Series, Vol. 9. [200+ ref]

• **Summary:** Contents: Foreword by E.J. Da Silva. Preface. I. Indonesian tempeh and related fermentations: Protein-rich vegetarian meat substitutes. II. Indigenous fermented foods involving an acid fermentation: Preserving and enhancing organoleptic and nutritional qualities of fresh foods. III. Indigenous fermented foods in which ethanol is a major product: Types and nutritional significance of primitive wines and beers and related alcoholic foods.

IV. Indigenous fermented amino acid / peptide sauces and pastes with meatlike flavors: Introduction. Soy sauces: Japanese shoyu (koikuchi, usukuchi, tamari), Chinese chiang-yu, Taiwanese soy sauce, Malaysian soy sauce—kicap, Indonesian soy sauce—kecap (a photo shows a bottle of kecap), Korean soy sauce, Taiwanese black bean sauce—inyu, Philippine tausi. Fermented soybean pastes: Japanese miso, Indonesian tauco, Korean doenjang and kochujang. Fermented fish sauces and pastes. Fish-soy sauce and paste (Malaysia; no indigenous names are given). Miscellaneous Oriental fermentations: Japanese natto (itohiki natto), Thai thua-nao, Japanese hama-natto [hamanatto] and related products, Chinese red rice—anka, ang-kah, or ang-kak, Chinese sufu, nyufu.

V. Mushrooms: Producing single cell (microbial) protein on ligno-cellulosic or other food and agricultural wastes. VI. General papers related to indigenous fermented foods: Contributions of the western world to knowledge of indigenous fermented foods of the orient, the importance of microbial genetics in indigenous food fermentations, new uses for traditional food fermentations, mycotoxin problems in indigenous fermented foods and new methods for mycotoxin analysis.

Less widely known fermented foods include: Idli, dosa/dosai, dhokla (with soy, 131-35), enjera (162), tef/teff (164), wot (165), hopper (173), kishra (175), lambic (179), ogi (with soy, 189-98), mahewu (203), gari (208), dahi (249-57), srikhand and lassi (256-57), laban rayeb, laban zeer, yogurt (257-59; cultured soy yogurt is mentioned on p. 616), liban, mast, mass, taw (260), tairu (with soy, 260-65), kishk or kushuk (267), Metchnikoff (266), trahanas or tarhanas (271-76), rabdi, jalebi (275), koumiss (276), kefir (277-80).

Alcoholic beverages and foods: Honey wine, mead, metheglin (305), tej (306), sugar cane wines, basi, bubod, binubudan (307), palm wine or toddy (315-28), pulque

(328-37), kaffir (344), tesguino (352), bouza (357), pito (358), busaa (365) sake (373-79), yakju and takju (379), tape = tapeh (381-400), ragi (381), tapuy (400), lao-chao (402), madhu (406), brem (408), tropical vinegar (410-14), nata (414-20), tea fungus (421), nuoc-mam (516-21).

Reviewed in Scientific American (Nov. 1983, p. 37), and in Bio/Technology (1984, p. 364). Address: Inst. of Food Science, Cornell Univ., Geneva, New York.

2639. Kanasugi, Goro. 1983. Tempe no hôkoku to setsumeï [Tempeh: Report and explanation]. *Zenkoku Shokuhin Shinbun (National Food News)* No. 453. June 1. p. 2. [Jap]

• **Summary:** Tempeh recipes developed and tested by Mr. Kanasugi include karinto, otsumami, subuta-style yakimeshi, curry rice, tempeh sauteed with vegetables or with pickles, gyôza, harumaki (spring rolls), croquettes, cutlets, agé balls fukumeni style, steamed bread, saka manju, egg bread, Kinzanji miso, Tekka miso, sanbaizu aenuta, jashiki-agé, mameita, Inari-zushi, norimaki, oden, fukumeni, shio mamemochi, ohagi, hijiki nikomi, salad, stew, etc.

In Japan it is very difficult to omit all of the meat from a traditional meat recipe, so Mr. Kanasugi leaves in 10-20% for flavor, and substitutes tempeh for the rest. His dream is to establish a chain of specialty tempeh restaurants in Japanese cities. He would like to ask a professional cooking teacher to develop some popular tempeh recipes suited to the needs and tastes of the people.

2640. Leviton, Richard. 1983. Notes from a visit to Eden Foods of Michigan. 19 p. June 4. Unpublished typescript.

• **Summary:** These notes were condensed into an excellent article in *East West Journal* (April 1984) titled "The organic Garden of Eden: A Michigan-based natural foods company stresses quality and fidelity." Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2641. Tara, Bill. 1983. Re: Comments on William Shurtleff's "History of Macrobiotics" manuscript. Letter to William Shurtleff at Soyfoods Center, June 9. 2 p. Typed, with signature on letterhead. [1 ref]

• **Summary:** "I would check the reference to Paul Hawken owning 50% of the stock in Erewhon. My reason for this is as follows: During this period of time there were many discussions which took place between myself, Paul, the Kushi's and others regarding an equitable distribution of stocks in the company to the management. No plan was ever finalized. Paul's desire was 50% for himself. Michio and Aveline were hesitant since that would have meant that future stock participation by management would be severely limited. It was my understanding that the upshot of these discussions was that Aveline would hold the shares in her name in trust until such time that an equitable proposal was put forward by management. In lieu of stock participation,

many employees including Paul, myself & Roger Hillyard were given cash bonuses and extensive time off from our work to pursue our own travels and study. (Paul went to Japan under such an arrangement, Roger traveled through the U.S. and I traveled through Europe.)”

“Paul did not ‘set-up’ Mitoku & Muso. They were already in operation and exporting. Paul did however, cement a good relationship with these companies and make more efficient arrangements for shipping and quality control.

“As per Paul’s shock regarding the shares. I can only say as stated above, plus the fact that what you want and what you have are two different things, if the shares had been legally his, they could not have been taken away and Paul could never be accused of having been ignorant of the law in business matters.”

“Erewhon in Los Angeles was started by myself and Aveline Kushi. I had moved to Los Angeles to set up a center there immediately after establishing a center in Chicago [Illinois] and getting the shop opened. The shop was opened in 1970 and our original purchase of miso and tamari were made through Chico-San. We later received our first direct shipment from Japan prior to Paul’s arrival. I was joined by Bruce Macdonald and we began distribution up the California coast as far north as San Francisco, distributing miso and tamari as well as some Japanese condiments and seaweeds to small co-ops and natural food shops. Our biggest customers were the co-ops in Berkeley and Fred Rohe in San Francisco.”

“What can I say regarding Paul’s impression of Erewhon in 1970? We were all younger then. My impression was that Erewhon was a very happy place to work at Farnsworth Street. There was a high degree of comradery [camaraderie] and a poor understanding of business. The words arrogant and dogmatic were words often used to describe Paul—rightly or not.

“Bill, I hope these comments are not in any way taken to be disparaging of Paul and his involvement in the natural foods movement. His energy and vitality combined with his sharp business sense was one of the main driving forces behind the wide distribution of Japanese foods. Combined with Michio’s educational work, this forged the beginning of the wide acceptance that we are now seeing for many of the traditional food items. It would be sad, I think, to allow Paul’s own personal frustrations to overly color what was an exciting and adventurous experience for all involved.”
Address: The Kushi Institute, P.O. Box 1100, Brookline, Massachusetts 02147. Phone: (617) 731-0564.

2642. **Product Name:** Tofu Delight Tempeh Salad [Curry, or Herb].

Manufacturer’s Name: Appropriate Foods, Inc.

Manufacturer’s Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1983. June.

Ingredients: Organic tempeh, brown rice, miso, tamari, herbs, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Catalog. 1983. June. In June 1984 changed to New York Soy Deli brand. Label. 1984. June. 1.5 by 3 inches. Black on orange. Distributed from June 1984 to June 1986.

2643. Edward & Sons Trading Co. 1983. “Go skinny dipping” (Ad). *New Age Journal (Boston, Massachusetts)*. June. Inside rear cover.

• **Summary:** This full-page color ad is for Miso+Plus. All Natural Dip Mix, in chive or jalapeno flavors. Contains a recipe for using the mix, plus a photo showing a bowl of dip in the middle of a plate of sliced vegetables and crackers. Note: This ad also appeared in the August issue of this magazine. The product is made in Japan and imported by Edward & Sons. Address: Route 1, Box 153, Saluda, North Carolina 28773.

2644. Gullo, Karen. 1983. Soyfoods consumption hits all-time high. *Vegetarian Times*. June. p. 12. [1 ref]

• **Summary:** This is a review and summary of *Soyfoods Industry Directory and Databook 1983* by Shurtleff and Aoyagi. 1982 USA production and retail sales figures are given for the following foods: Tofu (27,500 tons, \$50 million in 1981), tempeh (450 tons, \$2 million), and miso (750 tons). Four factors contributing to the growth of soyfoods are summarized. “Low-calorie convenience soyfoods products and frozen, meatless ‘heat and serve’ entrees will play an important role in soyfood’s entrance into the mainstream American diet... Dairy-like soymilk and soymilk shakes, yogurt and ice cream, tofu cottage cheese and tofu burgers will soon be low-cost, low-calorie alternatives to mainstream supermarket fare.”

2645. Herrmann, Karl. 1983. Ueber Sojabohnen und Sojaprodukte [On soybeans and soybean products]. *Ernaehrungs-Umschau* 30(6):175-79. June. [17 ref. Ger]

• **Summary:** Contents: Introduction, nutritional composition, amino acids in soy sauce. Unfermented soy products: Soymilk, tofu (*sojaquark*), aburage, kori-tofu, yuba, kinako. Fermented soy products: Soy sauce, miso (*sojapaste*), tempeh, sufu, natto. Address: Institut fuer Lebensmittelchemie, Hannover Univ., Wunstorfer Str. 14, D-3000 Hannover 91 [West Germany].

2646. **Product Name:** Miso Salad Dressing [Creamy Italian, French, or Miso].

Manufacturer’s Name: Old McNatural.

Manufacturer’s Address: Miami, Florida.

Date of Introduction: 1983. June.

Ingredients: Purified water, mild primary yeast, cider vinegar, mellow white miso.

Wt/Vol., Packaging, Price: 8 oz plastic bottles.

How Stored: Shelf stable.

Nutrition: 14 calories per tablespoon.

New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 54. “Fat free.”

2647. *Soyfoods*. 1983. Rural miso making: South River Farm Miso Company. Summer. p. 40-41.

• **Summary:** The South River Farm Miso Company resides on a 64 acre farm in Conway, Massachusetts. It is “under the joint familial ownership of Christian and Gaella Elwell, Anpetu and Hannah Oihankesni, and Don and Marcia Wheeler.” The company has been operating at the rate of 36,000 pounds of miso per 15 week cycle since November 1982. “They originally purchased the Ohio Miso Company in May 1980, then in June 1981 they laid the foundation for their new miso shop of 1,220 square feet (24-by-18 for production; 7-by-10 for koji incubation; 20 by 36 for storage). On October 25, 1982, with a \$60,000 investment and much contributed carpentry by the partners behind them, South River Farm held its dedication ceremony and in November they began producing woodfired traditional miso.” Veteran misomaker Thom Leonard was on hand as consultant during the first month.

South River produces a variety of misos. They are experimenting with corn, barley/black soybean and rice/black soybean.

A distinctive feature of the shop “is their unique masonry heat exchange system which cost \$5,000 and is the first such Finnish design heater in the U.S. Designed by Albie Barden and Jim Scialo of Maine, the bricklined heat exchanger provides heat for the recessed 80-gallon cauldron while also radiating heat to warm the shop in the winter months to 76°F.”

The shop is a pleasurable sight, visually, a meditative environment. Aesthetic perfection and harmonious design were priorities. Red tiles line the floor. The walls are sheetrocked and wood trimmed. “Evidence of South River’s degree of architectural sensitivity are the special ‘spirit holes’: half a dozen 9-inch holes in the floor, in both koji and production rooms.” Anpetu, who has lived with native Americans, explains that the holes allow the flow of Earth’s *chi*, or energy, into the shop. Each hole is covered with a loose wooden lid.

Photos show: (1) The miso shop seen from one side. (2) Don mixing the soybeans with a wooden paddle to cool them. (3) The bricklined heat exchange system around the cauldron, with Anpetu, Don and Christian at work in the background. (4) Don cools down soybeans. (5) Christian gathers loose koji grains in the incubation room. Koji trays are stacked high along one wall. A small heater is at one end of the room.

2648. **Product Name:** Westbrae Natural Instant Miso Soup [Shiro (White), or Aka (Red) Flavor Broth].

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983. June.

Ingredients: Powdered miso (rice, soybeans, sea salt), wakame seaweed, fu (wheat gluten), dried green onion.

Wt/Vol., Packaging, Price: 1.4 oz foil pouches containing 4 individual packets. Each packet makes 8 oz of soup.

How Stored: Shelf stable.

Nutrition: Per 10 gm.: Calories 35, protein 3 gm, carbohydrate 4 gm, fat 1 gm.

New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 53. Labels. 1983. 5 by 7 inches. Plastic pouch. Green, white, purple, red, black. Picture of cup of soup surrounded by vegetables. Back of package: “Deliciously natural. 35 Calories per serving. Conveniently packaged. Easy to cook. Sauces, dips, dressings...” Inside foil packets are 3 by 4 inches. Shiro: Purple and black on white with instructions on back. Aka: Red and black on white with instructions on back. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. A display caddy holds 12 pouches. Poster. 1984. March. Letter from Gordon Bennett. 1987. Oct. Gives date of introduction as 1983. Currently 5 varieties.

2649. **Product Name:** Pâté Wildwood.

Manufacturer’s Name: Wildwood Natural Foods.

Manufacturer’s Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1983. June.

Ingredients: Lentils, whole grain bread, onions, carrots, celery, mushrooms, parsley, tomatoes, miso, tahini, safflower oil, sea salt, and spices.

Wt/Vol., Packaging, Price: 8 oz plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Labels sent by Wildwood on their letterhead. 1983, undated. 2.75 by 1.75 inches. Self adhesive. Black and green on ivory. Silhouette of woods with birds. “Ready to eat Foods, Naturally. Perishable. Keep Refrigerated.”

2650. Chico-San, Inc. 1983. America’s first macrobiotic food company: What do we mean by first? (Ad). *East West Journal*. July. p. 13. Also in Whole Foods, July 1983.

• **Summary:** Chico-San describes itself as “A company built on a philosophy.” Address: P.O. Box 810, Chico, California 95927.

2651. Fukushima, Danji. 1983. Fermented soy foods in the United States. *INTSOY Series* No. 25. p. 117-19. B.J. Irwin,

J.B. Sinclair, and Wang Jin-ling, eds. Soybean Research in China and the United States (College of Agric., Univ. of Illinois at Urbana-Champaign).

• **Summary:** Although chemically hydrolyzed soy sauce is widely consumed, fermented soy sauce has an annual growth rate of 15%. La Choy and Chun King, the two largest producers of chemical soy sauce, are assumed to have a combined annual production of 20,000 kiloliters. Most of the fermented soy sauce is produced by Kikkoman Foods, Inc. and annual production has reached 19,000 kiloliters.

Soy sauce manufacturing consists of three main processes: koji making, brine fermentation, and refining. Major improvements in the soy sauce process are (1) high temperature short time cooking of the soybean flakes to increase the yield, (2) use of an artificial mutant of *Aspergillus sojae* which produces twice as much proteolytic enzyme, (3) use of automatic koji making equipment, and (4) use of *Pediococcus halophilus* and *Saccharomyces rouxii*, and proper temperature control during brine fermentation. Address: Kikkoman Foods, Inc., Walworth, Wisconsin.

2652. Guo, Xiang-ao. 1983. Research on heat denaturation of soy protein after solvent extraction, and traditional Chinese soy foods. *INTSOY Series No. 25*. p. 64-66. B.J. Irwin, J.B. Sinclair, and Wang Jin-ling, eds. Soybean Research in China and the United States (College of Agric., Univ. of Illinois at Urbana-Champaign).

• **Summary:** Solvent extracted soybean flakes and meals (moisture content 9.6%) were subjected to 80°C, 90°C, and 100-105°C temperatures for 15 or 20 minutes. The critical temperature for protein denaturation was 80°C. At higher temperatures, solvent-extracted soybean meal was denatured more rapidly than soy flakes. Preparation of the following traditional Chinese soyfoods was described briefly: Soy sprouts (*dou ya*), soybean jiang (*dou jiang*), soy nuggets (*dou chi*), soy sauce (*jiang you*), soy beverage (*dou jiang*), tofu (regular and soft, *doufu*), firm tofu (*doufu gan*), pressed tofu sheets (*doufu yi*), vegetarian chicken (*su ji*), fried tofu (*you-doufu*), fermented tofu (*doufu-lu*), and yuba (*doufu pi*). Address: Zhengzhou Grain College, China.

2653. **Product Name:** Heartsong's Tofu Herb Dip.

Manufacturer's Name: Heartsong Tofu.

Manufacturer's Address: Miami, Florida.

Date of Introduction: 1983. July.

Ingredients: Tofu, white miso, oil, vinegar, honey, garlic, parsley, dill, onion.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product-Documentation: Soyfoods. 1983. Summer. p. 38.

2654. **Product Name:** [Kikkoman Instant Tofu Miso Soup (Soybean Paste Soup with Tofu)].

Foreign Name: Tôfu Misoshiru.

Manufacturer's Name: Kikkoman Corporation.

Manufacturer's Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1983. July.

Ingredients: Powdered miso, dehydrated tofu, dried seaweed, monosodium glutamate, powdered yeast extract, powdered dried bonito, dehydrated leek.

Wt/Vol., Packaging, Price: 1.5 oz (30 gm). Foil packet containing 3 individual foil packets. Makes 2/3 cup.

How Stored: Shelf stable.

New Product-Documentation: Label. 1983. 5.5 by 7 inches. Plastic packet. Brown, red, green, and yellow on white. Full color picture of wooden bowl of miso soup on tray. Individual foil packets inside are 2.75 by 4 inches. Brown, black and red on white. Picture of bowl of soup on front, instructions on back. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. "Distributed by Kikkoman Corporation, Noda 278, Japan." Text on label in both English and Japanese.

Note: This is the earliest known commercial soy product that uses dried-frozen tofu as an ingredient.

2655. Norin Suisan-sho, Nosan Engei Kyoku, Hatasaku Shinko-ka. 1983. Daizu ni kansuru shiryô [Statistics concerning soybeans]. Tokyo, Japan. 157 p. 26 cm. [Jap]

• **Summary:** This yearly report, published by Japan's Ministry of Agriculture, Forestry, and Fisheries (MAFF), is packed with detailed statistics on soybean production, trade, and utilization in Japan. The table on p. 129 gives statistics on miso production, shipments, and use of raw materials by prefecture and for Japan as a whole. In 1981 Japan produced 575,782 tonnes of miso and shipped 578,610 tonnes. Raw materials used were 14,417 tonnes of domestically grown whole soybeans, 167,539 tonnes of imported whole soybeans, 103,611 tonnes of polished rice, 24,667 tonnes of polished barley, 476 tonnes of defatted soybean meal, 71,325 tonnes of salt, and 96 tonnes of cornmeal (used mainly in Nagano and Hyogo prefectures). The top 5 miso producing prefectures were Nagano (164,510 tonnes; 28.6% of Japan's total), Aichi (54,529), Niigata (38,156), Aomori (28,602), and Hokkaido (25,908). The source of these statistics is: Shokuryô-cho, Kakô Shokuhin-ka, Kome Mugi Kakô Shokuhin Seisan Dotai, Tokei Chosa.

The table on p. 130 gives similar statistics on shoyu for 1981. In 1981 Japan produced 1,190,618 kiloliters (kl) of shoyu and shipped 1,118,799 kl. Raw materials used were 6,473 tonnes of whole soybeans, 175,205 tonnes of defatted processed soybean meal (*dashi kakô daizu*), 177,407 tonnes of wheat, 204,777 tonnes of salt, and 80,642 kl amino acid liquid (*amino-san*, either purchased or made on site). The top 7 shoyu producing prefectures were Chiba (424,498 kl;

35.7% of Japan's total), Hyogo (203,374) Aichi (59,201 kl), Kagawa (45,430 kl), Fukuoka (36,575 kl), Oita (31,860 kl), Mie (30,354 kl), The source of these statistics is the same as for the miso statistics, above.

The table on p. 132-33 gives statistics on consumption of shoyu (in 100 ml), miso (100 gm), whole soybean foods (yen), tofu (cakes = *cho*), aburag  and ganmodoki (yen), natto (yen), and other soyfoods (yen) from 1963 (Showa 38) to 1981. Under shoyu, miso, and tofu is given the amount of money spent (*kingaku*), the quantity purchased (*s ry *), and the price. Annual shoyu consumption per household has decreased from 30.5 liters in 1963 to 16.3 liters in 1981. Annual miso consumption per household has decreased from 18.4 kg in 1963 to 12.1 kg in 1981. Tofu consumption per household has remained about constant, with 87.3 cakes in 1963 and 86.9 cakes in 1981. A breakdown is also given for each food by annual household income, with 5 income levels. One grouping is for all households (including those with a retired head of household or on welfare) and the other is only households with at least one working member. In each case, the higher the household income, the greater the consumption. In the case of tofu, for example, households with an annual income of less than 2.65 million yen consumed 76.1 cakes of tofu, while households with an annual income of more than 5.8 million yen consumed 99.3 cakes. Next is a breakdown by age of head of household. Generally, the younger the head of household, the less the consumption. In the case of tofu, households whose head was 24 years or younger consumed 55.5 cakes/year, while households whose head was age 60-64 consumed 95.4 cakes. The source of these statistics is the *Kakei Chosa Nenpo (S ri-fu, T kei-kyoku)*.

The table on pages 134-35 shows consumption per household by geographical area of the same foods as the previous table. Geographical areas include: all of Japan, all cities, cities with 50,000 or more population (broken down into large, medium, and small), cities with less than 50,000 population, towns and villages (*machi* and *mura*), 14 major regions, and large cities. Note: Statistics by prefecture are not given. In the case of tofu, the highest consumption is cities with less than 50,000 population (92.0 cakes), while the lowest is in medium-sized cities with more than 50,000 population (84.2 cakes). The regions with the highest tofu consumption are Tohoku (the northeast provinces; 101.9 cakes) and Chugoku (southwest provinces; 98.1 cakes), while the lowest two are Hokkaido (58.3 cakes) and Okinawa (72.3 cakes). The cities with the highest annual tofu consumption per household are Toyama city (118.9 cakes), Morioka city (118.4), Yamaguchi city (107.9), Matsuyama city (102.9), Fukushima city (102.8), Tokushima city (102.0), Fukui city (100.7). The source of these statistics is the same as for the statistics on p. 132-33.

Tables on pages 136-39 give a detailed nutritional analysis of soybeans and each of 23 soyfoods made in

Japan. The following minerals are listed: calcium, phosphorus, iron, sodium, and potassium. Vitamins: A (retinol, carotene, international units), B-1 (thiamine), B-2 (riboflavin), niacin, and C. Soybeans grown in Japan contain, on average, 35.3% protein and 19.0% fat, compared with 33.0% protein and 21.7% fat for soybeans grown in the USA, and 32.8% protein and 19.5% fat for soybeans grown in the China. Address: Tokyo, Japan.

2656. Ohsawa, Lima. 1983. "Tamari" ni tsuite [Re: Concerning the word "tamari"]. Letter to Bob Kennedy, President of Chico-san, Inc. in California, Aug. 24. 2 p. Translation by Akiko Aoyagi Shurtleff published in East West Journal. Sept. 1984, p. 14. [Jap]

• **Summary:** This letter was written to Bob Kennedy in response to his request for information on the origins of the use (actually misuse) of the term "tamari" by George Ohsawa and the macrobiotic movement. The translation is by Akiko Aoyagi of Soyfoods Center.

"In about 1958 or 1959 George Ohsawa gave a lecture at a university in Hamburg, West Germany. The lecture hall was packed with some 400 to 500 people. Among them was a young man whose name I don't clearly recall (perhaps it was Egel?). He was running an organic school in Germany. After the lecture he came to Mr. Ohsawa and earnestly enquired about various aspects of the Unique Principle.

"At that time there was also some talk about shoyu. As soon as he tasted this shoyu, he registered the word 'shoyu' as his own trademark and brand name, so that only he could sell it under this name. We came to know about this later and thought that it was a terrible thing for him to do. We were troubled by his action, for in Germany the law concerning registered trademarks was very strict. Therefore, in Germany, we were unable to call shoyu by its proper name, 'shoyu.' Out of sheer necessity, we decided to call shoyu by the name 'tamari.' After that, people in Europe started to call shoyu by the name 'tamari.'

"In Japan we call the liquid from soybean miso by the name 'tamari shoyu,' and it has been used in fine restaurants and for high class recipes. It is a type of shoyu.

"After this incident, shoyu came to be called tamari. People overseas started to become familiar with the product and its new name, and they came to be used regularly." Address: Tokyo, Japan.

2657. Belleme, John. 1983. Re: Problems at American Miso Co. Progress on white miso. Letter to William Shurtleff at Soyfoods Center, Aug. 30. 1 p. Typed, with signature on letterhead.

• **Summary:** After a year of confusion and misunderstanding, the problems at American Miso Co. may be nearing a final resolution. About three months ago, John hired a lawyer. A draft of the final contract between him and

the majority shareholder has been passed back and forth recently. He hopes it will be signed in the near future.

John has learned a great deal about white miso through constant experimentation—and very little from Japanese correspondence. He now understands the basic process for making unrefrigerated white miso. At present, Great Eastern Sun, the miso company's sole distributor, is selling about 50,000 pounds of white miso annually. It does very well unrefrigerated, but needs to be refrigerated for long-term storage. Address: Route 3, Box 541, Rutherfordton, North Carolina. Phone: (704) 287-2940.

2658. *Manna Bulletin*. 1983. Miso soep: een sterke buffer tegen kanker [Miso soup: a strong buffer against cancer]. 5(5-6):July/Aug. [Dut]

• **Summary:** An illustration shows a jar of Manna Miso. Address: Meeuwenlaan 70, Amsterdam, Netherlands.

2659. Mountain Ark Trading Company. 1983. Catalog—Summer 1983 [Mail order]. 120 South East St., Fayetteville, AR 72701. 30 p. 27 cm.

• **Summary:** This is a mail order catalog for macrobiotic whole foods, specialty cookware, cookbooks and books on natural healing, futons, furniture, etc. The owners of the company are Frank & Phyllis Head, Tom & Toby Monte, Bill & Carol Tims, and Joel & Wendy Wollner.

Concerning seitan and *fu*, we read: “Seitan (wheat gluten)—100% Wheat Protein (“gluten” is the name for wheat protein). (1) Mountain Ark's seitan—savory wheat gluten cutlets, freshly cooked in small batches; made from Deaf Smith's organic whole-wheat flour [Arrowhead Mills] and Ozark mountain water; seasoned with tamari, kombu, and ginger. Shipped frozen; customer assumes risk of spoilage April 1 through November 30. 8 oz or 16 oz tub. Price: \$4.75, not including postage. (2) Spicy seitan—as above with cayenne pepper and garlic added for zest, though not overly spicy. 8 oz or 16 oz tub. (3) Seitan condiment—juicy, chewy chunks of very concentrated wheat gluten cooked in Johsen Shoyu; not perishable. 6.35 oz. jar. Price: \$2.95, not including shipping.

Dried wheat gluten cakes (*Fu*)—use like pasta. Sifted wheat gluten jumbo rings (*Kuruma Fu*), Sifted wheat gluten sheets (*Shonai Fu*), Sifted wheat gluten rings (*Zeni Fu*), Whole wheat gluten rings (*Zenryu Fu*).

Talk with Joel Wollner. 1992. July 13. The first two types of seitan were made in Fayetteville by Hans Decoz, from the Netherlands.

Soyfoods Center also owns a Mountain Ark catalog dated Autumn 1983. 36 p. The company now has a toll-free number: 1-800-643-8909. Address: Fayetteville, Arkansas. Phone: 501-442-7191.

2660. Shurtleff, William. 1983. Report on soyfoods research trip to Hong Kong, China, Singapore, and Japan: May 29 to

July 10, 1983 (Log—unpublished). Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 117 p. Aug. Unpublished log.

• **Summary:** Contents: Hong Kong: K.S. Lo and Vitasoy. May 29 (Sunday)—Plane from Hong Kong to Guangzhou City (Canton) in Guangdong (Kwantung) province. China: Guangzhou (May 29-30), Zhengzhou, Beijing, Harbin, Beijing #2 (Scurlock, Chen Xi-Hau, Joe Rakosky, Terrence Foley, local markets, vegetarian deli). Singapore: STS and Anders Lindner, Alan Yeo, American Soybean Association (Don Bushman, Sabrina Lee, Lars Wiederman).

Japan: Seiyu department store, Kibun, ASA Tokyo (Ms. Kojima), Kanji Tsuchiya, Japan Soymilk Assoc., Sano Rinji, Kikori, Prasad and natural foods, Goro Kanasugi and tempeh, Tsuchiya soymilk #1, Kikkoman at Noda (Yokotsuka #1, Mizunuma, Plant #6 modern, Yokotsuka #2, Goyo Gura, Noda Museum, Noda Library, Mr. Ichiyama), Morinaga, Kikkoman Tokyo, Japan Packaged Tofu Assoc., Natto statistics, Asahimatsu, Natto-tempeh meeting, Mr. Katoh, Nakano Masahiro, Mr. Iitsuka of Kikkoman, Daizu Shokuhin Kaihatsu, Tsuchiya #2, Nagayama, soynuts, oil association, kinako, Ishige, Mr. Mori and soy sprouts, Katoh, Arai-san, Kodansha, Nagayama and kinako, Dr. Nakano #2, Arai shoyu, Tsuchiya #3, Tenmi. Address: Lafayette, California.

2661. Shurtleff, William; Aoyagi, Akiko. 1983. The book of tofu. 2nd ed. Berkeley, California: Ten Speed Press. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Aug. 28 cm. [321 ref]

• **Summary:** Three parts of this new edition have been extensively revised and updated: (1) “Tofu Makers in the West” (p. 313-16) has been updated and now includes 310 tofu producers in the Western world (with the name, address, phone number, and contact person for each company), arranged by state or foreign country. This is the only tofu book containing such a directory.

(2) The “Bibliography” (p. 319-324) has been a greatly expanded and updated. It now contains 321 publications on tofu, including all known scientific and nutritional journal articles, the 33 books about tofu written in North America since publication of the first edition of *The Book of Tofu* in 1975, and other key articles and books about tofu from East Asia and Europe, the earliest from Europe dating back to 1613!

(3) An updated listing of “People and Institutions Connected with Tofu” in the U.S. and around the world, including researchers, major tofu manufacturers in Japan, trade associations, publications, equipment dealers, and tofu apprenticeship programs.

The “Glossary” (p. 325-27) has been condensed to make space for the expanded bibliography and back matter. There is a new page about the Soyfoods Center (p. 333). The page “About the Authors” (autobiographical) has been expanded,

and the photograph has been updated. "Sending Tofu to the Four Directions" (p. 335) and the inside rear cover have both been updated. Still contains 500 vegetarian recipes—both western and eastern style.

Note: A news release of 17 Aug. 1983 states: "The Book of Tofu, which introduced the Western world to tofu and inspired the founding of more than 200 tofu shops and soy dairies in North America, has sold 340,000 copies to date, making it the world's best-seller on this popular new 'protein source of the future.'" Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2662. Shurtleff, William; Aoyagi, Akiko. 1983. History of soyfoods in China. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 19 p. Aug. Unpublished typescript.

• **Summary:** A comprehensive history of the subject.

Contents: Introduction: Soyfoods widely used in all parts of China. Overview of Chinese food and diet. Animal products and soyfoods as protein sources in China. China's great cuisines and soyfoods. General characteristics of Chinese soyfoods industry. Information on soyfoods. Soy trade associations. Attitudes toward technology, modernization, and traditional soyfoods. Private enterprise, bureaucracy, and competing ministries. Availability of soyfoods. Address: Lafayette, California. Phone: 415-283-2991.

2663. Ito, Kiyoe. 1983. Soy beans as a source of protein in Japan. In: Ajia-Chiku Kokusai Kaseigaku Kaigi Hokoku (Proceedings of the International Asian Conference on Nutrition). See p. 60-61. Held Aug/Sept. 1983. [Eng]

• **Summary:** Rice cultivation began in Japan about 2,000 years ago. Buddhism was imported to Japan from China through Korea, and with it the prohibition against eating meat [of four-legged animals]. "Therefore, the diet and cuisine depended exclusively on rice, bean, vegetables, and fish. Especially, soy beans have been widely used as materials for plant protein foods such as miso (fermented soy bean paste), tofu (bean curd), shoyu (soy sauce), yuba (dried soy milk film) and others." Also describes the increasing westernization of the Japanese diet, especially after World War II. Address: Tokyo Gakugei Univ., Tokyo, Japan.

2664. McDougall, John A.; McDougall, Mary A. 1983. The McDougall plan. New Century Publishers Inc., 220 Old New Brunswick Rd., Piscataway, NJ 08854. 340 p. Foreword by Nathan Pritikin (8/83). General index and recipe index. 24 cm. [804* ref]

• **Summary:** This carefully researched and documented book and cookbook argues convincingly in favor of a vegan diet that uses no animal products, that is low in fats, calories, and sodium, and rich in complex carbohydrates. Pages 89-90 give the percentage of calories from fats in various foods under 3 categories: low-fat vegetable foods

(incl. oatmeal 16% of calories from fat, apple 9%, broccoli 9%), high-fat vegetable foods (incl. avocados 88% of calories from fat, almonds 82%, peanut butter 77%, sunflower seeds 76%, tofu 53%, soybeans 40%, wheat germ 27%, tempeh 25%), and animal foods (bacon 94%, t-bone steak 82%, frankfurters 80%, cheddar cheese 73%, egg 65%, tuna in oil 64%, milk [whole 3.5% fat] 49%, ice cream 49%, milk low-fat 31%, chicken [light-skinned] 18%, tuna in water 6%, buttermilk 3%, skim milk 2%).

Note: The author, however, argues repeatedly against the use of tofu and tempeh based on the "percentage of calories from fat" concept. His figures are correct but we and many nutritionists feel the basic concept, originally popularized by Nathan Pritikin, overlooks two key points: (1) the percentage of water in the food, and (2) the average serving size.

Page 198, in a section on rich [high fat] plant foods, states that tofu, tempeh, soybeans, textured vegetable protein (TVP), and miso contain excessive fat and most are high in calories. "The rich plant foods may account for a small portion of your daily food (less than 10 percent of your calories per day) but only after you have attained the level of health you are striving for. In general, these foods are more harmful than health-supporting. Never eat these foods if you have problems with your health that remain unsolved. If you begin using this group of foods and find that you are also gaining weight or getting back some of your old ailments, then stop eating these foods immediately."

Appendix I, p. 322-28 contains a table listing the percentage of calories from protein, fat, and carbohydrates in many foods. It also gives the calorie concentration (in calories per gram) for each food; foods with a low concentration aid in weight-loss programs. Tofu has only 0.72 calories per gram, and soy sprouts only 0.46; both are low. No soyfoods are used in the many recipes in this book.

Note: According to a colleague, John McDougall suffered a stroke at age 19, which led to much of his current interest in diet and health. He is not a Seventh-day Adventist. Address: 1. M.D. Both: Near Kailua Bay, Oahu, Hawaii.

2665. Shurtleff, William; Aoyagi, Akiko. 1983. The book of miso. 2nd ed. Berkeley, California: Ten Speed Press. 278 p. Illust. by Akiko Aoyagi Shurtleff. Index. Sept. 28 cm. [223 ref]

• **Summary:** Contents: What is miso? Preface to the second edition. Preface to the first edition. Acknowledgments. Part I. Miso: Savory, High Protein Seasoning. 1. Soybeans, protein and world hunger. 2. Miso as a food. 3. The miracle of fermentation. 4. The varieties of miso: Regular Miso: Rice miso (red / aka, light-yellow / shinshu, mellow red / amakuchi akamiso, mellow beige / amakuchi tanshoku, mellow white / shiro koji, sweet red / edo or edo ama-miso,

sweet white / Kyoto shiro miso), barley miso (karakuchi mugi, mellow barley / amakuchi mugi), soybean miso / mamé miso (Hatcho miso, soybean miso / mame miso, tamari miso). Special Miso: Finger lickin' miso / Namemiso (Kinzanji miso, moromi miso, hishio, namémiso, natto miso, goto miso), sweet simmered miso / nerimiso. Modern Miso: Akadashi miso, dehydrated or freeze-dried miso, low-salt / high-protein miso.

Part II. Cooking with Miso (400 recipes). 5. Getting started. 6. Recipes from East and West. Part III. The Preparation of Miso. 7. Making miso at home and in communities. 8. Japanese farmhouse miso. 9. The traditional miso shop. 10. The modern miso factory. Appendixes: A. A history of miso and soybean chiang. B. Other East Asian misos: Chinese chiang, Korean jang and Indonesian Taucho. C. The microbiology and biochemistry of miso fermentation. D. Miso manufacturers in the West. E. People and institutions connected with miso. F. Miso with seafoods, chicken, and meat. G. Measures, weights, and equivalents. H. So you want to study miso in Japan? I. Miso additives. Bibliography [223 references]. Glossary. About the authors (autobiographical). The Soyfoods Center.

In May 1993 a new printing of this book appeared, containing many small changes made by the authors. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

2666. Shurtleff, William. 1983. Notes from a phone talk with Richard Leviton concerning his trip across the USA in Sept. 1983 visiting soyfoods companies and giving talks. Lafayette, California. 3 p. Sept. Unpublished manuscript. • **Summary:** Discusses: Nasoya, New England Soy Dairy (doing radio ads and videos in supers; making 45,000 lb/week of tofu), Hinode tofu, Lotus Cafe, Penguin's (chocolate is their favorite soy ice cream favorite), Northern Soy and Wegman's, Vegetarian Times, Emperor of Japan to give Dr. Clifford Hesseltine a high medal at end November, Bob Davis to move to Nevada City, Kraft bought 15 Okita packaging machines. Richard Jennings, his marriage, Southwest Soyfoods, and chilled water as an alternative to pasteurization; his shop in Ecuador is now closed. Nasoya makes 22,000 lb/week of tofu with no outside money. David Mintz was on Good Morning America talking about Tofutti. The Farm (Summertown, Tennessee) now makes only liquid soymilk, no powder. Tom Leonard and Jim Hemminger are selling tofu to Community Mercantile. Leonard was in Arkansas in 1977, first batch of miso in Dec. 1978. Now makes 500 lb/week. Well Spring is a new miso maker in Colorado. White Wave is making 12,000 lb/week of tofu and doing well financially, as new frozen entrees & nut butters, tofu lasagne. Edensoy is outselling SanJ soymilk by 2 to 1. Time magazine Sept. 19 insert. American Dietetic Assoc. will list tofu as a good protein source. Jim Cooley of Lawrence, Kansas. He started making

tofu in 1977. Legume Inc.'s new product line out Oct. 5; lists names of each product. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

2667. American Miso Co. 1983. Agreement. Rutherfordton, North Carolina. 4 p. Oct. 1. Unpublished typescript.

• **Summary:** This agreement is effective as of 1 Oct. 1983. Barry Evans desires to purchase and John and Janet Belleme desire to sell 900 shares of common stock in the American Miso Co. The price for the shares and for future consulting and training services will be \$30,000. John will consult on a full-time basis for the first 3 months after the closing and on a part-time basis for the last 3 months. He will be responsible for training individuals to produce koji and miso and to operate the miso factory. Signed Barry E. Evans, John Belleme, and Janet Belleme. Address: Rutherfordton, North Carolina.

2668. Noda, Fumio; Hayashi, K.; Mogi, K.; et al. Assignors to Kikkoman Shoyu Company Ltd. (Chiba, Japan). 1983. Method of producing koji products. *U.S. Patent* 4,407,826. Oct. 4. 8 p. Application filed 17 Sept. 1981. Application also filed in Japan on 12 Sept 1978. [6 ref] Address: 1. Kamagaya; 2. Kashiwa; 3. Noda. All: Japan.

2669. Oda, Lorraine. 1983. The Hawaiian Miso & Soy Co. Ltd. Carrying on a family tradition. *Hawaii Herald*. Oct. 7. p. 1, 8, 17.

• **Summary:** William Higa's miso factory now makes 250 tons of Maru-Hi brand Shiro (white) miso and Aka (red) miso a year, plus 90 tons a year of miso-marinated butterfish (butterfish kasuzuke; black codfish marinated in sake lees). He took over the family business in 1956. William's father, George Taru Higa, started the business in 1936. It moved from North School Street, to Iwilei Rd., then near Vineyard Blvd., before settling in 1946 in the industrial area of Kalihi.

Photos show: (1) The original Yamaju Shoyu & Koji Miso Co. factory in 1938, makers of Shiro Koji Miso and Yamaju Shoyu. Standing by wooden kegs of miso are the founders Henry, Shinyei, and George Taru Higa. The company sign appears clearly over the factory door. Long, dark automobiles from the 1930s are parked at the left and right. (2) William Higa standing inside an air-conditioned warehouse; bags of Iowa soybeans are stacked up to the roof behind him. (3) Five hundred pounds of rice are cooked at a time. (4) Soybeans are washed in a rotating steel cylinder, then soaked in steel barrels. (5) A large machine mixes cooked soybeans with cultured rice (koji) and salt. (6) The mixture is ground to a paste. (7) Women pack and weigh containers of miso. (8) Women prepare butterfish misozuke. Address: Honolulu.

2670. Brody, Jane E. 1983. Assessing what is good for you and what is not. *New York Times*. Oct. 12. p. C1, C8.

• **Summary:** Those who eat wisely “can expect an improvement in well-being and a decreased risk of developing such diet-related disorders as heart disease, cancer, high blood pressure, and obesity.” But “Myths abound in the health food industry and, experts, say, many believers are being hoodwinked.” Discusses: Sweeteners, raw foods, salty seasonings (including miso and soy sauce), granolas, snacks and candies, nuts and seeds (including peanut butter), oils (cold-pressed oils contain more vitamin E but they become rancid more quickly), “health” foods high in fat, yogurt and frozen yogurt, herbal teas, and pastas (including those enriched with soy flour).

“A tablespoon of soy sauce contains about half a teaspoon of salt. Tamari sauce is hardly less salty than ordinary soy, but Kikkoman makes a reduced-salt soy that has 47 percent less salt than regular soy. Miso, another popular health-food flavoring, contains nearly as much salt as soy sauce. Domestic soy sauce is generally much saltier than imported brands.”

2671. **Product Name:** N.Y. Miso [Mellow White, Red, or Barley; 1 lb., or Bulk].

Manufacturer’s Name: Appropriate Foods, Inc. (Marketer-Distributor).

Manufacturer’s Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1983. October.

New Product–Documentation: Catalog. 1983. June.

2672. **Product Name:** [Miso].

Manufacturer’s Name: Communante de l’Arche.

Manufacturer’s Address: La Boire Noble, 34260 Le Bousquet d’Orb, Herault, France.

Date of Introduction: 1983. October.

New Product–Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

2673. Hesseltine, C.W. 1983. The future of fermented foods. *Nutrition Reviews* 41(10):293-301. Oct. [20 ref]

• **Summary:** Contents: Advantages of food fermentation, factors having an adverse effect on the use of fermented foods, nutritional and economic data on some fermented foods, future changes in fermented foods, factors that may lead to growth in the use of fermented foods (scientific interest in fermented foods, prevention of food poisoning, fermentation and increased shelf life, improvement of the physical properties of the product, interest in natural products of plant origin, modification of the substrate, interest in more healthy food, necessity of increased consumption of plant materials as population increases, cultural and religious grounds, and migration of people since World War II). Summary. Contains considerable

information on fermented soyfoods. Address: NRRC, Peoria, Illinois.

2674. **Product Name:** [Leguvito Miso].

Manufacturer’s Name: Industria & Comercio de Molhos Leguvita Ltda.

Manufacturer’s Address: Rua Heliotropos 595, Mogi das Cruzes, S.P., Brazil. Phone: 469-0320.

Date of Introduction: 1983. October.

New Product–Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

2675. **Product Name:** [Miso].

Manufacturer’s Name: Jacquot Roland.

Manufacturer’s Address: 10 Rue Bretagne 91390, Ris Orangis, France.

Date of Introduction: 1983. October.

New Product–Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

2676. **Product Name:** [Miso].

Manufacturer’s Name: Les Sept Marches.

Manufacturer’s Address: Les Cruettes, Chemin Des Mouille, Poisy 74330, France.

Date of Introduction: 1983. October.

New Product–Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

2677. Leviton, Richard. 1983. The market boom for soyfoods in the United States. Paper presented before the Euvepro General Assembly, Parma, Italy. Oct. 11. 13 p. Unpublished typescript on Soyfoods magazine letterhead..

• **Summary:** An excellent overview of the subject, presented with color slides. Contents: Introduction. The U.S. soyfoods industry and market. Eight reasons for the soyfoods boom in America. New U.S. soyfoods products. Ten trends in the soyfoods market. The European soyfoods boom (what it is and 4 steps to expand it). Conclusions. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2678. Leviton, Richard. 1983. The soy deli case. *Whole Foods (Berkeley, California)*. Oct. p. 27-28.

• **Summary:** “The Hinode Tofu Company of Los Angeles recently propelled the industry years by running a series of full page, full color ads for their branded tofu in regional editions of *Good Housekeeping*, *Weight Watchers*, *Runner’s World*, *Bon Appetit*, and the *Los Angeles Times* (circulation: one million). Their ad included a 15¢ discount coupon (eight million were printed in total). Edward & Sons has been advertising its Miso-Cup instant soups and Miso+Plus Chive and Jalapeno dry miso dips in national trade and consumer publications. And Farm Foods, with their expanding line of Ice Bean soy ice creams (hard packed and

soft-serve) recently launched a cooperative advertising and discount program in cooperation with retailers..."

The Real Food Store on Food Store on Polk Street in San Francisco has introduced what is probably the first distinctly labeled soy case. It consists of a self-standing reach-in cooler filled with about 34 different soyfood products, from bulk and packaged tofu to soy milk and tempeh burgers.

"At press time, Bread & Circus, a leading natural foods retailer in Boston, was planning a week-long soy promotion in cooperation with a half dozen Bay State producers... Elsewhere, Tree of Life, Florida's \$35 million distributor and manufacturer, designated August as Soyfoods Month and ran promotions in their 60-page monthly newsletter sent to their 2,000 accounts. Soyfoods were presented as that month's 'Super Specials' with 'deep pocket discount' for retailers, reports Morris Shriftman, vice president." Address: Colrain, Massachusetts.

2679. Leviton, Richard. 1983. Soyfoods in your kitchen: The variety is infinite! *Your Good Health: Review & Digest* 1(6):16-18. Oct.

• **Summary:** An introduction to tofu and tofu products, tofu main dishes, tofu desserts, tempeh, miso, soysage, "green soybean pods in plastic bags," soy nuts, natto, hamanatto, and yuba.

Gives recipe names and ideas for each soyfood type, but no actual recipes. Concludes with the thought: "If you remember this diversity of applications of tofu and tempeh... never again will you comment, 'Tofu is nice but it's just a bland white block.'" Address: Colrain, Massachusetts 01340.

2680. Mandoe, Bonnie. 1983. Savory meatless soups. *Bestways*. Oct. p. 88-89.

• **Summary:** Contains recipes for: Miso broth. Curried miso soup. Miso minestrone.

2681. **Product Name:** [Miso].

Manufacturer's Name: Maruviti.

Manufacturer's Address: Rua Ibituruna 264, Jabaquara, Sao Paulo, S.P., Brazil. Phone: 275-4533.

Date of Introduction: 1983. October.

New Product-Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

2682. **Product Name:** [Marutaka Miso].

Manufacturer's Name: Masakazu Takai.

Manufacturer's Address: Rua Venceslau, Brazil, S/N C.P. 136, Ribeirao Pires, S.P., Brazil. Phone: 459-3303.

Date of Introduction: 1983. October.

New Product-Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

2683. **Product Name:** [Miso].

Foreign Name: Miso.

Manufacturer's Name: Sakura-Nakaya Alimentos.

Manufacturer's Address: Rua Ordenacoes 151, C.P. 16131, Sao Paulo, S.P., Brazil. Phone: 295-4117.

Date of Introduction: 1983. October.

New Product-Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

2684. **Product Name:** [Miso].

Manufacturer's Name: Soy Joy.

Manufacturer's Address: Chemin De La Praelz 1, Nyon CH-1260, Switzerland. Phone: 022-619-312.

Date of Introduction: 1983. October.

New Product-Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255. Marty Halsey runs the company.

2685. **Product Name:** [Kikko Miso].

Manufacturer's Name: Takai & Cia Ltda.

Manufacturer's Address: Estrada de Suzano a Ribeiro Pires Km 11. Vila Idelandia Suzano, S.P., Brazil. Phone: 476-1447.

Date of Introduction: 1983. October.

New Product-Documentation: Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

2686. Erewhon Mail Order. 1983. Erewhon. Natural foods mail order catalog. Brookline, Massachusetts. 16 p. Nov. 1. Catalog and price list.

• **Summary:** This is a new mail order catalog, whose prices are effective from 1 Nov. 1983. On the front cover is a woodblock print of two wooden barrels, a wooden tub, two sacks of corn, a sheaf of wheat, several ears of corn, and a scythe. Erewhon is located at 26 Washington St. in Brookline Village—also the home of Erewhon Mail Order. There are retail stores at 342 Newbury St. in Boston and 1731 Massachusetts Ave. in Cambridge. Products grown organically, without chemicals, are marked with the code "OG."

Contents: Whole grains & cereals (incl. Erewhon granolas). Flours. Pastas. Beans (incl. azuki beans, black soybeans from Japan, yellow soybeans from Minnesota). Seeds, nuts & dried fruit (incl. alfalfa seeds, sesame seeds, and tamari roasted nuts and seeds). Sea vegetables. Misos and tamari soy sauces. Japanese macrobiotic specialty products. Condiments, vinegars & sauces. Sea salts. Erewhon vegetable oils. Baking & home products (incl. koji rice for making amasake and miso, nigari for making tofu, tempeh starter). Sweeteners (Yinni rice syrup, barley malt, maple syrup, clover honey, wildflower honey {unfiltered}). Erewhon nut butters (Almond, cashew, peanut, sesame, sunflower). Fruit spreads. Snack foods. Sweets. Perishables (incl. bread, mochi, produce, amazake, tempeh). Beverages.

Supplements. Natural cosmetics & body care. Cookware & appliances. Books & publications. Ordering & shipping information. Zone & shipping charts. Address: 236 Washington Street, Brookline, Massachusetts 02146. Phone: 1-800-222-802 or (617) 738-45168.

2687. Shurtleff, William; Aoyagi, Akiko. 1983. George Ohsawa and the macrobiotic movement: History of work with soyfoods. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 46 p. Nov. 10. 28 cm. Unpublished typescript. [92* ref]

• **Summary:** A comprehensive history of the subject. Contents: Introduction: Acknowledgement of Ron Kotzsch. The roots of macrobiotics: *Yellow Emperor's Classic of Internal Medicine*, Shinto classics, Ekiken Kaibara (1630-1714), Nanboku Mizuno (late 1700's-early 1800's), Sagen Ishizuka (1850-1910), Manabu Nishibata. The life of George Ohsawa (1893-1966): To Paris 1929-36, return to Japan and World War II, Internationalism 1946-53, ran school Centre Ignoramus, "world journey" 1953 to India, Africa, then Paris, started Muso Shokuhin (macrobiotic food company) in Osaka, Japan, in 1959, work in Europe 1956-66, earliest reference seen to soy (miso) in 1956, first visit to New York City Dec. 1959, post-visit institutions, second visit 1960, first American macrobiotic summer camp on Long Island, exodus to Chico, California, Aug. 1961 to escape feared nuclear war, establishment of Chico-San, move of Michio and Aveline Kushi to Boston in 1963, *Zen Cookery* 1963, *Zen Macrobiotics* second edition 1965, growth of the movement, Beth Ann Simon's death blamed on macrobiotics in 1965, response of U.S. Food and Drug Administration is to close N.Y. Ohsawa Foundation, Ohsawa's general macrobiotic teaching, view of Western civilization as one in crisis, with fundamental biological change required to improve it, death in 1966 in Tokyo at age 72 of cardiac failure, seen as sage by his followers, seen as inconsistent crackpot by his critics, work carried on by wife Lima and by his students. Development of macrobiotics in Boston: Kushi's lectures and classes from 1965, early food sales from house, Erewhon's start in 1966 and subsequent growth, establishment of organic suppliers in the U.S., first imports from Japan 1968, 1970 natural foods boom, National Food Distributors Association, *East West Journal*, Autumn Press founded in Japan by macrobiotic student from Boston, Boston institutes, centers, and foundations from 1972 on, increasing popularity of soyfoods (tofu, tempeh, and miso) in Boston, Erewhon from 1973 to bankruptcy in 1981 and sale to Ronald Rossetti in 1982. Development of macrobiotics in New York City: Void after departure of Aihara group and Kushis, establishment of Infinity Foods in mid-1960's, Michel Abehsera's restaurants, cookbooks, and tour. Development of macrobiotics in California: Influence of Chico-San on natural foods movement to 1970, Lundberg rice 1968-69,

Yamazaki miso and shoyu 1970, 1972 fire in Chico-San warehouse, educational activities and institutions, growth of Chico-San, Noboru Muramoto. Nutritional views of macrobiotic diets: General critical attitude from 1965 to 1977, not countered by macrobiotic leaders, scientific studies pro and con, specific critique of the diet, turnaround in attitude since 1977 (*Dietary Goals* published by U.S. Senate's McGovern Committee), Dr. Mendelsohn, Nathan Pritikin, cancer cures and Anthony Sattilaro (1980). Macrobiotics in Europe and Latin America: First European company Lima N.V., other distributors, centers, publications, tours, active in South America since 1954. A major contribution: Type of overall influence on soyfoods, number of followers in 1981. Address: Lafayette, California. Phone: 415-283-2991.

2688. Shurtleff, William; Aoyagi, Akiko. 1983. George Ohsawa and the macrobiotic movement: Noboru Muramoto (Document part). Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 46 p. See p. 39-40. Nov. 10. 28 cm. Unpublished typescript.

• **Summary:** "In June 1971 Noboru Muramoto emigrated to America from Japan and lived with the Aiharas in San Francisco at GOMF. In Japan he had studied Chinese literature and philosophy at Tohoku University and Kanazawa University, then began his own study and practice of herbal medicine. He had begun studying Ohsawa's writings in 1942, then studied with Ohsawa after 1964, while running a family business cleaning the cotton from futons. In 1973 he gave a series of lectures in New York which were published that year as the popular book, *Healing Ourselves* (Avon/Swan House). Many uses of miso and natural shoyu were given; soybeans and tofu were not recommended in the book, except that tofu was used in making poultice-like 'plasters' for use in healing. In 1974 Muramoto started Rising Sun, a macrobiotic storefront containing the Herb Tea Co. in San Francisco. Here he gave classes on making miso and shoyu. In November 1976 he acquired Top of the World Ranch on 140 acres of land near Glen Ellen, California, and established Asunaro Institute, a residential program of macrobiotic studies. He also published a newsletter 'Asunaro Notes.' At Asunaro he set up a regular shop for making miso and shoyu, complete with a nice koji incubation room. Many unique and American-style misos were developed, including some made with peanuts, garbanzos (chickpeas), azuki beans, and even natto. A number of Americans apprenticed at the miso-shoyu school. A nice article about the school, 'Making Miso in America,' appeared in the *East West Journal* (Lachman 1978). In March 1979 Muramoto displayed his miso and shoyu equipment and samples of his products at the famous New Earth Exposition in San Francisco. He also sold these products at Rising Sun, and some customers swore that they

were the best in America.” Address: Lafayette, California. Phone: 415-283-2991.

2689. Bates, Cynthia. 1983. Re: Thanks for new editions of *The Book of Tofu* and *The Book of Miso*. Letter to William Shurtleff at Soyfoods Center, Nov. 25. 2 p. Handwritten, with signature on letterhead.

• **Summary:** Cynthia would like to make some miso this winter in some big wooden barrels, but they are moving the tempeh shop, so they’ll have to wait and see. Address: 156 Drakes Lane, Summertown, Tennessee 38483. Phone: (615) 964-3584.

2690. Baldwin, Marjorie V. 1983. Re: Publications on aflatoxins in miso, soy sauce, and koji. Letter to William Shurtleff at Soyfoods Center, Nov. 27. 2 p. [4 ref]

• **Summary:** Most of these articles are cited in *Chemical Abstracts*. The earliest one was published in 1977. Address: M.D., Journal of Health & Healing, P.O. Box 109, Wildwood, Georgia 30757.

2691. Leviton, Richard. 1983. Long summary of trip to Europe sponsored by the American Soybean Association (Interview). *SoyaScan Notes*. Nov. 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Discusses: Euvepro in Italy, ASA in Italy, Alpro / Vandemoortele, British Arkady, the confusion of mung beans and soybeans, tofu made from soy protein isolates that doesn’t develop a spongy texture when frozen, regulatory restrictions, Bernard Storup, tofu burgers, Prolait, Le Bol en Bois, ASA soybean program in England, desire in Eastern Europe for more meat, the many small private businesses in Hungary, Soyana’s excellent products (Daenzer makes 5,000 lb/week of tofu in Switzerland), the Reformhaus chain, Vietnamese tofu shop in Dornach, less refrigeration at the distribution and retail levels in Europe has led to new packaging, soyfoods have started to appear in the big international food trade shows in Europe (e.g. ANUGA). Witte Wonder opened in 1981, now makes 1,000 lb/week of seitan. Cauldron Foods (UK) makes mostly tofu burgers, and has a lot of good technical innovations such as control panels. Cauldron also makes a fermented tofu spread. Dragon & Phoenix (UK) makes several tons of tofu a day. In July Wolfgang Furth-Kuby and Lucas Kelterborn (Germany) published the first issue of a European soyfoods newsletter titled *Rundbrief*. Paul Jones (UK) has 2 plants and makes 5,000 lb/week of tofu. One man from Cauldron Foods was Paul Jones’ original partner. Full of Beans also makes miso.

Oct. 28. “I have an all morning meeting at ASA’s headquarters in Brussels, Belgium, with Dennis Blankenship, Rita Batens, Roger Leysen, and Michael Martin. It is proposed that I chair the 1984 First European Soyfoods Conference to be held in late September, probably

in Amsterdam. ASA agrees to be a sponsor and to help secure another 6 or so sponsors. ASA also agreed to finance the production and mailing of a bi-monthly European Soyfoods Newsletter.” Address: Colrain, Massachusetts.

2692. Elwell, Christian; Elwell, Gaella. 1983 Re: About South River Miso Co. Letter to friends. 1 p. Undated. Handwritten.

• **Summary:** In the upper right corner is a logo showing three waves in a circle. This undated letter reads: “South River Miso Company is a family business/service located at our farm by the South River in the Pioneer valley region of western Massachusetts. We are a continuation of the Ohio Miso Company founded by Thom Leonard and Dick Kluding in 1979. Our shop is small, the equipment simple, the process traditional and labor intensive. Because we choose to be a small shop, we can practice miso making as a craft, continuing the tradition of centuries, always mindful that we do not, in fact, make miso, but merely do our best to provide the ideal conditions for the miso to ripen and mature.

“We use organically grown, large-seeded soybeans. Our short grain brown rice is organically grown by the Lundberg brothers of Richvale, California. The organically grown barley is lightly polished, rather than being completely stripped of its bran as is commercial pearled barley. These, plus selected varieties of solar dried sea salt, deep well water, and *Aspergillus oryzae* spores are the only ingredients used in our miso.

“At the heart of our shop is a massive masonry stove where all the cooking is done in a large cauldron heated directly by wood fire. The first step of miso making is transforming the grain into sweet, fragrant koji. This is done by inoculating steamed rice or barley with spores of *Aspergillus oryzae* and allowing the pure strain of mold to grow on the grain. The koji grows in small wooden trays, carefully tended by hand during a two-day incubation period in the warm, humid koji room. After mixing the mashed, cooked soybeans with the ripened koji and the proper amount of sea salt, we pack the resulting miso into wooden fermentation vats where it ages until ready for harvest.

“We do not puree our miso, leaving it with the traditional whole-koji texture. It is not pasteurized or heat-treated to increase its shelf life; neither are any preservatives used. South River Miso is a living food containing many natural digestive enzymes, yeasts, *Lactobacillus* and other bacteria which aid digestion and are considered beneficial to good health.

“We hope you will enjoy naturally aged, unpasteurized miso. We welcome your comments or suggestions anytime. Visitors to the shop are always welcome by appointment.”

Talk with Christian and Gaella Elwell. 2000. Feb. 13. This letter was written after the three-family community

broke up in the fall of 1983, but Christian and Gaella continued to use the community logo. Much of the first paragraph is paraphrased from a leaflet written in Oct. 1979 by Thom Leonard and Richard Kluding. The letter was probably written for and sent to new customers who responded to the company's first ad in *East West Journal*. Address: South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

2693. **Product Name:** Homemaker Powdered Koji Spore Kits for Miso [Red Rice, Barley, and Soybean], and for Shoyu.

Manufacturer's Name: GEM Cultures.

Manufacturer's Address: 30301 Sherwood Rd., Fort Bragg, CA 95437. Phone: 707-964-2922.

Date of Introduction: 1983. November.

New Product–Documentation: Letter from Betty Stechmeyer of GEM Cultures. 1991. Oct. 18. These basic products were introduced in Nov. 1983. The concentrated spores were extended with organic rice flour to make the starters easier to measure and use.

2694. **Product Name:** Chick Pea Miso.

Manufacturer's Name: Great Life Products.

Manufacturer's Address: P.O. Box 2546, Escondido, CA 92025.

Date of Introduction: 1983. November.

Ingredients: Chick peas, rice koji, natural sea salt, soybeans (optional).

Wt/Vol., Packaging, Price: 1 lb plastic bags.

How Stored: Refrigerated preferably.

New Product–Documentation: Talk with John Belleme of North Carolina. 1996. Aug. 27. John made Chick Peaso, but he got the idea from Muramoto Sensei (probably via Lino Stanchich in about 1982-83), who made and sold small batches of chick pea miso at his Asunaro Eastern Studies Institute, high on Mt. Veeder, in Glen Ellen, California. Muramoto's product, though sold mostly to his students and friends, was probably America's first (perhaps the world's first) commercial chick pea miso. However John thinks that the miso may have also contained some soybeans—although he has no idea what proportion.

Talk with Lino Stanchich. 2002. Sept. 11. To the best of Lino's knowledge, Noboru Muramoto sensei made the first chick pea miso in the Western world. He started selling it in the fall of 1983. It was a sweet miso, made with rice koji. Some batches contained soybeans, while others did not.

2695. Hesseltine, C.W. 1983. The safety of shoyu. Paper presented to the Japan Soysauce Brewers' Assoc. meeting. 36 p. Held 29 Nov. 1983, Tokyo. [33 ref]

• **Summary:** Historical background: In 1953, Dr. Hesseltine went from the fermentation industry to the Northern Regional Research Laboratory (Peoria, Illinois) as head of

the ARS [Agricultural Research Service] Culture Collection. He had only a faint idea of how shoyu was made and he had never heard of miso, natto, or tofu. Shortly after his arrival, probably in 1953, he received a visit from Prof. Kin-ichiro Sakaguchi of the University of Tokyo, an authority on traditional Japanese fermented foods and one of the founders of the modern fermentation industry in Japan. Records show that in 1953 Dr. Sakaguchi received cultures from the ARS collection. His laboratory trained many students and much of his work was directly related to food fermentations involving soybeans and cereals.

In 1948 Dr. A.K. Smith of the NRRL visited Japan and China and recognized the tremendous amount of soybeans being used as human food. "The Western world had little or no understanding of the importance and use of these foods in the diet of Oriental people. He strongly recommended to anyone who would listen that there should be research on these foods and an exchange of scientists." In 1949 and later in 1958 Dr. Smith published a detailed report of his travels. In late 1958 two eminent Japanese scientists, Dr. Kazuo Shibasaki and Dr. Tokuji Watanabe arrived in Peoria to study traditional soybean foods. Dr. Shibasaki (who later became Professor of Agricultural Chemistry at Tohoku University) worked with Dr. Hesseltine on miso fermentation, and Dr. Watanabe worked with Dr. Smith on tofu.

"Before the year was up I became utterly fascinated with the process of making koji and with the delicious foods that could be made from the lowly soybean. But even broader than these studies on fermented foods was the concept of the solid state fermentation and the enzymes that could be made with this technique. Ever since that year of work with Dr. Shibasaki, I have been interested in fermented foods—not just those used in Japan, but worldwide." Address: NRRC, Peoria, Illinois.

2696. Jackson, Vicki. 1983. Squirrels vegetarian cook book. William Brooks Queensland, 921 Kingsford Smith Drive, Eagle Farm, Brisbane 4007, Queensland, Australia. 143 p. Illust. by Vicki Jackson. Index. Nov. 29 cm. 2nd ed. 1984.

• **Summary:** This hand-lettered cookbook was written for Squirrels Vegetarian Restaurant, Corner Melbourne & Edmonstone Streets, South Brisbane. The owners, Bronwyn Moses and Diana Mitchell, plan to open Squirrels on the Park, a second restaurant at 685 South Dowling St., Moore Park, Sydney, by Sept. 1984.

Soy-related recipes include: Chinese tofu soup (p. 12). Broccoli-pasta salad (with Soyaroni pasta, p. 30). Soyaroni marinaria [marinara?] (p. 52). Saucy soy stew (with cooked soybeans, p. 67). Tofu & peppercorn strudel (p. 79). About tofu (p. 86). Tofu satays with peanut sauce (p. 87). Battered tofu in sweet & sour sauce (p. 88). Tofu & peanut sauce (p. 89). Tofu & veggie curry (p. 90). Tofu & mushroom on

spinach pasta (p. 91). Tofu & spinach loaf (p. 92). Tofu Chinese style (p. 93).

About tempeh, by Julie & Michael Joyce (p. 94; "Little did we know in early 1982, when we first ate tempeh made by Cyril & Ellie Cain of Eumundi, Sunshine Coast, that we were soon to become tempeh makers." They supply Squirrels with the tempeh they make). Tempeh chips (p. 96). Tempeh & tomato bake (p. 97). Tempeh sweet & sour (p. 98). Tempeh Indonesian style (p. 99). Tempeh Chinese style (p. 100). Tofu dessert (p. 125). Pages 141-42 describe tamari, tempeh, tofu, and miso. Address: Brisbane, Queensland, Australia.

2697. Leonard, Tom; Jacobs, Leonard. 1983. Choosing the best sea salt. Lab reports and production methods should be considered. *East West Journal*. Nov. p. 16, 18-20. Address: Boston, Massachusetts.

2698. **Product Name:** [Lima Heiwa Instant Miso Soups (Regular, and Red)].
Foreign Name: Lima Instant Miso Soup.
Manufacturer's Name: Lima Foods.
Manufacturer's Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.
Date of Introduction: 1983. November.
Wt/Vol., Packaging, Price: 4 x 10 gm.
How Stored: Shelf stable.
New Product-Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 17. Product seen in Reformhaus health food store in Zurich, Switzerland.

Lima catalogue, price list, and color product brochure. 1989. A color photo shows both labels, one pea green and one red. Both bear the Heiwa brand over the Lima brand. The miso in the red label package has undergone a longer fermentation.

2699. *Manna Bulletin*. 1983. Miso uit Amerika [Miso from America]. 5(7):Nov. [Dut]
 • **Summary:** Describes the miso made by John and Jan Belleme that is now imported to Europe by Manna. Also discusses Instant Miso Soup imported from Edward & Sons in the USA. Address: Meeuwenlaan 70, Amsterdam, Netherlands.

2700. South River Miso Co. 1983. South River Miso: Wisely given miso gives its own wisdom (Ad). *East West Journal*. Nov. p. 87.
 • **Summary:** Describes the different types of miso sold by the company, plus the age and ingredients used in each. The miso is made from the finest organically grown grains and soybeans, processed entirely by hand and gentle wood-fired cooking. An illustration at the bottom shows the miso shop buildings. A logo at the top shows three waves in a circle.

This ad also appeared in the spring 1984 issue (p. 36) of *Macromuse*. A similar ad, but only half as tall, appeared in the Jan. 1984 issue (p. 32) of *East West Journal*. Address: South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

2701. **Product Name:** [Urtekram Soy Sauce, and Hacho Miso].
Manufacturer's Name: Urtekraemmeren (Importer). Made in Japan.
Manufacturer's Address: Larsbjoernsstraede 20, DK-1454 Copenhagen, Denmark.
Date of Introduction: 1983. November.
New Product-Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 23. On a visit to a natural foods store in Aarhus, Denmark, Urtekram brand soy sauce and Hacho miso were sold. Urtekram is sold by a large food distributor in Denmark.

2702. **Product Name:** [Furusato Miso].
Foreign Name: Furusato Miso.
Manufacturer's Name: American Biofoods, Inc.
Manufacturer's Address: P.O. Box 62, Hazlet, NJ 07730.
Date of Introduction: 1983.
Ingredients: Water, soybeans, rice, salt.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product-Documentation: Label. 1983, undated. 5.25 by 6 inches. Plastic. Red, green, yellow and white. Recipes for miso soup and dressing. "No chemical preservatives added."

2703. **Product Name:** Wangja Hot Paste.
Manufacturer's Name: American Biofoods, Inc.
Manufacturer's Address: P.O. Box 62, Hazlet, NJ 07730.
Date of Introduction: 1983.
Ingredients: Water, soybeans, salt, red pepper, rice.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product-Documentation: Label. 1983, undated. 5 by 6.25 inches. Plastic. Red, green and white. Recipe for sweet and sour hot sauce. "No chemical preservatives added."

2704. **Product Name:** Natto Miso, Barley Miso, Rice Miso, Soybean Miso, Mellow White Miso, and Miso Soup.
Manufacturer's Name: Bountiful Bean Plant (Repackager).
Manufacturer's Address: Madison, Wisconsin.
Date of Introduction: 1983.
New Product-Documentation: James Lubbe. 1988. March. Abbreviated History of the Bountiful Bean. "We do not make miso, but buy it in bulk and package it in smaller quantities." Natto miso is 10 oz. A 3-by-5-inch ad from

1986-87 is titled "Unpasteurized Misos. Aged Miso: Barley, rice, soybean. Young miso: Mellow white, natto. We repack U.S. and Japanese misos in Madison, WI." Contains a recipe for Quick Miso Soup.

2705. Product Name: Sunny Tofu Salad (Eggless Egg Salad).

Manufacturer's Name: Bountiful Bean Plant.

Manufacturer's Address: 903 Williamson St., Madison, WI 53703. Phone: 608-251-0595.

Date of Introduction: 1983.

Ingredients: Tofu, celery, scallions, green pepper, pimiento, shoyu soy sauce, lemon juice, mellow white miso, honey, dried parsley turmeric, curry, cumin, cayenne pepper.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product-Documentation: James Lubbe. 1988.

March. Abbreviated History of the Bountiful Bean. A product named simply Sunny was first launched in 1983. Later it was renamed Sunny Tofu, then Sunny Tofu Salad. Label. 1985. 3.5 inch diameter. Self adhesive. Maroon on white. "Eggless Egg Salad."

2706. Chen, Taosheng. 1983. [Evolution of the technology of koji making in China]. *Tiaowei Fushipin Keji (Condiment Science and Technology, China)* No. 7. p. 1-5. [Chi; eng+] Address: Shanghai Univ. of Science and Technology, China.

2707. Product Name: Soken Ramen with Miso Soup.

Manufacturer's Name: Soken Trading, Inc. (Importer). Made in Japan.

Manufacturer's Address: 591 Redwood Highway, Suite 2125, Mill Valley, CA 94941.

Date of Introduction: 1983.

How Stored: Shelf stable.

New Product-Documentation: Mentioned on label of Brown Rice Dinner with Soybeans. Spot in Whole Foods. 1984. March. p. 63. Ad in East West Journal. 1984. June. p. 15. "Soken Ramen. A new look for the original ramen. Still the best tasting." The two varieties are "with miso soup" and "with sea vegetables."

2708. Product Name: Westbrae Natural Buckwheat Ramen. Instant Asian-Style Buckwheat Noodles & Miso Flavor Broth.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: Whole buckwheat flour, sifted wheat flour, water, sea-salt. Vegetable broth: Powdered soy sauce (soybeans, wheat, sea salt), powdered miso (soybeans, seasalt), dried Kombu seaweed, dried

Japanese mushrooms, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.

Wt/Vol., Packaging, Price: 3.1 oz (90 gm).

How Stored: Shelf stable.

Nutrition: Per 45 gm.: Calories 158, protein 5 gm, carbohydrate 32 gm, fat 1 gm.

New Product-Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Orange, brown, white, green, black on yellow. Color picture of bowl of Buckwheat Ramen. Miso Flavor Broth packet. 3 inch square. Foil. Burgundy on silver.

2709. Product Name: Westbrae Natural Seaweed Ramen. Instant Asian-Style Whole-Wheat Noodles & Seaweed Flavor Broth.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: Whole-wheat flour, sifted wheat flour, salt. Soup: Powdered miso (soybeans, white rice, salt). Powdered soy sauce (soybeans, wheat, seasalt), shiitake mushroom powder, onion powder, dried wakame seaweed, garlic salt, ginger powder, black pepper.

Wt/Vol., Packaging, Price: 3.1 oz (90 gm).

How Stored: Shelf stable.

New Product-Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Orange, white, black, brown, green on blue. Color picture of bowl of Seaweed Ramen.

2710. Product Name: Westbrae Natural Miso Ramen.

Instant Asian-Style Whole-Wheat Noodles & Miso Flavor Broth.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: whole wheat flour, sea salt. Miso broth: Powdered soy sauce, soybeans, wheat, sea salt, powdered miso, dried kombu seaweed, dried Japanese mushroom, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.

Wt/Vol., Packaging, Price: 3.1 oz.

How Stored: Shelf stable.

New Product-Documentation: Label. 1986, undated. 9.5 by 6.5 inches. Plastic packet. Orange, purple, white, green brown. Full color picture of bowl of Miso Ramen. Directions with pictures of how-to.

2711. Product Name: [Lentil Spread (With Miso)].

Foreign Name: Linzen Pastei.

Manufacturer's Name: Witte Wonder Natural Products B.V.

Manufacturer's Address: Piet Heinstraat 80, 2518 CK Den Haag, Netherlands.

Date of Introduction: 1983.

Ingredients: Lentils*, bread, onion*, miso (sojapasta), kombu, herbs. * = Organically grown.

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1983. 6 by 1.5 inches. Self adhesive. 2 color: Green and light green on white. Illustration of lentil plant. “Delicious on bread, cracker, or toast. After opening, keep refrigerated.” Talk with Sjon Welters. 1989. Aug. 13. This product was a spread, not a croquette, pie, or pasty.

2712. **Product Name:** Yeo's Hoi Sin Sauce (Barbecue Sauce).

Manufacturer's Name: YHS (USA) Inc. (Distributor). Made in Singapore.

Manufacturer's Address: 1744 Junction Ave., San Jose, CA 95112.

Date of Introduction: 1983.

Ingredients: Sugar, soya beans, water, onions, wheat flour, chilies, corn starch, salt, acetic acid, garlic, pepper, sesame oil, monosodium glutamate.

Wt/Vol., Packaging, Price: 18 oz can (400 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1983, undated. Red, black, gold, and white on orange. In French and English. “This is an exotic specialty of the highest quality. For that special superb Oriental flavor, garnish liberally onto broiled steaks, hamburgers, chops, chicken and fish—a few minutes before removing from the grill.”

2713. **Product Name:** Yeo's Crushed Yellow Bean Sauce.

Manufacturer's Name: YHS (USA) Inc. (Importer). Made in Singapore by Yeo Hiap Seng Ltd.

Manufacturer's Address: 1744 Junction Ave., San Jose, CA 95112.

Date of Introduction: 1983.

Ingredients: Soya beans, sugar, wheat flour, salt, monosodium glutamate.

Wt/Vol., Packaging, Price: 16 oz (500 gm) can.

How Stored: Shelf stable.

New Product–Documentation: Label. 1983, undated. Red, black, gold, and white on orange. “This is an exotic specialty of the highest quality.”

2714. Zhang, Fazhu. 1983. Doujiang zhizou qiyuan kaobian [A critical investigation of the origins of soybean chiang production]. *Tiaowei Fushipin Keji (Condiment Science and Technology, China)* No. 1. p. 15-18. [27 ref. Chi; eng]

• **Summary:** Contents: The jiang mentioned in pre-Ch'in times (221 B.C. was not soybean jiang). A critical examination of historical data concerning the earliest record of making soybean jiang. Looking at the origins of soybean jiang from cultural archaeological data. The *Chi Chiu Pien* by Shih Yu (Western Han, 206 B.C.–24 A.D.) does not state clearly that soybeans were used to make jiang, but they may have been. The earliest unambiguous record of using soybeans to make jiang is found in the *Szu Min Yüeh Ling* by Tsui Shih (Eastern Han, 25–220 A.D.). Research shows that the original text of this document, which was probably written in Loyang [Luoyang] during the Yen-hsi period of the Huan Emperor (158-166 A.D.) is now lost, but a fragment of approximately 3,000 characters is preserved in the *Ch'i-min yao-shu* and is also found in the *Yü Chu Pao Tien* written by Tu T'ai-ching during the Northern Chou dynasty (557-581 A.D.). An analysis of Tsui Shih's words shows that at that time *mo-du jiang* was made from soybeans throughout Loyang, and also that jiang was made from pickled (stored) pumpkins, which may be the earliest surviving historical record in China of vegetables pickled in jiang (to make *jiangcai*).

The earliest existing literary work to discuss the production of jiang with beans and wheat is the *Ch'i-min yao-shu* in the section titled “Ways to make jiang #70.”

In 1972 an international sensation was created when a perfectly preserved female corpse and a wealth of funeral articles were unearthed from a Han dynasty tomb—Mawangdui #1—in the eastern suburbs of Changsha in Hunan. An archaeological report published in 1973 indicated that many foods which could still be identified were found within this tomb. Some 22 of the ceramic pots unearthed were completely filled with food and 3 of these were filled with a food made from some type of bean. Vessels #126 and #301 contained soy nuggets, as described on bamboo strip #101.

“The bean food that filled wide-mouth vessel #132 was ‘a black-color jiang type of material,’ and this corresponded to the jiang recorded on bamboo strip #106. A report of an analysis entitled ‘An Investigation of the Biological Specimens Unearthed from Han Tomb—Mawangdui #1—in Changsha’ was published in 1978, and this report indicated that the material that filled the ceramic vessel was in fact a soy bean product. From the above data, it is possible to conclude that among these burial foods were samples of soy jiang; the jiang recorded on the bamboo strip really was soy jiang. Thus, it may be inferred that every (otherwise unspecified) mention of jiang in Chi Chiu P'ien and Shih Chi: Huo-chih lieh-chuan from the Western Han Dynasty (206 B.C.–24 A.D.) could likewise have been soy jiang.” Among these were various types of jiang as well as soy nuggets (*chih*). Address: Fuzhou Municipal Vegetable, Jiang, and Qi Corporation.

2715. Aubert, Emmanuelle. 1983. *Les 9 grains d'or dans la cuisine* [The nine golden grains in the cuisine. 2nd ed.]. Paris: Le Courrier du Livre. 286 p. Illust. by C. Galinet. Index. 22 cm. [Fre]

• **Summary:** The subtitle on the cover reads: 400 simple and savory recipes. Menus and advice on good health. Contents: Introduction. 1. The cereals (see p. 28-31 for instructions for making seitan at home from 500 gm wheat flour, plus 8 seitan recipes). 2. Breads. 3. Legumes: Cooking legumes, lentils, haricots, dry peas, chick-peas, azuki beans, soya. 4. Vegetables. 5. Soups. 6. Animal products. 7. Condiments, aromatics, and sauces (incl. tamari and miso). 8. Desserts. 9. Beverages. 10. 80 menu ideas. 11. Pregnancy and the feeding of young infants. 12. Some natural remedies. Where to buy supplies.

Soy-related recipes include: Making tofu at home (p. 87-91; illustrations and method taken without credit or permission from *The Book of Tofu* by Shurtleff & Aoyagi). Yuba. Grilled tofu (p. 91). Tofu with nuts (*noix*) and miso. Skewered tofu. Tofu salad (p. 92). Tofu with vegetables. Onions with tofu. Okara croquettes. Soymilk with fruits (p. 93). Making tempeh at home (p. 94-95). Tempeh goreng. Tempeh bachem (p. 95). Keripik tempeh (tempeh chips; p. 96). Tempeh croutons (p. 96). Pate of vegetables with tofu (p. 126). Jardinière au tofu (p. 128). Peas with tofu (p. 128). Soy sprouts made from mung beans (p. 129-30).

Pages 191-94 give basic information on the following fermented soya condiments: tamari, miso (Hacho [sic, Hatcho] miso, barley miso, rice miso). Pages 278-79 list manufacturers and handlers of various foods used in this book, and pages 280-81 give their addresses: Yellow soybeans: Celnat, Les Sept Marches, Le Seuil, Lima. Miso: Celnat, Lima, Les Sept Marches, Le Seuil, le Bol en Bois, Tenryu. Only Lima and Les Sept Marches manufacture miso in France. Tamari: Celnat, Le Seuil, Les Sept Marches, Lima, le Bol en Bois, Tenryu. Nigari: Le Bol en Bois, Tenryu. Tofu: Le Bol en Bois, Tenryu, Soy. Tempeh: Traditions du Grain, Le Bol en Bois. Tempeh culture: Semailles. Koji: Les Sept Marches, Tenryu, Le Bol en Bois. Amasaké: Traditions du Grain. Soymilk: Celnat, Lima.

A photo on the rear cover shows Aubert, a woman.

Note: This is the earliest French-language document seen that mentions amazake, which it calls "Amasaké." Address: France.

2716. Business Trend Analysts, Inc. 1983. *The health and natural food market*. 2171 Jericho Turnpike, Commack, NY 11725. [9 ref]

• **Summary:** One section of this study (including pages 108-111) concerns the soyfoods market. It consists largely of statistics compiled by the Soyfoods Center and Soyfoods Association of North America. No permission was obtained from Soyfoods Center to use this information. Address: Commack, New York.

2719. Fruin, W. Mark. 1983. *The origins of shoyu* (Document part). In: M. Fruin. 1983. *Kikkoman: Company, Clan and Community*. Cambridge, MA: Harvard University Press. xiv + 358 p. See p. 14-16. [4 ref]

• **Summary:** "The production of shoyu, one of the traditional products manufactured in the countryside [of Japan], grew enormously during the Tokugawa Period (1603-1867) because of a dramatic increase in its market, primarily urban residents. Whereas before the 17th century only 1 or 2 percent of the Japanese population lived in cities, by 1725 roughly 20 percent did so. The increased demand for shoyu was met primarily through an increase in capacity based on the entrance of new producers and the expansion of established brewers..."

"The forerunner of modern shoyu appears to have been *miso tamari*, the liquid that forms during the process of fermenting rice or soybeans to make a soft, cheeselike product. The most popular and likely story of shoyu's origins relates how Kakushin, a Japanese Zen priest who had studied at the Kinzanji Temple in China, returned to Japan in the middle of the 13th century and began preparing a type of miso that became a well-known local specialty of Yuasa, the town near Kakushin's temple in the province of Kii (today's Wakayama prefecture). By the end of the 13th century the liquid had come to be called tamari and was sold commercially along with the miso. From such beginnings, a great variety of experimentation with the ingredients and methods of tamari fermentation was launched. Although tamari probably found favor initially in Buddhist monasteries as a condiment for a vegetarian diet, the popularity of tamari-type seasonings was related more to the prevalence of battlefields than of meditation halls during the period of civil wars that raged across Japan from the thirteenth to sixteenth centuries. Soldiers apparently found the versatility and transportability of the seasonings to their liking. Shoyu, which evolved from these tamari seasonings by adding wheat to the fermentation mash, appeared during the 16th century.

"The first soy sauce made in the area of modern Noda was brewed in about 1560 by Iida Ichirobei and respectfully presented as tribute taxes to the local warrior family in the

following years. The Iida family, ostensibly fleeing the carnage and confusion of the Onin Wars (1467-1477) in the Home Provinces around Kyoto, arrived in the area of Noda early in the 16th century and by mid-century were engaged, among other pursuits, in the manufacture of tamari, a type of soy sauce that by now was made entirely from soy beans...

"Iida's first brew was closer to tamari than shoyu in consistency, taste, and aroma...In Eastern Japan the manufacture of a shoyu rather than tamari soy sauce like Iida's seems to have originated in or near the town of Choshi at the mouth of the Tone River on the northeastern tip of the Boso Peninsula, which guards the entrance to Tokyo Bay like an extended crab's claw. The Hamaguchi families of Choshi originated as branch households of the main Hamaguchi house of Hiromura village in Kii, not surprisingly the same province where Kinzanji miso and miso-tamari appeared and where the Hamaguchi of Hiromura were among the earliest commercial brewers of shoyu in Japan.

"The Hamaguchi transplants in Choshi, along with Tanaka Genba and his descendants, began the manufacture of shoyu early in the 17th century. Higeta shoyu was first produced here in 1616, Yamajo in 1630, and Yamasa in 1645.

"It was not until the latter half of the 17th century, however, that Noda followed Choshi in the manufacture of a soy sauce that was closer to shoyu than the thick, dark tamari was. In 1661 Takanashi Hyozaemon XIX began brewing shoyu in Noda; using a work force of twenty that included fifteen contract laborers, he produced 3,000 gallons his first year." Address: Prof. of History, California State Univ., Hayward.

• **Summary:** The chapter on legumes contains brief introductions to soybeans, green vegetable soybeans

(unreife Sojabohnen), soy sprouts (Sojabohnensprossen, Sojabohnenkeimlinge), soymilk (Sojamilch), tofu (Tofu, Sojaquark), soy sauce (Sojasosse, Shoyu), miso (Miso, Sojapaste), tempeh (Tempeh), fermented tofu (Sufu, chinesischer Sojabohnen-Käse), and natto (Natto, fermentierte ganze Sojabohnen). Tables shows the nutritional composition of tofu, deep-fried tofu pouches (Aburage), dried-frozen tofu (Kori-Tofu), yuba (Yuba), roasted soy flour (Kinako), and miso, plus defatted soybean meal (entfettetes Sojabohnenmehl; 51% protein), and soybean concentrate (Sojabohnen Konzentrat; 64.9% protein). Address: West Germany.

2722. Hesselstine, C.W. 1983. Microbiology of Oriental fermented foods. *Annual Review of Microbiology* 37:575-601. [50 ref]

• **Summary:** Contents: Introduction. Historical account. Importance of mixed cultures. Microorganisms used.

"The Japanese Food Agency, Ministry of Agriculture, Forestry, and Fisheries (1979), gave the following figures for 1979: miso, 567,776 tons; shoyu, 1,252,431 kiloliters; and natto, 158,000 tons. In Korea, 35% of the 442,803 metric tons of soybeans produced is fermented. Indonesia uses about 75,600 tons of soybeans in making tempeh.

"There is considerable ancient writing in Chinese publications about foods made by fermentation, but the first scientific reports are only about 100 years old. From 1878 until the beginning of World War I, there was an explosion of papers and reports dealing with fermented foods and drinks... In general, studies between 1881 and 1914 were devoted to the description of the product and the local name and to the isolation and description of the microorganisms associated with the fermentation. A number of organisms new to science were described and illustrated. Additional information was given on the action of the fungus on the substrate, suggested uses of the fungus in processes that could be exploited in European technology, and a description of the substrate preparation, food use, and native methods of food preparation.

"This period of research ended abruptly with the advent of World War I, as the exchange of students and cooperation between Japan and Germany ceased. Food fermentation studies resumed in the 1950s and today considerable interest exists. This renewed interest stems from the concern with nutrition, the great enthusiasm for vegetarian and natural foods, the search for less expensive, high-protein foods, the influence of foreign students studying in the West, the need to expand export markets, the need to add products to convenience foods to add zest and flavor, and the interest in the activities of microorganisms used in fermented foods." Address: NRRC, Peoria, Illinois.

2723. Jaffrey, Madhur. 1983. *Eastern vegetarian cookery*. London: Jonathan Cape. xii + 531 p. Illust. by Susan Gaber.

Index. 24 cm.

• **Summary:** This is an expanded version of *Madhur Jaffrey's World-of-the-East vegetarian cookery* (1981, New York). The author of this creative book, a woman, was born in British India on 13 Aug. 1933. She first became known as an actress in India, but later found fame as a food writer. She has lived in America for more than 20 years. She presents 21 recipes for bean curd (tofu), 7 for tempeh, and some for yuba and miso. Soy-related recipes include: Aubergine slices with white miso (Japan, p. 4-5). Green beans with soy sauce (Japan, p. 20), Cabbage with miso (Japan, p. 29). Lotus root with soy-sauce dressing (Korea / Japan / Hong Kong, p. 46-47). Yellow pumpkin cooked with soy sauce (Japan, p. 74-75). Fresh soy beans, steamed (China, p. 76, with "fresh green soy beans in their pods"). Yien Koo's Spinach with fermented bean curd (China, p. 78-79). Pecel (Vegetable salad with spicy peanut sauce, plus tofu and tempeh; Indonesia, p. 87). Tempura (with tofu; Japan, p. 89-92). Soy bean sprouts (how to grow, p. 119). Soy-bean and mung-bean sprouts seasoned with sesame oil (Korea, p. 123-24). Tempeh, Fried tempeh, Fried, pre-seasoned tempeh, Sambal goreng tempeh kering (Sweet and sour tempeh), Tempeh cooked in coconut milk (Indonesia, p. 127-30). Thai fried rice (with red fermented tofu, p. 176).

Chapter 4 (p. 187-221), titled "Soy milk, bean curd, and wheat gluten," contains the following: Introduction to each ingredient. Soy milk (making your own at home). Making your own bean curd. Udofu (Yudofu, simmering bean curd with seasonings, Japan). Bean curd with watercress (Singapore Chinese). Bean curd with fresh coriander (Taiwan). Korean-style bean curd in a hot water bath. *Hiya-yakko* (Chilled bean curd, Japan). Bean curd with broccoli (Hong Kong). Cabbage cooked with bean curd (Japan). Bean curd with a deliciously spicy sauce (China). Carrots and beans with a bean-curd dressing (Japan). Bean curd, mushrooms, and peanuts in hoisin sauce (Chinese style). Sautéed bean curd (Korea). Tofu dengaku (Toasted bean curd with a miso topping, Japan). Fried bean-curd cubes (Most of East Asia). Soy-bean sprouts sautéed with fried bean curd (China). Fried bean curd with a sweet-and-sour sauce (China). Fried bean curd cakes with a mustard surprise (Japan). Inari-zushi ("Bags" of fried bean curd stuffed with sushi rice, Japan). Pressed bean curd with cabbage (China). Salad of pressed bean curd, mung-bean sprouts, and agar-agar (China). How to make fried and baked wheat-gluten balls. Stew of baked wheat gluten, potato, turnip, carrot, and cabbage rolls (Japan, p. 215). Fried wheat gluten with broccoli, carrot, and mushrooms (China). Fried wheat gluten and potato stew (Indian style). Shredded wheat gluten and Cabbage with fennel seeds (Indian style). Buddha's delight (A mixed Chinese stew, Hong Kong; with yuba, fried tofu, and fried wheat gluten balls).

Chawanmushi (Steamed savory custards, with tofu; Japan, p. 223-26). Omelette with bean curd (Japan, p. 230-31). Soy-sauce eggs (Thailand / China, p. 245). Paneer (Fresh cheese from cow's milk; India, p. 277-78). Hot or cold noodles with a soy-sauce dressing (China, p. 288). Noodles with a hot-and-sour bean sauce (China, p. 290). Vegetarian mee krob (Crisp noodles with pressed bean curd and eggs; Thailand, p. 296-97). Noodles with quail eggs, mushrooms, spinach, and yuba (Japan; p. 298-99). Hoppers (yeast pancakes; Sri Lanka, p. 315). Roti (Flat whole-wheat bread; India, p. 320). Delicious stock made with soy-bean sprouts (p. 340). Clear soup with mushrooms, bean curd skins [yuba], and spinach (Japan, p. 346). Clear soup with soft bean curd and Chinese leaves (p. 346). Miso soup with bean curd (Japan, p. 357). Miso soup with carrots and mushrooms (Japan, p. 358). Fried, munchable soy beans [soynuts] (China, p. 373). Potato and tempeh patties (Indonesia, p. 394). Dipping sauces (with soy sauce, p. 414-17, incl. kochu chang—Korean soy sauce). Kombu relish (with soy sauce; Japan, p. 435). Shoyu daikon (White radish pickled in soy sauce; Japan, p. 436). Ginger quick-pickled soy sauce (China, p. 436). Aomidaikon (Quick pickled small white radishes, with slightly sweet yellow miso; Japan, p. 438-39). Chinese-style jellied bean-curd sweetmeat with a peanut topping (Singapore, p. 462-63).

General information (p. 481-506): See: Bean curd (regular, fried, fermented, pressed, pressed seasoned, dried bean-curd skin or yuba). Beans (azuki, soy). Bean sauce (made from fermented soy beans). Chilli paste with soy bean (and garlic). Hoisin sauce. Miso. Nam yee (see Bean curd, fermented). Nigari. Soy beans, fresh. Soy-bean sprouts. Soy milk. Soy sauce (incl. Japanese, Chinese dark and light, Japanese usukuchi, Indonesian ketjap manis). Tao Hoo Yee (see Bean curd, fermented). Tempeh. Yuba. Sources (of ingredients; p. 507-10). Address: New York City, NY.

2724. Konishi, Kiyoko. 1983. Japanese cooking for health and fitness. Tokyo: Gakken Co. Ltd. 120 p. Illust. 26 cm. Produced in conjunction with Kikkoman. Many large color plates. 27 cm. [Eng]
Address: Yokyo, Japan.

2725. Krohn, Norman Ody. 1983. Menu mystique. New York, NY: Jonathan David Publisher. 404 p. 28 cm. *

2726. Kushi, Michio; Jack, Alex. 1983. The cancer prevention diet: Michio Kushi's nutritional blueprint for the relief and prevention of disease. New York, NY: St. Martin's Press. xi + 460 p. Index. 22 cm. [32 ref]

• **Summary:** In this book, cancer preventing effects are attributed to miso (p. 50-51, 220-21, 304-06), and to soybeans (p. 51, 154-55, 293, 306). Natto, soymilk, tamari, tempeh, and tofu are also discussed.

Pages 50-51 note: “A ten-year study completed in 1981 by the National Cancer Center of Japan reported that people who ate miso soup daily were 33 percent less likely to contract stomach cancer than those who never ate miso soup. The study also found that miso was effective in preventing against heart and liver diseases...”

“Soybeans, a major source of protein in the macrobiotic diet, have been singled out as especially effective in reducing tumors. The active ingredient in soybeans is called a protease inhibitor. Laboratory tests show that soybeans and certain other beans and seeds containing this factor added to the diet prevent the development of breast, stomach, and skin tumors. Whole soybeans and soy products, including miso, tamari soy sauce, tofu, tempeh, and natto are staples of the macrobiotic diet... At St. Luke’s Hospital in Nagasaki, a group of macrobiotic doctors and patients who had survived the atomic bombing on August 9, 1945 subsequently protected themselves against potentially lethal doses of radiation on a diet of brown rice, miso soup, sea vegetables, and sea salt.”

Pages 220-21 contain a long excerpt from the account of Dr. Tatsuichiro Akizuki, director of internal medicine at St. Francis’s Hospital in Nagasaki. He survived the world’s first atomic bomb attack on 9 Aug. 1945. He believed that the main reason that neither he nor any of his co-workers at the hospital suffered or died from radiation was because of their diet, based on miso, brown rice, and sea vegetables.

Pages 293, and 304-06 summarize a number of publications which seem to show that consumption of soybeans, miso, or soymilk may prevent cancer. Pages 391-99 contain soyfoods recipes. Address: Boston, Massachusetts.

2727. Lewallen, Eleanor; Lewallen, John. 1983. Sea vegetable gourmet cookbook and forager’s guide. Mendocino Sea Vegetable Co., P.O. Box 372, Navarro, CA 95463. 32 p. [4 ref]
Address: Navarro, California.

2728. Migliaccio, Janice Cook. 1983. Follow Your Heart’s vegetarian soup cookbook. Santa Barbara, California: Woodbridge Press. 128 p. Illust. 24 cm.

• **Summary:** Contains more than 50 delicious vegetarian soups developed by the author and other creative soupmakers at Follow Your Heart’s famous natural foods restaurants—and served to more than 1 million customers. Follow Your Heart began in 1970, founded by Michael Besancon, as a small vegetarian lunch counter in the corner of a natural foods store in Canoga Park, California. In 1973, Follow Your Heart grew to include the store as well. In 1976 it expanded and moved to a much larger store a few blocks away. In Sept. 1982 it opened a second store (without a restaurant) in Santa Barbara, California. Today Follow Your Heart employs about 100 people, all

vegetarians. The head store is at 21825 Sherman Way, Canoga Park, California 91303.

The seasonings tamari and Dr. Bronner’s “Balanced Protein Seasoning” (p. 17-18) and the “special food items” Bakon Bits, miso, textured vegetable protein (TVP, p. 24-25) are described and used in a number of recipes. Soy-related recipes include: Miso vegetable soup (with miso and tofu, p. 97). Oriental vegetable soup (with tofu and tamari, p. 103-05). Sweet and Sour Oriental Vegetable (with tofu and tamari, p. 120-21). Address: Southern California.

2729. Rohé, Fred. 1983. The complete book of natural foods. Boulder, Colorado: Shambhala. 491 p. [120 ref]

• **Summary:** This book is about “The New American Diet,” which is an “omnivarian” diet including some fish and meat. Chapter 14, titled “New and future natural foods,” contains a section titled “Soy foods” (p. 162-65) including tofu, tempeh, miso, soy sauce, soy milk, and other soy products (yuba and sufu). The work of William Shurtleff and Aoyagi, and their Soyfoods Center, is mentioned 2-3 times. Toward the back of the book are many soyfoods recipes.

The Prologue tells Rohe’s life story and pioneering work with natural foods. In 1964, at the ripe old age of 27, he didn’t feel good, didn’t look good, and didn’t like it—the result of years of smoking, drinking, eating bad food and “burning the candle at both ends.” “It was time to do something about it. Adelle Davis became my guru and Thom Hamilton—the health foods store owner who sold me [her book] *Let’s Eat Right to Keep Fit* became my mentor.” Within a few months he was feeling much better. “So in 1965 I bought a small health food store in the Sunset district of San Francisco.” It was named Sunset Health Foods.” He discarded most of the dietetic foods on the shelves and replaced them with “old-fashioned groceries—basic stuff, traditional, simple, whole food... What was evolving was a modern version of an old-fashioned grocery store.” He would provide information instead of hype, bulk retail foods sold out of barrels, crocks, jars, and drawers instead of packaged products, food instead of food supplements. He renamed the store “New Age Natural Foods.”

“My career ended in 1973, after eight years. New Age Natural Foods had served as a model for what were called in those days ‘hippie food stores.’ It is credited as being the prototype natural foods store, as distinct from a health food store.” Since 1973 Fred continued to work in the natural foods industry. In 1979, in his capacity as a consultant, he met the people of Sunburst Farms, who are his collaborators on this book. “Sunburst is the realization of a vision experienced in 1951 by its founder Norm Paulsen, while he was living as a student monk studying yoga at the Self-Realization Fellowship in Los Angeles. He moved to the Santa Barbara area, and while operating a construction business in 1968 established Sunburst Farms as a group of

people living communally under spiritual principles on 160 acres of land in the mountains above Santa Barbara. The community-owned business, Sunburst Natural Foods, grew foods organically and flourished. In 1970 they opened a natural foods retail store in Santa Barbara. The community grew to include a second ranch and a total membership of over 200 people. "The business came to include manufacturing and wholesaling as well as retailing. There are now five Sunburst Farmer's Markets, two of them—in Goleta and Ventura—large, complete, natural foods supermarkets. Sunburst also owns and operates a natural foods restaurant, 'The Farmer and the Fisherman,' 35 miles north of Santa Barbara along the coastal highway." Then Norm envisioned a new direction and everything changed. They traded their 6,000 acre coastal ranch for land in northeastern Nevada totaling over 500,000 acres. "It could hardly have been a more radical change. But the soil is rich in minerals and there is abundant water from artesian wells. They are responding strongly to the challenge of, as they say, 'making the desert bloom as a rose.'"

This book was Re-published in 1986 as *Nature's Kitchen* by Garden Way in Brattleboro, Vermont.

Interview with Fred Rohe. 1988. Nov. 3. Fred bought Sunset Health Foods in 1965 and transformed it into New Age Natural Foods at 1326 Ninth Ave. in San Francisco. Address: 4014 Lincoln Way, San Francisco, California 94122. Phone: 415-564-7024.

2730. Sams, Craig; Sams, Ann. 1983. The brown rice cookbook: A selection of delicious, wholesome recipes. New York and England: Thorsons Publishers Inc. 128 p. Illust. by Clive Birch. Index. 20 cm.

• **Summary:** Page 14 gives a description of soya sauce, shoyu, tamari, and miso. Soy-related recipes include: Miso soup with brown rice (p. 30). Miso sauce (p. 54). Tamari sauce (p. 55). Miso rice (p. 125). Craig Sams has also written a book titled *About Macrobiotics*.

"In the early 1960's many people in Europe and the U.S.A. were attracted to the ideas of Georges Ohsawa, a Japanese who had rediscovered the importance of dietary balance in traditional Eastern medicine." He taught macrobiotics, a dietary system in which brown rice plays a major role. "In the world of pop music the expression 'brown rice sandwiches' was used in association with the musicians who adopted wholefood diets." Then in the mid-1970s came the bran boom with an upsurge of interest in sources of dietary fibre, including brown rice.

Why did brown rice ever lose its once pre-eminent position to white rice? "The answer lies partly in the fact that while white rice will keep almost indefinitely, brown rice should be fresh. It attracts insects once it has been husked, so it needs more care in storage and more attention to efficient distribution." White rice also cooks more quickly.

"Pythagoras would not let his students eat beans because he believed they inhibited the higher intellectual processes. However, it is likely that this was because the prevalent bean of classical Greece was the fava bean—harmless in itself but with a hard brown skin which, if regularly eaten, can lead to favism, symptoms of which are deterioration of vision and mental faculties."

Indonesian tempe / oncom—fungal fermented traditional meat analogues. Indonesian tapé ketan and tapé ketella fermentations. Conclusions. Address: New York State Agric. Exp. Station, Geneva, NY 14456.

2733. Steinkraus, Keith H. 1983. Fermented foods, feeds and beverages. *Biotechnology Advances* 1(1):31-46. [70* ref]

• **Summary:** Contents: Abstract. Indigenous fermented foods / beverages: Indian idli, dawadawa (daddawa), soy sauce (Thailand), Indonesian tape, fish sauces, Japanese koji, Nigerian millet beer (oyokpo), Kenyan uji. Microbial / single cell protein (SCP): Mushrooms. Address: New York State Agric. Exp. Station, Geneva, NY 14456.

2734. Steinkraus, K.H. 1983. Traditional food fermentations as industrial resources. *Acta Biotechnologica* 3(1):3-12. First published in 1982 in Saono et al., eds. Traditional Food Fermentations as Industrial Resources in the ASCA Countries. The Indonesian Institute of Sciences (LIPI) Jakarta. p. 3-16. [31 ref. Eng; ger]

• **Summary:** Contents: Summary. Introduction. Production of meat-like flavors from vegetable proteins. Soy sauce (Japanese shoyu) and miso fermentations. Fish / shrimp sauces and pastes. The koji principle. Meat substitutes (analogues). Indonesian tempeh kedele. Traditional tempeh fermentation. Industrial production of tempeh. A process for raising the protein content of high starch substrates.

Leavened bread-like foods without the use of wheat or rye. Coconut protein as an industrial resource. References. Address: New York State Agric. Exp. Station, P.O. Box 462, Geneva, New York 14456.

2735. Tims, William; Allanson, Robert. 1983. Macrobiotic dietary suggestions. Mountain Ark Publishing Co., 109 S. East Street, Fayetteville, AR 72701. 38 p. 22 cm.

• **Summary:** Under “Bean Products,” tofu, tempeh, and natto are mentioned. “Fermented foods make wonderful seasonings for soups and strengthen the digestive function. Those used in making soups include: Miso, shoyu, tempeh, sauerkraut.” There are recipes for Boston baked soybeans, and Boiled tofu. Address: Fayetteville, Arkansas.

2736. Tofu Shop Specialty Grocery & Deli (The). 1983. The Tofu Shop Delicatessen (Poster). Arcata, California. 8½ by 11 inches.

• **Summary:** Printed on front in blue on white with a gold border on glossy cardstock paper: “We make our own tofu: traditional methods for a sweet, delicate taste.

“Delicatessen: featuring fresh food to go. Tofu burgers. Sandwiches. Salads. Desserts with honey. Whole grain breads. Fresh juices. Fresh coffee. Herb teas. Marinated cutlets. Tofu sausages. Baked goods.

Specialty groceries: Fresh tofu. Tempeh. Miso (domestic & imported). Sea vegetables. Macrobiotic supplies. Cook book & recipes. Tofu making supplies.”

In the center is the company’s long-time logo of a blue dragon inside a thick green circle.

“Handmade tofu since 1977.”

A green, blue and gold illustration by Bernice Kagan (left) shows a small tofu shop on stilts on a cliff by the ocean, with an Oriental-style roof and a wind-blown tree arching overhead.

Note from Matthew Schmit. 2009 April 2. “A rather gawdy 1st attempt with a marketing poster. The ‘Blue Dragon’ was phasing out and the ‘Shop on the cliff’ was phasing in as our logo.” Address: 768 18th St., Arcata, California 95521. Phone: 707-822-7409.

2737. Wang, H.L. 1983. Oriental soybean foods. In: Ivan A. Wolff, ed. 1983. CRC Handbook of Processing and Utilization in Agriculture. Vol. II: Part 2. Plant Products. Boca Raton, FL: CRC Press, Inc. See p. 91-106. Illust. Index. 26 cm.

Address: NRRC, Peoria, Illinois.

2738. World of God, Inc. 1983. The cookbook for people who love animals. 2nd ed. Umatilla, Florida. 192 p. Edited by Butterflies. Illust. and cover design by Flowers. No index. 26 cm.

• **Summary:** This vegan cookbook is only slightly different from the 1981 edition by the same title, but is 16 pages

longer. Recipes with soyfood terms in the title are the same and on the same pages as those in the 1981 edition, except the following recipes added at the back of the book: Avocado-tofu dinner (p. 166). Stuffed avocado with tofu (p. 178). Spaghetti and tofu. Baked macaroni and tofu (p. 180). Tofu omelette (p. 181). Tofu cutlets (p. 182).

The book is interspersed with most of the same nice quotes about vegetarianism, veganism, and animal rights from great thinkers found in the 1981 edition. Address: P.O. Box 1418, Umatilla, Florida 32784.

2739. **Product Name:** [Tofu, Tofu Pickled in Miso, Tofu Pâté, Terrine with Tofu].

Foreign Name: Tofu, Tofu Mariné, Pâté de Tofu, Terrine de Tofu.

Manufacturer’s Name: Tofu Kuehn.

Manufacturer’s Address: La Tuiliere, 26560 Montfroc, France. Phone: 92 62 02 76.

Date of Introduction: 1983?

Ingredients: Tofu: Whole French-grown soybeans, spring water, nigari. Pickled: Tofu, miso, onion, ginger, orange.

Pâté: Tofu, whole wheat bread, mushrooms, onions, spices.

Terrine: Tofu, vegetables, onions, spices, leeks, carrots, wheat flakes, tahini, mushrooms.

How Stored: Refrigerated.

New Product–Documentation: Form filled out by Anthony Marrese. 1989. Nov. The company is run by Yves Kuehn and John Marc. These products were introduced in the “early 1980s.” Production and weights are presently as follows: Tofu (250 gm) 30-50 kg/week. Tofu Pickled in Miso 20 kg/week. Tofu Pâté (150 gm) 10 kg/week. Terrine (150 gm). Anthony writes: “I met this group at an organic fair. It is a small group of 5 or so people making tofu really as a meditation. They produce it in small quantities of 5-10 kg through a mechanical hand grinder, then the pâté and pickled tofu are made in a small kitchen.

Leaflet. 1989. In French. Shows labels of the products and briefly outlines Mr. Kuehn’s philosophy that we must move from an animal-based to a plant-based diet.

Note: Emprésurage is the action of adding a curdling agent or coagulant to milk in the process of making cheese. The “préure” is the coagulant.

2740. Leonard, Thom. 1984. Re: Thoughts on miso in America. Letter to William Shurtleff at Soyfoods Center, Jan. 3. 3 p. Handwritten, with signature.

• **Summary:** Thom was surprised and pleased to see the “Ohio Miso” logo in the history chapter of the new second edition of *The Book of Miso*. “I, too, have found it strange that many influential people in the macrobiotic community have such resistance to the use of the English language in describing the varieties of miso.” Thom prefers the terms “brown rice” and “barley” to *genmai* and *mugi*. “Last spring I was asked to give a miso workshop to employees of

Erewhon's retail division. I stressed the importance of demystifying miso, including the use of English variety names. A beginning (belated) at least.

Next month, in Ireland, Thom will "begin making miso on a small scale, 800 pounds a week. My shop space is small, my finances smaller... I don't have a company name yet, but favor The Irish Miso Company, trade name of Eire Miso." "We are renting a beautifully re-done cottage on a south-facing hillside above the River Nore, and will be here at least a year."

Update: Talk with Thom. 1984. Sept. 24. He was in Ireland for a year, but he couldn't raise the money he needed. He planned to export miso to the USA. The Irish economy was slow and the UK market was small. He is planning another miso company. His wife is in Dublin, Ireland. He will go back to meet her there, and then perhaps on to Japan. He is now staying with Jim Hemminger, Remelle Road, Monroeville, Ohio 44847. Address: Kilkieran, Inistioge, Co. Kilkeeny, Ireland.

2741. Westbrae Natural Foods. 1984. Distributor catalog No. 1: Jan. 1984. Emeryville, California: Westbrae. 19 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Page 18: Glossary for new Japanese items, incl. Seaweed chips with miso, Tamari veggie chips, Vegetable chips with miso, Shrimp chips with miso, Sesame salt "gomashio," Umeboshi vinegar, Umeboshi paste, Tororo kombu, Miso ramen, 5-spice ramen (with powdered soy sauce and miso), Curry ramen (with powdered soy sauce and miso), Agar bar, Miso drops (candy, sweetened with natural rice malt).

Page 19: Sunburst product glossary, incl. Peanut butter domes with honey (with soybean oil, soy lecithin), Herb & cheese dressing (with soybean oil and whole soybeans), Honey mustard dressing (with refined soybean oil), Cinnamon apple granola (with soy oil), etc.

Note: The Sunburst community, which began as an intentional spiritual community in the late 1960s, founded and led by Norman Paulsen, was in its prime [in the 1980s] one of the largest shippers of organic products in the United States. Founded near Santa Barbara, California, the Sunburst members believed in a holistic lifestyle based on meditation, living from the land, organic farming, and—to some degree—chastity (Source: Wikipedia, Dec. 2008). Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

2742. Chico-San, Inc. 1984. Why does Chico-San bother to import soyfoods? (Ad). *Natural Foods Merchandiser*. Jan. p. 9 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America.

• **Summary:** A 4½ by 7½ inch black-and-white ad. Because the quality of fermented soyfoods made in Japan is considered better. Chico-San's miso-shoyu master is Mr. Tomio Kitani. He uses Japanese soybeans and sea salt rich in minerals. His Nama Shoyu, which takes 4 years to make, is the only unpasteurized soy sauce available in America. It is also the only shoyu with a salt content lowered by techniques not involving extraction or additives. "Taste is the difference."

This ad also appeared in *Macromuse* (1984, Spring, p. 35). Address: Chico, California 95926.

2743. Fantastic Foods. 1984. Tofu Burger: The most fantastic way to enjoy tofu (Ad). *Natural Foods Merchandiser*. Jan. p. 9 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America.

• **Summary:** This 5 inch square black-and-white ad begins: "Fantastic Foods' Tofu Burgher Mix makes it so easy to enjoy tofu. Just mash one pound of tofu and combine with our mix, shape into patties, and cook. In just minutes you will be enjoying delicious and nutritious tofu burgers. We make our Tofu Burger Mix from the finest all natural, all vegetarian ingredients like brown rice, sesame seeds and miso." An illustration shows the front of a package of Tofu Burger Mix. Address: 106 Galli Drive, Novato, California 94947. Phone: (415) 883-7718.

2744. Hatch Natural Products. 1984. Catalog and price list. 746 Germanna Highway, Culpepper, VA 22701. 76 p. 28 cm.

• **Summary:** This company distributes natural foods from 48 manufacturers including Arrowhead Mills, Chico-San Inc., Eden Foods Inc., Edward and Sons Trading Co., Fantastic Foods, Great Eastern Sun, Kingdom Foods, Living Farms, Love Natural Foods, Mitoku (Great Eastern Sun), Virginia Soyworks, and Westbrae Natural. The company was founded by Mildred and Ira Hatch; Its history is given on page 1. The ingredients in each product are listed. They carry soybeans (p. 16-17), dinner mixes with TVP (p. 31-32), imported Japanese miso and soy sauce (p. 37-43), soybean oil (from Arrowhead Mills p. 60-61).

Concerning so-called "cold pressed" oils the catalog states: "The words 'cold pressed' on many oil labels is generally thought to mean that they contain natural oils processed by the low temperature and pressure method discussed above. But this is totally mistaken. The words 'cold pressed' are absolutely meaningless when used as an indication of quality. They have no bearing on how the oil was extracted or at what temperature it was removed. They appear only as a marketing aid which just confuses and misleads the consumer and may be found on oils that are chemically extracted, bleached, and deodorized. Reputable suppliers refuse to use the term on their labels.

“Oils are extracted by two methods: pressure and chemical solvents. Pressing is normally done by what is called an expeller press. Temperatures produced seldom fall below the 140° to 160°F range. Still, the oil produced at these temperatures loses little of its flavor and nutrition.”

Concerning soybean oil: “Soy oil’s flavor is the strongest of all the oils, and many people find the unrefined product unbearable. Its flavor is best described as fishy or painty and lacks stability.” Address: Culpepper, Virginia. Phone: (703) 825-4302.

2745. Shin Mei Do Miso. 1984. Denman Island Miso (Unpasteurized) (Leaflet). Denman Island, British Columbia, Canada. 1 p. Front and back. 22 cm.

• **Summary:** Side 1 is an introduction to miso plus one recipe and a plug for *The Book of Miso*, by Shurtleff & Aoyagi. Side 2 is 4 miso recipes. Printed with brown ink on beige paper. Address: Denman Island, BC, Canada, V0R 1T0.

2746. Soyfoods Assoc. of America. 1984. Soyfoods Pavilion '84. Marketing soyfoods in America (Ad). *Natural Foods Merchandiser*. Jan. 12-page color advertising insert.

• **Summary:** Contains large color ads by Legume Inc. (6 frozen tofu entrees), Erewhon, Inc. (shoyu tamari), Vitasoy (USA), Inc. (natural and coconut soy drink, sweetened with maple syrup), San-J International, Inc. (tamari, teriyaki sauce, tamari crackers, teriyaki crackers), Tofu-Time, Inc. (Tofutti “nondairy tofu frozen dessert”), Eden Foods, Inc. (Edensoy soy beverage in plain and carob flavors, retort pouch), and Westbrae Natural Foods (natural ramen in 100% whole-wheat, buckwheat, brown rice, mushroom, seaweed, miso, 5-spice, and curry flavors).

Contains black-and-white ads by Westbrae Natural Foods (shoyu, tamari, and soy sauce), Chico-San, Inc. (imported miso and soysauce), Fantastic Foods, Inc. (tofu burger mix), Penguin's, Inc. (dairy-free frozen dessert), Nasoya Foods (Firm Style Tofu, Soft Style Tofu, Marinated & Broiled Tofu, Tofu Burgers, Tempeh, Tempeh Burgers, Tofu Vegi-Dip [Creamy Dill, Soyonnaise, Bleu Cheese, Onion, Creamy Garlic], Corn Cakes [Plain with Bran, Blueberry, Cranberry]; Non-soy products in the “Oriental Cuisine” line include Fresh Noodles, Wonton Skins, Egg Roll Wrappers), Hinode Tofu Co. and Azumaya, Inc. (“The #1 and #2 tofu producers in America”).

The only article, whose author is not given, is titled “Soyfoods Pavilion debuts at Natural Foods Expo '84.” On the front cover of the insert is a list of members of the Soyfoods Association of America (formed in Feb. 1983) that participated in Natural Foods Expo '84. In addition to the advertisers mentioned above, they include: Farm Foods, Laughing Moon Food Co., Paradise Distributors, Inc., Soyfoods Magazine, Tempeh Works, Inc., and White Wave, Inc. Address: 526 East 20th St., New York, NY 10009.

2747. **Product Name:** Miso Drops (Candy).

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984. January.

Ingredients: Natural rice malt (whole grain rice, organic sprouted barley, spring water), miso (brown rice, soybeans, water, sea salt).

Wt/Vol., Packaging, Price: 1.76 oz. (50 gm).

How Stored: Shelf stable.

New Product–Documentation: Westbrae Natural Foods. Distributor catalog No. 1: Jan. 1984. Product label. 4 by 3.5 inches. Red and dark blue on gold.

2748. **Product Name:** Buckwheat Miso (“Soba miso”).

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984. January.

Ingredients: Whole soybeans, buckwheat, water, sea salt.

Wt/Vol., Packaging, Price: 17.6 oz (499 gm).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Westbrae distributor catalog. 1984. Jan. 10. p. 10. Product label. 3 by 3.75 inches. Brown and dark blue on gold.

2749. Westbrae Natural. 1984. The uncommon ramen (Ad). *Natural Foods Merchandiser*. Jan. p. 12 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America.

• **Summary:** This full-page color ad begins: “We’d all like to enjoy wholesome, home-cooked food at every meal, but few of us have the time.” “Our Whole-Wheat Ramen is made entirely of 100% whole-wheat flour, complemented by a classic miso broth. Special broths and noodles create 7 other uncommon flavors: Westbrae Buckwheat, Brown Rice, Mushroom, Seaweed, Miso, 5-Spice, and Curry ramens.” A large photo shows a bowl of noodles with broth, ready to eat. It is surrounded by whole mushrooms, leeks, and snow peas, sliced red peppers, mushrooms, cucumbers, and diced tofu.

2750. Yoshihara, LuLu. 1984. Re: Varieties of Shin-Mei-Do miso, ingredients, ages, and prices for 10 lb post paid. Letter to Lorenz A Schaller, California, Feb. 13—in reply to inquiry. 1 p. Handwritten, with signature on letterhead.

• **Summary:** Red miso, 1½ years, \$25.15. Barley miso, 2 years, \$25.15. Brown rice miso, nearly 3 years, \$26.35.

A business card (printed with brown ink on beige paper) accompanies the letter.

2751. Kotsch, Ronald E. 1984. Natural foods pioneer Erewhon. *East West Journal*. Feb. p. 24-29.

• **Summary:** A very well written and accurate history of Erewhon from its founding in 1966, to its declaration of Chapter 11 bankruptcy in the fall of 1981. The company was able to clear its \$3 million indebtedness by paying 11 cents for each dollar owed. In early 1982 “the company was sold by the Kushis to Ron Rossetti, owner of the Nature Food Centres retail chain. Later that year [in July] Rossetti accepted as financial partners Charles T. Verde and Cynthia C. Davis, who became respectively president and vice president of marketing. Since then the operation has been totally in their hands. Erewhon has a production facility at Natick, Massachusetts.” A photo shows Davis and Verde with 5 Erewhon products.

2752. Shim, Chung-shil. 1984. Korean recipes. Seoul, Korea: Seoul International Tourist Publishing Co. 79 p. Feb. Illust. (color photos by Edward B. Adams). Index. 26 cm.

• **Summary:** Recipes include: Five grain rice (-*kok pap*, with ½ cup each red beans and black [soy] beans). Rice with soy bean sprouts (*Kong namul pap*). Mixed vegetables on rice (*Pibim pap*, with 100 gm soy bean sprouts, soy sauce, and red pepper paste). Dumplings (*Mandu kuk*, with 150 gm beancurd [tofu]). Seaweed soup (*Miyok kuk*, with 50 gm brown seaweed [*Miyok*] and 2 tablespoons soy sauce). Soy bean sprout soup (*Kong namul kuk*). Soy bean paste stew (*Toinchang ch'igye [doenjang]*, with 2 tablespoons soy bean paste and 200 gm beancurd). Beancurd with beef (*Tubu chorim*, plus 3 tablespoons soy sauce). Curd with vegetables (*T'angp'yong Ch'ae*, with 250 gm mung bean curd, 200 gm soy bean sprouts, and 2 tablespoons soy sauce). Bean pancake (*Pindae tok*, with 50 gm soy bean sprouts and 4 tablespoons soy sauce).

Each recipe is accompanied by a large color photo. About the author: She is a publisher, artist, and wife of Edward B. Adams, Headmaster of Seoul International School. She has developed a keen interest in Korean cooking, and has chosen here the simple dishes that are most popular among foreigners. She was educated in California, where she married. A color photo shows Shim Chung-shil. Address: Founder, Seoul International Publishing House.

2753. **Product Name:** Barley Miso, Brown Rice Miso, and Yellow Flint Corn Miso [renamed Mellow Flint Corn Miso in 1983].

Manufacturer's Name: South River Miso Co. Inc.

Manufacturer's Address: South River Farm, Conway, MA 01341. Phone: (413) 369-4057.

Date of Introduction: 1984. February.

New Product–Documentation: Ad in *East West Journal*. 1983. Nov. p. 88. “South River Miso. Wisely given miso gives its own wisdom.” Features organically grown grains,

wood-fired cooking, deep well water, and naturally aged in great wooden vats. “This winter and spring [i.e. early 1984] we will harvest several varieties of miso aged 9 months to 1 year in addition to our light miso aged three months. These include Barley, Brown Rice (Lundberg short grain), Black Barley (made with black soybeans) and Yellow Flint Corn miso. Some varieties are made with Naboru [sic, Noboru] Muramoto’s Baja sea-salt, Brittany, and Lima sea salt. We leave our miso in its unpureed state, giving it a traditional whole koji texture. It is not pasteurized or heat treated in any way... now available in unpasteurized one-pound packaging for retail stores and co-ops.” An illustration shows the company buildings.

Talk with Christian Elwell of South River Miso Co. 1999. Dec. 16. Yellow Flint Corn Miso was renamed Mellow Flint Corn Miso in 1983.

2754. Jenkins, Nancy. 1984. From Vietnam, subtle mix of flavors. *New York Times*. March 21. p. C1.

• **Summary:** Estimates of the Vietnamese population of New York City range from 10,000 to 20,000; all agree that the number is growing. In the last few years at least six Vietnamese restaurants have opened in Lower Manhattan.

Nuoc mam is the fundamental ingredient in Vietnamese cuisine; it is used as a seasoning in almost every dish, taking the place of salt and soy sauce. The best quality nuoc mam comes from Phu Quoc, an island off the south coast of Vietnam.

Another important seasoning is tuong, a sweet bean sauce [made from soybeans]; it can be purchased at a number of grocery shops in Chinatown, such as Hoa Than (218 Canal St.) and Thuan-Nguyen (82 Mulberry St.). When Vietnamese from all over New York City do their weekly shopping on Sunday morning, one of the foods they buy is “soft little cakes of sticky rice with sweet yellow bean paste inside.”

A recipe for Ba-Nam’s nem nuong with Nuoc leo sauce calls for “2 tablespoons tuong” as an ingredient.

Chef Huy’s chicken with lemon grass calls for “1 tablespoon nuoc mam” and “1 tablespoon thick soy sauce” as ingredients.

2755. Vansickle, Janice. 1984. Bean worth weight in gold. *Windsor Star (Essex County, Ontario, Canada)*. March 26. p. B1-B2.

• **Summary:** Soybeans are now Essex County’s major field crop and the third largest cash crop in Ontario province (with a value of more than \$203 million in 1982), but few people know what happens to the golden nuggets after they leave the farm. Most of the soybeans are crushed in Canada to make soybean oil and meal. Last week the Ontario Soybean Growers’ Marketing Board held a symposium in Toronto titled “Ontario soybeans—A journey into the next century.” Sheldon Hauck, vice-president of the Soy Protein

Council in the USA and one of the speakers estimated that soy protein is an ingredient in over 2,500 readily available grocery store items. Contains a nice history of the soybean in Canada. Ontario now exports soybeans to 20 countries, “including major shipments to Japan, which buys only top quality soybeans and turns them into soyamilk, soyaflour, tofu, miso—a soyapaste for soup—and natto—a fermented soybean used as an appetizer.” Speaker after speaker confirmed a bright future for soybean exports. Moreover, all supermarkets in Windsor now carry tofu, a soya curd. Soy oil is found in margarine and cooking oils. Soy protein appears in soya sauce, simulated bacon bits, and infant formulas. The H.J. Heinz Company in Leamington has been working with the marketing board to develop a line of processed soybean products for the retail market.

Ontario’s three soybean crushing plants are experiencing hard times, in part due to competition from canola oil (which enjoys subsidized freight rates); they are operating at 62% of capacity and could be forced to shut down. Photos show: A pair of cupped hands holding soybeans. Peter Epp, chairman of the Ontario Soybean Growers Marketing Board.

Note: This is the earliest English-language document seen (March 2009) that uses the term “soyapaste” to refer to miso. Address: Star agriculture reporter.

2756. *Mainichi Shinbun (Mainichi Daily News)*. 1984. Miso wa gan ni tsuyoi [Researchers say miso is a good anticancer agent]. March 31. p. 1. [1 ref. Jap; eng+]

• **Summary:** See English version of this in the *Mainichi Daily*, April 1.

2757. Caty, Thérèse. 1984. Dossier: Le soja [Dossier on soyfoods in France]. *France Dietétique*. Feb/March. p. 24-31. [Fre]

• **Summary:** This extremely interesting article gives an introduction to the various soyfoods, then list all known soyfoods products sold in France, complete with the brand, product name, ingredients, nutritional composition, weight or volume, and packaging. The last half of the paper is a French translation of a paper titled “The American boom in traditional soy products,” presented by Richard Leviton on 11 Oct. 1983 at a conference in Parma, Italy.

The following products, manufacturers/marketers (and brands) are listed: 1. Whole soybeans and flour: Lima (Organic soybeans, organic whole soy flour). 2. Textured soya: Charusse, Soyavit. 3. Convenience prepared foods for vegetarians: Pural (Frika Vita, Sojafleisch, Pasta Chuta, Sojavite, Soja Mignon, Sojanelles, Sojanelles épicées), Hera (Croq Meal, Herameal, Végémeal, Potage), Fritini (Aux herbes). 4. Liquid soymilk: Celnat (Soyo), Lima, Pural (Sojlactis), Sapov (Sojal), Provamel (Soya Drink, Soya dessert choco [a pudding, made by Alpro in Belgium]), Naturvit (Soyalet, Soyalet sans sucre). 5. Tofu: Le Bol en

Bois (Koya-dofu), Soy (Tofu, Croque Tofu [6 types]). 6. Tempeh: Traditions du Grain. 7. Miso: Celnat (Brown rice miso imported from Japan, Barley miso), Lima (Hatcho miso, barley miso). 8. Soy sauce: Celnat (Shoyou), Lima (Tamari, Tamari Shoyu). Address: France.

2758. Gotoh, K. 1984. Historical review of soybean cultivation in Japan: Scientific approaches (1946-1977) (Document part). *Tropical Agriculture Research Series* No. 17. p. 138-40. March.

• **Summary:** “1. Characteristics of this period: Extensive research work on soybean breeding and cultivation started after World War II. Nagata (1955) wrote a book on soybeans in a comprehensive manner, based on domestic and foreign information. It may be said that Nagata’s publication was the first well written Japanese book on soybeans.

“The progress of research works was compiled by Saito (1972; breeding), by Kaizuma and Fukui (1972; quality breeding), by Konno (1972; physiology) and by Matsumoto and Ohba (1972; production techniques) in the Proceedings of the Symposium on Food Legumes held at the Tropical Agriculture Research Center in 1972.

“In the early stage of this period, production of soybeans for oil was attempted. However, since the quantity of soybeans imported from the USA increased, especially after 1961 when the Japanese market was opened for soybean importation, production became restricted to protein use or food.

“During this period the constraints on soybean production were analysed in each area in Japan...

“Thus breeding for overcoming these hazards was undertaken and cultivars showing cool weather tolerance, cyst nematode resistance, virus disease resistance, resistance to several important diseases, and lodging resistance were released in each location.

“One of the important objectives of breeding was to obtain cultivars with white hilum of grains which was requested from the processing industry, especially for miso production. Thus, 30 of a total of 43 cultivars released from 1961 to 1977 had white hilum. As mentioned previously, large seed size was preferred for consumption, and the cultivars with large seed size became predominant. However, several cultivars with small seeds were maintained for natto production.

“2. Genetic resources: During the period 1952-1954 surveys on land races of soybeans were conducted and the data were summarized in 1957. According to the results, Tohoku had abundant genetic resources. Almost all of the land races were grown in dikes surrounding paddy fields and some were used for soiling under alluvial and diluvial soil conditions and for the cultivation of vegetable beans.

“It was well known that the wild soybean (*Glycine soja* Sieb. et Zucc.) is native to Japan, except for Hokkaido.

However, in 1973 this variety was observed along the river Saru in the Hidaka area of Hokkaido and thereafter along several rivers there...

“3. Cultivation practices recommended: Several research workers attempted to introduce modern technology for the management of soybeans...

“4. Physiological studies: Fukui and Arai (1951) classified cultivars, based on the length of growth from germination to flowering and flowering to maturity. This classification which does not correspond with the maturity groups of the USA is widely used in Japan. Groups Ia, Ib, and IIa belong to the so-called summer type, IIb, IIc, IIIb, and IIIc to the intermediate type, and IVc and Vc to the autumn type, respectively...

“5. Plant density: Although progress has been made in the understanding of soybean characteristics as a crop, the cultivation of soybean in practice is still based on sparse planting on an individual plant basis. This concept may be due to the fact that under the hot and humid conditions prevailing in Japan luxuriant growth and severe lodging are likely to be associated. Thus plant growth must be inhibited and the number of branches must be increased for increasing the number of nodes in turn results in the increase in the number of pods. Consequently, cultivars bred before 1960 were generally adapted to such growing conditions. However, several cultivars bred after 1961 had a stiff stem and seemed to be adapted to dense planting. These findings suggest that the plant type has been changing from the branching type to the main stem type in which a larger proportion of pods occurs on the main stem, and lodging resistance becomes far more important.

“6. Differences between record yields and average yields: During this period record yields were obtained in several Agricultural Experiment Stations and in some yield contests as outlined in the paper of Gotoh (1982). However, the average yield of soybeans was low as usual, namely, less than 1.5 tons.” Address: Faculty of Agriculture, Hokkaido Univ., Nishi 9, Kita-ku, Sapporo, Japan.

• **Summary:** Abstract. Trends in soybean production: importance of soybeans, area planted, yield, production and import, regional distribution. Trends in supply and consumption: demand and supply, utilization. Methods of cultivation currently applied: cultural practices (planting time, land preparation and planting, fertilizer application, management, harvesting and processing, marketing and procurement, cropping patterns, competitive power), varieties and their distribution, major diseases and pests, problems in farm cultivation. Soybean research and

extension service. Government participation in and support for soybean production. Future prospects of soybean production and main constraints. Discussion.

In Korea, soybeans rank third among all food grain crops, in both the area planted and in production, after rice and barley. Soybean “products such as soy paste [doenjang], soy sauce [kanjang], beancurd [tofu] and beansprouts are the primary side dishes in conventional daily Korean meals.” The area planted to soybeans has steadily decreased from about 300,000 acres average in 1967-1971 to only 183,000 acres in 1982.

Tables: (1) Area planted and production of major food crops in Korea. (2) Production, yield and import of soybeans by year in Korea. (3) Regional distribution of soybean production in Korea. (4) Demand and supply of soybeans in Korea. (5) Utilization of soybean in Korea. (6) Regional distribution of soybean planting times in Korea. (7) Results of sample investigation for the application of herbicides on soybean in Korea. (8) change of cropping systems in the central part of Korea. (9) Farm income derived from major summer crops in Korea. (10) Characteristics of main soybean varieties currently recommended and their geographical distribution in Korea. (11) Research institutions, location and number researchers related to soybeans in Korea. (12) Amounts, area planted, and production for every class of soybean seeds in Korea in 1982. (11) research institutions, location and number of researchers related to soybeans in Korea. (12) Amounts, area planted, and production for every class of soybean seeds in Korea in 1982. (13) The amount and purchasing prices of soybean by the government and the prices of imported soybeans by year in Korea. Figures: (1) Marketing channels for soybean in Korea. 2765. Sim, William J. 1984. Farmers' experiences and experiments with growing soybeans [in Ontario, Canada]. In: Ontario Soya-Bean Growers' Marketing Board. ed. 1984. Ontario Soybean Symposium. Chatham, Ontario, Canada: OSGMB. 319 p. See p. 73-78.

• **Summary:** The author grows 500 acres of soybeans in Ontario. Soybean production in Canada is subsidized by the federal government. "Until 1973, the only export of any consequence was to the United Kingdom, mainly because of the preferential trade benefit. This was phased out in the early 1970s and export sales greatly diminished. In 1973, after years of frustration, the Soybean Board subsidized a shipment of about 30,000 bushels to Japan for the human consumption market, mainly miso and tofu. Since then, the quality of Ontario soybeans has become so renown in the Pacific Rim countries that 1982 exports to this area accounted for 2.2 million bushels. The potential of this market is almost unlimited..."

"In summary, I would like to say that I am excited about our soy production. It is like a new lease on life to grow something other than corn. We'll probably never get rich at it, but we'll enjoy trying." Address: Farmer, Moore township, Lambton County, ONT, Canada.

2766. Somaatmadja, Sadikin. 1984. Development of soybean culture in Indonesia. *Tropical Agriculture Research Series* No. 17. p. 23-36. March. International Symposium on Soybean in the Tropics and Subtropics. [3 ref]

• **Summary:** Contents: Abstract. Area and production: Share in national food production, national soybean production, producing centers, soybean area. Supply and demand situation: Export and import, future demand and production, utilization. Methods of cultivation: Cropping system, cultivation, pests, diseases and other problems. Research and CRIFC: Research program and activities. Support for soybean production. Further prospects and main constraints. Discussion (questions and answers).

Utilization (p. 28): "1. Side-dish with rice: Tempe (fermented soybean cake), tahu (soybean cake), taucu (soybean paste), tauge (soybean sprout), kecap (soy sauce) and goreng kedelai (fried soybeans). Of these, tempe and tahu are very important in the diet of the people.

"2. Snacks: Roasted soybeans, kerupuk tahu (tahu chips), boiled young soybean pods" [edamame].

Tables: (1) Annual average soybean production during and before PELITA (Five-year development plan, 1964-

1981). (2) Soybean production in the last six years, 1977-1982 (East Java, Yogyakarta, Lampung, Central Java, Nusa Tenggara Barat {NTB}, West Java). (3) Soybean production in six [major soybean producing] provinces, 1988-1981. (4) Soybean production in four additional centers, 1977-1981 (D.I. Aceh, N. Sulawesi, Bali, S. Sulawesi). (5) Soybean harvested area, yield and production in sawah (rice fields) and tegalan (dry land), 1979-1981. (6) Export and import of soybean, 1969-1982 (Indonesia was a small exporter until 1977 when exports stopped; imports over 100,000 tonnes began in 1976, and by 1982 had risen to 476,000 tonnes). (7) The estimated demand for soybean and production target, 1983-1988 (Source: Directorate General of Food Crops). (8) The important insects of soybean. (9) Improved soybean varieties. (10) Packages of technology in the intensification and areal [area] expansion programs.

Graphs: (1) Demand, production, and import of soybeans, 1978-1982. (2) Target of soybean area, 1983-1988 (tegalan field area is expected to rise rapidly; sawah field area will stabilize starting in 1985). A map of Indonesia (p. 31) shows seven research institutes under the Central Research Institute for Food Crops (CRIFC). They are located in Bogor, Sukamandi, and Lemband (W. Java), Sukarami (W. Sumatra), Banjarmasin (S. Kalimantan), Maros (S. Sulawesi), and Malang (E. Java). Address: Central Research Inst. of Food Crops, JL Merdeka 99, Bogor, Indonesia.

• **Summary:** Soybeans were first exported from Canada about 12 years ago when a Japanese house approached the Ontario Soybean Grower's Marketing Board for a trial shipment to Japan. The trial worked out very well and in a short time Ontario's soybean exports became a multi-million dollar business. Ontario soybeans are very clean, the quality is comparable to Japanese and Chinese soybeans, and the supply is consistent. However the price is high in relation to Chinese and U.S. soybeans. As a result, Ontario soybeans are sold in high-priced markets, as for making premium quality miso or soyamilk. The supply of Chinese soybeans is irregular. Address: Manager, Grain Trading Section, Okura & Co. America Ltd., New York, NY.

2768. Wernham, Les. 1984. Exports-Problems and opportunities [for Canadian soybeans]. In: Ontario Soya-Bean Growers' Marketing Board. ed. 1984. Ontario Soybean Symposium. Chatham, Ontario, Canada: OSGMB. 319 p. See p. 246-53.

• **Summary:** Soybean exports from Ontario have expanded dramatically during the past 10 years; in 1982 they reached a high of 132,000 tonnes worth \$44 million. The East Asian

market including Japan, Korea, Hong Kong, and Malaysia accounted for 81% of Ontario's export soybean sales in 1983, with an additional 8% going to Europe. The main buyers in 1982 were: Japan 47,414 tonnes, Netherlands 19,545 tonnes, Singapore 18,039 tonnes, Indonesia 16,652 tonnes, Hong Kong 15,234 tonnes.

Most of these soybeans are sold for human consumption. "For example, one of Sweden's foremost pharmaceutical manufacturers has in the past years been that country's largest single importer of Canadian soybeans. Taking about 3,000 tons annually, this company produced a patented intravenous nourishment called Intralipid." Tiny soybeans (5 mm diameter or less) are used to make bean sprouts and natto. For soybean exports, freight constitutes an average 21% of the net delivered cost to the buyer in his country. They are shipped in bagged or bulk (20 or 40 foot) containers. The main focus of breeding should be to develop varieties that do not carry a common bitterness or beany flavor. Address: Grain Manager, King Grain, Chatham, ONT, Canada.

2769. *Mainichi Daily*. 1984. Researchers say miso good anticancer agent. April 1. p. 12 (B). Sunday. Summarized in East West Journal as "Miso and Cancer Update," July 1984, p. 11. [1 ref. Eng]

• **Summary:** Miso contains substances capable of controlling the growth of cancer. This finding was announced by a team from Tohoku Univ. in Sendai, Japan, headed by Prof. Shuichi Kimura. A formal report will be presented at the meeting of the Agricultural Chemical Society of Japan to be held this month in Tokyo. "The finding also confirms the popular belief in the effectiveness of miso soup against cancer, especially stomach cancer. The specific anticancer substances in miso appear to be combinations of fatty acids and ethanol, or ethylesters of fatty acids. The most effect of these is linolenic acid ethylester. In all, these anticancer ethylesters of fatty acid content account for some 0.5% of miso. Yet they are 'so effective against cancer that 10 milligrams, or the amount in an ordinary cup of miso soup, can completely eradicate the toxicity of 5 micrograms of benzopyrene, a powerful carcinogen,' according to Prof. Kimura. 'One kilogram of beef, entirely charred, can produce only 1 microgram of this carcinogenic chemical, thus indicating how miso soup is effective against cancer.'"

2770. Kawamura, Wataru. 1984. Re: Miso in America. Letter to William Shurtleff at Soyfoods Center, April 9. 1 p. Handwritten, with signature. [1 ref. Jap]

• **Summary:** Mr. Kawamura is widely known in Japan as "Miso Sensei" (miso teacher). Address: 2-4-7 Kugenuma, Tachibana, Fujisawa-shi, Kanagawa-ken 251, Japan. Phone: 0466-22-1351.

2771. Hesseltine, C.W. 1984. Re: NRRL history and culture collection. Dr Church, Dr. Raper, and Dr. Thom. Letter to William Shurtleff at Soyfoods Center, April 10. 1 p. Typed, with signature on letterhead.

• **Summary:** “In 1984 the NRRL culture collection contained 77,000 strains of molds, yeasts, and bacteria. It was staffed by 6 full-time curators,” of which two maintained the mold collection.

According to Dr. Raper, Dr. Church left USDA and went to a small college in Urbana, Ohio. Dr. Raper also provided a number of accounts about Dr. Thom.

“You might be interested to know that we have Dr. Thom’s original notebooks and his entries of the *Aspergilli* and *Penicillia*. I also rescued a drawerfull of correspondence on soy food going back into the 20’s and perhaps earlier about miso, shoyu, and other soy foods. For instance, there is one folder with nothing but Japanese and Chinese labels of soy foods.” Address: Chief, Fermentation Lab., USDA/NRRC, Peoria, Illinois.

2772. Bates, Cynthia. 1984. Re: History of The Farm’s work with tempeh. Letter to William Shurtleff at Soyfoods Center, undated. 3 p.

• **Summary:** Alexander [Lyon] and Dianne Darling began experimenting with tempeh in about 1972. Dr. Hesseltine had sent some literature and starter culture on the hunch we would be interested. I did not work at the [Soy] Dairy at this time, but I have been told about this time space by others who did work there then. Alexander was the Dairy straw boss and overview person; he set up the [soy] milk operation and ran it. Dianne mostly worked with the cultures and got into miso for the most part, I was told, but didn’t get into tempeh so much because she thought large scale production was not practical. Occasionally she and Alexander would make a small batch of tempeh, enough for the people who worked there to get a taste. Deborah Flowers started working at the Dairy and liked tempeh, and wanted to turn the Farm onto it. She made a couple of large batches, incubated in the boiler room at the Canning and Freezing plant, that were served for breakfast two different times at our community kitchen; that was the first time I tasted it. Deborah was trying to figure out ways to produce enough spores, a limiting factor along with the lack of an incubator...

“In 1974 I was researching algae for alternative protein sources in human foods and wanted to start an algae farm. I joined the [Soy] Dairy because soy systems looked like a good intermediate step that would accomplish the same ends (i.e. feed more people with less waste). One day we (the Dairy [soy] milk crew, Mary Hubbard, Marsha Ellis, JoAnne Else, and I) made some soy pulp [okara] sausages. Soon after I adopted the project and built an incubator out of an old refrigerator. JoAnne showed me the way the Dairy was currently making spores–inoculating petri dishes of

chopped sweet potatoes (sterilized) with cultures in test tubes. Alexander taught me basis lab procedure: transferring cultures with a needle, making agar slants, doing serial dilutions.

“November 1974 is the first recorded batch of tempeh in the Tempeh Shop, but I was not keeping very good records at the time. I made 20-30 pound batches out of soy pulp [okara] for the rest of the year. Alexander [Lyon] scored us the Flour Mill’s old bean dryer for an incubator which we used into 1975. At that time Alexander was still the overall manager of the [Soy] Dairy and, although he didn’t actually work at the tempeh shop, he would come in and do a project sometimes, be encouraging, give advice. He was the Dairy expeditor and teacher. Deborah Heavens and Valerie Epstein both worked at the Tempeh Shop at different times in its first year.”

“So far I haven’t been able to come up with a documented date on the first printed instructions [for making tempeh]. They were most likely written in 1975 after *The Farm Vegetarian Cookbook* came out, but they may have been published in late 1975 or early 1976.” Address: The Tempeh Lab., P.O. Box 208, Summertown, Tennessee 38483. Phone: 615/964-2286.

• **Summary:** A brief introduction.

2774. Leviton, Richard. 1984. Japanese soyfoods. In: Camille Cusumano. 1984. *Tofu, Tempeh, & Other Soy Delights*. Emmaus, Pennsylvania: Rodale Press. x + 261 p. See p. 144-49.

• **Summary:** Contents: Brief biography of Leviton and introduction. Deep-fried and grilled tofu treats: age, atsuage, ganmo, yaki-dofu, doufu-gan. Tofu haute cuisine (at 280-year-old Sasa-no-Yuki in Tokyo, dried-frozen tofu, wine-fermented tofu). Delights of soymilk and yuba (incl. Yuba Han). Natto, miso, and savory soy condiments (incl. Hamanatto or “savory soy nuggets,” thua nao from Thailand, and natto miso). And still more: Cooked soybeans with wakame, “soy sprouts packed in a sausagelike clear tube, green soybeans in the pods, *kinako* powder (a flour made from dry roasted soybeans, used as a basis for confections or nut butters), freeze-dried instant miso soup powder, instant silken tofu powder (just add water and stir), and dry meat sauces for tofu.” Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2775. Leviton, Richard. 1984. The organic Garden of Eden: A Michigan-based natural foods company [Eden Foods] stresses quality and fidelity. *East West Journal*. April. p. 18, 20-23.

• **Summary:** A good history of Eden Foods (although the early dates are incorrect), which has blossomed from a

student-run co-op in Michigan in 1967, to a nationally recognized name in 1984. Based on an interview with Mike Potter, who had become interested in macrobiotics in 1967 when, sick with hepatitis in California, he met Herman and Cornelia Aihara and found that macrobiotics “all articulated my own intuition.” Potter is now a seasoned businessman, with 13 trips to the People’s Republic of China and 7 to Japan.

“Eden’s beginnings are a little vague, Mike Potter explains... In July 1967 a group of students in Ann Arbor began distributing macrobiotic staples from Boston. This effort eventually led to a co-op called Eden Foods; in 1968 it became a full-fledged, though small, retail store. Around 1969 Potter visited Ann Arbor and the brand new Eden Foods. At the time, he was busy managing a natural foods store in nearby Birmingham [Michigan].

“In these days Judy and Bill Bolduc and Tim Redmond owned the 1,500 square foot Eden store. By 1971 the group was milling flour and baking granola and they asked Mike [Potter] to become a manager with an ownership position. In 1973 they moved the manufacturing end into a much larger building a half block away, and sales topped \$175,000 a year. By late 1973 Eden was sharing a building with competitor Midwest Natural Foods and co-distributing products. They also relocated their retail store, adding on a natural foods restaurant and a whole grain bakery, and employed 25 people. By 1972 Potter and the Bolducs had begun to distribute their products using first a Dodge van, then a couple of refrigerated twenty-foot trucks. But all this relocating and moving the retail store about, which had been underwriting the wholesale and manufacturing aspects, used up their cash flow. Financial troubles ensued. Mike bought out the Bolducs. ‘I can make this thing work, he told them.

“Potter traveled to Japan and made important contacts with Muso, a leading macrobiotic supplier. Eden imported Erewhon-branded products directly from Japan. They started searching Michigan farms for organic crops... A cornerstone of Eden policy since 1973 is support of local Michigan farmers. Eden supports sixteen farms in Saginaw Bay which grow organic grains and beans (and three organic rice growers elsewhere) for a total of 6,000 acres [in 1984]—up from 1,000 in 1977... In 1977 Eden opened Turtle Island restaurant, which stayed open until the fire. In 1978 Eden started to advertise in magazines. But the company had grown wobbly, bureaucratized, and unwieldy.”

“Late in the evening of November 26, 1979 the Eden warehouse was consumed and destroyed by flames... An estimated \$800,000 in inventory, machinery, and supplies were lost, much of it irreplaceable, since the eventual insurance settlement covered barely one half the loss. Most old-timers at Eden agree that the fire was ultimately highly beneficial... ‘The fire was constructive,’ says Ron Roller. ‘The energy here was stagnated, with too many departments each claiming a turf. The management was in disarray; a

change was needed...’ The Eden of 1979—2,400 products, 100 employees, a natural foods restaurant, a whole grain bakery, a retail store in Ann Arbor, several tractor trailer trucks, a \$50,000 computer with eight terminals, a 10,000 square foot building—burned to the ground. Eden, somehow, was out of operation for only two weeks after the fire. Immediately it began to function in an empty 5,000 square foot building next door (the truck garage). They got the cash flowing again on an inventory staggeringly depleted. The insurance company gave them a depressingly small advance against damages and refused to settle on the claim. Eden was advised to declare bankruptcy.” About a year after the fire, construction on the new building was completed. By 1980 Eden had moved into this 20,000 square foot building at 701 Tecumseh Road in the tiny town of Clinton, Michigan, (population 2,000) about 60 miles southwest of Detroit. It was 27 months [2¼ years] before the final settlement.

In 1982 Eden imported 25 container loads (each weighing 35,000 lb) of Japanese natural foods, including natto miso and buckwheat miso. Ron Roller is now purchasing manager, Bena Burda is sales manager, Bill Swaney is production manager, and Kathy Nohr is office manager. Cliff Adler and Mike Gorman are also key co-workers. The company has nine shareholders, of whom seven are daily employees. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

2776. Okazaki, H.; Kano, U.; Kimura, S. 1984. [Investigation of the anti-mutagenic substance in miso]. Paper presented at the annual meeting of the Agricultural Chemistry Society of Japan. 1 p. English abstract. Held 1-4 April 1984 in Tokyo. [Jap; Eng]

• **Summary:** No mutagens were found in miso. Some antimutagens were identified in the lipid fraction of miso. Ethylester of unsaturated fatty acids, especially that of linolenic acid, showed a strong anti-mutagenic effect. Ethylester of linolenic acid seemed to be formed from linolenic acid which was liberated from the glycerides in soybeans by the microorganisms in miso and ethyl alcohol produced by the yeast during fermentation of miso.

• **Summary:** Elf Works’ primary brand was Wizard Baldour’s Hot Stuff. ANF’s president is John Troy. Address: Chapel Hill, North Carolina.

2780. Morris, Linda Lowe. 1984. Popularity of soyfoods keeps cookbook authors busy. *Journal-Gazette (Ft. Wayne, Indiana)* May 9. [3 ref]

• **Summary:** About Shurtleff & Aoyagi (authors of *The Book of Tofu, The Book of Miso*), Jana Crutchfield (*Tofu—Not Just for the Health of It*), and Juel Anderson (*Tempeh Primer*). Address: Baltimore Sun.

2781. Troy, John. 1984. Work with miso and American Natural Foods (Interview). *SoyaScan Notes*. May 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John dropped out in the 1960s. He has always loved to eat. He does not remember when he first heard of miso, but he probably first tasted miso or used it in a recipe in about 1976. That was the year he met Joel Dee of Edward & Sons. John started using miso in about 1980, on spiritual retreats when he was the cook. He brought in all the visiting gurus. When John Belleme and Barry Evans set up their American Miso Company they called him and invited him to visit. He was very, very impressed and soon got involved. Hot Stuff, his first product, was introduced in early 1981. Hot Stuff originated when a little string of peppers fell into the blender. He thought, “I’m gonna make me a hot sauce,” so he tossed in lots of macrobiotic ingredients on his lazy susan and “hit it pretty close.”

John is now working with Jimmy Silver and Jeffrey Hilgert in developing Hot Chips, which will be made by using powdered Hot Stuff for dusting corn chips. John is now also doing a private offering in North Carolina to raise money; a public offering is 3-5 years away.

Update: Talk with John Troy. 2000. June 26. John was working at a little natural foods store named Beautiful Day (in Durham, North Carolina) on day when Joel Dee drove up in a car peddling Miso Cup, a new product, sold in little packets. This was the first time that John can recall ever seeing miso or Miso Cup. Address: Suite 21, The Courtyard, Chapel Hill, North Carolina 27514.

2782. Fruin, W. Mark. 1984. History of Higeta Shoyu Co. 4060 Amaranta Dr., Palo Alto, CA 94306. 4 p. May 15.

Unpublished manuscript.

• **Summary:** Higeta shoyu is one of the oldest brands of soy sauce in Eastern Japan, tracing its history back to the Hamaguchi brothers who migrated at the beginning of the 17th century from Hiromura in Wakayama prefecture (across the river from Yuasa, the birthplace of shoyu in Japan) to Choshi on the eastern tip of the Miura Peninsula, which curves around the top of Tokyo Bay. The Black Current, which runs northward from Wakayama to Choshi, carried the Hamaguchi brothers’ ships. They had the foresight to transport shoyu from its place of origin in western Japan to the newly opened vistas in the 17th century of Tokyo and the Kanto plain hinterland.

Around 1615 the elder of the two Hamaguchi brothers established Hiroya, a food distribution company in Tokyo (then Edo), while the younger brother ventured into the manufacture of Yuasa shoyu. For the next several centuries, Yamasa was noted as a good but local shoyu, indistinguishable from other local brands except for the access to the Tokyo market, which it enjoyed through Hiroya.

In 1914 the elder Hamaguchi joined with two other Choshi families, Tanaka Genba and Fukui Kichibei, to form the Higeta Shoyu Co. Ltd. Each family continued to produce their own brands of shoyu but around 1925 Higeta, which had been Tanaka Genba’s brand, became the sole company brand. An ambitious plan of expansion of expansion was drafted to leapfrog Higeta over Yamasa its local rival. But Higeta became overextended and in 1937 Kikkoman stepped in and purchased 80% of Higeta’s outstanding shares.

As Higeta was brought into the fold of Kikkoman companies, the involvement of the original investors changed. Tanaka Genba gradually withdrew. The Fukui family remained active in the company until the 1970s, but then they too withdrew. Only the elder branch of the Hamaguchi has stayed with the firm throughout the postwar era, and they now constitute the firm’s top management and own some 30 percent of the company stock; the Mogi-Takanashi families from Kikkoman control another 20 percent (Kikkoman had to divest itself of Higeta during the economic deconcentration programs of the Allied Occupation of Japan); the wider Hamaguchi family claims another 20 percent, with the remaining shares widely scattered.

Higeta differs noticeably from the other major shoyu companies in Japan. Most importantly, since 1966 it has relied entirely on Kikkoman for its marketing, concentrating its energies instead on manufacturing. This has saved Higeta the expense of trying to establish its name as a national brand. It spends less than 3 percent of its sales on advertising, and most of this is directed toward institutional sales, where Higeta is strong. It dominates the market for shoyu in noodle shops in Tokyo, for example, claiming 80

percent of soba and udon shops. Overall, about 65 percent of sales go to such institutional customers and 35 percent of the home market.

Because Higeta has relied on Kikkoman for its marketing since 1966, most of its line of minor products, like miso and sauce, have nearly disappeared through the lack of an independent marketing effort. In fact, 90 percent of its sales come from the sale of shoyu, and 90 percent of the shoyu it makes is koi-kuchi [koikuchi] or Eastern style shoyu. In short, Higeta is a single-product company.

But the single-mindedness of Higeta is its strength. It leads Japan in shoyu production know-how. Higeta, for example, in cooperation with Hitachi Ltd. was the first maker to automate the koji culturing step of production, reducing the labor force required for this stage from 250 to 30 people. Indeed, Higeta, because of these strengths, is the third largest maker in Japan with 7 percent of the total production, even though the Higeta brand is only the fourth largest selling shoyu in Japan. This difference is explained by the fact that Higeta's production excellence is so well established than many firms buy filtered but unrefined shoyu from Higeta to brand as their own product.

Higeta's manufacturing superiority comes from the concentration of all of its production and brewing know-how in just one plant in Choshi since 1973. The highly efficient design of this factory means that Higeta has the lowest operation costs of any company in the industry and even Kikkoman is not above buying shoyu from Higeta to sell as its own. Nevertheless, the lack of marketing muscle means that most Japanese only sample Higeta in their favorite noodle shops.

Higeta is known among afficiandos for its quality. This is derived from a combination of color, aroma, and taste which is unique among large mass producers of shoyu. Address: Palo Alto, California. Phone: 415-858-2226 or 327-0857.

2784. American Natural Foods, Inc. 1984. Confidential private placement: Offering circular, May 1, 1984. Suite 21, The Courtyard, Chapel Hill, NC 27514. 40 p. 28 cm.
• **Summary:** Contents: American Natural Foods, Inc. (ANF)—Offering circular. Risk factors and capitalization (One million shares are offered for \$150,000. Four million shares have been issued to the principals in this venture and 4 million shares have been issued to the former Shareholders of Elf Works, Ltd. If fully subscribed, the total proceeds from subscriptions and from investment by the

principals will be as follows (in millions): John C. Troy \$2.4. Jeffrey Hilgert \$1.040. James Silver \$1.040. John Fogg \$0.80. Hague C. Bowman \$0.600. Ernest G. Golding \$0.600. Thomas D. Higgins, III \$0.600. etc.). Owners of shares in Elf Works Ltd. Capital leveraging. Application of proceeds. Terms of offering. Description of securities. Summary of the merger between American Natural Foods, and Elf Works, Ltd. Obligations of and to American Natural Foods, Inc. Legal options. Exhibit A: Corporate stock redemption agreement. Exhibit D: Employment agreement. Exhibit E: Contract between ANF and American Miso Company, Inc. Exhibit F: Contract between ANF and Mrs Campbell's Canning Co., which has a plant in Winston-Salem, North Carolina. Exhibit G: Exclusive distributorship agreement between ANF and U.S. Naturals (Novato, California). Product schedule. Addendum to exclusive distributorship agreement: Minimum purchase required. The natural foods industry. An overview of the market for health/natural foods (from *Business Trends Analysts = BTA*). Supermarket nutrition centers (from *BTA*). Health-natural food chains. The market for health/natural groceries (from *BTA*).

Tables (from BTA): (1) Retail sales of health/natural foods by product (shows soyfoods have grown from \$26.1 million in 1977 to an estimated \$163.0 million in 1983). (2) Manufacturers' shipments of health/natural foods by product (shows soyfoods have grown from \$15.8 million in 1977 to an estimated \$101.8 million in 1983). (3) Manufacturers' shipments of health/natural foods, 1977-1993P—dollars per year. (4) Retail sales of health/natural foods, 1977-1993P—dollars per year (Annual growth is about 25% a year). (5) Retail sales of grocery items in health food stores, by specific product category, 1981-1982. (6) Manufacturers' shipments of natural groceries, 1977-1993P—dollars per year. etc.

ANF financial objectives, by product and by year. ANF corporate strategy (create single brand identities). Distribution and sales strategy. ANF overall product strategy. ANF individual brand strategies for nine products: Hot Stuff, Hot Chips, Smoky Mountain Sizzlin', Naturally Preferred—Miso Mustard, Fiesta Salsa, Bee Nut Butter (for kids; peanut butter with a dab of miso and bee pollen), Bee Nut Butter Bar, Sea Sauce, The Works (for hamburgers and hot dogs). Management profiles: President John Fogg, Treasurer Hague Bowman, Vice President and General Counsel Thomas D. Higgins III, Secretary Eugene C. Brooks III, Marketing Director John Fogg. "Miso soup—Safeguard against cancer," by Bill Shurtleff (from *East West Journal*). "Ah, so you want to try miso: A mountain couple is practicing the ancient art of making this Japanese food," by Beatrice Taylor Quirk (from *Carolina Lifestyle*, Sept. 1982). Color poster titled "It's Hot Stuff." Address: Chapel Hill, North Carolina. Phone: (919) 929-1240.

2785. American Natural Foods, Inc. 1984. The love affair of miso and mustard (Ad). *East West Journal*. May. p. 19.

• **Summary:** An elegant full-page color ad. The top half of this ad shows a photo of a jar of Naturally Preferred Miso Mustard in front of several heads of barley, a bowl of whole soybeans, and a wooden miso tub with braided bamboo hoops.

“Miso Mustard marries three carefully chosen mustard seeds—a high valued yellow seed, a robust dark seed and a pungent Oriental seed—with Amakuchi Miso, the prized barley miso from Japan, now made in America.

“The mustard seeds are stone ground, sensitively and sparingly, to release their flavor while protecting the delightful grainy texture.

“The Amakuchi Miso gently mellows the mustards, making the flavors rich and round with superb and memorable character.

“But Miso Mustard is more than an excellent new mustard. It doesn’t just season other foods, it transforms them!” Address: P.O. Box 2321, Chapel Hill, North Carolina 27515. Phone: (919) 929-0113.

2786. Dremann, Mary Carroll. 1984. Making the most of miso. *Vegetarian Times*. May. p. 35-36.

• **Summary:** Contains several beautiful color photos plus 8 tofu recipes: Marinated orange tofu salad. Five-minute miso soup with tofu. Steamed watercress with tofu and ginger. Tofu mayonnaise. Blue cheese dressing. Light vinegar-oil dressing. Tofu green goddess dressing. Buttermilk dip.

2788. **Product Name:** Live Soy Sauce, Live Miso, Barley (Mugi) Miso, Hacho (Soybean) Miso, Chick Pea Miso, Pea Miso, Peanut Miso, White Miso.

Manufacturer’s Name: Great Life Products.

Manufacturer’s Address: P.O. Box 2546, Escondido, CA 92025.

Date of Introduction: 1984. May.

Ingredients: Chick peas, rice koji, natural sea salt, soybeans (optional).

Wt/Vol., Packaging, Price: 1 lb plastic bags.

How Stored: Refrigerated preferably.

New Product–Documentation: Great Life Products catalog. 1984. May. * Limited editions (aged six months and over): Chick Pea Miso (chick peas, rice koji), Pea Miso (split peas, barley koji), Peanut miso (whole peanuts, barley koji), white miso (small navy beans, rice koji). * These misos sell out fast—Quantities are limited.

2793. Stinchecum, Amanda Mayer. 1984. Okinawa: Chinese influence. *New York Times*. June 10. p. XX6. Sunday.

• **Summary:** Urizun, a restaurant in Naha (Asato 388-5), the capital of Okinawa Prefecture, is a “rare combination of superb food and ambiance.” It was started 12 years ago by Tsuchiya Saneyuki, because of his passion for awamori, “the Okinawan liquor distilled from Tahiri rice and aged like whiskey.” Its flavor resembles that of shochu, which is distilled from potatoes in southern Kyushu.

Urizun serves Tofu-yo (\$1.30), Okinawa-style fermented tofu with a sharp taste. Another popular dish has a dressing of miso and vinegar. Another Okinawan standard is a “creamy white tofu made of peanuts.”

2794. Appropriate Foods, Inc. 1984. Eat Appropriately! Summer catalog '84. 137 New Hyde Park Rd, Franklin, NY 11010.

• **Summary:** The following lines are carried and distributed: Appropriate Foods (tempeh, soymilk), New York Soy Deli, Grainaissance (amazake and mochi), Garden of Eatin', McZand Products, N.Y. Miso, Nasoya, Nutri-Gest, The Soy Source, Sister Shorter, Swan Gardens, Sprout Delights, Willow Run Margarine, Great Eastern Sun (all of their products). Address: Franklin Park, New York.

2795. Beuchat, Larry R. 1984. Fermented soybean foods. *Food Technology* 38(6):64-70. June. [31 ref]

• **Summary:** Discusses soy sauce, miso, and tempeh, and gives details of their fermentation processes. Address: Prof., Dep. of Food Science, Univ. of Georgia, Agric. Exp. Station, Experiment, GA 30212, USA.

2796. Chandrasiri, Vasina. 1984. Assessment of protein quality in soybean processed foods: Available lysine contents. *J. of the National Research Council of Thailand* 16(1):35-50. Jan/June. [18 ref. Eng; tha]

• **Summary:** Available lysine contents of soybeans and 10 soyfoods was determined as follows: raw soybeans 6.62 g/16 g nitrogen, cooked soybeans 6.12, white tofu 5.64, yellow tofu 6.24, soft curd tofu 5.63, tube tofu 6.17, yuba 8.13, soymilk 4.43, soy sprouts 3.79 (each g/16g N).

Values for fermented soyfoods were as follows: white soybean paste [miso] 4.72, black soybean paste 3.72, fermented curd cake (okara) 5.35. 30 minutes of boiling did not reduce the available lysine significantly. The study concluded that there was no reduction in available lysine content of soybeans before they were made into fermented or non-fermented soyfoods. There was no change in the amount of available lysine in the non-fermented soyfoods,

but there was a small, statistically significant reduction in fermented soyfoods. Address: School of Home Economics, Sukothaithammatirat Univ., Thailand.

2797. Shurtleff, William; Aoyagi, Akiko. 1984. Amerika Gasshû-koku oyobi Kanada ni okeru miso no rekishi (2) [History of miso in the USA and Canada (2)]. *Miso no Kagaku to Gijutsu (Miso Science and Technology)* 32(6):287-91. June. [221 ref. Jap]

• **Summary:** This is part 3 of a translation in 4 parts by Taeko Ebine of the chapter on the “History of Miso” from *The Book of Miso* by Shurtleff and Aoyagi. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2798. Watanabe, Tokuji; Kishi, Asako. 1984. The book of soybeans: Nature's miracle protein. New York, NY: Japan Publications. 191 p. June. Illust. General index. Recipe index. 26 cm. [21 ref]

• **Summary:** Contents: Introduction. Part 1. General information: 1. Characteristic traits: Agronomic and other biological characteristics, physical properties, chemical properties, soybean protein, properties of soybeans as food material. 2. Current ways of using and processing soybeans: Throughout the world, traditional ways of using and processing, new soybean food products. 3. Tofu and other nonfermented soybean food products: Tofu, deep-fried tofu, dried-frozen tofu, soy milk, yuba, roasted soy flour (kinako), soybean sprouts. 4. Miso and other fermented soybean products: Miso, natto, Hama-natto (tera-nattô), soy sauce, sufu, tempeh. 5. Other ways of eating soybeans—Simple traditional Japanese foods: Parched soybeans, boiled soybeans (*budo-mame; hitasahi mame*), beaten and mashed [or ground] soybeans (*go*, or (from edamamé) *zunda or jinda*), molded soybean mash (*jinta-dôfu*), molded mashed soybeans and rice flour (*shitogi*), soybean soybean-mash paste. 6. New soybean protein products.

Note: This is the earliest document seen (Nov. 2008) that mentions *zunda* which is a healthy and tasty snack or treat made from mashed edamamé. It's sweet, rich in protein, high in fiber and emerald green. It is said to have originated hundreds of years ago in Japan in Miyagi prefecture. In and around Sendai (capital of Miyagi prefecture) one can find many shops and booths that sell *zunda* cakes, *zunda* mochi treats, and *zunda* shakes, all made from edamamé (green vegetable soybeans). One well-known company in Japan that markets delicious *zunda* products is Zunda Saryo.

Part 2. Cooking with soybean food products: Tofu, yaki-dofu, kori-dofu, nama-age, abura-age, gammodoki, yuba, natto, miso, soy milk, soybeans, bean sprouts. Afterword. Bibliography.

In the chapter on tofu, pages 43-44 discuss okara or *unohana* (the residue remaining after soy milk production); a photo shows it in a glass bowl. “Though it formerly

appeared on many Japanese tables seasoned and cooked with vegetables, today it is most often fed to animals. As the number of animals raised in urban and suburban areas decreases, however, tofu manufacturers are finding it harder to dispose of residue.”

Page 99 notes of tofu: “At a certain temple in Kyoto is a plaque bearing the following inscription, which, while comparing this food to religious faith, clearly shows the esteem in which the Japanese people hold tofu. ‘Religious faith should be like tofu: it is good under any circumstances. It is good boiled, grilled, or fried. Raw, chilled, served with soy sauce and other seasonings, it is good with steamed rice. Simmered in hot water and flavored, it is good with sake. Because it is soft, old people and sick people welcome it, but children and young people like it too. Men like it, women like it; poor and rich both like it. Though common, it has elegance enough to find a place in the upper class.

“It cuts clean and well for use in clear broths. It is good in the meatless diets of religious training. It can be crushed for use in miso soup. It is used all the time and in all seasons. It is inexpensive yet numbered among the delicious treats. It is welcomed everywhere, in mountains as well as in big cities. It is well received at dinners for dignitaries and guests yet is convenient enough for college students who do their own cooking. Women especially should be like tofu. The mature and cultivated person should be tender, yet firm, like tofu. Though apparently tasteless, it is delicious. Though apparently ordinary, it is extraordinary.”

Other ways of eating soybeans (p. 83-84): (1) Parched—“Parched gently in unglazed ceramic dishes made for the purpose,” then tossed by people at Sestubun in February around their houses as they chant “Demon out! Good luck in!” “Then they pick up the beans and eat them. “Parched soybeans are included in some varieties of *mochi* (glutinous rice cake) and in *okoshi* a confection made of puffed rice bound together with sugar syrup. In the past they were eaten with salt, miso, or soy sauce.” Note: In the USA, parched soybeans are called “dry roasted soynuts.”

Tables show: (1) World production of soybeans (1977-1982). (2) Price trends in dollars per ton for wheat, soybeans, and corn (1970-1981). (3) Soybean yields in the USA and Japan (1974-1981). (4) Chemical composition of soyfoods: Tofu, abura-agé, *kôri-dôfu*, yuba, kinako, soybean sprouts, nattô, miso (dark yellow), soy sauce (common), soybean (Japanese). (5) Statistics on production of modern soybean products in Japan (1975-1981). (6) Annual production and prices of modern soy protein products in the USA (May 1983).

Japan once produced a million tonnes (metric tons) of soybeans annually. This figure decreased dramatically during World War II. After the war, as soybean imports from the United States steadily increased, Japan’s domestic crop gradually fell to the level of no more than 100,000 tonnes.

In 1977 it was 111,000 tonnes, yet by 1982 it had jumped to 226,000 tonnes as rice acreage was reduced.

All photos are black and white. Figures show: (2) Line drawing of soybean plant with flowers and leaves. (2) Cross section of soybean seed-coat and cotyledon. (3) Graph of protein solubility (NSI) of defatted soybean meal at different pH values. (4) Graph of protein solubility (NSI) of defatted soybean meal at different concentrations of calcium chloride. (5) Graph of relationship between time and temperature of soaking soybeans in water (colder water temperature requires longer soak time). (6) Flow sheet for making regular tofu. (7) Photo of regular (*momen*) “cotton tofu.” (8) Line drawing of grinder (horizontal type) used with soaked soybeans when making tofu. (9) Photo of continuous filter for soy-milk preparation.  Diagram showing relationships between modern soy protein foods.

Note: Surprisingly, edamamé, one of the most popular soyfoods in Japan, is mentioned only once, in passing (p. 84) in this book.

Photos on the rear cover show Tokuji Watanabe (born in 1917, graduated from the Faculty of Agriculture of Tokyo University, 1941, with Doctor of Agriculture) and Asaki Kishi. A brief biography of each is given. Address: 1. D. Agr., Kyoritsu Women's Univ., Tokyo.

2799. Watanabe, Tokuji; Kishi, Asako. 1984. Hama-nattô (Tera-nattô). In: Tokuji Watanabe and Asako Kishi. *The Book of Soybeans: Nature's Miracle Protein*. New York, NY: Japan Publications. 191 p. See p. 75-76.

• **Summary:** To make Hama-natto: Ingredients: Selected soybeans, wheat, salt, and ginger. Soak soybeans in water at about 20°C for 3-4 hours, then drain and steam for 5-6 hours. Allow to stand in the steaming vessel overnight [so that their color darkens]. When their temperature has fallen to less than 40°C, mix soybeans with toasted and ground wheat (sometimes barley is used instead) and inoculate with koji starter (*tane-koji*). Mix well and distribute among shallow wooden koji boxes. Store these [typically in a koji incubation room] at from 30-35°C for 50 hours, until beans are covered with a fragrant mold mycelium.

Spread out beans and dry in the sun until a mixture that formerly contained 30-35% moisture contains only 20-25% moisture. [The color of the beans will also become still darker]. Place molded beans in a vat, just cover with brine (Baumé 15 degrees), cover with a pressing lid, weight the lid, and allow to stand for 6-12 months. (Sometimes soy sauce is used in place of brine).

Spread the beans on clean lines in a clean place and dry once again in the sun. Finally mix with ginger that has been pickled in soy sauce.

"Hama-natto retains the shape of the original soybeans but is a lusterless blackish color." It has a high salt content (about 10%) and a low water content (36-38%), and it keeps for a long time. Hama-nattô is a specialty of a city named Hamamatsu in Shizuoka prefecture, which is adjacent to Aichi prefecture; the latter is famous for its soybean miso [including Hatcho miso]. Clearly there is a close relationship between Hama-natto, a sort of salted soybean koji, and varieties of soybean miso. Address: 1. Kyoritsu Women's Univ., Tokyo.

2800. Elf Works, Ltd. 1984. It's hot stuff (Ad). *Natural Foods Merchandiser*. July.

• **Summary:** At the top of this large-format, full-page color ad is a hand pouring a bottle of Hot Stuff, a spicy seasoning. At the bottom of the ad are flames dancing up around

vegetarian shish-kebobs. The background goes from black at the top to dark blue at the bottom. The text (black on gold in the middle, with sentences separated by red hearts) begins: "Now you can add sure-fire magic to all your favorite foods with Wizard Baldour's Hot Stuff. Shake it—wake up the dragon—and watch the magic make food disappear. Hot Stuff is much more than America's newest, best-tasting, all natural, all-purpose hot sauce. It's good for ya' too! Wizard Baldour doesn't just make Hot Stuff. He concocts it." Ingredients include "heartly organic miso" and Umeboshi plums from Japan. Hot Stuff comes in two intensities: Regular and Blazing. Distributed by U.S. Naturals Corp., 84 Galli Drive, Novato, California 94947. Address: Box 2321, Chapel Hill, North Carolina 27515. Phone: 919-929-0113.

2801. **Product Name:** Colorado Organic Misos [2 or 3 Year Sweet Potato, or 2.5 Year Squash].

Manufacturer's Name: Mountain Ark (Distributor). Made in Colorado by Linda Payone.

Manufacturer's Address: 120 South East St., Fayetteville, AR 72701.

Date of Introduction: 1984. July.

Ingredients: Sweet potato: organic soybeans, organic sweet potatoes, wheat koji, Muramoto's sea salt, well water.

Wt/Vol., Packaging, Price: 1 lb tub. Retail for \$4.25, incl. shipping.

How Stored: Refrigerated.

New Product—Documentation: Summer Flyer. 1984.

June/July. p. 2. "Linda studied the art of traditional miso making with Noboru Muramoto in California."

2802. **Product Name:** Traditional Miso Kit [Rice, or Barley].

Manufacturer's Name: Mountain Ark.

Manufacturer's Address: 120 South East St., Fayetteville, AR 72701.

Date of Introduction: 1984. July.

New Product—Documentation: Summer Flyer. 1984.

June/July. p. 2. Home miso kits developed by John Belleme. This is unaged miso, all ready to age. 45 lb tub for \$60.00, on sale. Regular \$90.00.

2803. *Natural Foods Merchandiser*. 1984. Macrobiotics: Varied trends boost sales. July. p. 1, 85-86, 88, 90, 93-94.

• **Summary:** There is a definite upward trend in sales of macrobiotic foods. Macrobiotics is both a diet and a philosophy. "The basic foods are whole grains, miso, soy sauce, tofu, seaweed, pasta, fresh vegetables, and various types of pickled vegetables. Dairy products, honey, and most animal foods are not used or are used minimally."

2804. Shurtleff, William; Aoyagi, Akiko. 1984. Amerika Gasshû-koku oyobi Kanada ni okeru miso no rekishi (3)

Oyobi sono hoka no shokoku ni okeru miso [History of miso in the USA and Canada (3) And miso in other countries]. *Miso no Kagaku to Gijutsu (Miso Science and Technology)* 32(7):308-12. July. [221 ref. Jap]

• **Summary:** This is part 4 of a translation in 4 parts by Taeko Ebine of the chapter on the “History of Miso” from *The Book of Miso* by Shurtleff and Aoyagi. The other countries mentioned above are Israel, India, Brazil, and Nigeria. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2805. Rothschild, Barbara; Zwerdling, Daniel. 1984. Virginia dining: Ya Shue Yuen. *Washington Post*. Aug. 23. p. VAE11.

• **Summary:** This is a restaurant review of Ya Shue Yuen (2607 Wilson Blvd., Arlington, Virginia). “Noodles at Ya Shue Yuen often are tossed with an addictive, salty and roasty black bean paste...”

2806. **Product Name:** Eden Miso [Rice, Brown Rice, or Barley].

Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer’s Address: Clinton, MI 49236.

Date of Introduction: 1984. August.

New Product–Documentation: Ad in *Soyfoods*. 1984. Summer. p. 37. “Just the Best.”

2807. Eden Foods, Inc. 1984. Just the best [Edensoy, Eden tamari, brown-rice miso, barley miso] (Ad). *Soyfoods*. Summer. p. 37.

Address: Clinton, Michigan 49236.

2808. Fiske, Doug. 1984. Soyfoods in the supers [supermarkets]. *Soyfoods*. Summer. p. 18-23.

• **Summary:** Gives an in-depth look at the marketing strategies of Legume Inc., Tomsun Foods, Eden Foods, Vitasoy, Tempehworks, Nasoya, Eden Foods, Tempehworks, Soyfoods of America (Furama and Naturespring brands), White Wave, Hinode Tofu Co., Tofu Time (Tofutti), and Nasoya.

Eden Foods of Clinton, Michigan, has been involved with natural foods for 15 years, but only within the past year have they been able to establish a beachhead in supermarkets with their miso, soymilk, and soy sauce products. They are presently selling through 5 chains representing about 50 individual stores. Supermarket sales now account for about 10% of their \$7.5 million yearly sales.

2809. *Food Engineering*. 1984. Vegetable proteins: Topics from nutrition to cancer prevention to dietary fiber were presented by soy protein suppliers at the IFT [Institute of Food Technologists] show. Aug. p. 116, 119.

• **Summary:** A.E. Staley makes Textured Procon, textured soy protein concentrates. Central Soya makes Response, structured soy concentrate. Cargill makes Textratein, textured soy flours in 3 particle sizes used as partial ground meat replacers. “Among the ingredients from Kikkoman International were dehydrated miso and dehydrated tofu from soy, and dehydrated HVP (hydrolyzed vegetable protein) from soybean meal and corn gluten.” Hercules highlighted its standard and Luxor lines of HVPs for mild and beef-like flavors, and its capacity to customize HVPs to customer need. A brief summary is given of research indicating that miso may prevent cancer.

2810. **Product Name:** [Soybean Miso].

Manufacturer’s Name: Granja Tierra Nueva.

Manufacturer’s Address: Aldea San Luis, La Azulita, C.P. 5102, Estado Merida, Venezuela.

Date of Introduction: 1984. August.

New Product–Documentation: Letter from Ing. Oswaldo Perez. 1987. July. He made 100 kg of 18 month miso.

2811. Leviton, Richard. 1984. Soyfoods market: The top 15 prepared convenience soyfoods. *Soyfoods*. Summer. p. 42-43.

• **Summary:** “Since 1980 most of the innovation—and excitement—in the American soyfoods industry has centered around what are now called prepared convenience soyfoods.” The top 15 are: (1) Legume Light & Natural Tofu Entrees. (2) Edward & Sons’ Miso-Plus Jalapeno and Chive miso dips. (3) Farm Foods’ Ice Bean and Ice Bean Sandwich. (4) Tofu Time’s Tofutti. (5) Light Foods’ Light Links (tofu hot dogs). (6) Brightsong Light Foods’ Tofu Desserts and Dips. (7) Tomsun Foods’ Spice and Herb Tofu. (8) Eden Foods’ Edensoy. (9) Nasoya’s Vegi Dips. (10) Sonoma Specialty Foods’ Nutcracker Sweets. (11) Pacific Tempeh and Soyfoods Unlimited’s Tempeh Burgers. (12) Soyfoods Unlimited’s Leandro’s Meatless Lasagna. (13) Fantastic Foods’ Tofu Burger Mix. (14) Quong Hop’s Soy Fresh. (15) Garden of Eatin’s Nuclear Freeze (soymilk ice cream pops). A photo shows each product.

2812. Nikkuni, Sayuki; Itoh, H.; Tanaka, M.; Ohta, T. 1984. Studies on soybean protein digestion during miso fermentation. I. Changes in SDS polyacrylamide gel pattern of water-insoluble fraction during miso fermentation. *Nippon Shokuhin Kogyo Gakkaishi (J. of Japanese Society of Food Science and Technology)* 31(8):502-10. Aug. [14 ref. Eng]*

Address: National Food Research Inst., Ministry of Agriculture, Forestry & Fisheries, Yatabe, Ibaraki 305, Japan.

2813. Shurtleff, William. 1984. Ideal miso climate. *Soyfoods*. Summer. p. 34.

• **Summary:** Discusses the temperature and precipitation in Sendai, Japan. Address: Soyfoods Center, P. O. Box 234, Lafayette, California.

2814. Westbrae Natural Foods. 1984. Distributor catalog No. 2: Sept. 1, 1984. Emeryville, California: Westbrae. iv + 11 + [7] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-11 are a computer-printed price list, and the last 7 are a product glossary. The company now sells Malted (soymilk shakes in 3 flavors, packed in foil pouches), Organic soymilk (available in August) and two types of Instant miso soup (aka [red] and shiro [white]). Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

2815. Nordquist, Ted. 1984. Re: New developments with tofu at Aros in Sweden. Letter to William Shurtleff at Soyfoods Center, Sept. 6. 1 p. Typed, with signature on letterhead.

• **Summary:** “The company continues to expand, sales have doubled each year since we started in 1980. We now have steam injected cooking and pasteurization with a 30 day shelflife on all six products: Tofu (12% protein, made with nigari), tofu (8% protein, made with calcium sulfate), tofuburgers, tofulindstrom (red beets), Indian curry and marinated tofu. We will soon introduce tempeh, deep fried and marinated. We also plan to introduce a sandwich spread much like liverwurst in consistency before the end of this year.

“We produce about 108 kg of tofu per hour now and between 1.5 and 2 tons of products per week. I will be attending the first European Soyfoods Workshop, Sept. 27-28 in Amsterdam...”

“Would you please write a short resume about your work so I can submit it to the right people for the Alternative Nobel Prize.”

Across the top of this handsome letterhead are three logos: (1) Left: aros sojaprodukter örundsbro shows a little blue Viking with a horned helmet and big red heart. (2) Center: Aros. (3) Right: A Soyfoods Center, Sweden, with the California Soyfoods Center logo in all blue.

Enclosed with the letter: (1) Eight-panel brochure of “What is tofu?” and tofu recipes. (2) Aros mail order catalog (1 sheet, 8½ x 12 inches, blue on beige, 3 panels each side), with 8 books, a tofu kit, nigari, tempeh starter, and koji for making miso or amazake. Address: President, Aros Sojaprodukter, Bergsvagen 1, S-190 63 Orsundsbro, Sweden. Phone: 0171-604 56.

2816. Troy, John. 1984. American Natural Foods, Elf Works, and work with miso (Interview). *SoyaScan Notes*.

Sept. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** American Natural Foods (ANF) was formed in Jan. 1984 as its own company with its own investors; in March 1984 it acquired Elf Works, Ltd. Miso Mustard, BeeNut Butter, and Smoky Mountain Sizzlin’ were all introduced formally for delivery in Sept. 1984. ANF had a private stock offering in May 1984 in North Carolina; the proceeds (\$150,000) from 25 shareholders will be used mainly to develop new products. Some of the shareholders (such as John Fogg, marketing and design) are working with the company. Barry Evans, owner of American Miso Co. in North Carolina, is the company’s miso supplier. The packer is also a shareholder. Hot Stuff is John’s only commercial miso product with a sales record to date. The Works will be out in about 2 weeks. He expects big revenues from it because people use much more per serving—dink dink vs. glug glug. Smoky Mountain Sizzlin’ is getting rave reviews. It’s super with tempeh. They are sampling it on grilled skewered tempeh and pineapple.

John’s first commercial miso product, Hot Stuff, was first put on the market in early 1981 [about April]. John is trying to use miso to create natural foods for Americans. To date John has sold exclusively to U.S. Naturals, his distributor, run by Jeffrey Hilbert and Jimmy Silver. But he has had bad service and many problems from them, so he is considering a new distribution system. He may get regional warehouses and sell from there to distributors like K&L [Kahan & Lessin], cutting out any master distributors. Address: Suite 21, The Courtyard, Chapel Hill, North Carolina 27514.

2817. **Product Name:** Naturally Preferred Miso Mustard. **Manufacturer’s Name:** American Natural Foods, Inc. **Manufacturer’s Address:** P.O. Box 2321, Chapel Hill, NC 27514. Phone: (919) 929-0113.

Date of Introduction: 1984. September.

Ingredients: Mustard seeds [3 varieties, ground], vinegar, amakuchi miso (soybeans, barley, water, sea salt), natural herbs and spices, sea salt.

Wt/Vol., Packaging, Price: 9 oz jar (255 gm).

How Stored: Shelf stable.

New Product–Documentation: Ad in East West Journal. 1984. May. p. 19. “The Love Affair of Miso and Mustard.” Full-page color. Spot in Adweek. 1984. Aug. 20. p. 37. Interview with John Troy, developer of this product. 1984. Sept. 26. Miso will be mustard ready to deliver in September 1984. Label. 1984, dated. 2.5 by 2.5 inches (smaller at top). Paper. Red, blue, black, and white on gold. “Rich and round, with a grainy texture, naturally preferred by gourmets and natural food cooks for its superior flavor and mellow character.”

Natural Foods Merchandiser. 1985. May. p. 48. Gold medal award in 6th annual merchandising contest. Ad in

East West Journal. 1985. May. p. 19. "Miso mustard--new." Spot in Chicago Tribune. 1985. Nov. 27. "Miso madness." Sec. 7, p. 12. A photo shows Miso mustard. Spot in Chilton's Food Engineering. 1985. Dec. "Miso: Superior flavor enhancer." A photo shows Miso Mustard. Spot in NASFT Showcase. 1985. Dec. "The taste of Japan: American Natural Foods." Published by the National Association for the Specialty Food Trade, Inc. A photo shows Miso Mustard.

Talk with John Troy, who now owns and runs a separate company. Miso Mustard is still on the market. It is made in Emeryville, California, for American Natural Foods, Inc.

2818. **Product Name:** BeeNut Butter [Smooth, or Crunchy].

Manufacturer's Name: American Natural Foods, Inc.

Manufacturer's Address: Box 2321, Chapel Hill, NC 27514.

Date of Introduction: 1984. September.

Ingredients: Peanut butter, honey, miso, bee pollen.

Wt/Vol., Packaging, Price: 12 oz reusable glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product--Documentation: This is peanut butter, sweetened with honey, and lightly seasoned with miso. Label. 1984, dated. 9.5 by 3 inches. Paper. Orange, yellow and black. Little bees on honeycomb background. Poem from "Buddy Bee" on back: "When you feel like something yummy, And junk food just won't do, Try this Bee Nut Butter. It might be right for you..." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Spot in Whole Foods. 1985. March. p. 65. "Bee Spreader," A photo shows the jar.

2819. **Product Name:** Smoky Mountain Sizzlin'--"More than a barbecue sauce!"

Manufacturer's Name: American Natural Foods, Inc.

Manufacturer's Address: P.O. Box Box 2321, Chapel Hill, NC 27514.

Date of Introduction: 1984. September.

Ingredients: Tomato paste, apple cider vinegar, pure water, red miso, peanut oil, tamari soy sauce (soybeans, water, sea salt), honey, molasses, garlic juice, onion juice, umesu (Japanese plum vinegar), natural herbs and spices, toasted sesame oil, tamarind, natural hickory smoke, natural seaweed extract.

Wt/Vol., Packaging, Price: 18 fluid oz (540 ml) glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product--Documentation: Label. 1984, dated. 10.25 by 2.5 inches. Paper. Yellow, green, red and white on black background. "All natural. For bastin', grillin' and table use. Made with miso." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Ad in Vegetarian Times. 1985. June. "You're gonna' love that Smoky Mountain twang."

2820. **Product Name:** New York Soy Deli Tofu Cheddar Spread.

Manufacturer's Name: Appropriate Foods, Inc.

Manufacturer's Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1984. September.

Ingredients: Cheddar: Organic tofu, carrots, tahini, miso, umeboshi, black olives, pimentos, onions, sea salt.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated.

New Product--Documentation: Label. 1984. New York Soy Deli Brand. 1.5 by 3 inches. Black on orange. Interview with Robert Werz. 1987. Sept. 9.

2821. **Product Name:** New York Soy Deli Sesame Miso Spread.

Manufacturer's Name: Appropriate Foods, Inc.

Manufacturer's Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1984. September.

Ingredients: Organic white miso, tahini, toasted sesame oil, herbs.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated.

New Product--Documentation: Label. 1984. New York Soy Deli Brand. 1.5 by 3 inches. Dark brown on light brown. Interview with Robert Werz. 1987. Sept. 9.

2822. **Product Name:** New York Soy Deli Tofu Ricotta.

Manufacturer's Name: Appropriate Foods, Inc.

Manufacturer's Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1984. September.

Ingredients: Organic tofu, tahini, miso, umeboshi vinegar, tamari, herbs.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated.

New Product--Documentation: Label. 1984. New York Soy Deli Brand. 1.5 by 3 inches. Brown on yellow. Interview with Robert Werz. 1987. Sept. 9.

2823. Berry, Linden. 1984. The soy of cooking. *Women's Sports* 6:40-41. Sept.

• **Summary:** A brief introduction, without recipes, to tofu, tempeh, miso, and shoyu. "You don't have to be a vegetarian to eat and enjoy soy foods... Look for cookbooks with recipes for using these soy foods at your local bookstore. There are lots of delicious and healthful alternatives to meat that await you."

2824. Beversdorf, W.D. 1984. Development of new soybean varieties for soy foods [in Canada]. In: Ontario Ministry of Agriculture and Food, Market Development Branch. 1984.

Workshop on Export Markets for Ontario Soybeans: Edited Proceedings. 45 p. See p. 18-20. Held 5 Sept. 1984 at Wheels Motor Inn, Chatham, ONT, Canada. 28 cm.

• **Summary:** “Historically, soybean breeding efforts in Canada have been directed toward improving yields, increasing the area of adaptation (to shorter season and cooler geographic areas) and improving pest tolerance. As soybean production has increased toward domestic self-sufficiency, the industry has placed more emphasis on development, production, and marketing of special quality beans for specific non-oil export markets...”

“In Canada, yield of soybeans per unit land area has remained a primary consideration in soybean breeding (except for natto-type beans) because of licensing requirements for pedigreed seed production and marketing. Among high yielding breeding lines, large seed size, white or yellow hilum colour and high seed quality (resistance to discolouration and cracking) are common selection criteria associated with tofu and miso export potential.”

Canadian soybean breeders are generally aware of the characteristics defined during the 1982 “Soybean Export Mission to South East Asia” for various soyfood uses. These desired soybean characteristics are shown in Table 1 for natto, miso, tofu, soymilk, and soy sprouts. Address: Assoc. Prof., Univ. of Guelph, Guelph, ONT, Canada.

2825. Chan, Fred. 1984. General uses of soybeans in Hong Kong and competition from Chinese soybeans. In: Ontario Ministry of Agriculture and Food, Market Development Branch. 1984. Workshop on Export Markets for Ontario Soybeans: Edited Proceedings. 45 p. See p. 15-17. Held 5 Sept. 1984 at Wheels Motor Inn, Chatham, ONT, Canada. 28 cm.

• **Summary:** Tofu: The two major types of tofu in Hong Kong are soft tofu (which is displayed in water to maintain its form) and mild tofu (which is firmer, is displayed on wooden planks, and is the most common type). Chinese soybeans are preferred to Canadian soybeans because after a maximum of 5 hours on display in the open market, water will start to weep from the tofu made from Canadian soybeans. In 1983, about 6,000 tonnes of imported soybeans were used to make tofu in Hong Kong; this was about 33% of the total soybeans imported.

Bean curd sheets and bean curd sticks [yuba] are very common snacks and dishes in Hong Kong. “Canadian soybeans have an advantage in this market because they produce whiter soymilk which in turn will produce whiter colour products. However, the bigger size of the Chinese soybean results in a higher yield... Manufacturers will normally mix 60% of Canadian soybeans with 40% of Chinese soybeans in order to achieve a higher output of whiter sheets... Total utilization was around 4,000 tonnes in 1983, with Canadian soybeans representing 78%.

Soy sauce and bean paste: The market is dominated by Chinese soybeans because bigger beans produce more sauce and paste. In 1983 approximately 6,000 tons of soybeans were used to make soy sauce and bean paste, with Chinese soybeans representing 75%, Vietnamese 14%, and Canadian 11%.

Soymilk: In 1983 about 1,800 tonnes of soybeans were used to make soymilk in Hong Kong, mostly by Vitasoy. Chinese and Canadian soybeans each share about 50% of the market.

Discusses various reasons that Chinese soybeans are very competitive in Hong Kong. The Chinese Oil, Cereal and Foodstuff Company in Hong Kong has an office in Hong Kong. Under this national organization are two agents specializing in Chinese soybeans. Transport time from China to Hong Kong is 7 days versus 32 days from Canada. Address: Director, Chung Hing Co., Hong Kong.

2826. Chen, Steve. 1984. Soyfoods in the Far East and USA: Products, markets, trends. In: American Soybean Assoc., ed. 1984. First European Soyfoods Workshop, Proceedings. Brussels, Belgium: ASA. 36 p. See p. C1-C38. Held Sept. 27-28 at Amsterdam, Netherlands. [11 ref]

• **Summary:** Contents: Summary. 1. Introduction: Ten reasons why soybeans will be a key protein source for the future. 1. Soyfood products. A. Non-fermented soyfoods: Fresh green soybeans, soybean sprouts, soynuts, soymilk, soy flour, yuba or soy protein film, tofu. B. Fermented soyfoods: Soy sauce, miso, tempeh, natto, fermented tofu, soy nuggets (tou-shih, hamanatto). 3. Soyfoods markets and trends in the Far East: Taiwan, China, Japan, South Korea, Indonesia, Malaysia, Singapore, Thailand, Philippines. 4. Soyfoods markets and trends in the U.S. 5. References. Plus 15 tables and 8 figures.

“It is our [American Soybean Association’s] strong intention that marketing and consumption of soy protein should not in any way deter the expansion of the production and sale of as much animal protein as the world can be expected to produce in the years ahead. Soy protein foods are being intentionally brought to the market to complement and not necessarily to replace animal protein products.”

“Taiwan imported 1.41 million tonnes (metric tons) of soybeans in 1983 and used about 250,000 tonnes as soyfoods for direct human consumption, which made Taiwan one of the highest in per capita consumption of soyfoods (13.2 kg or 29 lb) in the world. In the past 10 years (1974-1983), the consumption of traditional soyfoods showed an average increase of 3% per year as compared to 12% and 8.1% for poultry and soy oil, respectively. The market for packaged soymilk, soy pudding and tofu has also been expanding rapidly in recent years in Taiwan.” Table 7 shows the production of soymilk in Taiwan, which grew from 103,600 tonnes in 1974 to 210,000 tonnes in 1983, for an average growth rate of 8.2% a year.

China produces about 9 million tones of soybeans a year, and about half of these are consumed as soyfoods, giving a per capita consumption of 4.5 kg of soyfoods. "An improvement in the general economy and soyfood technology and equipment will bring a sharp increase in soybean demand and more soyfoods consumption."

In South Korea soymilk consumption has increased more than seven-fold in the last 4 years. Currently about 10,000 tonnes of soybeans are used to make 70,000 tonnes of soymilk. "It is projected that soymilk production in Korea will double in 1984 as compared to the previous year."

Indonesia continues to be Southeast Asia's largest consumer of soybeans as food. In 1982/83 soybean consumption was 6.7 kg per capita. Indonesia consumes about 1 million tonnes of soybeans annually, 60-65% of them in the form of tofu and 35 to 40% as tempeh.

Malaysia consumes only about 30,000 tonnes of soybeans per year as food. In Singapore, more than 75% of the population of 2.5 million are Chinese. Therefore tofu, soysauce, and soymilk are the predominant traditional soyfoods consumed.

Thailand consumes about 40,000 tonnes of soybeans a year as food, mainly in the form of tofu. The Philippines uses only 5,000 tonnes of soybeans annually for food, mainly as tofu.

To summarize (Table 6), annual per capita consumption of soybeans in various East Asian countries, in descending order of the amount consumed, is as follows: Taiwan 13.2 kg (population 19 million); Japan 8.3 kg (population 120 million); South Korea 7.5 kg (population 40 million); Indonesia 6.7 kg (population 150 million); Singapore 6.25 kg (population 2.4 million); China 4.5 kg (population 1,000 million); Malaysia 2.1 kg (population 14 million); Thailand 0.8 kg (population 50 million); Philippines 0.3 kg (population 15 million). Address: Director, American Soybean Assoc., Room 603, Kwang-Wu Building, No. 386, Tun Hua South Road, Taipei, Taiwan.

2827. Fujimori, Ikuo. 1984. Users' requirements [of soybean varieties] for miso. In: Ontario Ministry of Agriculture and Food, Market Development Branch. 1984. Workshop on Export Markets for Ontario Soybeans: Edited Proceedings. 45 p. See p. 10-11. Held 5 Sept. 1984 at Wheels Motor Inn, Chatham, ONT, Canada. 28 cm.

• **Summary:** "In 1983, 1,600 miso makers in Japan produced 570,000 tonnes of miso. They used a total of 181,000 tonnes of soybeans comprised of approximately 121,000 tonnes from China, 20,000 tonnes of domestic soybeans [grown in Japan], and 20,000 tonnes of Canadian white hilum soybeans and others." The desirable characteristics of soybeans for making miso are as follows: A yellow or white hilum. The larger the seed size the better (more than 18 gm per 100 seeds); larger soybeans tend to be

more consistent in texture, taste and color. The thinner the hull (seed coat) the better, but not easy to split. The cotyledon cells should be light yellow. The less foreign materials, and damaged and split beans the better; corn is an especially undesirable foreign material. The four key cooked conditions: 1. The texture of the cooked soybeans must be soft; 2. The soybeans should absorb water quickly and thereby cook quickly; 3. The soybeans should have a high carbohydrate content; 4. The color of the cooked soybeans must remain bright yellow. Address: Executive Vice-President, Takeya Miso Co. Ltd., Suwa, Japan.

2828. Just In Foods, Inc. 1984. Miso Master (Ad). *East West Journal*. Sept. p. 8. Expanded ad in *East West Journal*. 1986. Nov. p. 81.

• **Summary:** At the top of this one-third page black-and-white ad is the Miso Master logo, an illustration showing the head and shoulders of a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso. The text reads: "The Miso Master is truly one of Japan's National Treasures. With roots that go back centuries, he is an intimate of the land, knowing its seasons and sharing its changes. He is artist and scientist, blending the best of both tradition and technology.

"The making of Miso is a way of life. To master this life requires hard work, long hours and great sensitivity. Miso is a living good. It is vital and strengthening, full of vitamins and minerals, beneficial bacteria and rich in the highest quality protein. Miso is an extraordinary source of essential nutrition.

"Miso Master products are dedicated to the spirit of the Miso Master. Our Miso is made by hand in the old, traditional way: aged in wood, unpasteurized, using only organic grains and beans, with pure water and salt from the sea. All of the ingredients in our products are the very best: like brown rice vinegar, natural mirin, and delicate grain sweeteners.

"Miso Master products are made with reverence for a way of life. They are both nutritious and delicious, because food that is truly best for you to eat—tastes best too."

Note 1. This ad also appeared in the October issue of this magazine (p. 21).

Note 2. This is the earliest ad seen run by Just In Foods or American Miso Co. It is also the earliest document seen that mentions "Just In Foods." But notice that American Miso Co. is not mentioned! Address: Box 541, Route 3, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

2829. Kooij, J.A. van; de Boer, E. 1984. Microbiological aspects of soyfoods. In: American Soybean Assoc., ed. 1984. First European Soyfoods Workshop, Proceedings. Brussels, Belgium: ASA. 131 p. See p. 11-115. Held Sept. 27-28 at Amsterdam, Netherlands. [20 ref]

• **Summary:** “To learn more about the microbiological quality and safety of tempeh and tofu a survey was carried out by the working party ‘Fungi in Foods’ in the summer and autumn of 1983. The products were sampled in stores, restaurants and production places throughout the Netherlands and analyzed by using standard microbiological procedures...”

In 110 samples of tempeh: “About 10% of the samples contained *Staphylococcus aureus* and *Bacillus cereus* in numbers which may cause food intoxication. However, the *S. aureus* strains isolated in this survey proved to be non-enterotoxigenic. *Yersinia enterocolitica* (non-pathogenic serotypes) was found in 6 samples. *Salmonella* was not isolated from any of the samples tested...”

“In 154 samples of tofu: 2.1% had more than 100 counts/gm of *Staphylococcus aureus*; 11.2% had more than 100 counts/gm of *Bacillus cereus*. And 36.3% had more than 100 counts/gm of *Escherichia coli*. “About 95% of the samples appeared to have an aerobic count over 1,000,000 colony forming units (cfu) per gram. This means that there is a very great proliferation of bacteria after the production, for immediately after the production the aerobic plate count is usually below 10,000 cfu/g. This indicates that the tofu had been stored improperly or for too long. The average pH of tofu immediately after production was about 6.5, but at the time of sampling it averaged 5.2. But 5% of the samples had a pH of less than 4.5, and 16% has a pH of 4.5 to 4.9. These low pH values indicate sour/acidic products caused by large numbers of lactic acid bacteria. “In 0.7% of the tofu samples *Bacillus cereus* and *Staphylococcus aureus* were present in numbers that may cause food intoxication. The presence of *B. cereus* was probably caused by an outgrowth of the spores which survived the heat treatment. This indicates that the tofu must have been stored at too high a temperature during a long period (12–48 hours).

“The presence of *S. aureus* can be explained by a bad hygienic practice during production, after the heat treatment step. *Salmonella* was not found in any of the tofu samples.” Address: Food Inspection Services, Netherlands.

2830. Loh, Michael. 1984. An overview of export markets for edible soybeans. In: Ontario Ministry of Agriculture and Food, Market Development Branch. 1984. Workshop on Export Markets for Ontario Soybeans: Edited Proceedings. 45 p. See p. 1-9. Held 5 Sept. 1984 at Wheels Motor Inn, Chatham, ONT, Canada. 28 cm.

• **Summary:** “Ontario first exported edible soybeans in 1972 and over 12 years have built it into a \$40 million business. 1981 was our best year when exports totalled \$46 million... The bulk of Ontario’s soybean exports are sold to the Far East [East Asia]—Japan (\$8 million in 1983), Singapore (\$6 million), Hong Kong (\$3.5 million), Malaysia (\$1 million), Indonesia, and Korea.” In these countries soybeans are consumed in the daily diet of the people. In Japan, for

example, they are made into miso, tofu, natto, soymilk and shoyu. Korea also makes soy sprouts, Indonesia makes tempeh, and Singapore, Malaysia, and Hong Kong make dried yuba. In addition, sales to the Netherlands, United Kingdom, and France are quite significant.

Concerning Ontario’s market share of soybean imports for food use: Japan imports 877,300 tonnes, of which 27,000 tonnes or 3.1% is from Ontario. Singapore and Malaysia import 36,000 tonnes, of which 20,000 tonnes or 55.0% is from Ontario. Hong Kong imports 20,000 tonnes, of which 10,000 tonnes or 50.0% is from Ontario.

Japan’s sources of its 877,300 tonnes of imported soybeans are as follows: USA 570,000 tonnes (65%), China 280,000 (32%), Canada 27,000, South America 300.

Japan uses its 877,300 tonnes of imported soybeans as follows: tofu 485,000 tonnes (55.3%), miso 180,000, natto 185,000, soymilk 25,000, cooked soybeans 10,000, shoyu 6,500, other 85,800. Within these figures, Ontario’s soybeans are used as follows: Miso 20,000 tonnes (11.1% of the total), natto 5,000 tonnes (5.9%), and tofu 2,000 tonnes (0.4%). Address: Export Development Specialist, Ontario Ministry of Agriculture and Food, Toronto, Canada.

2831. Martin, Michael. 1984. World supply and demand for soybeans with special reference to soyfoods. In: American Soybean Assoc., ed. 1984. First European Soyfoods Workshop, Proceedings. Brussels, Belgium: ASA. 131 p. See p. B1-B32. Held Sept. 27-28 at Amsterdam, Netherlands.

• **Summary:** The author estimates that European soymilk consumption is about 9-10 million liters/year, which is very small compared to European cow’s milk consumption of 22,000 million liters/year. European tofu consumption is estimated at 5-6 million kg/year, which is about one-fourth of U.S. tofu consumption. Other estimates for Europe consumption are: Miso 250,000 to 300,000 kg/year; Soy protein products (probably mostly isolates and concentrates) 40,000,000 kg/year; soy oil 1,700,000 tonnes/year. Europe has a fairly small ethnic population, about 1,000,000 people compared to 3,500,000 in the USA. Europe presently has some 20-25 tempeh companies producing an estimated 400,000 to 500,000 kg/year compared to 900,000 kg/year in the USA. Europe, and especially the Netherlands, are moving ahead quickly with tempeh.

The European food market is more fragmented, diverse, and conservative than its American counterpart. “The European consumer expects freshness and quality as a matter of course, and does not expect to pay a premium for these.”

“It is well known that the European healthy foods market is booming. It is part of a much wider social trend which involves ecology and politics, real environmental concerns, alternative medicine and coping with unemployment, an aging population, and a minimum

growth economy. It places emphasis on quality of life, individualism and cooperation. It does not exclude any age group.

“Soyfoods will increasingly find a place in our daily diets, but not without significant changes in the existing soyfoods industry, with above all greater attention to product quality and product marketing.”

Appendix 1 lists 9 U.S. suppliers of food-grade soybeans in small quantities suitable for tofu manufacturers. Pages B15 to B32 contain numerous other tables, 8 of them reprinted without permission from *Soyfoods Industry and Market: Directory and Databook*, by Shurtleff & Aoyagi. Address: American Soybean Assoc., Centre International Rogier, Bte 521, 1000 Brussels, Belgium.

2834. **Product Name:** Lima Ohsawa's Miso [Genmai, Hatcho, or Mugi].

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: Chico, California.

Date of Introduction: 1984. October.

New Product–Documentation: Chico-San Cracker Barrel. 1984. Oct. p. 1, 4. Labels read: “Pressure release valve. Keep unclogged. Organic, Unpasteurized.” Aged over one year (Genmai and Mugi); Over 2 years for Hatcho. This pressure release bag is a major innovation, and a first.

Oct. [10 ref. Eng; jap]

• **Summary:** Soybean cooking drain is the water after it is used to cook soybeans but before it is run down the drain.

This water was treated by ultrafiltration and reverse osmosis to “study of separation of low molecular weight solutes from higher molecular weight ones, the recovery of valuable materials and the removal of BOD.

• **Summary:** 52 samples of dried foods, including 10 miso soups, were obtained from retail outlets in Japan and examined for fungi. Fungi were found in all miso soup and vegetable samples. The highest counts were 2,500/gm, typically in the vegetables. In miso soups, *Eurotium* species and yeasts predominated, followed by *Aspergillus* and *Penicillium*. Attempts to control fungal contamination

during the drying and packaging processes are not always adequate. Address: Eisei Shikenjo.

2840. Macrobiotic Wholesale Co. (The). 1984. Catalog and price list [Mail order]. 92 McIntosh Road, Asheville, NC 28806. 63 p. 28 cm.

• **Summary:** The catalog, effective 15 Oct. 1984, contains 450 new products from 15 new vendors, plus 73 new books. The president of the company is Don DeBona. Soy-related products include miso, shoyu, tamari, nigari, kinako, natto and koji spores, black soy beans, tekka, Ah Soy soy drink (soymilk), and amasake.

One of the many suppliers is The Mitoku Co. Ltd., which “was founded in Tokyo [Japan] in 1968 by Mr. Kazama at the express behest of Michio and Aveline Kushi. In fact, the company was named after MI-chio and TO-moko (Aveline’s real name; Aveline was given her name by George Ohsawa) KU-shi.” Address: Asheville, North Carolina. Phone: 800/438-4730 or 704/655-1056.

2841. **Product Name:** Wild Leek Miso (Wild Spring Leeks Pickled in Three-Year Organic Barley Miso).

Manufacturer’s Name: South River Miso Co. Inc.

Manufacturer’s Address: South River Farm, Conway, MA 01341.

Date of Introduction: 1984. November.

Ingredients: Organic wild leeks (*Allium tricoccum*) and Maine coast kelp (*Digitata*) pickled for one summer in three-year Barley miso made from deep well water, organically grown barley and soybeans, Lima sea salt, and koji culture.

New Product–Documentation: Mountain Ark Trading Co. catalog. 1984. April. p. 1. Pickled for 2 full years. \$8.50/lb. Label sent by Christian Elwell. 1992. March 15. After the miso has aged for 2 summers, the land- and sea vegetables are added then the mixture is allowed to ferment until the end of the third summer. He started selling this miso in the winter of 1984. Label. 3.5 by 2 inches. Black on white. Self adhesive. “100% organic ingredients. Unpasteurized. Please refrigerate.”

2842. **Product Name:** Dandelions Pickled in Miso.

Manufacturer’s Name: South River Miso Co. Inc.

Manufacturer’s Address: South River Farm, Conway, MA 01341. Phone: 413-369-4057.

Date of Introduction: 1984. November.

Ingredients: Wild spring dandelion greens, harvested by hand, washed, lightly steamed, and pickled in Barley Miso for 1 full summer. The Barley Miso itself is aged two summers, made from deep well water, organically grown soybeans and barley, solar dried sea salt and koji culture.

New Product–Documentation: Mountain Ark Trading Co. catalog. 1984. April. p. 1. Pickled for 2 full years. \$8.50/lb.

Talk with then Label sent by Christian Elwell. 1992. March 13. He started selling this miso in Winter 1984. Label. 3.5 by 2 inches. Black on white. Self adhesive. “Containing not less than 3 dandelions (about ¼ lb.) embedded in Barley Miso-aged 2 summers.”

2844. Kennedy, J. Robert; Milbury, Peter. 1984. The sale of Chico-San to H.J. Heinz Co. (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 18. 1 p. transcript.

• **Summary:** Peter: Chico-San was sold on 16 Nov. 1984. The sale price is confidential, but it was large and all cash. Bob Kennedy, who will soon be age 65, has a full-time contract for 6 months, then 6 months on a half-time basis, then a retainer after that. Bob sold the business because he could no longer finance the runaway expansion of the rice cake business, and so he could retire to do his own work with food. One big question is what Heinz will do with the macrobiotic product line—mostly imports. The marketing, sales, and product development liaison for Chico-San in Pittsburg is Mary Ann McCullough, Heinz USA, Div. of the H.J. Heinz Co., P.O. Box 57, Pittsburg, Pennsylvania 15230. Phone: 412-237-3812.

Bob: The original intent was to sell only the rice cake portion of Chico-San. But the rice syrup business was also sold. If Heinz wants to get behind the macrobiotic foods with all their financial and with Chico-San macros in control of that division—that’s one idea they are now studying. Heinz is interested in the macrobiotic program as a program for the future. But it may not be compatible. Herman Aihara may be hired as a food consultant; he and Peter Milbury might stay in that division. Bob thinks the key is to preserve the quality of the foods, and not to put pressure on small suppliers. Right now he doesn’t think it will work, but it might. If it doesn’t work out, Bob will set up another company. The contract allows him to keep the brand names and buy back inventories. Bob has joint ventures starting to be planned with Japanese friends. Bob has already established a new company to continue his work with macrobiotic foods. He wants to cut his work load and

get away from nuts and bolts. “We’re not selling just food products; we’re selling a philosophy. There are two levels of macrobiotic foods: Medicinal quality foods, and regular products.”

Bob’s organization starts with Lima Ohsawa, then goes through Ohsawa Japan, then Herman and Bob Kennedy, Peter Milbury, and Joel Wollner. All of this organization could go into the macrobiotic division of Heinz. For example, Heinz could use miso in their barbecue sauces. Address: Chico, California.

2845. Belleme, John; Belleme, Jan. 1984. Miso, the ABC’s of an ageless food. *East West Journal*. Dec. p. 62-66. [1 ref]
 • **Summary:** Miso is said to break down and discharge cholesterol. Scientists studying Japanese populations have discovered that those who regularly drink miso soup suffer significantly less from some forms of cancer and heart disease. Japan’s Tohoku University has recently isolated chemicals from miso that cancel out the effects of some carcinogens.

A fine variety of traditionally-made miso is available in the refrigerator section of natural foods stores in small tubs or the recently introduced plastic bag with a one-way valve that prohibits the entrance of air. For the busy cook who wants to add flavor and protein, miso gives 22 grams of protein per tablespoon. Dark miso has a meat-like quality; light miso, a dairy-like quality. Light, sweet miso contains twice the niacin and 10 times the lactic acid bacteria as dark, saltier miso. Dark miso is higher in protein and because of its larger proportion of soybeans, contains more fatty acids, which have been shown effective as anti-carcinogenic agents.

Sweet miso can be used instead of milk in mashed potatoes or creamed soups, and with tofu and lemon and lemon or rice vinegar in place of sour cream, in salad dressings and sauces. Sweet miso and sake or mirin combine well in sauces. Address: Rutherfordton, North Carolina.

2846. Kotsch, Ronald E. 1984. Made in Japan—naturally: Natural foods from the Muso Company are popular worldwide. *East West Journal*. Dec. p. 14-21.

• **Summary:** “Muso was founded in 1966 as a macrobiotic food company, aiming to provide the highest quality traditional Japanese foods. It is now the oldest and largest macrobiotic food concern in Japan. Within the natural foods movement in the country it is one of the top three firms. Also, since 1969, it has been a major exporter of macrobiotic foods. With its Tokyo-based competitors the Mitoku Company and Ohsawa Japan, it dominates the large and growing international trade in Japanese foods.”

Shuzo Okada, one of George Ohsawa’s earliest and most devoted disciples, was the son of a family of Osaka textile merchants. After Ohsawa’s death in 1966, Okada invested

\$3,000 to establish Muso Shokuhin in Osaka, with his eldest son Teizo as director. Yuko Okada, the second eldest Okada son, was head of the export division; he had spent 6 years living in Boston, mostly working for Erewhon. Initially the company was located in Fukusenji, a dilapidated Buddhist temple.

Today “the company has gross annual sales of over \$25 million and employs over 120 people. In addition to the Osaka headquarters, built at a cost of over \$1 million, it has an 18,000-square-foot production and warehouse facility in Osaka, as well as branch offices in six other cities. It wholesales over 1,800 products in the domestic market... Muso has accounts with nearly half of Japan’s 3,400 natural food outlets. In addition, it has developed a rapidly growing franchise chain of fifty-two stores, mostly in the Kansai area...

“About \$5 million a year comes from international sales... Growth in the international sector has been steady despite the blow of the 1981 Erewhon bankruptcy. (Muso had credits of about \$200,000 when its chief customer failed, and lost over \$150,000 of that.) Muso, which is now owned by more than fifty investors, was able to survive the shock. Muso exports about 270 different products...

“At present a runaway best seller is a soybean drink made of soybeans, pearl barley, kombu sea vegetable, and malt sweetener. Marketed in North America as Edensoy it has proven an excellent dairy substitute.”

There follows a description of the Nanki Umeboshi Co., Muso’s principal supplier, and then of the Kanemitsu Miso Co. (in Fuchu City, Hiroshima prefecture) which has been in business for 300 years. “While it once made sake and soy sauce as well, it now produces only miso—1,300 tons a year.” There are now some 2,000 miso makers in Japan and Kanemitsu is one of only 200 which produce more than 1,000 tons annually. It is one of a very few which produce miso according to traditional methods... It is aged in natural temperatures for two years, run through a masher, then packed in either 40-pound wooden kegs or 1-pound plastic pouches. “All the miso going into the pouches is pasteurized by 84°C heat. If it were not, gases produced by the continuing fermentation would burst the bags. Kegs may or may not be pasteurized.”

Photos show Yuko Okada.

2847. **Product Name:** The Works. SuperNatural Condiment.

Manufacturer’s Name: American Natural Foods, Inc.
Manufacturer’s Address: Box 2321, Chapel Hill, NC 27514.

Date of Introduction: 1984.

Ingredients: Fresh onions, tomato paste, pure water, red miso, honey, garlic juice, celery juice, umesu (Japanese plum vinegar), tamari (whole soybeans, water, sea salt),

natural herbs and spices, mustard, arrowroot powder, natural seaweed extract.

Wt/Vol., Packaging, Price: 12 oz (336 gm) jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1984, dated. 8 by 4 inches. Paper. Red, blue, yellow, white on burgundy. Picture of wizard with staff. “New. Made with miso. Give ‘em The Works... an all natural wonder. Everything you want on it—is in it! It’s all you need to make historic hot dogs, brilliant burgers, spectacular sandwiches, outrageous omelets, terrific tempeh and fantastic fries!” Signed by Wizard Baldour. Label. 1985, dated. 8.25 by 4 inches. Paper. Red, yellow, black, and white on navy blue. Hamburger looking illustration. “New. For hot dogs, burgers, tacos, omelets and lots more! Made with miso.” Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center.

2848. **Product Name:** Sea Sauce.

Manufacturer’s Name: American Natural Foods, Inc.

Manufacturer’s Address: Box 2321, Chapel Hill, NC 27514.

Date of Introduction: 1984.

Ingredients: Tomato paste, pure water, apple cider vinegar, red miso, rice syrup, horseradish, Japanese umeboshi plums, lemon juice, garlic juice, onion juice, natural herbs and spices, sea salt, natural seaweed extract.

Wt/Vol., Packaging, Price: 12 oz (336 gm) glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1984, dated. 8.5 by 2.5 inches. Paper. Red, green, pink, white on tan. Picture of lobster and shellfish. “All natural. For seafood and shellfish. The natural gourmet compliment to all your shellfish and seafood favorites. With Sea Sauce you can create splendid shrimp cocktails, superior scallops and outrageous oysters. You can transform tuna salad, add charm to cherry stones, and enhance the flavors of all your favorite fish dishes. From clams to crabs, lobster to swordfish steaks.” Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center.

2849. *AOK Magazin (Germany)*. 1984. Soja: (2) ein Tausendsassa! [Soya: The bean of a thousand forms!]. 25(4):15. [Ger]

• **Summary:** A brief introduction to the many foods made from the soybean, including soy sauce, soymilk, tofu, and miso. Note: This is the major health insurance magazine in Germany, with a huge circulation.

2850. **Product Name:** Tofu Skinny Dip (with Dill).

Manufacturer’s Name: Bountiful Bean Plant.

Manufacturer’s Address: 2049 1/2 Atwood Ave., Madison, WI 53704.

Date of Introduction: 1984.

Ingredients: Tofu, lemon juice, mellow white miso, shoyu soy sauce, garlic powder, dill weed, onion powder, dry

mustard, dried chives, celery seed.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Interview with Deborah Bachmann. 1987. Dec. 29. James Lubbe. 1988. March. Abbreviated History of the Bountiful Bean. Label. 1985. 3.5 inches diameter. Self adhesive. Light blue on white. “Non-dairy dip and dressing.”

• **Summary:** The author found a significant graded inverse association between the consumption of miso and green/leafy vegetables and stomach (gastric) cancer risk among 122,261 men and 142,857 women followed for 13 years. Address: Epidemiology Div., National Cancer Center Research Inst., Tokyo, Japan.

2853. Miyako Oriental Foods, Inc. 1984. Cold Mountain Miso: Experience in new flavor. Natural protein from soybeans with exciting recipes (Leaflet). Baldwin Park, California. 8 panels. Front and back.

• **Summary:** The front two panels of this full color, glossy leaflet show containers of the three types of Cold Mountain Miso and Cold Mountain Koji resting on a wooden cutting board and a bed of soybeans. In the background are many colorful vegetables. On the inside four panels are color photos of the four products, a description of miso as “A living work of art,” five nutritional features of miso, and a discussion of how these products are made in America. On the back two panels are four recipes for using Cold Mountain Miso. “For many more delicious recipes, see *The Book of Miso*, by William Shurtleff and Akiko Aoyagi.” Address: Baldwin Park, California 91706.

2854. **Product Name:** Living Treasures Miso.

Manufacturer’s Name: Salt Company (The).

Manufacturer’s Address: Carbondale, CO 81624.

Date of Introduction: 1984.

Ingredients: Soybeans, barley, salt.

New Product–Documentation: Talk with Ron Roller. 1991. Nov. 22. Scott Halizon of Salt of the Earth in Rifle, Colorado, sells natto starter cultures. Ron wants to learn how to make natto at home.

Talk with Scott Halizon. 1991. Nov. 23. Ron Roller is planning to export small seeded natto soybeans to Japan via Kawasho. In about 1971 Scott decided to learn as much as he could about salt and to make traditional salt available in America. His company now makes salt in Mexico, on the west/Pacific side of Baja, California. He brings this crude salt to Colorado, dissolves it in water, filters out the dust and grit, boils it, recycles the nigari, and dries it for sale. He started to sell this salt in about 1978-80 via a company he established named The Salt Company. Then he went to southern California and made miso with Mr. Noboru Muramoto. Returning to Carbondale, Colorado, he started to make barley miso, which he first started to sell in about 1984 as Living Treasures Miso. During this time he went back and forth to California, made miso with Mr. Muramoto, and sold some of his miso. In the first year he sold about 1,500 lb/year. Then next year he made about 8,000 lb or miso. Then on 25 Feb. 1985 he had a rather severe car accident. He let the miso cure/age for about 10/12 seasons, to make a "really hearty, strong, medicinal kind of miso." He also started to develop a miso using hatomugi instead of barley as the grain.

In 1987, about 18 months after the accident, he moved to Rifle, Colorado. There he changed his company name to Salt of the Earth. He stopped making miso (because he was quite disabled for a while), but he continued to sell that which he had made. He is still selling domestic miso made by Mr. Muramoto, Junsei Yamazaki, and Miso Master, plus imported miso from Eden Foods. He is now interested in *fu* (wheat gluten and glutinous rice gluten). A man in Kyoto, Japan, who has an old factory has invited Scott to come and learn how to make these products from him.

2855. Product Name: [Tofu, Miso, Seitan].

Manufacturer's Name: Sunfood.

Manufacturer's Address: Mlynska 659, 51081 Dobruska, Czechoslovakia. Phone: 42 443 94325 or 443 21578.

Date of Introduction: 1984.

New Product-Documentation: Talk with Bernd Drosihn of Viana Naturkost GmbH, Cologne, Germany. 1991. Aug. 25. At a recent trade show, Bernd met a "very curious visitor," a macrobiotic man from Czechoslovakia who has been making tofu, miso, and seitan for 8 years. He has a large line of products, which he sells mostly in Czechoslovakia. He speaks a little English, and is about 40-45 years old. He now wants to start making tempeh. He buys his soybeans from China. He has great difficulty in obtaining nigari for use as a coagulant. His address is: Sunfood, Mlymska 659, 51081 Dobruska, Czechoslovakia. Phone: 011 + 42 443 94325 or 443 21578.

Letter from Dr. Kamil Bersky, M.D., for The Macrobiotic Centre of Czechoslovakia, Mlynska 659, 51 801 Dobruska, Czechoslovakia. Phone or fax: 011 + 42 443 21578. 1993. July 30. "We are now producing 5 varieties of

seitan, 5 varieties of tempeh, amasake, tofu, and we can offer barley malt. Our plan is to start koji and miso production, open a macrobiotic center with a year-round program, a kindergarten, and a small restaurant with a shop."

Talk with Sladjan Randjelovic of Serbia, Yugoslavia. 1993. Dec. 29. His friend named Vacek runs Sunfood in Dobruska, Czechoslovakia (about 75 miles east northeast of Prague near the border with Poland), and his friend is also an agent for Mitoku Macrobiotic Foods.

Note: This is the earliest known commercial soy product made in the Czech Republic.

2856. Product Name: Westbrae Natural Buckwheat Miso. "Soba Miso."

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1984.

Ingredients: Whole soybeans, buckwheat, water, sea salt.

Wt/Vol., Packaging, Price: 17.6 oz (499 gm).

New Product-Documentation: Label. 1984, undated. 3.5 by 5.5 inches. Plastic. Brown and black on gold with green and orange. Information on package given in Japanese.

2857. Westbrae Natural Foods. 1984. Westbrae Natural-Traditional foods of Japan (Poster). P.O. Box 8711., Emeryville, CA 94662. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• **Summary:** This is a color photo of a large beige metal display rack with six shelves holding products including the following: (1) Samurai snacks, soup plum drops. (2) Tamari brown-rice wafers, Tamari brown-rice crackers. (3) Miso ramen, Instant miso soup. (4) Organic shoyu, tamari, mild soy sauce, Johsen tamari shoyu, Tofu sauce. (5) Kukicha (tea), Umeboshi (salt plums), Shiitake mushrooms, Agar flakes, Kuzu, Miso (in plastic bags; brown rice, red, barley, Hatcho). (6) Seaweeds (Wakame, kombu, hijiki, nori, sushi nori), Jinenjo soba, Somen, Brown rice noodles. At the top is the banner featuring the head of a samurai. One accompanying leaflet (printed black on white) is titled "Westbrae Natural product inventory. 4-foot Japanese foods section." A second leaflet titled "'Ichi-Ban' Westbrae Natural-No. 1 supplier of macrobiotic food in the U.S." lists the products by category. In the upper left corner are the Japanese characters for "Ichi-Ban" above a line drawing of Mt. Fuji. Address: Emeryville, California.

2858. Asunaro Eastern Studies Institute. 1984. Natural healing and foods preparation: 1984-85 (Leaflet). Escondido, California. 2 p. Front and back.

• **Summary:** Black lettering on orange paper. Classes will be taught by Noboru Muramoto, author of *Healing Ourselves*.

“Asunaro is a non-profit educational organization established in 1976. Its purpose is to provide a means by which many people can understand and learn traditional oriental culture.” Address: 145 W. El Norte Pkwy, Escondido, California 92026. Phone: (619) 743-6890.

2859. Atlas, Nava. 1984. *Vegetariana: A rich harvest of wit, lore and recipes*. Garden City, New York: The Dial Press, Doubleday & Company, Inc. 196 p. Illust. by Nava Atlas. 23 cm. [62 ref]

• **Summary:** A vegetarian cookbook scattered with quotes on vegetarianism and historical anecdotes. Filled with lovely, creative illustrations.

Soy-related recipes include: Chinese vegetable miso soup (p. 29). White bean dip (with soybeans, p. 50 & 179). Peanut sauce (with soy sauce or tamari, p. 52). Tofu “mayonnaise” (p. 52). Tofu sesame dressing or sauce (p. 53). Eggs and tofu in peanut sauce (p. 62). Peanut rice and tofu (p. 81). Mushrooms and tofu in wine (p. 119). Stir-fried vegetables with tofu (p. 132). Address: New Paltz, New York.

2860. Bloodroot Collective; Beaven, Betsey; Furie, Noel; Miriam, Selma. 1984. *The second seasonal political palate: A feminist vegetarian cookbook*. Bridgeport, Connecticut: Sanguinara Publishing. xli + 242 p. Illust. Index. 23 cm. [35 ref]
Address: 85 Ferris St., Bridgeport, Connecticut 06605.
Phone: 203-576-9168.

2861. Bray, Francesca. 1984. Legumes (Document part). In: F. Bray. 1984. *Science and Civilisation in China*. Vol. 6, *Biology and Biological Technology*. Part II: Agriculture. Joseph Needham series. Cambridge, England: Cambridge University Press. xxvii + 724 p. See p. 510-14. [49 ref]

• **Summary:** Note: Chinese characters are given for all italicized Chinese words or terms. Although legumes were among the earliest plants to be domesticated in West Asia and the Americas*, there is no solid evidence that legumes were cultivated in China in prehistoric times, even though several species were native to China, and even though legumes played a very important role in Chinese agriculture from the late Chou [ca. 722 B.C.] onwards.

* Footnote: In the Near East and Europe carbonised peas and lentils, assumed to be domesticated, have been identified at farming sites dating as far back as 7000 B.C. Various species of *Phaseolus* beans seem to have been domesticated in Peru and Mexico by the 6th millennium B.C. And groundnuts are believed to have been domesticated in the upper Amazon regions, in South Bolivia and North Argentina well before 3000 B.C.

“Though remains of leguminous species have been found in one or two Chinese neolithic sites, they have been identified as broad beans (*Vicia faba*) and groundnuts

(*Arachis hypogaea*); since the former is believed to have been introduced to China from Western Asia in Han times [220 B.C.–220 A.D.] and the latter is a native American species, the authenticity of these identifications is doubtful, to say the least” (Footnote: K.C. Chang. 1977. *The Archaeology of Ancient China*, 3rd revised ed.).

“There are apparently no references to legumes in the Shang oracle records, and the earliest uncontested evidence for the cultivation of leguminous plants in China is found in Chou bronze inscriptions and in the *Shih Ching*. Both these sources refer to a crop called *shu* (Chinese characters given), and the early form of the character clearly depicts the nodules on the roots of the plants (Fig. 237). The term *shu*, though also used to refer to legumes in general, is primarily associated with the soybean, *Glycine max* (L.) Merrill, and its presence in these writings is usually taken to signify the domestication of this crop” (Footnote: Hu Tao-Ching {1963} in fact postulates a much earlier domestication [it must have been domesticated and well known long before it appeared in inscriptions on bronze vessels in 1024 B.C.]; Ping-To Ho {1975, p. 70} believes that domestication occurred about 1000 B.C.)

“In later lexicographical texts the term *shu* is usually qualified when soybeans are referred to: *jung shu*, *jen shu*, and *ta shu* are mentioned (Footnote: In the *Erh Ya* and its commentary for example), and this does suggest that even in pre-Han times *shu* was used as a generic term for legumes rather than a specific term for soybeans. The modern term for soybean is *ta tou*, ‘greater bean,’ a term which first appears in the -1st century *Fan Sheng-Chih Shu*. In classical times the term *tou* was applied only to a type of ‘wooden vessel or dish containing flesh sauces at sacrifices or feasts’ (Bretschneider 1882, vol. II, p. 162), but by Han times it seems that it was also used as a general term for pulse crops, as it still is today.

“Whether or not the unqualified term *shu* in early texts and inscriptions should be understood to refer to soybeans or to legumes in general, there is no doubt that the soybean was domesticated in China some time around the beginning of the Chou, for texts describing -7th-century events refer to soybeans (*jung shu*) as novel introductions to the Central States, whereas by the time of Mencius [Meng tzu, c. 371-c. 289 B.C.] they had already become a staple food of the common people (Footnote: P.T. Ho 1975, p. 79).

“The presumed wild ancestor of the soybean, *Glycine ussuriensis* Regel & Maack or *G. soja* L. is native to northeast China and the adjacent areas of Manchuria, Korea, and Japan (Footnote: Hymowitz 1970, 1976), and it may be significant that the cultivated soybean was called *jung shu* for Jung was the name commonly given to the Tungusic tribes of Northeast China in Chou times. The *Kuan Tzu* states that in the -7th century Duke Huan of Ch’i (Footnote: Ch’i covered most of modern Shantung) led an expedition to the territory of the Mountain Jung and brought back

'winter onions and soybeans (*jung shu*) for dissemination throughout the various states' (P.T. Ho 1975, p. 78)."

An alternative interpretation of *jung* and of its (then) homophone *jen* is that it simply meant large and luxuriant (Bretschneider 1882, vol. 2, p. 164), for the soybean is a large, bushy plant which grows up to 6 feet tall. Its modern name of *ta tou* can be attributed to its growth habit, and not to the size of its beans which are only about as big as a lentil. Fig. 238 (*Shou Shih T'ung K'ao*, 1742) shows an illustration of a soy bean plant.

"The soybean's rapid conquest of Chou China is a tribute to its superior qualities, qualities so outstanding that they frequently provoke outbursts of surprising lyricism in modern writers: 'that miracle, that noblest of crops, that wondrous plant, the soybean' (Anderson & Anderson 1977, p. 346)." The ancient Chinese were more moderate in their praise, perhaps because they were unaware of the benefits of modern nutritional analysis. The chief virtues of the soybean for the ancient Chinese "were that it produced good crops even on poor land, that it did not deplete the soil, and that it guaranteed yields even in poor years, so that it made a useful famine crop." It gave 3-4 times the yield of millet. The *Fan Sheng-Chih Shu* says that in former times (presumably the late Chou) it was customary for peasants to plant 5 *mu* per capita of soybeans to guard against famine. Soybeans were widely grown in China from Chou times on, "but they were not held in high esteem for their gastronomic qualities." The Chinese appreciated soybeans most when they were fermented to make sauces (*jiang*) or relishes (*shi*), or transformed into beancurd (*doufu*). These foods were generally made from yellow soybeans, although the *Qimin Yaoshu* (+544) recommends black soybeans. The various fermentation processes were discovered in early times; they improved the soybean's palatability and its nutritional properties. Address: Research Fellow, East Asian History of Science Library, Cambridge, England.

2862. Clergeaud, Chantal; Clergeaud, Lionel. 1984. *Mystères et secrets du soja* [Mysteries and secrets of soya]. Paris: Editions La Vie Claire. 134 p. Illust. 21 cm. [Fre]
 • **Summary:** Contents: 1. A little history, the properties of soya, soybean culture, soya and animal feeding, recipes based on whole soybeans (*fèves de soja*). 2. Soy flour, soy proteins, recipes based on soy flour and soy proteins. 3. Soy sprouts, recipes based on soy sprouts. 4. Soy oil, recipes based on soy oil. 5. Soymilk, recipes based on soymilk. 6. Tofu, recipes based on tofu. 7. Fermented soy products: miso, recipes based on miso, tamari, tamari-shoyu, recipes based on tamari and tamari shoyu, tempeh, recipes based on tempeh. 8. Other [fermented] soy-based products consumed in the world: Chee fan (fermented tofu), Hamanatto, ketjap (Indonesian soy sauce), Meitauza (fermented okara), Sufu (fermented tofu). Address: Naturopathes-Ostéopathes, France.

2863. Gerras, Charles. ed. 1984. *Rodale's basic natural foods cookbook*. Emmaus, Pennsylvania: Rodale Press. xi + 899 p. Illust. Index. 24 x 20 cm.

• **Summary:** This book, containing over 1,500 recipes, does not use salt or white sugar, but does use meats, poultry, and fish. It was also published by Simon & Schuster as "A Fireside Book." It contains extensive information on and many recipes for soyfoods, including whole dry soybeans, tofu, soy ice cream, soy flour and grits, miso, soymilk, soy oil, okara (soy pulp), soy sauce, tamari, and soy sprouts. Address: Pennsylvania.

2864. Just In Foods, Inc. 1984. *Cooking with miso—General principles* (Card). Rutherfordton, North Carolina. 1 p. Front and back. 12 x 14 cm.

• **Summary:** This card, printed front and back, gives a brief, general description of miso. It begins: "Every morning millions of Japanese wake up to a hot, stimulating bowl of miso soup. Miso (pronounced 'mee-so') is a delicious, very versatile fermented soy food. Loaded with protein, high in vitamin B12, essential amino acids and minerals, but very low in fat and calories, miso is a concentrated source of many nutrients." After describing the nutritional and medicinal value, varieties and colors, versatility, and use in miso soup, it concludes: "According to ancient Japanese mythology, miso is a gift from the Gods. We at the American Miso Company are striving to maintain the simplicity and purity of this previous gift."

On the front of the card: An illustration at the lower right shows a wooden keg of miso bound with three ropes that join at the top. The company logo of crossed sheafs of grain in a circle appears at the top right. Address: Box 541, Route 3, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

2865. Kagaku Gijutsu-cho, Shigen Chosa-kai (Science & Technology Bureau). 1984. *Shitei shokuhin seibun hyō* [Standard tables of food composition in Japan. 4th ed.]. Tokyo. 370 p. Introduction by R. Kagawa, Joshi Eiyo Daigaku. 28 cm. [Jap; Eng]

• **Summary:** Pages 76-80 gives a nutritional analysis of the following Japanese soyfoods: Soybeans: whole domestic (dry, or boiled), USA whole dry, Chinese whole dry. Green immature: raw, or boiled. Soybean sprouts: raw, or boiled. Defatted soybeans: whole, or dehulled. Kinako (roasted, ground soybeans). Budō-mame. Tofu: regular (momen), silken (kinugoshi), soft, packed, Okinawa tofu, grilled (yaki-dofu), nama-agé (deep-fried tofu cutlets), abura-agé (deep-fried tofu pouches), ganmodoki, kori-dofu, Tofu chikuwa (steamed, or roasted). Natto: Itohiki natto, goto-natto, tera-natto (soy nuggets). Miso: Rice koji miso (ama miso, light yellow miso, dark yellow miso), barley koji miso, soybean koji miso, dried miso, kinzanji miso, hishio

miso. Okara. Soymilk: regular, reconstituted, soft drinks. Yuba: Fresh, or dried.

Page 254 gives the amino acid composition of soybeans, tofu, dried frozen tofu, yuba, okara, natto, and 3 types of miso. Address: Japan.

2866. Ko Swan Djien. 1984. Fermentation of foods by moulds. In: R.A. Samson, E.S. Hoekstra, and C.A.N. van Oorschot, eds. 1984. *Introduction to Food-Borne Fungi*. 2nd ed. Baarn, Netherlands: Centraalbureau voor Schimmelcultures. See p. 236-42. [47 ref]

• **Summary:** Contents: Introduction. Species used for fermentation. Natural inoculation. Traditional starters: Chinese yeast, tane koji, tempe inoculum. Fermented foods and mycotoxins. Roles of the moulds: Synthesis of enzymes, mould growth, synthesis of colouring compounds, protection of the product. Conclusion. Address: Bandung Inst. of Technology, Indonesia, and Agricultural Univ., Wageningen, Netherlands. Present address: Tarthorst 333, 6708 HL Wageningen, The Netherlands.

The first complete soya cookbook]. Munich, West Germany: Graefe und Unzer GmbH. 104 p. [11 ref. Ger] Address: West Germany.

2868. Photographs of the Arcata Tofu Shop in Arcata, California (1980-1984). 1984. Arcata, California.

• **Summary:** Twenty-two color photos (most 4 by 5 inches), numbered with captions, were sent to Soyfoods Center on 24 Sept. 2002 by Matthew Schmit, founder and owner of the Arcata Tofu Shop. They were taken in Arcata between 1980 and 1984. Nos. 3-12 were taken in Dec. 1980. They show: (1) Oct. 1980—Inside of building in Arcata during complete remodeling of previous insurance offices (1,000 square feet). (2) Oct. 1980—Outside of same building at 768 18th St. Lease just signed. Newspapers in windows in preparation for remodeling. (3) Open for business. Large wooden sign above door reads “The Tofu Shop: Soy Deli and Whole Grain Bakery.” (4) Putting up sign over door. All people standing on sidewalk or ladder have their backs to the camera. Bottom left (standing on sidewalk): Paul Kusterman, who loaned money to help shop open; a truck driver for United Naturals, he had been selling tempeh burgers at local fairs since 1978. On ladder: Matthew Schmit. Bottom right (standing on sidewalk): Jackson Hollomon and wife Valerie. Jackson gave Matthew Schmit his first taste of tofu in the winter of 1973-74. In 2001 Jackson finished 3-year Buddhist retreat. On roof holding

sign—On left: Man who created the sign. On right: Daniel Schmit (Matthew’s brother). (5) Grocery section inside The Tofu Shop, with bottles of sauces, packages of Miso Cup, and an issue of *Soyfoods* magazine on wooden shelves, with a “What is Tofu?” pamphlet on the wall. (6) Suzanne Kosciolk Schmit stocking specialty grocery shelves. A Learning Tree Tofu Kit is now visible. (7) Suzanne Kosciolk Schmit holding The Tofu Shop’s tiled logo (a writhing blue dragon on four white tiles in a wooden frame) next to the first shipment from United Naturals: Soybeans (from Arrowhead Mills), nigari, barley malt, natto miso, sea vegetables, etc. (8) Looking in the front door of The Tofu Shop; six shelves of special groceries, tempeh kits, etc. (9) Matthew Schmit dressed in white apron with “first batch grin.” Deli store front counter area is in the background. (10) Back wall of shop with supplies and custom forming box table with adapted “load bar” presses (idea from *Soyfoods* magazine). (11) Cutting first batch of tofu in stainless steel sink. (12) Close-up of The Tofu Shop’s first printed tofu labels in Arcata atop a deli take-out carton. Color and design are similar to those from Telluride—Blue on white, with a dragon in a circle. (13) 1981—Steve Rhine setting presses on metal forming boxes. (14) 1981—Matthew Schmit ladling *gô* from cooking pots to hand-screw apple-cider press used as a soymilk press. (15) 1982—Workers sitting on brick bench in front of shop. Left to right: Matthew Schmit. Stephen Lyons, tofu maker. Amy Pujanawski, deli worker. Tom Nawrocki, maker of tofu and tempeh. Rob Earhardt, tofu maker. John Hendricks, tofu maker. (16) 1982—Matthew Schmit packing tofu in take-out boxes on shelf of shop’s back wall. (17) 1983—Linda Redfield behind Tofu Shop table, promoting soyfoods at Arcata Co-op event. (18) 1983—Deli worker Jeannie Penn behind Tofu Shop table World Food Day at Arcata Co-op. Jeannie was one of the few female tofu makers ever employed by the shop. (19) 1982—Tofu Shop booth at Gemini Distributors Food Show, Fortuna, California (in the middle of cow country), attended by Matthew Schmit and Linda Redfield. Prepared dishes with signs on red checkerboard tablecloth: Creamy herb & onion tofu dressing. Marinated and baked tofu cutlets. Most early labels were rubber stamped on pre-printed generic Tofu Shop adhesive labels. (20) Soyfoods books and magazines on tablecloth at Gemini Food Show. Two signs: Introducing tofu, and The Tofu Shop. (21) Different view of table, with sign: “The Tofu Shop Specialty Foods, Arcata, CA. We specialize in freshmade soyfoods.” (22) 1984—Shawn White at food demo in a store. Address: Arcata, California.

2869. Rosengarten, Frederic, Jr. 1984. *The book of edible nuts*. New York, NY: Walker and Company. xxv + 384 p. See p. 324-27. Illust. Index. 26 cm. [330* ref]

• **Summary:** The chapter titled “Soybeans” (p. 324-27) contains a brief discussion of soybean oil, soybean meal,

tofu, miso, tempeh, and soy sauce, plus more detailed information on soynuts, which are attractive nut substitutes. Soynuts are whole soybeans that have been processed to look and taste like nuts, and be used like nuts. With a crunchy texture and no cholesterol, they have more than twice the protein content of most tree nuts and are relatively inexpensive. The author explains that large-seeded vegetable-type soybeans are used for soynuts. He describes how they are processed and the different flavors and brands that are available.

One major reason for the vast increase in soybean production in the USA is the ease with which the crop can be fully mechanized. Address: Associate in Economic Botany, Botanical Museum, Harvard Univ. [Massachusetts].

2870. Saito, Akio. 1984. [Chronology of soybeans in Japan, 1970 to 1984] (Document part). In: Akio Saito. 1985. Daizu Geppo (Soybean Monthly News). Feb. p. 16-18. [Jap]

• **Summary:** 1970–Soybean cultivation area in Japan drops to 95,500 ha, falling below 100,000 ha for the first time. Soybean cultivation area in Japan is nearly 10% of total cultivation area for all crops.

1970–Soybean imports rise to 3,243,790 tonnes, passing 3 million tonnes for the first time.

1972–Production of defatted soybean meal reaches 2,035,000 tonnes, topping 2 million tonnes for the first time. Production has risen 2.8 fold during the past decade.

1972–Production of deep-fried tofu pouches (*aburage*) reaches 200,000 tonnes.

1973–Soybean imports reach 3,635,000 tonnes, up 7% over last year despite U.S. export regulations.

1973–Some 2,740,000 tonnes of soybeans, representing about 80% of all soybeans in Japan, are crushed to make soy oil. 1973 Jan. 27–An extraordinary Cabinet meeting is held and the decision is made to import soybeans from the USA urgently. The price of soybeans in late 1972 was 3,000 yen per 60 kg sack but now it has become very difficult to get them even if you pay 15,000 yen per 60 kg. Soybeans are called “yellow diamonds.”

1973 June 27–President Richard Nixon sets new regulations for U.S. soybean exports. These give the Japanese tofu, miso, and soy oil industries a big “shock.”

1973 July 6–The Japanese government passes a new law that forbids soybean brokers or sellers in Japan from buying up and selling at inflated prices 16 important items—including soybeans.

1973 July 12–The Japanese Department of Commerce announces that it permits the export of soybeans for special food uses, such as tofu and high-quality misos, which were planted under previous contracts.

1973 Sept. 7–The U.S. Department of Agriculture removes all regulations that concern exports of agricultural products.

1973 Oct. 17–OPEC nations decide to regulate the production and supply of crude petroleum. This leads to huge price increases in petroleum products—known in Japan as the “oil shock.” Japanese buy up toilet paper and wash detergents causing much confusion.

1974–Good quality miso now retails on average for 251 yen/kg, up 22.4% from last year. The average retail price of shoyu in Tokyo is 434 yen for 3 liters, up 33.5% from last year.

1974 Feb.–The Japanese Ministry of Agriculture and Forestry asks manufacturers of tofu, natto, deep-fried tofu pouches, and dried-frozen tofu to reduce the retail prices of their products to the levels they were at in November 1973.

1974 July 30–In order to get rid of AF2 (a preservative widely used in tofu), the City of Tokyo decides to make a public announcement of all foods which may contain AF2 and announces that food inspections will start immediately, on August 1.

1974 Aug.–The Japanese Ministry of Public Welfare forbids the usage of AF2.

1974 Oct.–The JAS food certification system, formerly applied to widely distributed foods, is applied to tofu, natto, konnyaku, etc., which are foods that are distributed over a small area.

1975–The typical price of Tofu in Tokyo is 60-70 yen per 300 gm. Yet in supermarkets it averages 50 yen, and some sell it for as little as 25 yen.

1976–Soybean production in Japan drops to 109,500 tonnes, the lowest level since 1878 when production statistics started to be recorded.

1978–The soybean cultivation area reaches 127,000 ha, topping 100,000 ha for the first time in 9 years.

1978–Soybean imports rise to 4,260,000 tonnes, topping 4 million tonnes for the first time. This is 4.5 times as much soybean imports as 20 years ago.

1978 Aug.–Unbranded generic foods, such as shoyu, miso, and salad oil, start to be sold. They retail for about 30% less than major branded products.

1979–Tofu production continues to rise, reaching 1,114,000 tonnes, an topping 1.1 million tonnes for the first time.

1980–Production of natto reaches 153,000 tonnes, up 33% compared with 10 years ago (when it was 115,000 tonnes).

1981–The area occupied by registered soybean varieties rises to more than 60% of total soybean area.

1981 Per capita consumption of miso drops below 6 kg/year to 5.9 kg/year, down 30% compared with 20 years ago (when it was 8.4 kg) This is a reflection of the health food movement in Japan.

1981 Sept.–Dr. Hirayama of the National Cancer Center announces that miso soup has some effect on lowering the death rate from stomach cancer, stroke, and sclerosis of the liver.

1981 Nov.—The Ministry of Agriculture and Forestry announces JAS (Japanese Agricultural Standards) for soymilk. The soymilk boom starts. The total yen value of the soymilk by all major Japanese manufacturers is 5,000 million yen.

1982—There are now 77 registered varieties of soybeans cultivated in Japan. Two of these (Norin 1-go and Norin 5-go) have a Norin [Ministry of Agriculture] number, and 25 have various place names.

1982—Production of soybeans in Japan this year is 226,300 tonnes, and soybean imports are 4,344,000 tonnes— which is only 5% self sufficiency.

1982—Per capita consumption of soy oil rises to 5.1 kg, topping 5 kg for the first time. It is 3 times higher than it was 3 years ago.

1982—Production of defatted soybean meal reaches 2,800,000 tonnes—up 38% over the last 10 years.

1983—Production of soymilk in Japan rises to 116,724 tonnes, topping 100,000 tonnes for the first time. It has risen 71% during the past year.

1983—Per capita consumption of soybeans in Japan is 5.8 kg, up 3.6% during the past year.

1984—The use of soymilk as a beverage is declining in Japan. The movement to use more soymilk as an ingredient in foods (such as noodles, breads, ice creams, and creamy soups) is becoming more active.

1984—Soybean yields in Japan reach 1,770 kg/ha, and all-time record. The old record was 1,540 kg/ha in 1982. Address: Norin Suisansho, Tokei Johobu, Norin Tokeika Kacho Hosa.

2871. Samson, Robert A.; Hoekstra, E.S.; Oorschot, C.A.N. eds. 1984. Introduction to food-borne fungi. 2nd ed. Baarn, Netherlands: Centraalbureau voor Schimmelcultures. 248 p. Index. 30 cm. [164* ref]

• **Summary:** Contents: Introduction. 1. Identification: Zygomycetes, Ascomycetes (Aspergillus), Deuteromycetes (Monascus, Mucor, Rhizopus), Yeasts, References. 2. The detection and quantification of fungi in food, by B.J. Hartog. 3. Fungal growth on foodstuffs related to mycotoxin contamination, by M.D. Northolt & P.S.S. Soentoro. 4. Fermentation of foods by moulds, by Ko Swan Djien. Appendix. Glossary of used mycological terms. Special literature on food mycology. Index of the taxa described in chapter 1. In the Identification chapter, details and good illustrations (line drawings) and photos are given for the genera of molds used with soyfoods mentioned above. Address: Netherlands.

2872. Shi, Shenghan. 1984. Qimin yaoshu (yinshibu) [The food and drink section of the *Qimin Yaoshu* (Ch'i-min yao-

shu)]. Peking, China: Commercial Publishers. [Chi]*

• **Summary:** Wade-Giles reference: *Ch'i Min Yao Shu* (*yin shih pu*), by Chia Ssu-hsieh. This section of Shi Shenghan's modern translation of the *Qimin Yaoshu* (1957-58) was published separately in 1984. H.T. Huang used this extensively in his book on *Fermentations and Food Science* (2000) in the Joseph Needham series. Address: China.

2873. Shurtleff, William; Aoyagi, Akiko. comps. 1984. Soyfoods labels, posters & other graphics: 5. Miso and soy sauce. Lafayette, California: Soyfoods Center. 164 p. 28 cm. • **Summary:** This book is a collection of black-and-white photocopies of materials ranging in date from 1975 to 1984. The books in this series, each a unique collection of graphic materials, are designed for a number of purposes: (1) To serve as a source of ideas, ingredients, inspiration, legal specifications, and basic guidelines for companies in the process of designing graphics for their own soyfoods company. (2) To document the tremendous diversity of soyfoods products and ways of introducing them to the public. (3) To document, through this, the rise and history of the soyfoods industry and market in the Western World.

Contents: Miso. Second generation miso products. Soy sauce, shoyu & tamari. Second generation soy sauce products. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2874. Steinkraus, K.H. 1984. Solid-state (solid-substrate) food/beverage fermentations involving fungi. *Acta Biotechnologica* 4(2):83-88. [13 ref]

• **Summary:** Contents: Summary. Introduction. Oriental food fermentation: Tempeh, miso, soy sauce, tape ketan. Address: Inst. of Food Science, Cornell Univ., Geneva, New York 14456.

2875. Vegetarijanska kuhinja [Vegetarian cooking]. 1984. Zagreb, Yugoslavia: SNL (Sveucilna mklada Liber). 389 p. Photos by Luka Mjeda. 25 cm. [Scr]

• **Summary:** This attractive, hardcover book, printed on glossy paper and containing many excellent color photos of dishes, has a lengthy section on soya (Soja; p. 291-307). It gives descriptions of and recipes for using (or making) whole dry soybeans, soymilk, tofu, and miso. Address: Zagreb, Yugoslavia.

2876. Wood, B.J.B. 1984. Progress in soy sauce and related fermentations. *Progress in Industrial Microbiology* 19:373-409. M.E. Bushell, ed. Modern Applications for Traditional Biotechnologies. [100 ref]

• **Summary:** Contents: Introduction. Soy sauce: Introduction, raw materials and koji, the *unami* taste, defatted soybean meal, microbiological considerations, moromi stage of fermentation, refining of and properties of

shoyu, patents, work with Japan. Miso. Tempeh. Conclusions.

Tables show: (1) Glossary of terms used in soy sauce and similar fermentations: *Koji, miso (hatcho, mame, mugi, genmai, kome), moromi, shoyu (koikuchi, usukuchi, tamari, shiro, saishikomi), tamari, teriyaki*. (2) Recently published national standards for soy sauce, miso, etc. (cites 8 standards, 5 from Taiwan and 1 each from Thailand, Malaysia and USA). (3) Recent patents relating to shoyu and miso production and processing: Japanese 1980 shoyu (13 patents), Japanese 1981 shoyu (11), USA 1979 (2), USA 1980 (2), Japanese 1979-1981 miso (8), USA tempeh 1979-1980 (3 patents). (4) Japanese journal titles and their English translations (11 journal frequently cited in FSTA–Food Science and Technology Abstracts). Address: Applied Microbiology Div., Dep. of Bioscience and Biotechnol, Univ. of Strathclyde, Glasgow, G1 1XW, Scotland.

2877. **Product Name:** Lima Brown Rice Koji.

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 1004, Chico, CA 95927.

Date of Introduction: 1984?

Ingredients: Dried fermented brown rice with koji (*Aspergillus oryzae*).

Wt/Vol., Packaging, Price: 17.6 oz (500 gm) plastic bag.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label for Barley Rice Koji for Making Miso and Amasake. 1984. Collected by Lorenz Schaller of California. 4 by 5 inches. Orange and brown on beige. “Imported from Ohsawa Japan by Chico-San.”

2878. **Product Name:** Westbrae Natural Miso (Light Yellow, Mellow White, or Red).

Manufacturer's Name: Westbrae Natural Foods (Distributor). Made in Canada by Shin-Mei-Do.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984?

New Product–Documentation: Catalog. 1984. Talk with Bob Gerner. 1988. Jan. 30. Westbrae has dropped Miyako Oriental Foods's miso. Switched to that made by Shin-mei-do on Denman Island, Canada.

2879. American Miso Co., Inc. 1985. The secret of Japanese miso comes to America (Ad). *East West Journal*. Jan. 4.

• **Summary:** This full-page, black-and-white ad begins: “At last! The ancient traditions of the Japanese miso-making art have been carefully and lovingly carried to America by the American Miso Company, the proud now caretaker of traditions passed down from Master to Miso-Master for many centuries.” This miso is made from the finest ingredients, including organic rice, barley, and soybeans.

“Last and perhaps most important, our miso is unpasteurized, unlike so many other misos. This leaves intact the beneficial lacto-bacillus and enzymes so essential for proper health and food digestion, and imparts the savory aroma, outstanding character, and mellow taste so prized in unpasteurized miso. The American Miso Company logo, crossed sheaths of grain in a circle, is at the bottom center of the ad.

Photos show: (1) A 1-lb package of the company's barley miso in a plastic bag with a one-way pressure release valve. (2) Jan Belleme, with a baby (Justin) on her back, mixing koji—her hands up to the wrists. (3) A bearded employee [Bob Zullo] moving a huge wooden vat of miso using an hydraulic dolly. Address: Box 541, Route 3, Rutherfordton, North Carolina 28139. Phone: (704) 287-2940.

2880. **Product Name:** Natural Soya Chips. Low Sodium [Zesty Miso, or Chili Vegetable].

Manufacturer's Name: Edward & Sons Trading Co.

Manufacturer's Address: P.O. Box 3150, Union, NJ 07083.

Date of Introduction: 1985. January.

Ingredients: Incl. okara.

Wt/Vol., Packaging, Price: Bag. Retail for \$1.59.

How Stored: Shelf stable.

New Product–Documentation: Ad in *Vegetarian Times*. 1985. June. Inside front cover. “Crisp & Delicious soybean snacks. The soyfoods revolution marches on with Soya Chips... Natural Soybean Snacks in two scrumptious flavors.”

2881. Fukushima, Danji. 1985. Fermented vegetable protein and related foods of Japan and China. *Food Reviews International* 1(1):149-209. [99 ref]

• **Summary:** Introduction. Historical aspects of soy sauce and miso. General description of fermented vegetable protein foods: Soy sauce (varieties, manufacturing, flavor components and quality evaluation), miso, natto, sufu (fermented product of tofu), fermented soy milk. Microbiology, biochemistry and nutrition: Role of koji as enzyme source (unique sources of enzymes, peptidases in koji, role of proteinases and peptidases in koji during protein digestion, role of glutaminase in koji in formation of glutamic acid during protein digestion), effect of heat treatment of soybean proteins on their digestibility and nutritive value (enzyme digestibility and yield of soy sauce, enzyme digestibility and nutritive value of protein), basic mechanisms for protein coagulation, microorganisms during brine fermentation in soy sauce and miso (change of microflora during brine fermentation, properties of *P. halophilus*, properties of *S. rouxii*, properties of *Torulopsis* species), nutritive value, safety and anticarcinogenicity of fermented foods. Future of traditional vegetable protein

foods made through fermentation. References. Address: Food Science Research Lab., Kikkoman Corp., Noda-shi, Chiba-ken, Japan.

2882. Harayama, Fuminori; Yasuhira, Hitomi. 1985. *Rhizopus-zoku ni yoru miso jôzô ni tsuite*. I. [Application of the genus *Rhizopus* for miso manufacturing. I. Studies on fermented soybean food manufacture using various molds]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 80(4):281-86. [17 ref. Jap; eng]

• **Summary:** Two strains of *Rhizopus* with high protease activity and low spore-forming capacity, *R. oryzae* IFO 5418 and *R. japonicus* IAM 6002 were used instead of *Aspergillus oryzae*. Miso obtained had more lactic acid and lower pyroglutamic acid contents, less creaminess, harder consistency, more clear color, and flavor with unique aroma compared with ordinary miso. Address: Shinshu-Miso Research Inst., 469-6 Nakagoshô, Nagano-shi, Nagano-ken 380, Japan.

2883. Saito, Akio. 1985. *Daizu bunka-shi nenpyô* [Chronology of soybeans, 122 B.C. to 1984]. *Daizu Geppo (Soybean Monthly News)*. Jan. p. 12-16; Feb. p. 10-18. 28 cm. [Jap; eng+]

• **Summary:** This very interesting, well-researched, and detailed chronology, which is full of new information, focuses on the development of soybeans and soyfoods in Japan. We have divided the contents of the chronology into 9 separate records; the date of each corresponds to the last year in that part of the chronology: 1292, 1599, 1699, 1868, 1899, 1926, 1949, 1969, and 1984. Address: Norin Suisansho, Tokei Johobu, Norin Tokeika Kacho Hosa.

2884. Hatsuhana. 1985. Hasuhana (Ad). *New York Times*. Feb. 10. p. 735.

• **Summary:** A half-page ad for this Japanese restaurant at 17 East 48th St. Most of the ad is devoted to the menu, which is divided into appetizers and entrees. Appetizers include: "Soy bean [miso] soup. Geso yaki, broiled squid feet with butter, salt or soy bean paste / miso. Hiya yakko, cold soy bean curd [tofu]. Oshitashi [O-shitashi, O-hitashi], spinach prepared in a delicate sesame and soy sauce. Toro natto, chopped fatty tuna with aged soy beans in a cup.

Many of the entrees are nori-wrapped sushi.

2885. *Asahi Shinbun*. 1985. Nihon no daizu kakôgaku manabu. Nepaaru no Baideya-san. Kuni de gijutsu ikashitai. Kyô jôkyô. Hirogaru kaigai kyôryoku no wa [Mr. Vaidya of Nepal is studying soybean processing in Japan. Hoping to use the techniques at home, he arrived today in Tokyo, expanding international cooperation]. Feb. 14. [Jap]

• **Summary:** Mr. Vaidya was invited by the Rotary Club to come to Japan to learn how to make soyfoods. He will be learning about tofu, miso, and shoyu. A photo shows Mr.

Vaidya making tofu at Senhachi [Senpachi?] tofu shop at Yajima-cho, Yamadera, Japan. Address: Japan.

2886. Kikkoman International Inc. 1985. Analysis of Kikkoman Instant Soups. 50 California St., Suite 3600, San Francisco, CA 94111. 1 p. Unpublished manuscript. [1 ref]

• **Summary:** Gives a complete nutritional analysis for four packaged miso soups (aka miso, shiro miso, tofu, wakame), and Osuimono. They have a moisture content of 2.1–4.4%. Protein is 11.5–23.9%. Typically 10 gm of the dry soup is mixed with 2/3 cup water. Address: San Francisco, California. Phone: 415-956-7750.

2887. Langley-Danysz, Pernette. 1985. L'entrée discrète du soja en Europe [The discreet / cautious entry of soya into Europe]. *Revue Laitière Française* No. 438. p. 16-20. Feb. [Fre]

• **Summary:** An illustration on the cover shows an American cowboy-like man, wearing a cowboy hat and cowboy boots, smoking a cigarette, and carrying a briefcase on which is written ASA. He appears to be emerging from a garbage can labeled "soya" and from his briefcase are flying several cartons of soymilk. The article begins: "Two soy products, milk and tofu, were at the center of a conference organized in September 1984 at Amsterdam [Netherlands] by the American Soybean Association (ASA)."

Gives data on the chemical composition and nutritive value of soy beverages, soymilks, and tofu. Discusses the products recently introduced in Europe. Consumption of soy products in the E.E.C., principally as soy protein concentrates or isolates, has never exceeded 40,000 tonnes/year. Consumption of traditional East Asian soyfoods such as tempeh, miso, sufu, and soy sauce, is still low in Europe, but consumption of tofu and soymilk is growing significantly. Nutritional composition of cow's milk and soymilk are compared, and various commercial soy products are discussed.

Soy ice creams (including Ice Bean and Tofutti) are discussed in detail on page 19, col. 1. The pioneer of these soy ice creams (*ces ice cream au soja*), named Ice Bean, was developed by Farm Foods in Tennessee. Today there are a dozen other brands of tofu ice cream (*glaces au tofu*). One of these ice cream (*ces crèmes glacées*), Tofutti, made by the company Tofu Time and presented at SIAL in 1984, took the first place last fall on the hit parade of dairy products from the United States." Note: This is the earliest French-language document seen (March 2007) that mentions soy ice cream which it calls *ice cream au soja*, or *glaces au tofu*, or *crèmes glacées*.

Photos show the following products, each in a Tetra Brik carton: Nestle Bonus Soya Bean Milk, Plamil Soya Milk Concentrated, Morinaga Ever-Fresh Silken Tofu, Yeo's Soya Bean Drink, Alpro Soya Drink. Address: France.

2888. MacDonald, Sandy. 1985. Designer beans: Soybeans aren't stuck down on the farm anymore. High-protein, low-calorie soyfoods have gone gourmet. *New Age Journal* (Boston, Massachusetts). Feb. p. 53-59. [2 ref]

• **Summary:** An excellent introduction to soyfoods and soyfoods companies in America today. Photos show Chandri and Gary Barat of Legume, Akiko Aoyagi and William Shurtleff "parents of the soy boom," and Tom Timmins president of Tomsun Foods.

Note: This is the earliest document seen that contains the term "designer beans." Though this interesting term is used in the title of this article, it does not appear in the body of the article itself. The author appears to mean that the soybean can be made into hundreds of "ingenious" and imaginative (often delicious) foods from ice cream to lasagna, from burgers to creamy dips and dressings—and industrial products, including spun soy protein fibers invented by Robert Boyer, a Ford Motor Company employee, and first put to use in the upholstery of Ford cars; they were later used to make bacon bits and meat alternatives. Address: Brighton, Massachusetts.

2889. Shurtleff, William; Aoyagi, Akiko. 1985. Brief history of Imagine Foods (Arkansas) and Rice Dream non-dairy frozen dessert (Document part). In: Shurtleff and Aoyagi. 1985. *Tofutti & Other Soy Ice Creams: The Non-Dairy Frozen Dessert Industry and Market*. Vol. 1. 145 p. See p. 88-89.

• **Summary:** "In June 1984 Robert Nissenbaum and David Carlson of Imagine Foods, a small rural Missouri company that also made tempeh and miso, introduced Rice Dream, one of the most creative non-dairy frozen desserts to appear in America in decades. It was based on *amazake* (literally "sweet sake") a creamy-thick, subtly-sweet, low-alcohol precursor of Japanese sake, made by fermentation of rice koji in water. Koji, used to make rice miso, is made by fermenting rice with the koji mold (*Aspergillus oryzae*) (Shurtleff and Aoyagi 1983). The company made its own koji and amazake. Unlike most other non-dairy ice creams, Rice Dream was extremely low in calories, since it originally contained no added oil or fat. Most of the product's sweetness came from the natural sweetness of amazake, but small amounts of Grade A maple syrup were also used. A nutritionist's dream, containing only 132 calories and 18 mg of sodium per ½ cup serving, Rice Dream was advertised with a lovely full-page color ad in various natural foods magazines. As demand grew, production of the amazake was moved to California and the hard-pack frozen dessert was made at Peninsula Creamery in Palo Alto, California. Thereafter a small amount of safflower oil had to be added for functional reasons, and Chico-San's rice syrup replaced the prohibitively expensive maple syrup. The only soy in the product was soy lecithin. By January 1985 there were 16 distributors for the product

nationwide. Originally made in hard pack, it was also sold as a soft-serve mix starting in early 1985."

Note: At the time of this writing, the author was not aware that Rice Dream was no longer being made from koji, and that commercial enzymes were being used instead of the enzymes from koji. Address: Lafayette, California.

2890. Ballard, Bob. 1985. Ah-Soy! and Great Eastern Sun (Interview). *SoyaScan Notes*. March 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ah-Soy was launched at the NNFA show in Atlanta, Georgia, in the summer of 1984. Initial flavors were vanilla, chocolate, and original (plain). It was made by Saniku Foods in Japan and imported via Mitoku. Carob flavor was introduced in the fall of 1984. Vanilla is now the best seller because it is the most unique. The product is a "fantastic success." The four flavors account for 15-20% of Great Eastern Sun's total sales from 1,100 products. GES only sells to distributors [i.e. it is a master distributor].

Sales reports for the period 1 Nov. 1984 to 25 Feb. 1985 show the following number of units sold (there are 30 units/per case): Vanilla 210,000 units. Original/plain 110,000. Carob 105,000. Chocolate 100,000.

Other GES soyfoods that sell well: Mellow white miso (made by American Miso Co.), 35 lb tub, #9 best seller by dollar volume. Onozaki rice miso, 11 lb tub, #20 best. Mellow white miso, 15 lb tub, #20 best. Instant miso soup from Japan (ranking unknown). This month's sales are annualized. The company is now doing \$4 million/year in sales. They used to import freeze-dried tofu; the FDA forced them to change the name to "dried tofu." Shurtleff notes that he prefers the term "dried-frozen tofu."

Another best seller (about #3-5) is their White Cloud Rice Syrup It is made from rice with sprouted barley for malt. Address: Great Eastern Sun, 92 Macintosh Rd., Asheville, North Carolina 28806. Phone: 808-438-4730 or 704 252-3090.

2891. Byrne, Maureen. 1985. The future for soyfoods. The first European Soyfoods Workshop was held in Amsterdam by the American Soybean Association, and papers covered subjects from marketing to microbiological standards. *Food Manufacture (London)* 60(3):49, 51, 53. March.

• **Summary:** Contains an interesting full-page table in which Oriental soyfoods are classified into two types: Non-fermented and fermented. The non-fermented soyfoods are: Fresh green soybeans, soybean sprouts, soynuts, soymilk, soy flour, soy protein-lipid film (yuba, tou-fu-pi), soybean curd (tofu). For each food is given the local names, description, and uses.

The fermented soyfoods are: Soy sauce, miso, tempeh, natto, fermented tofu, and soy nuggets. For each fermented soyfood is given the local names, organisms used, description, and uses.

Soy sauce includes *chiang-yu* from China, *shoyu* from Japan, *ketjap* from Indonesia, *kanjang* from Korea, *toyo* and *see-ieu* from Southeast Asia.

Soy nuggets include *tau-shih* from China, *tao-si* from the Philippines, *tau-cheo* from Malaysia, *tauco* from Indonesia, and *Hamanatto* from Japan.

• **Summary:** Michigan soyfoods manufacturers include Michigan Soy Products (Royal Oak; Tofu, soymilk; 1,650

lb/week of tofu), Oryana Soy Shop (Traverse City; Cooperative. Tofu, tempeh, soysage; 275 lb/week of tofu), The Soyplant (Ann Arbor; Cooperative. Tofu, tempeh, tempeh burgers, soymilk, dofugan, soysage; 7,500 to 10,000 lb/week of tofu), INARI Ltd. (Mason; Soynuts), Michigan Farm (Bitely; Miso), Hercules, Inc. (Harbor Beach; HVP), Eden Foods (soymilk importer, which hopes to build a soymilk plant in Michigan), and Midwest Natural Foods (Ann Arbor).

“Hercules produces nonfermented soy sauce and sells its product to large final producers, such as La Choy and Beatrice Foods, located outside Michigan for sale under their labels.” This report was prepared for the Michigan Dept. of Agriculture. March 15. Address: Lansing, Michigan.

2896. Steinkraus, K.H.; Ayres, R.; Olek, A.; Farr, D. 1985. Factors influencing permeability of the cell membrane of the osmotolerant yeast *Saccharomyces rouxii* grown in the presence and absence of 18% NaCl. I. *International J. of Food Microbiology* 1(5):291-99. March. [31 ref]

• **Summary:** *Saccharomyces rouxii* is an essential microorganism in the high salt fermentations Chinese soy sauce, and Japanese shoyu and miso. It can grow and metabolize at high osmotic pressures. “Its ability to produce ethanol, glycerol and concentrate amino acid in high salt contributes to the desirable meat-like flavors of soy sauce and miso.” Address: 1-3. 2898. Belleme, John. 1985. New developments at American Miso Co. (Interview). *SoyaScan Notes*. April 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In Feb. 1984 (actually 1 Oct. 1983) John sold his ownership in the American Miso Co. to Barry Evans. Originally, John, Sandy Pukel, and Barry each owned one-third of the business. Before that, it had 6-7 owners. First Sandy (under pressure from Barry) sold his one-third to Barry, which made Barry the majority shareholder. After that, Barry let John run the company, which is doing very well in terms of productivity and profitability. They are selling all the miso they can possibly make.

At the time John sold his stock, he set up a new corporation named Just In Foods, Inc. (named after his son, Justin) to make second-generation miso products. John recently sold Just In Foods (which makes Miso Master brand products) to Barry Evans, because John doesn't own a miso plant. John is now a paid consultant for American Miso Co.

Miso Master is a marketing company for miso and miso products, and also a brand name. Chick Peaso is a mellow miso made with chick-peas instead of soybeans; it contains no soy. Introduced in May 1984, it was first sold in bulk from Great Eastern Sun but is now sold in 1-pound plastic bags.

Two tofu-miso dips were introduced in Nov. 1984; they are made by Nasoya using John's miso. They are both selling well, under the Miso Master label. Another new product is a delicious spaghetti sauce produced by Ventrillos in New York; it is made with a very mellow miso, low in salt. John sells John Troy about 35,000 lb/year of mellow miso; that's all Troy uses but Belleme does not make much money on this. Troy's miso mustard has 3-month amakuchi miso in it. John first saw this product in Fukuoka, Japan, made by Toshi Shiroozu, a man who makes mellow white miso for Eden Foods; it was in 1-pound packages, exported by Muso Shokuhin. John had a product named Mellow Ebony Miso, made with black soybeans. It was delicious but the color was grotesque, so he phased it out.

Another new non-profit organization is the Institute for Fermented Foods. Its logo is a pickle barrel with a rock on it borrowed from the book *Miso Daigaku*.

Pretty soon John is going to stop making miso. He is now training Don DeBona, who Barry sent to be trained. After that, John plans to run Barry's Just In Foods full time. John's wife, Jan, is writing a book on Japanese foods. John plans to go back to Japan for a while. Address: North Carolina.

2899. Product Name: Traditional Red Miso, Mellow White Miso, Sendai Genmai Miso, Traditional Barley Miso, Mellow Barley Miso, Amakuchi Mugi Miso, or Inaka Mugi Miso.

Manufacturer's Name: American Miso Co., Inc.

Manufacturer's Address: Box 541, Route 3, Rutherfordton, NC 28139.

Date of Introduction: 1985. April.

Ingredients: Barley: Soybeans, barley koji, sea salt, well water. Red: Soybeans, brown rice koji, sea salt, well water.

Wt/Vol., Packaging, Price: 1 lb.

How Stored: Refrigerated.

New Product–Documentation: Label. 1985. 3 by 4.5 inches. Self adhesive. Barley: Black and brown on white. Red: Red and black on white. "All natural. Unpasteurized. For over 400 delicious recipes, see *The Book of Miso* by William Shurtleff & Akiko Aoyagi." Label. 1985. 3.25 by 4

inches. Self adhesive. Blue and black on white. Fine line farm illustration. "Inaka Mugi Miso. Traditionally-made organic miso. Non-pasteurized. No preservatives. Country barley miso. Aged at least 24 months." Ad in *Macromuse*. 1984. No. 18. Winter. p. 47. And in *East West Journal*. 1985. April. p. 23. "Introducing Our 7 New Misos. Traditionally Made and Superbly Delicious." Leaflet. 8½ by 11 inches. Labels (2-color) reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center.

Labels (plastic tubs for all 7 types) sent by American Miso Co. Each 1-pound tub is 4.5 inches across the top, and 3 inches deep. Black, brown, and one other bright color on yellowish beige. Several varieties (Traditional Red, Traditional Barley) have the Miso Master logo on the lid. Ingredients for each are listed but no nutritional composition is given, so the salt content is unknown. "Traditionally-made organic miso. All natural. Unpasteurized. Refrigerate. Naturally fermented soybean paste. Made with imported Lima sea salt." Circle K Kosher. On the side of each tub is a recipe, a statement about Miso Master, and a statement about this particular type of miso. Amakuchi Mugi Miso has been renamed Sweet Barley Miso, and Inaka Mugi Miso has been renamed Traditional Barley Miso.

Letter (fax) from Don DeBona. 1997. April 20. America Miso began selling its miso in plastic tubs soon after Don took over in 1985. Initially and before that it was sold in plastic bags. Since 1996 it has been available in glass jars (10 oz) as well.

2900. American Miso Co., Inc. 1985. Introducing our 5 misos. Traditionally made and superbly delicious (Ad). *East West Journal*. April. p. 23.

• **Summary:** This half-page, black-and-white ad begins: "The American Miso Company is proud to present its own domestic organic misos. From the choicest cultured organic rice or barley and whole organic soybeans, to our deep well water and pure sea salt, we use only the finest ingredients available. Then naturally aged in wood... Because all our misos are unpasteurized and high in enzymatic activity, refrigeration is recommended." The five are: Traditional red miso. Mellow white miso. Traditional barley miso. Mellow barley miso. Inaka mugi miso (Country barley miso). The American Miso Company logo, crossed sheaths of grain in a circle, is in the lower right corner. Address: Box 541, Route 3, Rutherfordton, North Carolina 28139. Phone: (704) 287-2940.

2901. Estella, Mary. 1985. Natural foods cookbook: Vegetarian dairy-free cuisine. Briarcliff Manor, NY, and Tokyo: Japan Publications. 250 p. April. Color plates. Index. 26 cm. [22 ref]

• **Summary:** This macrobiotic cookbook, though free of dairy products, uses fish in many recipes. In the chapter

titled "Getting Started" there is a section on "Soy Foods" (p. 26-27) which begins by stating that "Soybeans, the king of beans, are ironically not often eaten as whole beans, but instead are processed into miso, shoyu, tofu, tamari, and tempeh." Each of these foods are discussed briefly. Three types of soy sauce are defined: Shoyu, tamari, and commercial soy sauce (which is said to be artificially colored and processed). Chapter 7, titled "Whole grains, beans, tofu and tempeh" contains 7 tofu and 7 tempeh recipes. There are a large number of soy-related recipes throughout the book, including those using miso, black soybeans, and tamari.

2902. Shurtleff, William; Aoyagi, Akiko. 1985. Soyfoods industry and market: Directory and databook 1985. 5th ed. Lafayette, California: Soyfoods Center. 220 p. Index. April. 28 cm. Updated every 1-3 years with a bibliographic supplement. [360 ref]

• **Summary:** Contents: 1. Introduction. 2. Directory of soyfoods manufacturers. 3. Directory of soyfoods support industry: Goods & services. 4. The many types of soyfoods. 5. Historical: Historically most important books and serials, earliest references to individual soyfoods. 6. Year in review. 7. Soyfoods industry and market in the U.S. 8. Tofu industry and market in the U.S. and Canada. 9. Soymilk industry and market: Worldwide and in the U.S. 10. Tempeh industry and market in the U.S. 11. Soy sauce industry and market in the U.S. and Japan. 12. Miso industry and market in the U.S. and Japan. 13. Soynut industry and market in the U.S. 14. Natto industry and market in Japan. 15. Statistics on fermented soyfoods in East Asia. 16. Soyfoods in restaurants, delis & cafeterias. 17. Soybean crushing industry in the U.S. 18. Soy oil industry and market in the U.S. 19. Soy flour and cereal-soy blends industry and market worldwide. 20. Modern soy protein products industry and market in the U.S. 21. Soyfoods terminology and standards. 22. Names of soyfoods in major foreign languages. 23. Soybean production worldwide and country-by-country. 24. Key institutions working with soyfoods worldwide. 25. Measures, weights, and equivalents. 26. About the Soyfoods Center & soyfoods consulting services. 27. Bibliography.

In February 1977 a Gallup poll in America showed a remarkable shift in the public's awareness of and attitudes toward soyfoods. The sampling of 1,543 adults across the nation found that: 33% believe that soybeans will be the most important source of protein in the future—ahead of fish at 24% and meat at 21%. 55% believe that "soy products have a nutritional value equal or superior to that of meat." 54% reported that they "had eaten foods containing soy protein as a prime ingredient within the past 12 months." Younger age groups living in large cities and those with college or university educations had the most favorable attitudes toward soy protein, indicating that support for

soyfoods is likely to grow in the future. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2903. *Asahi Shinbun (Asahi Daily News, Tokyo)*. 1985.

Enbun 1% no miso kaihatsu: Konnyaku o riyō shite. Datsuen [Marudai has developed 1% salt miso: Removed the salt, added konnyaku]. May 12. [Jap]

• **Summary:** Marudai Miso Co. will sell this low-salt miso under the Marutin brand to food processing companies. The story also appeared in *Toyo Shimpo* (May 21).

2904. Kushi, Michio; Jack, Alex. 1985. Diet for a healthy heart. *East West Journal*. May. p. 34-38.

• **Summary:** "In the Middle Ages, the Black Death [bubonic plague] earned its reputation by killing about one-third of the population of Europe. Today, cardiovascular disease claims the lives of over 50 percent of the people in the United States and in many other advanced industrial societies... heart disease is more deadly than all other modern scourges combined, including cancer and loss of life from car accidents, crime, and war..."

"One out of every five men in this country will have a heart attack by age sixty... This year, according to the American Heart Association, 1.5 million Americans will have a heart attack, and 550,000 of them will die."

According to Marstow and Page (1978. *National Food Review*. Dec. p. 28-33. "Nutrient content of national food supply), the fat in the American diet comes from the following sources:

43% cooking and baking fat, salad oils, butter, and margarine.

34% red meat, poultry, and fish.

12% dairy products, not including butter.

4% beans, peas, nuts, soy flour, grits.

4% grains, vegetables, fruits.

3% eggs.

The authors believe that a macrobiotic diet based on natural foods (including miso soup and tofu) can largely prevent heart disease.

2905. Mori, H. 1985. Shōwa 57 nendo ni okeru shōyu, miso no kenkyū gyōseki [Review of annual achievements in shoyu and miso research]. *Nippon Jozo Kyokai Zasshi (J. of the Society of Brewing, Japan)* 78(5):328-59. [766 ref. Jap]

• **Summary:** This important Japanese-language article, published each year in the May issue of this periodical, has two parts: (1) A review of the past year's major discoveries and developments in the fields of miso and soy sauce in Japan. (2) A bibliography related to those discoveries and developments. Address: Noda Sangyo Kagaku Kenkyusho.

2906. *Natural Foods Merchandiser*. 1985. 6th Annual Natural Foods Merchandiser Merchandising Awards. May. p. 1, 48, 49.

• **Summary:** Three soy products won awards. A color photo shows each. Gold: Naturally Preferred Miso Mustard by American Natural Foods, Malted by Westbrae; Silver: Ah Soy by Great Eastern Sun. Color photos show all three products.

2907. **Product Name:** Soft Tofu Cheese (Non-Dairy Cream Cheese / Soft Tofu-Miso Dip) [Plain, or Herb].

Manufacturer's Name: Simply Natural, Inc.

Manufacturer's Address: P.O. Box 295, Norma, NJ 08347.

Date of Introduction: 1985. May.

Ingredients: Tofu, sweet white miso, seasonings.

Wt/Vol., Packaging, Price: 8 oz round plastic container. \$2.59 retail.

How Stored: Refrigerated.

Nutrition: Per 1 oz.; 43 calories.

New Product–Documentation: Spot in Natural Foods Merchandiser. 1987. June. p. 64. “Tofu Cheese.” The product is similar to cream cheese. Ad in Natural Foods Merchandiser. 1986. Oct. p. 18. “So Who Needs Cream Cheese Any More? Mama Would Approve... Can be used in place of cream cheese and ricotta cheese.” Also ad in Vegetarian Times, Dec. 1986. p. 9. This address is given as Simply Natural, Inc., Norma, New Jersey 08347. Label. 1986. 4.5 inches diameter plastic lid. Green and purplish red on white. “A Non-Dairy Cheese Substitute. Spreads smoothly. Ideal on breads, bagels, crackers, on sandwiches, in dips and in sauces.” Spot in Soya Newsletter. 1987. 1(4):6. New Onion / Chive or Garlic flavors.

Spot in Gourmet Today (Birmingham, Michigan). 1987. Aug. The founders of Simply Natural Inc. are Bob Pirello and Christina Hayes. Talk with Christina Hayes Pirello. 1988. May 11-12. See Brief History of Simply Natural, Inc. This product is a creative product made by wrapping firm tofu in cheesecloth and embedding it in sweet white miso, then blending / pureeing it. Sold initially as a catering item, it was first sold commercially in May 1985.

Note: This is the earliest record seen (April 2001) concerning Simply Natural, Inc.

2908. Tanaka, Nobumasa; Kovats, Susan K.; Guggisberg, Jean A.; Meske, L.M.; Doyle, M.P. 1985. Evaluation of the bacteriological safety of low-salt miso: A research note. *J. of Food Protection* 48(5):435-37. May. [12 ref]

Address: Nihon Yuki Nogyo Kenkyukai Jonin Kanji.

2910. American Natural Foods. 1985. You're gonna' love that Smoky Mountain twang (Ad). *Vegetarian Times*. June. Inside rear cover.

• **Summary:** This is a full-page color ad (copyright 1984) for Smoky Mountain Sizzlin', an all-natural barbecue sauce. The left half shows the large glass bottle and label, with the Great Smoky Mountains in the background. The right half of the ad talks (in colorful Appalachian hillbilly style) about the origins of barbecue, and the product. “Probably the best barbecue in America comes from the Great Smoky Mountains. Ever since the Cherokee ladies were gracious enough to teach the new settlers their cookin' secrets, there's been some all-mighty sweet smoke mixin' down along the hollows with the mist and the mountain laurel. That's what new Smoky Mountain Sizzlin's all about. Mixin' sweet smells, good times and powerful fine eatin.'”

This sauce is “made from real special things Red ripe tomatoes, virgin peanut oil, molasses, and a secret bunch of natural herbs and spices. And apple cider vinegar and red miso, both made and wood aged right here in the Great Smokies. It's all natural and all mighty delicious.” Note: The fourth ingredient is red miso (made in North Carolina) and the sixth is tamari soy sauce. Address: Suite 21 The Courtyard, Chapel Hill, North Carolina 27514. Phone: (919) 929-0113.

2911. Kushi, Aveline; Jack, Alex. 1985. Aveline Kushi's complete guide to macrobiotic cooking: For health, harmony, and peace. New York, NY: Warner Books. xvii + 414 p. June. Illust. Index. 23 cm. [36 ref]

• **Summary:** Index entries include: Miso 61, Tofu 50, Tamari 19, Tempeh 17, Whole dry soybeans 6, Natto 3, Soymilk 3, Yuba 1. This book calls ganmodoki “Tofu Croquettes” and further states that “*Gan* means ‘crane’ and *modoki* means ‘looks like.’” Among the 31 chapters are ones titled Beans (incl. basic black soybeans, and brown rice with black soybeans); Tofu, Tempeh, and Natto (including yuba); Sea Vegetables; Condiments and Garnishes (incl. miso), and Fish and Seafood.

Under “Black Soybeans” (p. 257) were read: “These nice shiny beans are also called Japanese black beans. They have a strong, delicious taste. Their juice is said to make the voice clear and beautiful. Throughout Japan, mothers prepare their children for music tests and singing lessons with this dish. Black soybeans are also used medicinally to help discharge animal toxins from the body.” Note: This is the earliest macrobiotic cookbook seen that uses the term “Black soybeans” in a recipe title. All previous macrobiotic cookbooks called them “Black beans.”

Contains recipes for homemade tofu, tempeh, and natto. Address: Brookline, Massachusetts.

2912. Miller, Deborah. 1985. Taking the mystery out of miso. *Whole Foods (Berkeley, California)*. June. p. 43-44. [3 ref]

• **Summary:** An introduction to miso.

2913. **Product Name:** Westbrae Natural Tofu Ramen. Instant Asian-Style Whole-Wheat Noodles & Miso Flavor Broth.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1985. June.

Ingredients: Asian style noodles: whole wheat flour, sifted wheat flour, and sea salt. Vegetable broth: powdered shoyu (soybeans, wheat and sea salt), dried tofu (soybeans, nigari bittern), shiitake mushroom powder, kombu seaweed powder, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.

Wt/Vol., Packaging, Price: 3.1 oz (90 gm).

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Red, green, white, brown on yellow. Color picture of bowl of Tofu Ramen.

2914. Belleme, John. 1985. Update on American Miso Co. (Interview). *SoyaScan Notes*. July 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** About 18 months ago [in Feb. 1984] John sold his interest in American Miso Co. to his partner, Barry Evans. Barry now owns all of the company; he is not interested in teaching interns. The company's core market is hard-core macros. They must sell 500,000 pounds/year just to break even. Address: P.O. Box 457, Saluda, North Carolina 28773.

2915. **Product Name:** Naturally Delicious Fried Rice Sandwich (With Tofu).

Manufacturer's Name: Naturally Delicious.

Manufacturer's Address: Asheville, North Carolina. Phone: 704-253-7656.

Date of Introduction: 1985. July.

Ingredients: Organic brown rice fried with scallions and soy sauce, wrapped in a whole wheat tortilla with steamed organic carrots, alfalfa sprouts, miso tahini sauce, tofu, green leaf lettuce.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Unrefrigerated and perishable.

New Product–Documentation: Label sent by Paul Duchesne. 1989. Aug. 11. Handwritten "Naturally delicious. Made fresh today. To eat; peel back wrapper from one end." Talk with Paul Duchesne. 1989. Aug. Barbara Svenning originally learned how to make this sandwich from Paul. She made it at the Natural Cafe in Santa Fe, New Mexico,

with her husband Marty Roth. When she separated from Marty, she moved to Asheville, North Carolina, where Jack Garvey (a former husband) and her children were living. She made a line of at least 28 Fried Rice Sandwiches (many of which contain tofu) and whole meals, which she sold at various places.

Talk with Dinner for the Earth. 1989. Aug. 15. This is a natural food store and deli that has been in business for 13 years and has sold Barbara's line of sandwiches for 3-4 years. In April 1989 Barbara Svenning became manager of the Deli at Dinner for the Earth (160 Broadway St. Phone: 704-253-7656). She lives in Black Mountain, North Carolina.

Talk with Barbara Svenning. 1989. Aug. 21 and 23. It was a coincidence that Great Eastern Sun was established in Asheville. Barry Evans was partners with Sandy Pukel and Michio Kushi. They had a miso factory [American Miso Co.] in North Carolina and they wanted to establish GES near it. Marty suggested Asheville, since it was a good location and he could live their near his wife's children (Jack Garvey lived in Asheville). Barbara did not make her brown rice and tofu sandwiches while Marty was working at Great Eastern Sun. After Marty Roth had set up Great Eastern Sun in Asheville, North Carolina, he continued to live in nearby Black Mountain but worked for Chico-San for a while and set up the Ohsawa America mail order program for Bob Kennedy. Then he began working for Westbrae in California, where he and Barbara and her son relocated. After 2 years, in July 1985, when her son was age 3, she left Marty Roth (they had never been married), and returned by herself to Asheville, North Carolina to be with her two other children. In Asheville, she established a new company named Naturally Delicious. She ran it out of some else's kitchen and sold 12-15 sandwiches a day at only one store, Nothing But Natural, which promised to tell any health inspectors that the sandwich was made in their kitchen. During that time another woman, Barbara Hoffman, who now lives in Israel, sort of took over the sandwich business. When Nothing But Natural went out of business, she moved to Black Mountain (where she still lives), got her own kitchen, and sold the sandwich exclusively to Dinner for the Earth, where she now runs the deli. Yet she still owns the brown rice sandwich business. She makes them at home and sells them to Dinner for the Earth. "Its still my little baby, still an underground business. I make about 15 fresh each day and they are different every day. Only the chapati, fried rice, and lettuce are the same. I make a Mexican, and Indonesian, a Chinese, etc. Not all contain tofu. Sometimes its a tofu sauce, or barbecued or baked tofu. I guarantee the sale and take back any not sold that day. There is a profit of about \$1 each. I also make another nice wheat-free tofu sandwich called Barbecued Tofu on Millet. It's on square slices of millet bread. It started it about 6 months ago."

2916. Westbrae Natural Foods. 1985. Distributor catalog, FOB pricing: Aug. 1, 1985. Emeryville, California: Westbrae. iv + 11 + [7] p. 22 by 28 cm.

2920. **Product Name:** Premier Japan Miso Marinade.
Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.
Manufacturer's Address: P.O. Box 3150, Union, NJ 07083.

Date of Introduction: 1985. August.

New Product–Documentation: Spot in *Natural Foods Merchandiser*. 1985. Aug. "All natural." In glass jar.

2921. Gipson, Beckilynn. 1985. Processed proteins: Markets, developments. Business Communications Co., Inc., 9 Viaduct Rd., P.O. Box 2070C, Stamford, CT 06906. 112 p. Aug. Report GA-043R. *

2922. *Hawaii Beverage Guide (Honolulu)*. 1985. New food & beverage director for Ala Moana Americana Hotel. Aug.

• **Summary:** Raymond Glory Jr. is the new director. This Hawaiian hotel has a restaurant named the Mango & Miso restaurant.

2923. Hesseltine, C.W. 1985. Fungi, people, and soybeans. *Mycologia* 77(4):505-25. July/Aug. [92 ref]

• **Summary:** In this Mycological Society of America Annual Lecture, presented on 7 Aug. 1984 at Colorado State University (Fort Collins, Colorado), Dr. Hesseltine gives a nice history of the research conducted by him and others at the Northern Regional Research Center (NRRC) on Asian soybean fermentations, including fermented tofu (Frank Meyer, early USDA plant explorer, in a letter dated 21 Nov. 1916, states: "Parcel No. 125c contains first quality Chinese soybean cheese: please taste a little on the point of a knife; it is extremely appetizing."), sufu, shoyu, miso, tempeh, Chinese black beans (soy nuggets), natto, and "the use of lactic acid bacteria to produce a yogurt product from soybeans." He also studied non-fermented tofu.

Dr. Hesseltine pays a nice tribute to the work of Dr. A.K. Smith of the NRRC (p. 506-07). After his trip to East Asia shortly after World War II, Dr. Smith (a protein chemist) made great efforts to promote cooperation between the USDA, particularly the NRRC, and Japan in conducting research to understand how our exported soybeans were used for food. He had the foresight to recognize the importance of studying soybeans used in such huge quantities for processing into human food. Dr. Smith was instrumental in arranging for two Japanese scientists (Dr. Tokuji Watanabe and Dr. Kazuo Shibasaki) to come to the NRRC to do research on tofu and miso. "This really began a new era of research on use of Oriental methods to produce foods from soybeans."

Also discusses how Ko Swan Djien came to the NRRC in 1960 for 6 months and ended up studying the tempeh fermentation process and microorganisms (leading to a focus on *Rhizopus oligosporus*).

Photos show four famous Japanese scientists who studied fermented foods: (1) Prof. Teizo Takahashi. (2) Ryoji Nakazawa. (3) Kin-ichiro Sakaguchi. (4) Kendo Saito. Address: NRRC, ARS/USDA, Peoria, Illinois.

2924. *Natural Foods Merchandiser*. 1985. New products, changing diets propel soyfood sales. Aug. p. 1, 39-40, 42-44.

• **Summary:** "The soyfoods revolution is being fueled by several powerful trends... Many consumers are attracted to soyfoods because they are an excellent no-cholesterol 'replacement' for meat and dairy products. Soyfoods are also growing with the rising tide of macrobiotics, which promotes the use of various soy products. And there are now enough soyfoods on the market to create synergy within the category: consumers buying soymilk try tofu, and go from tofu to tempeh.

"Tofu is by far the best-selling product in the soyfoods category, according to figures provided by the Soyfoods Association [and Soyfoods Center]. An estimated \$60 million worth of tofu is produced and sold in the U.S. annually, while frozen tofu desserts, entrees, and prepared products account for approximately \$25 million. Soymilk

sales have jumped from near zero a few years ago to \$10 million today, while tempeh is an emerging growth category at 5 million in yearly sales." All of the retailers interviewed by NFM indicated that the soymilk category is experiencing major growth. Most of the growth has been in six-ounce aseptic individual serving packages supplied by such companies as Westbrae, Ah Soy, Vitasoy and Eden. Health Valley's Soy Moo has recently been repackaged in a 8.45-ounce package.

"Tempehworks produces approximately 7,000 pounds of tempeh a week during peak months, including that used in its processed tempeh products, such as Fakin' Bacon, New York Style Strami and Kansas City Barbecue."

Includes "A directory [sic, glossary] of soyfoods terminology" that defines tofu, tempeh, soybean, miso, soymilk, shoyu/tamari, TVP or TSP, soy protein isolate, defatted soy flour, and "secondary" soyfoods products.

11. After the master: Part two: Japan. 12. After the master: Part three: Europe and elsewhere. 13. The gospel according to Kushi. 14. Macrobiotics in western culture. 15. Prospects for the future. Bibliography.

This is the best and most objective available history of macrobiotics. The author, an excellent historian and writer, with a delightful sense of humor and light touch, began his study and practice of macrobiotics under Michio Kushi in Boston in Jan. 1967. This book is based on his doctoral dissertation titled "Georges Ohsawa and the Japanese Religious Tradition," submitted on 1 April 1981 for a PhD degree in History of Religions from Harvard University. Pages 185-86 discuss briefly the role of the macrobiotic movement in introducing soyfoods (especially miso, shoyu,

and tofu) and natural foods to America. Address: The New North Church, Hingham, Massachusetts (18 Mar 1985).

2930. Kotsch, Ronald E. 1985. The origins of the Lima Food Co. at St. Martin-Latem, Belgium (Document part). In: R.E. Kotsch. 1985. *Macrobiotics: Yesterday and Today*. Tokyo and New York: Japan Publications Inc. 292 p. See p. 131-32.

• **Summary:** During the late 1950s, George Ohsawa lectured in Paris and Brussels, before he made his first trip to the USA. His lectures in these two cities attracted several hundred listeners and made them his two main bases of support in Europe. Over the next few years, the macrobiotic community grew in Paris and Institut Tenryu became an active study center which also provided macrobiotic foods; In Brussels, there was a study center, restaurant, and food outlets. "In addition to Brussels, St. Martin-Latem became a focus of activity. In this small town near Ghent a noted Belgian painter named Edgar Gevaert lived with his large family. Gevaert had been a soldier in the First World War and afterwards bought a piece of sandy wasteland in the countryside. He made it into a near self-sufficient homestead, living there with his wife and eleven children and pursuing his art. He was active in the World Federalist Movement and it was through this connection that he met Ohsawa. Gevaert adopted Ohsawa's macrobiotic outlook and did a great deal to help activities. In 1959, with the cooperation of his eldest son [Pierre], he established the Lima Food Co. at St. Martin-Latem. This was the first explicitly macrobiotic food company outside Japan. Kaoru (Clim) Yoshimi and Fujiko (Ellie) Sugamoto came, at Ohsawa's request, from India to teach cooking, miso-making, and other macrobiotic food techniques. Lima Products flourished, soon distributing food all over Europe and to the United States. It has remained to this day a leader in the production and distribution of macrobiotic quality food in Europe." Address: The New North Church, Hingham, Massachusetts (18 Mar 1985).

2931. Kotsch, Ronald E. 1985. Noboru Muramoto (Document part). In: R.E. Kotsch. 1985. *Macrobiotics: Yesterday and Today*. Tokyo and New York: Japan Publications Inc. 292 p. See p. 180-1, 187. 26 cm. [1 ref]

• **Summary:** Noboru Muramoto, who has helped to promote macrobiotics on the West Coast of the USA, arrived in California in 1971. An associate of George Ohsawa from Japan and an expert on medicinal herbs, his popular book titled *Healing Ourselves* was published in 1973 by Michel Abehsera's Swan House Press; it introduced many therapeutic uses of food. A student of traditional Japanese food production, Muramoto now lives in southern California, where he produces high quality sea salt, miso, umeboshi, and plum vinegar. Address: The New North Church, Hingham, Massachusetts (18 Mar 1985).

2932. McSweeney, Daniel. 1985. Consumer survey 1985. *Whole Foods*. Sept. p. 23-27.

• **Summary:** The percentage of respondents who purchased a type of product at a natural foods during the past 12 months, in descending order of popularity: Tofu 64.5%. Miso 50%. Sea vegetables 37.9%. Non-dairy ice cream 37.9%. Frozen tofu entrees 21.7%. Note: The sample size is not given.

2933. **Product Name:** [Big Dream Time Powdered Tempeh].

Foreign Name: Taimu Taimu.

Manufacturer's Name: Nakasho Bussan.

Manufacturer's Address: Japan.

Date of Introduction: 1985. September.

Wt/Vol., Packaging, Price: Bottle.

New Product-Documentation: Toyo Shinpo (Soyfoods News). 1985. Sept. 21. p. 8. "New tempeh product announced. Nakasho Bussan to sell it [powdered tempeh]." This new product called Taimu Taimu (Time + Big Dream) was developed by the Japan Natto Assoc. It is their first commercial product. A 450 gm (1 lb) bottle sells for 6,000 yen (\$26.67). Use it in miso soup, milk, juices or just mix with hot or cold water.

2934. S&S Public Relations, Inc. 1985. Miso-Japan's 1,000 year old health and flavor secret now in America (News release). 40 Skokie Blvd., Suite 430, Northbrook, IL 60062. 3 p. + photo. Oct. 6.

• **Summary:** About miso, American Natural Foods, and their new line of four products. A black-and-white photo shows a bottle of The Works. An attachment, titled "Cooking with miso-General principles," was developed by Just In Foods [American Miso Co.] in 1984. Note: This news release generated widespread publicity for ANF. Address: Northbrook, Illinois. Phone: 312/291-1616.

2935. Belleme, John. 1985. Shedding light on the miso story. *MacroMuse*. Autumn. p. 29-31.

• **Summary:** A discussion of what factors influence the taste, medicinal qualities, and nutritional value of different types of miso. By far the most important influences on all three are the manufacturing methods and the quality of the ingredients. Basically there are three methods of making miso. In descending order of quality they are: traditionally made, naturally aged, and temperature controlled. The author estimates that less than 1% of Japanese miso is traditionally made—that is, using handmade koji in a unheated koji room. "In this uniquely constructed room, heat and humidity naturally generated by the fermenting grain are carefully monitored for 48 hours until the mature koji, covered with a fluffy, white, glistening mycelium, is sweet and loaded with powerful enzymes." Making koji in

this way is a labor-intensive process requiring much skill and stamina.

The second type of miso, “naturally aged,” is actually commercial miso that was especially developed for the American natural foods market. The process is usually automated and every effort is made to keep out wild microorganisms. The soybeans are rapidly cooked and cooled, while the koji is made automatically in large, stainless steel rooms. Hand labor is kept to a minimum to reduce costs and the need for experienced workers. The finished miso has a “uniform taste, color, and texture and is usually sold pasteurized in one-pound plastic bags which need no refrigeration.”

The lowest quality miso, temperature controlled commercial miso, accounts for 99% of the miso made in Japan.

With few exceptions, miso can be divided into two large groups based on color and taste. Sweet miso is usually light in color, while salty miso is usually dark in color. “When considering miso quality, some macrobiotic teachers insist on using miso aged at least two years. Miso aged less than this is considered ‘unnatural.’” But the author believes that people who say this are unknowingly comparing temperature controlled to naturally aged miso, for “there is no evidence, either traditional or scientific, that sweet, light miso is inferior to dark, salty miso. In fact, miso that is aged too long, regardless of the type, rapidly deteriorates in taste, color, aroma, enzymatic activity, and nutritional value.”

“My point is simple: what actually determines the color, taste, and overall quality of miso is not aging but proper aging. And what determines proper aging is recipe and climate.” Each type of miso has its own use. “While dark, long-aged miso is excellent for hearty winter cooking, sweet light miso is great in summer soups, dips, sauces, and salad dressings.” In short: “When choosing miso, look for organic, traditionally made, unpasteurized miso.”

Photos show: (1) Jan Belleme (with baby Justin on her back) and Bob Zullo inoculate steamed barley with *Aspergillus* mold to make barley koji at the American Miso Co. (2) Jan checks the finished barley koji in wooden trays. (3) Bob Zullo prepares to empty 8,000 lb of two-year barley miso from a large wooden vat.

“John Belleme lives with his wife Jan in Rutherfordton, North Carolina, where they have been involved with the American Miso Company.” He is president of Just In Foods, producer of miso products. Address: Rutherfordton, North Carolina.

2936. **Product Name:** Tofu Tortellini.

Manufacturer’s Name: Ithaca Soy.

Manufacturer’s Address: 403 N. Plain St., Ithaca, NY 14850.

Date of Introduction: 1985. October.

Ingredients: Dough mixture: Durum flour, semolina, water, tomatoes (red pasta), spinach (green pasta). Filling: Organically grown soybeans, water, rice miso, spices, tofu made with calcium sulfate.

Wt/Vol., Packaging, Price: 16 oz in clear plastic wrapper with a stick-on paper label.

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1985. “Great hot with sauce and in soups! Delightful cold in marinated salads.” Product Alert. 1985. Oct. New Product News. 1988. Dec. 9. “A 4 oz. package is sold nationally in health food stores.” Soya Newsletter. 1988. Nov/Dec. Gives company name as Ithaca Soyfoods Co. Pasta is tri-colored: tomatoes color red and spinach colors green. Now sold frozen. Contact: David Scovronick.

2937. **Product Name:** Buckwheat Ramen with Miso Soup. **Manufacturer’s Name:** Soken Trading, Inc. (Importer). Made in Japan.

Manufacturer’s Address: 591 Redwood Highway, Suite 2125, Mill Valley, CA 94941.

Date of Introduction: 1985. October.

New Product–Documentation: Spot in NASFT Showcase. 1985. Oct. “Soken Trading, Inc.” Announces new packaging for its ever popular Buckwheat Ramen with Miso Soup. A photo shows the new package.

2938. Jenkins, Nancy Harmon. 1985. In pursuit of the perfect ingredient: Food shops. *New York Times*. Nov. 3. p. SMA8.

• **Summary:** When exploring New York’s ethnic food markets one is bound to find surprises and new, delicious foods and ingredients. The section titled “Chinese” notes that Kam Man Food (200 Canal St., in Chinatown—south central Manhattan) “offers a choice of Chinese teas, preserved vegetables and bottled condiments including red, black, and yellow bean pastes, fish and shrimp sauce and hoi sin [hoisin] sauce.

Note: Red bean paste is typically made from azuki beans. Black bean paste and yellow bean paste are typically made from soybeans,

2940. King, Kathryn H. 1985. Company’s product works for flavor. *Triangle Business* (North Carolina). Nov. 11-17.

• **Summary:** About John Troy and American Natural Foods. When John and his wife was producing natural candy bars, he learned that a miso plant was being built in Rutherfordton, North Carolina. He went to visit, and based on that visit he gathered together a group of investors to

create American Natural Foods 18 months ago. The 30 shareholders collected \$500,000 to start the company. Some of them also take an active part in running the company.

2941. **Product Name:** Premier Japan All Natural Miso [Mugi, or Rice].

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: New Jersey.

Date of Introduction: 1985. November.

New Product–Documentation: Total Health. 1985. Nov. p. 40.

2942. **Product Name:** Grainwave Miso Mochi.

Manufacturer's Name: Grainwave.

Manufacturer's Address: 6726 West Coast Rd., Sooke, BC, V0S 1N0, Canada. Phone: 604-642-4424.

Date of Introduction: 1985. November.

Ingredients: Sweet brown rice, water, miso (soybeans, salt), sesame seeds.

Wt/Vol., Packaging, Price: 250 gm.

How Stored: Refrigerated.

New Product–Documentation: Label. 1985. 4 inches square. Self adhesive. Red and yellow on white. "Ready to eat in 5 minutes. Whole grain. Cut with sharp knife and broil, fry, or bake until golden."

2943. Jackson, Vicki. 1985. Squirrels vegetarian cook book no. 2. Oneness Life Press, Elizabeth St., Brisbane, Queensland, Australia. 156 p. Illust. by Vicki Jackson. Index. Nov. 29 cm.

• **Summary:** This hand-lettered cookbook was written for Squirrels Restaurant, 190 Melbourne St., West End (Brisbane) 4141, which has been open for more than 3 years. The first vegetarian cookbook from this restaurant was published in Nov. 1983.

Soy-related recipes include: Miso & green vegetable soup (p. 8). Tempeh & beanshoot (p. 42). Lemongrass and tofu curry (p. 87). Tempeh kebabs (p. 94). Tempeh burgundy (p. 95). Tempeh & coconut sauce (p. 96). About tofu (p. 97-98). Tofu & Spinach pie (p. 98). Tofu teriyaki & fried rice (p. 99). Tofu à la king (p. 100). Tofu stroganoff (p. 101). Tofu chow mein (p. 102). Tofu nuggets in chick pea batter (p. 103). Curried tofu loaf (p. 104). Pages 149-50 describe tamari, tempeh, tofu, and miso. Address: Brisbane, Queensland, Australia.

2944. **Product Name:** Soup 'n Savor, Miso-Brown Rice Soup Mix [Hearty Miso-Vegetable, Miso-Onion, or Pilaf Dinner (Quick Brown Rice with Miso and Vegetables)].

Manufacturer's Name: Lundberg Family Farms.

Manufacturer's Address: P.O. Box 369, Richvale, CA 95974.

Date of Introduction: 1985. November.

Ingredients: Miso-Onion: Steamed, flaked long grain brown rice, dehydrated onions, miso (soybeans, salt, water), soy sauce (soybeans, wheat, salt, water), garlic powder.

Wt/Vol., Packaging, Price: Two foil packets in paperboard box.

How Stored: Shelf stable.

New Product–Documentation: Labels. 1985, undated. 1 box each. 3.5 by 5 inches, color. "Quick! Twin pack! Cooks in 5 minutes. All natural ingredients." Spot in Food Distributors Magazine. 1985. Nov. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Ad in Natural Foods Merchandiser. 1987. Dec. p. 25. "Soup'n Savor (Miso-Onion, and Miso Vegetable)."

2945. **Product Name:** Nasoya Creamy Tofu Dressing [Sesame Garlic, Fine Herbs, or Italian].

Manufacturer's Name: Nasoya Foods, Inc.

Manufacturer's Address: 23 Jytek Park, (P.O. Box 841), Leominster, MA 01453.

Date of Introduction: 1985. November.

Ingredients: Sesame Garlic: well water, Nasoya tofu, coldpressed sunflower oil, wood-aged apple cider vinegar, tahini (sesame paste), rice syrup, organic miso, coldpressed sesame oil, dehydrated garlic, seasalt, natural vegetable gum, dehydrated parsley. Fine Herb: Prepared mustard (vinegar, water, mustard salt, turmeric, spices, natural flavor), herbs (basil, rosemary, marjoram).

Wt/Vol., Packaging, Price: 12 oz glass jar.

How Stored: Shelf stable.

Nutrition: Per 14 gm.: Calories 40, protein 1 gm, carbohydrate 1 gm, fat 3 gm.

New Product–Documentation: Labels. 1985. 2.75 by 3.25 inch oval. Green, brown, red or orange on white. Vegetables on table illustration. "Non dairy. Nothing artificial." Ad in Vegetarian Times, Aug. 1986, inside rear cover.

"Introducing Nasoya Creamy Tofu Dressings and Nasoyanise." Ad in East West. 1986. Nov. p. 83, and in Vegetarian Times. 1986. Nov. p. 33. "Introducing... 2 New Ways to Enjoy the Goodness of Tofu!" Contains 25% tofu. Letter from Sjon Welters. 1989. July 24. The product pull date is code dated, month of production plus 12 months. The original ingredients have changed. A dill flavor was introduced in about Oct. 1986.

Letter from John Paino of Nasoya. 1990. Sept. 25. The company offices were moved from Mechanic St. Ext. to 23 Jytek Park in Dec. 1984; the plant was moved in March 1985.

2946. Nihei, Takao. 1985. Zoku: Hawai ni okeru Nihon-shu no rekishi. Hawai kanyaku imin hyaku-nen ni yosete [A history of Japanese sake in Hawaii. On the hundredth anniversary of Japanese immigration to Hawaii]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 80(11):786-89. Nov.; 80(12):838-842. Dec. [33 ref. Jap]

• **Summary:** In 1868, the first year of the Meiji Period, the first 153 Japanese immigrants arrived in Hawaii on board the three-masted sailing ship Scioto (Saioto-go). They brought with them miso and shoyu. During the 1880s, because of the shortage of laborers to harvest sugar cane, the governments of Japan and Hawaii signed a contract allowing Japanese to immigrate to Hawaii. The first boatload of 944 Japanese arrived on 8 Feb. 1885. These two groups and their descendants introduced sake and soyfoods to Hawaiian culture. A photo shows the “Honolulu Japanese Sake Brewing Co.” in 1908.

Note: This document contains the earliest date seen for soybean products (miso and shoyu) in Hawaii (1868); soybeans as such had not yet been reported by that date. Address: Honolulu Shuzo Seihsu Gaisha.

2947. Ozora, Colleen. 1985. Of Granum and macrobiotics: A visit with Blake Rankin. *Macrobiotics Today (Oroville, California)*. Nov. p. 3-7.

• **Summary:** In 1969, while a student at UCLA, Blake Rankin came in contact with Erewhon—Los Angeles. After graduation from UCLA he and several friends set up a small health food store in Victoria, BC, Canada. Then he spent 3 months in Boston living in a Kushi study house and working in an Erewhon warehouse. Back in Seattle, he worked at Spiral Foods, an offshoot of Chico-San. Shortly after that he and George Gearhart, the proprietor, closed the store and in 1972 opened a wholesale company, Janus Foods. It was successful. [Note: Miso and shoyu, imported from Japan, were among the company’s best-selling products.] After 2 years Rankin left and went to Japan for 6 months, where he traveled with Mitoku and Muso. Mr. Kazama, a friend of Aveline Kushi’s brother, had not been in the food business before starting Mitoku. Then he went to Nepal and India on a spiritual search. In late 1973 he returned to Seattle and worked for Janus. Then he returned to Japan where he worked for Mitoku and studied calligraphy. In Japan he met his future wife, Yoko. Returning to Seattle, Rankin started Granum in 1981 as a distributor and importer for Mitoku products from Japan. Now the import company has a small retail store and a 10,000 square foot warehouse. Expected 1985 gross is more than \$500,000.

This article contains numerous photos of Blake and Yoko Rankin, and their two children. Address: GOMF, Box 426, Oroville, California 95965.

2948. Saio, Kyoko; Suzuki, H.; Kobayashi, T.; Namikawa, M. 1985. Microstructural changes in winged bean and soybean during fermentation of miso. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku (Report of the National Food Research Institute)* No. 47. p. 272-79. Nov. [11 ref. Eng; jap]

• **Summary:** Winged-bean miso was prepared by substituting winged beans for soybeans. Microstructural changes in both misos at various stages in the manufacturing process were studied using both a light microscope and a transmission electron microscope. Transmission electron microscope (TEM) micrographs soy winged bean miso and soybean miso at high magnification.

2951. *Shelby Report of the Southeast (Gainesville, Georgia)*. 1985. What’s new. 19(12): Dec.

• **Summary:** In Jan. 1984 John Troy teamed up with a group of investors to start American Natural Foods, based in Chapel Hill, North Carolina. Their products contain miso, a flavor enhancer made from soybeans and grains. For more information call (919) 929-1240.

2952. Edward & Sons Trading Co. 1985. What is miso? (Brochure). Saluda, North Carolina. 4 p. 28 cm.

• **Summary:** The inside two pages of this brochure each bear a full-page color ad. Three sections on the cover are titled: The history of miso. The benefits of miso. Miso today. On the back are four recipes using Edward & Sons miso products and other natural food products sold by the company. Address: Route 1, Box 153, Saluda, North Carolina 28773.

2953. **Product Name:** Miso [Chick Peaso (Chick Pea Miso), Yellow (Shinshu) Miso, Mellow Ebony Miso (with Black Soybeans), or Koji Miso].

Manufacturer's Name: Institute of Fermented Foods.

Manufacturer's Address: Rutherfordton, NC 28139.

Date of Introduction: 1985.

Ingredients: Yellow and Koji: Rice koji, soybeans, sea salt. Chick Pea: Rice koji, chick peas (garbanzo beans—no soybeans), barley, sea salt. Ebony: Rice koji, black soybeans, sea salt.

New Product–Documentation: Labels from Institute of Fermented Foods. 1985. 3.25 by 4 inches. Self adhesive. Two color labels for each miso type: Yellow and black, gold and black, red and black, orange and black, grey and black on white. “Non-pasteurized. No preservatives.” Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Talk with John Belleme. 1985. April 2. John introduced Chick Peaso in May 1984. It is a mellow miso made with chick-peas instead of soybeans; it contains no soy.

Talk with John Belleme of North Carolina. 1996. Aug. 27. John made Chick Peaso, but he got the idea from Muramoto Sensei (probably via Lino Stanchich in about 1982-83), who made and sold small batches of chick pea miso at his Asunaro Eastern Studies Institute, high on Mt. Veeder, in Glen Ellen, California. Muramoto's product, though sold mostly to his students and friends, was probably America's first (perhaps the world's first) commercial chick pea miso. However John thinks that the miso may have also contained some soybeans—although he has no idea what proportion.

Talk with John Belleme. 1999. Nov. 6. The Institute of Fermented Foods was an entity that John created out of the blue (it was never registered or official) as part of his ongoing struggle with Barry Evans.

Note: This is the earliest known commercial miso product made without soybeans; chick peas were used instead.

2954. **Product Name:** Miso Master Miso-Tofu Dips.

Manufacturer's Name: Just In Foods, Inc.

Manufacturer's Address: Box 541, Route 3, Rutherfordton, NC 28139.

Date of Introduction: 1985.

New Product–Documentation: Leaflet. Back to back, 8½ by 11 inch, 3 color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Miso Master. You've got to try these two extraordinary new Miso-Tofu Dips from Miso Master.

2955. **Product Name:** Miso Master Gold Label Spaghetti Sauce.

Manufacturer's Name: Just In Foods, Inc.

Manufacturer's Address: Box 541, Route 3, Rutherfordton, NC 28139.

Date of Introduction: 1985.

New Product–Documentation: Leaflet. Back to back, 8½ by 11 inch, 3 color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Introducing Miso Master. Gold Label Spaghetti Sauce. Its the perfect marriage of tomatoes and miso.

2956. **Product Name:** Onozaki Miso [Red Miso].

Manufacturer's Name: Just In Foods, Inc.

Manufacturer's Address: 92 MacIntosh Rd., Asheville, North Carolina 28806.

Date of Introduction: 1985.

Ingredients: Rice koji, soybeans, sea salt, well water.

Wt/Vol., Packaging, Price: 1 lb plastic bag with pressure-release valve.

How Stored: Refrigerated.

New Product–Documentation: This miso is imported in bulk from Onozaki Kojiten in Yaita, Japan. It is packaged by American Miso Co., Rutherfordton, North Carolina. Label sent by John Belleme. 1985. 3 by 3.5 inches. Gold and red on black—very stylish. Pressure sensitive on plastic bag with pressure release valve at top. Front panel text: “Handmade miso. Do not block valve. Non-pasteurized. No preservatives.” Back panel text (black letters on white): “Onozaki miso is much more than just a great tasting miso. Its deep, rich flavor and subtle character is a vivid reminder of a vanishing Japanese tradition. And with good reason.

“For like Japan's ancient feudal miso masters, Takamichi Onozaki begins by personally growing, and carefully processing his own organic rice.

“Then, the Onozakis perform each time-proven step of old world miso-making in accordance with their own long family traditions. Finally, long aging in huge seasoned wood vats guarantees the superlative quality of their natural miso.

“Use Mr. Onozaki's wonderfully delicious miso to enhance the flavor and nutrition of soups, spreads, dressings and sauces.

“For more about the unique family and their work, see East West Journal, ‘The Miso-Master's Apprentice,’ April, 1981.”

2957. Kim, S.H.; Lee, H.J. 1985. [Characteristics of bitter peptides from a cheese and a soybean paste]. *Hanguk Sikp'um Kwahakhoe Chi (Korean J. of Food Science and Technology)* 17(4):276-82. [27 ref. Kor; eng]*

• **Summary:** Bitter peptides were isolated from Mozzarella cheese and a soybean paste. Key amino acids were leucine, phenylalanine, proline, and valine. Address: Dep. of Food Science & Technology, Seoul National Univ., Suwon, South Korea.

2958. **Product Name:** Sweet & Sour Tempeh Lumpia (Vegetarian Spring Roll).

Manufacturer's Name: Light Wave Wholefood.

Manufacturer's Address: 21 Gilbert St., Newton, Adeliade, South Australia.

Date of Introduction: 1985.

Ingredients: Pan-steamed tempeh, onions, lotus root, cabbage, soya and/or mung sprouts, carrot, tamari, miso, tamarind, maple syrup.

New Product–Documentation: Label. 1985, undated. 2 by 5.5 inches. Dark blue on light blue. “No eggs, synthetic additives or any animals and not deep fried.”

2959. Michioka, Osamu. 1985. [Experimental and epidemiologic studies on the mutagen-depressive substances in vegetables]. *Akita Boygaku? ZZZ (Akita Medical Journal)* 11:237-66. [Jap]

• **Summary:** A mutagen-depressing substance was found in 12 kinds of vegetables. The activity of the substance was somewhat reduced by heat. In order to elucidate the mechanism, the substance was added at every stage of mutagenicity in the Ames test using Salmonella TA 100 as the organism, benzo(a)pyrene (B(a)P) as the promutagen, and 4-nitro-quinoline-oxide (4NQO), as the ultimate mutagen. Mutagenic inhibition was found to occur at the stage of mutagenic activation of the promutagen. Additional experiments showed that the active substance accelerated the formation of phenolic compounds and inhibited the formation of diols, thus decreasing the non-metabolites of B(a)P.

Note: This early study, although it does not mention miso, started the search for mutagens in miso and other Japanese foods. Address: Dep. of Hygiene, Akita University School of Medicine [Japan] (Director: Prof. S. Kamiyama).

2960. Noji, R.; Shindo, Y. 1985. Study on antioxidative activity of miso. I. Application of miso for sardine processing. *Report of Fukuoka Women's Junior College (Fukuoka, Japan)* 21:295-301. *

• **Summary:** Miso is shown to have antioxidative activity. When sardines are soaked in brine, the levels of peroxide and carbonyl compounds are much higher than when they are soaked in miso.

2961. **Product Name:** Golden Millet Miso.

Manufacturer's Name: South River Miso Co. Inc.

Manufacturer's Address: South River Farm, Conway, MA 01341. Phone: (413) 369-4057.

Date of Introduction: 1985.

Ingredients: Deep well water, organically grown millet and soybeans, Muramoto's sea salt, koji culture.

How Stored: Refrigerated.

New Product–Documentation: South River Miso Co. catalog. 1991. Letter and Label sent by Christian Elwell. 1992. May 28. This miso was introduced in 1985. Label. Black on white. 3.5 by 2.5 inches. “Unpasteurized.”

2962. Tajima, K.; Tominaga, S. 1985. Dietary habits and gastro-intestinal cancers: A comparative case-control study of stomach and large intestinal cancers in Nagoya, Japan. *Japanese J. of Cancer Research (Gann)* 76:705-16. *

• **Summary:** In this case-control study, the authors noted an increased in rectal cancer risk, but not in colon cancer risk in people consuming miso soup (Relative Risk = 2.05, $p < 0.05$). No association was found between tofu consumption and either colon or rectal cancer.

Concerning stomach cancer: Consumption of miso soup or miso was not significantly associated with increased risk of stomach cancer.

2963. **Product Name:** Westbrae Natural Teriyaki Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1985.

Ingredients: Johsen Shoyu and double-brewed shoyu (water, soybeans, wheat, salt), Sendai red miso (soybeans, rice, water, salt), rice vinegar, apple juice, tomato puree, Mirin (water, rice), rice malt (rice, malted barley), onions, black pepper, garlic, ginger, allspice, red pepper, natural gum stabilizers (tragacanth, xanthan).

Wt/Vol., Packaging, Price: 12.7 fluid oz (375 ml).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1986, undated. 5 by 3.5 inches. Paper. Orange, white, blue, green, black. Mt. Fuji logo. “Westbrae's Teriyaki Sauce is thick, so it can be used American-style like barbecue sauce or catsup.”

2964. Andoh, Elizabeth. 1985. An American taste of Japan. New York, NY: William Morrow and Co. 334 p. + [8] pages of color plates. Illust. by Susan Blubaugh. Color photos by Aaron Rezny. Index. 25 cm.

• **Summary:** This is a beautiful, remarkable book by a perfectionist with an intensely curious mind, a woman who really understands (is indeed an authority on) Japanese foods, cookery, language and culture. The illustration and photos are likewise exquisite.

Contents: A note on the romanization and pronunciation of Japanese. Acknowledgments. An introduction to cross-cultural cooking (including a brief autobiography). At the market, in the kitchen (“A guide to buying and storing Japanese foodstuffs and equipment, plus an explanation of certain Japanese cooking terms and techniques”). The recipes: Soups, appetizers, sushi (in the lingo of the sushi bar, rice is known as *shari* and soy sauce as *murasaki*—literally “purple”), main dishes, side dishes, desserts. Setting the cross-cultural table. Photography credits. Mail-order and shopping guide.

Soyfoods [and sea vegetables] are so abundantly represented that we will only refer the reader to the glossary

plus (“At the market, in the kitchen,” p. 19-44) and index. In the glossary: Abura agé (fried bean curd). Ao nori (sea herb flakes). Kanten (agar). Kombu (kelp). Miso (fermented bean paste). Miso shiru (also called *omi-otsuke* [a woman’s word]). Neri miso (glossy bean-paste sauce). Nori (laver). Soy sauce (The subtle, full-bodied aroma of soy sauce “does fade after several months. Keep opened bottles tightly capped on a dark shelf in your kitchen”). Tofu (bean curd; kinugoshi, momen, yaki-dofu). Usukuchi shoyu. Yaki-zushi nori.

An American who traveled to Japan in 1966 to study Japanese, Andoh married (in 1969) into the Japanese family she visited there. She enrolled in a class at the Yanagihara School of Classical Japanese Cooking, where she studied for six years.

Each recipe has two titles: (1) A long, descriptive title in English with large, bold typeface and title-style capitalization. (2) Under a hairline, the actual Japanese title, in regular capital letters. The modern Hepburn system of romanization is used throughout the book, so that diacritical marks are used consistently with the appropriate words. Page 52: “Light Bean Soup with Slender White Mushrooms and Bean Curd: Enokidaké no Miso Shiru.” Page 183: “Bean Curd Tempura with Spicy Scallion Sauce: Agé Dashi-Dôfu.”

Note: Use of the terms “bean curd” and “bean sauce” (instead of the now more widely used “tofu” and “miso”) in recipe titles, text, and index makes these parts of the book seem slightly imperfect. Address: Japan.

2965. Aubert, Claude. 1985. Les aliments fermentés traditionnels: Une richesse méconnue [Traditional fermented foods: An unrecognized richness]. Paris: Terre Vivante. 261 p. Index. 21 cm. Series: Collection les Vrais Aliments d’Aujourd’hui et de Demain. [173* ref. Fre]

• **Summary:** The author gives good, brief introductions to the fermented soyfoods tempeh, miso, miso pickles, shoyu, tamari, sufu, natto, soy idli, and hamanatto. Related foods that are also discussed include koji, amazake (amasaké), and ontjom. See especially chapter VII: The fermentation of legumes (p. 73-78). Part IV (p. 153-216) is a dictionary of fermented foods and beverages, in which they are listed alphabetically; basic information and references for each are given. Instructions are given for preparing many of these foods on a home scale, and for some foods (such as tempeh) even recipes are given (fried tempeh, tempeh goreng). The book contains many beautiful illustrations and an excellent bibliography. The author acknowledges his extensive use of the material in *Handbook of Indigenous Fermented Foods* (1983) edited by K.H. Steinkraus. Address: Ingénieur agronome de formation, France.

2966. Bennett, Joan W. 1985. Taxonomy of fungi and biology of the aspergilli. In: Arnold D. Demain and Nadine

A. Solomon, eds. 1985. *Biology of Industrial Microorganisms*. Menlo Park, California: Benjamin/Cummings Publishing Co. xviii + 573 p. See p. 359-406. Chap. 12. 25 cm. [232* ref]

• **Summary:** This article is so clearly written that even a beginner can understand it. Contents: Introduction. Some systematics for the nonmycologist: What is systematics? (classification, nomenclature, identification), what is a fungus? (general overview). The genus *Aspergillus*: Morphology, sexual stages (teleomorphs). Genetics: Introduction to *A. nidulans*, the parasexual cycle. Economic aspects: Secondary metabolites, *Aspergillus* metabolites used in food processing, Oriental food fermentations (soy sauce, sake, miso, koji). Conclusion.

Table 12.1 (p. 360) lists “Historical landmarks in mycology and biotechnology involving the genus *Aspergillus*.” 1729–P.A. Micheli: Publication of *Nova plantarum genera*, name *Aspergillus* given to group of molds with characteristic spore head. 1827–J. Schilling: First continuous observation of the growth of a fungus from spore to spore, *A. glaucus*. 1854–A. deBary: First association of a perfect state (*Eurotium herbariorum*) and an imperfect state (*A. glaucus*). 1867–P. Van Tiegham: First to establish importance of Aspergilli in biochemical field with identification of *A. niger* in gallic acid fermentation. 1869–J. Raulin: First defined medium for a microorganism *A. niger*. 1894–J. Takamine: First patent for a commercial enzyme form fungus, “Takadiastase” from *A. flavus-oryzae*. 1917–J.N. Currie: Commercial citric acid production from *A. niger* demonstrated as feasible. 1952–J.A. Roper: Parasexual cycle discovered in *A. nidulans*. 1961–Sergeant et al.: Identification of *A. flavus* as mold association with Turkey-X disease; “mycotoxin revolution” begins. The name “aflatoxin” was given in 1962. 1983–Ballance et al.: Transformation system described in *A. nidulans*, the second transformation system elucidated for a mold. Table 12.3 (p. 378-79) is a “Glossary of morphological terms encountered in descriptions of the Aspergilli.”

Table 12.6 (p. 392) lists “*Aspergillus*-derived metabolites used in food processing” (after Beuchat 1978, *Food & Beverage Mycology*, see p. 368-96). These fall into three broad categories: Acids, enzymes, and miscellaneous. Acids: Citric acid, from *A. niger*, is used in soft drinks, dairy products, jams, jellies, candies, frozen foods, fats and canned goods. Gluconic acid, from *A. niger*, is used in baking powder, bread mixes, desserts, bottle-washing formulations. Itaconic acid, from *A. itaconicus* or *A. terreus* is used in shortenings, or resin coatings in contact with food. Malic acid, from various *Aspergillus* species is used in beverages, jam, jellies, syrups, candy, and sour dough. Oxalic, from *A. niger*, is used in hydrolysis of starch to glucose. Tartaric acid, from *A. niger* or *A. griseus* is used in carbonated beverages, desserts, jellies.

Enzymes: α -amylase, from *A. oryzae* or *A. niger* is used in corn syrup, dextrose, baking, food dextrins, chocolate syrups. Glucoamylase, from *A. awamori* or *A. niger* is used in dextrose, dextrose syrup, baking. Glucose oxidase or catalase, from *A. niger* is used in powdered egg products, brewing, wines, mayonnaise. Lactase, from *A. niger* is used in dairy products. Naringinase, from *A. niger* is used in debittering grapefruit juice. Pectinase, from *A. niger* is used in clarifying fruit juice and wine. Protease, from *A. oryzae* is used in tenderizing meat, soy sauce, brewing, baking.

Miscellaneous: Mannitol, from *A. candidus* is used as a bulking agent, or humectant.

Illustrations show: (1) "Schematic representation of an *Aspergillus* conidial apparatus" showing metula (primary sterigmata), conidia, vesicule, phialide (secondary sterigmata), conidiophore, and foot cell (p. 377). Address: Prof., Dep. of Biology, Biology, Tulane Univ., New Orleans, Louisiana 70118.

2967. Botton, B.; Breton, A.; Fevre, M.; Guy, P.; Larpent, J.P.; Veau, P. 1985. *Moisissures utiles et nuisibles: Importance industrielle* [Industrial importance of useful and harmful molds]. Paris: Coll. Collection Biotechnologies. 364 p. [150 ref. Fre]*

• **Summary:** Contains a discussion of popular fermented soyfoods, including soy sauce, tempeh, and miso.

2968. Bradford, Peter; Bradford, Montse. 1985. *Cooking with sea vegetables: A collection of naturally delicious dishes using to the full the bountiful harvest of the oceans*. Wellingborough & New York: Thorsons Publishing Group. 144 p. Illust. by Sue Reid. Index. 22 cm. [8 ref]

• **Summary:** The Bradfords have spent considerable time studying food in Japan and are especially well qualified to present this vegan, macrobiotic cookbook. It contains recipes using tofu, tempeh, miso, shoyu (soy sauce), and seitan. Address: UK.

2969. Brown, Edward Espe. 1985. *The Tassajara recipe book: Favorites of the guest season*. Boston & London: Shambhala. xviii + 225 p. Foreword by Alice Waters of Chez Panice restaurant in Berkeley. Index. 23 cm.

• **Summary:** In the tradition of the bestselling *Tassajara Bread Book* and *Tassajara Cooking*, Ed Brown has compiled a new collection of gourmet vegetarian recipes from the kitchens of the well-known Tassajara Zen Mountain Center near Carmel, California. This cookbook contains 12 tofu recipes (mostly entrees; all use firm rather than soft tofu, which has been drained and pressed), 2 soybean recipes, and 1 one miso recipe: Eggs, scrambled tofu, and our latest granola (p. 23). Scrambled tofu (p. 30). Soups & stocks (p. 49). Soy vegetable soup (p. 65). Oriental stock (p. 67; includes tamari. May include soybean sprouts). Tartar sauce with fresh basil (p. 96; for Tofu cutlets).

Sesame soybeans (p. 111). Tofu cabbage grill (p. 112). Tofu entrees (p. 139; introduction to tofu and its preparation). Tofu marinade (p. 141). Grilled marinated tofu (p. 142-43). Tofu cutlets (p. 144-45). Tofu teriyaki (p. 146-47). Eleanor's tofu gumbo (p. 148-49). Tofu miso stew (p. 150-52). Alaskan tofu (p. 153-54). Mushroom tofu stroganoff (p. 155-56).

2970. Diamond, Harvey; Diamond, Marilyn. 1985. *Fit for life*. New York, NY: Warner Books. xxvii + 316 p. Index. 17 cm. Paperback edition published Feb. 1987. 316 p. [204* ref]

• **Summary:** Contents: Part I—The principles. Introduction. 1. Diets don't work. 2. Natural hygiene. 3. The natural body cycles. 4. The theory of metabolic imbalance. 5. The principle of high-water-content food. 6. The principle of proper food combining. 7. The principle of correct fruit consumption. 8. The theory of detoxification. 9. Protein. 10. Dairy products. 11. Exercise. 12. You are what you think you are. 13. The most frequently asked questions. Part II—The program. Introduction. 1. Breakfast. 2. Fresh juices. 3. The energy ladder. 4. The *Fit for Life* shopping list. 5. The main-course salad. 6. Life-style guidelines. A four-week example of the fitness life-style. In conclusion. Bibliography.

The only references to soy or soyfoods in the index are: Miso (p. 175; Cold Mountain, Eden, Westbrae), Soy sauce and Tamari sauce (p. 176; low-sodium—Eden, Soken, Westbrae). The text mentions Tofu Sauce (Westbrae). The authors (who live in semi-tropical Los Angeles) advocate high consumption of fruit, and are apparently unaware of tofu and tempeh. The book is near vegetarian but includes the use of fish, seafood, chicken, and turkey (p. 173-74, 237). The paperback edition announces: "America's all-time #1 health and diet book! Over 3 million copies in print!" Address: Pasadena, California.

2971. Duke, James A.; Ayensu, Edward E. 1985. *Medicinal plants of China*. 2 vols. Algonac, Michigan: Reference Publications, Inc. 705 p. Introduction by Edward S. Ayensu. 24 cm. Medicinal index (by disease). Common names index. Index to species. No. 4 in the series "Medicinal Plants of the World." [234* ref]

• **Summary:** The plants are grouped by family. Two families are tied for containing the largest number of medicinal species: Leguminosae (Fabaceae) and Compositae (Asteraceae) each have 354 species. The soybean (*Glycine max*) is discussed on p. 326-27. "Uses: Leaf: Bruised leaves applied to snakebite. Flower: Used in blindness and opacity of the cornea. Stem: Ashes of stalks applied to granular hemorrhoids or fungus growths on the anus. Fruit: Green hulls chewed to a pulp and applied to corneal and smallpox ulcers. Seed: Chinese herbals suggest that soybean is specific for proper functioning of bowels, heart, kidney,

liver and stomach; antidote to *Aconitum* and *Croton*. Root: Decoction astringent. Plant: Bean sprouts ('Ta tou huang chuen') are considered constructive, laxative, resolvent, to help in alopecia, ascites, and rheumatism.

"A salty relish 'Hsien-shih' [salted soy nuggets] is made by soaking the beans in water for three days, spreading them to ferment, with salt, ginger, peppers, orange peel, thyme, fennel, and apricot kernels, sealed in an earthen jar, and placed in the sun for one month. This relish is said to be used for ague, bone diseases, chills, colds, cold feet, colic, dogbite, difficulty in breathing, dysentery, fever, headache, marasmus, melancholy, nausea, poisons, and ulcer. Bean ferment (tou huang) is used for rheumatism, especially of the knees. It is chewed to a paste and applied to eczema. Bean curd (tou fu) is prescribed in drunkenness, dysentery, ophthalmia, or swellings. Soy sauce ('Chiang,' 'Chiang yu,' 'Shih yu') is applied to burns, eczema, leprosy, scalds, and sores, and is considered useful in preventing abortion and the hematuria of pregnancy.

"Chemistry: Sitosterol, an anticancer active, replaces diosgenin in some hypotensive drugs. Stigmasterol used to be employed for stiffness. Lecithin derived from soybean may function as a vasodepressor and a lipotropic agent. Soybean oil, with unsaturated fatty acid, is recommended for hypercholesteremia."

The adzuki bean (*Phaseolus vulgaris*) is discussed on p. 336-37, and kudzu (*Pueraria lobata*) on p. 339-40. Address: 1. USDA Germplasm Services Lab., ARS B-001 R-133, Beltsville, Maryland 20705.

2972. Hirano, Masaaki. 1985. *Shôyu miso no bunkashi* [A cultural history of shoyu and miso]. Tokyo: Tokyo Shobosha. 346 p. Illust. 22 cm. Series: *Shoku no fuzoku minzoku meicho shusei*, No. 7. [20+ ref. Jap]*

• **Summary:** A history of miso, miso cookery, shoyu, and shoyu cookery. "Tsuketari shoyu miso bunken shiryô shusei" (p. 297-346). Masaaki Hirano was born in 1931. Address: Japan.

2973. Holt, Helen. 1985. *Eten zonder vlees: dat kan!* [Eat without meat: It's possible!]. Den Haag, Netherlands: De Nederlandse Vegetariërsbond. 38 p. Illust. Index. 15 x 21 cm. [9 ref. Dut]

• **Summary:** A vegetarian cookbooklet. Soy-related foods are mentioned on the following pages: Miso (sojapasta, p. 6-7). Soy bits / morsels (probably chunks of textured soy flour; Sojabrokjes, p. 12, 32). Soybeans (sojabonen, p. 12, 15). Tempeh (tempé, p. 2, 3-4, 12, 22). Tofu (tahoe, table of contents, p. 3-4, 7, 12, 18, 20, 28).

Also discusses: Azuki beans (adzukibonen, p. 11, 15). Quark (kwark, p. 7). Sesame salt (sesamzout, gomasio, p. 6) Sesame tahini (sesampasta, tahin, p. 6-7)

Note: This is the earliest Dutch-language document seen (Jan. 2005) that mentions azuki beans, which it calls

adzukibonen. Address: Larensweg 26, 1221 CM Hilversum, Netherlands.

2974. Just In Foods, Inc. 1985. *Miso Master*. Introducing Chick Peaso [chickpea miso]. We've used an ancient Japanese tradition to make a brand new food (Poster). Box 541, Route 3, Rutherfordton, NC 28139. 2 p. Back to back. 28 x 22 cm. 3 color. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center.

Address: Rutherfordton, North Carolina.

2975. Klein, Hermine. 1985. *Die neuen Sojagerichte: Schnell und delikat–Natuerliche Rezept–sammlung No. 3* [The new soy recipes: Quick and delicate–Natural recipe collection No. 3]. Vienna, Austria: Fachverlag Gesundheit GmbH. 50 p. Illust. 24 x 15 cm. [Ger]

• **Summary:** An attractive cookbooklet. Contents: Introduction. Green seeded soybean recipes. Yellow soybean recipes. Making tofu at home. Tofu sweets. Soymilk recipes. Miso soups. Soy granule recipes. Soy granule sweets. TVP recipes. Soy burgers (*Sojastangerln*). Address: Vienna, Austria.

2976. Kushi, Aveline; Esko, Wendy. 1985. *The changing seasons macrobiotic cookbook*. Wayne, New Jersey: Avery Publishing Group, Inc. 265 p. [43 ref]*

• **Summary:** 35 miso recipes, 35 tofu, 34 "tamari," 15 tempeh, 3 natto. Address: Brookline, Massachusetts.

2977. Lo, Kenneth H.C. 1985. *New Chinese cooking school*. Tucson, Arizona: HP Books. 288 p. Illust. Index. 28 cm.

• **Summary:** On the cover, below the title we read: "An illustrated course in contemporary Chinese cuisine." A gorgeous book, packed with superb color photos on glossy paper. One chapter (p. 98-115), titled "Bean curd and eggs," contains many tofu recipes. Other tofu recipes are scattered throughout the book.

The section titled "Soy beans and bean-based products" (p. 26) gives brief definitions of: Bean curd [tofu], bean curd cheese [fermented tofu], bean curd skin [yuba], salted black beans [soy nuggets] ("Cooked, salted and fermented whole soy beans. Mash them with other ingredients or mix into dishes for color" and rich, earthy, piquant flavor), Sichuan chili paste (yellow soy bean paste mixed with dried chilies and their seeds, sugar, and garlic), soy bean paste (crushed soy beans mixed with sugar, salt, and chili), sweet bean paste (made from cooked, puréed, sweetened red beans [azuki]), and yellow bean paste (made of fermented, salted puréed yellow [soy] beans with salt, flour and water). Also contains recipes for: Bean-curd cheese [fermented tofu], p. 88, 89. Bean curd skin [yuba] (p. 200, with color photo of "dried bean curd skin" on p. 18).

Recipes and photos for “salted black beans” [soy nuggets] or black bean sauce are: Steamed scallops with black bean sauce (p. 132, 138). Quick-fried crab in black bean sauce (p. 144). Cantonese steamed spareribs with black beans (p. 186, 188). Sliced beef in black bean and chili sauce (p. 201). Ho-fen noodles with beef in black bean sauce (p. 270, 273). Soy sauce is used in recipes throughout the book.

A color photo on the rear dust jacket cover shows Kenneth Lo. His biography, on the inside rear dust jacket, states that he is acknowledged the world over as an authority on Chinese food, and is a graduate of both Peking and Cambridge universities. He is also the founder of one of London’s best-known Chinese restaurants.

2978. Lotong, Napha. 1985. Koji. In: B.J.B. Wood, ed. 1985. *Microbiology of Fermented Foods*. Vol. 1. Essex, England: Elsevier Science Publishing Co. xx + 371 + 14 p. See p. 237-70. [180 ref]

• **Summary:** Definition and scope. Soybean koji: Raw materials, koji preparation, koji enzymes, application of soybean koji. Rice and similar products: Mould enzymes used in the fermentation of alcohol containing foods and beverages, miso rice koji. Seed inocula: Tane koji, production of seed inocula for soybean koji in South-east Asia, dry starter cakes, spore mass produced on rice adhering to inside surfaces of flasks. Conclusion. Address: Dep. of Microbiology, Kasetsart Univ., Bangkok, Thailand.

2979. Lukes, Timothy J.; Okihiro, Gary Y. 1985. *Japanese legacy: Farming and community life in California’s Santa Clara Valley*. Cupertino, California: De Anza College, California History Center Foundation. 156 p. Foreword by Norman Y. Mineta. 22 x 26 cm. 60 photos. Series: Local History Studies Vol. 31. California History Center, Cupertino, California. [175* ref]

• **Summary:** A comprehensive work about a Japanese farming community in California from 1895 to 1945. This book was the winner of the Association for Asian American Studies 1987 Book Award “for having made a most significant contribution to the study of the Asian American experience.” Pages 23-24 contain a map and legend of San Jose Nihonmachi (Japantown) from 1910 to 1920. Nomitsu Tofu was located on Sixth Street, four doors from Taylor Street.

Japanese farmers first arrived in California’s Santa Clara Valley in about 1895. The major theme of this book is their constant struggle. The ideas of inclusion and exclusion, oppression and resistance (the search for self-determination) of this minority group are carefully examined. The inside front cover notes: “Around the turn of the century, clusters of Japanese farms sprang up throughout the Santa Clara Valley, at Alviso, Agnew, Trimble Road, Berryessa, and the West Side (Santa Clara, Saratoga, Los Gatos). Each cluster

built a Japanese language school, held picnics and observed Japanese festivals such as New Year’s Day, and shared wells, tools, horses, and laborers. Peddlers from Nihonmachi visited those outlying clusters selling Japanese foodstuffs like tofu, miso, and seaweed, and in turn, the farmers took occasional trips to Nihonmachi for entertainment, funerals, and other social gatherings.”

Note: A good source of information on farming by Asian-Americans on the Pacific Coast is the periodical *Pacific Rural Press*. Address: 1. Asst. Prof. of Political Science; 2. Director of the Ethnic Studies Program and Assoc. Prof. of History. Both: Univ. of Santa Clara.

2980. McConnaughey, Evelyn. 1985. *Sea vegetables: Harvesting guide & cookbook*. Naturegraph Publishers, Inc., P.O. Box 1075, Happy Camp, California 96039. xi + 240 p. Illust. Index. 22 cm. [53* ref] Address: Oregon.

2981. Nabben, Alexander. 1985. *Soja-Kueche: Vielseitig und gesund [Soya cookery: Versatile and healthful]*. Schaaflheim, West Germany: Pala Verlag. 144 p. Illust. Index. 21 cm. [Ger]

• **Summary:** Contents: Soya, the wonderbean (*die Wunderbohne*). A cultural history of the soybean. A little soybean botany. Soya is versatile. The world market and world hunger. Health through proper nutrition and diet. Product types and buying tips. Recipes. About the author (autobiographical, with photo; he was born in 1953 in Viersen. Since 1978 he has worked in a whole-grain bakery, a soya kitchen, and in a vegetarian restaurant in Munich).

This vegan cookbook contains a large number of tofu and tempeh recipes, as well as recipes for most of the other types of soyfoods. Note the following German terms: *Ganze Sojabohnen (getrocknete gelbe Sojabohnen)* = whole dry soybeans. *Vollsojamehl* = Whole soy flour. *Sojasauce* = soy sauce. *Miso (Sojapaste)* = miso. *Okara (Sojakleie)* = okara. *Tofu (Sojaquark oder -käese)* = tofu. *Tempeh (Soja-”Brie”)* = Tempeh.

On the last page of the book (p. 144) is an advertisement for Morgenland Naturkost, located at: Au dem Anger 3410 Northeim 19, West Germany. Phone: 05551-64592. They offer tofu and tofu dishes, seitan and seitan products, and utensils for the production of tofu and tempeh.

Apparently a second edition or printing appeared in 1988 (ISBN 3-923176-35-x). Address: Morgenland Naturkost, Auf dem Anger 2, 3440 Northeim 19, West Germany.

2982. Noh, Chin-hwa. 1985. *Traditional Korean cooking: Snacks & basic side dishes*. Elizabeth, New Jersey; Seoul Korea: Hollym Corporation. 78 p. Illust. (color). Index (general). Index of Korean recipe titles. 27 cm. [Eng; kor]

• **Summary:** This is an excellent cookbook of authentic Korean recipes, each with its Korean name (romanized and in Korean characters). Each recipe is accompanied by numerous useful color photos. The front matter contains an Introduction, Preparation tips, and 2 pages about the healthy Korean diet. Soy related recipes include: Soft bean curd soup (*Sundubutchigae*, p. 10). Seasoned fermented soybean soup (*Ch'onggukchangchigae*, with 1 cake bean curd and 6-8 tablespoons seasoned fermented soybeans, p. 11). Royal soybean paste soup (*Kungjungdoenjangchigae*, with 2 tablespoons soybean paste [Korean miso], p. 12). Bean curd casserole (*Tubu Chon-gol*, p. 13). Wrapped bean curd (*Tubussamtchim*, p. 15). Stuffed bean curd (*Tubusobagi*, p. 16). Steamed bean curd (*Tubuson*, p. 16-17). Bean curd in soy sauce (*Tubut'wigimjorim*, p. 18). Salted bean curd and beef (*Tubu Soemgogijorim*, p. 18). Salted beans (*K'ongjorim*, with 1 cup black beans plus soy sauce, sugar, sesame seeds, and sesame oil, p. 19). Cold cooked bean curd (*Tubu Naengch'ae*, p. 22). Bean sprout rice (*K'ongnamulpap*, with 2/3 lb. [soy] bean sprouts, p. 24). Dried radish strips in soy sauce (*Muumallaengijangatchi*, p. 54). Cucumbers in soy sauce (*Oijangatchi*, p. 55). Sesame leaves in soy sauce (*Kkaennipchangatchi*, p. 56). Todok in red sauce (*Todokchangatchi*, with 1 cup soy sauce, p. 56). Fermented soybean lumps (*Meju*, with 18 lb. dried yellow soybeans, p. 62-63). Soy sauce (*Kanjang*, homemade, p. 62-63). Soybean paste (*Toenjang*, homemade, p. 63). Red pepper paste (*Koch'ujang*, homemade, with 2 lb. fermented soybean powder, 6 lb glutinous rice powder, p. 64). Note: This is the earliest English-language document seen (March 2009) that uses the word "Toenjang" to refer to Korean-style soybean paste (miso), or the word "Koch'ujang" to refer to Korean-style fermented red pepper and soybean paste (miso).

The useful Glossary (p. 73-75) contains definitions of: Bean curd (*tubu*). Beans, incl. yellow soybeans (*huink'ong*) which are used to make [soybean] sprouts (*k'ongnamul*), bean curd (*tubu*), soft bean curd (*sundubu*), bean paste (*toenjang*), fermented soybeans for making soy sauce (*meju*), seasoned fermented soybeans (*ch'onggukchang*), soybean flour (*k'ongkaru*), soy sauce (*kanjang*).

Brown soybeans (*pamk'ong*—literally "chestnut beans") are a chestnut brown color and have a smooth chestnut-like texture when cooked.

Black soybeans (*komunk'ong*) are served as a side dish.

Mung beans (*noktu*), used to make mung bean sprouts (*sukchu namul*), etc. Red kidney beans [azuki] (*kangnamk'ong*).

Bean sprouts (*k'ongnamul*) may be grown at home or purchased in the vegetable section of most grocery stores. The large sprouts are from the yellow soybean; the smaller, more delicate sprouts are from the green mung bean.

"Soybean paste (*toenjang*) is a thick brown paste made from a mixture of mashed fermented soybean lumps

[soybean koji] (left from making the soy sauce), powdered red pepper seeds and salt. It is used as a thickener for soups and stews and will keep well in the refrigerator.

"Soy sauce (*kanjang*) is a brownish-black salty liquid made by cooking fermented soybean cakes with water and salt. Each household in Korea used to make their own soy sauce in the spring; some still do. These are mild and add good flavor to most any food." Soy sauce is used in cooking and at the table. Japanese "soy sauce is less salty but sweeter than Korean soy sauce.

"Sweet red beans (*p'at*) are small and round and used widely in Korean confections. When cooked and mashed they are sweet and soft textured. This sweet bean puree [Japanese *an*] is used as filling in rice cakes [mochi] and also now in donuts and rolls."

The Glossary also mentions laver (*kim*), a sea vegetable called "nori" in Japan, that is widely used in recipes in this book. No other sea vegetables are mentioned. Address: Munhwa Cooking School.

2983. Noh, Chin-hwa. 1985. Practical Korean cooking. Elizabeth, New Jersey; Seoul Korea: Hollym International Corporation. 214 p. Illust. (color). Index. 27 cm.

• **Summary:** Although this cookbook of authentic Korean recipes contains more than twice as many pages as the author's *Traditional Korean Cooking* (214 vs. 78), many of the recipes and photos are identical, as is the front matter: Introduction, Preparation tips, and The Korean Diet. This book contains many more meat dishes.

Most of the soy-related recipes are the same, except there are many new recipes in which "soy sauce" is included in the title; many also contain meat. A complete list of these is given in the Index under "soy sauce." For example: Beef and bamboo shoot in soy sauce (p. 42). Chicken in soy sauce (p. 45). Deep-fried chicken in soy sauce (p. 46). Abalones in soy sauce (p. 104). Page 197 mentions "Soybean Paste Toenjang" Address: Munhwa Cooking School.

2984. Salunkhe, D.K.; Kadam, S.S.; Chavan, J.K. 1985. Postharvest biotechnology of food legumes. Boca Raton, Florida: CRC Press. 160 p. Illust. Index. 26 cm. [25 soy ref]

• **Summary:** Contents. 1. Introduction. 2. Seed structure, production, and distribution (Soybean, p. 8-10, 17-18). 3. Chemical composition. 4. Nature and causes of losses. 5. Harvesting, threshing, and drying (Soybean, p. 69-70). 6. Storage. 7. Processing and utilization (Soyfoods, p. 121-36). 8. Food legumes in protein crisis.

Chapter 7, "Processing and utilization," discusses tofu, tempeh, soy flour, soymilk, miso, shoyu, natto, hamanatto, and cereal-soy blends. Address: 1. Vice-Chancellor; 2. Prof. of Food Science & Technology; 3. Asst. Food Science & Technol. All: Mahatma Phule Agricultural Univ., Rahuri, Maharashtra State, India.

2985. Scott, David; Golding, Claire. 1985. *The vegan diet: True vegetarian cookery*. London, Sydney, Auckland, Johannesburg: Rider (Random Century). 141 p. Illust. by Steve Hardstaff. Index. 20 cm. [10 ref]

• **Summary:** This gourmet vegan cookbook, containing over 250 recipes, uses many soyfoods in its recipes: Tofu, soy sprouts, soymilk (Plamil), miso, soy flour (Soyolk), vegan cheese (nonfermented, made with Soyolk soy flour, margarine, and yeast extract), tofu ice cream, and whole dry soybeans. Address: England.

2986. Scott, David. 1985. *Protein-balanced vegetarian cookery*. England: Rider Books, Century Hutchinson Ltd. 182 p. Illust. Index. 23 cm. [31* ref]

• **Summary:** This book was originally published in 1980, and the latest reference in the bibliography is 1978. A second edition was published in 1985, then a 1987 edition was published in the USA by CRCS Publications, P.O. Box 20850, Reno, Nevada 89515. The author has a poor knowledge of soyfoods, and makes little mention or use of them in this book. He refers to tofu as "beancurd," has a recipe for "Beancurd Burgers," mentions miso and a Miso-Tahini Spread, soy sauce, plus an Sunflower Seed, Soya Bean and Almond Casserole. Pages 160-61, information about soya beans, contains many errors.

2987. *The first macrobiotic cookbook: Formerly Zen Cookery*. Revised edition. 1985. George Ohsawa Macrobiotic Foundation, 1511 Robinson St., Oroville, CA 95965. 134 p. Topical index. General index. 22 cm. First published under this title in 1984. [11 ref]

• **Summary:** Edited by Cornellia and Herman Aihara, this is a revised and expanded edition of *Zen Cookery*, which was first published in 1964 by the Ohsawa Foundation of Chico, California. "Includes 296 recipes updated for the 1980's." Each recipe is numbered and the numbers are almost the same as in the original edition though some of the names have been changed slightly, and ingredients have been adjusted. Much less salt has been used.

There is an interesting preface followed by 4 pages of photo recollections of the early 1960s related to Chico-San, Inc. and followers of macrobiotics.

Contents: Preface. Photo recollections. 1. Grains. 2. Noodles. 3. Vegetables. 4. Beans and sea vegetables. 5. Soups. 6. Sauces. 7. Salads and pickles. 8. Special dishes. 9. Miso and soy sauce dishes. 10. Breads and snacks. 11. Desserts. 12. Beverages. Seasonings. Cutting styles. Glossary.

"Soon after George Ohsawa came to the United States as a missionary of macrobiotics in 1959, he published *Zen Macrobiotics* in 1960. This book in its original form included recipes for macrobiotic cooking. Although the number of macrobiotic students increased rapidly because

of his interesting lectures and charisma, the much needed editing of the recipes for clearer instructions and measurements was not realized until later.

"In 1961, on Ohsawa's advice, thirteen macrobiotic families, numbering thirty-six people, left New York City and moved to a small town in Northern California named Chico. The following year, all the adult members of the group started the first macrobiotic food distributing company, Chico-San, Inc.

"Since nobody on the West Coast had heard of macrobiotic foods, one of the first jobs for the Chico-San founders was educating people in the macrobiotic philosophy, diet and cooking. A committee for the teaching of macrobiotic cooking was formed by the women of the group who began by separating the cooking section from *Zen Macrobiotics* and gathering recipes among themselves. Thus, Chico-San, under the name of the Ohsawa Foundation of Chico, published the first macrobiotic cookbook, *Zen Cookery*, in 1964.

"The book sold very well for eleven years. It was out of print from 1975 until 1984, when the George Ohsawa Macrobiotic Foundation published the book under its new title, *The First Macrobiotic Cookbook*. The 1985 edition has been completely revised and corrected; however, the original outline and numbering system have been retained." Address: Oroville, California.

2988. Troy, John. 1985. *American Natural Foods 1985 business plan*. Chapel Hill, North Carolina: American Natural Foods. 52 p. 28 cm. [4 ref]

• **Summary:** Contents: Introduction: The president's letter, purpose, corporate vision. Background: The natural foods industry, American Natural Foods, Inc. Marketing: The markets, the consumers, marketing strategy, distribution and sales strategy. The products. Manufacturing plans, organizational plans, board of directors, management, current reality. Financial plans. Appendix.

John Troy was the creator of Elf Works, Ltd., whose first popular product was Wizard Baldour's Hot Stuff, introduced in April 1981. He later introduced a number of other popular products containing miso. This is the business plan for a new publicly owned corporation whose articles of incorporation were filed on 23 Jan. 1984 and which will make products containing miso such as Miso Mustard and Smoky Mountain Sizzlin'.

Note: The company went bankrupt from overextension several years after it began operation. Address: Suite 21 The Courtyard, Chapel Hill, North Carolina 27514. Phone: 919-929-0113.

2989. Wood, Brian J.B. 1985. *Miscellaneous food-related fermentations*. In: B.J.B. Wood, ed. 1985. *Microbiology of Fermented Foods*. Vol. 1. Essex, England: Elsevier Science Publishing Co. xx + 371 + 14 p. See p. 213-35. [27 ref]

• **Summary:** Contains a good overview of tempeh, ontjom, and “New substrates for old technologies,” as chickpeas for miso and tempeh, or soybeans for idli. Address: Dep. of Bioscience & Biotechnology, Univ. of Strathclyde, Glasgow, Scotland, UK.

2990. Yang, P.; Chen, Steve. 1985. Huang dou zhi pin pin guan shou ce [Quality control manual for soybean and products]. Taipei, Taiwan: American Soybean Assoc. 110 + 125 p. Illust. 26 cm. [40+ ref. Chi]
Address: American Soybean Assoc., Taiwan.

2991. Yokotsuka, T. 1985. Fermented protein foods in the Orient, with emphasis on shoyu and miso in Japan. In: B.J.B. Wood, ed. 1985. Microbiology of Fermented Foods. Vol. 1. Essex, England: Elsevier Science Publishing Co. xx + 371 + 14 p. See p. 197-247. [146 ref]

• **Summary:** This book chapter is very similar to Yokotsuka (1982), “Industrial application of proteinous fermented foods.” However it contains some new, additional, and very interesting information, especially concerning history, on pages 198-209 as follows: Introductory definitions of enzymatic hydrolysis, *Aspergillus* molds, miso (whose per capita consumption in Japan is about half that of shoyu by weight), saké, mirin, amasaké. Table 1 shows “Per capita annual consumption of fermented foods prepared from *Aspergillus* moulds in Japan (1981).” Shoyu 10.1 litres. Miso 4.9 kg, sake 12.3 litres, mirin 0.6 litres, shochu 2.2 litres, rice vinegar 0.25 litres, (vinegar) 2.5 litres. Note: Beer 39.5 litres. Whiskey and other foreign alcoholic beverages 3.7 litres. Japanese population 117.85 million on 1 Oct. 1981.

History: History of fermented proteinous foods in China: Chu (koji), chiang, shi or tou-shi [soy nuggets], chiang-yu (soysauce), shi-tche (the extracted juice of soy nuggets). History of shoyu and miso in Japan: Hishio, sho, soya or soy, miso or misho, tamari, miso-damari, tare-miso and usudare, shoyu, miso of today.

Shu [Qu; koji] was first mentioned in the *Shu-Ching* [pinyin: *Shujing*] written 3,000 years ago during the Chou [Zhou] dynasty (1121-256 BC), which stated that chu is essential for making alcoholic beverages. Two different colors of chu were described: yellow and white. “The most popular one, which had a yellow colour indicating perhaps *Aspergillus oryzae*, was called yellow robe. The white one is presumed to be *Rhizopus* or *Mucor* and was called white robe.” Originally, chu was made in granular form and called *san-chu*. But by about AD 947-79 chu was developed in cake form called *ping-chu*. Address: Kikkoman Inc., Noda, Japan.

2992. Simas, Luiz; Joels, Bobbi. 1986. Re: Miso, tempeh, shoyu, and macrobiotics in Brazil. Letter to William

Shurtleff at Soyfoods Center, Jan. 7. 3 p. Typed, with signature on letterhead. [Eng]

• **Summary:** “When we returned to Brazil from the USA in Nov. 1981, we decided to hold a series of classes on natural foods processing, including a class on making tempeh at home. (Tempeh was completely unknown around here at that time.) We also began to make tempeh for our own consumption, but ended up setting up a small shop in our apartment. Because of the limited space, our tempeh production never went beyond 50 pounds per month, in spite of the large demand. So after a year or so, as we had originally planned, we handed the business over to a couple of friends who, unfortunately, for many reasons, were not able to continue tempeh production.

“However there is now another group of people making and selling tempeh here in Rio: Jurema and Mariá Paulinho, Rua Raimundo Correia, 27, apt. 504, 22.040 Rio de Janeiro (RJ), Brazil. Phone: (021) 237-7897. We will always be available for providing any kind of information about or classes on tempeh. One of our dreams is to see tempeh introduced in Brazil’s tropical northeast, where an incubator would not be necessary.

“At present we are involved in setting up miso and koji production in our house in the mountains of Minas Gerais for the coming year (1986). It’s an old dream, but it looks like it will finally come true. At first it will be a small-scale farm-house style production.

“Miso and shoyu, as well as tofu, are soy products with a long history in Brazil, mainly due to the large number of Japanese immigrants in Sao Paulo. There are many shops there and some here in Rio which sell Oriental products, including miso, shoyu, tofu and natto. Nevertheless, they are usually semi-industrialized and include sugar, preservatives, etc. among the ingredients.

“Production and consumption of quality miso, shoyu, tofu and natto only began with the arrival of Tomio Kikuchi, a student of George Ohsawa’s and one of the first people to introduce macrobiotics to Brazil. Until today the best known good quality miso and shoyu are the miso and shoyu distributed by Kikuchi’s Instituto Princípio Unico. There are, however, other good misos as well.

“Instituto Princípio Unico, Sao Paulo (SP); Arma-Zen Produtos Naturais Ltda., Rio de Janeiro (RJ); Terrazul, Nova Friburgo (RJ).

“We’re sure there are many, many small producers of quality miso and shoyu all over Brazil, but we don’t know their addresses. There is also a large company which claims to devote part of its production to naturally-fermented miso and shoyu, with no sugar. The company’s name is Tozan. Their factory address is: Bairro Carlos Gomes s/nº, Campinas (SP); phones: (011) 278-2495 or (011) 278-5826.

“There are also two individuals who have a lot of experience in making miso and koji at home. They are available to provide information as well. They are: Dr.

Sakae Maki, Praia de Botafogo, 428, s/304, Rio de Janeiro (RJ), phone: (021) 266-0503; Edson Hiroshi Seó, Fazenda Escola, 45.260 Poços (BA), phone: (073) 431-1108.

“We will continue to give classes on making homemade miso here in Rio, and we plan on eventually turning our small miso shop in the mountains into a school. We will always be available for any type of assistance or information concerning soy products.

“Several years ago the Brazilian Government tried to introduce soybeans in the public’s diet. It was a complete fiasco, mainly because of the lack of information on the part of the authorities. They simply tried to introduce soybeans as a substitute for the traditional black (turtle) beans, and soy milk as a substitute for cow’s milk. It didn’t work.”
Address: Rio de Janeiro, Brazil.

2993. Sarda, Patricia T. 1986. Ancient Japanese foodstuff is key to company’s new line of products. *Leader Newsmagazine (Raleigh, North Carolina)*. Jan. 16-23. p. 14-15.

• **Summary:** Miso, a product that has little or no recognition in the Triangle area, is the key to the success of American Natural Foods in Chapel Hill. John Troy is president of the fledgling company, Carol Rego is a major shareholder, and Larry Sarling is operations manager. The company’s miso based line of natural condiments are now available in over 3,000 specialty food stores and supermarkets across America.

Troy started his company (named Linden’s Elfworks) 8 years ago out of his home in the Triangle. He began by marketing a nutritious candy bar. A few years later the company moved to its present quarters at Suite 21, The Courtyard, in Chapel Hill and began developing Wizard Baldour’s Hot Stuff. The company now has four products: Miso Mustard, Wizard Baldour’s Hot Stuff, The Works, and Smoky Mountain Miso Sauce. Two more are under development: Sea Sauce (a condiment for seafood) and Spark! (a spicy powder condiment). The Miso Mustard is produced in Emeryville, California; the other three are made in Winston-Salem at Mrs. Campbell’s Canning company. A photo shows John Troy at his desk talking on the telephone. On the wall behind him is a framed painting of a wizard; on his desk is a bottle of The Works.

2994. Crump, Emily. 1986. Miso: A new soybean food product is joining the natural foods arena. *Durham Morning Herald (North Carolina)*. Jan. 30. p. 1C.

• **Summary:** A full-page article about American Natural Foods in Chapel Hill and American Miso Co. in Rutherfordton. The miso company produces about 200,000 lb/year of miso. Contains recipes for: Cheese and onion quiche (with red miso). Miso pate. Lentil or split pea soup with miso. Photos show: (1) Jan Belleme, with a baby on her back, hand-mixing cooked soybeans and koji. (2) Jan

transferring the mixture into a giant wooden vat at the American Miso Co. in Rutherfordton, North Carolina. (3) Jars of Miso Mustard, Smoky Mountain Sizzlin’, and BeeNut Butter [made with peanut butter, honey, and miso]—all made by American Natural Foods in Chapel Hill, North Carolina. Address: Staff writer.

2995. *Food Technology*. 1986. Miso. Jan.

• **Summary:** This spot gives basic information about three types of Cold Mountain miso and one type of koji made and sold by Miyako Oriental Foods, 4827 Puente Ave., Baldwin Park, California 91706. Phone: 818-962-9633. A small color photo shows the four products.

2996. Kotsch, Ronald E. 1986. Japan’s natural foods pioneer: Mitoku’s success is due to its network of quality suppliers. *East West Journal*. Jan. p. 18, 20-25.

• **Summary:** Mitoku “has been and (at present) remains the larger of the two main exporters of natural foods from Japan. With its chief competitor, Muso Shokuhin (see Sept. 1984 EWJ), it shares the bulk of a \$14-million-a-year market for superior Japanese food products.

“The central office of Mitoku is located in the prestigious Marunouchi building, in front of Tokyo Central Station... There is a staff of six Japanese and two foreigners (Christopher Dawson, a new Zealander, and Robbie Swinnerton, an Englishman)...

“The founder, sole owner, and guiding spirit of Mitoku is Akiyoshi Kazama, now fifty-five years old... A graduate of Waseda University in Tokyo, Kazama was selected in 1956 to study business in the United States... He became the first Japanese national to serve in the American Army following World War II. After two years as an American G.I. in Korea and Japan, Kazama returned to Japan and settled in Tokyo. He became an import-export agent for a German company dealing in opticals and electronics. Then in 1967 he got involved in the emerging natural foods business...

“At the time the newly formed Erewhon Trading Company of Boston was trying to import foods directly from Japan. Its owner, macrobiotic teacher Michio Kushi, was introduced to Kazama by letter through a mutual friend. Kazama agreed to use his trade expertise to ship \$3,000 worth of high-quality Japanese foods, selected by Kushi, to Boston...

“In 1969 Kazama formed a separate company to handle steadily increasing shipments, and called it Mitoku. Through the 1970s Mitoku continued to grow. It remained the principal supplier of Erewhon, which had become a leader of America’s natural foods industry. Also, it played an important role in the development of other companies such as Janus, Laurelbrook, and Oak Feed... The company moved into the European market as well, becoming a major supplier of Lima of Belgium, Sunwheel of England, and other major distributors...

“When in the fall of 1981 Erewhon finally collapsed, Mitoku was its largest creditor and took a \$300,000 loss. Erewhon’s demise nearly destroyed Mitoku... Mitoku has become a major supplier to Westbrae, Great Eastern Sun, Tree of Life, and the reborn Erewhon, all vigorous American firms...”

“Over the last five years, Mitoku’s annual sales have grown at about 20 percent a year. During the 1984-85 fiscal year gross sales were about \$7.5 million. During that period Mitoku bought some 300 food products from eighty-three producers... It sold to fifty-six customers around the world, including ten in North America and about thirty in Europe...”

“Just this past month, Mitoku has introduced a line of especially high quality products under its own label.”

The author and Mr. Kazama visited a number of Mitoku’s suppliers. Descriptions are given of Mansan Company Ltd. (making tamari and soybean miso since 1895), Sendai Miso Shoyu Co. Ltd. (the Sasaki family which runs the company started making miso in 1853), Fukaya Honten Shoyu (a small maker of organic shoyu).

2997. Sig, Marie. 1986. Soja: la protéine du futur [Soya: The protein of the future]. *Physic*. Jan. p. 32, 34-35, 110. [Fre]

• **Summary:** A brief introduction to tempeh, miso, tamari, tofu, soymilk, and soy flour from a macrobiotic viewpoint. One recipe is given, from the forthcoming French-language book, *Mysteries and Secrets of Soya*, by C. and L. Clergeaud. Address: France.

2998. *SoyaScan Notes*. 1986. Tally and analysis of clips from Soyfoods Clipping Service (Overview). Feb. 6. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The Soyfoods Center received from Luce Press Clippings a total of 311 clips on the subject of soyfoods during the ten weeks from 17 Oct. 1985 to 6 Feb. 1986. These clips were on the following subjects: Tofu 130 clips (41.8% of total), soy ice creams 83 (26.7%; including 49 clips on Tofutti), tofu second generation products 17 (5.5%), whole dry soybeans 17 (5.5%), modern soy protein products 10 (3.2%, incl. isolates and concentrates), soy oil 10 (3.2%), soymilk 9 (2.9%), miso 8 clips (2.8% of total).

2999. Burnett, Richard. 1986. Miso: MEE So–Japanese soybean foodstuff. Buddhist invention, secret behind John Troy’s success [American Natural Foods]. *Chapel Hill Newspaper (North Carolina)*. Feb. 23. p. 1D, 16D.

• **Summary:** A biography of John Troy, whose company buys some 50,000 lb of miso a year from the American Miso Co. in North Carolina. Miso is the oldest condiment known to civilization. About 15 years ago John Troy (a native of Durham, North Carolina) “dropped out” and spent almost 5 years with little or no money. He had previously founded a lucrative chain of stereo stores throughout the

South and had all the money he needed. But he wasn’t happy. He left it all to search for a deeper meaning in life. During his “dropout” years he got interested in what different religions and philosophies taught about higher states of awareness, and the role that food could play. Troy got interested in the nutritional and spiritual benefits of alternative foods, especially soybean products.

Troy said that American Natural Foods, based in Hillsborough, North Carolina, will gross more than \$500,000 in 1985-86, more than double the sales volume of the previous year, which was the company’s first year in business.

Troy first learned about miso about five years ago while he was managing a health food store in Chapel Hill. He and his wife Carol, at the time, had been making and marketing a health food candy bar through their business called Elf Works Inc. They had been buying miso for themselves while trying to find a way to market it to the public. Troy describes miso as “the highest state of what you can do with a bean and a grain; it is the oldest known condiment in civilization.” A photo shows John Troy with four of his products: Hot Stuff, Smoky Mountain Sizzlin’, Miso Mustard, and BeeNut Butter. Each contains miso as a key ingredient. Photos show: (1) John Troy holding one of his miso products, and standing by many cases of these products. (2) A hand pouring a bottle of Hot Stuff. (3) Jars of Miso Mustard, Smoky Mountain Sizzlin’, and BeeNut Butter. Address: Staff writer.

3000. Bassett, Barbara. 1986. Miso. *Bestways*. Feb. p. 32-33, 61. Cover story.

3001. Great Eastern Sun. 1986. Information packet on Miso Master miso (Leaflets). Enka, North Carolina. 5 p. 28 cm.

• **Summary:** Contains the following leaflets: (1) Miso Master miso main selling points. (2) Miso Master misos: Traditional red miso, Mellow white miso, Country barley miso, Mellow barley miso, Sweet white miso, Chick pea miso. (3) Miso Master nutritional information. Address: P.O. Box 327, Enka, North Carolina. Phone: (704) 252-3090 or (800) 334-5809.

3002. Rocheman, Marc. 1986. Les aliments fermentés dérivés du soja [Fermented foods derived from soya]. *Biofutur* No. 43. p. 34-42. Feb. [8 ref. Fre]

• **Summary:** Gives the composition and nutritive value of various soy products: tofu, fermented tofu (sufu), miso, natto, shoyu, and tempeh. Describes the possibilities for use of koji, as a source of proteases and peptidases, in the production of these fermented foods.

3003. **Product Name:** Westbrae Natural Instant Miso Soup & Recipe Mix [Onion, Vegetable, Tomato, Mushroom, or Chili].

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.
Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.
Date of Introduction: 1986. February.
Ingredients: Incl. dehydrated miso, vegetables.
Wt/Vol., Packaging, Price: 1 oz packets. Retails for \$0.70-\$1.00 each.
How Stored: Shelf stable.
New Product–Documentation: Ad (full page) in *East West Journal*. 1986. Feb. Black, green, brown, and white on yellow background. “Years of culture–yours in an instant. What is Miso? Macrobiotics? What did the Ancient Samurais Drink in the Morning? Why Westbrae’s Miso Soups? Who Are We? Since 1970, Westbrae continues to bring to the marketplace ‘foods that sell out from the company that didn’t.’”

3004. Hill, Laura. 1986. Making miso: For this Conway family it is a living and a way of life [Christian and Gaella Elwell of South River Miso Co. in Massachusetts]. *Daily Hampshire Gazette (Northampton, Massachusetts)*. March 14.

• **Summary:** The Elwells are one of the few miso producers in the United States. Their shop is located on Shelburne Falls Road in Conway. They make miso in the traditional way, mixing and cooking by hand, using no automation. To mash the soybeans they tread them underfoot, stomping them like grapes with plastic coverings on their feet.

Christian Elwell’s interest in miso developed from his interest in diet and its relationship to health. When his father died of cancer when Elwell was in his 20’s, it raised a lot of questions for him about food and its impact on wellness. Later, when he was traveling in Iran and India in the Peace Corps and became sick with jaundice, it was another catalyst for his interest in “how to create health and how sickness is developed.” This realization led him to an interest in macrobiotics. He met Gaella in the mid-1970s while they were both studying macrobiotics in Boston.

A photo by Laura Hill shows the company’s owners Christian and Gaella Elwell of Conway, with their children Anni, 6, and Isaiah, 2. They are standing by a sign that says “South River Miso Co.”

3005. American Miso Co. 1986. Hand-crafted organic miso: Made in the USA (Ad). *East West*. March. p. 10.

• **Summary:** This one-third page vertical black-and-white ad begins: “Near the Smoky Mountains in the green, rolling country of western North Carolina, the Miso Master continues a centuries-old tradition of hand-crafted miso.”

“Containing living cultures, they are truly a living food. Look for Miso Master in the refrigerated section of finer natural foods stores everywhere.

“With its velvety, creamy texture and its superb flavor, Miso Master miso is perfect for soups, dressings, dips, spreads and sauces. For free recipes using Miso Master miso, send a self-addressed, stamped envelope to: Great Eastern Sun, P.O. Box 327, Dept. H, Enka, NC 28728. From our kitchen to yours—traditional Japanese miso, made for you, in the USA.”

At the top of the ad is an illustration (line drawing) of a traditional Japanese miso shop, with thatched straw roof and several wooden kegs and barrels outside. Near the bottom of the ad is the Miso Master logo, an illustration showing the head and shoulders of a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso. Below it: “Distributed by Great Eastern Sun, 92 McIntosh Rd., Asheville, North Carolina 28806.”

• **Summary:** An introduction to miso, with recipes. A photo shows John Belleme, Jr., executive chef at a South Carolina country club; he uses miso extensively in his gourmet cooking. Address: Rutherfordton, North Carolina.

3007. *East West*. 1986. The best & worst natural foods. *East West’s* first annual awards. March. p. 83-86.

• **Summary:** “Frozen non-dairy desserts. Best hard-serve product: Rice Dream by Imagine Foods of Palo Alto, California. Leaves all the soy products with their squabbles about tofu content and soy isolate use in the dust.” Address: Massachusetts.

3008. **Product Name:** Miso Master Miso [Country Barley, Traditional Red, Mellow White, Mellow Barley, Sweet White, or Chickpea with Barley].

Manufacturer's Name: Great Eastern Sun (Marketer). Made in North Carolina by American Miso Co.

Manufacturer's Address: 92 McIntosh Rd., Asheville, NC 28806. Phone: 1-800-334-5809.

Date of Introduction: 1986. March.

Ingredients: 1996: Organic soybeans, organic partially polished brown rice, sun dried sea salt, well water. Organically grown/processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 1996: 1 lb plastic tub. Retails for \$6.59 (Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Ad in *East West*. 1986. March. p. 10. Nov. p. 81; *Soy Power*. 1987. Catalog. All 16 oz. Product with Label purchased at Open Sesame in Lafayette, California. 1996. Dec. Price: \$6.59. 4.25 inch diameter lid. Black, brown, and light green printed on clear plastic. An illustration shows the Miso Master logo. Text on the side of the tub reads: “The American Miso Company is

proud to present domestic organic miso.” Soyfoods Center taste test. 1996. Dec. Excellent flavor, color, and aroma.

3009. Mori, Yutaka; Kiuchi, Kan. 1986. [A method for determination of the basic flavor components of miso]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku (Report of the National Food Research Institute)* No. 48. p. 209-12. March. [12 ref. Jap; eng]

• **Summary:** A method for quantitative analysis of the basic flavor compounds contained in miso is proposed. The compounds tested were: pyrazine, 2-methylpyrazine, 2,5-dimethylpyrazine, 2, 6-dimethylpyrazine, trimethylpyrazine, tetramethylpyrazine, N-methylpyrrolidone, benzothiazole, and 2-acetylpyrrole.

3010. Sacolick, Diane. 1986. Where life and livelihood meet: A family macrobiotic food business produces amasake, natto, and mochi amidst the rural Berkshires [Kendall Food Co.]. *MacroMuse*. Winter/Spring. March. p. 24-28.

• **Summary:** “When the Kendalls started making amasake, they began with one five-gallon pot. Today they have the capacity to make 100 gallons of amazake a day with their four 30-gallon pots... Charlie thinks he invented the “milk shake” form of amasake.

On a typical day, wake up time is 5:00 or 6:00 a.m. Charlie only need take a few steps from his home kitchen to the shop. The first job is to pressure cook the rice for the amasake... in a 10-gallon pot. The rice is then allowed to cool overnight slowly without opening the pressure cooker. The next morning the rice is put in earthenware crocks and the koji is mixed in. The earthen crocks give the amasake more of a chocolate like taste. Here it is kept at a temperature of 135-140°F and occasionally stirred for 24 to 30 hours. Then the amasake is ground with blenders and put into a bottling vessel. It is topped with boiling water so the thick amasake will have more the consistency of a drink. Here it sits overnight before it is bottled, put into as walk-in refrigerator for a few days and shipped out.

“Only organic ingredients are used. Koji is prepared especially for the Kendalls the traditional way from milled brown rice using red cedar trays. High quality Lima [from Belgium] or Muramoto sea salt is used in cooking the rice, even though they are at least three times the cost of regular sea salt... Charlie’s Amazuki is made with American organic adzuki beans. The beans are fermented with the rice; this can be tricky since beans sour more easily than grains. I found the Amazuki slightly reminiscent of chocolate milk and enjoyed its unusual flavor.

“Charlie says natto, a soy food, is the best product he makes, ranking high in the world of medicinal foods, along with umeboshi and miso.” A description of the process follows. Photos show: (1) The Kendall’s home and food company. (2) Charlie and Yoko Kendall, and their young son, standing by the Kendall Food Co. sign. (3) Charlie Kendall—up close.

• **Summary:** Adapted with permission from the book *Cooking with Japanese foods: A guide to the traditional natural foods of Japan*. Contains long sections on miso, shoyu, tamari, umeboshi, shiitake, and sea vegetables. Address: Rutherfordton, North Carolina.

3013. **Product Name:** [Shoyu, Tamari, and Miso (Barley, or Rice)].

Manufacturer’s Name: Celnat (Importer). Made in Japan. **Manufacturer’s Address:** Z.I. de Blavozy-Saint-Germain, 43700 Blavozy, France. Phone: 71.03.04.14.

Date of Introduction: 1986. April.

New Product–Documentation: Ad in *Le Compas*. 1986. March-April. p. 36.

3014. Celnat. 1986. Une large gamme d’aliments de base [A large line of basic foods]. *Compas (Le) (France)* No. 26. p. 36. March/April. [Fre]

• **Summary:** A choice of proteins: A line of legumes. Shoyu, tamari, and miso made from soya. Soyo brand soymilk, 100% non dairy (végétal) without added sugar. Wheat gluten flour for making seitan. Whole grains. A large line of macrobiotic specialties. Futons.

Most of Celnat’s cereal and legume products bear the CINAB logo meaning organically grown as certified by the Comité Interprofessionnel National de l’Agriculture

Biologique. Address: Z.I. Blavozy–St. Germain, 43700 Brives-Charensac, France. Phone: 71.03.04.14.

3015. Goldstein, Nora. 1986. Small company with a big vision [John Troy and American Natural Foods in North Carolina]. *In Business*. April. p. 30-31.

• **Summary:** John Troy “is a partner in American Natural Foods, based in Hillsborough, North Carolina. The company was started two years ago to develop and market condiments made with miso, a soybean-derived flavor enhancer. According to Troy, miso is the oldest known condiment to man, and current research shows it may have properties that help to prevent cancer. It can also be used as a salt substitute.

“The first product in American Natural Food’s line was developed by ‘accident.’ Troy, who gained valuable business experience by launching a major stereo chain in the South in the 1960s, became very involved with healthy eating and in the early 1970’s, he founded a business with his wife making ginseng candy bars. One day, while taking a lunch break, a string of hot red peppers fell into a built-in food blender.” From that emerged the company’s first miso product named Hot Stuff.

“A source of miso was located in North Carolina, and Troy and his wife began producing and marketing Hot Stuff along with the ginseng candy bars. In 1984, they decided to sell the candy company and form another business—American Natural Foods (ANF)—to develop and market miso-based condiments. The company is uniquely managed, with the principals spread out around the country.

“‘We have five people, all on the front line, who manage themselves,’ says Troy. ‘I do R & D and new product development, raise money, and keep the vision. Our director of marketing and advertising is in Boston [Massachusetts] and our manufacturing plant, owned and operated by another stock-holder, is located in Winston-Salem, North Carolina.’

“The partners sold 15 percent of the company’s stock to raise \$150,000 in initial capital. Since then, an additional \$350,000 was raised by selling stock to outside investors. There are now eight products sold by ANF, including a barbecue sauce, peanut butter, relish, a ginger sea sauce and a dried spice. Sales for the first year were \$250,000; for fiscal year 1985, which end in June, sales are expected to reach \$500,000, with \$1 million projected for fiscal year 1986.” So far, ANF’s products are sold mostly in natural- and health food stores—3,000 outlets nationwide. In the future, they plan to enter grocery stores, delivering their products direct to the store door, starting in North Carolina. “Troy describes the method as [bottom-up] guerilla marketing warfare. ‘That’s how the little guys get started in the grocery business,’ he says. ‘We are employing that strategy in North Carolina and after six months, our sales in the concentrated area between Raleigh and Charlotte are

exceeding our sales nationwide.’” A photo shows Troy holding a bottle of Miso Mustard.

3016. Maeda, Toshiie. 1986. *Miso no furusato* [The homeland of miso]. Tokyo: Kokon Shoin. 258 p. April. Illust. 20 cm. [124 ref. Jap]

• **Summary:** Contents. 1. The homeland of miso: The birthplace of miso. Cultural factors that gave birth to miso. 2. The paths of dissemination of miso: Southern and northern paths in China. The arrival of miso in Japan and its spread there. History of miso in Japan. 3. The taste and nutritional value of miso: Theories of change in miso. Miso in our lifestyle. 4. Miso as a commercial product: The movement of miso from producer to consumer. The price of miso. Future prospects for miso culture. Present status of changes in miso culture. Explore these new miso products from the principles of changes in miso culture. Proposal for the future of miso culture.

This creative book discusses miso’s history, the present status of the Japanese miso industry, the future of miso in the westernized Japanese diet, and the fact that the use of miso mainly in miso soup presents a big problem. The first solution to the problem is to use miso in thick ketchup-like sauces. The second is to return to the non-salted fermented foods such as Japanese natto, Nepalese kinema, Indonesian tempeh, and Chinese soy nuggets (shi), which are the ancestors of miso. He emphasizes tempeh, which he feels is a wonderful food that can be used in various ways, and is nutritious and healthy. He explains that tempeh is becoming popular in the USA and Europe, and concludes that tempeh alone can be used to start a food industry. Address: Sozosei Kaihatsu Kenkyusho Shusai.

3017. Soppe, Fennie. 1986. Jonathan, Histoire d’un boucher reconverti. Interview de Jos Van De Ponselee [Jonathan. History of a reconverted butcher. Interview with Jos Van De Ponselee]. *Compas (Le) (France)* No. 26. p. 14-16. March/April. [Fre]

• **Summary:** It all began in 1974, when Jos’s wife had serious health problems. There were suspicions of lung cancer. She went to Switzerland for care, and had a fever of 38-40°C for 6 months without improvement. One day someone gave them a small book about natural foods. She then began to eat macrobiotically and her fever disappeared after 3 months.

At the beginning, this diet was not at all attractive. The food was very poor, and Jos began to ask himself questions and to read books on the subject. He learned that it wasn’t a bad diet at all. Not wanting to have to prepare two types of food, he started to eat the same diet as his wife. His health did not improve much, but he found he had the capacity to work much more, and a need for less sleep. His days started at 6:00 A.M. and ended between 11:00 P.M. and midnight.

Upon seeing the results, he began to think and live differently. In the long run, the work at the butcher shop worried him. He no longer ate meat, but he was still selling it. That wasn't logical. He then decided to sell organic meat products at the butcher shop, and they sold very well. However that was a form of hypocrisy.

You must understand that at that time, macrobiotic people in the area were very fanatical. Meat was considered bad, in fact a poison. A more moderate viewpoint was needed; a bit of meat in itself is not bad, but its consumption in large quantities can present problems.

Jos opened two natural food shops in succession, and they were a success in part because he had experience in running a business. He tried to sell his butcher shop, which was very large. Through his new shops he met people who wanted to stop eating animal proteins, but they knew of no replacement. Neither tofu nor seitan nor hardly any other beans were available at that time. This made it hard for a person to change his or her diet.

Jos attended a seminar conducted by Michio Kushi at Drogen. They talked about these problems. Michio spoke to Jos about miso and tamari, and advised him to come to Boston, Massachusetts, where he could learn and see everything. He did. Indeed miso and tamari were available, but they were made overseas. He was somewhat deceived in the early days. Most of the products came from Japan. During the same period he worked at the famous restaurant The Seventh Inn. He became friends with Japanese and they worked together making seitan. Finally, he started commercial production with two Americans.

Tofu was very well known, but it was made in [Boston's] Chinatown. The Chinese did not want to show others how to make it, but they were allowed to look. This interested him very much.

Upon returning to Belgium, after his studies in Boston, Jos began commercial production of seitan. At the beginning people were very closed. They thought that one should consume only beans. Their fanaticism seemed very natural to them, but that made it very difficult for Jos to survive economically by making only seitan. He started by producing 500 gm a week of seitan for Souen, a macrobiotic restaurant in Gent [Gand]. He urged the restaurant to serve seitan to each customer in a familiar form. That was successful. After several months, the natural food stores began to order seitan from him; that was his goal. Finally he began the production of fresh organic tofu. He encountered new opposition when he suggesting sterilizing the tofu, which would cause loss of vitamin C, etc.

People got to know seitan but grew tired of it, so now he has the seitan burger between two buns, with onion and lettuce. They are also thinking about introducing seitan brochettes and seitan in sauces. The starch left over from making large quantities is used in making soups, spreads for bread, goulash, etc.

How did his customers react initially to all this? They thought he was crazy—in 3 ways. (1) They thought macrobiotics was folly; (2) Who but a fool would sell a butcher shop that was doing so well, employed 16 persons, and was the first to sell organic meat with great success. They thought that America had made him lose his head; (3) They thought artificial meat was absurd and would not sell. But these people have changed their opinions as things have developed.

His best invention is seitan sold sterilized in jars; it is now a very successful product. He is also very proud of his tofu burgers (*les beignets*, *les ganmos*; made from tofu, sesame seeds, onions, mushrooms, and arrowroot), his sauces, and his mushroom tarts. Neither his soy croquettes nor his carob products sell well. His basic products are seitan, tofu, and mochi (made according to a traditional Japanese recipe). The company will soon focus more on exporting its products, especially to Germany, followed by France (starting in 1987) and Austria. He has created a company in France named Jonathan France (La Comba 24620, Les Eyzies. Phone 53.06.94.68), directed by Frenchmen, because it is very difficult to export to France; he has been trying for 2 years.

Black-and-white photos show: (1) A portrait shows Jonathan, with a large beard, rimless glasses, and thinning hair. (2) Twenty-three of his sterilized products in jars, which have a shelf-life of 2 years. Among these are Sojapastei, Sojaboont Jes, Azukiboont [Azuki bean] Jes, Brown Rice Casserole with Seitan, and Tofu Salade. The company is studying a tempeh spread for bread. The company now has 16 employees, including 3 in stores as a representative. Most of the employees like this food. Not all are macrobiotic but most have changed their diet, usually without fanaticism.

The company's name Jonathan comes from the name of the book *Jonathan Livingston Seagull* (Jonathan Le Goëland), about a seagull who wants to live differently. Jos believes that vegetable proteins can play an important role in world hunger. His dream, which he hopes to realize, is to establish small food companies in Zaire, Rwanda, and all of southern Africa. "For example, a small tofu machine can produce 800 to 1,000 cakes of tofu/day. I would like these people in poor countries to be able to make tofu themselves."

Jos is not a vegetarian. He still likes meat and eats it in small quantities, often fish or organic meat. He has 3 children. Address: Pays-Bas (Netherlands).

3018. Business Trend Analysts, Inc. 1986. The health and natural food market. 2171 Jericho Turnpike, Commack, NY 11725.

• **Summary:** Section VII is titled "The Market for Soyfoods." It is a combination of material taken without permission from Shurtleff & Aoyagi's *Soymilk Industry and*

Market (especially the overview on page 96) and little bits and pieces for various sources that fail to give an accurate picture of this market. The report repeatedly speaks of the “soyfoods market” without defining which product types it is including. Part of the information is said to be based on “A special survey of 5,000 households, providing up-to-date information on changing consumer attitudes and buying patterns with respect to soyfood products.” The results of this survey include consumption levels by household income, type of retail outlet, geographic region, race, age and presence of children. They project manufacturers’ sales of soyfoods to be \$499.5 million in 1995, assuming a compound annual growth rate of 15.3% from 1985 to 1995. Generally a disappointing study, especially for the price. Address: Commack, New York.

3019. Katagiri, M.; Shimizu, S.; Kaihara, H. 1986. Miso no esuteru kei shibô-san, yuri shibô-san oyobi yuki-san no chûshutsu to gasukuromatogurafimiso seibun no kenkyû. I. [Separation and gas chromatography of esterified and free organic acids in miso]. *Nippon Nogeikagaku Kaishi (J. of the Agricultural Chemical Society of Japan)* 60(5):385-87. May. [12 ref. Jap; eng]

• **Summary:** A method for extraction of lipids from miso and successive detection of ethyl esters, total glycerides and free organic acids was developed. The yield of the first diethyl ether extract obtained by this method was about twice that of the conventional celite filtration method. This procedure is rapid and reliable. Address: Dep. of Home Making, Iida Women’s Junior College, Matsuo 610, Iida-shi, Nagano 395, Japan.

3021. Rosoff, Peggy. 1986. Is dried miso good for you? *MacroMuse*. Spring. p. 11.

• **Summary:** Freeze-dried miso, as sold by Edward and Sons, contains 8,000 units of live lactobacillus per gram. Address: Rockville, Maryland.

3022. *Toyo Shinpo (Soyfoods News)*. 1986. 7 mm kaku no Tsubu Dôfu. Nihon Biinzu kongetsu kara shinhatsubai [Firm tofu in 1/4 inch cubes. Nihon Beans starts to sell it this month]. June 16. p. 1. [Jap; eng+]

• **Summary:** This diced, firm lactone silken tofu is packed in a polypropylene container. A convenience food, it can be used in Mabo Tofu, miso soup, etc.

3023. Belleme, Jan; Belleme, John. 1986. *Cooking with Japanese foods: A guide to the traditional natural foods of Japan*. East West Health Books, 17 Station St., Brookline, MA 02146. xi + 220 p. Illust. Index. 25 cm. [45 ref]

• **Summary:** A good study from a macrobiotic viewpoint, with more than 200 macrobiotic recipes. The authors studied in Japan and speak Japanese. Contents: Foreword. Acknowledgements. Introduction. Fermented Foods: miso, shoyu, tamari, brown rice vinegar, sake, mirin, koji, amazake, pickles, umeboshi, ume su, medicinal teas, ume extract, bonito flakes, natto. Noodles: cooking noodles, udon, soba, soba, somen, clear noodles. Grains, incl. rice, mochi, seitan, fu gluten cakes, hato mugi [*hatomugi*] (Job’s tears), rice syrup, rice bran. Vegetables: shiitake, daikon, Hokkaido pumpkin, Chinese cabbage, burdock, jinenjo, lotus root. Sea vegetables: kombu, nori, wakame, hijiki and arame, kanten (agar). Beans: azuki beans, black soybeans, tofu. Condiments: kuzu, dark (toasted) sesame oil, goma (sesame seeds), tekka, shiso momiji (shiso leaf condiment), wasabi. Teas. Cooking utensils. Appendix: Composing meals, pronunciation guide, suppliers. Bibliography.

Amazake (p. 39-45). Contains a ½ page description plus good instructions for making basic amazake (thick “pudding” and thinner beverage), both from glutinous (“sweet”) rice. Also recipes for Vanilla Amazake Pudding, Amazake Cream Puffs, Neapolitan Parfait, Carob Amazake Brownies, Bob’s Coconut Amazake Macaroons, Amazake Bread (yeasted), and Unyeasted Amazake Bread. Perhaps the most lengthy information on amazake available in English up to this time.

Hato mugi (“Job’s tears,” p. 93) “resembles barley, but it is actually a member of the rice family. An easily digestible whole grain with only the tough outer husk removed, hato mugi contains less vitamin B-1 than brown rice but approximately twice as much protein, iron, vitamin B-2, fat, and slightly more calcium.” It has long been used in China and Japan as a medicinal food, “for strengthening the stomach, purifying the blood, and restoring health. Since it is so effective in helping the body to discharge toxins, people who are sick and weak, and women who are pregnant, nursing a baby, or menstruating should eat it sparingly.” Address: Rutherfordton, North Carolina.

3024. Chin, K.-D.H.; Koehler, P.E. 1986. Effect of salt concentration and incubation temperature on formation of histamine, phenethylamine, tryptamine and tyramine during miso fermentation. *J. of Food Protection* 49(6):423-27. June. [29 ref]

• **Summary:** Histamine, tryptamine, tyramine, and phenethylamine are biologically active (biogenic) amines which can have important psychoactive and vasoactive effects in humans. Tyramine, histamine and phenethylamine are pressor amines that cause changes in blood pressure. Tyramine and phenethylamine have also been implicated as

causal agents in migraine headache. Biologically active amines have been found in many foods, especially fermented foods such as cheese, sauerkraut, wine and fermented meat. These biogenic amines are produced when specific amino acids undergo decarboxylation catalyzed by specific decarboxylase enzymes produced by microorganisms active during fermentation.

Misos containing 5% and 10% salt (NaCl) were prepared and incubated at 25 and 35°C. Higher amine levels were found in the low salt than in the higher salt miso. Incubation temperature within the range examined had little effect on amine formation in miso. Address: Dep. of Food Science, Univ. of Georgia, Athens, GA 30602.

3033. **Product Name:** Smoky Mountain Miso Sauce.
Manufacturer's Name: American Natural Foods, Inc.
Manufacturer's Address: Box 2321, Chapel Hill, NC 27514.

Date of Introduction: 1986. August.

Ingredients: Incl. miso, tomatoes, tomato paste, apple cider vinegar, herbs and spices (cumin, oregano, cayenne peppers).

Wt/Vol., Packaging, Price: 12 oz glass bottle with red plastic twist-off cap. Retail for \$2.39 (1986/08).

How Stored: Shelf stable.

New Product-Documentation: Label. 1986, undated. This is a miso-based barbecue sauce. "You'll love it on chicken!"

Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India. [23 ref]

• **Summary:** "Products such as soy sauce, soy paste (*Tao-Jeow*), fermented soybean curd [*Sufu*] and *Thua-nao* constitute the major traditional fermented foods [of Thailand]. The first three are common throughout the country. *Thua-nao* is popular in northern Thailand." Flowcharts and details are given concerning the production

of each of these products. Address: Dep. of Food Science & Technology, Kasetsart Univ., Bangkok, Thailand.

3035. Lee, Cherl-Ho. 1986. Traditional food technologies and their recent developments in Korea. In: V.H. Potty, et al. eds. 1986. Traditional Foods: Some Products and Technologies. 292 p. See p. 178-90. Aug. Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India. [14 ref]

• **Summary:** The traditional Korean soybean fermentation technique is unique. Soybean is the only ingredient used, and sauce and paste are made simultaneously. In the first step of the fermentation, meju is made from cooked and mashed soybean balls, which contain no salt. Molds, mainly *Aspergillus oryzae*, grow on the surface of a meju ball, and bacteria, mainly *E. [sic, Bacillus] subtilis*, inhabit the inside of the ball. One part of meju, one part of salt, and 4 parts of water are mixed in earthen jars, and ripened for several months. The supernatant dark brown liquid of meju-brine mixture is soybean sauce and the brownish solid residue is soybean paste.

Kochujang, a mixture of fermented soybean paste and ground red pepper, is a unique food product available only in Korea; it reflects the hot spice preference of its people. It is prepared by mixing ground meju powder with steamed cereal flour, red pepper, salt and water and allowing further fermentation and ripening of the mixture in earthen jars for several months. Flowcharts are given for soy sauce, soy paste, and kochujang.

Under "Recent developments" (p. 187), the development of improved meju and meju-brine are discussed. Address: Dep. of Food Technology, Korea Univ., Seoul, Korea.

Held June 1983 at CFTRI, Mysore, India. [7 ref]

• **Summary:** Contents: Introduction (ways of classifying traditional foods). Structural characteristics of traditional food industries in Japan. Traditional food processing technologies. Problems and reevaluation of traditional foods. New food processing technologies applied to traditional foods. Technologies applicable to traditional foods. Assessment in modernization of traditional food production. Some activities related to traditional foods. Conclusion.

Traditional foods can be classified as staple or non-staple, fresh or processed (processing technologies include fermentation [e.g. miso, soy sauce, natto], salting, acidifying, drying after freezing [kori-tofu], sun-drying, fractionation [tofu], fabrication [ganmodoki], simulation of animal foods [soy milk, ganmodoki, su-ho-tai made from yuba in China]), animal or vegetable origin, and region or national production.

In Japan, rice consumption is decreasing year after year. It is thus not surprising that consumption of traditional foods closely associated with rice production are also decreasing. The reevaluation of traditional foods and their advantages and disadvantages are discussed. New food processing and packaging technologies are being applied to traditional foods, including tofu, miso, natto, and koji. Recently a method has been found to extend the shelf life of natto beyond the traditional 1-2 day period. Miso has been freeze-dried.

"Another application of a new process for the traditional foods is the emulsion curd which is a semi-solid mixture with definite proportion of soybean protein, oil and water. It keeps its form without flow. Even the dried or frozen product recovers its original texture by hydration or thawing. Therefore, it is used as a substitute in dried or

frozen *Tofu*. Regular *Tofu* cannot recover its texture once it is frozen or dried...

Miso can be enriched with vitamin B-2 and calcium, and its salt content lowered. Since 1980 the Laboratory of Food Science at Kyoritsu Women's University has been conducting a research survey on traditional foods and dishes in Japan in cooperation with the Cooking Research Laboratory. "This project consists of three components: (a) survey of the present status of traditional foods on local basis at respective regions by visiting prefectural research organisations—universities and colleges; (b) sending questionnaires to students for seeking information on the position of the traditional foods in the dietary patterns of individual homes and also to obtain their comments on the future prospects of the local traditional foods; (c) and documentation regarding local traditional foods, followed by classification according to preparation or cooking method for analysis. On the basis of the collected data, the relationship between each local traditional food and its natural, cultural and historical background has been studied and published in the university's journals. More efforts are being made to identify the reasons as to why and how some traditional foods have survived in certain regions, while the others have disappeared or reached the verge of extinction.

"Another related activity is the one carried out by Ajinomoto Company, a major food manufacturer in Japan, which has got the modern audio-visual media, video-tapes and 36 mm-films. Their team has been documenting the processing of some selected traditional foods like *Tofu*, *Yuba*, *Fu* and such other foods as demonstrated by professionals by using the old traditional methods and facilities. This would help in the documentation of traditional technologies before they disappear in the event of modernisation of such foods. Such tapes and films have been made available by the company...

"Traditional foods, especially those of plant origin, are prepared by such complex multi-step processes as to be called 'products of human wisdom.' Therefore there is so much to learn from such products if serious attention be paid. Indeed they have great potential for developing new food industries." Address: Kyoritsu Women's Univ., Tokyo, Japan.

• **Summary:** Contents: Introduction. Tempe. Oncom. Taucu and soy sauce. Tape (tapeh) and its products. Brem wine. Brem cake. Terasi. Salted eggs and pindan. Pindang (made

from salted fish). Address: Food Technology Development Centre, Bogor Agricultural Univ., Indonesia.

3040. Yin, Zong Lun. 1986. Development and industrialization of traditional food production in China. In: V.H. Potty, et al. eds. 1986. *Traditional Foods: Some Products and Technologies*. 292 p. See p. 191-200. Aug. Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India.

• **Summary:** Under "Oilseeds, Soy products," the author discusses soymilk, soybean curds (*tofu*; soft *tofu* is popular in south China and hard *tofu* in North China), fried bean curd, smoked bean curd, "stink" flavoured bean curd, soymilk skin sheet [*yuba*], dried soymilk skin sticks [*bamboo yuba*], fermented bean curd or soy cheese, and soybean powder.

Under "Condiments," soy sauce is discussed. Note: This is the earliest English-language document seen (Oct. 2008) that uses the term "soymilk skin" or "soymilk skin sheet" to refer to *yuba*, or that uses the term "dried soymilk skin sticks" to refer to *bamboo yuba*. "These products form an important part in a vegetarian's diet and are used in conjunction with other ingredients to prepare imitation meat and fish like products for vegetarian dishes" (p. 194).

"Soymilk is a very popular breakfast beverage. In order to supplement milk supplies and also meet the special needs of those who, for some reason cannot drink milk, processing factories have been set up with relatively large-scale production capacities for soymilk. With the same distribution pattern as milk, soymilk is supplied to various catering departments, schools, kindergartens, nurseries and families. The process employed for soymilk ensures destruction of trypsin inhibitor and effective deodorization to reduce the unpleasant bean-taste...

"Fermented bean curd or soy cheese can be produced by the fermentation of bean curd. The fermented bean curd may differ in shape (square bits, cubes), colour (white, red), flavor and smell; the products can also be steeped in seasoned rice wine or preserved with drags of rice wine. Sometimes they contain added pepper, rose leaves or shrimp spawn. The traditional production procedure is very subtle. The aging process requires high levels of skill and experience. The product is liable to break down and careful handling is needed. Presently, a new type of fermented bean curd in the form of paste which is more amenable to handling and packaging, and consuming has appeared on the market. However, this product does not conform to Chinese traditional eating habit and is, therefore, now [not?] widely accepted, either for nutritional value or flavour. Soy cheese has a great potential for development...

"In several baby food recipes, soybean constitutes an important source of protein. The well known milk substitute

5410 formulated during the 1950s contained soybean powder as the main ingredient. Formula 5410 has proved to be a success in terms of its nutritional value. It has become the basic recipe for many milk substitutes. Some factories use spray drying process to produce instant blended milk powder consisting of soymilk, milk and other ingredients; they have gained some technological and financial benefits. In recent years, there has been a continuous flow of such products into the market.

“Based on previous research efforts, and in conformity with China’s present situation, work is being done to develop an oil-containing concentrated soy protein. The techniques involved have certain positive characteristics. The end product can be a liquid for direct use as a food ingredient or a spray-dried powder for the formulation of dry-mixes.” Address: Research Inst. of Light Industry, Beijing, People’s Republic of China.

3041. Westbrae Natural Foods. 1986. Distributor catalog, Northeast delivered pricing: Sept. 1, 1986. Emeryville, California: Westbrae. iv + 17 + [13] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a light blue background. Pages i-iv are general information, 1-9 are a computer-printed price list, and 11-17 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) including the following Westbrae products: (1) Malted’s (2 new flavors—Java and Almond. No caffeine (c) 1984). (2) Malted’s: “The Cadillac of soydrinks” (Q&A). June 1986. (3) The uncommon ramen—whole wheat, 12 flavors in all. (4) Instant vegetable miso soup. 3042. Arocena, Javier. 1986. Re: Brief history of the soyfoods company Zwaitzo in Spain. Letter to William Shurtleff at Soyfoods Center, Sept. 10. 2 p. Typed, without signature on letterhead. [Eng]

• **Summary:** “I’ve been working for the last 4 years making tofu, seitan, and tempeh, in a craftsman way, in the North of Spain, in the Basque country. Unfortunately in all of Spain we are only two people making those kind of products, even if slowly, slowly, people are asking us more and more for them every day. I have graduated in biology, and so have a background in what I am doing. I’ve really found myself useful for the rest of the world, and enjoy my life and work... I’d like to ask if there is any possibility of working for a short time (a summer or a month) in a place where I could learn how to make miso, tamari, natto, sufu, and soynuts.” Address: Zwaitzo, Correria, 39-01001 Vitoria-Gasteiz, Spain. Phone: 945/28 86 30.

soyfoods in Malaysia. In: F.G. Winarno, ed. 1986. International Soyfoods Symposium. xiv + 403 p. See p. 59-73. Held 16-18 Sept. 1986 in Jogjakarta, Indonesia. [38 ref]

• **Summary:** Contents: Abstracts. Introduction. Present status of soybean utilization in Malaysia. Manufacture of traditional fermented soyfood in Malaysia. Manufacture of traditional non-fermented soyfood in Malaysia. Research and development of soyfood in Malaysia. Conclusion. Address: Extension Services, Food Technology Div., Malaysian Agricultural R&D Inst., P.O. Box 202, Serdang, Selangor, Malaysia.

3044. Fukushima, Danji. 1986. New development in the process of traditional soyfoods in Japan. In: F.G. Winarno, ed. 1986. International Soyfoods Symposium. xiv + 403 p. See p. 21-57. Held 16-18 Sept. 1986 in Jogjakarta, Indonesia. [22 ref]

• **Summary:** Contents: Abstract. Soy milk. Tofu. Soy sauce. Miso. Natto.

Table 1 (p. 28) shows changes in the size of the soymilk market in Japan from 1979 to 1985. For each year there are statistics for the amount of soymilk sold (in kiloliters), the ratio of that amount to the amount sold during the previous year, the total retail value in yen, the ratio of the retail value that year to the value the previous year, and the ratio of the retail value that year to the value in 1979. The amount of soymilk sold in million liters is as follows: 1979—6.5 million liters. 1980—12.0. 1981—25.2. 1982—54.3. 1983—111.5. 1984—84.013. 1986—55.354.

Also contains a detailed analyses of the off-flavors in soymilk. These off flavors are brought about through the hydrolysis of the glycosides by the β -glycosidase contained in soybeans. Contains 46 figures, including many photos, flowcharts, and equipment designs. Address: Food Research Inst., Kikkoman Co. Ltd., 339 Noda, Noda City, Chiba prefecture, Japan.

3045. Fukushima, Danji. 1986. Preservation of traditional soy products. In: F.G. Winarno, ed. 1986. International Soyfoods Symposium. xiv + 403 p. See p. 267-93. Held 16-18 Sept. 1986 in Jogjakarta, Indonesia. [25 ref]

• **Summary:** Contents: Abstracts. Soy sauce and miso. Soy milk, tofu, and their related products. References. Address: Food Research Inst., Kikkoman Co. Ltd., 339 Noda, Noda City, Chiba prefecture, Japan.

3046. **Product Name:** Sweet Cloud Sesame-Miso Munchies.

Manufacturer’s Name: Great Eastern Sun (Marketer-Distributor). Made in North Miami, Florida, by Sprout Delights Bakery.

Manufacturer’s Address: 92 McIntosh Rd., Asheville, NC 28806. Phone: 704-252-3090.

Date of Introduction: 1986. September.

Ingredients: Sweet Cloud Rice Syrup, crisp brown rice [like brown Rice Krispies], tahini, mellow white miso, pure vanilla, natural flavor.

Wt/Vol., Packaging, Price: 1.33 oz (38 gm) plastic bag. Retail for \$0.69 (11/91).

How Stored: Shelf stable.

New Product–Documentation: Soya Newsletter. 1987. Nov/Dec. p. 7. Talk with Bruce Sturgeon of GES. 1988. Jan. 27. Gave manufacturer and introduction date.

Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 2.75 by 4.5 inches. Plastic bag. Tan, black, dark red, and white on pink. Illustration of white clouds against a pink sky. “All natural.” Soyfoods Center product evaluation. 1991. Nov. 28. Chewy and delicious.

Talk with Steve Bern of Sprout Delights. 1992. July 11. He introduced other flavors of these Munchies in about 1985 or 1986, then later Great Eastern Sun got interested in them shortly after GES introduced Sweet Cloud Rice Syrup in a jar. Only the sesame-miso flavor contains miso.

3047. INTSOY. 1986. International Soybean Program (Leaflet). Urbana, Illinois. 3 panels each side. Front and back. Each panel: 23 x 10 cm. Undated.

• **Summary:** Printed golden yellow, green, and brown on white. On the front panel is an illustration of a man pouring soybeans into a mill, whence they flow into a bucket on the floor. The five illustrations in this leaflet are taken (without permission) from *The Book of Miso*, by Shurtleff & Aoyagi. Contents: Improving human nutrition with soybeans. A worldwide network. Whole soybean utilization—A major focus. A record of achievement. New products and processes. A program of mutual benefits. Contact us for further information. Address: International Soybean Program, Univ. of Illinois at Urbana, 113 Mumford Hall, 1301 W. Gregory Dr., Urbana, Illinois 61801.

3048. Katagiri, Mitsuaki; Shimizu, Sumio. 1986. Kaku-shu miso-chû no gasu kuromatogurafii ni yoru esuteru gata shibô-san, yuri shibô-san oyobi yûki-san no teiryô [Gas chromatographic determination of esterified and free organic acids in various kinds of miso]. *Nippon Shokuhin Kogyo Gakkaishi (J. of Japanese Society of Food Science and Technology)* 33(9):667-73. [16 ref. Jap; eng]

• **Summary:** Twenty misos were analyzed by gas chromatography. Contents of ethyl esters of fatty acids were about double the values previously reported by the celite method. Approx. 50% of the total fatty acids in the original glycerides were present as their ethyl esters in miso. Address: Dep. of Domestic Science, Iida Women’s Junior College, Matsuo 610, Iida-shi, Nagano 395, Japan.

3049. *MacroMuse*. 1986. Forum: Miso for infants and *MacroMuse* integrity—under fire. Sept. p. 29.

• **Summary:** Discussion of the “standard” macrobiotic recommendation to avoid giving salted foods to babies who are not yet walking. Jan Belleme believes that giving salt in miso is okay since it is different from straight salt.

3050. McSweeney, Daniel. 1986. Consumer survey 1986. *Whole Foods*. Sept. p. 39-40, 43.

• **Summary:** This survey appeared as a readership survey in the July 1986 consumer-directed *EastWest* magazine. The sample size is not given. The percentage of respondents who purchased a type of product at a natural foods during the past 12 months, in descending order of popularity and by sex: Grains: women 91.1%, men 84.4%. Tofu: women 85.8%, men 82.2%. Miso: women 72.3%, men 66.6%. Sea vegetables: women 68.2%, men 60.0%. Yogurt (dairy): women 48.8%, men 44.4%. Nondairy frozen desserts: women 45.8%, men 40.0%. Soy milk: women 41.1%, men 37.7%. Natural meat: women 10.0%, men 11.1%.

The top 5 reasons for shopping at natural foods stores are: Food quality (32.6%), better selection (21.8%), brands preferred (15.5%), helpful clerks (9.1%), individual food dept. (6.9%).

Foreword by Sheldon Margen, M.D. Professor of Public Health Nutrition. University of California, Berkeley. Illust. Index. 23 cm. Original ed. published Sept. 1976. [234* ref]

• **Summary:** Contents: Preface (by Laurel). Introduction: The work at hand (Carol Flinders). Recipes and menus (includes 500 recipes): Bread, breakfast, lunch, dinner, salads, soups, vegetables, sauces & such, heartier dishes, grains & beans, desserts, menus. A handbook of nutrition: Introduction: The search for an optimal diet (Brian Ruppenthal), *The New Laurel’s Kitchen* food guide. Special concerns: Pregnancy, infancy & early childhood, controlling your weight, nutrition in later years, sports (athletic activities), the vegan diet, diet against disease. The nutrients: The energy-yielding nutrients, vitamins & minerals, food processing, conserving nutrients in the kitchen, suggestions for further reading, recommended dietary allowances, nutrient composition of foods. Address: Blue Mountain Center of Meditation, Petaluma, California.

3052. **Product Name:** Vegemite. Concentrated Yeast Extract.

Manufacturer’s Name: Vegemite (Importer). Made in Australia.

Manufacturer’s Address: 16247 Illinois St., Paramount, CA 90723. Phone: (213) 633-2222.

Date of Introduction: 1986. September.

New Product–Documentation: Ad in Natural Foods Merchandiser. 1986. Sept. p. 81. “Vegemite gives food a mighty healthy flavor.” It has existed in Australia for over 65 years. Replaces high sodium bouillon cubes. “It adds zip to tofu.” An illustration of the jar and label is shown.

Ad (quarter page, black and white) in Whole Foods. 1987. May. p. 133. Company is now Australasia Ventures, 2882 Gundry Ave., Long Beach, CA 90806. Same ad as 1986.

3053. Winarno, F.G. 1986. Traditional fermented soyfoods. In: F.G. Winarno, ed. 1986. International Soyfoods Symposium. xiv + 403 p. See p. 3-19. Held 16-18 Sept. 1986 in Jogjakarta, Indonesia. [36 ref]

• **Summary:** Contents: Introduction. Tempe. Some tempe products. Flavor and color of tempe. Tempe and wholesomeness. Tauco. Kecap (soy sauce).

“Tempe was formerly considered an inferior food in part because of its costs, compared to other protein foods such as meats, fish and eggs. Over the last 15 years the attitude towards tempe has changed. Today, more attention has been given to tempe because it is an inexpensive source of proteins, vitamins and calories. The total annual production of Indonesian tempe is about 500,000 tons. However, tempe production is still a household art. Most of the 41,000 small cottage industries that make fresh tempe daily are family run and employ about 128,000 workers. Each small cottage industry employs about 3 workers, and uses approximately 11 pounds (5 kg) of dry soybeans per day to produce 21 pounds (10 kg) of fresh tempe. The larger cottage industries employ 10 to 20 workers and use 600 to 1,000 pounds (500 kg) of dry soybeans per day to produce tempe. The average retail price of tempe is about US \$0.25 per kg in 1985.”

Figures: 1. Usar made using traditional Hibiscus leaves. 2. Flow sheet: Indonesian tempe process. 3. Material balances in pilot plant process for production of tempe. 4. Flow sheet of tauco processing. 5. Flow sheet of kecap processing. Address: Food Technology Development Center, Bogor Agricultural Univ., P.O. Box 61, Bogor, Indonesia.

3054. Barrett, Mariclare; Hayhow, Sally. 1986. The new rice foods. *Vegetarian Times*. Oct. p. 18-20, 22, 24-25.

• **Summary:** Contains a general description of the following: rice cream cereal, brown rice crackers, flour, miso, and ramen, mochi, rice vinegar, rice syrup, amazake, ‘ice cream’ (Rice Dream non-dairy frozen dessert), rice cakes, rice bran, miniature rice cakes, rice crisps, and quick cooking brown rice.

Concerning non-dairy ice creams: “One of the most unusual foods to emerge from the rice grain is rice ‘ice cream.’ Only one company is producing it now, but this low-fat, no-cholesterol ice cream look-alike may start a

revolution similar to the one launched by Tofutti for tofu-added frozen desserts.

“Rice Dream, as the product is called, is made from rice, water, rice culture, unrefined safflower oil, and vegetable-based stabilizers—plus various flavors. Notice that the list does not include sweeteners. The culturing of the rice releases so much natural sugar from the rice itself that no additional refined sweetener is needed.

“‘It took us a while to get the process down,’ admits Robert Nissenbaum, president of Imagine Foods, the company producing Rice Dream. ‘At first we used maple syrup to make the product sweet enough. In fact, some of our cartons still list maple syrup as an ingredient, but none of the flavors contain it any more. We finally perfected the process so the culturing broke down more of the complex rice carbohydrates to sugar.’

“The process used to make the base for Rice Dream is similar to the traditional Japanese amazake-making technique. The addition of modern technology has resulted in a sweet enough taste for the American palate and a more stable end product.

“The texture of Rice Dream is remarkably creamy—very similar to a high-quality ice milk. It holds up comparably in the freezer also. Not surprisingly, Rice Dream has a good nutritional profile for a snack food. A four-ounce serving has [130+ calories], 21 grams of carbohydrate, 5 grams of fat, 1 gram of protein, and no cholesterol. Haagen-Dazs, in comparison, has 268 calories, 17.2 grams of fat, and 24 grams of carbohydrate.”

3055. **Product Name:** Sweet Red Miso.

Manufacturer’s Name: Dragon Miso / Oasis Wholefoods. **Manufacturer’s Address:** Riverside Building, Staverton Bridge Mill, Staverton, S. Devon, England. Phone: 0803-865076.

Date of Introduction: 1986. October.

New Product–Documentation: Letters from I.J.

Mohammed. 1991. Sept. 30 and Oct. 13. I.J. Mohammed, owner of Dragon Miso, started to make this miso (i.e. to let it begin to ferment) in June 1986 at Staverton, South Devon. He first started to sell this miso in Sept/Oct. 1986 at Totnes, South Devon. It was at exactly that time (Sept/Oct. 1986) that Oasis Wholefoods was founded and started trading. At the outset, Oasis was jointly owned by I.J. Mohammed and Mr. Francis Checkley. When Oasis was founded, Dragon Miso and Lifestream Wholefoods (the latter owned by Mr. Checkley) gradually faded away, since Oasis required the full energy and resources of both men. “It is important to realize that in the U.K. there was a government allowance to start a new business. Therefore me and my ex-partner started two separate businesses (Dragon Miso and Lifestream Wholefoods) which never got off the ground. At about this time a company named Dragonfly, where I was working as a partner, was for sale and F. Checkley was

going to buy it. I was going to make the food as a 50% partner. That didn't happen due to idealistic differences, and so Oasis was born out of my head and F. Checkley's money. Since 1986 Dragonfly has been sold four times. I have tried to make Oasis into the main supplier of wholesome food to the community where I live. I will be moving into new premises shortly. The new name and address: Oasis Organic Wholefoods, Unit 1, South Gate Works, South Street, Totnes TQ9 5DZ, South Devon, England." The original address of Oasis Wholefoods was Unit 3C, Dart Complex, Steamer Quay Rd., Totnes, South Devon, England. "In Dec. 1987 Francis Checkley sold his share of the ownership of Oasis Wholefoods to me, so that I owned 100% of Oasis, as I still do. I felt like the father of the new project and Mr. Checkley was basically my financier. As far as I know Lifestream Wholefoods are no longer trading."

Label sent by I.J. Mohammed. 1991. Sept. 30. 3 by 2 inches. Pea green on yellow. Illustration of palm trees. The product name and ingredients have been stamped on in red with a rubber stamp to save money: "Dragon miso, sweet. Organic soya beans, rice koji, sea salt." By 1989 Oasis was making 20 kg a year (i.e., very little).

3056. Fangauf, K.W. 1986. Bedeutung der Sojabohne und Sojaprodukte fuer die Welternaehrung [Significance of the soybean and soya products for world nutrition]. *Schriftenreihe aus de Fachgebiet Getreidetechnologie* No. 8. p. 9-23. Sojaprodukte: Herstellung und Verwendung. [15 ref. Ger]

• **Summary:** Discusses history of the soybean, cultivation and composition, the world industry for soybean production, consumption, and products, world production of soy oil and competing oils, trends in the use of soy products (incl. soymilk and soymilk products, soy sauce, tofu, miso, and tempeh; table based on Shurtleff & Aoyagi 1983), results of Hamburg poll (American Soybean Assoc. 1982) on attitudes of German consumers toward qualities and use soya (e.g., price, nutritional value, good protein source, versatile, healthful, recommended by a doctor, good for young people), conclusion. Address: American Soybean Assoc., Hamburg, West Germany.

3057. Fujinami, H. 1986. Miso no hinshitsu hyōka to sono yōgo ni tsuite [Quality evaluation of miso and the terminology used therein]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 81(10):711-14. [Jap] Address: Chuo Miso Kenkyujo.

• **Summary:** Several trials were carried out to improve and make new types of salt-reduced miso employing

carbohydrate-rich ingredients such as pre-cooked rice, fermented broken rice mash, fruits (including orange, apple paste, strawberry, banana), tomato paste, grape juice, spices (such as ginger and caraway), and yeast. Address: Food Research Inst., Aichi prefecture, Japan.

3059. Kotsch, R.E. 1986. The pioneering spirit of Ohsawa-Japan: Japan's first macrobiotic company puts principles before profits. *East West*. Oct. p. 72, 74-75.

• **Summary:** In 1953 George Ohsawa "left Japan to teach the principles of macrobiotics in other lands. Several years later, after sojourns in India, Africa, Europe, and America, he returned to his homeland for a visit. When he saw that it had become almost impossible to procure traditional-quality foods in his own country, he urged some of his followers to become involved in farming and in food processing. He encouraged others to set up a company that would seek out existing producers of high-quality items and market their products in Japan and abroad. Thus was born Ohsawa-Japan, staffed by loyal disciples of Ohsawa and headed by his sister-in-law Flora Tanaka.

"From its inception Ohsawa-Japan was a company rich in ideals and slim in capital. As Yoshi Nanabayashi, its export manager, told me, 'We have always been, above all, a macrobiotic company. So our first concern has been to distribute only the highest-quality food, made according to strict standards. Considerations of cost and profit have always been secondary. Mr. Ohsawa taught that proper food is the key to the health and happiness of humanity. Our main aim has been to promote the health of individuals and of society, not to make a lot of money. And,' he added with a laugh, 'we have been fairly successful.'"

What the Tokyo-based company lacks in professionalism it makes up for in dedication to its ideals. From several score of traditional Japanese food producers (mostly small and family-run) around Japan, it gathers more than 100 products (including miso from Yamaki Miso Co., shoyu, and tamari), packages them, and distributes them to the small but strong network of macrobiotic stores and centers throughout Japan.

For years Ohsawa-Japan's "exclusive North American distributor was Chico-San, the natural foods company located in Chico, California. In 1984 Chico-San, which had thrived on its rice cake business, was sold to the H.J. Heinz Corporation. Six months later the import rights to the Ohsawa-Japan products were sold back to Chico-San's original owners, Herman Aihara and Bob Kennedy. At that point a new company, Ohsawa America, was set up to import and distribute the products of Ohsawa-Japan. Today that company, based in Chico, handles about seventy basic Japanese macrobiotic items...

"The main difficulty facing Ohsawa America is the high prices it must ask for its products. The cost of living in Japan is one of the steepest in the world... In addition, the

value of the yen has increased dramatically.” Lane Seiger is operations manager of Ohsawa America. As Joel Wollner notes, “Like Ohsawa-Japan, Ohsawa America is a philosophy-driven company.” Address: Staff.

• **Summary:** Orders from Sendai Miso Shoyu jumped sevenfold after the Chernobyl nuclear accident on 26 April 1986 in the Ukrainian SSR.

3063. Burum, Linda. 1986. Breakfast in Chinatown and other Asian spots. *Los Angeles Times*. Nov. 16. p. S106.

• **Summary:** The section titled “Japanese” begins: “Amid the jangle of downtown traffic, A Thousand Cranes is an oasis of flagging civility.” This lovely, calm restaurant, with its own stylized Japanese garden, is in the New Otani Hotel, at 120 S. Los Angeles St., Los Angeles. Dressed in a classical kimono, the waitress brings breakfast on a lacquered tray. On it is a covered bowl of miso soup, plus rice and other delicacies. “One may select from several other *okazu* (the things to eat with rice) such as squares of delectably garnished and very fresh *tofu* or *natto*, a little mound of flavorful fermented bean” [sic, beans].

“A jar of *umeboshi*, the mouth puckering tiny sour plums known as nature’s own mouthwash, is placed on each table; one of these cleanses the palate.”

The section titled “Chinese” begins with a visit to Yi Mei, a very good traditional Chinese bakery in Monterey Park (near downtown Los Angeles), known for its “Northern-style breakfasts centering on large bowls of soy

milk that may be ordered slightly sweetened or seasoned with a dash of sesame oil and salt. Look around and watch everyone dipping *yu t’iao*, long, airy fried buns that resemble unsweetened crullers, into their soy milk.” The crullers soak up the soy milk, then everyone noisily (its impossible to do this quietly) eats the crullers.

3064. Barrett, Mariclare. 1986. The cook’s glossary of soyfoods. *Vegetarian Times*. Nov. p. 28-35. [10 ref]

• **Summary:** Gives good definitions, with a full-page color illustration by Emily Soltanoff, of: Soybeans, soynuts, soy flour and grits, soy oil, textured vegetable protein, soymilk, okara (“the pulp that remains after the soymilk has been strained”), soy yogurt and soy cheese, tofu, fermented soyfoods, tempeh, miso, natto, soy sauce.

The article begins: “For 60 seconds on a national television commercial, a small, round soybean rolls past a lineup of infant formula, bread, pizza, chili, salad dressing, ice cream [Tofutti], soymilk and cubes of tofu; meanwhile the narrator intones, ‘The newest development in nutrition is actually one of the oldest foods known to man.’ Through advertising, the concept of soyfoods is brought home to millions of Americans by the soy giant, Archer-Daniels-Midland Company.” Address: Staff.

• **Summary:** In June 1984 a large scale outbreak of type A botulism occurred in 14 prefectures in Japan, involving 36 cases and 11 deaths due to consumption of vacuum packed karashi-renkon. The causative organism may well have been *Clostridium botulinum*. Address: 1. Shiga Prefectural Inst. of Public Health, 13-45 Gotenhama, Ohtsu-shi, Shiga 520; 2-3. College of Agriculture, College of Agriculture, Univ. of Osaka Prefecture, Sakai-shi, Osaka 591, Japan.

3067. **Product Name:** [Kikkoman Instant Wakame Soup (Seaweed Soup with Miso)].

Manufacturer’s Name: Kikkoman Corporation.

Manufacturer’s Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1986. November.

New Product–Documentation: Spot in Food & Beverage Marketing. 1986. Nov. p. 12, 60.

3068. McMath, Bob. 1986. Hot products: Japanese foods 'stir' up interest. *Food & Beverage Marketing*. Nov. p. 12, 60.

• **Summary:** Soyfoods included in the Kikkoman instant soup mix line are Osuimono (Japanese Clear Broth), Aka Miso Soup (Soybean Paste Soup—red), Shiro Miso Soup (Soybean Paste Soup—white), Tofu Miso Soup, and Wakame Soup (Seaweed Soup, a color photo of which is shown). Each packet contains 3-4 individual servings and retails for \$1.19 to \$1.39.

3069. *Vegetarian Times*. 1986. Top entries in the Vegetarian Times soyfoods recipe contest: The winners! Nov. p. 36-39.

• **Summary:** Some 125 recipes were submitted to the contest. The full recipe for each of the winners is given. For main dishes, the first prize went to Messilla Valley Tempitas (with tempeh), the second prize to Tofu Slices with Mushrooms, and the third prize was a tie between Kid's Favorite Tofu Loaf, and Tofu Manicotti with Sesame-Miso Sauce.

For desserts, the first prize went to Tofu Cheesecake, the second prize to Cranberry-Walnut Baked Apples with Maple-Custard Sauce (with soymilk), and the third prize to Creamy Peach Rice Pudding (with tofu).

In the "Other" category, first place winner was Smoked Tofu with Dipping, 2nd place was Bombay Chowder, and 3rd place was Tofu-Shallot Dip.

A color photo by Katherine Phelps shows the dish that won first place in each category.

3070. Fujii, Hisao. 1986. Nattô no nenshitsu-butsumu, nioi, fureebaa to bisei-butsumu [Microbial formation of mucilaginous compounds, odor, flavor, and microorganisms in natto]. In: Kô Aida, et al. eds. 1986. Proceedings of the Asian Symposium on Non-Salted Soybean Fermentation. Japan: Takeshima Shigeru. 319 p. See p. 219-33. Held July 1985 at Tsukuba, Japan. English-language summary in Symposium Abstracts, p. 70. [35 ref. Jap]

• **Summary:** Tables and figures in English include: Properties of *Bacillus natto* Sawamura. Mucilage produced from various beans. Mucilage produced from parts of soybean. Separation of natto mucilage. Analysis of natto mucilage. Effect of nitrogen on the growth and mucilage formation by *B. natto*. Effect of amino acid on growth and stringy slimy production. Effect of nitrogen source on slime composition. Amino acid composition per 100 gm edible portion of pulses. Hydrolytic products of polyamine derivatives of gamma and alpha linked peptides. Possible scheme for origin of PGA by enzymes found in *B. subtilis*. Effect of optical isomers of glutamine and glutamic acid on transamidase obtained from *B. natto*. Phage host range against the parental and cured strains, and representative transformants. Levan synthesis by levansucrase of *Aerobacter levanicum*.

Effect of medium composition of viscosity of mucilage. Viscosity of polyglutamate and levan. Soybean carbohydrates. Effect of sucrose on mucilage stability. Detection of phage from natto products. Inhibition of natto mucilage formation by added phage. PGA-digesting activity of phage lysate. Change of nitrogen compounds during fermentation. Liberation percentage of amino acids in raw and steamed soybeans, and products fermented 8 or 16 hours. Distribution of Tetramethylpyrazine (TMP) in Japanese fermented foodstuffs (miso is highest). Address: Fukuoka Joshi Daigaku.

3071. Haytowitz, David B.; Matthews, Ruth H. 1986. Composition of foods: Legumes and legume products. Raw, processed, prepared. *USDA Human Nutrition Information Service, Agriculture Handbook No. 8-16*. 156 p. Dec. See p. 126-152. By Nutrition Monitoring Division. [29 ref]

• **Summary:** Data are presented for 133 legumes and legume products. Of these, only 53 were included in *USDA Agriculture Handbook No. 8*, published in 1963. The following soy-based foods are included: Simulated meat products (bacon, meat extender, and sausage), raw soybeans, cooked boiled soybeans, roasted soybeans, dry-roasted soybeans, soybean products: miso, natto, tempeh, full-fat soy flour (raw, and roasted), defatted soy flour, low-fat soy flour, defatted raw soy meal, fluid soy milk, soy protein concentrate, soy protein isolate, soy sauce (shoyu, tamari, and HVP), raw tofu (firm {p. 147}, regular, dried-frozen/koyadofu, and fried) [Note 1. Tofu is called "tofu" and at "Soybean curd" it says, see "tofu." Note 2. Footnote 2 states that the calcium content of tofu curded with calcium sulfate is 683 mg/100 gm, compared with 205 mg/100 gm for tofu curded with nigari. As of May 1997 Soyfoods Center believes that both these values are far too high; the two figures should be about 159 mg/100 gm (range 128-168) and 45 mg/100 gm respectively], okara, salted and fermented tofu (fuyu).

For each food the following information and number of values are given: Vertically: Proximate (7 values), Minerals (9), Vitamins (9), Lipids (Fatty Acids [Saturated (9), Monounsaturated (5), Polyunsaturated (7)], Cholesterol, Phytosterols), Amino acids (18). Horizontally: Amount in 100 gm edible portion (mean, standard error, number of samples), amount in edible portion of common measures of food (e.g. ½ cup or 1 cup), amount in edible portion of 1 lb of food as purchased.

Minerals include calcium, iron, magnesium, phosphorous, potassium, sodium, zinc, copper, and manganese (not aluminum).

Vitamins include ascorbic acid, thiamin, riboflavin, niacin, pantothenic acid, vitamin B-6, folacin, vitamin B-12, vitamin A.

Amino acids include tryptophan, threonine, isoleucine, leucine, lysine, methionine, cystine, phenylalanine, tyrosine,

valine, arginine, histidine, alanine, aspartic acid, glutamic acid, glycine, proline, and serine.

For Adzuki beans (raw, cooked boiled, canned sweetened, and Yokan {yōkan-sugar-sweetened confection}) see p. 24-27.

For peanuts (all types raw, cooked boiled, oil-roasted, dry-roasted, Spanish raw, Spanish oil-roasted, Valencia raw, Valencia oil-roasted, Virginia raw, Valencia oil-roasted) see p. 109-18. For peanut butter (chunk style, smooth style), defatted peanut, and low-fat peanut flour, see p. 119-22. Address: USDA Human Nutrition Information Service.

• **Summary:** A general review, including many fermented foods not containing soy. Address: Dep. of Agriculture, Tokyo Univ. of Agriculture.

3074. **Product Name:** Creamy Miso Dressing [Sesame, Mustard, or Vinaigrette].

Manufacturer's Name: Simply Natural, Inc.

Manufacturer's Address: P.O. Box 295 (Evelyn and Gershel Avenues), Norma, NJ 08347.

Date of Introduction: 1986. December.

Ingredients: Sesame: Organic light miso, unrefined sunflower oil, filtered water, apple cider vinegar, barley malt, toasted sesame oil.

Wt/Vol., Packaging, Price: 12 oz jar.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Sesame, Per ounce: Calories 86, fat 1.5 gm, sodium 136 mg.

New Product-Documentation: Spot in Vegetarian Times. 1987. March. p. 67. These feature mellow miso. Leaflet. 1987. Shows Label. These dressings are made from the mellow white miso in which their Soft Tofu Cheese is fermented. Brochure. 1987. Oct. "Discover the New Simply Natural and Rediscover Natural Cuisine." Introduces

Soyalite (formerly Soft Tofu Cheese), Pasta Lite (formerly Tofu Pasta), and Miso Dressing. Explains why the names were changed and shows labels. Red on white. 4 pages. Ad in Vegetarian Times. 1988. May. p. 58. "Everything Your Heart Desires."

3075. **Product Name:** Wasabi Chips (Seasoned with Wasabi Miso).

Manufacturer's Name: Soken Trading, Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 760, Mill Valley, CA 94942.

Date of Introduction: 1986. December.

Ingredients: Incl. vegetables, four kinds of seaweed, wasabi miso, sea salt.

Wt/Vol., Packaging, Price: Cellophane bags.

How Stored: Shelf stable.

New Product-Documentation: Spot in Food Distributors Magazine (Clearwater, Rhode Island). 1986. Dec.

3076. Yoshida, Shuji. 1986. Minzokugaku kara mita muen hakkō daizu to sono shūhen [The origin of non-salted fermented soybeans from the viewpoint of ethnology]. In: Kō Aida, et al. eds. 1986. Proceedings of the Asian Symposium on Non-Salted Soybean Fermentation. Japan: Takeshima Shigeru. 319 p. See p. 166-78. Held July 1985 at Tsukuba, Japan. English-language summary in Symposium Abstracts, p. 62-62. [20 ref. Jap]

• **Summary:** "Two of the earliest kinds of fermented soybeans were *shì* and *dòu-jiàng*. The former antedates the latter, because *shì* can be traced to the Han Dynasty (206 BC-A.D. 200), whereas *dòu-jiàng* does not emerge until the description in *Qimin Yaoshu* (A.D. 536-550). Good descriptions of *shì* and *dòu-jiàng* are given in *Qimin Yaoshu*. *Shì* is made as follows: A yellow mold is permitted to grow on boiled beans, which are then washed and wetted, after which they are fermented in a cellar for 10-12 days. *Shì* was eaten as a condiment.

"However, *shì* as a food would have appeared prior to *shì* as a condiment. *Sake* which was made from grain through mold fermentation, was originally not for drinking, but rather for eating. Such a primitive *Sake* is still used in Yúnnán. I suppose that a primitive *shì* also was eaten, and that the place of origin of *shì* was South China, according to the description in *Bencao Gangmu* (*shì* was commonly made in South China), and *Bówùzhì* (*shì* was exotic).

"*Dòu-jiàng*, which may have been first mentioned in *Bencao Gangmu* (1596), was a simple mold bean and was technologically more primitive than *shì*, although the existence of *dòu-jiàng* or a similar substance cannot be traced in the literature before *Qimin Yaoshu*. It seems that the first product of fermented beans would be *dòu-jiàng*, or a similar substance, and that its making would have been influenced by *sake* production. Later, *shì* as a food would

have appeared and then *shì* as a condiment was produced, as we see from the *Qimin Yaoshu*.

“On the other hand, *dòu-jiàng* was developed from *ròu-jiàng*, preserved meat... *Natto*, *kinema* and *tempeh* would be identified as a substance similar to *dòu-jiàng*, which was a primitive fermented soybean product. Boiled beans became *dòu-jiàng* if they were covered by *Imperata cylindrica* grass, *kinema* if covered by certain leaves, *tempeh* if covered by leaves of *Hibiscus tiliaceus* or banana leaves, and *natto* if covered by ricestraw.

“We know that various kinds of plants are used for making *sake* or mold bran. The species used varies by place. Fermented soybeans occur within the *sake*-making area and only at the margin of the distribution. That means several new fermented soybean products like *shì* and *dòu-jiàng* were made in the center of the fermented soybean distribution, and the area gradually expanded toward the margins. They were accepted in areas close to the center, but the most primitive forms would have remained only in the marginal places, where new ones were not accepted.”

A large chart (p. 169) shows the relatives and development of soy nuggets (*shi*); it includes the names of various unsalted fermented soyfoods and soy condiments (with their geographical area in parentheses). Relatives (fermented soyfoods made from yellow soybeans): Akuni (Sema Naga, in the Himalayas in northeast India), kinema (Limbu, in eastern Nepal), pe-bout (Shan, in eastern Burma), itohiki natto (Japan), and tempeh (Indonesia). Stage 1. Itohiki natto became Chon Kujjiang [perhaps *chungkuk jang*, Korean-style natto] of the Zhanguo Warring States period (475-221 BC) in China. Stage 2A: Unsalted soy nuggets were originally used as a food, rather than as a seasoning. To these unsalted soy nuggets, koji was added to create homemade unsalted soy nuggets (*doushi*, of China). Stage 2B: Salt was added to the unsalted soy nuggets to make various salted foods (each with a firm texture like raisins): Daitokuji natto (Japan; with wheat flour added), *pe-ngapi* (upper Burma), and *seang* (Cambodia). Stage 3. Unsalted soy nuggets (*doushi*) developed into closely related danshi. Koji was added to danshi to make *rul-kre* (of Bhutan). Cooked soybeans were shaped into balls and fermented naturally to make miso-dama (“unsalted miso balls” [meju], Korea and Japan). Then salt was added to the miso-dama to make various seasonings (each with a consistency like applesauce or paste / miso): Korean soybean *jang* (*doen jang*), Korean soy sauce (*kan jang*), or soybean miso (*mamé miso*, Hatcho miso, Japan). Stage 4. Salt was added to unsalted soy nuggets (*shi*) to make salted soy nuggets, from which developed inyu (a fermented soy sauce made with black soy beans, in Taiwan), *inshi* (meaning unclear, of Taiwan), and *tauco* (*tauco*, of Indonesia). Stage 5. Koji was added to salted soy nuggets to make *shi* for food use, and *doushi* (of Sichuan, China). Stage 6. Flour was added to salted soy nuggets to make red

pepper *jang* (*kochu jang*, Korea) and spicy soy nuggets (*doubanshi*, China).

Note: This chart may be easier to understand when viewed in chart form, however the logic and some of the products seem a bit unclear. It is also unclear which products are fermented with bacteria (like natto). Soyfoods Center has an English-language translation of this chart. Address: National Museum of Ethnology, Osaka (Kokuritsu Minzokugaku Hakubutsukan).

3077. Hosotani, K.; Mori, M. 1986. [Propionic acid contents in foods]. *Nippon Eiyō Shokuryō Gakkaishi (J. of the Japanese Society of Nutrition and Food Science)* 39(3):231-33. [6 ref. Jap; eng]*

• **Summary:** *Webster's Dictionary* defines propionic acid (a term first used in 1850) as “a liquid sharp-odored fatty acid C₃H₆O₂ found in milk and distillates of wood, coal, and petroleum.” It is also produced as a metabolite of microorganisms. The propionic acid content of miso was 2-5 mg/kg and of soy sauce was 2.7-6.0 mg/kg. This compared with 5-9 mg/kg for dairy milk. Address: Dep. of Home Economics, Wakayama Univ., Wakayama 640, Japan.

3079. **Product Name:** Noble Bean Tempeh and Tahini Spread (Savory Spread for Sandwich or Dip with Umeboshi Plums).

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: 18320 Euclid Ave., Cleveland, OH 44112.

Date of Introduction: 1986.

Ingredients: Tempeh (Organic soybeans, water, *Rhizopus* culture), tahini, onion, parsley, barley miso, lemon juice, umeboshi paste, cider vinegar, olive oil, garlic powder.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product-Documentation: Label. 1987. Oval 4 by 2.75 inches. Blue, red, green, and yellow on white. Jeff Narten. 1987. “History of North Coast Tempeh and its Products.” 4 p. Dec. 7.

3080. **Product Name:** Noble Bean Bogie Roll (Pita Pocket with Tempeh).

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: 18320 Euclid Ave., Cleveland, OH 44112.

Date of Introduction: 1986.

Ingredients: Whole wheat pita, dill pickle, Tempeh and Tahini Spread (Tempeh [organic soybeans, water, *Rhizopus* culture], tahini, onion, parsley, barley miso, lemon juice,

umeboshi paste, cider vinegar, olive oil, garlic powder), and sprouts.

Wt/Vol., Packaging, Price: 5 oz.

How Stored: Unrefrigerated and perishable.

New Product–Documentation: Label. 1987. Oval 4 by 2.75 inches. Red, green, blue, and yellow on white. Jeff Narten. 1987. “History of North Coast Tempeh and its Products.” 4 p. Dec. 7.

Address: Kagawa Prefectural Fermentation and Food Experiment Station, Kagawa, Japan.

3083. **Product Name:** Misos: Yamaki Organic Misos (Barley, Brown Rice, Soybean), or Tateshina Sweet Misos (Barley, Rice, Soybean).

Manufacturer’s Name: Ohsawa America (Importer). Made in Japan.

Manufacturer’s Address: P.O. Box 3608, Chico, CA 95927.

Date of Introduction: 1986.

New Product–Documentation: Ohsawa America Macrobiotic Foods Catalog. 1986. Ad in East West. 1987. April. p. 27. “Ohsawa-Japan & Ohsawa America—Guided by a Philosophy for Life. Ohsawa America imported products are provided by our companion company, Ohsawa-Japan. Founded more than 35 years ago by George and Lima Ohsawa...”

3084. Ontario Soya-Bean Growers’ Marketing Board. 1986. Ontario soybeans in Japan (Color videotape). Chatham, Ontario, Canada. 23½ minutes. Undated.

• **Summary:** Shows how Ontario soybeans are used to make tofu, miso and natto in Japan. Includes interviews with end users who make tofu, miso, and natto.

Note: This is the earliest known videotape about soy or tofu owned by Soyfoods Center. Address: Chatham, Ontario, Canada.

3085. Sung, S.K.; Lee, C.M.; Young, J.D.; Chen, C.N. 1986. High levels of tyramine in some Chinese foodstuffs. *Human Psychopharmacology* 1(2):103-07. [17 ref]*

• **Summary:** Tyramine was assayed by high pressure liquid chromatography (HPLC) in 9 common Chinese foods including soy sauce, fermented soybean, fermented bean curd, red fermented bean curd, chili soybean paste, soybean paste, and preserved vegetables. Contents were highest in fermented soybean and fermented bean curd. Results are discussed in terms of hypertensive risk for patients taking monoamine oxidase inhibitors.

Note: *Webster’s Dictionary* defines tyramine (derived from tyrosine + amine) as “a phenolic amine C₈H₁₁NO that has a sympathomimetic action and is derived from tyrosine.” It defines sympathomimetic as “simulating sympathetic nervous action in physiological effect.” Address: Dep. of Psychiatry, Chinese Univ. of Hong Kong, Shatin, N.T., Hong Kong.

3086. Truesdell, Delores Desear. 1986. Vitamin B-12 content of miso and tempeh. MSc thesis, Florida State University. vi + 74 leaves. 29 cm. *

• **Summary:** Includes bibliographic references (leaves 58-74).

3087. Chang, Wonona W.; Chang, Irving B.; Kutscher, Austin H.; Kutscher, Lillian G. 1986. Chinese dessert, dim sum & snack cookbook. New York, NY: Sterling Publishing Co., Inc. 160 p. Illust. (color photos). Index. 26 cm.

• **Summary:** “Many of the dessert recipes in this book have been prized as family treasures for generations and are authentic; others have been adapted to the Chinese cuisine by the addition of oriental ingredients...” (p. 7).

The “Guide to ingredients” has interesting entries for “Bean curd or tofu (*dow foo*)” and “Bean filling, sweet (*Cantonese: dow sa*) (*Mandarin: do sa*)” (“Color: red {kidney beans [azuki]}, green {mung beans}. Available form: canned. When available: most commonly at Chinese New Year. Where purchased: Chinese bakery or grocery,” p. 13), and for “Hoisin sauce (Red seasoning sauce) (*hoi sin joing*) (*hai hsien jiang*)” (p. 16).

Desserts: Doughnut slices with Chinese flavors (with “sweet bean paste” [probably *an*, made with azuki beans, p. 33). Glutinous (sweet) rice cake (with “1 lb. black bean paste (*dow sa*),” p. 33). Fried bean paste pancake (with “4 oz. bean paste,” p. 40). Lychee peach tofu cooler (with “8 oz. tofu,” p. 56). Soybean milk (homemade recipe with “1 cup soybeans,” p. 58). Red bean paste ice cream (with “1 cup sweetened red bean paste” [azuki], p. 64). Lychee tofu custard (with “8 oz. tofu,” p. 91). Strawberry tofu pudding (with “6 oz. chilled tofu,” p. 91). Peach tofu custard (with “8 oz. tofu,” p. 93). Mandarin oranges with tofu (with “6 oz. Chinese-style tofu,” p. 93). Ginger sweet red bean dessert / spread (with “½ cup sweet bean paste” [azuki], p. 106). Orange tofu icing (with “12 oz. tofu,” p. 107). Sweet red bean dessert sauce (with “½ cup sweetened red bean paste” [azuki], p. 110).

Dim sum and snacks: New Year dumplings with sweet black bean paste (with “½ cup sweet black bean paste (*dow sa*),” p. 113). Bean paste sesame balls (with “sweet black bean paste,” p. 118). Dow sa won ton (“Prepare the same as Fried Won Tons {p. 139} except use *dow sa* (black bean paste) as a filling... Dow sa is available at Chinese bakery shops, p. 140).

About the authors (p. 146). Address: 1-2. Morristown, New Jersey; 3-4. Scarsdale, New York.

3088. Chiao, J.S. 1986. Modernization of traditional Chinese fermented foods and beverages. *Mycologia Memoir* No. 11. p. 37-53. Chapter 3. (C.W. Hesseltine and Hwa L. Wang, eds. Indigenous Fermented Food of Non-Western Origin. Berlin & Stuttgart: J. Cramer). [22 ref]

• **Summary:** Published in 1981 in *Advances in Biotechnology* 2:511-16. Contents: Introduction. Varieties of traditional Chinese fermented foods and beverages: Soy products include: Soy sauce (4-6 month fermentation), soy sauce by Gun-tou method (no wheat is used, 1 year fermentation, new batch concentrated for 1-2 months under the sun), soy paste, sufu, red sufu (with qu = chu = Chinese-style koji added), tou-si (made from black soybeans and salt, fermented with *Aspergillus oryzae* for 10-12 days). There are also many white spirit fermentations. “Wine was made in China as far back as 4,000 years, and white spirits made their appearance in the 13th century. Li-shi-zheng of the Ming Dynasty gave a description of the distillation process in detail in his famous Ben-Chao-Gong-Mu. Nowadays the alcohol content ranges from 40-65%.

In 1970 the San-jia Starch Factory in I-Chang, Hupeh, used liquid proteinase for a new soy sauce process using the waste water from starch processing, thus simplifying the ordinary soy sauce process. But this product was inferior in color, taste, and flavor to regular soy sauce made by a solid substrate fermentation. In 1976 and 1979 the Experimental Plant of the Shanghai Grain and Oil Industry Co., by selecting mutant strains of *Aspergillus oryzae* having high proteinase potency, was able to get an improved soy sauce (though still not as flavorful as regular soy sauce) using the liquid proteinase process. A flowchart is shown. Address: Dep. of Microbiology, Shanghai Inst. of Plant Physiology, Academia Sinica, Shanghai, China.

3089. Colbin, Annemarie. 1986. Food and healing. New York, NY: Ballantine Books. 351 p. Foreword by Robert S. Mendelsohn, M.D. Index. 23 cm. [207* ref]

• **Summary:** A very interesting, wholistic look at food trips and philosophies—with a preference for macrobiotics. Discusses miso, natto, tempeh, and tofu. Pages 169-72 discuss beans, including soybeans. Beans are said to be contractive, acid-forming, warming, and a buildup food. “Folklore has it that appreciable quantities of soybeans and their products, especially tofu, can lower, or cool, sexual

energy. Research done at the universities of Illinois and Kansas has shown that soybeans may interfere with the absorption of zinc. As zinc is one of the minerals most strongly associated with the healthy functioning of the sex glands, this bit of folk wisdom appears realistic.”

Chapter 12, titled “Food as Medicine,” discusses healing foods and tells how to prepare them, including miso soup (p. 253; contractive, alkalizing, warming, breakdown). Miso soup is considered a good food to help cure the common cold, to neutralize the negative effects of excess sugar consumption, and to combat problems of inflammation of the digestive tract (ulcers, colitis, spastic colon, etc.); ulcers are problems of excess acidity.

Chapter 14, titled “The Effects of Food on Sex,” notes that “Scientific studies have found that individual foodstuffs have an effect on sexuality via their chemical constituents... soybeans (including tofu) contain traces of antithyroid factors; as the thyroid regulates sexual desire, activity, and fertility, when consumed in large enough quantities these foods could possibly inhibit sexuality by lowering thyroid energy. Oriental folk rumor, which I’ve been unable to verify, has it that tofu ‘cools the sex organs’ and is used by monks for the specific purpose of aiding them in maintaining celibacy. In this light, it’s interesting to note that the traditional Japanese diet, high in thyroid-depressing soybean products, also contains appreciable amounts of seaweeds, rich in thyroid-stimulating iodine.”

In the Foreword, Dr. Mendelsohn writes: “Coming from a background of modern medicine, I, as well as hundreds of thousands of other M.D.s, was carefully educated in nutritional ignorance—indeed in disdain for food. The hospital ‘dietician’ was not—and is not even today—a teacher of physicians. The dietician’s traditional purpose in life has always been to serve as a ‘referral’ for a patient who bothered the physician with too many questions about food. The very title of this book *Food and Healing* represents a joining of two concepts that most doctors regard as unrelated.”

A photo (p. 351) shows Annemarie, who was born in Holland and brought up in Argentina on a European vegetarian diet. After her arrival in the United States in 1961, she was introduced to macrobiotics. She lives in New York City with her two daughters, and directs the Natural Gourmet Cookery School there. Address: 365 West End Ave., New York City, NY 10024. Phone: 212-580-7121.

3090. Committee for Soybean (The). 1986. The Philippines recommends for soybeans. Los Baños, Laguna, Philippines: Philippine Council for Agriculture and Resources Research and Development. 111 p. Technical Bulletin Series No. 14A. Revision of 1976 edition. [51 ref. Eng]

• **Summary:** Written by The Soybean Committee (Dr. Florendo C. Quebral, a plant pathologist at UPLB, chairman), this work focuses on recent technologies for

soybean production. A foreword by Ramon V. Valmayor, Executive Director of PCARRD, notes: "The importance of soybean has been stressed continuously. To encourage its widespread production, the Ministry of Agriculture and Food (MAF) launched the Soybean Production Program in Mindanao. Likewise, PCARRD initiated and coordinated the implementation of Soybean Pilot Production Project in 1983 to demonstrate the feasibility of growing soybean profitably in Luzon."

Contents: Foreword. Acknowledgments. The Soybean Committee. Introduction. Production management. Marketing. Soybean cropping system. Crop protection. Seed production. Processing and utilization: Raw materials for industry, soybean as food. References. Appendixes. List of tables. Lists of figures.

Table 1 shows soybean production in the Philippines from 1974 to 1985. Area in hectares grew from 2,780 ha in 1974 to a peak of 11,250 ha in 1976 and was 8,479 ha in 1985. Production grew from 2,214 tonnes in 1974 to a peak of 11,466 tonnes in 1982 and was 8,430 tonnes in 1985. Yield grew from 0.80 tonnes/ha in 1974 to a peak of 1.05 in 1982 and was 0.99 in 1985. Local production does not begin to supply local demand. In 1984 380,691 tonnes of soybeans and products were imported. Most of the imports were soybean meal.

Table 2 shows imports and exports of tausi (salted, fermented soybeans), oil cake (huge imports), soy sauce (large exports), soy oil (refined; large imports), soybean paste, taho (soymilk curds, often sold topped with a little brown sugar), bean cheese (tokwa [tofu]), hypoallergenic soy food, crude soy oil. Page 50 shows all current uses of soybeans in the Philippines, and p. 51 gives the nutritional composition of Philippine soyfoods. Note the terms Geerligs cheese (Tahu; 92.7% moisture and 2.9% protein), Soybean curd (Tahuri; 61.3% moisture and 11.4% protein), Fermented soybean cheese (Tausi; 51.5% moisture and 13.8% protein), and Soybean cheese (Tokwa; 77.0% moisture and 12.9% protein).

Recipes are given for preparing soy sauce, miso, tahu (soymilk curds), tokwa (soybean cheese, or firm tofu), tao-si (salted, fermented soybeans), soybean milk, and soybean coffee. Descriptions are given for sufu, tempeh, soy flour and grits, soy protein concentrates and isolates.

Note: In the section on nutritional composition, two words are incorrectly defined. The term "Tahuri" actually refers to tofu in brine, and "tausi" refers to salted, fermented soybeans. Address: PCARR.

3091. Ebine, H. 1986. Miso. In: N.R. Reddy, M.D. Pierson, and D.K. Salunkhe, eds. 1986. Legume-Based Fermented Foods. Boca Raton, FL: CRC Press. viii + 254 p. See p. 47-68. Chap. 3. [66 ref]

• **Summary:** Contents: Introduction. Preparation. Composition. Nutritional quality. Toxicology. Miso-like

products. Conclusions. Address: Central Miso Research Inst., Tokyo, Japan.

3092. Elliot, Rose. 1986. The vegetarian mother and baby book. New York, NY: Pantheon Books. 261 p. Index.

• **Summary:** A complete guide to nutrition, health, and diet during pregnancy and after—with easy recipes for mother and baby to enjoy together. The author "is one of England's most popular cookbook writers, a radio and TV commentator, and a columnist. A vegetarian since the age of three, she is also the author of *Vegetarian Dishes from Around the World* and *The Festive Vegetarian*." She has also raised three children according to the principles described in this book. Contents: Part I: A vegetarian diet for healthy mothers and babies. Part II: Recipes. Appendix. A. Summary of Nutrients: Where they are and what they do. B. How it all adds up: Analysis of one day's vegetarian menus. C. Recommended daily dietary allowances for women.

In Part I, the author recommends that if soy milk is used, it should be fortified with riboflavin (vitamin B-2), and calcium. Regular soymilk provides a little (0.5 mg/cup) of zinc. In Part II, soy-related recipes include: Miso pick-me-up (p. 99; with watercress). Tofu dressing (p. 110). Soybean salad (p. 127). Curried soybean and apple spread (p. 137). Soy sausages (p. 159; made with cooked whole soybeans). Soy and walnut loaf (p. 160; made with cooked whole soybeans). Mushroom and tofu quiche (p. 175). Tofu fritters with lemon (p. 186). Creamy tofu and almond topping (p. 203; for use like heavy cream with desserts). Whipped tofu topping (p. 204). Tofu ice cream (p. 218). Vegan yogurt (p. 219; made with soy milk).

In the Sept/Oct. 1994 issue of *Vegetarian Journal*, Reed Mangels, PhD, RD, an expert on vegetarian nutrition, says that this is her favorite book on pregnancy for vegetarian women. Address: England.

3093. Gandjar, Indrawati. 1986. Soybean fermentation and other tempe products in Indonesia. *Mycologia Memoir* No. 11. p. 55-66. Chap. 4. (C.W. Hesseltine and Hwa L. Wang, eds. Indigenous Fermented Food of Non-Western Origin. Berlin & Stuttgart: J. Cramer.) Previously published in 1981 in USDA Miscellaneous Publication FL-MS-333. [14 ref]

• **Summary:** Contents: Introduction. Kecap (Indonesian soy sauce). Taoco (Indonesian chiang, a yellowish-brown porridge that is very popular in Western Java). Soybean tempe (*tempe kedelai*). Tempe gembus (okara tempe). Non-soybean tempe—made from velvet beans (*tempe benguk*), jack beans (*tempe koro pedang*), winged bean (*tempe kecipir*), pigeon pea (*tempe gude*), wild tamarind (*tempe lamtoro*), peanut presscake (*tempe bungkil kacang*), and coconut presscake (*tempe bongkrek*).

"Tempe is an important source of protein in the Indonesian diet. At present the intake of soybean tempe per person per day is within the range of 40 to 50 g while the

recommendation is 100 g per person per day... The awareness of the people that soybean tempe is nutritious results in a higher demand of this product. In the city of Jakarta, about 6000 tonnes of soybeans are processed monthly; 2500 tonnes for soybean tempe [tempeh], and 3500 tonnes for tahu [tofu].”

Table VI shows the nutritional composition of some leguminous seeds and tempe products. Table VII shows the amino acid content of the seeds and the tempeh of 4 non-soybean legumes. Address: Dep. of Biology, Faculty of Mathematics and Natural Sciences, Univ. of Indonesia, Jakarta, Indonesia.

3094. Hesseltine, C.W.; Wang, H.L. 1986. Indigenous fermented foods of non-Western origin. *Mycologia Memoir* No. 11. 351 p. Berlin and Stuttgart: J. Cramer. Published for the New York Botanical Garden in Collaboration with The Mycological Society of America. Address: NRRC, Peoria, Illinois.

3095. Hesseltine, C.W. 1986. Microorganisms involved in food fermentations in tropical Asia. In: S. Saono and F.G. Winarno, eds. 1986. Proceedings of International Symposium on Microbiological Aspects of Food Storage, Processing and Fermentation in Tropical Asia. See p. 189-204. Held 10-13 Dec. 1979 at Cisarua, Bogor, Indonesia. [18 ref]

• **Summary:** Three pioneers of the taxonomy of molds used in fermented foods were Drs. R. Nakazawa, K. Saito, and C. Thom. Fermentations can be classified as Homofermentations (only one species of microorganism is necessary to produce the product; e.g. natto, onchom, tempeh, fermented tofu), Heterofermentations (more than one is required; e.g. Chinese yeast, or ragi), Homomultifermentations (two or more strains of the same species are used together; e.g. miso, shoyu, soy yogurt).

Tables show: (1) Representative strains of cultures in Oriental food fermentations: Miso—*Aspergillus oryzae*, *A. sojae*, *Saccharomyces rouxii*, *Pediococcus halophilus*. Tempeh—*Rhizopus oligosporus*. Sufu—*Actinomucor elegans*, *Mucor dispersus*. Address: NRRC, Peoria, Illinois.

3096. Hesseltine, C.W.; Wang, Hwa L. 1986. Food fermentation research and development. *Mycologia Memoir* No. 11. p. 9-22. Chap. 1. (C.W. Hesseltine and Hwa L. Wang, eds. Indigenous Fermented Food of Non-Western Origin. Berlin & Stuttgart: J. Cramer). [13 ref]

• **Summary:** The following fermented soyfoods are discussed: Miso, shoyu, natto, hamanatto, sufu, tamari, ontjom, tempeh. Address: USDA/NRRC, 1815 N. University St., Peoria, Illinois 61604.

3097. Hesseltine, C.W. 1986. Future of fermented foods. *Mycologia Memoir* No. 11. p. 303-16. Chapt. 17. (C.W.

Hesseltine and Hwa L. Wang, eds. Indigenous Fermented Food of Non-Western Origin. Berlin & Stuttgart: J. Cramer.) Previously published in 1981 in USDA Miscellaneous Publication FL-MS-333. [11 ref]

• **Summary:** Contents: Introduction. Positive factors for increased use of fermented foods. Trends in production of fermented foods. Factors that may effect the wider use of fermented foods in the West. Literature cited. Address: USDA/NRRC, 1815 N. University St., Peoria, Illinois 61604.

3098. Hirayama, Takeshi. 1986. A large scale cohort study on cancer risks by diet—with special reference to the risk reducing effects of green-yellow vegetable consumption. In: Yuzo Hayashi, et al., eds. 1986. Diet, Nutrition and Cancer: Proceedings of the 16th International Symposium of the Princess Takamatsu Cancer Research Fund, Tokyo, 1985. Tokyo: Japan Scientific Societies Press; Utrecht, Netherlands: VNU Science Press. xvi + 345 p. See p. 41-53. [13 ref]

• **Summary:** Breast cancer: In a prospective study of 142,857 women in Japan followed for 17 years, the author found a significant graded inverse relationship between consumption of miso soup and subsequent risk of breast cancer (p. 48). Note: This is the earliest document seen (June 1999) which suggests that soy might reduce one's risk of prostate cancer.

Stomach cancer: The author found a significant graded inverse association between the consumption of miso and green/leafy vegetables and gastric cancer risk among 122,261 men and 142,857 women followed for 13 years.

Japanese who consumed meat daily had much higher mortality from breast cancer and colon cancer than those who ate little or no meat.

“Daily consumption of green-yellow vegetables (GYV) rich in beta-carotene, vitamin C, calcium, and dietary fiber was observed to lower risks for selected cancers such as lung, stomach, prostate, and cervix. The risk reducing effect appeared more striking in cigarette smokers.

“Risks for cancer of the stomach in males and females and cancer of the breast in females were observed to be lower with the increase in frequency of soybean paste soup consumption which frequently contains GYV.” Address: Inst. of Preventive Oncology, Tokyo 162, Japan.

3099. Hoshijo, Kathy. 1986. The art of dieting without dieting! Recipe and guidebook. The Self-Sufficiency Association, 2525 South King St., Honolulu, Hawaii 96826. Or: P.O. Box 1122, Glendale, California 91209. xiv + 729 p. Illust. Index. 24 cm.

• **Summary:** A whopper of a cookbook, with 300 easy-to-prepare lacto-vegetarian recipes (no eggs) from the star of the PBS television series “Kathy's Kitchen.” Kathy has 6 healthy children (see color photo on rear cover) and 5 years

of experience on television teaching Americans how to eat healthy foods. Each recipe contains a detailed (full-page!) nutritional analysis.

This book contains a wealth of recipes using soyfoods. For example, the index lists 57 recipes for tofu and tofu mayonnaise, 13 recipes for tempeh, 9 recipes for yuba, 6 recipes for miso, and 4 recipes for soybeans (including soymilk). One section titled “Soyfriends” (p. 63) explains: “In eliminating meat from my diet, one food that has become a real friend in the kitchen is soybeans and by-products made from soybeans. From a nutritional standpoint, soybeans are a good nutritional replacement for meat as they are the only legume which contains all essential amino acids... Soybeans by themselves have a Net Protein Utilization about equal to that of beef and chicken.” Address: Honolulu, Hawaii; and Glendale, California.

3100. Hunt, Janet. 1986. *The compassionate gourmet: The best of international vegan cuisine*. Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. 160 p. Illust. Index. 22 cm.

• **Summary:** An excellent vegan cookbook, written for animal lovers. Soy-related recipes include: Avocado tofu pâté (p. 31). Celery miso pâté (p. 36). French bean salad with tofu dressing (p. 66). Tofu curry (Thailand; p. 74). Tofu and vegetable pakora (p. 86). Tofu layered casserole (p. 96). Tomato flan with tofu (p. 104). Tofu Lemon flan (p. 137). Yogurt dessert (made with cultured soya milk, p. 140). Rhubarb fool (dessert in soya milk, p. 141). Maple pancakes (with soya flour, p. 149). Walnut tofu balls (p. 156).

At least one recipe uses Holbrook’s Worcester Sauce—a Worcestershire-type sauce without animal products. Many recipes call for soy sauce or soya milk, and some for canned soy or nut “sausage.” Page 9 lists a number of special ingredients including Direct Foods Protoveg (soya “meat”), Infinity Foods (distributors [in Brighton, at Sussex University]) Soya mayonnaise, Lotus Foods TVP (soya “meats” in a varieties of forms and flavors), Plamil concentrated soya milk (use diluted as a milk, undiluted as a cream), and Tomor Margarine (the author’s favorite of the many vegan margarines now available in the UK). In all recipes, each ingredient is listed twice in side-by-side columns: once in its Imperial (metric) form and once in its American form, e.g. 385 ml soya milk, 1 1/3 cup soya milk. A number of recipes call for the use of alcohol (whiskey, brandy, etc.). The author has written at least 14 other books on vegetarian or wholefood cookery. Address: England.

3101. Kondo, Sonoko; Stoumen, Lou. 1986. *The poetical pursuit of food: Japanese recipes for American cooks*. New York, NY: Clarkson N. Potter. 296 p. Illust. by Etienne Delessert. Index. 25 cm.

• **Summary:** A very artistic, attractive, and authentic book with superb (imaginative and lyrical) illustrations. The

section titled “Staple foods you will need” (p. 17-20) discusses soy sauce, konbu and nori seaweeds, sesame seed paste (*atari-goma*; “Most Americans may be more familiar with the Middle Eastern version called tahini paste... Used in making salad dressings and dips”), miso, and sesame seeds. Soy-related recipes include: Grilled tofu with miso (Dengaku; p. 37). Sesame tofu (p. 38; no soy). Tuna sashimi and green onions with miso (p. 40). Daikon radish with lemon miso (p. 42). Cauliflower florets with miso (p. 42). Basic miso soup (p. 51). Clam miso soup (p. 51). Daikon radish miso soup (p. 52). Vegetable and chicken miso soup (p. 52). Tofu and wakame seaweed suimono (p. 53). Fried rice with tofu and vegetables (p. 89).

Chapter 7, titled “Tofu & egg dishes” includes (p. 103-17): Tofu in Kamakura. Description of different types of tofu: Silken, firm, grilled, pouches, deep-fried, fritters (*ganmodoki*), freeze-dried (*koya-dofu*), how to press tofu. Chilled tofu with ginger sauce. Braised *koya-dofu* with pea pods. Cold-day tofu. Vegetarian “chicken” tofu (with frozen tofu). Dragon’s head (*hiryozu*). Tofu from the sea (*Kenchin-mushi*). Tofu gratinée. Stuffed tofu. Scrambled tofu. Tofu treasure bags. Vegetarian “burger.” Egg tofu delight (*tamago-dofu*; no soy).

Beans for breakfast (*natto*; p. 125). Braised konbu seaweed, soybeans, and konnyaku (p. 128). Hijiki seaweed with tofu (p. 129). Stuffed tofu sushi (*Inari-zushi*; p. 157). Snapper tempura with asparagus and miso (p. 174). Marinated cod in miso sauce (p. 179). Seaweed, chicken, and vegetables with creamy miso (p. 185). Steak miso (p. 190). Sukiyaki (p. 206). Shabu shabu (p. 208). Vegetarian nabe (with tofu, p. 211). Sea and mountain (with miso sauce, p. 212-23). Winter nabe (with tofu, p. 214). Udon-suki (with tofu, p. 216). Tofu apple cake (p. 244). Chapter 15 (p. 260-71) is menu plans, by season and time of day.

The glossary (p. 272-82) includes: Agar-agar, azuki beans, konbu seaweed, kuzu, miso paste, nori seaweed, rice cakes (*mochi*), sesame seed oil, sesame seeds, soybeans—fermented (*natto*), soy sauce, tofu, tonkatsu sauce (with dark soy sauce), wakame seaweed. Address: Los Angeles, California.

3102. Kushi, Aveline. 1986. *Mit miso kochen: Makrobiotik [How to cook with miso: Macrobiotics]*. Schaffheim, Germany: Pala-Verlag. 140 p. Illust. Index. 21 cm. [Ger]*

• **Summary:** A German-language edition of her 1978 English-language book. Address: Massachusetts.

3103. McCarty, Meredith. 1986. *American macrobiotic cuisine*. Turning Point Publications, 1122 M Street, Eureka, CA 95501-2442. 110 p. Illust. Index. 28 cm. [6 ref]

• **Summary:** Page 7 and Chapter 7, titled “Beans and Soyfoods,” give basic descriptions of tempeh, miso, soy sauce, soymilk, and tofu. Recipes include Summer’s Mixed Vegetable Quiche (with tofu), Tofu Egg Foo Young, and

Baked Tempeh with Lemon-Mustard Sauce. Tofu recipes elsewhere in the book include Green Goddess Dressing, Nutty Noodle Bake, Pasta Patricio, and Sour Cream. Also contains information on sea vegetables. Address: Eureka, California. Phone: 707-445-2290.

3104. McDougall, Mary A. 1986. *The McDougall health-supporting cookbook*. Vol. 2. Piscataway, New Jersey: New Century Publishers. iii + 157 p. Index. 23 cm.

• **Summary:** This is a vegan cookbook whose 250 original recipes are designed to support The McDougall Plan, which is a diet low in fat and sodium, high in complex carbohydrates. Since soyfoods are relatively high in fat, they are used sparingly and the recipes are marked by a symbol of a crown. Low sodium soy sauce is used in many recipes. Soy-related recipes include: Scrambled tofu (p. 2-3). Tofu salad dressing (p. 7-8). Dijon tofu dip (p. 9). Onion soup dip (with tofu, p. 9). Dilly tofu dip (p. 9-10). Miso soup (p. 39). Creamed tofu soup (p. 41). Tempeh Creole (p. 62-63). Rice-tofu stuffing mix (p. 88). Tempeh and grain casserole (p. 91). Tofu loaf (p. 96-97). Baked tofu cubes (p. 97-98). Spinach-tofu burgers (p. 99-100). Where's the meat loaf? (with tofu, p. 101-02). Oat burgers (with tofu, p. 102-03). TVP stuffing mix (p. 109). Okara cookies (p. 126). Tofu banana pudding (p. 132). The section titled "Update on ingredients" (p. 133-35) includes a description of: Worcestershire sauce (Sharwood's—natural and without anchovies), umeboshi plum sauce, tamari or soy sauce, okara, tempeh, kombu, and tahini. A portrait photo on the rear cover shows Mary McDougall.

Note: Not long after this book was published, New Century Publishers changed its name to New Win Publishing, Inc. and moved to Clinton, New Jersey. As of 2000 this book is published by Putnam/Penguin. Address: P.O. 14039, Santa Rosa, California 95402.

3105. Rachim, Abdul. 1986. Notes on the soybean food industry under producers' co-operatives in Indonesia. *CGPRT* No. 4. p. 244-54. Includes 7 tables and figures.

• **Summary:** The Food Balance Sheets of the Central Bureau of Statistics show that 90% of Indonesia's soybeans are used for food. Most of the human consumption is in the form of a variety of popular processed foods: tempe, tahu (tofu), tauco, and a number of other less popular foods: soybean sprouts (tauge), sere in Bali, yuba, soybean milk, fried soybeans (eaten as a snack), beans boiled in the pod (also a snack), and the beans cooked as a vegetable or as an ingredient in soups. Only one factory (Sari Hasuda, in Yogyakarta) produces soybean milk. It is enriched with nonfat dried milk, vitamins, and minerals.

To coordinate and improve the economic viability of the small tofu and tempeh producers, a cooperative system, called Kopti (Koperasi Produsen Tempe dan Tahu Indonesia; Indonesian Tempe/Tofu Processors' Co-

operative) was founded in 1979. The main function of Kopti is to procure and distribute soybeans to its members. It handles about 407,160 tons/year. The purchase price of soybeans is as follows (Rupiah/kg): From USA 415, from China 425, from Indonesian farmers 475-80. Certificate seeds cost 550-75.

Tofu, tempe, kecap, tauco and oncom processing is primarily done in small factories. 3 studies have been made on the size of these factories and the quantities they process: as part of the 1974 Industrial Census of the Central Bureau of Statistics (CBS); by Winarno, et al., in 1976; and by the study team on Soybean Commodity System (SCS) in the Garut area of West Java in 1984. The findings of these 3 studies are presented in Table 2.

"We should be cautious in comparing their results, however, because of biases in the collection of the information. The CBS study, for instance, was part of an industrial census, which divided processors into two categories: small-scale industries (5-19 labourers), and home factories (1-4 labourers, some of whom may be family members). However, there may also be wide variations in the industry in different parts of the country.

"Despite these limitations, it seems that the volume of soybean processed by each unit has increased appreciably, probably reflecting a favorable growth of the industry. Yet the number of labourers per unit has remained small, and is probably diminishing. This may be because of the use of mechanical crushers or hullers for both tempe and tofu productions." Address: Research Asst., ESCAP CGPRT Centre, Bogor, Indonesia.

3106. Reddy, N.R.; Pierson, M.D.; Salunkhe, D.K. eds. 1986. *Legume-based fermented foods*. Boca Raton, Florida: CRC Press. viii + 254 p. Illust. Index. 26 cm. [585 ref]

• **Summary:** An overview with information on nutrition and processing of fermented soyfoods. Contents: 1. Introduction. 2. Soy sauce. 3. Miso. 4. Sufu. 5. Natto. 6. Tempe. 7. Fermented soybean milk and other fermented legume milk products. 8. Oncom (fermented peanut press cake). 9. Idli. 10. Dhokla and Khaman. 11. Dawadawa. 12. Papads. 13. Other legume-based fermented foods. 14. Future of legume-based fermented foods. Address: 1-2. Dep. of Food Science & Technol., Virginia Polytechnic Inst. and State Univ., Blacksburg, VA; 3. Vice-Chancellor, Mahatma Phule Agricultural Univ., Rahuri, Maharashtra State, India.

3107. Takahashi, Kuwako. 1986. *The joy of Japanese cooking*. Tokyo: Shufunotomo Company, Ltd. 311 p. Illust. (some color photos). Index. 27 cm.

• **Summary:** An excellent book with especially good descriptions of Japanese ingredients. Contents: Dedication. Foreword. Introduction. Part I. Japanese ingredients. Seasonings in Japanese cooking. Utensils and equipment.

Tableware. Measurements and equivalents. Basic techniques: Making soup stock (*dashi*), cooking rice, preparing fish, boning chicken, cutting vegetables, broiling, poaching, steaming.

Part II. Seafood. Chicken. Eggs. Beef. Pork. *Tofu* (bean curd). Vegetables, dried and manufactured foods.

Part III. Appetizers (*zensai*). Soups. Salads (*aemono*). Casseroles (*nabemono*). Rice. Pickles. Desserts and Japanese sweets.

Part IV. Menu planning. Sample menus with preparation schedules. Part V. Making tea. Serving sake.

A color photo (p. 15) shows six different soyfoods made from soymilk: 1. Deep-fried soybean puffs (*age* or *aburage*). 2. Fried tofu cutlet (*atsu-age* or *nama-age*). 3. Tofu patties (*ganmodoki*). 4. Soymilk film, dried (*yuba*). 5. Bean curd cake (*tofu*). 6. Freeze-dried tofu (*Kôya dofu*).

The section titled "Japanese ingredients" (a superb glossary, with many entries accompanied by an illustration {line drawing}, p. 17-32) includes: Bean curd cake (*tofu*), incl. regular tofu (*momen dofu*), soft tofu (*kinugoshi dofu*), Ever-Fresh Silken Tofu (aseptically packaged), instant tofu, firm tofu (Chinese style). Tofu products: Deep-fried soybean puffs (*agé* or *aburage*), fried tofu cutlet (*atsu agé* or *name agé*), freeze-dried tofu (*Kôya dofu*), grilled tofu (*yaki dofu*), tofu patties (*ganmodoki*). Beans: Red beans, dried (*azuki*), soybeans, dried (*daizu*), soybeans, fresh (*eda mamé*). Bean pastes: Bean paste, fermented (*miso*), sweet bean paste (*azuki an*). Soymilk film, dried (*yuba*). Soy sauce (*shoyu*).

The glossary also discusses: Horseradish, Japanese (*wasabi*), konnyaku, kombu, umeboshi, kabocha, daikon (4 forms), glutinous rice (*mochi gome*), red bean rice (*sekihan*), pounded rice cake (*mochi*), rice wine lees (*sakekasu*), rice wine lees pickles (*narazuke*), perilla (*shiso*), seaweeds (*hijiki*, *nori*, *yakinori*, *small sized nori*, *wakame*, *ao nori*), sesame seeds (*goma*), sweet rice wine for cooking (*mirin*), wheat gluten cake (*fu*, incl. *nama fu*, *yaki fu*, and *matsutake fu*).

The section titled "Seasonings in Japanese cooking" (another superb glossary, p. 33-37) discusses: Soy sauce, incl. Regular soy sauce (*koikuchi shôyu*), light soy sauce (*usukuchi shôyu*), tamari soy sauce (darker and thicker, made from fermented soybean and brine in the Nagoya area. "It is not saltier than regular soy sauce but has a richer flavor, thicker taste, and some people prefer tamari as the dipping sauce for sashimi... Note: In the USA the name 'tamari' is mistakenly used for natural soy sauce which is not tamari"), white soy sauce (*shiro shôyu*), milder soy sauce (contains less salt). A table showing the nutritional composition of five different types of Japanese soy sauce is given. Combinations of soy sauce and mirin: Teriyaki. Miso (incl. *kome miso*, *mugi miso*, *mame miso*, mixing of miso types).

Use the good index to see how each of the ingredients mentioned above are used in recipes.

A good biography of the author is appears in the Foreword and on the inside rear dust jacket (with portrait photo). The author was also very active in introducing ikebana (Japanese flower arranging) to the Bay Area and the USA. Address: Japan and Berkeley, California.

3108. Tsuji, Shizuo; Hata, Koichiro. 1986. Practical Japanese cooking: Easy and elegant. Tokyo & New York: Kodansha International. 151 p. Illust. (color). 31 cm. *

• **Summary:** Shizuo Tsuji was born in 1948. Address: Tsuji Professional Culinary Inst., Osaka, Japan.

3109. Wakeman, Alan; Baskerville, Gordon. 1986. The vegan cookbook: Over 200 recipes all completely free from animal produce. London and Boston: Faber & Faber. 298 p. Index. 22 cm. [28 ref]

• **Summary:** The 200 recipes in this cookbook demonstrate that a vegan diet can be rich and varied and reach the highest culinary standards. Within each chapter (e.g. main dishes, or soups) the recipe are listed with the quicker, cheaper, or simpler ones first and the slower, more expensive, or more elaborate ones last. A nutritional analysis per serving is given with each recipe.

Soy-related recipes include: Tofu stir-fry (p. 63). Tofu chips with walnuts and olives (p. 105). Vanilla dessert (with soya milk, p. 147). Caramel Cream Pudding (with tofu, p. 153). Orange and Chocolate Mousse (with soya milk, p. 154). Banana tart (with soya milk, p. 157). Chocolate tart (with soya milk, p. 158). Banana curd cake (with tofu and soya milk, p. 160). Lemon cheesecake (with tofu and soya milk). Rum and chocolate cheesecake (with tofu and soya milk, p. 162). Basic plain sauce (with soya milk, p. 166). Lemon curry sauce (with soya milk). Custard (with soya milk, p. 175). Hot chocolate sauce (with soya milk, p. 176). Tofu dressing (p. 181). Yoghurt salad dressing (with cultured soymilk yogurt, p. 182). Mayonnaise with soya milk (p. 185). Tahini spread with miso (p. 192). Scrambled tofu and herbs on toast (p. 254). Lassi (Traditional Indian sweet or salty yoghurt drink, p. 256). Soy sprouts (p. 262).

Many recipes call for the use of soy sauce or soya milk (especially desserts, dairylike products, or cream sauces), and tofu is used as an ingredient in many recipes in which it does not appear in the recipe name (e.g. Bulgur bake, p. 59; Mushroom pie, p. 88). In all recipes, each ingredient is listed twice in side-by-side columns: once in its Imperial (Metric) form and once in its American form, e.g. 385 ml Vegan Yoghurt, ½ cup.

One excellent chapter titled "The Alternative Dairy" (p. 231-50) is designed to tempt even the most determined cream addict. It contains descriptive sections on soya milk, margarine, tofu, vegan yoghurt, and vegan ice-cream, followed by recipes for: Vegan single cream. Vegan double

cream. Vegan sour cream. Vegan piping cream. Cashew cream. Coconut cream. Vegan yoghurt (2 methods). Plain ice cream. Banana ice-cream. Pineapple ice-cream. Chocolate ice-cream. and Peach sorbet.

Appendixes include: 1. Notes on vegan nutrition. 2. Seven reasons to be a vegan (health, economic, ecological, altruistic {world hunger}, compassionate (to animals), ethical {what right do we have to kill animals?}, spiritual). 3. Useful addresses. 4. Selected bibliography. 5. Abbreviations and measures. 6. Glossary of unusual ingredients: Incl. demerara sugar (dark brown, often used raw), miso, soya flour, soya milk, soya sauce, tofu. Address: England.

3110. Wang, H.L.; Fang, S.F. 1986. History of Chinese fermented foods. *Mycologia Memoir* No. 11. p. 23-25. Chap. 2. (C.W. Hesseltine and Hwa L. Wang, eds. Indigenous Fermented Food of Non-Western Origin. Berlin & Stuttgart: J. Cramer.) Previously published in 1981 in USDA Miscellaneous Publication FL-MS-333. [6 ref]
 • **Summary:** Discusses the early history of numerous types of ch'ü (similar to koji, with a substrate of wheat, barley, millet, and/or rice), chiang (salted sauce), shi or tou-shi (soy nuggets), chiang-you, tou-yu and shi-tche (the liquid from shi), tou-fu-ru (fermented tofu or sufu), La-pa-tou (Mucor fermented beans), Mei-tou-tcha (Meitauza, fermented okara), tsu (vinegar), yan-tsai (salted vegetables). The three main sources of early information on fermented soyfoods are the *Shih chi* (90 B.C., historical record), the *Ch'i-min yao-shu* (+6th century agricultural encyclopedia), *Pen-ts'ao kang-mu* (16th century botanical encyclopedia). Address: 1. USDA/NRRC, 1815 N. University St., Peoria, Illinois 61604; 2. Inst. of Microbiology, Academia Sinica, Beijing, China.

3111. Wang, H.L.; Hesseltine, C.W. 1986. Glossary of indigenous fermented foods. *Mycologia Memoir* No. 11. p. 317-44. Chapt. 10. (C.W. Hesseltine and Hwa L. Wang, eds. Indigenous Fermented Food of Non-Western Origin. Berlin & Stuttgart: J. Cramer). [29 ref]
 • **Summary:** The section titled "Fermented Legume Products" defines chao (Vietnamese fermented tofu), chiang-chu (Chinese koji), ch'ou-toufu and ch'ou-toufu-ru (fermented tofu), Damsuejang and doenjang (Korean miso), furu, sufu, hon-fan or red sufu (fermented tofu), in-shi ("Fermented black soybeans from China" [soy nuggets]), in-yu (Type of Chinese soy sauce made from black soybeans), kanjang (Korean soy sauce), kenima, ketjap or kecap (Indonesian soy sauce from black soybeans), meitauza or mei-tou-cha (fermented okara), meju (maiju or maeju; Korean soybean koji), natto, oncom (onchom or oncom), see-iu (see-iew; Thai soy sauce made from whole soybeans); soy sauce, soybean paste, tahuri (tahuli; Filipino fermented tofu. See sufu), tao-chieo (tao-jiao; Thai miso),

taohu-yi (Fermented tofu from Thailand. See sufu), taokoan, tempe (many types), thua-kab (dry thua-nao), thua-merk (wet and cooked thua-nao), thua-nao (Thai natto), tosufu (see sufu), toufu-ru (fermented tofu), tsue-fan (tsui-fan, chee fan; fermented tofu).

Note 1. This is the earliest English-language document seen (Oct. 2008) that uses the term "fermented black soybeans" or "Fermented black soybeans from China" to refer to soy nuggets.

Under "Fermented Cereal-Legume Products" we find: chiang, chiang-yu (chau-yu, Chinese soy sauce), fermented soybeans (soy nuggets), hamanatto, kochujang (kochu chang), miso, shoyu, tamari, taotjo (tao-tjo, tao dji; Fermented soybeans from Indonesia or Thailand [No! *Tao-tjo* is Indonesian-style miso and *tao dji* is Indonesian soy nuggets]), tao-tjung or tou-chiang (chiang), tao-yu (tou-yu; Chinese soy sauce), taoco (taocho, taoco, taucho; Indonesian miso), tou-pan-chiang (Chinese fava bean miso), tou-shi (toushih; Chinese soy nuggets), toyo (Filipino soy sauce). Note 2. This is the earliest English-language document seen (March 2009) that uses the word "taocho" to refer to Indonesian-style miso.

Fermented Vegetable Products include: Chiang-tsai (chiang-tsay; Vegetables in China pickled in chiang or soy sauce or tien-mien-chiang), miso-zuke. Address: USDA/NRRC, 1815 N. University St., Peoria, Illinois 61604.

 Address: Brooke Bond Oxo Ltd., Croydon, UK.

3113. Wood, B.J.B. 1986. Introduction of new fermented foods into Western culture. In: C.W. Hesseltine and H.L. Wang, eds. 1986. Indigenous Fermented Food of Non-Western Origin. Berlin: J. Cramer. 351 p. See p. 251-58. Chap. 14. [6 ref]
 Address: Dep. of Applied Microbiology, Univ. of Strathclyde, Glasgow, Scotland.

3114. Kadocho Mingu-kan. 1986? Shôyu no furusato: Kadochô mingu-kan shokunin-gura [The homeland of shoyu: Kadocho folk tool museum. Craftman's storehouse (Leaflet)]. Wakayama-ken, Japan. 6 panels. Undated. 26 x 12 cm. [Jap; eng]
 • **Summary:** Company name with diacritics is: Kadochô Mingu-kan. This company and museum was founded by Mr. Chôbei Kanô. Photos in the leaflet show the ancient shoyu equipment including a lever press (*shime-ki*) used to press shoyu from the moromi mash during the Edo period (1600-1868), up until the Meiji period. a wooden ladle (*shoyu kasuri*), a wooden shoyu vat with bamboo hoops, cloth money collecting bags, and a pedal-powered wooden cog-

wheel device for cracking wheat. A re-drawn line (the original was from early Meiji period) drawing shows the exterior of a row of shoyu plants along the street in downtown Yuasa. And a photo shows the inside and exterior of the present K.K. Kadocho, where shoyu is still made by traditional methods.

“The history of Yuasa shoyu: Shoyu, the world famous seasoning, was originally produced in Yuasa from Kinzanji-miso or soy bean paste, which was brought from China in the early 13th century by Hotokokushi of Kokokuji Temple of Yura. In those days, Shoyu was only for use at home and not for sale because of poor traffic facilities. But about 400 years ago, in Azuchi-Momoyama era, Shoyu was first shipped to other parts of Japan as a commodity here in Yuasa.

“Since then, Shoyu industry developed a great deal, thanks to the protection of the Lord of Kishu, and it is said that in the Bunka-Bunsei [Bunka (1804)–Bunsei (1818)?] era, there were 92 Shoyu-ya or Shoyu-makers in about one thousand houses of Yuasa.

“In the meantime, people in Yuasa showed how to make Shoyu to the people in some parts of Japan, such as Choshi near Tokyo. Today the Shoyu industry in Yuasa is dwindling, chiefly owing to the promotion of some major Shoyu companies. But we still have the traditional method of making that Yuasa Shoyu once called Yuasa Tamari in Kamakura era.”

“The origin of shokunin-gura or shoyu workshop: In Yuasa, the birthplace of Soy Sauce, there still remain some old workshops with very thick and crumbling walls here and there. Some workshops are now converted to the residences. With the disappearance of Shoyu makers, we can no longer see craftsmen who used to toil and moil here, and traditional Shoyu things, the fruits of their wisdom and efforts. (Today we have several museums of folk craft throughout Japan. But I feel responsible, as one of the Shoyu craftsmen, for collecting and preserving these old Shoyu things as well as ‘the taste of old days.’)

“Kadocho Shokunin-gura, with the size of 80 square meters, was one of the fermenting houses built in Keio era [in Keio 2, 1866]. All these Shoyu things kept here are the tools used for making Shoyu and each of them has sweat and pains in it of the craftsmen of those days. I welcome you to my Shoyu workshops of about 100 years old.”
Address: K.K. Kadocho, Kitamachi 7, Yuasa-cho, Arita-gun, Wakayama-ken, Japan. Phone: 0737-62-2035.

3115. *Toyo Shinpo (Soyfoods News)*. 1987. Gyôkai saidai no nandai okara o kangaeru. Urisaki ga kadai ni [Manufacturers’ biggest problem is okara. The problem is where to sell it, dry it, and the expense of doing so]. Jan. 1. p. 7-8. [Jap; eng+]

• **Summary:** Is okara waste matter or can it be put to use? If it is useful, can it be used inexpensively? Tofu

manufacturers in Japan who deal with okara are trying to use twin screw-extruders to put okara to good use. Dried okara is useful, but drying okara is a very expensive operation. Okara has recently been used in dog, cat, and fish foods, etc. The dairy industry also consumes some.

They are even using it as compost in Aichi-Ken. This has had some good results. They started to use it as fertilizer in July 1986, and they produced nice melons and watermelons. In addition, the okara seemed to ward off insects. Because of results such as these, okara now sells for ¥5,000 a ton. There have been good results in using okara as fertilizer in the production of cucumbers and tomatoes in Hokkaido. In Nagano, they are trying to cultivate shimeji mushrooms using okara.

Okara is also being used in miso for miso pickles (misozuke). This research is still in the preliminary stages however. In Kagawa-ken, a frozen food company is making tofu croquettes using okara. In Fukuoka-ken, they use dried okara for food products, growing mushrooms, and as fertilizer. It is also used in croquettes and hamburgers—3 manufacturers are actually making these foods now.

3116. Westbrae Natural Foods. 1987. Distributor catalog, FOB pricing: Jan. 1, 1987. Emeryville, California: Westbrae. iv + 19 + [12] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-10 are a computer-printed price list, and 11-19 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) of various Westbrae products. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

3117. Cushman, Deborah. 1987. ISU researcher [Walter Fehr] is Calvin Klein of designer beans. *Des Moines Register (Iowa)*. Jan. 14. p. 1T, 10T.

• **Summary:** New varieties are low in linolenic acid, high in stearic acid, high in protein (Vinton, for tofu), small seeded for sprouts, and large seeded for soynuts and miso.

3118. Fujinami, Hiroko. 1987. Dai 29 kai zenkoku miso kanhyô kai o oete [Completing the 29th annual Japanese national miso evaluation and grading contest]. *Daizu Geppo (Soybean Monthly News)*. Jan. p. 36. [Jap]

• **Summary:** This contest is sponsored each year by the Central Miso Research Inst., and is widely participated in and the awards highly respected. Address: Chuo Miso Kenkyujo.

3119. Oberlaender, Michaela. 1987. A sorcerer’s sauce [John Troy and American Natural Foods miso condiments]. *Nation’s Business*. Jan. p. 70.

• **Summary:** “Miso was available only as a raw material in health food stores—until John Troy came along. Now in hot sauce and 7 other Troy products, it is on the shelves of supermarkets.” Before creating Hot Stuff, Troy and his wife, Carol, were making candy bars for Elf Works, a home business, in Chapel Hill, North Carolina. Two years ago he started American Natural Foods (ANF), raising \$400,000 from 30 shareholders. Recently ANF moved to Hillsborough, where it leases offices and a warehouse.

The Hot Stuff and six other condiments are made at Mrs. Campbell’s Canning Co. near Winston-Salem, North Carolina. Miso Mustard, the company’s best-selling product, is made in Emeryville, California. American Natural Foods’ products were initially sold only in natural- and health food stores. Last year the company’s sales were \$220,000—in its first fiscal year; they are expected to double next year. Recently they signed a contract with Kroger to try four products in the national chain’s 1,600 stores. Troy, age 46, says wizard is his “alter ego.” A college dropout, he started a stereo retail business, became dissatisfied with retailing, then “took a sabbatical” to ponder what life was all about. During that time he became a vegetarian, but finding vegetarian food too bland, he began to experiment with new seasonings, including miso.

A color photo shows John Troy dressed in purple wizard’s robes, with hat, rope belt, and twisted staff, standing in front of a caldron of his products—all in glass bottles.

3120. *SoyaScan Notes*. 1987. New Trend: Increase in breeding of soybeans for specialized uses, including special food uses such as tofu, miso, and soy sprouts (Overview). Jan. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** This is part of the larger trend toward value added products and toward tailoring soybeans for export to food manufacturers in Japan. The new breeding work is being done by various countries (such as Canada and the USA), and by many universities, agricultural experiment stations, and private seed breeding companies within the USA. U.S. soyfoods companies will definitely benefit for this trend and should keep close track of new developments.

3121. Vandemoortele, Philippe. 1987. Editorial. *Soyfoods (ESFA)* 1(1):2. Jan.

• **Summary:** Contents: What are soyfoods? Why was the Association founded? What will the Association do to achieve its goals. What can a member expect from the Association?

“Soyfoods cover all products deriving from the whole soybean produced according to a traditional process and manufactured into soya milk, tofu, tempeh, miso, soya sauce, soya sprouts and other products. Why was the European Soyfoods Assoc. founded? Until only a few years ago, only industrial soya protein such as defatted and fullfat

flour, concentrates, isolates, and textured protein were used in the food industry. They are mainly used for their functional properties rather than for their nutritional characteristics.” Now there is a growing interest in soyfoods. The ESFA will organize a Soyfoods Conference every 2 years. Address: President of the ESFA (European Soyfoods Assoc.).

3122. Flinders, Carol. 1987. Laurel’s Kitchen. *Washington Post*. Feb. 18. p. E3.

• **Summary:** A vitamin B-12 deficiency is a rare but very serious problem. “Another way to get vitamin B-12 is to eat tempeh or miso every day”—although neither is a completely reliable source. “Other fermented foods, such as natto and even shoyu, may contain B-12, but it shouldn’t be counted upon.” Address: [California].

3123. Appropriate Foods, Inc. 1987. Eat Appropriately! [Catalog and price list]. 292 Liberty Ave., Brooklyn, NY 11207.

• **Summary:** The following lines are carried and distributed: Appropriate Foods, New York Soy Deli, The Soy Source, Emperor’s Best, Cedar’s Mediterranean Foods, Grainaissance (amazake and mochi), Infinity Foods (amazake puddings), Integrity Baking Co., Jofu, Maine Coast Sea Vegetables, Malka’s Foods (Blueberry Tofu Pie), Miso Master, Nasoya Foods, New England Country Dairy, Ray’s Seitan Wheat Meat, Soya Kaas, Stonyfield Farms (Yogurt), Sunshine Burgers. Address: Brooklyn, New York.

3124. Diamond, Marilyn. 1987. A new way of eating: The proper foods, combinations, and recipes to start you on the road to health. New York, NY: Warner Publications. 158 p. Feb. Introduction by Harvey Diamond. Index of recipes by type. 21 cm.

• **Summary:** This is a slightly revised re-release of Marilyn Diamond’s first book “The common sense guide to a new way of eating” (1980, Golden Glow Publishers). “Marilyn Diamond, co-author with her husband, Harvey Diamond, of *Fit for Life*, the diet and life-style program that has swept America from coast to coast, has been a student and teacher of international cuisine for over 20 years. She is a Phi Beta Kappa, magna cum laude graduate of New York University, with certification in nutritional counseling from the American College of Health Science. She is director of the Institute for Nutritious Home Cooking in Santa Monica, California, and specializes in counseling for children and pregnant women. Much of her time is spent coordinating numerous projects, such as a *Fit for Life* food product line, *Fit for Life* restaurants, and a national *Fit for Life* club and newsletter.” She lived one summer as an exchange student in Avignon, France.

This book is based on several dietary principles: 1. Consumption of a sufficient quantity of water-content

foods, such as raw fruits and vegetables. One should eat lots of salads. 2. Proper food combining. 3. Correct consumption of fruit to cleanse your body. A fruit-only breakfast is recommended. 4. Avoid acid-causing foods such as meat, coffee, alcohol, dairy products, cooked nuts or fruits, and chemically processed foods such as white sugar and white flour. Fresh fruit and vegetable juices neutralize acid. Note that small amounts of meat, chicken, and dairy products are included in some recipes (see p. 28-29, 48-49, 127, 129, 131, 134, 136, 138) since the author advises people to move away from their addictions and habits slowly and to enjoy feasts on special occasions.

Soy-related recipes include: Chinese vegetable salad and dressing (with soy sauce, p. 43, 55). Tamari salad dressing (p. 57). Easy minestrone (with white or red miso, p. 69). Easy chow mein (light soy sauce, tamari, and miso, p. 148). Note that tofu is not mentioned. Address: Fit for Life, 2210 Wilshire Blvd., Suite #118, Santa Monica, California 90403.

3125. Hayasaka, Chieko. 1987. Chôri-men kara mita misoshiru no tokusei. I. Miso to dashi no kanten ni tsuite [Cooking characteristics of miso soup. I. Relationships between miso and soup stock]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 82(2):99-104. Feb. [Jap]

• **Summary:** Sensory relationships are discussed. Address: Joshi Gakuin Tanki Daigaku.

3126. Ismunadji, M.; Zulkarnaini, I.; Somaatmadja, S. 1987. Nutritional disorders of soybean in Indonesia. *CGPRT* No. 10. p. 167-74. Feb. J.W.T. Bottema, F. Dauphin, and G. Gijbers, eds. *Soybean Research and Development in Indonesia*. [11 ref]

• **Summary:** Nutritional disorders of soybean are common in Indonesia. Visual symptoms, such as leaf chlorosis (potassium deficiency), stunted growth, and malformation of leaves are often observed in the field. Molybdenum and phosphorus deficiencies, aluminum toxicity, and acid mineral soils (corrected by careful liming) are common problems on specific soil types.

Soybean is the most important grain legume crop grown in Indonesia. It is used for food and feed and plays an important role in the Indonesian diet as a source of protein. Soybean protein is much cheaper than protein from animal sources. Soybean-based food such as tempe, tahu, soy sauce and tauchou are very popular. Indonesia is not yet self-sufficient in soybean and imports are close to a half million tons/year. The Government is promoting soybean production by acreage expansion and intensification. Address: Bogor Research Inst. of Food Crops (BORIF).

3127. **Product Name:** [Rice Miso, and Sweet White Miso]. **Foreign Name:** Komé Miso, Shiro Miso (Miso doce). **Manufacturer's Name:** Miso Produções.

Manufacturer's Address: Rua do Douro, No. 92 r/c, Rebelva, 2775 Parede, Portugal. Phone: (1) 247 50 68.

Date of Introduction: 1987. February.

Ingredients: Rice miso: Organic soybeans, rice koji, salt, water.

Wt/Vol., Packaging, Price: 350 gm.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Calories 153, protein 13.5 gm, carbohydrates 19.1 gm, sodium 4400 mg.

New Product-Documentation: Letter from Miguel Azguime, owner. 1989. Oct. 31. The rice miso is aged 2 years in wooden kegs. The sweet rice miso is aged 1-2 months. There are 5 varieties of Nerimiso. In 1990 rice vinegar and mugi (barley) miso will also be available. Miso is aged in 800 kg capacity wooden kegs, stored outside under a large roof.

Eight years ago (in 1981) the company started research on producing koji, in order to make natural miso on a community scale. As demand increased, so did production and understanding of the process. They shared experiences with many friends, especially in Europe, studying microbiology and making many experiments at the Lisbon University Laboratory. [Parede is located about 10 miles west of Lisbon, near the Atlantic Ocean.] Two years ago they started using organically grown grains and by the end of 1990 all of their products will be guaranteed organic. Their products are made using simple, time-honored techniques to guarantee quality. They are the only company in Portugal making koji and products derived from it. He and his wife are professional musicians.

Labels: 1989. 7 by 2.75 inches. Black on white.

Illustration of a Tibetan vajra on each label. The rice miso was introduced in Feb. 1987 and the sweet white miso in Dec. 1987.

3128. **Product Name:** Soyboy Tofu Burgers.

Manufacturer's Name: Northern Soy, Inc.

Manufacturer's Address: 30 Somerton St., Rochester, NY 14607. Phone: 716-442-1213.

Date of Introduction: 1987. February.

Ingredients: Harvest Light Tofu (filtered water, organically-grown soybeans, natural calcium chloride nigari—a natural mineral coagulant, not a preservative), red miso (water, rice, soybeans, salt), carrots, dried onion, sesame seeds, sunflower seeds, spices, guar gum, carrageenan.

Wt/Vol., Packaging, Price: 6.25 oz 2 burgers per package.

How Stored: Refrigerated, 45 day shelf life. Or frozen.

Nutrition: Per burger (3.125 oz.): Calories 180, protein 14 gm, carbohydrate 4.3 gm, fat 12.5 gm, sodium 350 mg.

New Product-Documentation: Manufacturer's catalog.

1987. Oct. Gives ingredients. Talk with Andy Schecter. 1988. Feb. 17. Launched in Feb. 1987. Label. 1987. 3.25 inches diameter. Red, green, and black on yellow. "All

natural meatless entrees. Cholesterol-free. No preservatives and nothing artificial. Precooked for your convenience.”

3129. *Soya Newsletter (Bar Harbor, Maine)*. 1987. Miso enters prepared foods market. Jan/Feb. p. 6.

• **Summary:** American Miso Co., founded in 1980, sold 500,000 lb of miso in 1986. Its 8 varieties are now widely used in second generation products, such as tofu salad dressings, soft tofu-based “cheese,” fancy mustards, condiments, and a spaghetti sauce.

3130. Belleme, John. 1987. Making miso at home. Putting up your own batch is surprisingly easy and rewarding. *East West*. March. p. 14-21. [1 ref]

• **Summary:** Describes how to make miso at home. Belleme, founder of the American Miso Co., apprenticed in Japan with miso master Takamichi Onozaki. Since 1979 Belleme has made almost 1,000,000 pounds of miso. Address: North Carolina.

3131. Brown, Judy. 1987. Suiting America’s tastebuds: The new American soyfoods. *Whole Foods*. March. p. 37-40, 42-43. [1 ref]

• **Summary:** An overview, drawing heavily (with acknowledgment) on Shurtleff & Aoyagi’s *Soyfoods Industry and Market* for statistics. Address: Alban & Associates, San Francisco, California.

3132. Eden Foods, Inc. 1987. Traditional Japanese foods. 701 Tecumseh Rd., Clinton, MI 49236. Manufacturer’s catalog.

• **Summary:** Contains information on the production and use of tamari, shoyu, and miso. The company still uses the terms Hacho [sic, Hatcho] miso, kome miso and mugi miso, and still confuse consumers by calling their shoyu “Tamari-Natural Shoyu.” Address: Clinton, Michigan.

3133. Le Seuil. 1987. Catalogue [Catalog]. Zone Industrielle, 34190 Ganges, France. 34 p. 21 x 10 cm. [Fre]

• **Summary:** In French “Seuil” means “Threshold, sill, or shelf (of the ocean bed).” Contents: Oriental specialties (tamari, shoyu, and miso imported from Japan, p. 6-8). Soya pasta (spaghetti & macaroni, p. 15). Yellow soybean (p. 17). Virgin soy oil (p. 20).

Letter from Maurice Marchand. 1989. June 1. The company, which was founded in 1979, moved to this new address on 1 Jan. 1986. They are very interested in soyfoods, both imported (they import from Mitoku and Yamato), and made in France (they work with Athanor and Sojadoc). Address: Ganges, France. Phone: 67.73.99.80.

3134. Marty, Denise. 1987. Les dérivés de soja, un marché pour les Pme [Products derived from soya, a market for the

small- and medium-sized companies]. *Agro Industries* No. 26. p. 40-41. March. [Fre]

• **Summary:** “At SIAL this year, 5 soyfoods companies will present their products. For a sector this small, this is important, and it indicates that the sector is in full growth.” Four companies are Soy, Sojadoc, Daizou, and Lima N.V. Daizou was created in 1985 by the Japanese restaurant Le Bol en Bois, one of the first to sell tofu in France. Daizou makes only 50-100 tonnes/year of specifically Japanese products. The Société Soy, founded in 1980 [sic, actually 1982], is busy transforming tofu into new foods. This year it launched the new tofu yogurt-like dessert Soyeux. Its new plant at St. Chamond (Loire) has a capacity of 7 tonnes/day of tofu, or 1,500 tonnes/year. In June 1986 the society Sojadoc in Albi took the same step, changing from an artisans production of 10 tons/year of tofu to large scale (1,500 tonnes/year) production of tofu and soymilk over the next 3 years from an investment of 12.5 million French francs. Lima-France, affiliate of a Belgian company, is at Lot-et-Garonne. Jan Kerremans is their miso master, making about 70 tonnes a year.

In 1983 about 10 million liters of soymilk were consumed in Europe, compared with 30,000 million liters of dairy milk. Guy Coudert of the European Soyfoods Association estimates that by the year 2000 some 25,000 tonnes/year will be consumed in France. Address: France.

3136. Organized Kashruth Laboratories. 1987. Re: Certification for eight products made by American Miso Co., Inc., of North Carolina as Kosher and Pareve. Letter to American Miso Co., April 23. 1 p.

• **Summary:** The products are: Amakuchi mugi miso. Traditional red miso. Mellow white miso. Country barley miso. Sweet white miso. Chickpea miso with rice. Chickpea miso with barley. Sushi rice. “These products must bear our Circle-K seal of Kashruth on the label. This certification is valid until April 30, 1998 and is subject to renewal at that time.” Rabbi Bernard Levy, Kashruth administrator. Address: P.O. Box 218, Brooklyn, New York 11204. Phone: 718-851-6428.

3137. Business Communications Co., Inc. 1987. Mass merchandised “healthy” foods. 25 Van Zant St., Norwalk,

CT 06855-1781. 162 p. April. Price: \$1,500.

• **Summary:** In this expensive (\$1,500) market study, there is a chapter titled "The Soyfoods Market," which has the following segments: Summary of market segment. The tofu market. Soy-based frozen desserts. Soy-based beverages. Soy-based yogurt-like products. Other soy-based prepared foods. Fermented soy products. "A move toward the consumption of convenient, good-tasting foods with a healthful image is the food trend of the eighties. There is a strong relationship between healthful foods and the consumer's need for convenience. In the future, food manufacturers can expect the growth of 'healthy' foods to outpace that of the total food market, as more consumers pursue a healthful lifestyle..."

"BCC defines the 'healthy' food market as those segments of food categories that are generally accepted by the consumer as having a healthful image. Total retail sales of all product segments included in this analysis were estimated to have reached \$88 billion in 1986." Address: Norwalk, Connecticut. Phone: 203-853-4266.

3138. **Product Name:** Fantastic Noodles: Miso Vegetable.

Manufacturer's Name: Fantastic Foods.

Manufacturer's Address: 106 Galli Dr., Novato, CA 94947. Phone: 415-883-7718.

Date of Introduction: 1987. April.

Ingredients: Ramen noodle ingredients: whole wheat flour, corn oil. Seasoning/vegetable packet ingredients: Powdered miso (soybeans, rice, salt), dehydrated vegetables (carrots, onion, corn, peas, parsley, garlic celery), dried yeast (molasses grown), spices, soybean oil, toasted sesame oil (1990).

Wt/Vol., Packaging, Price: 2.25 oz (64 gm) paper cup. Retail for \$1.28 at Lucky supermarket (2/91, Lafayette, California).

How Stored: Shelf stable.

Nutrition: Per 32 gm (as prepared 7 oz): Calories 152, protein 5 gm, carbohydrate 19 gm, fat 7 gm, sodium 434 mg.

New Product–Documentation: Ad in Natural Foods Merchandiser. 1987. Aug. p. 34. "Poof! There's something very magical about our new noodle soup. In just 3 minutes it's a hearty cup of lunch. Without all the unnatural stuff." Ad in East West. 1987. Sept. Rear cover. "Instant Gratification." Talk with Fantastic Foods. 1988. Feb. 17. Product was introduced in May 1987. Talk with Gail Hartman. 1988. Sept. 27. Introduced at Anaheim in the spring of 1987.

Product with Label purchased at Lucky supermarket in Lafayette, California. 1991. Feb. 18. Package copyright 1990. Retail for \$1.28. 3.5 inch diameter mouth by 4 inches high. Paper cup with peel-off paper lid wrapped in plastic film. Purple, black, red, and green on beige. Color photo of the prepared product in the cup, seen from the top.

"Ready in 5 minutes all natural 100% whole wheat noodles." In the cup, the seasoning/vegetable packet is made of plastic film. Soyfoods Center product evaluation. Flavor: Very nice; has a curry flavor. Package design: 10, excellent.

Spot in Vegetarian Times. 1995. Oct. p. 18. "Soup cup surprise." Shows the current package design of Miso Vegetable Noodles.

3139. Kuwahara, M.; Nakano, H. 1987. Soybean in Japan. *Eurosoya* No. 5. p. 5-7. April. [1 ref. Eng]

• **Summary:** In 1984 Japan consumed 4,810,000 tons of soybeans. Of the total, 82% is used for oil and meal production, 17% for foods, and the rest (1%) as feed for livestock. 95% of the soybeans used are imported, mainly from the USA (92%) and China (7%). The soybeans from China and Japan, which are higher in protein and lower in oil, are used for traditional foods. Domestic production is small and these soybeans are expensive. They are processed to make tofu (38%), miso (24%), natto (10%), and other foods (11%), while the remaining 17% is used for home cooking.

Soybean breeding started in 1910 in Japan; pure line selection from many local varieties was the main method. After about 1930 cross-breeding became the main method. In 1935 soybean breeding started at the experiment stations of the Ministry of Agriculture, Forestry, and Fisheries (Norinsho). Today there are 5 such stations with a soybean breeding laboratory and 3-5 breeders per lab. From north to south they are Chuo and Tokachi in Hokkaido, Kariwano in Tohoku, Chushin in Nagano, and Kumamoto in Kyushu. Yet from 1950 to 1980 soybean yield increased only slightly, to 1.5 tonnes/ha from 1.3 tonnes. Japan's largest seeded soybean is Tanbaguro; 100 seeds weigh 70 gm. It is preferred for cooking. The smallest is Nattoshoryo; 100 seeds weigh 8-10 gm. It is traded at high prices for natto production.

For decades the Japanese government, for political reasons, has subsidized rice production. But after the late 1970s, when production far exceeded domestic consumption, the government decided to reduce rice acreage and promote the cultivation of other crops, especially soybeans, barley, and wheat in the drained paddy fields (converted upland fields), which accounted for 62% of the soybean cultivated area in 1985, totaling 134,000 ha. Address: Lab. of Soybean Physiology, National Agriculture Research Center, Tsukuba, Ibaraki 305, Japan.

3140. Truesdell, Delores D.; Green, N.R.; Acosta, P.B. 1987. Vitamin B-12 activity in miso and tempeh. *J. of Food Science* 52(2):493-94. March/April. [17 ref]

• **Summary:** The U.S. Pharmacopoeia microbiological assay with *Lactobacillus leichmanii* (ATCC 7830) was used to determine vitamin B-12 activity in light rice miso, dark rice

miso, barley miso, tempeh, and tempeh burger. Unpasteurized misos had the highest B-12 content, averaging 0.21 micrograms/100 gm. Vitamin B-12 activity in miso ranged from a high of 0.25 micrograms/100 gm in barley miso to a low of 0.15 micrograms/100 gm in light rice miso.

Pasteurized tempeh contained 0.12 micrograms/100 gm and tempeh burger contained 0.06 to 0.11 micrograms/100 gm. The variation in vitamin B-12 activity found in these products may be due to different conditions used or produced during fermentation. Collaborative studies and assessment of vitamin B-12 pseudofolate (analog) activity are needed before these foods can be considered a source of vitamin B-12. Address: Dep. of Nutrition & Food Science, College of Home Economics, Florida St. Univ. Tallahassee, FL 32306.

3141. Aihara, Cornelia. 1987. Vega kitchen condiment series: Miso. *Macrobiotics Today* (Oroville, California). May. p. 7-10.

• **Summary:** Contains an introduction to miso, recommends barley miso to rice miso, and gives some miso recipes. Address: GOMF, 1511 Robinson St., Oroville, California 95965.

3142. *East West*. 1987. Vegemite: Australian miso. May. p. 10.

• **Summary:** Developed in Melbourne in 1923, Vegemite is a salty, tangy spread, a concentrated yeast extract, made by the Australian subsidiary of Kraft, Inc. Today Australians consume 5,000 tonnes a year; they spread it on toast, mix it with hot water to make a drink, or add it to stews.

3143. Fehr, W.R. 1987. Breeding methods for cultivar development. In: J.R. Wilcox, ed. 1987. Soybeans: Improvement, Production, and Uses. 2nd ed. Madison, Wisconsin: American Society of Agronomy. xxii + 888 p. See p. 249-93. Chap. 7. [145 ref]

• **Summary:** Contents. 1. Objectives of cultivar development: Seed yield, pest resistance, maturity, lodging resistance, plant height, seed size, seed quality, protein and oil quantity and quality, shattering resistance, resistance to mineral deficiencies and toxicities (e.g. iron deficiency chlorosis), resistance to herbicide injury. 2. Population development: Types of populations (two-parent population, multiple-parent, backcross), hybridization. 3. Inbred line development: Methods (pedigree, bulk, mass selection, single seed descent, early generation testing), comparison of inbreeding methods, number of inbreeding generations. 4. Inbred line evaluation: Selection before or during replicated yield tests, replicated tests, resource allocation for yield evaluation, techniques for plot management (planting, end-trimming, harvest). 5. Breeder seed production: Methods of purification, timing of breeder seed production. 6.

Commercial use of seed mixtures: Marketing of seed, seed yield, overcoming deficiencies of high-yielding cultivars, stability of performance, other considerations.

Concerning seed size: The seed size of widely grown soybean varieties ranges from about 12-18 gm per 100 seeds. Soybeans weighing less than 10 gm per 100 seeds are preferred for natto, whereas soybeans weighing more than 22 gm per 100 seeds are preferred for various food uses. Verde, a variety with green seeds that weigh 32 gm per 100 seeds was developed for processing as a canned or frozen vegetable. Prize, a yellow-seeded variety weighing 27 gm per 100 seeds, has been used for home gardens, and for making roasted soy flour and miso. Address: Iowa State Univ., Ames, IA.

3144. *Florida Grocer* (Miami, Florida). 1987. Products and partners [Simply Natural, Inc.]. May.

• **Summary:** "Principals Bob Pirello and Christina Hayes who founded Simply Natural, Inc. are shown with a variety of new tofu-based products, including a patented "Tofu Cheese," fresh frozen Tofu Pastas, and miso based salad dressings." The products are all non-dairy.

3145. **Product Name:** [Brown Rice Miso].

Manufacturer's Name: Granja Tierra Nueva.

Manufacturer's Address: Aldea San Luis, La Azulita, C.P. 5102, Estado Merida, Venezuela.

Date of Introduction: 1987. May.

New Product-Documentation: Letter from Ing. Oswaldo Perez. 1987. July. He made 500 kg.

3146. Jacobs, Barbara; Jacobs, Leonard. 1987. Cooking with seitan: Delicious natural foods from whole grains. New York, NY: Japan Publications. 256 p. Foreword by Aveline Kushi. Index. 26 cm. [16 ref]

• **Summary:** "Seitan is cooked and flavored gluten that has been extracted from [high-gluten] wheat flour. It is very rich in protein, while being extremely low in fat and calories... The traditional Japanese way of seasoning seitan is to cook it in a broth using kombu sea vegetable, natural soy sauce, and fresh ginger root. This... is the one taken for granted as the 'standard seitan flavor' by commercial seitan makers and most people who are familiar with seitan. Many other mixtures of seasonings can be added to the basic seitan broth. Several earlier books on wheat gluten have been written, generally by Mormons.

This book offers you the history, nutritional information, a variety of preparation techniques, and hundreds of recipes that will allow you to convert wheat into a delicious and nutritious food. Especially suited for vegetarians who are interested in high-protein substitutes for animal foods.

Contents: Acknowledgments. Introduction: About wheat gluten, gluten, commonly asked questions about seitan. Getting started. Creating seitan from wheat flour (at home

in 30-40 minutes). Using the seasonings. Additional methods of cooking. Appetizers. Soups. Main dishes and casseroles. Side dishes. Salads. Sauces, dressings and marinades. Condiments. Sandwiches. Desserts. From the pantry. Sample lunch and dinner menus. Appendix: 1. All about saving and using wheat starch. 2. Storing uncooked seitan. Storing cooked seitan. 4. Commonly encountered problems and some solutions. Nutritional information. Questionnaire for readers. About our ingredients (discusses natural soy sauce, and soymilk). Glossary (includes fu [dried gluten], miso, natural soy sauce or shoyu, soymilk, tamari, tofu). Bibliography.

Recipes containing soyfoods include: Miso soup with fu and wakame (p. 79). Miso-lemon dressing (p. 171). Tangy miso-tahini sauce (p. 180). Tofu spread with variations (p. 181). Seitan-tofu paté (p. 181-82). Tofu "feta cheese" (p. 192-93). Miso-tahini sauce or spread (p. 209).

When Michio and Aveline Kushi started the Seventh Inn Restaurant in Boston in 1971, they introduced seitan, a food that George Ohsawa had popularized in Japan, especially among macrobiotic people. Yumie Kono taught the chefs, one of whom was Lenny Jacobs, how to make seitan (p. 5).

The Introduction (p. 17-18) states: "Seitan is a food with a long history. Although not widely known in the West, it was traditionally eaten in China, Korea, Japan, Russia, the Middle East, and probably many other countries that grew wheat. In America, the Mormons and the Seventh Day Adventists made gluten and used it on a regular basis... The name *seitan* comes to us from the Japanese, who have prepared cooked wheat gluten for hundreds of years... Some natural foods industry insiders think seitan will become the 'tofu of the '80s.'

"Seitan was introduced to the U.S. natural foods industry about sixteen years ago [1970] when a Japanese variety, shrink-wrapped and quite dry and salty, was first imported. There had been several other varieties available from vegetarian groups, primarily the Seventh Day Adventists and the Mormons. Chinese restaurants have also been preparing wheat gluten for many years. The Chinese call it *mien ching*, or *yu mien ching*. Chinese restaurants often refer to it as 'Buddha Food,' claiming that it was developed by Buddhist monks as a meat substitute. There is also a dried wheat gluten available in Oriental food markets called *fu* by the Japanese and *k'ao fu* or *kofu* by the Chinese."

In the USA, about 130,000 pounds of seitan are made each year. The market is growing rapidly. Current U.S. seitan manufacturers are: 1. Upcountry Seitan in Lenox, Massachusetts, the largest known producer in America, which makes about 600 lb/week and distributes it in 6 states. The company, started about 3½ years ago (counting from Jan. 1987, i.e. founded in about mid-1983) by Win Donovan, is now owned and operated by Wendy Rowe and Sandy Chianfoni. They get a yield of 1.33 (i.e. 90 pounds of

flour result in 120 pounds of seitan). 2. Rising Tide Natural Market in Long Island, New York. Michael Vitti has been making seitan for 6 years. About 1/3 of his production is bought by another company for use in making sandwiches. 3. Grain Dance in San Francisco, California. Ron Harris has been making seitan for 8 years and is currently selling 250 lb/week in 8 oz. packages. 4. Creative Kitchens in Miami, Florida. Yaron Yemini has been making seitan for 3 years. and has seen a 5-fold increase during this time. He now makes 120 lb/week. His yield is 0.7. 5. The Bridge in Middletown, Massachusetts. The company was founded in March 1981 by Roberto Marrocchesi and Bill Spear. They were making seitan by Oct. 1982. Steve Lepenta now makes 400 lb of cooked seitan each week and claims that sales have doubled in the past two years. 6. Maritime Foods in Portland, Maine. Rosemary Whittaker makes 50 lb/week of seitan. 7. Real Foods of Towson, Maryland. Sharon Warren has been making seitan for 6 years and now makes 150 lb/week.

Reviewed by Linda Elliot in East West. June 1987, p. 94. Note: Talk with Lenny Jacobs. 1990. Sept. 10. There has been little growth in the U.S. seitan industry since the book was published in May 1987. Problems with price and quality. If seitan is frozen, after defrosting it can become spongy and soggy. Address: Massachusetts. Phone: 617-232-1000.

3147. Katagiri, Mitsuaki; Shimizu, S.; Kaihara, H.; Katagiri, C. 1987. [Determination of esterified and free carboxylic acids in the various kinds of natto by gas chromatography]. *Nippon Shokuhin Kogyo Gakkaishi (J. of Japanese Society of Food Science and Technology)* 34(5):305-08. May. (Chem. Abst. 107:174685). [9 ref. Jap; eng]

• **Summary:** Free and esterified fatty and organic acids in various samples of natto (9 types of itohiki-natto and 6 types of tera-natto [soy nuggets]) were determined by a modified standard method and compared with those of common miso. Ethyl esters of fatty acids present in large quantities in miso were not detected in itohiki-natto, but found in small quantities in tera-natto. Lactic acid was the dominant organic acid in hama-natto, (470.1 mg/100 gm) and in tera-natto (26.2 mg/100 g) and was not detected in either itohiki- or hoshi-natto. Average contents of the major volatile organic acids in itohiki-natto were (mg/100 gm): acetic acid, 124.7; propionic acid, 28.4; iso-butyric acid, 44.1; and iso-valeric acid, 46.7. The last 2 acids, which gave unfavorable odor at higher concentrations, were found in small amounts in hama-natto and tera-natto. Address: Dep. of Domestic Science, Iida Women's Junior College, Matsuo 610, Iida-shi, Nagano 395, Japan.

3152. Ebine, Hideo. 1987. Re: Can miso prevent or cure cancer? Letter to William Shurtleff at Soyfoods Center, June 29—in reply to inquiry. 2 p. Typed, with signature. [Eng]

• **Summary:** Summarizes the research conducted to date. In 1981, early research was conducted separately by Prof. Kimura and Dr. Hirayama. He believes that it is very

difficult to conclude that there is solid evidence showing that miso can either prevent or cure cancer. Address: Director, Central Miso Research Inst., Shinkawa 1-26-19, Chuo-ku, Tokyo, Japan.

3153. Ebine, Hideo. 1987. Studies on the effect of miso or miso soup to reduce cancer risk. Tokyo, Japan. 2 p. Unpublished typescript. June 29. [Eng]

• **Summary:** “Hirayama first presented a paper to the 40th Annual Meeting, Japan Cancer Association, 1981. Since miso soup is one of the most important foods for Japanese food life, the presentation attracted keen interest of the newspaper, *Asahi Shinbun* and was reported as the top news at the first page of September 27, 1981.”

Hirayama pointed out that the observed benefits could come from selected nutrients in the miso. Prof. Kimura and his colleagues found that miso contained some antimutagenic substances such as the ethylester of linolenic acid. Several other studies are now underway.

“As stated by Hirayama, the effect of miso soup is possibly supported by some other substances closely associated with the intake of miso soup such as green-yellow vegetables, Michioka (1985), Akita University, published a paper on the anti-mutagen included in green-yellow vegetables which are often supplied with miso soup in large amount easily.” Address: Director, Central Miso Research Inst., Shinkawa 1-26-19, Chuo-ku, Tokyo, Japan.

3154. Diamond, Harvey; Diamond, Marilyn. 1987. Living health. New York, NY: Warner Publications. xviii + 446 p. Index. 24 cm. [423* ref]

• **Summary:** This extensively documented, hardcover book, published by Warner after *Fit for Life*, became *Fit for Life II*. It is a book based on the philosophies of Natural Hygiene and a vegan diet, free of all animal products, and rich in fresh fruits and fruit juices. In the process, the author’s negative attitude toward tofu (expressed in *Living Health*) changed into a positive one. They found that tofu was a very alkaline food.

At Acknowledgments: “Special mention must also be made of the great health reformers, our mentors and predecessors, who under extreme pressure and persecution fought the battle for freedom of choice in health care: Isaac Jennings, Russell Trall, John H. Tilden, Sylvester Graham, Florence Nightingale, Herbert M. Shelton, and all those others far too numerous to mention.”

Concerning tofu, in the chapter titled “Questions frequently asked,” Harvey Diamond writes: “What about tofu? There is good news and bad news. You know why tofu has no smell and no flavor unless you add garlic, onions, tamari, etc.? Because it is processed at a heat so intense that nothing alive could possibly survive and the process is repeated *three times!* Tofu is absolutely devoid of any nutrients whatsoever. The contention that tofu is a good

source of protein is as truthful as the contention that the moon is made of green cheese. Now the good news. People generally eat tofu because they are trying to move away from flesh foods and tofu helps them do that. *Great!* Tofu is so much less harmful than flesh foods that I would wholeheartedly support you in doing so. But do so with the idea in mind that you will eventually give up tofu as well, or at least cut back on it. It is merely a filler food. Just as with meat, tofu should not be eaten more than once a day, and should be properly combined.”

The book also contains a recipe for Miso and vegetables soup (p. 376-77). In the index, there is no listing for soy- (including soymilk or soy sauce), tamari, or tempeh.

Chapters 2 and 3 tell about the authors (autobiographical): Harvey was born in 1945. He had severe stomachaches and frequent colds starting when he was a child. He was extremely thin. From age 18-22 he served in the U.S. Air Force and his last year of duty was spent in Vietnam. His weight ballooned up to 202 pounds but his piercing stomachaches did not go away. His father died of stomach cancer at age 57. At this turning point, Harvey decided to devote all his time to learning about how to become healthy. After long searching, he discovered Natural Hygiene in 1970 in Santa Barbara, California. In one day, after learning the one simple principle of proper food combining, his stomachaches went away (they have never returned) and he soon lost 50 pounds. “So I studied Natural Hygiene on my own, reading every book I could get my hands on pertaining to the subject and involving myself with people in Santa Barbara who had incorporated its principles into their life-styles. Three years later I established myself in Los Angeles, continuing my studies while I counseled people informally on Natural Hygiene... After eight years of independent study much to my excitement and delight, a complete course on Natural Hygiene principles finally became available in 1978” from the American College of Health Science. In Feb. 1983 Harvey received his PhD in nutritional science from this unaccredited college.

Marilyn was born in about 1944. Starting in the 1950s she began to suffer severely from a spastic digestive tract. At age 20 she underwent knee surgery in New York, a turning point in her search for health. By the time she was in her mid-twenties, she was married with two children, but the pain from her stomach spread to her back, so she began to take the painkiller Valium regularly. In 1971 she moved from New York to Los Angeles and began to change her lifestyle and diet. “I used whole grains, cut down on alcohol, and became very uncomfortable with my dependency on Valium.” So she stopped taking the drug. In 1975 she met Harvey in Venice, California, where he was working at a produce store. She was ill and desperate, having suffered for over two decades with her digestive tract pain. Two months later they were married, and later

they had a child. After going through a painful process of detoxification and withdrawal from Valium, Marilyn became the picture of health.

3155. *Economic World*. 1987. Miyako mainstay of miso market. June. p. 46.

• **Summary:** Miyako Oriental Foods was established in 1976 as a joint venture owned 65% by Mutual Trading Co. and 35% by Yamajirushi Jozo Co. Ltd. of Tokyo. Nearly 3/4 of its revenues (\$1 million in 1986) come from the Los Angeles area Oriental community. Miyako currently makes 50 tons/month of miso and has a 50% share of the U.S. market. The yen’s appreciation has helped business. In 1986 Miyako had sales of \$1 million; Vice president Teruo Shimizu anticipates a 20% growth in sales in 1987. His company would eventually like to have a plant on the East Coast of the United States. A photo shows three of Miyako’s products. Address: New York.

3156. **Product Name:** Fresh Miso Dressing (Creamy White).

Manufacturer’s Name: Good Foods Inc.

Manufacturer’s Address: P.O. Box 8542, Santa Cruz, CA 95061.

Date of Introduction: 1987. June.

Ingredients: Shiro [white] miso, safflower oil, pure water, rice vinegar, rice wine, tamari, barley malt, spices, vegetable gum.

Wt/Vol., Packaging, Price: 12 oz glass jar.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 1.5 by 3.5 inches. Self adhesive. Red and brown on greenish gold.

“The Conscious Kitchen. Delicious on fish, salads, burgers, raw or steamed vegetables.” Soyfoods Center product evaluation. 1987. June 13. Too salty! Miso is the first ingredient.

3157. Johnson, Kirk. 1987. Hidden fats in whole foods diets. *East West*. June. p. 62-68.

• **Summary:** A full-page table (p. 65) titled “How the substitutes stack up” shows total fat and serving size for the following categories: Dairy products. Substitute dairy products. Meat. Substitute meat products. Frozen dinners. Miscellaneous. The substitute dairy products include: Tofu Cream Chie (21st Century). Soya Kaas (soy cheese from American Natural Snacks). Tofutti (Tofu Time). Le Tofu (Brightsong Foods). Ice Bean (Farm Foods). Tofu, silken (Nasoya). Tofu, soft (Nasoya). Tofu, firm (Nasoya). Soybean margarine (Willow Run). Soymilk (Edensoy). Soymilk (Health Valley). Soymilk (Vitasoy).

Substitute meat products include: Fakin’ Bacon (Tempehworks). Tofu Wieners (Yves). Tofu Pups (Tempehworks). Vegie Burger (Bud, Inc.). Tofu Burger (Bud, Inc.). Gardenburger (Wholesome & Hearty). Tofu

Sausage (Vegetable Protein Co.). Tempeh, 3-grain (Tempehworks). Seitan (“wheat meat”).

Meatless frozen dinners include: Tofu Lasagna (Legume). Meatless Pepper Steak with Kofu & Noodles (Legume). Sweet and Sour Tofu (Legume).

Miscellaneous products include: Nasoyannaise (Nasoya Foods). Salad dressing, Creamy Tofu (Nasoya). Miso.

3158. Yamabe, Shigeo; Kondo, Yasuo. 1987. Shihan fukurozume mugimiso no hozon-chû ni okeru kagaku-teki seibun henka [Changes in the chemical composition of commercial packed barley-koji miso during storage]. *Nippon Shokuhin Kogyo Gakkaishi (J. of Japanese Society of Food Science and Technology)* 34(6):347-55. June. [24 ref. Jap; eng]

• **Summary:** Investigates changes in the composition, oxidative activity, sugar, and lipid components of commercial barley-koji miso during 3 months storage at -10, 4, 20, and 37°C. Address: Tokyo Dietitian Academy, 2-23-11 Ikejiri, Tokyo 154, Japan.

3159. Torii, Yasuko. 1987. New developments with tempeh in Japan (Interview). Conducted by William Shurtleff of Soyfoods Center, July 1. 2 p. transcript.

• **Summary:** Torigoe-Seifun stopped making tempeh in mid-1987. They had a hard time popularizing it. Marusan’s tempeh is not selling well. They, too, are thinking of stopping. Mr. Kanasugi and the Natto Assoc. are trying to cooperate with Marusan. They suggest selling “tempeh miso,” made by mixing tempeh with rice or barley koji, a sort of Finger Lickin’ Miso. Barley koji works best, and the resulting tamari is delicious. Only Mr. Kanasugi is doing tempeh research. He makes a spread like peanut butter. Mr. Ose is still making tempeh but his business, Udai, is not doing well. No one is left at the Ministry of Agriculture with an interest in tempeh: Mr. Katoh went to work with FAO in Rome and Ohta went to Showa Seiyu.

Why did tempeh fail to catch on in Japan? 1. It was poorly marketed. 2. The ads and Torigoe aimed at the older generation who still know how to deep fry foods. 3. It is not clear whether the attempted tie-in with natto was helpful or harmful. Natto is a convenient fast food. Now tempeh is not even sold at Natural House, the natural foods supermarket. Organic soybeans from Living Farms are now widely used in Japanese miso and natto. Address: Kamitsuchidana 324, Ayase-shi, Kanagawa-ken 252, Japan. Phone: 0467-76-0811.

3160. Hapgood, Fred. 1987. The prodigious soybean. *National Geographic* 172(1):66-91. July.

• **Summary:** Superb photos and an interesting original color painting done by artist James Gurney, in the style of Norman Rockwell, shows more than 60 products containing soybean ingredients (both food and industrial). But, except

for the first 2 pages, the text of this far-ranging article is mediocre to embarrassingly erroneous; even the *National Geographic* editors didn’t like it, but Hapgood refused to correct his many errors. For example, large bold print at the top of the first page reads: “For centuries Chinese have called the Soybean ‘Yellow Jewel’ or ‘Great Treasure.’ Now this prodigious bean is seen by some as a weapon against world hunger.” Note: This is the earliest English-language document seen (July 2007) that uses the term “Yellow Jewel” or “Great Treasure” to refer to the soybean.

Superb photos show: Selling tofu in China. Harvesting soybeans with combines. A tractor high over the hold of a cargo ship loaded with soybeans. Making koji at Kikkoman. 42 different colors and shapes of soybean seeds. Henry Ford on 2 Nov. 1940 wielding an ax against a car trunk lid made from a highly resilient soybean-derived plastic. Yuba drying over pans of soymilk. A Japanese woman with her dried-frozen tofu drying under the farmhouse eaves. Favorite Japanese soyfoods dishes: Dengaku, Simmering tofu, yuba, and miso dumplings. Hatcho miso in vats with stones piled high on each in an earthquake-proof pyramid shape. *Mame-maki* (bean-throwing ceremony) at Setsubun, held each February in Japan; the beans are thrown from small wooden measuring boxes (*masu*). The *hari-kuyo* ceremony for broken needles in Tokyo. A martial arts master and former Shaolin temple monk in China testing his strength by plunging his arm elbow-deep into a soybean-packed barrel. Address: Boston.

3161. **Product Name:** Organic Barley Miso.

Manufacturer’s Name: Junsei Yamazaki.

Manufacturer’s Address: Route 1, Box 1333, Orland, CA 95963. Phone: 916-865-5979.

Date of Introduction: 1987. July.

Ingredients: Organically grown soybeans, organic barley, well water, sea salt.

Wt/Vol., Packaging, Price: Bulk. 15 lb costs \$72.00 incl. shipping.

How Stored: Shelf stable.

New Product–Documentation: Yamazaki. 1987. The Junsei Yamazaki Miso and Umeboshi Story. 6 p.

3162. *Natural Foods Merchandiser*. 1987. 8th Annual Natural Foods Merchandiser merchandising awards [Gold: Eden Foods’ Edensoy, and Fantastic Foods’ Fantastic Noodles (Miso Vegetable)]. July. p. 28-29.

• **Summary:** The Edensoy package design was developed by Group 243 in Ann Arbor. “The look is inviting yet sophisticated, with both sizes of Tetra-pak boxes bearing loosely impressionistic illustrations of landscapes in tranquil colors. Design criteria included warm, energetic food that was natural, refreshing, and healthful.”

3163. Otsuka, Shigeru. 1987. *Shōyu sekai e no tabi* [A journey into the world of shoyu]. Tokyo: Toyo Keizai Shinpo-sha. 230 p. Illust. No index. 20 cm. [22 ref. Jap]
 • **Summary:** Contents: A pedigree of shoyu (p. 11). The road to shoyu (p. 35). Shoyu and the world (p. 67). A friend of meat cookery (p. 103). Shoyu... make in the USA (p. 115). Shoyu as a forerunner of Japanese culture (p. 129). A visit to the real centers of the Japanese food boom (p. 159). Shoyu recipe contest (p. 209). Mini-science on shoyu (p. 213). Conclusion (p. 219). Postscript (p. 225).

In the section on “Shoyu and the World,” subsection “Exports during the Edo Period” (p. 67-79) it is noted that: “In a book-keeping book under the date Man-en 1 (1860), Aug. 16 it is stated that 4 ceramic bottles of Japanese shoyu were shipped to Jakarta (Java), Indonesia. The shoyu that was exported to Europe was sent via Jakarta, Indonesia, to Holland. It was shipped in ceramic bottles each containing a volume of 3 gō (540 ml, or about 1 pint). On each bottle, in roman letters, was written the fact that the bottle contained Japanese shoyu. Terms such as “Japansch Zoya” or “JapanschZoya” or “Jap. Soya” appeared on the bottles.

One photo (p. 76) shows four (another shows three) of these bottles. Below this name, near the base of many bottles was written the brand “CPD” which is thought to have stood for “Comprador.” During the Kan-ei period (1624-1630) some rich merchants in Nagasaki established a company named *Konpura-sha*. The merchants who ran it were called Comprador. [Note: They are now (Oct. 2007) generally known in English as the “Comprador Merchant Guild;” Japanese: *Konpura Nakama*].

It is recorded in the *Kōka Nisshi*, the diary of a voyage by Tōsei? Yanakawa in 1860 (Ansei 7) from Japan to the USA by boat, that “after we landed in Washington state, we didn’t have any miso or shoyu, so we had nothing but salt with which to season our meals.”

In 1765 the French encyclopedist Denis Diderot (lived 1713-1784) wrote a section in his *Encyclopedie* titled “souï ou soi” about Japanese soy sauce. Note that the first term, pronounced soy, is today’s French word for soy sauce. The second term, pronounced “swa” apparently no longer exists.

Two black-and-white photos (p. 47) show the outside and inside of the Goyo-Gura in Noda. Page 93 shows a typical shoyu section in a Japanese supermarket. Address: Toyonaka-shi, Osaka-fu, Japan.

3164. Yamazaki, Junsei. 1987. The Junsei Yamazaki miso and umeboshi story (Brochure). Route 1, Box 1333, Orland, CA 95963. 6 p.

• **Summary:** Junsei arrived at Chico-San in May 1963. His wife, Kazuko, came in 1968. Later that year he went to New York to help Michio Kushi with his restaurant. He returned to Chico-San the following spring (1963?) where he started to make traditional miso and soy sauce. He had learned how while growing up on his family’s farm in Chiba prefecture.

He had attended Tokyo Agricultural University and majored in organic chemistry. Also at Chico-San he made rice syrup, called Yinnies. Now he and Kazuko live on their 5-acre farm in Orland, California. He makes organic miso (brown rice, rice, and barley) and she umeboshi salt plums with shiso. Both farm. Address: Orland, California. Phone: 916-865-5979.

3165. Ayres, Rosalie; Steinkraus, K.H.; Olek, A.; Farr, D. 1987. Characterization of the semi-purified membrane bound ATPases of *Zygosaccharomyces rouxii* adapted to 18% NaCl. *International J. of Food Microbiology* 4(4):331-39. Aug. [17 ref]

• **Summary:** “*Zygosaccharomyces rouxii* is a yeast with spoilage capabilities in high sugar foods such as maple syrups, liquid sugars and chocolate syrups. Its ability, however, to ferment under high salt (18% NaCl) conditions makes it an essential organism in soy sauce and miso fermentations.” Address: 1-3. Inst. of Food Science, Cornell Univ., Geneva, New York 14456; 4. Nestle Products Technical Assistance Co. Ltd., Nestle Ave. 55, CH-1800 Vevey, Switzerland.

3166. Bowles, Willa Vae. 1987. The soy revolution! *Total Health*. Aug. p. 24-29. See followup in Oct. issue, p. 55. [1 ref]

• **Summary:** Soybean exports during the last fiscal year amounted to \$11,000 million. They help keep the U.S. trade deficit, almost \$170,000 million in 1986, from rising even higher. Tofu mixed 50/50 with any nut butter makes a fluffy spread for added protein and reduced fat and calories.

3167. Honma, Nobuo. 1987. Miso no kōki to kōki seibun ni tsuite. II. [Odor and odor components of miso. II.]. *Nippon Jozo Kyokai Zasshi* (*J. of the Brewing Society of Japan*) 82(8):547-53. Aug. [56 ref. Jap]

• **Summary:** Components include carbonyl compounds and esters. Address: Kenritsu Niigata Joshi Tanki Daigaku.

3168. McSweeney, Daniel. 1987. Consumer survey 1987. *Whole Foods*. Aug. p. 25-29.

• **Summary:** Percentage of 600 natural foods consumers surveyed who purchased a certain type of soyfood product during the years 1985, 1986, 1987. NA = Not Available. Tofu: NA, 85.1%, 83.4%. Miso: 50.0%, 71.1%, 69.7%. Soymilk: NA, 40.4%, 54.4%. Nondairy Frozen Desserts: 37.6%, 44.6%, 46.0%.

3169. Pollard, Jean Ann. 1987. The new Maine cooking. Lance Tapley, Publisher, P.O. Box 2439, Augusta, ME 04330. 288 p. See p. 22-24, 94, 202-15, 221. Illust. Index. 28 cm.

• **Summary:** Mostly recipes, arranged by season, including tofu (13), tempeh (6), miso (1), plus how to make tofu at

home. Address: Winslow, Maine.

3170. Swinbanks, D.; Johnston, K. 1987. Chernobyl takes macaroni off Japan's menu. *Nature (London)* 329(6137):278. Sept. 24-30. *

• **Summary:** Miso exports to European countries increased after the April 1986 accident at the Chernobyl nuclear power plant in Northern Ukraine, because it was believed that miso consumption could ameliorate the harmful effects of exposure to atomic radiation.

3171. Perez, Oswaldo. 1987. El miso o pasta anejada de soya [Miso or aged soybean paste: The soybean in human foods]. *La Era Agrícola (Merida, Venezuela)* No. 2 & 3. Sept. p. 17. [Spa]

• **Summary:** Miso is one of Japan's three main soyfoods. Discusses its use and nutritional value. Address: Granja Tierra Nueva, Aldea San Luis, La Azulita, C.P. 5102, Estado Merida, Venezuela.

3172. Snyder, Harry E.; Kwon, T.W. 1987. Soybean utilization. New York, NY: Van Nostrand Reinhold Co. xii + 346 p. Illust. Index. 23 cm. An AVI Book. [381 ref]

• **Summary:** Contents. Preface. 1. Production, marketing, and sources of information: Introduction, agricultural production, marketing, sources of information. 2. Morphology and composition: Morphology, chemical composition. 3. Processing of soybeans: Preparation, flaking, expellers, solvent extraction, oil refining, protein products. 4. Quality criteria for soy products: Protein and oil products. 5. Functional properties of soy proteins: Interactions of soy proteins with water, interactions of soy proteins with lipid, foaming, commentary on functionality. 6. Nutritional attributes of soybeans and soybean products: Inherent attributes of soybeans, changes due to processing.

7. Oriental soy food products: Traditional nonfermented soybean food products, traditional fermented soybean food products. 8. Soybean-supplemented cereal grain mixtures: Protein-rich food mixtures containing soy flours, composite flours containing soy flour, cereal blends containing soybeans. 9. Soy protein food products: Baked goods, meat products, dairy products, other foods containing soy protein. 10. Soybean oil food products: Salad and cooking oils, mayonnaise, and prepared salad dressings, shortenings, margarines and related products, soybean lecithin products. 11. Grades, standards, and specifications for soybeans and their primary products: Grades of soybeans, specifications for soybean meals and flours, trading specifications for soybean oils, specifications for lecithins, standards for the use of soy protein products in other foods. References in each chapter. Glossary.

This book is well written (though largely a repetition of previous works) in the area of modern soy protein products. It is weak and poorly researched in the area of "Oriental

Soy Food Products," which comprises only 1 chapter (22 pages) of the total, making the book unbalanced. The author of this chapter seems to be almost completely unaware of the many major developments in the Western world during the past 10 years.

Note the following Korean soyfood terms: Fresh soybean = Put Kong. Toasted soy powder = Kong Ka Ru. Soy sprouts = Kong Na Moal. Soymilk = Kong Kook or Doo Yoo. Yuba (Soymilk film) = no name. Tofu (Soy curd) = Doo Bu. Tempeh (Fermented Whole Soybeans) = no name. Natto = no name. Soy sauce = Kan Jang. Miso (Soy Paste) = Doen Jang. Fermented tofu (Fermented Soy Curd) = no name. Fermented okara (fermented soy pulp) = no name.

Note: This is the earliest English-language document seen (Dec. 2005) that uses the term "Toasted soy powder" to refer to roasted soy flour. Address: 1. Prof., Food Science Dep., Univ. of Arkansas, Fayetteville, AR; 2. Principal Research Scientist, Div. of Biological Science & Engineering, Korea Advanced Inst. of Science and Technology, Seoul, South Korea.

3173. **Product Name:** Veggie Loaf [Sprouted Wheat, or Wheat-Free Sprouted Rye].

Manufacturer's Name: Sprout Delights.

Manufacturer's Address: 13090 N.W. 7th Ave., North Miami, FL 33168. Phone: 305-687-5880.

Date of Introduction: 1987. September.

Ingredients: Incl. sprouted wheat or rye, carrots, onions, mellow white miso, arame, dulse, nori.

New Product-Documentation: Talk with Steve Bern of Sprout Delights. 1992. July 11. He has run this bakery, which specializes in breads made of sprouts, like the early Essene sprouted grain breads made by Lifestream in British Columbia, Canada, but also makes a host of other innovative natural-food products. These products were introduced in about Sept. 1987.

3174. Pirello, Robert J. 1987. Process for preparing a tofu cheese and product. *U.S. Patent* 4,701,332. Oct. 20. 4 p. Application filed 15 Nov. 1985. [8 ref]

• **Summary:** A tofu brick is coated with a mellow white miso and aged to produce a smooth and compact texture after which the miso is scraped from the brick and the brick is soaked in fresh water to remove the salt. The brick is then whipped until a creamy texture is achieved. Address: 932 Pine St., Philadelphia, Pennsylvania 19107.

3175. Rose, Richard. 1987. Re: Personal observations on soyfoods at Natural Foods Expo in Philadelphia. Letter to William Shurtleff at Soyfoods Center, Oct. 28. 1 p.

• **Summary:** Show trends: Many new companies introducing many new soyfoods, some very high quality in concept and execution. Established soy companies now

entering such as Miller Farms and Witte/White Wonder. The Soyfoods Pavilion seemed to have less both space and be more spread out. The only Legume product at the show was the tofu chocolate bar (will the Barat Bar save Legume?). Tomsun Foods did not have a booth. Ice Bean was the only soy frozen dessert there. A proliferation of soy cheeses, aseptic soymilks, glass-packed spreads, meat analogs. Nasoya will be making Simply Natural's tofu/miso spread for them; it has just been patented. Simply Natural's tofu cheese is now called Soyelite, and their pasta is Pasta Lite. Little-seen regional companies were there, including Michele's and Northern Soy. Paul Obis adds: Many at the show were lamenting the apparent failure of Jofu. They have spent all their money.

The Rose International letterhead states: EasyLink Mailbox 62978515. Telex 990027 (Rose Intl UQ). Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

3176. American Miso Co. 1987. A living art: The American Miso story (Ad). *East West*. Oct. p. 8.

• **Summary:** This one-third page vertical black-and-white ad begins: "These days, even in Japan, 99% of the miso is commercially made. Mass production and high technology characterize today's miso. The timeless art of handmade miso is dying.

"However, near the Smoky Mountains in the green, rolling country of western North Carolina, the American Miso Company continues a centuries old tradition of hand-crafted miso." The Miso Master logo shows a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso. Address: Rutherfordton, North Carolina 28139. Phone: 704/287-2940.

3177. Bradner, Norman. 1987. Soybeans for the food market. *Seed World (Des Plaines, Illinois)*. Oct. p. 44.

• **Summary:** Thailand imports nearly 100,000 tonnes/year of soybeans for food use. Japan imports 65,000 to 70,000 tonnes of small beans to make natto. Natto beans can be less than 5 mm in diameter and have a yellow cotyledon and hilum. For tofu, soymilk and miso, importers want high protein, low oil, maximum water soluble proteins, low phytate, high 11S protein fraction, large seed size and high sugar content. But a variety judged good one year can be deemed unsuitable the next. Environmental conditions during seed development play a significant role in determining the final chemical composition. Address: Pulse Breeder, King Agro, Inc., Chatham, Ontario, Canada.

3178. *East West Journal*. comp. 1987. Shopper's guide to natural foods. Garden City Park, New York: Avery Publishing Group. x + 204 p. Illust. Index. 28 cm. [66* ref]

• **Summary:** The book from the editors of the *East West Journal* is mainly a series of articles published in *East West*

Journal or special articles by individual authors. Contents: 1. Introduction to natural foods. 2. Grains. 3. Breads, pastas & seitan. 4. Vegetables. 5. Sea vegetables. 6. Labeling and standards. 7. Fruits. 8. Seeds & nuts. 9. Beans (incl, tofu, tempeh, miso, azuki). 10. Beverages. 11. Condiments (incl. tamari, shoyu, vinegar, salt, umeboshi). 12. Cooking ingredients. 13. Pressure cookers. Address: New York; Massachusetts.

3179. *East West*. 1987. Natural Foods: The best and worst. 2nd annual awards. Oct. p. 32-36.

• **Summary:** Only packaged natural foods with nationwide distribution are judged. Best soymilk: Edensoy, but the Tetra Brik package doesn't biodegrade, burn, or recycle. Best sandwich spread: Nasoyanise by Nasoya Foods. Worst shoyu: Natural shoyu from Erewhon. So heavy it is best dispensed with an eye dropper. Best Tamari: San-J. Worst line of fake meat products: Worthington Foods. Worst beans: Honey Baked Style Vegetarian Beans with Miso from Health Valley. Best Miso: Miso Master Mellow White Miso by American Miso Co. for Great Eastern Sun.

3180. Golbitz, Peter. 1987. Soya interview: Gordon Bennett, Westbrae Natural Foods: Soyfoods past, present and future. *Soya Newsletter (Bar Harbor, Maine)*. Sept/Oct. p. 3, 10-11.

• **Summary:** Founded in 1970, Westbrae was built on the premise that healthy food makes a healthy planet. Bennett has been president since 1975. The company now has over 200 products. Soyfoods account for about 35% of sales, down from 50% 1-2 years ago. The company is reducing imports, focusing on American-made foods, and importing Westsoy soymilk from Southeast Asia [actually Vitasoy in Hong Kong] rather than Japan, including a new liter size. Address: Bar Harbor, Maine.

3181. **Product Name:** Tempehworks Macro Power Tempeh.

Manufacturer's Name: Lightlife Foods, Inc.

Manufacturer's Address: P.O. Box 870, Greenfield, MA 01302.

Date of Introduction: 1987. October.

Ingredients: Organically grown soybeans, carrots, sea vegetables, scallion, aduki beans, sesame, miso.

Wt/Vol., Packaging, Price: 8 oz vacuum pack. Retail for \$1.79.

How Stored: Refrigerated, 45 day shelf life. Or frozen.

New Product-Documentation: Leaflet. 1987. Lightlife Foods. "New Products Coming From Lightlife this Fall." *Soya Newsletter*. 1987. Sept/Oct. p. 6.

3182. Murrieta Foundation. 1987. Murrieta Hot Springs vegetarian cookbook. Revised and expanded including Spa

Cuisine. Summertown, Tennessee: The Book Publishing Co. 232 p. Color plates. Index. 23 cm.

• **Summary:** This is a vegetarian (but not a vegan) cookbook. The index contains listings for 26 tofu recipes, 5 miso recipes, and 2 tamari recipes. There are definitions of “liquid aminos” (HVP), miso, tamari, tempeh, and tofu. Many of the recipes are favorites from the Oasis Restaurant at the Hot Springs, where the three basic lacto-ovo vegetarian diets (as taught by Dr. Randolph Stone, 1890-1982, founder of Polarity Therapy) are The Purifying Diet, The Health Building Diet, and the Gourmet Vegetarian Diet. Address: Murrieta Hot Springs, California.

3183. Ontario Ministry of Agriculture and Food. 1987. Soybean buyers mission from Japan, Hong Kong, Malaysia, Singapore, October 10-20, 1987. Toronto, Ontario, Canada: Ontario Ministry of Agriculture and Food. 23 p. 30 cm. Saddle stitched. [Eng]

• **Summary:** Contents: Mission members (with a photo of each). Itinerary. Japanese market for edible soybeans. General uses of edible soybeans in Hong Kong, Malaysia and Singapore. List of major importers in Asia (by country). Ontario soybean suppliers. Role of the Ontario Soya-Bean Growers Marketing Board (Chatham, Ontario).

This conference, which took place in Toronto, Chatham, and Harrow, Ontario, Canada, was sponsored by OMAF in Toronto. On the mission were 6 buyers from Japan (Takeya Miso Co., Asahi Industries [tofu maker], Takano Foods Co. [natto maker], Dah Cong Hong, Wako Shokuryo Co., and Gomei Shoji Co. [the last 3 is each an importer and wholesaler]), 2 from Hong Kong (Amoy Industries Ltd., and Chung Hing Co.), 3 from Malaysia (Sin Yong Huat Enterprises Sdn. Ltd, Yeo Hiap Seng (Malaysia) Ltd., and Chop Lee Kit Heng), and 2 buyers from Singapore (Eng Huat (S) Ltd. and Chop Hin Leong). Mike Hojo of OMAF/Tokyo was the mission leader.

The Japanese soybean market is about 5 million tons a year. Of this: Oil crushing 4,036,000 tons. Food 849,000 tons (17% of total), and feed (not crushed) 70,000 tons. From 1982 to 1986 domestic Japanese soybean production has decreased from 168,000 tons to 147,000 tons, while imports have increased from 4,344,000 tons to 4,857,000 tons. Demand for food soybeans has increased from 803,000 tons to 849,000 tons. Tofu, miso, and natto account for more than 94% of the total utilization of edible soybeans, roughly as follows: Tofu 500,000 tons, miso 200,000 tons, natto 100,000 tons.

In 1986 some 89.9% of Japan’s soybean imports came from the USA, followed by China (6.7%), and Brazil (2.65%). That year the least expensive soybeans came from Brazil (US\$219.86/ton), followed by USA (\$221.36), China (\$236.06), and Canada (\$277.50). Note that Canadian soybeans are 25.3% more expensive than those from the USA. Chinese and Canadian soybeans are most widely used

to make foods. Large Chinese soybeans are used to make tofu, medium sized for miso, and small for natto. Of the soybeans imported from the USA, 80-85% are imported from oil crushing because of their high oil content. The remaining 10-15%, or approximately 700,000 tons are food soybeans from Iowa, Ohio, or Michigan. Called “IOM” soybeans, they are used mainly to make tofu. Brazilian soybeans have a high oil content and are used for oil crushing only. The ocean freight cost for a 20-foot container shipped to Tokyo is as follows: USA west coast \$1,000. Toronto, Canada \$1,800. USA East Coast \$2,000. Brazil \$2,100. Argentina \$2,500. But a large percentage of regular soybeans are loaded directly into ships, and travel at lower freight rates. Exports of food soybeans from Canada to Japan rose from 10,000 tons in 1979 to 26,000 tons in 1986, while those from China rose from 267,000 tons in 1979 to 323,000 tons in 1986.

Very detailed preferred characteristics are given for soybeans to make miso (6 characteristics), natto (5), and tofu (5). Canadian soybeans are recognized as superior to Chinese and American soybeans for food use. This is one reason they command a relatively higher price.

Hong Kong imports 28,100 tons/year of soybeans, and 63% of these come from Canada, followed by China (35%), and the USA (1.8%). Malaysia and Singapore import 124,800 tons/year, and 53% of these come from the USA, followed by Canada (31.7%), and China (8.2%). Most of the food soybeans in Malaysia and Singapore are used to make soymilk and tofu.

Soymilk: Vitasoy dominates the market in Hong Kong, whereas in Malaysia and Singapore the leading manufacturers are Yeo Hiap Seng, Cold Storage, Lam Soon, and Nestle. Soymilk consumption is increasing in these 3 countries, and in neighboring countries. Soymilk makers believe there are four requirements for their products’ success: It must taste good, must be priced competitively with soft drinks, must be perceived as a health food, and must be marketed properly.

Bean curd sheets and sticks [yuba] are very common snacks and dishes in Hong Kong, Malaysia, and Singapore. Manufacturers consider only Chinese and Canadian soybeans for these products. Canadian soybeans produce whiter soymilk and this whiter yuba. However the larger size of Chinese soybeans results in a larger yield. Manufacturers normally blend 60% of Canadian soybeans with 40% of Chinese soybeans to obtain a higher output of whiter sheets.

Major Japanese soybean importers include: Da Chong Hong (Japan) Ltd., Gomei Shoji Co. Ltd., C. Itoh & Co. Ltd., Mitsubishi Corp., Kanematsu-Gosho Ltd., Nichimen Corp., Marubeni Corp., Mitsui & Co. Ltd., Nissho Iwai Corp., Okura & Co. Ltd., Toyo Menka Kaisha Ltd., Wako Shokuryo Co. Ltd. Address: Ontario, Canada.

3184. Shurtleff, William. 1987. *History of White Wave, Inc.* Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** A detailed history of this pioneering, very creative, and rapidly growing company. Contains production and sales statistics at each major phase of growth. Early days: White Wave was founded and started making tofu in September 1977 by Steve Demos in Boulder, Colorado.

Born on 24 April 1949 in Philadelphia, Pennsylvania, Demos attended Bowling Green State University in Bowling Green, Ohio, majoring in political science and philosophy and graduating in the fall of 1970. He was introduced to tofu in the summer of 1970, when he was traveling in a van in northern California with a friend, who bought some at an Oriental food store. Demos found it to be a good source of protein, and liked the flavor.

Right after graduation Demos took two trips to India. During the first in 1971, with Pat Calhoun, he became a vegetarian after witnessing the meat bazaar in Afghanistan. In early 1972 he took a longer trip to India, again with Pat Calhoun. It included 10-day Buddhist meditation course with a teacher from Burma, Goenka, who became his spiritual teacher. He also lived for 1-3 months in a cave near Rishikesh (in the foothills of the Himalayas in northern India), doing Hatha Yoga and meditation. There were monkeys in the forest trees, tame peacocks, a stream 10 yards in front of the cave that dropped into a bathing pool, and many sadhus (Indian holy men) practicing in other caves nearby. Then in 1974 he started a health food store [named Touch the Earth] in La Haska, Pennsylvania, where he grew acquainted with many new foods such as miso, sea vegetables, and *gomashio* (sesame salt). After 9 months he sold the store and returned to India again. He was now actively involved in meditation.

After that trip, Demos started living on the East Coast in New Hampshire. By 1974 he began buying tofu in Boston, Massachusetts, then made it a few times in the kitchen and used it in cooking for a yoga studies group, which had purchased a farm. He was in charge of food and he had learned how to make tofu from the *Ten Talents* cookbook. In March 1976, after a trip to India, he was in Santa Barbara, California, at a 76-day meditation retreat with teacher Robert Hover. He made tofu, starting at 4:00 each morning in a commercial kitchen, for 100-150 people, using *The Book of Tofu*. During this retreat Demos conceived of and developed the idea of starting a tofu company, including the name and logo. Three months later he found himself, a hippy with long hair, in Boulder, Colorado. He had an idea but no capital, and was living on food stamps. By good fortune he met a man named Anton Rogers (a talented architect and builder), who loaned him \$2,000 startup capital, after having known him less than a month. So in the

summer of 1977 Steve began buying equipment for making tofu. His new company was not yet officially established or registered—though he probably opened a checking account at a local bank.

Demos started making tofu at White Wave on 27 September 1977. “At 11:30 a.m. I sold my first block. I’m staring at the astrological chart which sits next to my desk. That was when I translated the effort to a dollar.” The company began as a sole proprietorship, located in very small (300 square foot) rented quarters at 1738 Pearl Street in Boulder, Colorado. The front one-third of the shop was used for a retail deli and the back two-thirds for food production. From day one, the tofu was made from organically-grown soybeans. Each 14-ounce block of tofu was sold, floating in water, in Chinese food take-out cartons. For details on White Wave’s early use of organically grown soybeans, see SoyaScan interview with Steve Demos (Aug. 1998). The first batch of tofu was used to feed the participants in a ten-day meditation retreat in Boulder.

One direct competitor was the Spinning Kitchen, which had started 9 months earlier, in about January 1977. They had the Boulder market locked up when White Wave started.

White Wave had three products from the opening day: Nigari Tofu, Black Walnut Mushroom tofu, and Lemon Herb tofu. The latter two innovative flavored tofus were made by mixing the natural flavorings into curds at a specific point before pressing. Shortly White Wave expanded into making sandwiches, which led to salads, drinks, pies, cakes, and muffins. One of the first stores in Boulder to sell Steve’s tofu was Green Mountain Grainery, owned and run by Bruce Macdonald. Pat Calhoun (formerly Demo’s wife), arrived in December from the Pacific Coast Bakery in California, bringing all their recipes. Recipes for baked goods (such as cinnamon rolls and cookies) were adapted.

By early 1978 soymilk (plain, honey-sweetened, or carob-maple) was introduced, sold out of a jet spray juice cooler or in quarts, and also used to make Coconut Cream Pie and Tofu-Agar Pies filled with various fruits (apples or whole strawberries, peaches, or blueberries). At about the same time the okara from the tofu started to be used to make one of America’s earliest brands of Soysage. This spicy Vegetarian Soysage (shaped like a sausage) was distributed with the tofu. Before long White Wave was making a host of delicious and innovative tofu deli products which were sold only at the Pearl Street deli. These included Macro Pizza with Tofu, Mexican Entrees, Okara Granola, and Tofu Dogs and Sauerkraut (very firm tofu cut into long rectangles and marinated broth). Soy Sannies (Miso-tahini Sandwiches) were also sold at nearby health food stores.

To help attract customers, the deli also sold an assortment of then largely unknown food products: 10-15

varieties of Japanese and American miso, many sea vegetables, shoyu, kudzu, umeboshi plums, and the like, many of the same products Demos had sold 4 years earlier at his health food store in Pennsylvania. Most of these were of great interest to macrobiotic devotees, though Steve had little personal interest in that subject.

Tofu was quickly recognized as a tremendously versatile, all-American ingredient. Now new people started coming into the company. Some were cooks and they helped to develop new products. In 1978 White Wave began to distribute a number of its most popular deli-type products to other retailers. These were among America's earliest commercial second generation tofu products: Missing Egg Salad (America's first, named by Trudy Stuart), Tofuna Salad (Vegetarian Tuna Salad), and Tofu Turnovers (with spinach and feta cheese filling). Other innovative second generation products sold or used only at the Pearl Street deli included Tofu Treats or Creamies (in banana-coconut, peanut-carob, or carob mint flavors), Miso Salad Dressings (heartly or mellow), and Tofu Mayo (eggless mayonnaise used in the Missing Egg Salad). Address: Lafayette, California.

3185. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part II). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct. • **Summary:** Continued: At the same time White Wave started making nut and seed products in the same little shop, starting with gomashio (sesame salt), tamari-coated sunflower seeds and almonds, and nut butters.

Just a year after opening, White Wave was forced to expand out of the tiny Pearl Street shop by the demand for its deli products from outside retailers, such as Arati and other natural food stores in Boulder. Demos recalls:

"We acted with very little foresight. It was more like 'What do you want to do today? Let's make something new.' Finally we couldn't get out the front door. We had to step over the top of buckets of tofu, presses, and boxes used to deliver our little Chinese fish cartons of tofu, stacked up so high we couldn't see out the window. It was chaotic. We were making money and business was booming, but we were only paying ourselves \$1.42 an hour."

On 28-30 July 1978 a meeting of tofu manufacturers from across the USA was held in Ann Arbor, Michigan. The meeting was organized by Steve Fiering, Jerry MacKinnon (plus coworkers at The Soy Plant) and Bill Shurtleff, and hosted by The Soy Plant. Steve attended this historic meeting, and ended up rooming with Tom Timmins, head of the New England Soy Dairy. "I thought I was rooming with one of the idols of the industry. Just by virtue of association, I was going to do well." At this meeting the Soycrafters Association of North America (SANA) was established, with Larry Needleman as executive director of the new

trade association. Steve was elected to be one of six members of SANA's steering committee. Various photos of the meeting show Steve, with long hair and mustache, leading and participating in the discussions. A yellow lined sheet titled "Tofu Sales" was circulated to all attendees; Steve wrote that White Wave was making medium-firm bulk and packaged tofu, which wholesaled for \$0.65 and \$0.74 per pound, f.o.b. plant. Several days after the Ann Arbor meeting, William Shurtleff and Wataru Takai visited Demos, and saw how he made tofu at his tiny shop on Pearl St. in Boulder. They sampled and enjoyed the various creative offerings in the deli, and Shurtleff took home a label from each product.

At Walnut Street: In September 1978, after just a year at Pearl Street, the tofu company had long since outgrown its minuscule 'back room' space. So manufacturing operations were moved to a 3,000 square feet converted warehouse at 3869 Walnut Street. It felt like they had moved into a castle, with ten times as much space. Now there was great pressure to expand the business to use up the extra space. The company began to make new products (such as tempeh, ice cream, and new deli foods) and look for new markets.

The deli remained at Pearl Street, and was given a new name, The Cow of China (a term from *The Book of Tofu*). The name "White Wave" was reserved for the tofu manufacturing company. But there was only one set of books, under White Wave. The company now changed to a partnership, with seven equal partners, all active. Demos was president and Pat Calhoun did the bookkeeping, and only these two were interested in meditation.

Right after the move, to announce The Cow of China as a retail outlet and its vegetarian deli products, Demos did his first real advertising, using three charming posters. The first read: "White Wave Through the Cow of China Offers Food from The Kingdom of Plants. We make it all here in Boulder. 100% Dairyless." It then listed 14 soyfoods plus some non-soy desserts, almond-, cashew-, and peanut butters, and tahini. A second poster showed a soybean, with head, tail, and legs like a cow and dotted lines to delineate the choice butcher cuts. But instead of rump roasts and flank steaks were Soysage, Miso Dressings and the like. A third showed Jack, standing under a giant beanstalk, about to trade in his cow for the magical beans at which he is gazing in wonder. The caption: "We've got an alternative. White Wave Soy Dairy." The latter two posters were used as catalog advertisements with a growing number of natural food distributors.

The tofu plant now consisted of an open kettle, VCM grinder, and hand press for the curds on the end of a swinging levered bar. White Wave started to deliver product to some Denver health food stores and in late 1978, not long after the move to Walnut Street, they landed their first supermarket chain, King Soopers supermarket chains, which began to order 100 cases. As business expanded, so

did the need to improve packaging and marketing, and to control costs.

New packaging: White Wave couldn't get its tofu into supermarkets unless it was sold in water-packed film-sealed plastic tubs (trays); the Chinese carry-out food/fish cartons were not acceptable. So Demos bought a little hand-packing machine that allowed one person to pack one block of tofu at a time in water in a plastic tray, then seal the tray with a film lid. Steve remembers first using this machine at the Walnut St. plant. Initially, he would seal the tofu tray with clear, unprinted film, then run one of their oval labels (the one with a hint of green color in it, used previously on the Chinese cartons) through a gluing machine (which was less expensive than buying pre-glued labels), and slap the label on the clear plastic film. This was White Wave's "first true commercial mass market package." The new marketable package led to many new accounts. After King Soopers the company got into the City Markets chain, then about a year later into Safeway, followed by a host of other chains in outlying areas. As business expanded, White Wave could afford pre-printed film labels for its tofu in plastic trays. The label design, though rectangular, was basically the same as the old oval. The ingredients new read: "High protein soybean cake contains: Soybeans grown without the use of herbicides or pesticides, filtered water, and nigari (salt bitterns). No more no less!" Soon a variety of textures were available: Extra firm press, firm organic, extra firm, and sift.

New sources of soybeans: White Wave had made its tofu from organic soybeans from day one. When the company first moved into Walnut Street, they were still buying these soybeans from Green Mountain Grainery in Boulder. But in the fall of 1978 Steve drove to a meeting of the Organic Growers Association in Iowa. He spoke about the demand for organic soybeans and met Marvin Kurpkeweight, who was already growing soybeans organically in eastern Nebraska. Steve visited Marvin's farm and contracted with him to buy organic soybeans direct from the farmer. Address: Lafayette, California.

3186. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part III). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** Continued: White Wave's tofu production was growing nicely. It rose from 120,000 lb. in 1978 (2,308 lb/week), to 179,000 lb. in 1979 (3,442 lb/week, up 49%), to 279,000 lb. in 1980 (5,365 lb/week, up 56% over 1979).

In February 1979 a major new product line was started: tempeh. Chip McIntosh was the first tempeh maker, followed by Chris O'Riley. An old kitchen refrigerator, warmed by light bulbs, was used as the incubator. The first two products were Soy Tempeh and Soya Rice Tempeh, the latter being America's first multi-ingredient, soy-and-grain tempeh.

At about the same time, a third new product was launched: Polar Bean. It was a soymilk based non-dairy frozen dessert, made in a soft serve machine but sold in hard-pack pints. The first flavor was Banana-carob. Later strawberry, chocolate, carob mint, and orange flavors were added. In about 1984 a soft serve version called Polar Softie was introduced but did not prove successful.

Also in 1979 Richard Leviton visited White wave and the Cow of China, and did an in-depth study of their operations and products, published in the 1979 issue of *Soycraft* magazine. Soyfoods sold both at "The Cow" and for wholesale distribution to other retailers included: Organic Nigari Tofu, Soymilk (Honey-Vanilla or Carob-Maple), Soysage, Tempeh, Missing Egg Salad, Tofu Mayo, Baked Savory Tofu Cutlets, Sweet Bean Tofu Pie, Miso Salad Dressings (Mellow or Hearty), and Tofu Treats or Creamies (Banana-Coconut, Peanut Carob, or Carob-Mint; squares of creamy baked tofu blend on a healthful oats-coconut-flour crust).

Other ready-to-eat items sold only at "The Cow" included Soysage Pate, "Macro" Pizza (with tofu), Tofu Spinach Dill Turnovers, Tofu Cinnamon Rolls, Hot Tofu Meatballs and Meatball Sandwiches, Sloppy Joe Sandwich (made with TVP), Tofu Cream Cheese & Black Olive Sandwich, Tofuna Sandwich (like tunafish), Strawberry Tofu Pie, Soy Sesame Bars, and Tofu Butternut Squash Pie. In mid-1979 bulk recipes for about ten of these products were published, with permission, in *Tofu & Soymilk Production* by Shurtleff and Aoyagi.

Leviton noted: "The Cow of China is surely one of the nation's most ambitious and energetic soyfoods companies." It was just about breaking even with weekly gross retail sales of \$1,000, three-fourths of which came from soyfoods. Concerning the growth of the still totally unmechanized little company Demos, now the self-styled "beneficent dictator," always frank and candid, added:

"It was a hell of a struggle, especially for an undercapitalized small business. But I certainly wouldn't discourage anybody because we started with nothing, and we've been going since then, and we've been able to make it all meet. We've just rigged, we've improvised, we've done everything imaginable, as I'm sure many other people in this industry have. We cut our salaries back, we did without a lot, but its own momentum kicked in. I suppose we consider ourselves alchemists in turning sweat into money. So, let me express my gratitude to everybody and everything, seen and unseen, who have helped us pull this together."

In August 1979 Gary and Chandri Barat arrived in Boulder and spent several days studying the Cow of China. They had met Demos at the Second Annual Soyfoods Conference in Amherst, Massachusetts (July 26-29, 1979). They were driving around the country, studying tofu and developing a business plan in preparation for starting a

soyfoods company, which later became Nature's Inn, then Legume. As they studied The Cow of China and Demos invited them for dinner several times. He and his wife, Ginny, served a tofu spinach feta pie and mushroom caps stuffed with tofu. Later Barat told Demos more than once how much this visit has influenced him in starting a company based on tofu entrees. The lineage of Legume's early products (Tofu Cream Pies, Tofu Spinach Pies) can be traced back to The Cow of China.

Barat encouraged White Wave to do a feasibility study on converting The Cow of China into a fast food restaurant named The Family Diner and moving into a vacated A & W root beer stand three blocks from The Cow in a very attractive location. The study was done, a potential menu was developed, but financial backing did not come through.

A White Wave catalog published in December 1979 included several new products: Doufu (extra firm Chinese style tofu), Savory Baked Tofu, and Tamarind Nuts and Seeds (Almonds, Cashews, Spanish Peanuts, Sunflower Seeds, Nut Mix).

The Cow of China deli was doing well. By February 1980 sales were \$1,700 to \$2,000 a week and there were often lines out the door. By the summer of 1980, according to *Soyfoods* magazine, the Cow of China had been renamed the Good Belly Deli, with the slogan "Real Food, Real Fast" and White Wave was producing 7,500 pounds of tofu and tofu products a week. The new deli, an expanded and Americanized version of "The Cow," continued to serve as an excellent showcase for the White Wave's innovative ready-to-eat soyfood products. Working with a friend who was an advertising agent, Demos had dropped the line of assorted health foods (miso, sea vegetables, etc.), expanded the deli items, and installed a stand-up counter bar to eat at and a few tables and chairs. Formerly it had been all takeout. Hot and cold fast food was served. The deli attracted lots of business (there was still usually a line out the door), the products were very innovative and they were praised by the natural foods community in Boulder. Address: Lafayette, California.

3187. Product Name: Soft Soyalite (Non-Dairy Cream Cheese) [Garlic, Herb, Onion/Chive, or Plain]. Formerly named Soft Tofu Cheese.

Manufacturer's Name: Simply Natural, Inc.

Manufacturer's Address: P.O. Box 295, Norma, NJ 08347.

Date of Introduction: 1987. October.

Ingredients: All: Organic tofu, organic miso. Herb: Italian seasoning (Oregano, basil, savory, thyme, rosemary).

Wt/Vol., Packaging, Price: 8 oz plastic tub.

How Stored: Refrigerated.

Nutrition: Per ounce: Calories 43, sodium 167 mg, fat 2.3 gm, carbohydrates 1.6 gm, protein 3.8 gm.

New Product–Documentation: Flyer. 1987. Oct. Shows label. "A non-dairy cheese substitute." Label. 1987. 4 inches diameter. Green and purplish red on white "Simply Natural Gourmet Soy Foods Soft Soyalite. Plain. A Non-Dairy Cheese Substitute. Only 43 calories an ounce!" Brochure. 1987. Oct. "Discover the New Simply Natural and Rediscover Natural Cuisine." Introduces Soyalite (formerly Soft Tofu Cheese), Pasta Lite (formerly Tofu Pasta), and Miso Dressing. Explains why the names were changed and shows labels. Red on white. 4 pages. Leaflet. 1988. "We're back... And better than ever! Better price. Better shelf life. Better packaging. Better flavors. Super summer discount thru 31 Aug. 1988." Ad in *Vegetarian Times*. 1988. May. p. 58. "Everything Your Heart Desires."

Product Alert. 1988. May 23. "After extensive research and market surveys, Simply Natural, Inc. of Norma, NJ, has decided to rename and reformulate its Soft Tofu Cheese product. It is hoped the new name, Soyalite, will end the confusion behind the old product name—is it cheese, tofu or a combination. Soyalite has approximately half the calories, 43 per ounce, of soft dairy cheeses. Packaged in an 8 oz tub, this spread and/or dip has been reformulated so it has a more 'velvety', smoother texture. Four varieties are available, Plain and Herb are reformulations of the original tofu cheese product while Onion/Chive and Garlic are new additions to the line."

3188. Product Name: Westbrae Natural Organic Unpasteurized Miso [Mellow White, Mellow Red, and Mellow Brown Rice].

Manufacturer's Name: Westbrae Natural Foods (Importer/Distributor). Made in Canada by Amano Miso Co.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7521.

Date of Introduction: 1987. October.

Ingredients: Mellow White: Cultured white rice, organically grown* whole soybeans, water, sea salt. * Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 13 oz (396 gm) plastic tub.

How Stored: Refrigerated.

Nutrition: Per tbs (18 gm)/per 100 gm: Calories 40/239, protein 2/9 gm, carbohydrate 8/45 gm, fat 0/1 gm, cholesterol 0 mg, sodium 740/4080 mg, potassium 50/290 mg.

New Product–Documentation: Talk with Gordon Bennett. 1988. April 2. About 6 months ago they switched from Cold Mountain Miso (made by Miyako Oriental Foods in Los Angeles) to that made by Amano in Canada. Gordon felt that Amano had a better, rounder flavor. Amano uses organic soybeans (which Miyako did not), and gave Westbrae exclusive distribution rights for the USA. Labels. 1988. Plastic tubs. Blue, red, or brown (respectively) and black on white. "Mellow Miso is not pasteurized so slight

swelling of the tub may occur. Unpasteurized miso is a source of beneficial enzymes and organisms. No preservatives or coloring added. Fermented in cedar kegs by the Amano family, master miso makers for 3 generations. Keep refrigerated.” The lid contains a recipe for one-pot miso soup, and the tub one for sweet ‘n tangy miso spread (miso, tahini, and brown rice syrup).

Talk with Graham Amano of Amano Foods Ltd. 1997. June 16. They still make miso for Westbrae. They also make shoyu. The market in British Columbia is too small, so they would like to expand.

Product with Label purchased at Open Sesame in Lafayette, California. 1998. Jan. \$4.39 for 13 oz plastic tub of Mellow Brown Rice Miso (made with organic soybeans, unpasteurized).

3189. Wizard’s Cauldron, Ltd. 1987. [Hot news: Edward & Sons Trading Company to be exclusive distributor and marketer for Wizard Baldour trade marked condiments and sauces, including Hot Stuff] (News release). P.O. Box 969, 108 S. Church St., Hillsborough, NC 27278. 1 p. Oct.

• **Summary:** Other products in the line include Wizard Baldour’s Sizzle, Catch Up, Woostershire, and White Magic. They are expected to be available by early 1988. Address: Hillsborough, North Carolina. Phone: 919-732-9445.

3190. Westbrae Natural Foods. 1987. Distributor catalog, FOB pricing: Nov. 15, 1987. Fall. Emeryville, California: Westbrae. iv + 19 + [12] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-10 are a computer-printed price list, and 11-19 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) of various Westbrae products. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

3191. Granger, Stan; Granger, Lindsey. 1987. Re: Apprenticeship at South River Miso Co. Letter to William Shurtleff at Soyfoods Center, Nov. 29. 3 p. Handwritten, with signature.

• **Summary:** Husband and wife, they are students of Michio and Aveline Kushi, and are now studying as apprentices at South River Miso Co. Describes their life and work there. Address: Conway, Massachusetts.

3192. Barrett, Mariclare. 1987. Soyfoods almanac. *Vegetarian Times*. Nov. p. 35-38, 40. [3 ref]

• **Summary:** An overview and introduction to tofu, tempeh, miso, soy sauce, etc. with summary of some new developments. Photos show Betsey Shipley & Gunter Pfaff,

Jan Belleme, Henry Ford wielding axe against trunk of car made of soybeans.

3193. Eden Foods, Inc. 1987. Product description: Eden Foods quality natural foods. 701 Tecumseh Rd., Clinton, MI 49236. 21 p. Plus 6 pages of inserts. Catalog.

• **Summary:** The catalog lists the following soyfoods: Edensoy (Original, Vanilla, Carob; shown on page 1. “Edensoy is the best tasting, best selling, best made natural soymilk on the market”), black soybeans (they “have a hearty yet sweet taste. In Japan, black soybeans are always prepared for the New Year’s celebration as they are a symbol of health.”), organically grown soybeans (usually Corsoy or Amsoy), Eden tekka (“a hearty, nutritious condiment made from hacho miso, carrots, burdock, ginger root, and unrefined sesame oil; 2.8 oz), dried tofu (actually dried-frozen; 5.8 oz), barley (mugi) miso, brown rice (genmai) miso, buckwheat (soba) miso, light (shiro) miso, rice (kome) miso, hacho (100% soybean) miso, natto miso “Kinzanji,” shoyu, organic shoyu, low-sodium shoyu, wheat-free tamari, tamari-roasted nuts and seeds wheat free (pumpkin seeds, sunnies [sunflower seeds], almonds, cashews, mixed nuts), and Lima Tempeh.

Some interesting non-soy foods listed in the catalog include quinoa (16.2% protein), kudzu-kiri, kudzu root starch, adzuki beans, mochi (100% brown rice, with mugwort, or with millet), sea vegetables, organic amazake, barley malt syrup, and Lima seitan.

In the spring of 1986, Eden Foods became General Agent for North America for the Lima Company of Belgium. Lima soyfood products include Lima Tempeh. Note: This catalog was still in use in Jan. 1989. Address: Clinton, Michigan. Phone: 517/456-7424 or 800/248-0301.

3194. **Product Name:** Tofu Classics: Mandarin Chow Mein, Creamy Stroganoff, or Shells ‘n Curry (Pasta and Sauce Mixes).

Manufacturer’s Name: Fantastic Foods.

Manufacturer’s Address: 106 Galli Dr., Novato, CA 94949. Phone: 415-883-7718.

Date of Introduction: 1987. November.

Ingredients: Mandarin Chow Mein: Whole wheat Oriental noodles, dehydrated vegetables (onions, carrots, peas, red pepper, green onions, garlic, parsley), corn oil, powdered yellow miso (soybeans, rice, salt), hydrolyzed vegetable protein, whole wheat flour, dried yeast (molasses grown), toasted sesame oil, powdered soy sauce (soybeans, wheat, salt), spices, rice syrup powder, vinegar powder.

Wt/Vol., Packaging, Price: 4 oz (113 gm) paperboard box. Retail for \$1.65 (5/90, California).

How Stored: Shelf stable.

New Product–Documentation: Note: This product does not contain any tofu; it must be added. Ad in *Natural Foods Merchandiser*. 1987. Nov. p. 50. “Introducing... Tofu

Classics. One pot cooking. Ready in less than 20 minutes.” Dec. p. 16. “New Tofu Classics Take You Out of the Kitchen and Around the World.” Also run in 1988. Jan. p. 40. Ad in Vegetarian Times. 1988. May. p. 11.

Label sent by Claire Wickens. 1990. May 30. 4.5 by 6.5 by 1.25 paperboard box. Tan, green, orange and red on beige. On the front panel is a photo of a white plate containing the finished tofu and pasta, plus a small insert photo of a package of water-packed tofu. “Add ½ pound firm tofu. All vegetarian. All natural.” On the back is a pastel drawing of a Chinese person carrying two baskets on a shoulder pole by a lake. “One pot cooking. Ready in 7 minutes. Fantastic Foods’ *Tofu Classics* are adaptations of favorite dishes from around the world, designed to enhance tofu cookery. We provide wholegrain pasta and a delicious sauce—you add tofu.” Inside is a poly bag with short lengths of pasta and dried peas, diced carrots, etc.

Tofu Classics product with Label purchased at Open Sesame in Lafayette, California. 1998. Jan. 10. Mandarin Chow Mein, design copyright 1994. Price: \$1.89. Shells ‘n Curry, design copyright 1994. Price: \$1.89.

3195. Goldbeck, Nikki; Goldbeck, David. 1987. The Goldbeck’s guide to good food. New York, NY: New American Library. xi + 563 p. Illust. Index. 24 cm.

• **Summary:** The all-new version of their *Supermarket Handbook*, which originally sold 850,000 copies. Chapter 12 (p. 143-51), titled “Soyfoods: World Class Protein,” discusses tofu, frozen tofu, tempeh, soy flour and grits, high-tech soy (soy concentrates and isolates), textured soy protein products. There is also considerable information on soyfoods in other chapters throughout the book: Soy flour (p. 79). Soy nuts (p. 159, 163). Soy milk (p. 184-85). Soy yogurt (p. 190-91, 195). Soy cheese (212, 217-18). Soy protein concentrates or isolates (p. 233, 451, 483, 527). Soy oil (p. 144, 264, 288, 292-93). Meatless burgers and soy sausages (p. 394). Soy ice cream (p. 452-53, 455). Soy sauce (510-11, 515). Miso (p. 511-12, 515). Worcestershire sauce (p. 512).

The section titled “Soy Yogurt” gives a nutritional analysis of cultured Soygurt, made by Cream of the Bean; per 8 oz. it contains 255 calories, 6.7 gm protein, 45.2 gm carbohydrates, 5.3 gm fat, no cholesterol, 20 mg sodium, and 7% of the US RDA for calcium. The text reads: “Those who must avoid milk will be interested in nondairy soy yogurt. A new arrival in natural food stores, this yogurt is made from soymilk and bacterial cultures. Gelatin is added to some brands to maintain the typical yogurt consistency. There is no need, however, for the quality to be compromised by the addition of high fructose corn syrup, isolated soy protein, salt, and several thickening agents, as has been done in at least one brand we have encountered.”

The section titled “Soy Cheese” states: “Cheese based on soy milk has recently added a new category of cheese

products to the market. In terms of calories, protein, and overall fat content soy cheese competes quite favorably with animal cheeses... It is both lactose- and cholesterol-free and the sodium content is about average for cheese. Note, however, that soy cheese is held together with vegetable gums and will contain either the milk derivative calcium caseinate (in which case it is not dairy free) or isolated soy protein.” Page 218 gives a nutritional analysis of Soya Kaas (soy cheese). Per 1 oz. it contains 78 calories, 6.7 gm protein, 5.6 gm fat, no cholesterol, and 168 mg sodium. Address: R.D. 1, Box 495, Woodstock, New York 12498 914-679-8561.

3196. **Product Name:** Miso Mustard.

Manufacturer’s Name: Kaiora Natural Ltd.

Manufacturer’s Address: CPO Box 3007 (180 Victoria St. West), Auckland 1, New Zealand. Phone: 09-370 454.

Date of Introduction: 1987. November.

Ingredients: Mustard seeds, brown rice vinegar, barley miso (soybeans, barley, water, sea salt).

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Shelf stable.

New Product–Documentation: Label. 1987. 7.5 x 2 inches. Purple, light purple black, white, green, and red. “A rich, rounded blend of premium stoneground mustards and nutritious barley miso. Miso mustard is preferred for its superior flavor and mellow character.” Note: Kaiora also markets apple butter, almond butter, peanut butter, apple & blackberry conserve, apple & strawberry conserve, vanilla extract, hazlemalt spread, and unrefined olive oil. Beautiful labels! Form filled out by Austin Holden. 1988. Dec. Gives date of introduction.

3197. **Product Name:** Dandelion-Leek Miso (With Dandelion Greens, Wild Spring Leeks, and Maine Coast Kelp [Digitata] Pickled in the Miso).

Manufacturer’s Name: South River Miso Co. Inc.

Manufacturer’s Address: South River Farm, Conway, MA 01341. Phone: 413-369-4057.

Date of Introduction: 1987. November.

Ingredients: Wild leeks (*Allium tricoccum*), dandelion greens, and Maine coast kelp (*Digitata*) pickled for one summer in two-year Barley miso made from deep well water, organically grown barley and soybeans, sea salt, and koji culture.

Wt/Vol., Packaging, Price: 1 lb plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Talk with then Label sent by Christian Elwell. 1992. March 13. After the miso has aged for 2 summers, the land- and sea vegetables are added then the mixture is allowed to ferment until the end of the third summer. He started selling this miso in the winter of 1987. Label. 3.5 by 2 inches. Black on white. Self adhesive.

“100% organic ingredients. Unpasteurized. Please refrigerate.”

3198. Sumiyoshi, Yasuo. 1987. Miso, shoyu seizô gyôkai no genjô ni tsuite [Present status of the miso and shoyu industries in Japan]. *Daizu Geppo (Soybean Monthly News)*. Oct/Nov. p. 19-28. [Jap]

• **Summary:** For the year 1983, 1,701 miso manufacturers produced 574,000 tonnes of miso, and 2,692 shoyu manufacturers produced 1,194,000 kiloliters of shoyu. Miso production for recent years was: 1980 579,000 tonnes, 1981 576,000 tonnes, 1982 572,000 tonnes, 1983 574,000 tonnes, 1984 581,000 tonnes, 1985 573,000 tonnes, 1986 581,000 tonnes. Most of Japan's miso plants are still small: 1,513 plants (88.5% of all plants) produced 375 tonnes or less a year, but this accounted for only about 12% of all production. Yet eight plants produced 11,251 tonnes or more a year, and this accounted for 26.7% of all production.

Shoyu production for recent years was: 1980 1,189,000 kl, 1981 1,191,000 kl, 1982 1,187,000 kl, 1983, 1,194,000 kl, 1984, 1,200,000 kl, 1985, 1,186,000 kl, and 1986 1,201,000 kl. Address: Shokuryô-chô Kakô Shokuhin-ka, Miso Shôyu Kakari-chô.

3199. *Whole Foods*. 1987. Great Eastern Sun, Westbrae trade lines. Nov. p. 18.

• **Summary:** Effective immediately Great Eastern Sun of Enka, North Carolina, is the exclusive distributor of Westbrae label seaweeds (sea vegetables) and Asian condiments, while Westbrae is exclusive distributor of Soba Shop ramen and noodles. Bruce Sturgeon is sales and marketing director for GES.

3200. *Whole Foods*. 1987. Sensational soyfoods. Nov. p. 62. [5 ref]

• **Summary:** This basic introduction is designed to be photocopied by natural food retailers for distribution to their customers.

3201. Schiering, Bob. 1987. Amazake seasoned with miso, or made with commercial enzymes (Interview). *SoyaScan Notes*. Dec. 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mixing 2 teaspoons of miso with 1 quart of amazake gives a great flavor. He would like to make amazake with commercial enzymes rather than koji mold, but does not have the resources to start his own company. He worked for Grainaissance for a while. He had the idea for and did the initial development on their amazake egnog. Feels that he was not paid fairly for his work. He has recently made delicious 3-grain amazake (from brown rice, millet, and corn) that tastes like egnog, and also a delicious oatmeal amazake. The former idea came from Mountain Ark via Betty Stechmeyer of GEM Cultures. In

Jan. 1988 he completed a brief market study on amazake in America and shared the results with Soyfoods Center. Address: 5707 Carlos Ave., Richmond, California 94804. Phone: 415-237-5845.

3202. Mesmer, R.E. 1987. Don't mix miso with MAOIs (Letter). *J. of the American Medical Assoc.* 258(24):3515. Dec. 25. [1 ref]

• **Summary:** MAOIs (Monoamine oxidase inhibitors) such as Parnate and Nardil are widely used to treat anergic depression and some anxiety and phobic disorders. One side effect of taking these drugs is hypertension. Patients are advised to follow a low-tyramine diet. But miso and soy sauce may contain enough tyramine to raise the blood pressure of persons taking MAOIs, causing hypertensive crises. Address: M.D., Warren (Pennsylvania) State Hospital.

3203. American Miso Co. 1987. A miso primer: The American Miso story (Ad). *Vegetarian Times*. Dec. p. 18.

• **Summary:** This one-third page vertical black-and-white ad explains: “Generally, there are three types of miso: Sweet, Mellow, and the darker, Traditional misos. They differ in color, salt content, fermentation time, and the soybean/grain (koji) ratio.” The company describes each of the misos it makes as one of these three types. Near the bottom of the ad is the Miso Master logo, an illustration showing the head and shoulders of a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso. Below “Miso Master is produced by the American Miso Co. for Great Eastern Sun.”

This ad also appeared in the April 1989 issue (p. 6) of this magazine. Address: Rutherfordton, North Carolina.

3204. Belleme, John. 1987. The South River Miso story: Turn-of-the-century techniques make a modern success. *East West*. Dec. p. 28-30. [1 ref]

• **Summary:** A beautifully written history of this company and description of its present work. The South River adventure began in 1979 after the couple had finished a 3-month miso apprenticeship with Noboru Muramoto in Glen Ellen, California. They were able to make 1,000 lb of miso in one batch. The beans and koji are mashed by hand and foot. Using only organic beans and grains, sea salt, deep well water, and natural aging in wood, South River now makes 40,000 lb/year of nine types of miso using methods found in Japanese history books.

Photos show: The Elwell's home and attached miso shop. Four small shots of Christian Elwell making koji and miso. Christian pouring the miso into an 8,000 lb capacity wooden vat. John Belleme treading fresh miso underfoot.

3205. Golbitz, Peter. 1987. 1987 new product count: At least 217 new soyfood products for retail sale. *Soya*

Newsletter (Bar Harbor, Maine). Nov/Dec. p. 3.

• **Summary:** Of the 217 new products, the leaders in the 8 product categories were Nondairy Frozen Desserts (50), Entrees (44), Beverages (35), Snacks/Desserts (35), Cheese Alternatives (19), Frozen Entrees (17), and Condiments (16). The leaders among the 8 primary soy ingredients were tofu (133), soymilk (32), textured soy protein (19), isolated soy protein (12), soynuts (10), tempeh (6) and miso (1). Tofu was the only primary soy ingredient used to make at least one product in all categories. A complete listing of these products broken down by primary soy ingredient and by category, and which also lists flavors, company name, city, and state, is available from Soya Newsletter for \$25 (or \$35 in Canada). Address: Soyatech, Bar Harbor, Maine.

3206. Hwang, Gwo-Rong; Chou, Cheng-Chun. 1987. [Physical and chemical changes during the aging of Toupan-chiang mash]. *Chung-Kuo Nung Yeh Hua Hsueh Hui Chih (J. of the Chinese Agricultural Chemical Society, Taiwan)* 25(4):469-475. Dec. [15 ref. Chi; eng]

• **Summary:** Physical and chemical changes occurring in this traditional Taiwanese variety of miso were investigated during the 98-day aging period. During maturation, the color darkened from greenish-brown to dark reddish brown. The content of soluble solids, amino nitrogen, and ammonia nitrogen gradually increased. The alcohol content reached a maximum of 0.45% after 70 days. There were large increases in the acetic acid (from 154.1 to 473.3 mg/gm of dry mash) and glutamic acid (from 0.50 to 2.35) content. Address: Graduate Inst. of Food Science and Technology, National Taiwan Univ., Taipei, Taiwan.

3207. Ebine, H. 1987. [Enforcement of regulations concerning and problems with the nutritional labeling of miso]. *Miso no Kagaku to Gijutsu (Miso Science and Technology)* 35(7):237-49. [Jap]*
Address: National Miso Research Inst., Tokyo, Japan.

3208. Inoue, F.; Awao, T. 1987. [Control of microorganisms in food (miso and soy sauce) factories]. *Miso no Kagaku to Gijutsu (Miso Science and Technology)* 35(11):370-86. [14 ref. Jap]*

• **Summary:** These bacteria are members of the Lactobacillaceae. Address: Japan.

3211. Le Guern, J. 1987. Les produits végétaux fermentés [Fermented vegetable products]. *Bretagne Agro-Alimentaire (La)* 14(1):7-10. [13 ref. Fre]*

• **Summary:** Discusses the different processes for fermentation of legumes, including the process for making miso. Address: Adria, Quimper, France.

3212. **Product Name:** Miso.

Manufacturer's Name: McCracken Miso Co.

Manufacturer's Address: 2, Muirhouse Cottages, Lauder Rd., Stow, Galashiels TD1 2QL, Scotland.

Date of Introduction: 1987.

New Product-Documentation: Letter from Mrs. Roisin McCracken. 1988. July. "My husband and I have started a rather successful miso business."

3213. Nagano, H. 1987. [Evaluation of okara as a raw material for miso]. *Miso no Kagaku to Gijutsu (Miso Science and Technology)* 35(6):228-33. [12 ref. Jap]*

• **Summary:** Okara is a by-product of tofu production. Address: Japan.

3214. Nikkuni, Sayuki; Okada, N.; Itoh, H. 1987. [Studies on soybean protein digestion during miso fermentation. II. Effect of soybean cooking conditions on SDS-PAGE pattern of water-insoluble proteins of miso]. *Nippon Shokuhin Kogyo Gakkaishi (J. of Japanese Society of Food Science and Technology)* 34(11):731-37. [24 ref. Jap; eng]*

• **Summary:** Six miso samples were prepared from soybeans autoclaved under 1 kg/square cm steam pressure for different lengths of time (0, 1, 10, 20 and 60 minutes). There were no significant differences in water-soluble nitrogen contents and in SDS-PAGE (Sodium dodecyl sulphate-Polyacrylamide Gel Electrophoresis) patterns of miso samples prepared from soybeans autoclaved for greater than or equal to 1 minute. However, texture of miso samples prepared from soybeans autoclaved for 1 minute was inferior to that from soybeans autoclaved for greater than or equal to 10 minutes. Address: National Food Research Inst., Ministry of Agriculture, Forestry & Fisheries, Yatabe, Ibaraki 305, Japan.

3215. **Product Name:** Noble Bean Tofu Cutlets.

Manufacturer's Name: North Coast Tempeh Co. Tofu made by Cleveland Tofu Co.

Manufacturer's Address: 1088 Ivanhoe Rd., Cleveland, OH 44121.

Date of Introduction: 1987.

Ingredients: Tofu (soybeans, water, naturally occurring calcium sulfate), tahini, barley miso, spring water, corn oil, rice vinegar, spices.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Frozen.

New Product–Documentation: Label. 1987. 4.25 inches diameter, self adhesive. Red, green, yellow, and blue on white, with logo of Jack and the Beanstalk. “Pan Fry, Bake, Steam, or Grill. No Cholesterol.” Jeff Narten. 1987. “History of North Coast Tempeh and its Products.” 4 p. Dec. 7. Plus new current label.

3216. Ohike, T.; Shimozaki, I.; Kanai, T.; Yoneyama, T.; Itoh, T.; Shinha, Y.; Fukuzawa, M.; Iida, T. 1987. [Quality evaluation of high-yielding rice varieties for rice miso production]. *Research Report of the Nagano State Laboratory of Food and Technology* No. 15. p. 38-42. [2 ref. Jap]*

Address: Nagano State Lab. of Food Technology, Kurita, Nagano-shi, Japan.

3218. **Product Name:** Honest to Goodness Soup. Make-in-the cup (Dry Mix) [Tomato, Onion, or Mulligatawny].

Manufacturer’s Name: Realeat Company Ltd.

Manufacturer’s Address: 2 Trevelyan Gardens, London NW10 3JY, England. Phone: 01-459-3401.

Date of Introduction: 1987.

Ingredients: Brown rice, miso and soy sauce powder, vegetable bouillon powder, and spices. Varietal ingredients include tomato, onion, curry, garlic, and celery salt.

Wt/Vol., Packaging, Price: 16 gm in nitrogen-flushed foil sachet.

How Stored: Shelf stable.

Nutrition: Per 15 gm dry: Protein 10%, carbohydrate 68%, vegetable fat 4%, calories 50.

New Product–Documentation: Letter from Gregory Sams. 1988. March 30. Leaflet, undated. “A Recipe for success.” Gives detailed product information. “A truly unique range of additive-free Instant Soups with Real Flavor. They are made only with natural ingredients and thickened with nourishing brown rice.”

3219. Salt of the Earth. 1987. Catalog [Mail order]. P.O. Box 1614, Rifle, CO 81650. *

• **Summary:** Talk with Ron Roller. 1991. Nov. 22. Scott Halizon of Salt of the Earth in Rifle, Colorado, sells natto starter cultures.

Talk with Scott Halizon. 1991. Nov. 23. In about 1971 Scott decided to learn as much as he could about salt and to make traditional salt available in America. His company

now makes salt in Mexico, on the west/Pacific side of Baja, California. He brings this crude salt to Colorado, dissolves it in water, filters out the dust and grit, boils it, recycles the nigari, and dries it for sale. He started to sell this salt in about 1978-80 via a company he established named The Salt Company. Address: Rifle, Colorado. Phone: 303-625-4444.

3220. Shimomura, M.; Matsumoto, J.J. 1987. [Changes in proteins of fish meat during cooking and processing. V. Changes in proteins of Spanish mackerel meat cured in miso]. *Nihon Suisan Gakkai-shi (Bulletin of the Japanese Society of Scientific Fisheries)* 53(4):627-32. [11 ref. Jap; eng]*

• **Summary:** Miso-zuke of fish flesh is a traditional processing method whereby fish are cured in miso in order to preserve the fish and improve its eating quality. The meat becomes more tender and fragile. It becomes harder for the first 7 days, then softer until day 21 due to the enzymes in miso. Address: Dep. of Food Science & Nutrition, Otsuma Women’s Univ., Sanbancho 12, Chiyoda, Tokyo 102, Japan.

3221. **Product Name:** Soy Devine Cajun Barbeque Style (Frozen Tofu Entree) [As is, or on a Nine Grain Bun].

Manufacturer’s Name: Soy Devine.

Manufacturer’s Address: Box 668, Miranda, CA 95553.

Date of Introduction: 1987.

Ingredients: Processed organic tofu [frozen], tomato sauce, onions, honey, mustard, cider vinegar, safflower oil, tamari (Westbrae), peanut butter, garlic, miso, spices (incl. paprika, cayenne, allspice).

Wt/Vol., Packaging, Price: In a tub.

New Product–Documentation: Talk with Mara Devine. 1988. April 7. She used to make the Village Soyburger. This may be America’s first second-generation product made with frozen tofu. She buys the tofu from Quong Hop. It is not shaped like a burger. She freezes the tofu, slices it, marinates it in a sauce, then bakes it, pours on the sauce and bakes it a little more. It is akin to Sloppy Joes. She also sells it in a bun. Its very chewy. She has a whole book on frozen tofu. Label. 1988. As is, 4.5 inches diameter. Black, red and green on a white lid. Logo of an angel with a soybean plant in both hands. “No additives or preservatives. Tasty hot or cold. Made with organic tofu and homemade barbecue sauce. All vegetable protein. Excellent texture. On tub: Serving suggestions. Great as a burger, in sloppy joes, in spaghetti sauce, as burrito or enchilada filling, over rice, pasta, or baked potato.” Label for burger. 1988. 3 inch diameter. Black and yellow, with same logo.

Talk with Mara Devine. 1995. June 1. In 1995 Cajun Barbecue Style was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. She moved from Miranda to Arcata, California, in June 1993.

3222. Togashi, T. 1987. [A balanced high-barrier Saran UB film]. *Fudo Pakkejingu (Food Packaging)* 31(2):55-62. [Jap]*

• **Summary:** The plastic film was used to package foods such as miso and dried skipjack tuna fish. Address: Japan.

3223. Yoneyama, T.; Ohike, T.; Iida, T. 1987. [Preparation of koji and miso using corn starch. II. Processing of miso using uncooked material]. *Research Report of the Nagano State Laboratory of Food and Technology* No. 15. p. 43-46. [2 ref. Jap]*

Address: Nagano State Lab. of Food Technology, Kurita, Nagano-shi, Japan.

3224. Yoneyama, T.; Ohike, T.; Iida, T. 1987. [Quality evaluation of Japanese soybean varieties for processing in rice miso. III.]. *Research Report of the Nagano State Laboratory of Food and Technology* No. 15. p. 47-50. [2 ref. Jap]*

Address: Nagano State Lab. of Food Technology, Kurita, Nagano-shi, Japan.

3225. Albert, Rachel. 1987. *Gourmet wholefoods: Vegetarian and macrobiotic cuisine*. Grain of Salt Publishing, 2211 N.E. 50th, Suite #12, Seattle, WA 98105. xi + 176 p. Illust. by Rebecca Rickabaugh. Index. Introduction by Karl Mincin. 21cm.

• **Summary:** This vegan cookbook contains no recipes calling for eggs or dairy products. At last, a macrobiotic cookbook without fish. This book has a brief, unstuffy introduction to macrobiotics and tasty, creative recipes. Includes 11 recipes featuring tofu, 4 with tempeh, 1 using black soybeans, and many using miso and shoyu. Note the correct use of the term “shoyu” throughout. Also has recipes for “amasake” and “amasake frosting.” Address: Washington.

3226. Bates, Dorothy R. 1987. *Kids can cook: Vegetarian recipes kitchen-tested by kids for kids*. Summertown, Tennessee: The Book Publishing Co. 120 p. Illust. Index. 23 cm. Spiral bound.

• **Summary:** The index of this vegetarian cookbook contains listings for 4 tofu recipes and 1 miso recipe, plus definitions at the Ingredients sections of tofu, TVP (Texturized Vegetable Protein), tempeh, and miso. Dorothy Bates is the mother of Albert Bates, a lawyer at The Farm, and a patron of The Book Publishing Co. Address: Tennessee.

3227. Beuchat, Larry R. 1987. *Food and beverage mycology*. 2nd ed. New York, NY: Van Nostrand Reinhold. xiii + 661 p. Illust. Index. 23 cm. [20+ soy ref]

• **Summary:** Contents: Contributors. Foreword. Preface. Classification of food and beverage fungi, by E.S. Beneke and K.E. Stevenson. Relationships of water activity to

fungal growth, by Janet E.L. Corry. Fruits and fruit products, by D.F. Splittstoesser. Vegetables and related products, by R.E. Brackett. Meats, poultry, and seafoods, by James M. Jay. Dairy products, by Elmer H. Marth. Field and storage fungi, by C. M. Christensen. Bakery products, by J.G. Ponte, Jr. and C. C. Tsen. Traditional fermented food products, by L.R. Beuchat. Alcoholic beverages, by G. G. Stewart. Edible mushrooms, by W.A. Hayes. Poisonous mushrooms, by Donald M. Simons. Fungi as a source of protein, by A. J. Sinskey and C.A. Batt. Fungal enzymes and primary metabolites used in food processing, by R. Bigelis and L.L. Lasure. Mycotoxins, by N.D. Davis and U.L. Diener. Methods for detecting mycotoxins in food and beverages, by L.B. Bullerman. Methods for detecting fungi in foods and beverages, by B. Jarvis and A.P. Williams. Appendix. Regulatory action levels for mold defects in foods.

Chapter 9, “Traditional fermented food products, has a section on koji and a long section on fermented soybean foods that discusses: Shoyu, miso, natto (incl. itohiki-natto, yukiwari-natto, and hama-natto / hamanatto; called tu su by the Chinese and tao-si by the Filipinos), sufu, meitauza, and témpé [tempeh]

Tables show: (9.1) Some fermented foods of fungal origin. For each food is given: Product name, geography, substrate, microorganisms, nature of product, and product use. Soy-related products include: Chee fan, Chinese yeast, Hamanatto, kecap, kenima, ketjap, meitauza, meju, miso (incl. chiang, jang, doenjang, tauco, tao chieo), natto, soybean milk, soy sauce (incl. chiang-yu, shoyu, toyo, kanjang, kecap, see-ieu), sufu (tahuri, tao-kaoran, tao-ju-yi), tao-si, taotjo, tauco and témpéh. Address: Dep. of Food Science, Agric. Exp. Station, Univ. of Georgia, Experiment, GA 30212.

3228. Campbell-Platt, Geoffrey. 1987. *Fermented foods of the world: A dictionary and guide*. London and Boston: Butterworths. xxiii + 291 p. 26 cm. [25 soy ref]

• **Summary:** The author classifies fermented foods into 9 groups: Beverages, Cereal products, dairy products, fish products, fruit and vegetable products, legumes, meat products, starch crop products, and miscellaneous products. Fermented legume products are particularly important in the diets of East Asia, Southeast Asia, and the Indian subcontinent. He has sections on many fermented soyfoods (dawadawa, hama-natto, kenima, miso, natto, tempe [tempeh], sufu) listing major areas consumed, related terms, how consumed, types, how produced, microbiology and biochemistry, and a few key references. His research began in Ghana with dawadawa made from the African locust bean. Address: National College Prof. of Food Technology, Dep. of Food Science & Technology, Univ. of Reading, Reading, Berkshire, UK.

3229. Diamond, Harvey; Diamond, Marilyn. 1987. *Fit for life II: Living health*. New York, NY: Warner Books. 490 p. [423* ref]

• **Summary:** The authors of the best-selling *Fit for Life* “America’s #1 Diet Book,” write more about their program based on the traditional Natural Hygiene philosophy. They encourage people to eat more raw foods and to cut down on animal products, especially on meat and dairy products. Chapter 18 is titled “Questions frequently asked.” One of these (p. 323) is “*What about tofu?* This ancient food which originated in China over one thousand years ago has recently attracted our attention. It is an easily digestible protein which can play an important role in your diet as you begin to decrease your intake of animal protein. Tofu is made from soy milk, the liquid resulting when soaked and ground soy beans have been gently boiled for a short time. In high quality tofu preparation, the milk is then solidified with nigari (concentrate remaining when sea salt is extracted from sea water) or calcium sulfate (from gypsum). Tofu is rich in amino acids and calcium, containing more calcium by weight than dairy milk. It is also rich in iron, magnesium, phosphorous, potassium and sodium, essential B vitamins, choline and vitamin E. Unlike other proteins, it is alkaline, rather than acid. Because of this alkalinity and because it contains no crude soybean fiber, tofu combines well with starches, especially brown rice and other grains and whole grain breads. Watch for lots of new tofu recipes in the upcoming cookbook, *The Fit for Life Kitchen*.

The last major section of the book, titled “The Living Health Cookbook,” contains recipes. Under “Soups, Sandwiches, and Rolled-Up Yummies,” is a recipe for “Miso and Vegetables” (p. 405-06), a thick soup. The introduction to the recipe reads: “Miso is a soybean paste that is used in Japanese and macrobiotic cooking as a base for soups. It is also made from brown rice or barley, but these are not as common. I used to buy miso only in health food stores, but now I find it in the Asian food section of my supermarkets. In soup it has a mellow flavor and does not require the addition of any other flavorings, especially since it already has a slightly salty quality.”

These are the only two references to soyfoods in the book.

3230. Downes, John. 1987. *Soy source: A practical guide to cooking with soy foods*. Chatswood, NSW, Australia: Nature and Health Books. Co-published in 1987 by Prism Press, 2 South Street, Bridport, Dorset DT6 3NQ, England. Distributed in the USA by Avery Publishing Group. 127 p. No index. 22 cm. [21 ref]

• **Summary:** Contents: Introduction, Nutrition & Soyfoods, Ingredients & Techniques, Glossary, Appetizers & Dips, Marinades & Accompaniments, Soups, Soup Noodles, Main Courses, Salads & Dressings, Desserts, Bibliography. A cookbook containing very little information about soyfoods

in Australia. The author was born in 1949. Address: Australia.

3231. Gentle World, Inc. 1987. *The cookbook for people who love animals*. 4th ed. P.O. Box 1418, Umatilla, FL 32784. 192 p. Introduction by Michael A. Klaper, M.D. Index. 26 cm. The first edition was copyrighted in 1981. The fifth edition (192 p.) was copyrighted in 1989.

• **Summary:** A good collection of over 300 vegan recipes, which are straightforward, appetizing, and nutritious. Special section includes recipes for cat and dog food. Contains 15 tofu recipes (including a non-fermented tofu yogurt, p. 13), plus several each using miso, soymilk, whole dry soybeans, and okara. The book contains many nice quotes about vegetarianism and veganism.

The cover of the 1986 ed. and of the fifth edition (copyrighted 1989) is red, orange, and green on yellow. The top of the cover states: “Over 300 totally vegetarian recipes, from beginner to gourmet. No meat—No eggs—No dairy—No sugar or honey—No cholesterol.” At the bottom is a field of red and yellow flowers.

Page 12 contains a recipe for Nut Milk using ¼ cup nut butter (peanut butter, cashew butter, almond butter, sesame tahini butter, or sunflower seed butter) and 1 cup water. Address: Umatilla, Florida.

3232. Ito, Kiyoe; Arai, E.; Fuke, S. 1987. *Sawara no misozuke ni kansuru kenkyū: Tsukekomi kikan-chū no ganchisso seibun no dōtai ni tsuite* [Studies on fillets of Spanish mackerel pickled with soybean miso: Changes of nitrogenous compounds during pickling]. *Kaseigaku Zasshi (J. of Home Economics of Japan)* 38(4):267-73. [7 ref. Jap; eng]

• **Summary:** Spanish mackerel is *Scomberomorus niphonius*. Pickling time required to obtain the most favorable products were 72 hours for soybean miso and 48 hours for mixed soybean miso. A decrease in trimethylamine in the early stage of pickling suggests that soybean miso decreases the fishy odor. Address: Faculty of Education, Tokyo Gakugei Univ., Koganei, Tokyo 184, Japan.

3233. Karim, Mohamed Ismail Abdul; Hassan, Zaiton. 1987. *Traditional fermented foods of Malaysia*. In: *Traditional Foods and Their Processing in Asia*. Tokyo: NODAI Research Institute, Tokyo Univ. of Agriculture. vii + 235 p. See p. 210-18. [12 ref]

• **Summary:** The authors discuss the preparation of a number of Malaysian fermented soyfoods, including tempeh, kicap kacang soya (soy sauce), and tauco (soybean paste). They also discuss other Malaysian fermented foods: budu or kicap ikan (fish sauce), cinaluk (fermented shrimp), belacan (fish/shrimp paste), pekasam (fermented freshwater fish), tapai (fermented rice or cassava),

tempoyak (fermented durian), tairu/taire/taina (fresh cow's milk fermented by bacteria equivalent to sour milk or yogurt), dadeh (made from fermented buffalo milk), idli and dosai, arak beras (rice wine), toddy (palm wine), idli (steamed pudding), dosai (pancake), dadeh (fermented sweetened milk), and jeruk buahbuahan & sayur sayuran (pickled fruits and vegetables). Address: Faculty of Food Science and Biotechnology, Universiti Pertanian Malaysia, Malaysia.

3234. Nichterlein, Karin. 1987. Huelsenfruechte [Legumes]. Bonn, Germany: AID (Auswertungs- und Informationsdienst fuer Ernaehrung, Landwirtschaft und Forsten). 20 p. Illust. 21 cm. [10 ref. Ger]

• **Summary:** The section on soybeans (p. 14-16) discusses soya oil, lecithin, soybean meal, soy protein concentrates, soya bread, low-fat soy flour, Sojemark (Soya meat), TVP, soya milk, tofu, soy sauce (shoyu, tamari), miso, tempeh, sufu (fermented tofu), natto, and soy sprouts. Address: Institut fuer Pflanzenbau und Pflanzenzuechtung I, Giessen, Germany.

3235. NODAI Research Institute. 1987. Traditional foods and their processing in Asia. Tokyo: NODAI Research Inst. vii + 235 p. Seminar held Nov. 13-15, 1986 at the Tokyo Univ. of Agriculture, Tokyo, Japan.

• **Summary:** Contents include: Oncom: Fermented peanut pressed cake, by Dedi Fardiaz. Mochi: Rice Cake, by Akiko Kawabata. Miso: Bean paste, by Hisao Yoshii. Chemistry and technology of tofu and its derived products, by Tokuji Watanabe. Indigenous fermented foods in Nepal, by Tika Karki. Improvement of traditional soy sauce fermentation mold, by Sri Hartadi and Siti Kabirun. Address: Tokyo Univ. of Agriculture, 1-1-1 Sakuragaoka, Setagaya-ku, Tokyo 156, Japan.

3236. Popham, Peter. 1987. The insider's guide to [south] Korea. Edison, New Jersey: Hunter Publishing 199 p. See p. 60. Illust. (color photos by Alain Evrard). Maps. Index. 23 cm. [9* ref]

• **Summary:** The 1988 Summer Olympics in Seoul introduced Korea to the modern world in a big, new way. This book was written for that event.

The chapter titled "Korean cuisine" (p. 58+) explains that it is the least known of the culinary traditions of Asia, and offers strong evidence of the nation's distinctiveness, which shows clear Mongol influence. Like the Chinese and Japanese, the Koreans also eat "soy beans and bean curd" [tofu], and bean sprouts [soy sprouts are more popular than mung bean sprouts]. The undisputed mark of Korean cuisine is kimch'i [kimchi], most of which is still made by fermentation at home of a vegetable (such as cabbage), always with chili and garlic; there are many different types of kimch'i, the most popular of which are cabbage stuffed

with oysters, sliced cucumbers with radish and ginger, diced daikon radish with scallions, and white radish sticks floating in brine. Other favorite Korean seasonings, besides garlic and chili, are scallions, ginger, sesame oil, sesame seeds, and soy sauce.

Pages 60-62: "There is also a whole range of fermented pastes and sauces for dipping, called *chang*. Every home and restaurant has its own recipe for *chang*, and each batch comes out differently. Based on a fermented mash of soybeans, the three most common varieties are "*kan chang*, a dark liquid, like soy sauce, *daen chang*, a thick, pungent paste, and *kochu chang*, a fiery version laced with chilies."

Side dishes, known as *panch'an*, accompany the main dish, rice, and add variety to the basic Korean meal. They include: *Tubu*: Soybean curd, tofu. *Manul changah-chee*: Green garlic pickled in soy sauce. *Don chun*: Beef and bean curd patties spiced with ginger.

Koreans love to make rich, thick stews, especially in winter. "*Chigae* is a special thick stew simmered in heavy clay crocks." Favorite Korean soups (*tang*) and stews include: *Maeun tang*: Rich soup of meat, fish, bean curd, zucchini and scallions. *Ten chang chigae*: Thick stew of meat, fish, bean curd, squash and chilies.

Simple "one-bowl" meals, especially popular as summer lunches, include: *Kong kookso*: Wheat noodles in fresh soy milk. *Udong* [Jap. udon]: Broad wheat noodles with onions, bean curd, egg and chili. *Kongnamul pap*: [Soy] bean sprouts, beef and cabbage served over rice.

A photo (p. 63) shows a man grinding food using a hand-turned stone mill (quern).

3237. Rizzi, George P. 1987. The biogenesis of food-related pyrazines. *Food Reviews International* 4(3):375-400. [102* ref]

• **Summary:** Flavorous pyrazines have been found in many fermented foods; the most extensive studies are those on soybeans, cocoa, and cheeses. At least three studies (which are summarized) have shown that natto contains various pyrazines. Table 2 (p. 379) shows pyrazines in foods produced by specific microorganisms; they are found in natto (produced by *Bacillus natto*), soysauce (*Aspergillus sojae*), miso (*Aspergillus oryzae*), and soybeans (*Aspergillus oryzae*). Address: The Procter & Gamble Company, Cincinnati, Ohio.

3238. Sayers, Robert; Rinzler, Ralph. 1987. The Korean onggi potter. Washington, DC: Smithsonian Institution Press. 288 p. See p. 58-60, 71, 75, 77. Illust. 23 cm. Series: Smithsonian Folklife Studies, No. 5. [166* endnotes]

• **Summary:** Onggi are traditional Korean earthenware vessels, used for the storage of pickled vegetables, bean pastes and soy sauces. Fieldwork for this project was initiated by Ralph Rinzler in 1971.

The section titled “Storage containers” (p. 58-59) contains a list of the names of ceramic food jars, with their appropriate uses, as given by people in Korea’s capital, Seoul. “Soy sauce, for example, is stored in quantity throughout the year in large and medium size outdoor receptacles (*kannjang tok* and *kanjang hangari*); as needed, the liquid is transferred to a small spouted kitchen form (*kanjang tanji*).” The large outdoor jar used to store soy paste *toenjang* is called a *toenjang tok* and the small kitchen form a *toenjang tanji*. The corresponding jars for red-pepper paste (*koch’ujang*) are called *koch’ujang hangari* and *koch’ujang tanji*.

To understand better how these storage jars are used, it is useful to describe the preparation of four Korean dietary staples: soy sauce, soybean paste, red pepper paste, and kimch’i. “The first of these, reddish black soy sauce (*kanjang*), is made from yellow soy beans boiled four or five hours, then mashed into a paste called *meju*. Today yeast is added to the *meju*; formerly it was molded into large rectangles or truncated cones, which were dried outdoors on rice straw mats, then hung from the house rafters to leaven [sic, mold] naturally over several months. In the springtime, the mold-covered *meju* is broken up into smaller chunks and submerged in a brine-filled *tok* positioned on an architectural feature of the outdoor living space called a *changdoktae* (“place for sauce jars”). This might be a stone or concrete terrace built up in a sunny part of the dwelling’s inner courtyard or, in the city, an apartment balcony or rooftop (Figures 8 and 9, p. 60-61).

Over a period of two or three months, the mistress of the house checks her jars, taking care to see that their contents receive only the proper amount of sunlight. Then, in May or June, she boils the clear, dark liquid in a cauldron and replaces it in still other jars along with red peppers and chunks of wood charcoal, which absorb dirt and inhibit strong odors. The solid moldy matter that floats to the top is skimmed off, then crushed, salted, and kneaded into a paste (*toenjang*), which constitutes a second major soy by-product. For most Koreans the making of soy sauce and soy paste is a yearly activity.” An affluent family might prepare an even larger supply. The sauce is believed to stay fresh up to three years, and is even said to improve with age.

“A second staple is the hot seasoning *koch’ujang*. In autumn, red chili peppers are harvested and sun-dried for a week or more. Then the peppers are split open and left in the sun a few days longer, after which the seeds are dislodged with a pole. What remains is pulverized in a mortar, then sifted through a pine-root sieve. Simultaneously (or during the making of soy sauce), a *meju* ring is prepared and secreted away in a dark corner of the house to ripen. In the springtime, the red pepper powder and pulverized *meju* are combined with rice paste *ch’apssalchuk*, salt, and sugar. The *koch’ujang* is not

cooked, but is left to ferment in a storage jar for three or four months.”

Most cauldrons are made of iron, although some, made of carved soapstone, are used for preparing medicinal foods. “Ceramic cauldrons are perhaps the least common; however a stew of fermented soybean paste [*toenjang*] is sometimes cooked in a small example (*toenjang sot*) manufactured from a low-firing refractory clay called *koryôngt’o*, which is more resistant to shattering than dense, homogeneous stoneware bodies (*chômto*) (Fig. 17), p. 71.

Photos show: (1) Korean onggi peddlers, ca. 1900, with long wooden racks that hold a heavy load of many containers on their backs (frontispiece). (2) Rooftop terrace (*changdoktae*) for sauce jars. Photo by Ralph Rinzler, 1971 (p. 60). (3) Rural version of *changdoktae* at Kaya village, Kyonggi Province (p. 61). (4) A small ceramic cauldron (*toenjang sot*) for preparing soy paste, Kyongju, N. Kyongsang Province (p. 71). (5) A small pouring vessel (*kanjang tanji*) for soy sauce (p. 77). Address: 1. Dep. of Anthropology, California Academy of Sciences, San Francisco, CA 94118.

3239. Shannon, Sara. 1987. Diet for the atomic age. Wayne, New Jersey: Avery Publishing Group Inc. xviii + 316 p. Introduction by Ernest J. Sternglass, PhD. Index. 23 cm. [400+* ref]

• **Summary:** The subtitle on the cover reads: “How to protect yourself from low-level radiation.” This book, written from a macrobiotic viewpoint, contends that various foods, including miso and sea vegetables, can protect people from radioactivity. Chapter 6, “Diet for the Atomic Age,” discusses miso, tofu, tempeh, and sea vegetables at length as foods that can protect us from radiation (p. 130, 145-55). The story of how miso protected Dr. Akizuki and his staff from the radiation of the atomic bomb dropped on Hiroshima is told on pages 77, 116, 148-49.

Chapter 8, “Recipes” (p. 193-234) includes many macrobiotic-style soy-related recipes and a special section titled “Tofu and Tempeh.” The chapter contains 13 tofu recipes, 7 miso recipes, and 4 tempeh recipes. The author received her degree in nutrition from the State University of New York. Address: Practicing nutritionist and health counselor, New York City.

3240. Shimoura, Michiko; Takahashi, Y.; Yoshimatsu, F.; Matsumoto, J.J. 1987. Kamasu sawara niku no misozuke shori ni okeru tekusuchaa to tanpakushitsu no henka [Changes in texture and proteins of wahoo (*Acanthocybium solanderi*) fish meat cured in miso]. *Kaseigaku Zasshi (J. of Home Economics of Japan)* 38(1):13-21. [11 ref. Jap; eng]

• **Summary:** Frozen wahoo fillets were cured in miso at 4°C for 28 days. The meat was very hard after 3 days of curing, but became tender after 21 days. Decomposition was attributed to the proteolytic enzymes of miso acting on the

fish meat proteins. Address: 1&3. Faculty of Domestic Sciences, Otsuma Women's Univ., Chiyoda-ku, Tokyo 102, Japan.

3241. Sonntag, Linda. 1987. *The little tofu book*. London: Judy Piatkus (Publishers) Ltd. 60 p. Illust. by Trevor Newton and Hanife Hassan. No index. 16 cm.

• **Summary:** Contents: What is tofu? Storing tofu. What to do with tofu. Tofu recipes. Dips and spreads. Tofu, the wonder health food. The food for the future. Tofu slimmers. Making your own tofu. The bonuses of making tofu: Go, okara, soya bean milk, yuba, whey. Tofu in Japan. Tofu in Indonesia. Tofu in China. Miso. Other titles in the series. Note: This book draws heavily on *The Book of Tofu* by Shurtleff and Aoyagi. Address: England.

3242. Yoshii, Hisao. 1987. Miso: Bean paste. In: *Traditional Foods and Their Processing in Asia*. Tokyo: NODAI Research Institute, Tokyo Univ. of Agriculture. vii + 235 p. See p. 74-81. [3 ref]
Address: Faculty of Agriculture, Tokyo Univ. of Agriculture, Tokyo, Japan.

3243. Zimmerman, Maureen Williams. 1987. *Sunset vegetarian favorites*. Menlo Park, California: Lane Publishing Co. 96 p. Originally published in 1983 as *International Vegetarian Cooking*.

• **Summary:** Written and compiled by the editors of *Sunset Books* and *Sunset Magazine*, this lacto-ovo vegetarian cookbook is different from a *Sunset* book by the same title published in 1981. It contains many recipes plus full-page color photos, and illustrations (line drawings) by H. Tom Kamifuji of various vegetables. The subtitle on the cover only reads: "Delicious recipes from around the world."

Chapter 1, titled "Vegetarian ways around the world," gives a good introduction to the subject.

Soy-related recipes include: Miso grilled mushrooms (Japan, p. 14-15). How long to simmer soybeans (p. 49). Homemade pasta—whole wheat & soy (p. 52). Golden tofu-cauliflower soup (Thailand, p. 34-35). Greens & tofu in peanut sauce (Thailand, p. 48). Stir fried tofu & vegetables (Vietnam, p. 50). Mandarin pancakes with spicy tofu filling (China, p. 70). Cornmeal soy crepes (p. 72-73). Address: Menlo Park, California. Phone: 415-321-3600.

3244. Brunthaler, Norbert. 1988. Re: Soyfoods made and sold by Sojvita. Letter to William Shurtleff at Soyfoods Center, Jan. 4. 1 p. Typed, with signature on letterhead. [Eng]

• **Summary:** "Thank you for your letter of Dec. 10." He gives the year and month that his company started to make and sell the following products: Tofu, Tofu marinated and baked, Tempeh, Sojanaise, Tofuburger, Tempeh vacuum

packed and stable, Tofu spread (4 kinds), Sojella (enriched soymilk), Soyoghurt with fruits, Natto.

"These are only our soy-products which we sell by ourselves or through distributors in Austria. (Furthermore we produce rice-wafers, seitan, gomasio, mochi.) We cannot say, which company is the largest in Austria, but we have the most different kinds of soyproducts. Our next competitor is: Sojarei in Baden and a smaller one is Tofurei in Wels. Furthermore there is only one Tempeh-producer in Vienna who sells tempeh and different cookies. These are all soy-producers in Austria. We hope we could help you with this information. With best regards. N.S.: Red miso and barley miso is in development since 1984." Address: Sojvita Produktions GmbH, Hauptplatz 1, Lichtenwoerth, Austria. Phone: 02622 / 75494.

3245. Miyazawa, Mitsuo. 1988. [Re: History of Sendai Miso Shoyu Co. Ltd.]. Letter to William Shurtleff at Soyfoods Center, Jan. 14. 2 p. [Jap; eng+]

• **Summary:** Although this company was founded in 1919, its roots go back to the late 1500s. In March 1593 (Bunroku 2) 3,000 soldiers of Idate Han (the former feudal domain in northeast Japan where Sendai is now located) went to Korea, led by Daté Masamuné (DAH-tay Mah-sah-MU-nay) in the army of Toyotomi Hideyoshi. It was found during the summer battles that the miso brought by the soldiers from most other Hans started to spoil; only that from Idate Han (Sendai) remained tasty, and it was shared with the other soldiers. From this time the fame of Sendai Miso began to spread throughout Japan.

During the Genroku Period (1688-1703) the miso makers in the Sendai area formed a trade group named Miso Nakama. "Nakama" means "colleague, fellow worker, comrade, or associate." They established rules and made miso under the motto "Examine the quality first." During the Kyoho Period (1716-1735) they started selling shoyu and the group changed its name to Miso Shoyu Nakama." Sasa Ju (Sasaki Jubei) joined this group in the year 1834 (Tempo 5) and worked to protect its quality and tradition. During the Taisho Period (1912-1916) the Japanese economy was strong and demand for miso and shoyu from the Sendai area increased. So in 1919 the members of the Miso Shoyu Nakama formed Sendai Miso Shoyu K.K., headed by a descendant of Sasaki Jubei with the same name. The current president of Sendai Miso Shoyu K.K. is the 8th generation named Sasaki Jubei.

Since the mid-1970s the company has exported quite a bit of its naturally fermented miso and shoyu to macrobiotic and natural foods companies in the USA and Europe. Address: Sendai Miso Shoyu Co. Ltd., Furujiro 1-5-1, Sendai 982, Japan.

3246. Van den Berg, H.; Dagnelie, P.C.; Staveren, W.A. van. 1988. Vitamin B-12 and seaweed. *Lancet* i(8579):242-43.

Jan. 30. [6 ref]

• **Summary:** “Neither in fermented soya products (tempeh, shoyu, tamari, rice miso, barley miso, tofu), nor in other fermented products (amasake rice, umeboshi prunes) did we find measurable B-12 (all below 0.02 micrograms per 100 g).” Tests done using both radioassay and *Lactobacillus leichmanii* showed that Spirulina and Nori (*Porphyra tenera*) were the two best vegetarian sources tested. But the B-12 in the nori does not appear to be available to the body. Its presence may be due to corrinoid-like B-12 analogues.

This study showed a tendency toward vitamin B-12 related anemia (not iron-related) in macrobiotic children who are generally vegan. A deficiency of vitamin B-12 in children can result in serious neurological damage. Address: 1. TNO-CIVO Toxicology and Nutrition Inst., 3700AJ Zeist, Netherlands; 2-3. Dep. of Human Nutrition, Agricultural Univ., Wageningen, Netherlands.

3247. Ohnishi, K. 1988. Miso jôzô ni okeru α -ka mai no riyô [Utilization of pre-gelatinized rice in the production of rice miso]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 83(1):30-36. [25 ref. Jap]
Address: Takeya-miso, Suwa, Nagano-ken 392, Japan.

3248. Ohnishi, K. 1988. [Utilization of pre-gelatinized rice in production of rice miso]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 83(1):30-36. [25 ref. Jap]*

3249. Shurtleff, William; Aoyagi, Akiko. comps. 1988. Marketing soyfoods—Labels, ads, posters, and other graphics: Miso and soy sauce. Lafayette, California: Soyfoods Center. 148 leaves. Illust. No index. 28 cm. Series: Marketing soyfoods.

• **Summary:** This book is a collection of black-and-white photocopies of materials ranging in date from 1975 to 1986. The books in this series, each a unique collection of graphic materials, are designed for a number of purposes: (1) To serve as a source of ideas, ingredients, inspiration, legal specifications, and basic guidelines for companies in the process of developing their own products, designing their own graphic materials, and conceiving their own marketing strategies. (2) To document the tremendous diversity of soyfoods products and the way that each is presented and marketed. (3) By arranging the materials in chronological sequence, to help document the development and history of new product categories and soyfood types, and with them the rise of the soyfoods industry and market in the Western World. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

3250. Nihei, Takao. 1988. History of amazake, sake, shoyu, and miso in Hawaii (Interview). *SoyaScan Notes*. Feb. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Phone interview followed by a letter dated Feb. 18. He has written a history of sake, miso, and shoyu in Hawaii and America (5 installments), which he will send. Sake was first made in Hawaii in 1908 by Honolulu Shuzo Seizo Gaisha; the brand was Takara Masamune. Mr. Nihei did research on shoyu and miso at the National Fermentation Lab (Jozo Shikenjo) in Japan with Dr. Nakano and knows our work. From there he got into sake. He doesn't know much about amazake but thinks that there are no publications on it and there was never a commercial amazake company in Hawaii. The reason for that is that since long ago everybody there has made amazake from sake lees, perhaps since 1908, and not from koji, though koji was sold before World War II. He moved to Hawaii in 1950 and many people were making amazake from sake lees at that time. They mix the sake lees with hot water, plus sugar and a little grated ginger. His wife's method is his favorite.

Recipe #1, Hawaiian Style Amazake from Glutinous Rice and Sake Lees: Cook 1 cup glutinous rice (incorrectly called “sweet rice” or “mochi rice”) with 3 cups water to make a porridge or gruel (*okayu*). Turn off heat and leave in covered pan for 10 minutes. When it is still fairly hot (50-55°C; 122-131°F), mix in 1 lb sake lees (sake kasu, which still contain some enzymes). Wrap the pot with towels or a blanket to keep the heat at about 130-140°F (this is important) and allow to incubate in a warm place for about 2-3 hours. When the mixture becomes soft, add 1 cup sugar and 3 cups hot water, then bring to a boil over low heat. To serve, mix 1 part of this base with 2 parts water; Enjoy hot or cold. Refrigerate leftovers in a sealed glass jar.

Recipe #2, Quick and Easy Hawaiian Style Amazake from Sake Lees (without Glutinous Rice). Mix 3 cups hot water with ¼ pound (about ¾ cup) sake lees. Let it stand for a while until the lees become soft. Heat on low heat, stirring gently until lumps dissolve. Stir in ½ to ¾ cup sugar and ¼ teaspoon salt. When it comes to a boil, add a little grated ginger juice immediately, and serve. Address: 422 Uhini Place, Honolulu, HI 96813. Phone: 808-537-1369.

3251. *Herald-Journal (Clarinda, Iowa)*. 1988. Iowa completes Japanese soybean market. Feb. 18. Also in *Herald-Patriot (Chariton, IA)*. Feb. 25. “Goal is Soybean Japanese Prefer.”

• **Summary:** Iowa farmers are trying to be more competitive in producing special soybeans for the Japanese. The Vinton and Pride soybeans, special varieties used in tofu, are large-seed, high protein. They have a yellow seed coat and a clear hilum. Other types of soybeans known as Prize and Iowasoy L5301 are used in preparing miso. In Iowa, out of 7,000 soybean farmers, only 100 farmers grow the special soybeans. There are no more than 100,000 acres in Iowa for producing special soybeans, which is a small amount. A

farmer takes some gamble because these special varieties of soybeans don't yield as much as regular soybeans. However, a farmer receives a premium for high quality special soybeans. The market is changing, becoming more specialized. To sell the special soybeans a farmer has to contract with one of the eight soybean exporters in Iowa. During the 1960s Japan received its food soybeans from the IOM, which stands for Indiana, Ohio, and Michigan.

3252. Belleme, John. 1988. Update on miso in America. How about amazake as a soymilk sweetener? (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mitoku (Mr. Kazama and Chris Dawson) is considering a joint venture with Sendai Miso Shoyu of a miso plant on the West Coast of the USA. This is still very tentative. They are also considering making amazake. But about 2 years ago Miyako Oriental Foods increased their miso production capacity. They can probably make over 1 million pounds a year now. It was about 600,000 lb/year. Fujiwara Brewing Co. in Okayama, which makes equipment for miso and soy sauce companies, supplied the equipment to Miyako. The company San-J finally used to build their tamari plant and supply the equipment was Fujiwara's competitor, Nagata. Steve Earle said this was the same company that had just helped expand the Miyako plant. According to the people at Ohsawa-America, Mr. Kitani, the Japanese man who makes Yamaki Shoyu, and Bob Kennedy, formerly of Chico-San are planning a miso plant in the USA, probably with automatic koji equipment.

John feels that sales of miso in America have slowed down and that if new companies enter the market, it will be oversupplied. At American Miso Co. his maximum capacity was about 400,000 lb/year. The volume hasn't changed much in the past few years. Christian Elwell at South River Miso Co. has a capacity for about 60,000 lb/year, which he hasn't reached. Both these are more expensive than Miyako (\$4.49 for American Miso white miso, Christian's is more, and Miyako's is about \$2.85/lb, or only 63% as much). He suggests: How about amazake as a sweetener for soymilk? It would replace barley malt and give the soymilk more body, kind of like a shake. Then you can put rice on the label. Great idea! Address: Route 5, Box 258, Rutherfordton, North Carolina 28139. Phone: 704-749-9537.

3253. Milbury, Peter. 1988. Chico-San, amazake, and rice syrup (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Peter believes that the earliest recipe for amazake in a U.S. cookbook was in Cornelia Aihara's *The Chico-San Cookbook*. This was later reprinted as *The Macrobiotic Kitchen* by Japan Publications. The original book was a labor of love by Cornelia for Chico-San, edited

by Peter Milbury and Dave Schleiger. Cornelia has always taught using amazake as a sweetener, and she prefers it to rice syrup. She has a wonderful cake, sweetened with amazake and with an amazake frosting. She was a pioneer in introducing amazake to America.

Junsei Yamazaki is now selling his own miso. He is at Route 1, Box 1333, Orland, CA 95963. Phone: 916-865-5979. The product name is Junsei Amazake Miso.

Concerning the future of amazake: "I think it's hot. It's just got nowhere to go but explode. It's such a wonderful product, with so many variations. All the beverages are now dessert drinks. Someone should make an amazake counterpart to soymilk, sold in larger quantities, with a smoother consistency, less solids, and less sweetness. Chico-San is now working on an amazake powder with California Natural Products (CNP); mix with warm water and serve as a drink. Rice syrup also has great potential as a sweetener. Chico San's Yinnies, a malted sweetener, were the first product of their type in America. Sjon Welters of Nasoya is at least thinking about using amazake as a sweetener for soymilk. Sjon spent a week in the Chico-San rice syrup operation before it was shut down and moved to CNP. The amazake used for Rice Dream is much sweeter than a typical amazake. "I think Rice Dream is one of the most fantastic products I've ever tasted. Originally Chico-San was going to make the product for him. Then we shifted down to CNP. One company that might have interest in amazake is JGR Resources, Inc. Dr. Adam Lambert is Technical Director. P.O. Box 97, Haskell, New Jersey 07420. Phone: 201-835-7644. Their product is Koji-Converted Rice-O-Sweet Brown Rice Syrup. They are a wholly owned minority corporation, that took over a brewery.

The first attempt Peter ever heard of to package amazake in Tetra Pak was in Jan. 1985, just after Heinz took over Chico-San. Bob Kennedy and he set up a run with Real Fresh in Visalia. Real Fresh botched the homogenization. By this time Chico-San had a lock-tight exclusive contract with CNP to make rice syrup and amazake just for them, using their rice. Chico-San set up CNP in the rice syrup and amazake business and spent enormous amounts of time showing them how to do it. Before that, starting in 1972, Chico-San made its own rice syrup in Chico using not koji but a combination of malted brewer's barley and commercial enzymes from Miles Laboratories. At that time CNP would make the amazake for Robert Nissenbaum, but Chico-San would do the billing. This changed after Heinz took over and couldn't meet their commitment to the contract with CNP. So CNP got out of the contract and dealt directly with Nissenbaum.

Milbury and Belleme say Macromuse (Peggy Rosoff; 301-656-4313, Bethesda, Maryland Circ. 12,000) is much better for long in-depth articles than East West. Address:

Lundberg Farm, Box 369, Richvale, California 95974.
Phone: 916-882-4551.

3254. Kushi, Aveline. 1988. Early imported amazake and miso in America (Interview). *SoyaScan Notes*. Feb. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Aveline recalls that she first saw amazake in America in Los Angeles in about 1970. She bought some at the time. It was a white rice amazake imported from Japan, probably in a plastic bag. She came to America in 1951 and by 1952 recalls seeing Hatcho miso being imported to the East Coast from Japan by Japan Foods. Address: Brookline, Massachusetts.

3255. **Product Name:** The Wizard's Sizzle. Spicy Barbecue Sauce.

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Tomatoes, cider vinegar, fruit juice concentrate, Barbados molasses, water, canola oil, cayenne pepper mash, shoyu soy sauce, miso, onion juice, garlic juice, The Wizard's magical blend of natural herbs and spices, sesame oil, sea salt, hickory smoke, seaweed extract.

Wt/Vol., Packaging, Price: 12 fluid oz (354 ml).

How Stored: Shelf stable.

New Product-Documentation: This was formerly Smoky Mountain Sizzlin', made by American Natural Foods and introduced in Sept. 1984. Label. 1988. 6 by 3 inches. Gummed glossy paper. Yellow, red purple, brown, black, and white. Illustration of a bearded wizard with hat, wand, and purple robe. Plus a dragon with fiery breath. "Makes any meal sizzle with sure-fire magic. Use your imagination and watch the magic make foods disappear. Contains nothing the least bit artificial or phony. Shake well and wake the dragon up. Wizard Baldour."

3256. **Product Name:** Premier Japan Natural Sesame Sauce. Gourmet Dip & Dressing.

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: 1115 Lousons Rd., P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Water, shoyu soy sauce, rice cooking wine (sake), sesame tahini, fruit juice concentrate, soy oil, rice vinegar, onion juice, toasted sesame oil, miso, arrowroot, sea salt, guar gum, mushroom & seaweed extract.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product-Documentation: Label. 1988. 6.5 by 3.5 inches. Glossy paper. Red, gold, orange, and black. Oval

silhouette of Kyoto pagoda against the sunset. "Gourmet International Cuisine. Nothing artificial. No MSG. Fruit Juice Sweetened. The Story of Premier Japan. Designed to introduce traditional Japanese cuisine to the world. "Japan's gourmet secret for bakes and broils. Use as a dressing for rice, vegetables and salads. Also great as a dip for chips and hors d'oeuvres." Chicken & tofu to perfection. A marvelous marinade too." Spot in Whole Foods. 1988. Feb. p. 58. Soya Newsletter. 1988. March/April. p. 8. These four new shoyu-based products are marinating- and dipping sauces, and dressings, part of the Premier Japan line of Gourmet Natural Products.

3257. **Product Name:** The Wizard's Hot Stuff. Spicy Hot Sauce.

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Cider vinegar, fruit juice concentrate, water, red miso, African bird peppers, umeboshi plum vinegar, garlic juice, The Wizard's magical blend of natural herbs and spices, sea salt, seaweed extract.

Wt/Vol., Packaging, Price: 5 fluid oz (147 ml).

How Stored: Shelf stable.

New Product-Documentation: This was formerly Wizard Baldour's Hot Stuff made by Elf Works; American Natural Foods and introduced in 1981. Label. 1988. 5.5 by 2.5 inches. Gummed glossy paper. Yellow, red purple, brown, black, and white. Illustration of a bearded wizard with hat, wand, and purple robe. Plus a dragon with fiery breath. "Hot Stuff adds sure-fire magic to all your favorite foods. Use your imagination and watch the magic make foods disappear. Contains nothing the least bit artificial or phony. Shake well and wake the dragon up. Wizard Baldour."

3258. Elliott, James G. 1988. Consumer attitudes regarding soy products. In: L. McCann, ed. 1988. *Soybean Utilization Alternatives*. St. Paul, MN: Univ. of Minnesota Center for Alternative Crops and Products. vi + 429 p. See p. 381-91. [3 ref]

• **Summary:** Discusses: Consumer awareness of soy foods. Consumers' awareness of manufacturers' use of soy protein. Consumer willingness to purchase meat products containing soy protein. People were asked, when you think of foods which are made from soybeans, what products come to mind? Unaided awareness of soyfoods among consumers was low, only 4 in 10 were able to name a specific soyfood on a top-of-the-mind basis. However, aided awareness was significantly higher. Soy sauce and soybean oil had the highest levels of aided awareness among consumers at 94% and 77% respectively. Tofu, soymilk, margarine, and soy nuts registered moderate levels of aided awareness at 45%,

38%, 38%, and 31% respectively. Tofutti came in next at 21% and miso came in last at 10%.

When asked if they had “ever tried” these products, of the eight soyfoods mentioned, soy sauce demonstrated the highest trial level at 75%. All other products “ever tried” were 20% or less. Respondents who had not tried a particular food product made from soybeans were asked if they would be willing to do so. Expressed willingness to try was in the 60% to 70% range. It was the highest for soybean oil, soy nuts, margarine, tofu and Tofutti.

65% of those surveyed responded positively when asked, “have you heard of soy protein being included in certain food products?” 35% were unaware. Among consumers who were aware that manufacturers use soy protein, 60% said that they were definitely using foods that contain soy protein, or believed that they were; 29% said they were not using them; and 11% didn’t know. When asked, “Does the fact that a food manufacturer uses soy protein in its products change your feeling about the company?,” 80% stated no difference; 8% stated that they felt better; and 12% said that they felt worse. Address: Manager of scientific communications, Protein Technologies International, St. Louis, Missouri.

3259. Golbitz, Peter. 1988. Whole bean soy products. In: L. McCann, ed. 1988. *Soybean Utilization Alternatives*. St. Paul, MN: Univ. of Minnesota Center for Alternative Crops and Products. vi + 429 p. See p. 325-31.

• **Summary:** Discusses: Tofu. Soymilk. Yuba or soymilk film. Fresh green soybeans. Whole dry soybeans. Soynuts. Soy sprouts. Tempeh. Soy sauce. Miso. Address: Soyatech, Bar Harbor, Maine.

3260. Takeuchi, T. 1988. Mame miso seizô to hinshitsu tokusei [Manufacture and quality traits of soybean miso]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 83(2):105-11. [6 ref. Jap]

• **Summary:** Quality traits include aroma and flavor. Address: Faculty of Home Economics, Gifu Women’s College, Gifu, Japan.

3261. Wood, Rebecca T. 1988. All-American miso. *Bestways*. Feb. p. 27.

• **Summary:** Prior to the 1970’s, miso was an unknown word—and taste experience—to most Americans. Today this traditional Japanese food, is fast becoming an important staple for the health conscious. Address: Crestone, Colorado 81131.

3262. Kanai, Noritoshi. 1988. Miyako Oriental Foods, Mutual Trading Co., Rice Koji, Amazake, Natto, and Miso (Interview). *SoyaScan Notes*. March 4 and 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mr. Kanai recalls that the brochure describing how to make miso and amazake using Cold Mountain Koji was printed in 1976, the same year the Miyako factory began. They immediately started to sell the koji, using the brochure. Miyako is owned 60% by Mutual Trading Co. and 40% by Yamajirushi Miso Co., a joint venture.

Mutual Trading Co. started to import Amazake from Japan to American in about 1968. He thinks they were the first company to do so. If that is correct, this would have been the first amazake sold commercially in the USA. The product was imported frozen in non-aseptic polyethylene bags. At the same time they imported frozen natto, and non-frozen miso and Hamanatto. Mutual Trading presently imports amazake in 6.3 oz (180 ml) cans. It is ready to drink. His amazake is made in Japan by Morinaga, the confectionery company, not the milk company. It is a real amazake, not a sake kasu type. Nishimoto also imports amazake in 6.3 oz tins; the brand is Imuraya. North American Food in San Francisco, a sister company (not a subsidiary) of Mutual Trading Co. Tokiwa in Los Angeles, Hosoda Brothers in San Francisco, and Central Boeki in Long Island, New York, probably do not import amazake. He thinks that total imports are about 1,000 cases a year. Mutual Trading imports about 200 cases a year (48 x 6.3 oz cans/case).

Miyako has recently reached its full capacity for making koji. So they are planning to expand by installing an automatic koji making machine. The machine has already been ordered from Nagata (preferred over their competitor Fujiwara) in Japan. The machine should be in Los Angeles in late April or early May, and start operation by June. He is thinking of adding barley miso and a new variety of rice miso. Now they use only half of the building’s floor space, so there is plenty of room for expansion. They plan to expand upward one level. Address: Los Angeles, California.

3263. Earle, Steve. 1988. Re: Answers to questions about history of San Jirushi. Letter to William Shurtleff at Soyfoods Center, March 7. 3 p. Includes a Sato family tree.

• **Summary:** No history per se of San-Jirushi has ever been written, however the Sato family has many records of historical interest. The original company, named Minato-ya (“Harbor Company”), was a trading house that traded up and down the rivers that empty into the Bay of Ise at Kuwana. Among the wares traded were salt, miso, and tamari. The miso and tamari were brewed in one of their warehouses (kura). Later this became Minato-ya’s principal business as the shipping trade moved north to Nagoya.

“There are indications that Minato-ya was already in operation at the beginning of the Edo period (1601), however it is not clear when it began producing miso and tamari as the earliest records were lost when the Minato-ya kuras were burned due to fire bombings in the Second World War...

“The company name was changed in 1909 from ‘Minato-ya’ to ‘Sato Shinnosuke Shoten’ and finally to ‘San-Jirushi Brewing Corporation’ in 1963.

“The original address was Ise-no-kuni, Kuwana-gun, Kuwana-cho Ooaza Senba.

“The original brand/trade name was Yamasan. The name and mark [three horizontal lines with a roof-like mountain over the top] symbolized Mount Tado (upriver just northwest of Kuwana) and the three rivers, Kiso, Ibi and Nagara...

“The mountain was dropped from the mark and the name changed to San-Jirushi in 1909. This name was officially registered in 1912.

“The original products were called ‘miso’ and ‘tamari’ (not ‘tamari-shoyu’). The original ingredients of Minato-ya’s miso and tamari were soybeans, water and salt. No wheat was used. There was also originally no *kosen* (roasted barley flour) used with the seed koji. This koji was called ‘tomo-koji’ and was made by obtaining koji-dama (half-fist sized balls of compressed, cooked soybeans) which were then hung in straw sacks over the rafters in the kura loft to incubate. In these days there were apparently tradesmen, much like the ‘tunjishi’ in sake brewing, who made a circuit of miso and tamari brewers, bringing with them tomo-koji. There is still one employee of San-Jirushi who can recall making koji by this method in the old San-Jirushi kura.

“San-Jirushi began using seed koji [koji starter] in 1933. Koji-ya Sanzaemon, the koji house that still supplies San Jirushi today, has been in operation continuously since the Muromachi period supplying seed koji for sake manufacture, however this technology was not applied to miso and shoyu manufacture until quite late (Kikkoman and the four major shoyu brand makers began using seed koji at about this same time).” Address: UN Park Building, 7th Floor, Ebisu-Nishi 1-19-6, Shibuya-ku, Tokyo 150, Japan. Phone: 03-780-5933.

3264. Ballard, Bob. 1988. History of Great Eastern Sun (Interview). *SoyaScan Notes*. March 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The company was founded in March 1982 by Barry Evans (who is now the sole owner and lives in Los Angeles). He may have been joined by Martin Roth and John Belleme. The original purpose was to be a distributor for the miso made by American Miso Company. But it soon decided to import Japanese macrobiotic products from Mitoku (the first order was placed in Jan. 1982) and later became a manufacturer. Address: 92 Macintosh Rd., Asheville, North Carolina 28806. Phone: 808-438-4730 or 704 252-3090.

3265. DeBona, Don. 1988. Re: History of The American Miso Co. Letter to Bob Carr at Cleveland East West Center, March 13. 6 p. Handwritten.

• **Summary:** “The American Miso Co. was begun in 1979 by Barry Evans, Sandy Pukel, Joe Carpenter, John Belleme, Michio Kushi, James Kenney, and several other partners. It was arranged for John Belleme and his wife to travel to Japan and study for 7-8 months with the Onozaki family of traditional miso makers. John Belleme returned and began making traditional miso for the then named Oak Feed Miso, Inc., previously called the Erewhon Miso Co., and presently the American Miso Co.

“Meanwhile, Barry Evans began a new company in order to distribute our miso. This company was, and still is, called The Great Eastern Sun Trading Co., located in nearby Asheville, North Carolina. Barry Evans eventually became the sole owner of the American Miso Co. also. I came to work for Great Eastern Sun in 1983. Prior to this I had worked for several years for Laurelbrook Foods, a large natural foods distributor in Maryland, and then on a Permaculture farm along the Maryland/Virginia border for two years growing organic winter wheat, barley, soybeans and summer produce according to the principles set forth in Masanobu Fukuoka’s classic, *The One Straw Revolution...* We still do some farming and quite a bit of gardening on our 100 acres here at American Miso Co., in the foothills of the Blue Ridge Escarpment. I met my wife at a macrobiotic study house in 1980.

“We arrived at American Miso Co. in February 1985 and I took over the position of miso maker after John Belleme’s departure in December 1985 [Note: Belleme was fired by Barry Evans.] I was trained to make miso by Akinori Takei, my Japanese teacher and friend, who had also studied with the Onozaki family in Japan. Takei-san remained with me for approximately another year; since then I have been on my own. We are a small enterprise and make approx. 250,000 lb of miso a year with only 3 employees and myself. We make all of our own koji (both barley and rice) by hand in a centuries-old fashion.” Address: Route 3, Box 541, Rutherfordton, North Carolina 28139.

3266. DeBona, Don. 1988. Developments at American Miso Co. since 1985 (Interview). *SoyaScan Notes*. March 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Don left his job as general manager at Great Eastern Sun and began to work at American Miso Co. (AMC) in February 1985. He took over management of the company in December 1985 after John Belleme left. It was a difficult transition, as Belleme and Barry Evans (an absentee owner) did not get along well. Since then, production of miso has roughly doubled, from 9 to 20 large miso vats. His miso teacher, Akinori Takei, stayed until October 1986. Since then Don has run the company. Not much of their miso is used any more in second generation products; they used to sell some mellow white and red miso to Nasoya and Simply Natural. Now 95-98% is sold for kitchen use in plastic tubs. The tubs replaced plastic bags 2

years ago. He also sells in bulk: 35 or 50 lb. He has always used all natural, organic ingredients, which makes his miso about twice as expensive as Cold Mountain. So they lost all their sales to food processors. But total volume has increased due to good sales work. His best-sellers are mellow white miso and traditional country (long-term) barley miso, followed by mellow barley, traditional red rice miso, and sweet white miso. He has ordered his koji starter through Mitoku for the last few years. Now he hopes to buy direct from Kojiya Sansanaemon in Aichi-ken. Don has studied macrobiotics for 12 years. AMC originally had 6 owners; Barry Evans now owns about 95%. Barry originally paid for John Belleme to study miso in Japan. Address: Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

3267. *Essen und Trinken (Hamburg, W. Germany)*. 1988. Tofu-Diaet [Tofu diet]. 3:112-14, 116, 118, 120, 122, 124, 126, 128-30, 132. March. [Ger]

• **Summary:** A spectacular article preceded by a 1-page praiseful editorial on tofu titled "The Frog Becomes a Prince: Tofu Reveals Charm," by Angelika Jahr, the head editor of "Eating and Drinking." The first two-thirds of the article is in color, consisting mostly for large color photos of tofu dishes, with calorie counts; the last third is the recipes. There are also brief descriptions of miso, shoyu, and gomasio [gomashio] as typical Asian seasonings. Address: Postfach 30 20 40, 2000 Hamburg 36. Phone: 040 41 18(1).

3268. Filling a wooden vat of miso at American Miso Company (Photograph). 1988.

• **Summary:** This 4 by 6 inch color photo, dated March 1988, shows three workers (men) by a wooden vat of miso at the American Miso Co. in North Carolina. All are dressed in rugged yellow vinyl aprons and light shirts. One is standing on the floor, with his left arm held up against the ladder. The second is standing on the ladder. The third, Don DeBona, is hunkering down atop the vat.

3269. **Product Name:** Homestyle Ravioli [Tempeh Marinara, Tofu with Spinach, or Cheese Italiano].

Manufacturer's Name: Homestyle Foods (Formerly Sonoma Specialty Foods).

Manufacturer's Address: 2317 Bluebell Dr., Santa Rosa, CA 95401. Phone: 707-525-8822.

Date of Introduction: 1988. March.

Ingredients: Tempeh: Whole wheat durum and semolina flours, water, tempeh, tomatoes, onion, soy oil, garlic, miso, honey, natural herbs and spices. Tofu: Whole wheat durum and semolina flours, water, Homestyle Tofu Cottage Salad, Spinach, whole wheat bread crumbs, herbs, garlic and spices.

Wt/Vol., Packaging, Price: 14 oz 48 ravioli.

How Stored: Frozen.

New Product–Documentation: Interview with Dennis Hughes. 1988. Feb. 15. This product will be out shortly. Sales to local stores of all products are about \$165,000, which is about half of the company's total sales. Of the \$165,000 roughly 1/3 is products made by Homestyle; 2/3 is complementary products (mostly soyfoods) made by other companies. Roughly 3/4 of their total products are soyfoods. The company started distributing other manufacturer's soyfoods in about August 1985. Before that (7 years ago) they started to distribute a local pasta and gourmet sauce.

Label. 1988. March. Paperboard box. 10.5 by 7.5 by 3/4 inches. Red, green, and black on white. Front panel has a red, black, and green drawing of a plate of ravioli with a wine glass and salad. "No eggs. All natural. No artificial ingredients or preservatives. Non-dairy. Cholesterol free."

Leaflet from World Vegetarian Day in San Francisco. 1990. Oct. 6. Cheese Italiano is a new flavor in the ravioli line. It contains cheese but no eggs.

Talk with David Burns of Homestyle. 1990. Oct. 9. This product was introduced in about May or June of 1988. The name of the manufacturing side of the company changed from Sonoma Specialty Foods to Homestyle Foods in Oct. 1987.

3270. Hondo, Satoshi; Yasuhira, Hitomi. 1988. Shuseibun bunseki-hô ni yoru shihan miso no kaiseiki [Application of principal component analysis method to the evaluation of miso on the market]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 29. p. 67-73. [6 ref. Jap; eng]

• **Summary:** Principal component analysis and multiple regression analysis were applied separately to the evaluation of Japanese light yellow and red miso, sold at retail stores.

3271. Hondo, Satoshi; Yasuhira, Hitomi. 1988. Taipu no kotonaru tane kôji-kin ni yoru miso no shijô. III. Tane kôji-kin to miso hinshitsu no kankei [Fermentation of miso using various koji molds. III. Effect of koji mold on the quality of miso]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 29. p. 14-19. [14 ref. Jap; eng]

• **Summary:** Koji variants used to produce rice miso, barley miso, soybean miso, sake, shochu, soy sauce, etc. (*Aspergillus oryzae* and *A. Sojiae*) were evaluated, as regards such attributes as growth rate, fermentation products, enzymic activity and sensory quality.

3272. Imai, Manabu; Osawa, Y.; Nakamura, M.; Yasuhira, H. 1988. Chakushoku o yokusei-suru koen-sei nyûsan-kin no kensaku. II. [Selection and use of decolorizing strains of *Pediococcus halophilus* (in miso production). II.]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 29. p. 37-41. [3 ref. Jap; eng]

3273. Ito, Kimio; Yasuhira, Hitomi. 1988. Kônôdo shokuen, gurukoosu sonzaika ni okeru *Bacillus subtilis* no dôtai [Behavior of *Bacillus subtilis* at high concentrations of NaCl and/or dextrose (in miso)]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 29. p. 25-32. [16 ref. Jap; eng]

• **Summary:** Behavior of *Bacillus subtilis* at high NaCl and/or dextrose concentrate was examined, to evaluate the hygiene of miso. Growth, germination and sporulation were completely inhibited by 20% NaCl alone, 10% NaCl/20% dextrose or 15% NaCl/10% dextrose. Critical water activity for growth was 0.88.

3274. Leneman, Leah. 1988. Leaders of the soya revolution. *Vegan (The) (England)*. Spring. p. 20-21. [7 ref]

• **Summary:** The author, "herself an established authority on culinary applications of the soya bean, looks at the work of William Shurtleff and Akiko Aoyagi, the unsung heroes of the soya revolution." "It is possible that the books they have written which are not known to the general public may have had an ever greater influence than those which are—books like Tofu & Soymilk Production... Their books have provided the wherewithal for eager young entrepreneurs to move confidently into soya foods production, and the growth rate in this industry has been quite phenomenal, not only in the USA but on the continent and in Great Britain as well." Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

3275. Lubbe, James. comp. 1988. Abbreviated history of the Bountiful Bean Plant, Madison, Wisconsin. Bountiful Bean, 2049½ Atwood Ave., Madison, WI 53704. 23 p. Unpublished manuscript. [4 ref]

• **Summary:** The company was founded in 1978. 1. History table by year showing accounts, products, equipment, number of people, wages, other. 2. Newsletter and newspaper ads and articles. 3. Brochures, product announcements & job application descriptions. 4. Product labels.

Ad. circa 1983-84. Bountiful Bean Soyfood Deli. Macrobiotic dietary principles. Offers: fresh tofu, tofu pies, tabooli, toasted tofu, nori rolls, 4 soymilk flavors, 4 varieties of bulk miso, millet / tofu pudding, nutburger sandwiches, tempeh books, mini-tours of plant, spicy tofu, more! And: lowest soyfood prices in town, free samples and recipe sheets, managed by the workers. low-cost carry-out foods. 903 Williamson St. 251-0595. from: 7-6 Sun-Fri.; 7-4 Mon.; 10-4 Sat.

Update talk with Deborah Bachmann and Elizabeth Hanson. 1991. Nov. 1 and 11. In March 1990 Bountiful Bean Soyfoods moved from Madison, Wisconsin, to 620 Main St., Ridgeway, Wisconsin. Richard Kraemer and Elizabeth Hanson began to produce soyfoods during the last week in June, renting from the cooperative, then they

purchased the business on 21 Aug. 1991. Richard and Elizabeth are married with a son, are in their late 40s, and come from Oseola, Wisconsin; he is a carpenter (and was a pastor) and she a nutritionist. They are both very enthusiastic about tofu and the business. The co-op has now been changed to a private business. They work full time and they have three employees—1 full time and 2 part time. They are thinking of re-launching tempeh and soy yogurt. The cooperative got what they felt was a good price for the business. People who worked more than 6,000 hours (Chris Burant [8 years], Deborah [almost 10 years], and a woman named Solie) each got a large chunk. Another 11 people who had worked in the past were also given part of the money. The smallest amount of money distributed was \$250.00. Deborah and James Lubbe are no longer with the company. Bountiful Bean Soyfoods now makes tofu, Herb Tofu, plain or vanilla soy milk, Tasty Tofu, Hummus with Tofu (and garbanzo beans), and Taboolie with Tofu (salad, which also contains bulgar). They have discontinued tempeh and soy yogurt.

Update: Talk with Roger Bindl. 1993. April 15. Richard Kraemer would like to sell Bountiful Bean in Ridgeway and Roger is considering buying it. 85% of the company's sales are in Madison, Wisconsin. Address: Madison, Wisconsin.

[2 ref. Jap; eng]

• **Summary:** These bacteria belong to the family Lactobacillaceae.

3278. Sato, Masashi; Yasuhira, Hitomi. 1988. Kôn jukusei miso ni tsuite [Studies on miso fermented at high temperature]. *Shinshu Miso Kenkyusho Kenkyu Hokoku*

(*Report of the Shinshu-Miso Research Inst.*) No. 29. p. 20-24. [2 ref. Jap; eng]

• **Summary:** Miso containing 50% koji and 0-6% NaCl was fermented at 47, 50 and 53°C and evaluated for pH, microbial flora, acidity, color, sugar concentrate, free amino acid levels, etc. Higher temperature favoured acidity development due to bacterial action. Color of miso fermented for 3 days at 50°C was equivalent to that of miso fermented at 30°C for 30 days, but free amino acid concentrate in the former was lower than that in the latter. Fermenting 3% NaCl miso at 50°C for 3-5 days, followed by 30°C for 10-12 days, produced an acceptable miso.

• **Summary:** Effects of solid particle size distribution and level in soybean miso on sensory quality of miso soup were examined. Particles less than 170 mesh sieve size had most influence on soup attributes.

3282. Yokota, Yoshiko; Taguchi, T.; Nakamura, M.; et al. 1988. Shihan miso no bunseki kekka ni tsuite [Analytical results of miso on the market]. *Shinshu Miso Kenkyusho*

Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.) No. 29. p. 48-57. [3 ref. Jap; eng]

• **Summary:** The 25th study meeting of miso on the market was held. 189 miso samples of various types sold at retail stores were evaluated for sensory quality; 120 of these were analyzed for physicochemical characteristics. Total sugar concentration averaged 17.5%. Rate of protein hydrolysis was related to NaCl and sugar concentration, and affected miso texture. Moisture, nitrogen, pH, acidity and color were also examined.

3283. Layton, Lyndsey. 1988. County's health food industry is still strong... despite some producer setbacks. *Recorder (Greenfield, Massachusetts)*. April 29.

• **Summary:** Tempeh Works attempts to borrow \$500,000 for future expansion of the company's plant. The tempeh company is just pulling out of a three-year slump period of heavy losses to enjoy a 40% annual growth rate. It would like to double the size of its Fairview Street plant from 6,000 square feet to 12,000 square feet. But the company's recent shaky past, combined with the Tomsun/Country Dairy experiences, have made it tough to win confidence from lenders. Tomsun will stay in operation despite the fact the 11-year-old company filed for protection earlier this month under Chapter 11 of the U.S. bankruptcy code. Last week, Tomsun secured a \$150,000 loan from the Springfield based Bank of Western Massachusetts to pay some of its debts and keep the operation going. Tomsun executives blame the company's troubles on recent challenges in its northeast tofu market by two tofu makers from outside the region. Currently, Tomsun has 50% of that market.

Tofu has become a commodity where the person who can turn out large amounts can sell it the cheapest. In 1982, Tomsun was the 3rd largest tofu maker in the nation; it has now dropped to 4th place. South River Miso Co. produces about 300,000 lb of miso each year in 5 to 8 different varieties. Annual sales hover around \$40,000. Tempeh Works has only one serious national competitor that is based in Boulder, Colorado.

3284. **Product Name:** International Mustard Oriental Miso [Mellow].

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: 1115 Lousons Rd., P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. April.

Ingredients: Stoneground mustard seeds, vinegar, organic mellow barley miso (organic soybeans, organic barley, water and sea salt), natural herbs, spices and sea salt.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product-Documentation: Label. 1988. 2.75 by 2.5 inches. Wider at bottom than top. One label on front and

one on back. Parchment and black on red. On back: "Oriental Miso Mustard. Mellow, rich, and full-bodied, this delicious condiment derives its savory magic from exclusive Oriental ingredients. It brings your foods a zesty flair, while it enhances even delicate flavors. Powerful yet subtle. An Oriental art." Note: This product is closely related to Naturally Preferred Miso Mustard, formerly made by American Natural Foods, launched Sept. 1984. *Soya Newsletter*. 1988. March/April. p. 8. May/June. p. 8. This spicy mustard containing miso is one of three flavored mustards that they sell.

3285. Product Name: Organic Rice Miso, and Organic Brown Rice Miso.

Manufacturer's Name: Junsei Yamazaki.

Manufacturer's Address: Route 1, Box 1333, Orland, CA 95963. Phone: 916-865-5979.

Date of Introduction: 1988. April.

Ingredients: Brown rice: Organically grown soybeans, organic brown rice, well water, sea salt.

Wt/Vol., Packaging, Price: Bulk. 15 lb costs \$72.00 incl. shipping.

How Stored: Shelf stable.

New Product–Documentation: Yamazaki. 1987. *The Junsei Yamazaki Miso and Umeboshi Story*. 6 p. Talk with Kazuko Yamazaki. 2001. April 20. Miso pioneer Junsei Yamazaki, her husband, died last year. She is still selling the miso he made but not making any new miso. The company name is now Yamazaki Miso Co. The county changed the address to: 4192 County Road S., Orland, CA 95963. She sells the miso through Gold Mine Natural Foods in California and the Grain and Sakt Society (distributor).

3286. Nikkuni, Sayuki; Okada, N.; Itoh, H. 1988. Effect of soybean cooking temperature on the texture and protein digestibility of miso. *J. of Food Science* 53(2):445-49. March/April. [28 ref. Eng]
Address: National Food Research Inst., Ministry of Agriculture, Forestry & Fisheries, Tsukuba, Ibaraki 305, Japan.

3287. Pecjak, Marinka. 1988. *Soja v kulinariki [Soybeans in the kitchen]*. Ljubljana, Yugoslavia: Feniks. 138 p. Illust. Plus 16 pages of color plates showing recipes. 21 x 30 cm. [Slv]

• **Summary:** Features 300 recipes that use soybeans and soyfoods. Contents: Introduction: In the beginning there was the soybean, almost anything can be made from soya (a diagram shows many food and non-food products), soya is concentrated, soybeans in cuisine, how to use these recipes. Whole soybeans (p. 17): Recipes for coffee, different kinds of spreads, salads, soups, green soybeans with rice, dips with whole soybeans, soybeans with mushrooms, patties,

soybean roast, sausages made of whole soybeans, stuffed duck, stuffed trout.

Soybean flakes and textured proteins (p. 40): Spread, party balls, filled bread, soups, pancakes, Australian pie, Buckwheat with flakes, flakes in mushroomy sauce, baked potatoes, stuffed cabbage leaves, chilled stuffed tomatoes, stuffed roasted peppers, stuffed eggplant.

Soy milk and dairylike products (p. 74): Various spreads, soups and salads with herbs, pancakes, baked potatoes, baked noodles, soy pudding, soy milk ice cream, avocado milk. Soy flour and semolina (p. 111): Soy noodles, pasta, pancakes, fish balls, soy bread.

Soy sprouts (p. 122): Soups, salads, sprouts with potatoes, chicken with sprouts and wine, pork with sprouts. Soy sauce and other forms of fermented soybeans (p. 128): Chart showing fermented soy products (incl. miso, tempeh, sufu, natto), salads, soups, chicken with sprouts and soy sauce, meat with fermented black soybeans, roast cutlets, Hoisin dip.

3288. Shurtleff, William; Aoyagi, Akiko. comps. 1988. *Bibliography of miso and soybean chiang, from 5th century B.C. to 1988: With 1250+ references*. Lafayette, California: Soyfoods Center. 118 p. Subject and country index. Partially annotated. Printed April. 28 cm. [1254 ref]
• **Summary:** The most comprehensive bibliography on the subject. Contains all known commercial products. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

3289. Wollner, Joel. 1988. Soy-based cheeses—Concerns for the consumer. Can a traditional product be patented. *Soya Newsletter (Bar Harbor, Maine)*. March/April. p. 2.

• **Summary:** In this letter to the editor, the writer is concerned about two issues raised in the article titled "Soy Cheese Market" (*Soya Newsletter*, Jan/Feb. 1988). He wonders to what extent the present success of soy cheese in the natural foods marketplace is based on consumers' lack of awareness that casein is a dairy product. His own informal survey, conducted shortly after *Soya Kaas* was first introduced and already finding widespread acceptance, found very few consumers who knew that casein is derived from milk. "In fact, over 90% thought *Soya Kaas* was strictly vegetarian, containing no milk-derived ingredients."

He is also shocked that Simply Natural has patented a product (named *Soyalite*) made by fermenting fresh tofu in miso and discovered by accident. This process "is well known and practiced by thousands of people all over the United States, and has been since the late 1970's. I first learned of 'miso-pickled tofu' (as we called it) in 1978, while manager at Erewhon Natural Foods retail store in Boston [Massachusetts]. One of our employees had learned the process while studying with Noburo Muramoto, a teacher of Oriental food-crafting in Escondido, California.

Her miso-pickled tofu was a big hit among the Erewhon staff, and we began selling it ready-to-eat in the store and published the recipe in our weekly consumer newsletter. Soon after, miso-pickled tofu became a favorite dish among Boston's diverse natural foods community, and found a place in the menus of local natural foods restaurants." Address: Director, Mitoku USA Inc., New York.

3290. Pirello, Christina Hayes. 1988. Brief history of Simply Natural, Inc. (Interview). *SoyaScan Notes*. May 11 and June 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In December 1984 Robert Pirello started Simply Natural, a natural foods vegetarian catering company. In 1984 Christina had sold her design company in Florida and moved to Philadelphia, where she worked as a freelance designer. Her mother had died recently and she had been diagnosed as having cancer. She was a vegetarian when she met Robert, a macro, who introduced her to the macrobiotic diet. Christina joined Robert's company while recovering from cancer. She left the advertising field completely to concentrate on getting well and running Simply Natural.

One of the catering company's first products was tofu cheese, made by wrapping a firm cake of tofu in cheesecloth, embedding it in sweet white miso, and allowing it to ferment at a controlled temperature for several days. This product was made using the traditional Japanese process for *Tofu no Misozuké* (Tofu Pickled in Miso), which they learned from *The Book of Tofu* (page 110) by Shurtleff and Aoyagi. These firm little bricks, served as a cheese with crackers, became their showcase item. (Note: A similar product, called Tofurin, had been developed by Nov. 1983 by Manna in the Netherlands). But they also made many other tofu dishes such as various types of stuffed agé (tofu pouches), tofu dips, quiches, stuffed loaves, pates. You name it, they did it. They purchased their tofu from a company named Fresh Tofu in Easton, Pennsylvania.

In December 1984 a group for whom they were planning to cater a Christmas party requested a non-dairy cream cheese dip. Robert tried pureeing their tofu cheese in a blender and discovered a revolutionary new product—A non-dairy tofu-based cream cheese. To this they could add flavors, such as garlic powder, onions & chives, or herbs. This soft tofu cheese, served as a non-dairy party dip, became their second showcase product. In the spring of 1985, Cynthia Schwartz, a friend who owned Center Foods, a leading natural/health food store in Philadelphia, asked if she could try to sell their soft tofu cheese. Bearing the label Simply Natural Soft Tofu Cheese, their first commercial product sold very well. Soon they were selling it in several stores, delivering it out of the back of the car. Within 4 months, they had distributors in Pennsylvania competing with one another to sell the product. Finally in October

1985 they signed an 6-months exclusive distribution agreement with Jerry Schwartz and Earthy Organics, a Delaware Valley natural foods distributor. Sales grew rapidly and by year's end other major East Coast distributors were clamoring for the product. Jerry kindly let go of his exclusive and Soft Tofu Cheese was soon being carried by Cornucopia (Rhode Island, from Dec. 1985), Stow Mills (Vermont, Dec. 1985), and Tree of Life (Florida, Jan. 1986). In January 1986 Jerry Schwartz introduced them to their first West Coast Broker, Roberta Fleischer, of California. Distribution began there in March. Now sales began to skyrocket. Robert and Christina soon realized that they were in the wrong business. In May 1986 they dropped the catering business and transformed it into a tofu product development and marketing company. But problems also began to grow. As the warm weather of spring came, the Soft Tofu Cheese, made by people with a limited knowledge of microbiology and plant sanitation and now sold throughout the East Coast, began to spoil. Sales plummeted. By hiring food specialists took and obtaining help from Dr. H.L. Wang of the USDA Northern Regional Research Center at Peoria, Illinois, they were able, largely by trial and error to finally get the problem under control.

In August 1986 they moved from their plant in Philadelphia into a larger facility in Norma, New Jersey. The plant's owner, Bill Schroeder, wanted to buy into their company. So they incorporated, he let them use the plant rent free, and he invested a little capital, which they used the funds to pay off past debts incurred because of the spoilage problems. The next challenge was to develop and manufacture a line of second-generation tofu products using their Soft Tofu Cheese. Continuing to buy their tofu from Fresh Tofu, they launched Antonio's Simply Natural Tofu Pasta (Oct. 1986, fresh pasta products stuffed with their Soft Tofu Cheese) and a line of Creamy Miso Dressings (Dec. 1986, made with the sweet white miso in which the tofu had been ripened). In October 1986 they started advertising the new line in *Vegetarian Times*. In October 1987 they were granted a patent on the process for their Soft Tofu Cheese, and in April 1988 a second patent on the end product. Also in October they repositioned and repackaged their product line to cross over into mainstream markets. Soft Tofu Cheese was renamed Soft Soyalite and Antonio's Pasta was renamed Pasta Lite. Christina and Robert were married on 31 December 1987.

In mid-1988 Nasoya Foods in Leominster, Massachusetts, began tests on making and pasteurizing Simply Natural's Soft Soyalite. In early 1987 they had discussed the possibility of a merger with Nasoya, but they were not as interested in this as Nasoya was, in part because Nasoya could not solve key pasteurization and product flow problems. They are now negotiating their first real outside financing with Leo Blank, who would like to buy Bill Schroeder's stock, and give them substantial capital. They

will soon be closing their plant in Norma, New Jersey. Christina and Robert will be out of manufacturing, able to focus their full attention on marketing and product development. Their pasta products are now made at Mays Landing, south New Jersey and their miso dressings by Alpha-Pak in San Pedro, California (using both Cold Mountain Miso and miso recycled from the Soyalite). The future looks very bright.

Richard Rose. 1988. May 13. Adds: He was told by Wally Rogers and Tim Huang that in the late 1970s The Soy Plant in Ann Arbor, Michigan, developed a "Tofu Cream Cheese," similar to Simply Natural's original firm Tofu Cheese (unblended, in a block) and sold it in their deli. A guy from West Virginia showed them how to make it. Christina confirms this: A tall, thin bearded man [not Steve Fiering] tasted their Soyalite at Anaheim in April 1988. He said that he or someone he knew had sold a similar product in a firm brick form. But he was never able to develop a good flavor and the product never sold well [See 1988 interview with Steve Fiering]. July 28 update: Nasoya appears to have solved the pasteurization and hot-pack problem. Christina enjoys working with Nasoya, a company with very similar principles and beliefs about food.

Update: 1998 Sept. 20. Christina Pirello now has a cooking and food show on PBS-TV. Her latest book is titled "Cooking the Whole Foods Way." Address: P.O. Box 295 (Evelyn & Gershel Aves.), Norma, New Jersey 08347. Phone: 609-691-5866.

3291. Belleme, John. 1988. The great Japanese foods face-off: Are natural brands a better buy? *East West*. May. p. 26, 28-35.

• **Summary:** Contents: Introduction. Shiitake mushrooms. Wakame (sea vegetable). Udon. Toasted sesame oil. Complex fermented foods: Rice miso, rice vinegar. Sea salt. The Oriental foods industry in the USA dwarfs the Japanese natural foods industry. Annual sales of JFC International Inc. [affiliate of Kikkoman] alone, about \$180 million, is about ten times that of the entire Japanese natural foods industry in the United States. Oriental foods sell for about half the price of natural foods. Mitoku's special quality miso is made by Takamichi Onozaki of Yaita, Japan. Eden Foods' miso is made by Toshi Shiroozu of Fukuoka, Japan. Also discusses rice vinegar quality.

Note: This article is a thinly disguised advertorial for Mitoku products.

3292. Bruce, Gene. 1988. The myth of vegetarian vitamin B-12. *East West*. May. p. 44-55. Summarized by Judy Brown in *Soya Newsletter*. 1988. May/June. p. 7. [4 ref]

• **Summary:** Although the requirement for B-12 is the lowest of all vitamins and the body can store a supply to last many years, alarming deficiencies of vitamin B-12 have been found in vegetarian children leading to serious

physical and mental retardation, and neurological damage. The effects begin with numbness and tingling of the hands and feet. Although numerous studies have shown fermented foods made in traditional societies to have significant B-12, when these foods are made under sanitary conditions in industrialized countries, the B-12 is generally lost. Recent studies suggest the presence of a false B-12 or B-12 analogue that some laboratory tests (such as the microbiological assay using *Lactobacillus leichmanii*) have mistaken for the real thing. Bonny Specker, PhD at the Univ. of Cincinnati, Ohio, and J. Gorstin at Vanderbilt Univ. in Nashville, Tennessee have studied B-12 levels in tempeh, miso, and tamari. Only negligible to trace amounts were found. Significant amounts were found in sea vegetables and spirulina. Specker analyzed blood serum and urine samples of 169 macrobiotic adults and children. Very low levels of B-12 were found. At the Agricultural Univ. of Wageningen in the Netherlands, Peter Dagnelie was undertaking a similar project, checking the blood of 50 macrobiotic children. He found deficiencies of vitamins B-12, D, and B-2, plus protein, calcium, iron and calories.

U.S. tempeh makers, when asked to recheck their tempeh, found that it presently contained no B-12. Most are taking claims about vitamin B-12 off their labels after conducting their own tests and obtaining similar results. According to Dr. Keith Steinkraus, the most probable explanation for the loss of B-12 in U.S. tempeh is improved sanitation and the fact that the B-12 producing bacterium cannot compete with the abundant mold in properly inoculated tempeh.

Good non-flesh sources of B-12 are milk (whole or nonfat, 0.9 micrograms/8 oz), cheese (0.9 micrograms/3 oz), and egg (0.6 micrograms/large egg). In conclusion, lacto-ovo vegetarians are probably getting enough B-12. Strict vegetarians (vegans) are advised to take a B-12 supplement. Without further research concerning B-12-analogues in sea vegetables and microalgae, there are no reliable vegetable sources of B-12. Address: Boston, Massachusetts.

• **Summary:** The youth market and food consumption in Japan.

3294. **Product Name:** Mindi's Miso Salad Dressing.

Manufacturer's Name: Natural Pacific.

Manufacturer's Address: P.O. Box 4352, Hilo, Island of Hawaii, HI 96720. Phone: 808-935-3220.

Date of Introduction: 1988. May.

Ingredients: Soybean oil, water, brown rice miso (soybeans, brown rice, water), rice vinegar, onion, sesame seeds, sesame oil, garlic powder, honey, herbs & spices.

Wt/Vol., Packaging, Price: ½ pint (8 oz), pint, and half gallon.

How Stored: Refrigerated.

New Product–Documentation: Talk with Ty Katibah. 1989. Nov. 22. This product was launched in April or May of 1988. It is doing pretty well. Some is sold at The Real Food Company in San Francisco. Label. 1989, Dec. Received. 2.5 by 2.75 inches. Rounded top. Self adhesive. Red and blue on white. Illustration of sun over mountains. “Free from preservatives and artificial additives.” Address is now P.O. Box 11001, Hilo, Hawai’i 96721. Phone 808-935-3220. Note says they began producing in Oct. 1988.

• **Summary:** This report was prepared by Owen Dobbyn, John Cunningham, Maurice Waddick, and Fred Brandenburg of OSGMB. Contents: Japan. The Japanese soybean market. Visits: Japan Miso Co-operative Industrial Assoc. (M. Iida, chairman), Japan Packaged Tofu Assoc. (H. Kijima, Exec. Secy.), Federation of Japan Natto Manufacturers Cooperative Society (Mr. Ohse), Takano Foods Co. Ltd. (E. Takano, president, uses 7,000 to 8,000 tonnes of soybeans annually to make natto), Home Foods Co. Ltd (Home Shokuhin, Y. Murai, managing director, has 160 employees and 3 tofu factories that use 300 tonnes of soybeans/month; owned by Wako Shokuryo, the #1 wholesaler of soybeans in Japan), Japan Oilseed Processors Assoc. (JOPA; H. Higashimori, managing director). Japan Oil and Fat Importers & Exporters Assoc. (JOFIEA; I. Shimizu, exec. director), Canadian Embassy, Tokyo.

Hong Kong. Soybean imports. Visits: The Hong Kong Soya-Bean Products Co. Ltd. (makers of Vitasoy soymilk), Amoy Industries (International) Ltd.

Malaysia. Soybean imports 1984, 1985, 1986. Visits: Ace Canning (owned by Lam Soon). Yeo Hiap Seng (Malaysia) Berhad (soymilk), Cheong Chuan (Hup Kee) Sdn. Bhd. (traditional fermented soysauce), Sin Yong Huat Enterprises Sdn. Bhd. (soybean importers), Syarikat Perniagaan Cheon Fatt (tofu manufacturer).

Singapore. Soybean imports (1983–1986). Visits: Sin Seng Lee Trading Co. (Pte.) Ltd. (claims to import 60% of soybeans to Singapore). Conclusions for each country. Recommendations for future action. Future export development missions. Accomplishments. Competition.

In Japan, 842,000 tonnes soybeans are used to make foods, as follows (in tonnes, p. 1): Tofu 456,000, miso 180,000, natto 90,000, dried-frozen tofu 30,000, boiled soybeans 23,000, soybean powder 10,000, soymilk, 7,000, soysauce 5,000, other 41,000. The suppliers of these edible soybeans are (in tonnes): USA 400,000, China 280,000, Japanese domestic 280,000, Canada 24,000. Total Japanese soybean imports: 5,000,000 tonnes. Of this 4,036,000

tonnes (81%) are used for crushing, 842,000 tonnes for food, and 70,000 tonnes for feed (not crushed). The Japanese market for soybeans is very large for both crushing and food use, but is not growing. The beans for crushing come mostly from the USA and South America.

Preferred characteristics of soybeans for each type of soyfood are given. For example, for miso: Low oil, high protein, high sugar, white hilum. For tofu: High sugars (glucose, sucrose), moisture content 10–12.5%, new crop preferred to old, protein 40%, oil 19–20%, hilum color is not very important but white is preferred, varietal consistency; preferred varieties are Beeson, Amsoy, Corsoy. Natto: Most important is small size, 5.5 mm or less, clean beans free of foreign material, high sugar content (saccharose, stachyose, which bacillus needs to work), less oil, must absorb water well. Soymilk: Good flavor, low moisture (10%), low percentage of splits (too high can cause rancidity), low oil, high protein.

In Japan, vegetable oil consumption has increased 2.5 times in the past 20 years to 45.17 gm/capita/day in 1986. Soyoil and canola oil together account for 85% of production. Canola is replacing soybean oil. If the oil market is strong, the 30 Japanese crushers crush more canola, but if protein is strong they crush more soybeans. U.S. soybeans have too much foreign material; new contracts have a penalty for > 2% FM.

In Hong Kong, 6,000,000 cases of Vitasoy brand soymilk are produced annually. The company uses 2,500 tonnes/year of soybeans, 80% of which are grown in Canada. It uses 100 to 200 tonnes of organic soybeans for Vitasoy exported to U.S. health food stores. Using 15 Tetra Pak machines, production takes place 24 hours/day (3 shifts), 6 days a week. Contacts: Patrick Cheung (marketing manager), and Raymond Yuen (commercial manager).

Amoy Industries, the largest maker of soy sauce in this part of the world, produces 6,000 tonnes/year. The company was established 80 years ago in Amoy, eastern China, moved to Hong Kong in 1949; 50% was purchased by Pillsbury in 1983. Uses 2 containers of soybeans/week, 100% from Ontario for the past 5 years.

Malaysia soybean imports rose from 174,400 tonnes in 1984 to 255,200 tonnes in 1986. The main suppliers in 1986 were China (56.2% of total), Vietnam (15.8%), and Argentina (14.3%). Ace Canning uses ton tonnes/month of soybeans (presently all from China) to make soymilk. They have 7 Tetra Pak machines. Yeo Hiap Seng (Malaysia) is the largest soymilk producer in Malaysia, making 25,000 liters/year using 9 Tetra Pak machines. They use 1,250 tonnes of soybeans (80 containers) per year, all Canadian.

In Singapore, soybean imports rose from 28,287 tonnes in 1983 to 41,571 tonnes in 1986. In 1986, some 66% came from Canada, 16.6% from China, and the rest from others.

The major competition for food quality soybeans in these four countries at present comes from China. The

Chinese have improved their soybean quality and appear to be actively seeking to increase their market share. In the long run, however, China may choose to reduce its soybean exports in order to increase meat consumption in China. This could lead to new market opportunities for Canada in these four countries. Address: P.O. Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

3296. Wood, Rebecca T. 1988. Miso—The super food. *Health Foods Business*. May. p. 91.

• **Summary:** A brief introduction, with a recipe for Watercress miso soup.

3297. Maeda, Toshiie. 1988. Mura okoshi—Tenpe sonjuku [Revitalizing a village—the tempeh village school. I.]. *Toyo Shinpo (Soyfoods News)*. June 1. [Jap; eng+]

• **Summary:** The author, a representative of the school, wrote a book titled *Homeland of Miso (Miso no Furusato)*. He discussed the fact that the use of miso mainly in miso soup presents a big problem. The first solution to the problem is to use miso in thick ketchup-like sauces. The second is to return to the non-salted fermented foods such as Japanese natto, Nepalese kinema, Indonesian tempeh, and Chinese soy nuggets (shi), which are the ancestors of miso. He emphasized tempeh, which he feels is a wonderful food that can be used in various ways, and is nutritious and healthy. He explained that tempeh is becoming popular in the USA and Europe, and concluded that tempeh alone can be used to start a food industry.

“Because of this book, I received a visit from 2 people from the “Vitalizing Village Committee” of Kasuga-cho, Hyogo-gun, Hyogo-ken. They asked me to give a lecture on tempeh, for they wanted to consider whether tempeh could be used to help vitalize the village. I accepted the offer, but realized I needed more information on the subject. So I contacted Murata sensei, professor emeritus at Osaka Shiritsu Daigaku, who played a key role in organizing the first international Asian Symposium on Non-Salted Soybean Fermentation in Japan. She and others at the university sent me an encouraging letter, four articles on tempeh, and information on tempeh cookery from the university.

“In late August 1987 I used these material to give a 40 minute lecture on tempeh followed by 20 minutes of questions. It was decided to have a follow-up meeting for tempeh tasting. Through Dr. Murata’s introduction I received 2 kg of free tempeh from a maker in Aichi-ken. The sampling was a big success and was written up in the newspaper in a big way. The local Hyogo prefecture high school food processing department started to experiment with tempeh, and a women’s group, the Kasuga-cho Commerce and Industry Group, began to experiment with tempeh cookery. At the end of Sept. 1987 on of the teachers at the high school succeeded in making tempeh, which made the news. Then they started to make second

generation tempeh products, such as confections and breads. At their local school festival in October 1987 he presented the products and gained a good reputation.”

3298. Belleme, John. 1988. Tamari: Reborn in the U.S.A. [San-J International begins production in America]. *East West*. June. p. 14, 16-18.

• **Summary:** In 1804, almost half a century before Commodore Perry’s ships forced open Japan’s ports to American trade, the Sato family’s fleet of small boats began ferrying their homemade tamari and other goods up the Kiso, Ibi, and Nagara Rivers. From the port city of Kuwana in the Bay of Ise on the Pacific Coast, the Satos received goods from larger ships and delivered them to communities upriver. Takayoshi Sato is currently the president of San-J International, the remnant company, almost eighty years since the Satos closed their maritime business. Faced with the loss of livelihood, the Satos turned to making tamari and soybean miso on a large scale in 1909.

With the dollar at an all-time low against the Japanese yen, and 100% of all natural shoyu and tamari sold in the U.S. being imported from Japan, the opening of the San-J International tamari plant could not be more timely. American importers of Japanese foods have seen a 50% increase in the price of shoyu and tamari in the past eighteen months. There are just a few companies in Japan still making genuine tamari. San-Jirushi at Kuwana is the largest, producing roughly half of the country’s annual production of 6,000 kiloliters (1,500,000 gallons).

William Shurtleff first proposed exporting San-J tamari to the U.S. in 1977. Shurtleff gave a sample of San-J tamari to the president of Mitoku, which supplied Erewhon with Japanese foods. Shortly thereafter, Erewhon began importing San-J tamari in five gallon tins. Next John McLaughlin, a Richmond businessman, tasted San-J tamari and was impressed enough to go to Japan and talk to the Sato brothers. The meeting led to the founding of San-J International in December 1978, a Japanese-American joint venture to market San-J tamari and eventually build the Richmond plant.

Today, industrial giants such as Stouffer’s and Campbell’s use San-J tamari exclusively in all their frozen food lines. San-J makes the point in their ads: “One teaspoon of tamari—which contains just a pinch of salt—is the seasoning equivalent of a full tablespoon of salt. Tamari seasons with protein, not sodium.” In the manufacture of tamari, the mixture of koji and brine, called moromi, is left to ferment for about six months. Tamari is pasteurized (2% ethyl alcohol is added to prevent the growth of yeasts and molds). The Richmond plant can make about 1 million gallons of tamari and tamari shoyu (tamari with 20% wheat added) a year, about two times the current annual sales of the imported product.

The Richmond process will differ from that used to make tamari in Kuwana. First, in Japan, San-J tamari is aged for at least 12 months at room temperature. In Richmond, fermentation is accelerated to approximately 6 months by heating the fermentation vats with electric coils. Second, the San-J tamari from Japan is aged in old cedar vats while the Richmond plant is using fiberglass vats lined with epoxy resin. Every major importer of natural Japanese foods has expressed interest in bottling San-J tamari in their private label. However, only Eden Foods Clinton, Michigan, has negotiated a contract with San-J.

3299. Cooper, Jack. 1988. Miso: The mother's touch. *Palate Pleasers of Japan (Los Angeles, Calif.)* 6:31-37. June.

• **Summary:** The "mountain made" miso commercial turned a small, local miso manufacturer in the Japan Alps, Miyasaka Jozo Co., Ltd., into the second largest miso producer in all of Japan. To Japanese everywhere, the "chop, chop, chop" sounds of mom dicing tofu and scallions in the kitchen, mixed with the savory, pungent fragrance of hot miso broth and the clean, sweet smell of steaming rice are as much a symbol of the dawning of the day as the aroma of fresh coffee and the sizzling sounds of bacon and eggs are to Americans. William Shurtleff and Akiko Aoyagi explain [the bewildering 'vintages' of miso] in their massive volume, *The Book of Miso*. All traditional miso contains salt and soybeans to which a mold culture, or "friendly agent," usually *Aspergillus oryzae*, has been added.

A 1965 study conducted by Dr. Takeshi Hirayama at Japan's prestigious National Cancer Center, people who eat miso soup daily are 32% less likely to develop cancer than those who never eat miso soup. Undiluted, miso contains on average about 12% salt, six times the salt content of cheddar cheese. Most miso sold in America is imported and sold under Japanese brand names like Maruman, Marukome, Shinshu-ichi, Yamabuki, Hanamaruki, etc. One reason for this may be Japan's stringent new laws requiring producers to list all ingredients and additives (mainly MSG, artificial coloring and preservatives), making the natural products more attractive to America's health-conscious consumers.

The Japanese National Miso Association estimates that there are over 2500 miso manufacturers in Japan, many of which are small, family-owned operations. Color photos show: (1) Miko-chan, the little kneeling girl who is the Miyazaka Jozo logo. (2) Three types and colors of miso in white bowls, next to an iris. (3) The historic old Shinshu Ichi miso and shoyu plant. (4) A bowl of white miso soup with crab and tofu. (5) An assortment of traditional miso dishes. (6) The ultra-modern computerized control panel, motorized conveyors, and the modern packaging facility at the Miyazaka Jozo factory (3 small photos). (7) A shop in Japan retailing Japanese miso in traditional small wooden kegs. (8) Five views of the South River Miso Co., Conway, Massachusetts (including an exterior view of the home and

miso shop, Christian Elwell at work in the temperature-controlled koji room).

Note: According to *The Book of Miso*, by Shurtleff & Aoyagi (1976, p. 257; based on 1974 statistics) *Mayasaka Jozo (Shinshu Ichi)* is Japan's largest miso factory. The company's Tokyo factory produces about 15,000 tons/year; the Nagano and Yamanashi plants produce 9,300 tons and 3,300 tons respectively. All make Shinshu-type light-yellow miso. As of 1983, the Tokyo factory also made freeze-dried miso. Address: Editor, Palate Pleasers.

3300. Fujinuma, Kenji; Saito, K.; Nakazato, M.; Kikuchi, Y.; Ibe, A.; Nishima, T. 1988. Shokuhin-chû no gurichirurichin-san no bunseki-hô [Determination of glycyrrhizic acid in foods]. *Shokuhin Eiseigaku Zasshi (J. of the Food Hygienic Society of Japan)* 29(3):210-15. [9 ref. Jap; eng]

• **Summary:** High performance liquid chromatography was used to determine the glycyrrhizic acid (GA) content of Japanese soy sauce and miso. In a survey of commercial foods, GA was detected at levels of 2 to 224 micrograms/gm in 16 out of 56 samples.

Glycyrrhizin is $C_{42}H_{62}O_{16}$. Glucoside contained in *Glycyrrhiza glabra* L. at the level of 6-14%, with strong sweetness, which is hydrolyzed with acid into glucuronic acid and glycyrrhetic acid ($C_{30}H_{46}O_4$). Address: Tokyo Metropolitan Research Lab. of Public Health, 3-24-1 Hyakunin-cho, Shinjuku-ku, Osaka, Japan.

3301. **Product Name:** [Hanamaruki Miso with Added Bonito Flakes and Dashi].

Foreign Name: Hanamaruki Katsuo-Tenka Miso.

Manufacturer's Name: Hanamaruki Foods (America) Inc.

Manufacturer's Address: 390 Fifth Ave., Suite 900, New York, NY 10018.

Date of Introduction: 1988. June

Ingredients: Incl. miso, bonito flakes.

Wt/Vol., Packaging, Price: 1 kg plastic tub.

How Stored: Shelf stable.

New Product-Documentation: Ad in Palate Pleasers.

1988. Vol 6. June. p. 33. "Miso. A Health Secret to Savor."

3302. Kingma, Sharyn. 1988. New study released on consumer attitudes about soy proteins. *Soya Newsletter (Bar Harbor, Maine)*. May/June. p. 3, 14-15.

• **Summary:** Protein Technologies International, a subsidiary of Ralston Purina, St. Louis, Missouri, has recently released the results of a new study which evaluates current consumer attitudes related to soy protein, nutrition, dietary habits, and knowledge of dietary fiber. The 1988 Consumer Attitudes Monitor was undertaken to determine if there had been any significant changes in consumer attitudes since their first study was done in 1985.

One of the major differences between the earlier study (see Ralston Purina 1985 and Elliott 1988) and the current one is that the 1985 study contained specific questions related to soyfoods. But the 1988 survey also probed some interesting areas. For details, see the study itself.

Copies of the 1988 Consumer Attitudes Monitor are available through Jean Kuster, Protein Technologies International, Checkerboard Square, St. Louis, Missouri, 63164 or call 800-325-7108.

3303. **Product Name:** [Maruman Miso].

Foreign Name: Maruman Miso.

Manufacturer's Name: Maruman Jozo Co. Ltd.

(Importer). Made in Japan.

Manufacturer's Address: USA

Date of Introduction: 1988. June

Wt/Vol., Packaging, Price: Tubs and plastic bags.

How Stored: Shelf stable.

New Product–Documentation: Ad in *Palate Pleasers*.

1988. Vol 6. June. p. 33. "Natural Goodness. Miso." The product is distributed in the USA by Oriental Trading Co., South San Francisco, CA 94080; Daiei Trading Co., Inc., Woodside, New York; and Crown Trading Co. Ltd., Kobe, Hyogo prefecture 651, Japan.

3304. Nihei, Takao. 1988. [The history of shoyu in Hawaii. (Food series, part XII)]. *Kokiku (Honolulu, Hawaii)*. June. p. 32. [Jap; Eng]

• **Summary:** "Yo o sutete yama ni iru tomo miso, shoyu, sake no kayoiji nakute kanawaji." "Forsaking all worldly things, still, one can't do without these: Miso, shoyu, and sake." As in the ancient waka poem written by Shokusanjin (during the Edo period), no matter where the Japanese went, miso and shoyu were necessities of life. Hawaii's first miso and shoyu were recorded in Meiji Gannen (1868), the year of the first Japanese immigrants' arrival. Ikuma Yonekichi, who came on the ship "Scioto" (Saioto-go), noted in his diary, "Yokohama departure. Provisions of rice, miso, shoyu."

In 1887, as the Japanese immigrant population increased, Japanese goods began to be imported, but there were many instances where miso and shoyu were insufficient. In Hawaii, shoyu was manufactured earlier than sake by Shimada Jihachi in 1891, but he gave it up due to financial difficulties. Later, Yamagami Nobuyuki, who came from San Francisco, California, started a shoyu factory which prospered. With the advent of World War II, imported goods from Japan were cut off, which gave rise to the start of miso and shoyu companies here. Barbeque shoyu is Hawaii's own discovery. The locally made miso and shoyu are less salty than the Japanese products.

3305. Peluso, Michael R. 1988. The nutritional value of soy. *Health World (Burlingame, California)* 2(4):26-28. May/

June.

• **Summary:** This introductory article discusses whole soybeans, soy flour, soy protein products (isolates, spun fibers, TVP), soy milk, soy cheese (tofu), tempeh, miso, and soy sauce. Table I shows the composition of most of these is given. The author is especially interested in soy oil as a good source of vitamin E and of the essential fatty acids, linoleic and alpha linolenic acids. He is critical of the hydrogenation process. Table II gives a nutritive comparison of soy oil and selected food fats. Table III gives a nutritive comparison of soy foods and selected animal foods. Address: P.O. Box 606, Occidental, California 95465.

3306. Shurtleff, William; Aoyagi, Akiko. 1988. *Das Tofu-Buch: Herstellung, Verwendung, Ernahrungswert, Rezepte* [The book of tofu: Preparation, uses, nutritional value, recipes]. Munich, West Germany: Goldmann Verlag. 384 p. Illust. by Akiko Aoyagi Shurtleff. Index. 18 cm. [Ger]

• **Summary:** A pocket book edition of the original 1980 German edition of *The Book of Tofu*. Contains 300 recipes. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

3307. Udesky, James. 1988. *The book of soba*. Tokyo and New York: Kodansha International. 166 p. Foreword by William Shurtleff. Illust. Index. 27 cm. [50* ref]

• **Summary:** Contents. Foreword. Introduction. I. Making soba. Homemade soba noodles. Broth. Noodle dishes. Country cooking. Groat cooking. Variations and desserts. Ingredients. II. About soba. Nutrition. Buckwheat: From seed to table. History. III. Appendices. The soba dining experience. Selected soba restaurants in Japan. Oriental, natural, and specialty food stores in the United States and Canada. Bibliography.

Soy-related recipes include: Deep-fried tofu pouches in "Fox Soba" (kitsune soba). White miso in broiled soba dumplings with miso sauce. Soba noodles in miso stew. Cold soba noodles with natto and sesame. Natto in soba pasty. Soy-Soba noodles (with raw whole soybeans). Soy sauce is used in many recipes.

The excellent "Ingredients" section (p. 91-98), gives definitions of several soyfoods, including miso, natto, okara, soy sauce, tofu, and tofu-thin deep-fried (abura-age, usu-age). The definition is especially good: "Natto: This rich soybean product with a cheeselike flavor is still underestimated, unappreciated, and misunderstood, mainly because the sticky 'threads' resulting from its special fermentation process are strong and stubborn, making it pretty tricky for beginners to eat. Natto can be made easily at home with soy beans, 'natto spore' (now available at major health-food dealers on both coasts), a pot, and a box... If allowed to sit too long on store shelves, the beans become overripe. Although you cannot check the quality until you open up the package at home, the best natto should have a

light, tannish color and still be moist and a little puffy. Too dark a color indicates overripening and a correspondingly bitter taste. To remedy this situation somewhat, stir the beans together with chopsticks or a spoon and combine with chopped onions, wasabi horseradish, and soy sauce. Since this food is the result of bacterial action, no preservative can be used. Thus, natto should be eaten as soon as possible.”

Mr. Udesky had a chance to prepare homemade soy sauce while living with Mr. Noboru Muramoto (author of *Healing Ourselves*) from 1971 to 1975.

For a complementary review, see Jean Pearce. 1991. Nov. 10. *Japan Times*.

Letter from James Udesky. 1997. April 21. The hardcover edition of *The Book of Soba* has now sold 12,000 copies in Japan and abroad, and 3,000 copies of a new soft-cover pocketbook edition (246 p.; 18.2 cm) was published by Kodansha International in Dec. 1995. An article on soba titled “The Art of Noodles,” by Udesky appeared in *Japan Quarterly* (April-June 1997, p. 32-42; it contains a large color photo of him rolling out soba dough). Udesky is living in Tokyo, has lived in Japan (except for a 3-month break in 1988) since 1988, married a Japanese woman in 1990, for the last 2 years has worked for a medical equipment importer and taught English part-time at Dentsu Inc. to survive financially, has established a company named Udesky Communications, and continues his practice of making traditional Japanese soba. He has plans for a new book titled “Basic Techniques of Udon Making.” Address: Heim R1 #103, Meguro Honcho 6-18-3, Meguro-ku, Tokyo 152, Japan. Or: The Soba Center, P.O. Box 72, Winnetka, Illinois 60093-0072.

3308. *Toyo Shinpo (Soyfoods News)*. 1988. Okara peesuto de shokupan. Kōso shori de seihin o kaihatsu [The National Vegetable Protein Association is making bread with an okara paste, developed from a specially-treated enzyme]. July 21. p. 3. [Jap; eng+]

• **Summary:** Mr. Ryoji Sekiguchi is president of Zenkoku Shokubutsu Tanpaku Kyodo Kumiai located at Sendagi-2-48-8, Bunkyo-ku, Tokyo, Japan. For the past ten years, the National Vegetable Protein Association has been conducting research with okara and has developed an okara paste made by treating regular okara with a special enzyme. This paste can be used in noodles, mayonnaise, miso, ketchup, croquettes, hamburgers, confectionery, tofu, ice cream, etc. One of the products that can be made from this paste is bread. It has 2% less water than a regular loaf and contains 20% okara paste. It stays fresh for twice as long as a regular loaf of bread. The okara paste has the following characteristics: It has no taste or smell, it is low in calories and has some protein, it has an improved texture over plain okara because of the action of the enzyme, it has vegetable fiber, and it is a health food.

3309. Bubny, Paul. 1988. Venerable soybean sprouts new uses. *Health Foods Business* 34(7):72, 74, 76, 108. July.

• **Summary:** Lonnie Stromnes, national sales manager of White Wave Soyfoods in Boulder, Colorado, reports that White Wave recently “upscaled” the packaging on its tempeh products; the new graphics depict tempeh in use, so that customers do not have to bring a thorough knowledge of the food into the store with them. Mitoku-USA, based in Albany, New York, imports some 20 varieties of miso. At least one manufacturer, the Asheville, North Carolina-based Great Eastern Sun, saw its miso sales increase by 20% last year. Bruce Sturgeon, the company’s vice president, said Great Eastern Sun’s volume on miso alone was \$400,000 in 1987. Shoyu and tamari are frequently aimed at the gourmet market as well as the natural foods / specialty foods market. Owner Dale Kamibayshi of Alfalfa’s Market in Boulder, Colorado said, “I think many people are still intimidated by (soyfood’s) preparation.” To help overcome the intimidation factor, Alfalfa’s has scheduled a soyfood tasting fair for July 16; the first such fair which the store has devoted to soy.

Gary Barat, chairman of Legume, Inc. said, “I see the natural foods and gourmet markets coming together,” said Barat. “And the smart marketers are realizing that.” People who shop specialty stores have both eyes turned toward quality. Soy companies are increasingly making use of organically grown soybeans. There is also a trend toward using specific soybeans for specific products, a sign of a maturing industry. The trend is more prevalent in the U.S. than in Far East Asia. Westbrae, for example, uses Vinton beans for its Westsoy soy beverage. As the currency in Japan remains strong against the dollar, you’re going to see more and more (soy) products produced in America. Also there will be greater growth in so-called “second-generation” soy products—dairy analogs with soymilk, soy cheese, soy ice cream and soy yogurt. Address: Associate Editor.

• **Summary:** Contains products from: Dr. Vogel (p. 20). Huegli (mostly bouillon, p. 20). Japanese soy products (shoyu, tamari, may types of miso, nigari, kuzu, wheat gluten, mochi, p. 30-33). Fertilis soy products (p. 34). Yakso (tofu, tempeh, soy sauce, p. 34). Witte Wonder (tofu, seitan, p. 35). Orido (amesake, p. 35). Liza (rice drink, p. 36). Living Foods (soya drink, p. 36). Provamel (9 soy drinks and 6 soy desserts [puddings], p. 36). Jonathan (1 bottled soy drink, p. 36), Lima (shoyu, tamari, soymilk), Eden (no soy, p. 37). Address: Nijkerkerveen, Netherlands. Phone: 03495-72844.

3311. Kotsch, Ronald E. 1988. *Macrobiotics beyond food: A guide to health and well-being*. Tokyo and New York: Japan Publications, Inc. 242 p. Index. 22 cm. [10 ref]

• **Summary:** Contents: Foreword. Introduction. 1. The heart of the macrobiotic artichoke. 2. Edible shampoo, organic undershorts, and other necessities. 3. Feasting with the senses. 4. Secrets of the laughing Buddha. 5. Mind does matter. 6. Life is with others. 7. Twinkle, twinkle little star. 8. Into the arms of the infinite. 9. Illness and healing. Conclusion. Bibliography.

Page 48 states that soybeans are an important part of the “standard Macrobiotic diet.” A Macrobiotic person who wants to reduce or give up smoking might want to “Reduce consumption of pressure-cooked rice, miso, and other contractive or salty foods.” Address: Ph.D., Hingham, Massachusetts.

3312. Nihei, Takao. 1988. [The history of Japanese sake in Hawaii. (Food series, part XIII)]. *Kokiku (Honolulu, Hawaii)*. July. p. 32. [Jap; Eng]

• **Summary:** The first Japanese immigrants who made a mark in Hawaii were the “Gannenmono” who crossed the ocean on the ship “Scioto” (Saioto-go) in 1868. Miso and shoyu had been loaded on that boat, but there is no record of any sake. Later on, due to a shortage of labor in the sugarcane fields, Hawaii’s largest industry, immigrants from Japan were brought in as a result of a contract between the Hawaiian Kingdom and the Japanese Government. On Feb. 8, 1885, the Japanese immigrants arrived in Hawaii on the ship “City of Tokio.” On this trip, Japanese sake had been put on board. Ten barrels of sake were offered as a gift to King Kalakaua. Sake began to be imported from 1888 on, increasing in volume each year.

3313. Hymowitz, Ted. 1988. Early Swedish work with soy sauce in Canton, China (Interview). *SoyaScan Notes*. Aug. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ted learned that there was a Swedish colony in Canton in the period 1750 to 1760. Perhaps they knew something about the Bowen-Flint [Samuel Bowen and James Flint] affair, so he examined early Swedish literature, though he can’t read Swedish. He found a document on methods of preparing Chinese soy by M. de Groupens. Berkeley or Harvard might have this document. The earliest Europeans to refer to the soybean were Carletti (1597), Saris (1613), and Fernández Navarrete (1665); Ted discovered all of these early references. There must be many other early references in travel logs, but it takes so much time to read them. He will cite this in a forthcoming article on new crops.

Ted will send me an article from *The Philosophical Magazine* (1804) by M. de Grubbens titled “Method of preparing Chinese soy.” He also has on one of his note cards the story of a man visiting Peking in 1655; the man

mentions miso and tofu. Address: Dep. of Agronomy, Univ. of Illinois, Urbana, IL.

3314. Bailey, Simon. 1988. *Soya-based products*. *Natural Choice*. Aug. 15.

• **Summary:** “The food of the future. The soya bean is a protein-packed food which is increasingly used as a dairy or food substitute in today’s search for a healthier diet.” Discusses soya milk, dairy free desserts, tofu, tofu-based foods, soya flour, soya sprouts, tempeh, soya sauce, miso, and high-tech soya foods including TVP and soya protein isolates. Address: 138 Randolph Ave., London W9 1PG, England. Phone: 01-289-7364.

3315. Pirello, Robert J. 1988. Tofu cheese product and process of preparation. *U.S. Patent* 4,765,995. Aug. 23. 4 p. Application filed 16 Sept. 1987. [9 ref]

• **Summary:** Soybean curd is manufactured from a firm, relatively non-porous tofu brick by coating the brick with a thin mellow white miso coating, fermenting the coated brick, removing the miso, steaming, and whipping. The low-fat, low-cholesterol end product has a soft, creamy, water-separation resistant, spreadable texture. Address: 620 Christian St., Apt. 2C, Philadelphia, Pennsylvania 19147.

3316. **Product Name:** Clearspring Sendai Genmai Miso, and Hagoromo Mugi Miso.

Manufacturer’s Name: Clearspring Natural Grocer (Importer). Made in Japan.

Manufacturer’s Address: 196 Old St., London EC1V 9BP, England. Phone: 01-250 1708.

Date of Introduction: 1988. August.

How Stored: Shelf stable.

New Product–Documentation: Simon Bailey. 1988. *Natural Choice*. Aug. 15. “Soya-Based Products.” A photo shows the Label. CSP form filled out by Simon Bailey. 1988. Sept. 28. Gives date of introduction as 1984 under the present label. Formerly sold under the Sunwheel label (1974).

3317. Klaper, Michael. 1988. *Vegan nutrition: Pure and simple*. 2nd ed. P.O. Box 959, Felton, CA 95018-0959. Or 8563 Empire Grade, Santa Cruz, CA 95060. iii + 72 p. Illust. 27 cm. [137* ref]

• **Summary:** An excellent, highly readable introduction to the subject by a physician. The Acknowledgments page (p. 69) reads like a “Who’s Who” of vegetarianism in the USA in 1988. Dr. Klaper gives special thanks to “Cynthia Pararo Klaper, for her indispensable editing suggestions, tireless efforts, and loving support.” Soyfoods (especially tofu, soymilk, and tempeh) are mentioned and discussed throughout this book. Soy-related recipes include: Tofu yogurt. Bran muffins (with soymilk). Tofu omelette. Tofu

tahini dressing. Blond miso dressing. Tofu eggless salad. Miso soup. Hot miso dressing. Tofu cutlets. Tofu loaf.

Note: Dr. Klaper is a graduate of the Univ. of Illinois College of Medicine, with post-graduate training and experience in surgery, anesthesia, obstetrics, and general practice. Since 1972 his emphasis has been on applied nutrition. Until recently his practice was in central Florida. Address: Felton, California. Phone: 408-423-6643.

3318. Mandoe, Bonnie. 1988. Soyfoods: The perfect pair [Tofu and miso]. *Bestways*. Aug. p. 12-13.

• **Summary:** Contains 7 recipes, each using tofu and miso. Address: Hawaii.

3319. McSweeney, Daniel. 1988. Consumer survey 1988. *Whole Foods*. Aug. p. 27-28, 30, 32, 34.

• **Summary:** Natural/organic food purchases. Percentage of respondents who purchased a type of product during the past year: 1988 all/1987 all (1988 women / 1988 men). NA means "Not Available." The following are ranked in descending order of the percentage of consumers buying the product in 1988: Tofu: 63.5/83.4% (55.6/63.5%); Tamari 55.6% / NA (57.8/50.0%); Soy sauce 47.6%/NA (46.7%/50%); Miso 41.8/69.7% (42.2/38.9%); Tempeh 30.2/NA (35.6/16.7%); Soymilk 28.6%/54.5% (31.1/22.2%). Note the sharp declines between 1987 and 1988 for soymilk - 47.6%, miso -40%, tofu -24%. All soyfood products for which there are statistics for both years declined, a serious trend.

Note: The "1986 and 1987 surveys statistics were generated through a reader questionnaire in East West magazine. The 1988 Consumer Survey was handed out to shoppers at 13 different retail stores throughout the country. Due to this variance in the survey base, some statistical discrepancies may have resulted."

• **Summary:** An overview and introduction to soyfoods nutrition, tofu, tempeh, miso, shoyu and tamari, and soymilk. Note: This magazine was formerly located in Pomona, California.

3321. Schnell, Hannelore. 1988. Kleine Bohne, ganz gross [Small bean, very big]. *Natur (Munich, West Germany)*. Aug. p. 75-83. [3 ref. Ger]

• **Summary:** Discusses soymilk, tofu, soy sauce, miso, tempeh, Soyastern, Svadesha Tofurei, Alpro, and DE-VAUGE. Concludes with a detailed discussion of newly recognized potential dangers with HVP products. Vegetable seasonings made by companies such as Maggi may contain carcinogenic chloropropanols, such as dichloro propanol. Maximum limits on these are now being established.

3322. *Soya Newsletter (Bar Harbor, Maine)*. 1988. U.S. soyfoods production to use 62 million pounds of soybeans in 1988. July/Aug. p. 10.

• **Summary:** This figure was the result of a recently soyfoods industry survey conducted by Soyatech, Inc. The soyfoods included in this projection are tofu, soymilk, tempeh, soy sauce, miso, and soynuts. When asked how they expected their demand for soybeans to grow over the next 5 years, 4.8% of soyfoods manufacturers surveyed expected it to remain the same, 52.4% expected it to grow slowly, 42.9% expected it to grow considerably, and none expected it to decrease.

3323. Sturgeon, Bruce. 1988. Early history of Great Eastern Sun, Oak Feed Miso, Inc., and American Miso Co. (Interview). *SoyaScan Notes*. Sept. 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce is looking at documents from the company archives. Great Eastern Sun was founded in March 1982 by Barry Evans. He was the only principal/owner at the time. American Miso Co. was founded in March 1979 as the Oak Feed Miso, Inc. The principals were Sandy Pukel, John Belleme, and Barry Evans, but it is not clear who owned how much stock. It started doing business in 1981 as the American Miso Co. and officially became The American Miso Co. by law in May 1982. The principals of the American Miso Co. were John Belleme and Barry Evans. Sandy Pukel was somehow bought out and left and joined Oak Feed Co.; It seems to have become his. Barry Evans may have been the original president of Oak Feed Co. It was a store, probably a restaurant, and an import and distribution company. Barry and John went on to do the miso company. Great Eastern Sun was founded as a way to market and distribute the miso. They also became an importer and distributor of Mitoku products at about that same time. Don DeBona was the first or second company president, after Marty Roth. Today Barry owns all the stock of both American Miso and GES. Barry treasures his privacy. Bob Ballard and Bruce run GES. Even they do not know Barry's address or phone number. He checks in about once a quarter to see how things are going.

Ah Soy now has about 5% of the U.S. soymilk market, and is trying desperately to hang onto that. The competition is fierce, but they have many loyal consumers. Their 6 oz size is still their best seller, even after introduction of the quart, and even with a price increase last Feb. to above \$1.00. Sales are up compared with last year.

In 1984 Bruce was in Boulder, Colorado as a buyer for Pearl Street Market. They had been buying from GES at that time for about a year. Oak Feed came to Pearl Street Market with imports to sell. Address: 92 Macintosh Rd., Asheville, North Carolina 28806. Phone: 808-438-4730 or 704 252-3090.

3324. Fass, Bill. 1988. Brief history of Macrobiotic Wholesale Co. of Asheville, North Carolina (Interview). *SoyaScan Notes*. Sept. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company was originally founded by Great Eastern Sun. In 1986 GES sold it to Kurt Schmitz; it was then located at 503 Haywood Rd. in Asheville. Schmitz in turn sold it to Bill Fass in August 1986. The company does not import. They distribute only macrobiotic products. Some 90% of the products they sell are imported from Japan, and 90% of these they buy from Great Eastern Sun, the importer. They also buy a few imported products from Eden Foods. Soyfood products they distribute include miso, shoyu, tamari, and koji. Address: 799 Old Leicester Hwy., Asheville, North Carolina 28806. Phone: 800-438-4730 or 704-252-1221.

3325. *Japan Times*. 1988. Miso shows promise as treatment for radiation: Researchers say soybeans flush isotopes from rats' organs, muscles. Sept. 27. p. 3. [Eng]

• **Summary:** "A team studying atomic bomb radioactivity has found that miso—a traditional Japanese condiment—is effective in helping remove radioactive elements from the body and controlling inflammation of organs caused by radioactivity, it was reported recently."

"This is the first time its effectiveness has been proven scientifically, according to a study team at Hiroshima University's medical research center on atomic bomb radioactivity."

"The experiment was conducted on male and female rats 4 weeks after birth. They were divided into 2 groups, one group fed with feed mixed with dried red miso and the other fed with regular feed. After a week, radioisotopes of iodine-131 and cesium-134 were injected into the stomachs of the rats.

"Both isotopes are secondary radioactive elements, which are produced in such cases as nuclear reactor accidents. The iodine-131 isotope is absorbed in the thyroid gland and mostly remains there. The cesium-134 isotope is accumulated in muscles and the intestines.

"Researchers measured the amounts of the isotopes left in such places as the blood and thyroid gland 3, 6, 12, and 34 hours after the injection. They found there were no differences between the groups of rats in the amount of isotopes in the thyroid gland. But there was only half the amount of iodine-131 in the blood of the group fed with miso compared to the other group, 3 and 6 hours after the experiment. The effect of the miso was also seen in the kidneys, liver, and spleen. Although there was no difference in the amount of cesium in such places as the blood, a high amount of cesium was removed from the muscles of the group fed with miso, the researchers said.

"In another experiment, rats from both groups were exposed to half a lethal dose of radiation to test the effect of

miso on victims of a nuclear explosion. Although more than 80% of the rats from both groups died within one week of the exposure, the inflammation of organs usually seen in cases of exposure to radiation was less for the miso-fed rats. This showed that miso stimulates the body's circulatory and metabolic system, the researchers said.

"In a book called 'Food and Predispositions,' Dr. Shinichiro Akizuki of St. Francisco Hospital in Nagasaki says the reason why doctors who attended to atomic bomb victims showed no after effects of the bomb is that they drank miso soup with seaweed. After the nuclear reactor accident in Chernobyl [on 26 April 1986 in the Ukrainian SSR], a translation of the book was popular in Europe, causing a rush of European countries to import miso from Japan. This prompted a miso research group... to ask Ito's team to study the relationship of miso and radioactivity.

"Akihiro Sawada of Hiroshima University said... the results may also involve the effect of seaweed, which contains iodine, and that further research on how miso helps excretion of radioactive particles is necessary." Address: Tokyo.

3326. Elliot, Rose. 1988. *The complete vegetarian cuisine*. New York, NY: Pantheon Books. 352 p. First American edition. With many lovely full-page color photos. Index. 28 cm.

• **Summary:** Visually, this is a beautiful book. The author makes minimal use of soybeans or soyfoods in her vegetarian cookbooks. She has apparently not learned that very few cultures that use soya as a traditional part of their diet use either soybeans as such or soy flour. In "Learning to love the soybean" (p. 16) she notes: "Soybeans and soy flour are rich sources of nutrients, but, in my opinion, so difficult to make palatable! However sprouted soybeans are delicious and make an excellent crunchy addition to salads, stir-fries, and sandwiches... Creamy soy milk (p. 106) and tofu (p. 108), which can both be made at home, are other palatable ways to eat soy."

Pages 38-39 contain a marvelous 2-page spread color photo of 30 different leguminous seeds (including soybean and soy flour), each with a brief description, followed by a longer description on pages 40-41. The section titled "Soybean *Glycine max*" states: "Soybeans have a strong flavor and need powerful condiments, such as curry, tomato and garlic, to make them taste good. I think they're nicest when sprouted (p. 207) and added to salads and stir-fries.

"Many products, such as miso, soy sauce, tempeh, soy milk and tofu, are made from soybeans and are described in other sections of this book.

"Soy flour is high in protein and low in starch, so it cannot be used to make a normal white sauce, although it can be stirred into savory sauces and gravies to add bulk and nutrients and is sometimes added to flour as a dough improver, in the proportion 8 parts flour to 1 part soy flour."

Pages 104-05 contain another 2-page spread color photo of dairy and nondairy ingredients, with a brief description of each, including tempeh, seitan, dried deep-fried tofu, aromatic dried tofu [probably five-spice pressed tofu = *wu-hsiang toufukan*], smoked tofu, firm tofu, soft tofu, textured vegetable protein (chunks or chopped), soy milk, and soy cream. A longer explanation is given on pages 106-06. The author does not like the strong soybean flavor or stodgy texture of tempeh. Page 108 gives a brief description of how to make tofu, and has a sidebar titled “Ideas for using tofu and vegetarian protein foods.” A good but brief description of soy sauce is given on p. 184, and a poor description of “How to make soy milk” (with added vanilla, honey, and oil) is given on page 280.

Soy-related recipes include: Miso soup with bean curd (p. 133; a variation includes wakame). Vegan ice cream (uses soy milk instead of dairy milk, p. 280). Thus, only 1 recipe in the 352-page book uses tofu and none use tempeh.

Originally published in Great Britain as *Rose Elliot's Vegetarian Cookery* by William Collins Sons & Co. Ltd., London and Glasgow. “Rose Elliot, a vegetarian since the age of three, is one of England's most popular cookbook authors. Her many best-selling books include *Vegetarian Cooking from Around the World*, *The Festive Vegetarian*, and *The Vegetarian Mother and Baby*. An active food consultant, she has appeared often on television and radio in Britain. She lives in Hampshire, England.” She was born and educated in England. Address: Hampshire, England.

3327. Product Name: Ricewich (Rice Cracker Sandwich Alternative) [Toasted Sesame, or Italian Vegetable].

Manufacturer's Name: Glenn Foods.

Manufacturer's Address: Offices: 99 Central Ave., Woodmere, NY 11598. Shipping: 112 Hudson St., Copiague, NY 11726. Phone: 516-374-0135.

Date of Introduction: 1988. September.

Ingredients: In both flavors: Whole brown rice, sulfite-free vegetables, sea vegetables, organic red miso, herbs.

Wt/Vol., Packaging, Price: 1.75 oz package, 18 per a case.

How Stored: Shelf stable.

New Product–Documentation: Talk with Glenn Foods. 1989. Feb. 28. Of their 14 Ricewich products, two flavors contain miso. These were launched in about Sept. 1988.

3328. Lordez, Marie-Française. 1988. Du soja dans notre assiette? [Some soya in our plate?]. *Revue Laitiere Francaise* No. 477. p. 52-53. Sept. [Fre]

• **Summary:** Soyfoods discussed include tofu, soymilk, and miso. Manufacturers include Cacoja, Société Soy (Soyeux brand), Lima Foods, Sojadoc, Innoval (Sojalpe brand), Maho (Tofu Kiss), Celia group, Triballat (Sojasun brand). A photo shows many soymilk products, the majority bearing the Provamel brand, made by Alpro in Belgium. Address: Ingénieur en Agriculture, IGIA, France.

3329. Ohsawa America. 1988. Macrobiotic foods catalog [Mail order]. P.O. Box 3608, Chico, CA 95927. 36 p. Sept. • **Summary:** Includes imported (from Japan) soy sauce, miso, miso condiments, koji, and nigari [a tofu coagulant]. Address: Chico, California. Phone: 800-647-2929.

3330. Duchesne, Paul. 1988. Development of the Brown Rice & Tofu Sandwich, and early history of Wildwood Natural Foods (Interview). *SoyaScan Notes*. Oct. 8 and Aug. 16, 1989. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Paul Duchesne developed the world's first “Fried Rice & Tofu Sandwich” in Fairfax, California. Duchesne's sandwich was one of America's early second generation tofu products. He deliberately called it a sandwich, even though it was made in a chapati, to make it sound more American. Today there are a surprisingly large number of U.S. companies making a Brown Rice & Tofu Sandwich. Duchesne started 3 of these companies and gave the basic recipe and production methods to the people who started most of the others. All descendants of the original BRTS have also been made in a chapati.

In late October or early November 1977, Duchesne sold the first 200 of them to participants at a macrobiotic seminar led by Michio Kushi in Marin County. Donna Gayle helped him make them. They were very popular; the key secret ingredient was a miso-sesame butter spread which Paul had learned of from George Ohsawa's book *Zen Cookery* (Miso Spread #203).

In Jan. 1978 he started making these sandwiches at the Sleeping Lady Cafe (a co-op started in about 1975 in Fairfax, Marin County) and selling them at the Good Earth Natural Food Store in Fairfax. He bought his tofu, made by Quong Hop & Co. off the shelf at the Good Earth. In Feb. 1978 he began to distribute them to many natural food stores throughout Marin County.

While in California in 1978 Duchesne gave his recipe and production techniques to Roy Steevensz in Los Angeles. Roy was making Fried Rice & Tofu Sandwiches by May 1978 on a big table in his living room. He continued until about 1984. Roy is now claiming that he created the idea. Paul and others were bringing Roy to the Bay Area as a macrobiotic teacher in 1977. Originally Roy was making seitan in Los Angeles.

In September 1978 Paul went to Boston to study macrobiotics, so he gave his Fairfax sandwich business (which still had no name) to Chris Smith. A month later, in October 1978, Chris stopped frying the brown rice and renamed the product, coining the now-famous name “Brown Rice & Tofu Sandwich.” At the same time he named his business Wildwood Natural Foods. In late 1978 Chris Smith taught Joe Nixdorff, who started the company City Samurai in Berkeley and made the Samurai Hero from

1978-1982. In Boston, Duchesne lived in The Garvey House, a macrobiotic study house. There he started to make his brown rice and tofu sandwiches. The operation soon grew into a business, which he named Rice House. He also taught his process to Marty Roth and Barbara Svenning Garvey Roth, who lived in the Garvey house; several years later Marty and Barbara moved to Santa Fe, New Mexico, where they started a business making the BRTS. Later Barbara made it near Asheville, North Carolina. Marty and Barbara in turn taught the sandwich to Jeff Fairhall, who started Essential Foods in Seattle and built it into a thriving business.

In May 1979 Duchesne and Chris Smith traded places and companies. Thus Chris took over Rice House in Boston, making the transition without missing a day of production and delivery to Brookline, Cambridge, and Boston. He renamed the product Brown Rice & Tofu Sandwich. Chris ran the company until 1981, when he sold it. It is still in operation and named Rice House. Paul left Boston for California, and took over the company he had started originally (now named Wildwood) in Fairfax.

In Oct. 1979 Bill Bramblett (a monied rock musician and part owner of the Sleeping Lady co-op) approached Duchesne and proposed that he invest in the company and expand the sandwich business, including distribution to Sacramento. The company was making only about 100 sandwiches a day at the time. Duchesne declined, saying he wanted to build a traditional, cauldron-style tofu shop around the sandwich operation—an idea that he had conceived while in Boston. Bill said he couldn't afford that so Paul found two more people with money to invest. In May 1980 Duchesne, a sole proprietor, incorporated Wildwood. He gifted shares to Bill Bramblett, Paul Orbuch, and Frank Rosenmayr. They they invested money so that of the 4 people so that ended up owning 25% of the stock. In Sept. 1980 the company moved out of The Sleeping Lady and down the road to 139 Bolinas Rd. They set up a tofu shop and started to make their own tofu. Duchesne's business plan showed that the operation would open in July. Instead opening was delayed until September 1980, which was the slower rainy season.

In late 1980 Richard Leviton visited Duchesne and Wildwood. In the Winter (Feb.) 1981 issue of *Soyfoods* magazine, in an article titled "Putting tofu in the lunch boxes of America" (p. 61), Leviton gave a detailed description of the shop: "which appears to fulfill the dreams of many soyfoods proprietors by combining both light tofu manufacture with light sandwich production in a clean, efficient, and industrious little shop. Mr. Duchesne designed his shop as a tofu showcase with broad wall-to-wall front windows so that passers-by may glimpse tofu production during the days. Wildwood produces a line of eight packaged vegetarian sandwiches including Brown Rice and

Tofu Sandwich (with vegetables in a whole wheat bun), Tofu Vegetable Salad,..."

In late 1980 the business was operating in the red. Bramblett, Orbuch, and Rosenmayr attributed the delay to poor management and in Dec. they, controlling the board of directors, demoted Duchesne (who was working long hours) from general manager to president and sales manager, with a salary cut. There were bad feelings. The board then acted as general manager and met each Tuesday night. There were frequent conflicts between Duchesne and the other three. They wanted to expand faster than did Duchesne. By Feb. 1981 the business was operating at a profit. In Dec. 1981 Duchesne proposed that Wildwood start a distribution company (which he would head) to distribute products made by Wildwood and others. The other three disliked the idea, so a week later Duchesne quit (but kept all his Wildwood stock), bought a big new refrigerated truck, and in January 1982 started his own natural foods distribution company named Cauldron Express; it distributed products made by companies other than Wildwood—such as Brightsong Tofu, Pacific Tempeh, and Grain Dance Seitan. The Wildwood owners felt that Duchesne was competing with them so they repeatedly made life difficult for him, and they were a major factor in his bankruptcy 9 months later in September. (Later, Wildwood got into the business of distributing products made by other companies—with a fervor.) In April 1983 in bankruptcy court, Duchesne signed a covenant not to compete with Wildwood for 5 years and sold all his stock and rights to the other three; he ended up getting \$5,000.

In about 1981, at the heyday of the brown rice and tofu sandwich, there were 5 companies in the San Francisco Bay area making 1,000 of them each day. Then the California Health Department began to wake up. When they realized that tofu was a perishable protein food that should be refrigerated, they decreed that all BRTSs be taken off the front counter of stores and sold out of the refrigerator. Sales dropped.

In Oct. 1988, after 5 long years, Duchesne returned to the soyfoods business making a BRTS and doing business as Bert's Place (Best Ever Rice & Tofu Sandwich). Wildwood challenged him for breach of the non-compete clause. The earlier agreement was not clearly written and The judge basically favored Duchesne in the arbitration. He had to rename his company to Paul's Place, which ended up in March 1989 as Paul's Organic Food Works. In early 1989 Duchesne developed a chronology of events relating to Wildwood's history, a chart showing the progeny of the original Fried Rice & Tofu Sandwich, and a collection of labels for these progeny.

Articles on Wildwood have been published in the *Pacific Sun* (16-22 Jan. 1981, Food & Drink Section by Linda Xiques, pronounced Zirksus), *Independent Journal* (San Rafael; about 1985-87), *The Fax* (Fairfax, Jan. or Feb.

1986, written by Lisa Alpine, who wrote an earlier article about Wildwood in about 1983-84). Duchesne has been married for 24 years to a nurse; they have 2 children. Address: Fairfax, California. Phone: 415-453-2360.

3331. Livingston, Joan. 1988. Making miso: Natural methods for a natural food. *Daily Hampshire Gazette* (Northampton, Massachusetts). Oct. 21.

• **Summary:** About Christian and Gaella Elwell and their South River Miso Co. The couple became interested in miso during their stay in Boston in the 1970s; there was no unpasteurized miso available in the USA at the time. After studying miso making in California with Mr. Muramoto, they purchased 64 acres that spread up from the rich bottom land of the South River in Conway, Massachusetts. Then they bought the Ohio Miso Co. Describes the commercial production process and gives 5 miso recipes. Photos show: (1) Apprentice Caroline Wurts and Christian Elwell cool rice that will become koji. (2) Christian pours rice into wooden koji crib. (3) Gaella and Christian inoculate rice in crib. (4) Isaiah and Christian Elwell, with koji crib in foreground. (5) Miso aging in cypress vats.

3332. **Product Name:** Paul's New and Original Brown Rice Tofu Sandwich [Basic, Raw Onion & Radish, or Half Size with Arame].

Manufacturer's Name: Bert's Place. Renamed Paul's Place. Renamed Paul's Organic Food Works in March 1989.

Manufacturer's Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.

Date of Introduction: 1988. October.

Ingredients: Basic: Short grain brown rice*, spring water, nigari tofu*, sprouted wheat tortilla*, toasted tahini, barley miso*, green onions* or leeks*, carrots*, seasonal green*, lettuce*, clover sprouts*, shoyu*, sesame oil*, garlic*, ginger*, apple cider vinegar, unrefined sea salt, spices. * = Organically grown per Cal. Health Code Sec. 26569.11.

Wt/Vol., Packaging, Price: 12 oz. The basic and onion retail for \$3.75, the half size retails for \$2.10 (8/89, northern California).

How Stored: Refrigerated.

New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on pink, red, or blue paper. "12 happy ounces (6 ounces for arame). For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down." Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back of each is a statement, which is changed every 2 weeks. For example: "Smile. Its great exercise for both of us." "The means are the ends. Sonia Johnson." "Mind is body is mind is body. Blumlein." Talk with Paul Duchesne. 1989. Aug. 16. The basic was his first new product introduced in Oct. 1988, the Raw Onion & Radish (the radish used to be daikon) in

November, and the half size in Dec. 1988. They were developed with the help of Barbara Svenning Garvey. The new and original is now different: The tofu is marinated and a seasonal green (usually kale or collards) is added. The rice is cooked in spring water. These changes are voluntary. Paul is now making and selling about 360 brown rice and tofu sandwiches a week.

3333. *East West*. 1988. East West presents: Best & worst awards. 3rd annual. 100% natural. Oct. p. 65-72.

• **Summary:** Best Natural Soy Sauce: Lima Nama Shoyu from Ohsawa-Japan, imported by Ohsawa America of Chico, California. Twice brewed, lower in salt, and aged four years. "It is unique among shoyus, with exceptional smoothness and flavor."

Better Than It Sounds Award: "Tofu chocolate? Yes, Barat Bars by Legume Inc. of Montville, New Jersey, use tofu instead of dairy and no hydrogenated or fractionated palm kernel oil. Carob candies move over!"

Best Tasting Flavored Soy Drinks: "The Westbrae Malted won this contest going away. Creamy, thick, and delicious, they are more of a dessert than a drink. Some devotees eat them frozen."

Least Healthful Line of Soy Drinks: "The Westbrae Malted. The flip side of their great taste is their almost 400 calories and 15 grams of fat per 8 ounces."

Most Healthful Line of Soy Drinks: Edensoy. They are the only producers making a totally oil-free drink.

Worst Tasting Flavored Soy Drinks: "Vitasoy from San Francisco, Calif., seem to have few fans and finished last in our blind taste test."

Most Questionable Beverage Label Claim: "3 grams of fat per 6 ounces of Carob and Chocolate Ah Soy, by Great Eastern Sun of Enka, North Carolina. These soymilks are rich and creamy, yet 3 grams is a lower fat content than even Edensoys, made without oil. How is that possible guys?"

That's Progress? Award: "Mori-Nu Tofu by Morinaga Nutritional Foods of Los Angeles. Aseptic Tetrapacked tofu that has indefinite shelf life and can be shipped anywhere. Good for backpackers maybe but can't compare to fresh and local."

Best Fake Hot Dog: SoyBoy Tofu Not Dogs by Northern Soy of Rochester, N.Y. "Nice smoky flavor and smooth texture, almost as good as the real thing."

Worst Fake Hot Dog: Tofu Pups of Lightlife Foods of Greenfield, Massachusetts. "Dry and crumbly on the inside, with a lack of distinctive flavor. Won't fool anybody at the neighborhood cookout."

Best Tamari: San-J Traditionally Brewed Tamari from San-J International of Colonial Heights, Virginia. "No one else even came close. Question: Will they be able to retain their appeal when the first U.S.-brewed batch hits the shelves?"

3334. Karta, Susani K. 1988. Market trends in the development of traditional soyfood. Paper presented at the ASEAN Food Conference '88: Food Science and Technology in Industrial Development. 18 p. Held 24-26 Oct. 1988 at Bangkok, Thailand.

• **Summary:** Contents: Introduction. Traditional soyfood. Market situation and trends. Indonesia. Singapore. Malaysia. Thailand. Constraints in the market development of soyfood (in each of the above 4 nations). Major trends in the development of traditional soyfoods. Marketing strategy of soyfood. Tables: 1. Traditional non-fermented soyfood products. 2. Nutritional composition of traditional non-fermented soyfoods. 3. Description and uses of traditional fermented soyfood products. 4. Nutritional composition of traditional fermented soyfoods.

5. 1987 estimated consumption of soybeans as foods in the Far East [total and per capita in East Asia]. China, 1,062 million population, 7,325,000 tonnes, 6.9 kg/capita. Japan, 122 million population, 1,141,000 tonnes, 9.3 kg/capita. South Korea, 42.1 million population, 330,000 tonnes, 7.8 kg/capita. Taiwan, 19.6 million population, 260,000 tonnes, 13.3 kg/capita.

6. Southeast Asia soybean consumption for food. From 1983 to 1989 the increase in 1,000 metric tons was: Indonesia 927 to 1,600. Singapore 14 to 26. Malaysia 32 to 70. Thailand 40 to 150. Philippines 9 to 24. Total 1,022 to 1,870 (increase of 82.9% in 7 years).

7. Per capita soybean consumption for food in Southeast Asia. From 1983 to 1989 the increase in kg/person was: Indonesia 6.0 to 8.8. Singapore 5.6 to 10.5. Malaysia 2.1 to 3.7. Thailand 0.8 to 2.6. Philippines 0.2 to 0.5. Average total: 3.8 to 5.9 (increase of 55.3% in 7 years).

8. 1987 estimated consumption of soybeans as foods in Southeast Asia [total and per capita]. Indonesia, 175 million population, 1,575,000 tonnes, 9.0 kg/capita. Thailand, 53.6 million population, 118,000 tonnes, 2.2 kg/capita. Malaysia, 16.1 million population, 55,000 tonnes, 3.4 kg/capita. Singapore, 2.6 million population, 20,000 tonnes, 7.7 kg/capita. Philippines, 61.5 million population, 18,000 tonnes, 0.3 kg/capita.

9. Indonesian soybean production, imports, and consumption as food (in tonnes). From 1983 to 1989, production rose from 536,000 to 1,250,000, imports decreased from 391,000 to 350,000, and the amount consumed as food increased from 927,000 to 1,600,000. About 50% of the soybeans used for foods in Indonesia go to make tempeh, and 40% are used to make tofu.

10. Singapore soybean consumption as food. From 1983 to 1989 the amount increased from 14,000 tonnes to 26,000 tonnes. Most of these soybeans are used to make tofu and soymilk. 11. Malaysia soybean imports and consumption as food (in tonnes). From 1983 to 1989, production rose from 182,000 to 440,000, and the amount consumed as food

increased from 32,000 to 70,000. 12. Thailand soybean production, and consumption as food (in tonnes). From 1983 to 1989, production rose from 113,000 to 490,000, and the amount consumed as food increased from 40,000 to 150,000. Only in 1988 were soybeans imported—40,000 tonnes. This growth of soyfood consumption is due partially to the Government of Thailand's interest in promoting the awareness and utilization of soyfood products. The Thailand Agricultural Extension Service program and other institutions have been actively advocating of soyfoods into the food industry and the human diet, especially in rural areas. The government controls soybean imports by issuing licenses.

In summary: The soybeans with the highest per capita soybean consumption for soyfoods are: Taiwan 13.3 kg, Japan 9.3 kg, Indonesia 9.0 kg, Singapore 7.7 kg, South Korea 7.3 kg, and China 6.9 kg. The greatest potential for growth lies in China, where it is very common to find markets running out of soyfoods early in the morning. There is also great potential for growth in Malaysia, Thailand, and the Philippines. Address: American Soybean Assoc., 541 Orchard Rd., #11-03 Liat Towers, Singapore 0923, Republic of Singapore.

3335. Katzen, Mollie. 1988. Still life with menu: Fifty new meatless menus with original art. Berkeley, California: Ten Speed Press. 350 p. Illust. Index. 29 cm. *

• **Summary:** Contains 17 tofu and 7 miso recipes, no tempeh. Many color illustrations throughout.

3336. Shurtleff, William; Aoyagi, Akiko. 1988. Das Miso-Buch: Hersetzung, Sorten, Kochen mit Miso, Rezepte [The book of miso: Production, varieties, cooking with miso, recipes]. Munich, West Germany: Goldmann Verlag GmbH. 414 p. Oct. Illust. by Akiko Aoyagi Shurtleff. Index. 23 cm. Pocket book edition. [Ger]

• **Summary:** A pocket book edition of the original 1980 German edition of *The Book of Miso*. Contains 350 recipes.

Contents: Foreword. What is miso? Part I. Varieties, preparation, and production of miso. Part II. Cooking with miso (recipes). Glossary. Acknowledgments. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

3337. Bolduc, Bill. 1988. Re: Early history of Eden Foods, Inc. to 1973. Part I. Letter to William Shurtleff at Soyfoods Center, Nov. 5. 2 p. Revised 4 Dec. 1991 by Bill Bolduc, Ron Teegarden, and James Silver.

• **Summary:** The following account is based on hours of discussion between Bill Bolduc, the Redmonds, and the Silvers between 1988 and 1991. Bill is not familiar with the details of the history of the food co-op in Ann Arbor prior to 1969. But Ronnie Teegarden says that in about July 1967 he and Gloria Dunn started a loosely-organized food buying

co-op—which had no name—in Ann Arbor, Michigan. Within a few weeks, a number of their friends and acquaintances (a group of eclectic pathfinders, students, graduates, macrobiotics, dropouts, musicians) informally joined the group. These included Tim Redmond, Mark and Nancy Retzloff, Linda Succop, Iona Teegarden, and Bob Thorson. From time to time, they collectively ordered macrobiotic staples from Erewhon in Boston using the Erewhon catalog. When the foods arrived, the food co-op members got together and divided them up at the Teegarden-Leabu General Store, located a half flight below street level at 209 South State Street, below the Herb David Guitar Studio in Ann Arbor. Run by Ronnie Teegarden, with help from Gloria, this store's main business was selling local art, second hand clothes and records, etc.

Bill Bolduc and Judy Succop [Linda Succop's sister], were married in June 1969 in Ann Arbor. They were not yet members of the co-op at that time. A few days later, they went to Berkeley for the summer. When they returned to Ann Arbor at the end of that summer, they lived in Saline, Michigan, 12 miles outside of town with Mark & Nancy Retzloff, Linda Succop, and Tim Redmond. Bill, who wasn't working or going to college, was trying to figure out what to do next. By September 1969, Bill and Judy Bolduc joined the food co-op. They also joined the Zen Macrobiotic Supper Club; all of its members were also members of the food co-op.

In the fall of 1969 the Teegarden-Leabu second-hand store looked like it was about to close, which would leave the food co-op without a home. The group (especially Ronnie) convinced Bill Bolduc to take charge of the food co-op and find it a permanent home, which he did.

On 4 Nov. 1969 Bill Bolduc incorporated Eden Organic Foods, Inc. as a non-profit corporation in the state of Michigan. The name "Eden," which stood for Environmental Defense Energy Network, was coined at this time by Bob Thorson during a discussion between, Bill Bolduc, and Gloria Dunn at a coffee shop. Thus, the term "Eden" was first used in connection with this co-op or business in Nov. 1969.

Eden was born under a good star. The date Nov. 4 was carefully chosen to be astrologically propitious. At the time, Bill was an intense student of astrology with Michael Erlewine—who is now world famous in the field, and the owner of Circle Books, an astrological publishing company. In 1970 Michael also designed the Eden logo of the 4 sprouts in a circle. Eventually Michael became one of Bill Bolduc's students in macrobiotics.

Bill was president of Eden Organic Foods and his wife Judy (who was working as a secretary at the University of Michigan School of Music) was secretary. Bolduc used \$200 of his own money to rent a converted apartment above the bicycle store at 514 East William St. in Ann Arbor, near campus. People from the community loaned \$1,500 to help

stock the co-op store and buy an 8-inch Meadows stone mill to grind flour.

The question arises: When was Eden Foods established? Bill Bolduc and Tim Redmond believe that the founding should be dated from Nov. 1969, when the company was first named; before Nov. 1969 the food co-op was not even a business. It was dead and had disappeared for about a month until Bill resurrected it by placing an order to Erewhon using his own money.

Eden Organic Foods first began selling soyfoods commercially in November 1969, starting with their first order from Erewhon in Boston. They would buy "tamari" (actually shoyu) and miso (kome = rice, mugi = barley, and Hacho varieties) in bulk from Erewhon (which imported them from Japan). At their store, Linda Succop (Bill's wife's sister) would repackage the products, putting the shoyu into bottles and the miso into plastic bags. They were labeled using plain white pressure-sensitive gummed labels with a rubber stamp. One stamp contained the name and ingredients for each product, and another, that was stamped below it, gave the company name and address. They wrote in the weight or volume by hand. Also at William St. a tiny Meadows Mill was used to grind grains and seeds into flour. Continued. Address: ELI Research Corp., 660 Northland Blvd., Suite 28, Cincinnati, Ohio 45240. Phone: 513-851-0330 or 513-751-9090.

3338. Bolduc, Bill. 1988. Re: Early history of Eden Foods, Inc. to 1973. Part II. Letter to William Shurtleff at Soyfoods Center, Nov. 5. 2 p. Revised 4 Dec. 1991 by Bill Bolduc, Ron Teegarden, and James Silver.

• **Summary:** In Sept. 1970 the fledgling company had an offer to move into a newly-redecorated mini-mall [at 211 South State St.] on the main street of campus. New personnel and financing would be needed. Bolduc called Tim Redmond, who had been studying and working at the Sanae macrobiotic restaurant in Boston, to ask for help. Tim returned to Ann Arbor and joined Bolduc in the expansion effort. To raise money for the move, the two approached Tim Redmond's father, who said he would help finance the expansion only if the business was reorganized as a for-profit corporation with Tim having equal ownership. They agreed and in about Oct. 1970 Eden was reorganized as a for-profit corporation with Bolduc and Redmond each owning 50%. At that time the partners shortened the company name to Eden Foods Inc. Bolduc and Redmond then borrowed a 4-figure sum from Tim's dad, had the new store remodeled, and entered the big time. After the new store was opened and running, Redmond returned to Boston and the Sanae restaurant, where he completed his studies. But with this move they fell from the graces of the political co-ops. In November 1970 they did a "Brown rice, seaweed, and dirty hot dog" Bob Dylan commercial on a local radio station; it was a big hit. They bought a 15-inch

Meadows Mill and a rotary-drum roaster, then milled flour and baked granola in the back of the store.

In 1970 Bill had located Tom Vreeland, an organic farmer in Ypsilanti, Michigan. An Eden Foods Wholesale Pricelist dated 26 July 1971 shows that the Eden store at 211 South State St. was wholesaling soybeans, soft wheat, corn, and rye, all grown organically in Michigan. Eden was also selling organic flours that they ground from these grains.

In the spring of 1971, after realizing they were the only “natural food” store in the area, and having some other “health food” store owners in Detroit express an interest in carrying more food, they decided to wholesale foods out of the back of their retail store at 211 South State Street. Bill flew to Boston to meet Tim Redmond. They visited Erewhon (they wanted to convince Erewhon to let Eden be their distributor at lower prices), then Bill flew to Arrowhead Mills in Deaf Smith County, Texas, to make arrangements buying in bulk at wholesale prices. In the summer of 1971 they ordered their first 20-foot trailer load of organic foods from Arrowhead Mills, and ran an ad in *East West Journal*. Soon they started to distribute their foods to 4-5 accounts in Detroit. They bought a 1964 16-foot green Dodge van and a dry weight weigher/dumper machine. Their two main brands were Arrowhead Mills and Erewhon, but soon they developed the Eden brand with printed labels, onto which they would rubber-stamp the product name (such as bottled tamari and packaged miso). Soon they added other brands: Celestial Seasonings, After the Fall, Timbercrest, etc.

The wholesale operation quickly outgrew the back of the retail store, so they borrowed more money and rented a 5,000 square foot Quonset hut (resembling an airplane hanger) down on Main Street by the Huron River. Tim Redmond, Mark Retzloff, and Bill Bolduc ran the wholesale operation. Retzloff later co-founded Alfalfa’s, a natural foods supermarket chain based in Boulder, Colorado.

In October 1971 Bolduc hired Michael Potter, who was living in Detroit, to run the store. Just before this, Potter had managed a natural foods store named Joyous Revival in nearby Birmingham, Michigan. Prior to this time, the company had been owned by Bill and Judy Bolduc (50%) and by Timothy Redmond (50%). Potter was given 13.5% of the stock and the other principals’ share reduced proportionally.

In the late summer or fall of 1973 the Bolducs sold their shares back to the corporation, which then gave a portion of these to Tim Redmond and Michael Potter so that these two men now owned 51% and 49% respectively.

The Bolducs then left Ann Arbor, moving to Cincinnati, then to Illinois, then back to Ann Arbor. Bill is certain that when he left Eden Foods, the company was not importing any products from Japan. He would guess that it was not until about 1975 that Eden started to import a line of foods

from Japan. Their first supplier in Japan was Muso Shokuhin, a leading macrobiotic and natural foods exporter in Osaka. Initially, all of their imported products were required to bear the Erewhon brand. Imported soyfoods included miso and shoyu. Sales hit \$175,000 in 1973.

Note: Eden was the first of the many macrobiotic distributors based on the Erewhon model to open in America. Others that soon followed included Food for Life in Chicago (1970), Janus in Seattle, Washington (1972 Jan.), Essene in Philadelphia (by 1971 Feb.), Laurelbrook in Maryland (1971 Aug. 23), Ceres in Colorado Springs (by 1973), and The Well in San Jose, California (1973). Address: ELI Research Corp., 660 Northland Blvd., Suite 28, Cincinnati, Ohio 45240. Phone: 513-851-0330 or 513-751-9090.

3339. Sheraton, Mimi. 1988. Cookbooks to give thanks for: An autumn harvest of American standards, Asian flavors and universal inspiration. *Time* Nov. 28.

• **Summary:** *An Ocean of Flavor* (Morrow, \$20.95) is by Elizabeth Andoh, an American who married a Japanese and has spent many years in Japan studying the country’s food and culture. This fine guide shows how to enhance the flavor of seafood without destroying it. “Fried soft-shell crabs in a spicy sauce, cold poached tilefish with mustard-miso sauce and fiddlehead ferns, and a careful, simple tempura recipe are among the enticements.”

Another new Asian food book is *Asian Ingredients* (Morrow; \$22.95) by Bruce Cost. It includes a discussion of the “soy sauces that so many chefs are now using to accent European dishes.”

3340. Belleme, Jan. 1988. Fabulous finger foods. *East West*. Nov. p. 32, 34, 36-39.

• **Summary:** Includes recipes for: Tempeh Salad Tea Sandwiches. Walnut-Miso Dip. Deep-Fried Tempeh with Tofu-Mustard Topping. Address: Rutherfordton, North Carolina.

3341. **Product Name:** [Organic Barley Miso, Rice Miso, White-Mellow Rice Miso, Organic Rice Miso with Herbs, Organic Oat-Yellow Pea Miso, Organic Barley-Yellow Pea Miso, Organic Rice Koji, Organic Barley Koji].

Foreign Name: Bio Kornmiso, Rismiso, Ljus Rismiso, Bio Ört Miso, Bio Havre-•rtmiso, Bio Korn-•rtmiso, Bio Ris Koji, Bio Korn Koji.

Manufacturer’s Name: Timoteus Kojiprodukter HB (Handelsbolag).

Manufacturer’s Address: Härvstgård, 19 063 Örsundsbro, Sweden. Phone: 0171-65106.

Date of Introduction: 1988. November.

New Product–Documentation: Talk with Ted Nordquist. 1990. Nov. 23. The miso company, originally named Malvabo (which see, 1979) has always been owned by Tim

Ohlund, never by Aros. From the beginning, Tim made the koji at home in Malvabo near Örsundsbro, then cooked the soybeans and mixed and ground them with the koji and salt at Aros. He fermented the miso in the basement of Aros in 30-50 liter ceramic crocks. Initially Tim operated without a company name and sold the miso directly to stores and individual customers. Then in late 1988 he started a company named Timoteus, which makes and sells two products: miso and koji. Tim is now employed by Ted, manufacturing and delivering tofu, but Tim still makes miso; he does not make tempeh.

Letter and Labels for all of the above products from Tim Ohlund, owner of Timoteus Kojiprodukter HB. 1991. May 14. In Dec. 1986 he started to produce miso on a larger scale in anticipation of registering his company. In Nov. 1988 he first registered the company at the local registrar's office as Timoteus Kojiprodukter Handelsbolag (HB), Härvestagård, 19 063 Örsundsbro, Sweden. Phone: 0171-65106. He first sold miso (rice miso and barley miso) commercially in Nov. 1988. The largest amount of miso he has ever sold in one year is about 1,000 kg. He has never made any other fermented soyfoods commercially, but he has made tempeh for home use. Tim tried to register Timoteus as a trademark at the patent and trademark office. A preliminary check indicated that the trademark would probably be granted, so Tim started printing labels. After waiting nearly 2 years for bureaucratic processing, he was informed that he could not register it as a trademark. Hoechst, a big Swiss multinational company, already had a registered product with a similar name (Timote), and it was also a grain-based foodstuff. Now Tim may have to change the name Timoteus and reprint all his labels, or remain small and lay low. Present status: Timoteus makes about 800 kg/month of all kinds of miso plus 5-6 kg/week of dried koji. The 3 best-selling products are rice miso, barley miso, and white-mellow rice miso, each selling 30 kg/week. Timoteus is owned equally by Tim and his wife Annalena; Tim is the sole worker. The business uses about 7 square meters of storage space at Aros Sojaprodukter, and uses the production facilities once a month. Sales last year were 28,000 Skr.

Tim has been working at a natural food store for the past 4 years; the ownership changed 4 times in those 4 years and each new owner was worse than the one before, losing idealism and becoming more of a pill shop. So Tim quit last year and Ted Nordquist got him to return to working at the Aros tofu factory again. Now Ted has sold half of his company and will be moving tofu production to the south of Sweden to make it more efficient. When Ted sells that building, Tim will have no place to make miso that is inexpensive enough. Miso sales are too small and weak to allow for any even moderate investments at this time. There are several places where he could make miso inexpensively but they both require that he move, which he does not want

to do. So Tim is out of a job, with a family and 3 kids to support, and with the natural foods sector in Sweden apparently decreasing in size. Tim hopes to get a student loan to return to Uppsala University to study economics and ecology.

Labels sent by Tim Ohlund. 1991. May 14. Each is 2.5 by 1.5 inches. Self adhesive. One has black letters on glossy white paper. Another has black letters on light golden brown, with the company name, address, phone, and a striking logo, showing a stylized person kneeling and receiving light from heaven in an uplifted vessel. Talk with Tim Ohlund. 2001. April 21. He stopped making miso commercially in about 1990 when Ted Nordquist moved his tofu factory. But he still makes miso on a home scale for his family and friends.

3342. *Loveland Reporter-Herald (Colorado)*. 1988. Miso works as flavoring substitute. Dec. 28.

• **Summary:** "Miso, a fermented seasoning made from a legume or grain plus salt, water and a bacterial culture. Is a good flavoring substitute for meat and meat broth, says Karen Wilken, Colorado State University Cooperative Extension food science and human nutrition specialist... Miso can be used as a substitute for bouillon or meat stock in soups, gravies or stews. It also can be used like soy sauce or Worcestershire sauce in sauces, dips and dressings.

"Because it is relatively low in sodium it can serve as a seasoning in moderate salt level diets."

3343. American Miso Co. 1988. Our two new misos!: The American Miso story (Ad). *Vegetarian Times*. Dec. p. 40.

• **Summary:** This one-third page vertical black-and-white ad begins: "Miso Master is proud to announce two new misos: Brown Rice Miso and Sweet Barley." Near the top of the ad is a logo of bound sheaves of grain. Near the bottom of the ad is the Miso Master logo, an illustration showing the head and shoulders of a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso. Below "Miso Master is produced by the American Miso Co. for Great Eastern Sun." Address: Rutherfordton, North Carolina.

3344. Brown, Judy. 1988. The joy of soy: Nutrition for the '80s. *Body, Mind & Spirit*. Nov/Dec. p. 30-32.

• **Summary:** Contents (Soyfoods, nutrition, and a healthy diet). Tofu. Tempeh. Miso. Natto. Okara. Soy cheese & soy yogurt. Soy flour & grits. Soymilk. Soy sauce. Resources: Eden Foods, Fantastic Foods, Inc., Lumen Foods Corp., San-J International. Vitasoy (U.S.A.) Inc., Westbrae Natural Foods (Downey, California). Address: President, In Good Taste, 5923 John Adams Dr., Camp Springs, Maryland 20748.

3345. Dagnelie, Pieter C. 1988. Nutritional status and growth of children on macrobiotic diets: a population-based study. PhD dissertation, Dep. of Human Nutrition, Wageningen Agricultural University, the Netherlands. 144 p. [Eng]*
Address: Dep. of Human Nutrition, P.O. Box 8129, Wageningen Agricultural Univ., 6700 EV Wageningen, the Netherlands.
3346. Golbitz, Peter. 1988. Soyfoods sales projected to reach \$750 million by 1990. *Soya Newsletter (Bar Harbor, Maine)*. Sept/Dec. p. 1, 6.
• **Summary:** The estimated retail value of soyfoods in the USA in 1988 was \$682 million. The various soyfoods had the following market shares: soy sauce 67.3% (est. \$460 million retail store valuation), tofu 11.3% (est. \$77 million), second generation products 9.5%, soymilk 5.3%, miso 4.1%, soynuts 1.7%, tempeh 0.8%.
All of the 1980 figures used in this study for comparisons and growth rates were taken, without permission, from *Soyfoods Industry & Market: Directory and Databook* by Shurtleff & Aoyagi. Address: Soyatech, Bar Harbor, Maine.
3347. Harayama, Fuminori; Yasuhira, Hitomi. 1988. *Aspergillus-zoku to Rhizopus-zoku no daizu tanpaku bunkai sayô no hikaku* [Comparison of hydrolytic action on soybean protein by the genus *Aspergillus* and *Rhizopus*]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 83(12):828-33. Reprinted in Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.). No. 30. p. 94-99. [19 ref. Jap; eng]
• **Summary:** Changes in protein during manufacture of miso and fermented soybeans using fungi of the genera *Aspergillus* and *Rhizopus* were examined by SDS-polyacrylamide gel electrophoresis. The protease activity, especially of *Rhizopus*, was largely inactivated by ethanol in salt-free miso containing 5% ethanol. *Aspergillus* hydrolyzed soybean protein to products of low molecular weight, whereas *Rhizopus* only slightly hydrolyzed it, leaving mostly middle and high molecular weight substances. Address: The Shinshu-Miso Research Inst., 469-6 Nakagoshô, Nagano City, Japan 380.
3348. Kikuchi, S. 1988. [Packaging and cold chain distribution of raw, unpasteurized miso]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 83(12):797-99. [Jap]*
3349. Lamont, Heather. 1988. The gourmet vegan. London: Victor Gollancz Ltd. 153 p. Index. 20 cm.
• **Summary:** This unillustrated vegan cookbook makes relatively little use of soyfoods, although it does use tofu (4 recipes), miso (3), and soya milk (in Soya Pudding). The author, a nurse by profession, has won three recipe competitions. Address: Quorn, Leicestershire, England.
3350. Beddows, C.G. 1988. The old fashioned way with soya. *Food Science & Technology Today* 2(1):12-15. [6 ref]*
• **Summary:** The following soybean products are described briefly: soymilk, bean curd, tofu, tempeh, natto, sufu, miso, shoyu, and yuba. Protein yields are given for a range of plant crops versus milk and beef, e.g. soybeans 3500 kg/ha/annum versus 75 kg/ha/annum for beef. Recipes are included for miso cream cheese dip and deep fried tofu and miso soup. The marked rise in consumption of soybean products in the USA in recent years is noted. Address: Dep. of Applied Sciences, Leeds Polytechnic, Leeds LS1 3HE, England.
3351. Hu, J.; Zhang, S.; Jia, E.; Wang, Q.; Liu, S.; et al. 1988. Diet and cancer of the stomach: A case-control study in China. *International J. of Cancer* 41:331-35. *
• **Summary:** In this case-control study, consumption of miso soup or miso was associated with increased risk of stomach cancer, but the association was not significant upon multivariate analysis.
3352. Ko Swan Djien. 1988. Recollection of tempeh. *Onko Chishin* No. 25. p. 42-48. [11 ref. Eng]
• **Summary:** A brief review of the author's involvement in fundamental tempeh studies. During the late 1950s the author taught Technical Microbiology at the Bandung Inst. of Technology in Indonesia. In 1960 he was granted a sabbatical to study antibiotics and related fermentation processes at the Northern Regional Research Center (Peoria, Illinois) under Dr. Clifford W. Hesseltine. "Dr. Hesseltine's background was in conventional liquid agitated pure culture fermentation. But when Ko arrived, he had just finished his first experiments with a solid substrate fermentation process of an Asian soybean food, by studying aspects of miso fermentation with Dr. K. Shibasaki of Tohoku Univ. Dr. Hesseltine became utterly fascinated with the use of solid substrates and the application of pure mixed cultures in miso fermentation. This made him curious to know more about other non-Western fermented foods which were still unknown to many people in the Western world. During our first conversation, Dr. Hesseltine asked me cautiously, whether I was familiar with an Indonesian food which was made by fermentation of soybeans with a certain mould species. I immediately assumed that he had 'tempe' in mind. Since tempe is a regular ingredient in the Indonesian menu, it was not difficult for me to tell him about the culinary aspects of tempe. However, knowledge of the microbiological aspects was minimal, because basic background information was not yet available.

“Instead of discussing the latest developments of fermentation technology which was the purpose of my visit to the U.S.A., Dr. Hesseltine and I theorized about tempe fermentation and we became more and more fascinated by the still unknown aspects. We soon agreed that it might be more interesting to study fundamental principles of tempe fermentation during my period of practical training rather than starting a study of one of the many detailed aspects of a modern fermentation process. At that time we could not foresee that this decision was a contribution to sparking a wave of research activities with world wide interest.”

This research by Ko and Hesseltine led to the discovery that *Rhizopus oligosporus* was the principal species of mold used for traditional tempeh fermentation in Indonesia. This led to development of a pure-culture tempeh starter/inoculum. “An important aspect during these studies was the unexpected publicity given by the Indonesian press. It aroused curiosity and was a great stimulus to other universities and research institutes to study various aspects of tempe fermentation.”

In 1968 the author joined the Agricultural University, Wageningen, Netherlands, where his research showed that *R. oligosporus* does not produce aflatoxins, and actually inhibits their production. A photo shows Ir. Ko Swan Djien. Address: Bandung Inst. of Technology, Indonesia, and Agricultural Univ., Wageningen, Netherlands.

3353. Product Name: Red Shell Japanese Miso Dressing.
Manufacturer’s Name: Red Shell Food (Importer-Distributor). Made in Japan.
Manufacturer’s Address: Rowland Hts., CA 91748.
Date of Introduction: 1988.
Wt/Vol., Packaging, Price: 12 fluid oz jar retails for \$1.79.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: On sale at Yaohan department store in Los Angeles. 1988. Oct. 23.

3354. Sojarei Ebner-Prosl. 1988. Tofu aus der Sojarei [Tofu from the Sojarei (Leaflet)]. Baden bei Wien, Austria. 6 panels. [Ger]

• **Summary:** This full-color orange and red leaflet explains that the company makes and sells many fresh soy products, mostly tofu and tofu products, but also tempeh and soy sprouts. They sell tamari, shoyu, miso, gomashio (sesame salt), many types of vegetables, flakes, and legumes. They also have a soya recipe brochure and a tofu cookbook.

This young family-run business, founded in 1984, focuses on fresh soyfoods of the best quality—pure and natural. Sojarei tofu is described as the culinary wonder child in unpretentious clothes, but with many talents. Tofu is sold in slices, diced, or in strips. It can be pressed or pureed. There are color photos of the two owners and their wives, of tofu, and of 5 tofu dishes. Address: Augasse 2, A-2500

Baden bei Wien (near Vienna), Austria. Phone: 02252/85101.

3355. Product Name: Chick Pea Miso.
Manufacturer’s Name: South River Miso Co. Inc.
Manufacturer’s Address: South River Farm, Conway, MA 01341.
Date of Introduction: 1988.
Ingredients: In 3/92: Deep well water, organically grown brown rice and chick peas*, and unrefined sea salt. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 1 lb plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Product with Label sent by Christian Elwell. 1992. March 13. 1 lb beige plastic tub with black and brown text. “Unpasteurized. Please refrigerate. Vintage. Winter 1987.” This miso contains no soybeans. There is a statement about traditional miso making signed by Christian and Gaella Elwell, a recipe for everyday miso soup, and an illustration of a silhouette of a mother handing a bowl of soup to her son seated across the table. Letter from Christian Elwell. 1992. May 28. This product was introduced in 1988.

Talk with Christian Elwell. 1996. Sept. 7. Concerning the origins of chick pea miso. From January to April 1978 Christian and his wife, Gaella, lived and studied with Noboru Muramoto at Asunaro Eastern Studies Institute in Glenn Ellen, California. Christian recalls that Mr. Muramoto taught that miso can be made from a combination of any grain plus any beans, but he does not recall Mr. Muramoto ever making or specifically mentioning chick pea miso—but he could well have had some going there.” Mr. Muramoto did make miso with peanuts—and many other unorthodox ingredients. Christian still makes and sells his Chick Pea Miso—but American Miso Co. made this product commercially before Christian did. A macrobiotic counselor and licensed nutritionist, Lino Stanchich (who is from Yugoslavia, was a friend of Muramoto’s, and now lives in West New York, New Jersey 07093), feels that chick peas are very good for Americans because of the “doctrine of signatures,” where the chick pea is associated with the heart. This doctrine says that plant parts which appear like human organs are associated.

3358. Anderson, Eugene N. 1988. *The food of China*. New Haven, Connecticut: Yale University Press. xvi + 313 p. Index. 24 cm. [380 ref]

• **Summary:** Contents: Preface. Acknowledgments. Chronology of food and agriculture in China. 1. The natural environment. 2. Prehistory and the dawn of civilization. 3. The crucial millennium: Chou through Han. 4. Food from the West: Medieval China. 5. Definitive shaping of the food system: Sung and the conquest dynasties. 6. Involution: Late imperial China. 7. The climax of traditional agriculture. 8. Chinese foodstuffs today. 9. Some basic cooking strategies. 10. Regions and locales. 11. Traditional medicinal values of food. 12. Food in Society. Appendix: Dinner at the Ngs.

Soybeans and soyfoods are mentioned as follows: North China is the native home of the soybean (p. 3). Soybeans seem to have been introduced to China in about 1000 B.C., but they were not popularized until the early Eastern Chou period (Ho 1975). Called, *shu*, they “seem to have come from the Jung people, northern and northeastern neighbors of the Chinese, who may have been Tungusic or Altaic, and were perhaps related to or descended from the Hungshan.” Domesticated soybeans are descended from wild soybeans (p. 29).

Fan Sheng-chih wrote an agricultural manual in the first century B.C.; it survives in extensive fragments quoted in later agricultural works. This manual mentions the “Nine Staples”: wheat, barley, millet, glutinous millet, spiked millet, soybeans, rice, hemp, and small beans (*Vigna* spp.) (p. 50).

The art of fermenting soybeans was perfected sometime in the late Chou period, or perhaps even as late as the very early Han. Thereafter, Han texts devote much space to salt-preserved soybeans, called *tou shih* (or *shih*), the *tausi* of modern Cantonese cooking. *Chiang*, fermented sauce, was made from beans, but also from meat and elm products (p. 51).

During the late Southern Sung, Wu Tzu-mu coined the famous phrase: “the things that people cannot do without every day are firewood, rice, oil, salt, soybean sauce, vinegar, and tea” (Freeman 1977, p. 151). By the Sung, *chiang* had come to refer unequivocally to soy sauce; as late as the T’ang, it would probably have been understood, at least in literary contexts, to refer to a variety of fermented foods (p. 82).

Bean curd or *tou fu* (Japanese tofu) was first mentioned in the early Sung; its invention was attributed to Liu An of the Han Dynasty, “but this is preposterous.” In fact, tofu “was invented in the late T’ang or early Sung—possibly by Taoists and/or people from the Huainan region, who then ascribed it, out of a sort of respect, to Liu An, the Taoist prince of Huainan (B.W.-C. Young, pers comm). Buddhists quickly took over the food as a good substitute for meat and for dairy foods...”

Also discusses: Vegetarian cooking (p. 66, 86, 118, 150, 196, 204, 249). Vegetarianism came to China with Buddhism during the T’ang dynasty. Fish farming (p. 103, 129). Note: Eugene Newton Anderson was born in 1941. Address: Dep. of Anthropology, Univ. of California, Riverside, CA 92521.

3359. Cost, Bruce. 1988. *Asian ingredients: Buying and cooking the staple foods of China, Japan and Southwest Asia*. New York, NY: William Morrow & Co. 333 p. Illust. Index. 26 cm. [39 ref]

• **Summary:** Soy related: Soybean sprouts and recipe (p. 86). Beans, incl. soybeans (p. 146-50). Asian “dairy” (p. 186-87): The soybean and the coconut (incl. bean curd, doufu-nao, fermented bean curd / fu-ru, molded bean curd / chou dou-fu, dried bean curd / dou-fu gan, and bean curd skin [yuba]). Soybean milk.

Soybean sauces, condiments and pastes (p. 195-210): Salted and fermented black beans with recipes for “Roast chicken with black beans stuffed under the skin,” and “Soft-shell crabs with ginger, lemon, and black beans” (“Fermented black beans, often flavored with bits of ginger and sometimes orange peel, are usually sold in 8-ounce plastic bags.” Acceptable brands: Mee Chun or Koon Chun Sauce Factory. “Earthier and probably more classic are the Yang Jiang Preserved Beans (with ginger) from Kwangtung, China), bean sauce (other names: Yellow bean sauce, brown beans sauce, bean paste, jiang; two types are with the beans whole or ground), hot bean sauce / paste with recipe, hoisin sauce, sweet bean sauce (made with soybeans, Taiwan), soy sauce (Chinese, Japanese, tamari; Highly recommended light soy sauce: Pearl River Bridge. Highly recommended dark: Pearl River Bridge Mushroom Soy, flavored with straw mushrooms), Java’s ketjap and other soy sauces miso with recipe, yellow miso (*Shinshu miso*), white miso (*shiro miso*, *Kyoto shiro miso*, sweet white miso), red miso (*aka miso*), Hatcho miso [soybean miso], barley miso (*mugi miso*), fermented bean curd (white or red; also called preserved bean curd, bean cheese, doufu-ru or fu-ru {Mandarin}, fu yu {Cantonese}) with two recipes).

Concerning ketjap (p. 206): Tomato ketchup, although it may seem to be of Asian origin, may or may not come from a family of Asian pickled products. But the word “ketchup” is clearly of Asian origin. [Note: The modern Indonesian word for soy sauce is *kecap* / *ketjap* / *kechap*.] “It comes

from the Malay *kechap*, which apparently derives from the *kôe-chiap* of a southern Chinese dialect (Amoy); both of these refer to the kind of briny liquid preserves that include fish and soy sauces." Throughout most of Southeast Asia, fish sauces are the standard condiment, in Indonesia (incl. Java) soy sauce is more widely used. Sweet Indonesian soy sauce (*ketjap manis*), which is very widely used, is traditionally sweetened with palm syrup and seasoned with garlic, star anise, salam leaves, and galangal.

Also discusses: Seaweed (p. 165-70): Kelp (*Laminaria*), laver (*Porphyra*), wakame, dashi, hair vegetable / black moss / hairlike vegetable (China; *Gracilaria verrucosa*), agar-agar. Monosodium glutamate (p. 247)

Bruce Cost was born in 1945. A photo and brief biography appears on the inside rear dust jacket. Address: [San Francisco, California].

3360. Goetz, Rolf; Queissert, Peter. 1988. Einfach anders essen: Unser Naturkost-Kochbuch [Simply eat differently: Our natural-foods cookbook]. Schaafheim, West Germany: Pala-Verlag. 156 p. Index. [10 ref. Ger]

• **Summary:** Contains recipes using miso, seitan, tamari, tempeh, and tofu. Address: Germany.

3361. Hesseltine, C.W. 1988. Transfer of food fermentation technology. In: M.F. Moyal, ed. 1988. Diet and Life Style. New Technology. John Libbey Eurotext Ltd. See p. 159-65. [10 ref]

• **Summary:** Describes examples of successful transfer of new technology, especially with Oriental fermented foods, such as tempeh, miso, and sufu. Address: 5407 Isabell, Peoria, Illinois 61614.

3362. Kaysing, Bill. 1988. Bill Kaysing's freedom encyclopedia. Instant Improvement Inc., 1160 Park Ave., New York, NY 10128. 295 p. See p. 87-94. [1 soy ref]

• **Summary:** The dust jacket of this book states, under the title: "Freedom from junk food. Freedom from supermarket rip-offs. Freedom from slavery to doctors and landlords. Freedom from food-induced sickness and premature aging." The book has sold very well. In the chapter titled "Eating better for less," there is a section on soybeans (p. 87-94). It discusses cooked soybeans, soy grits, soy flour, soy protein (isolate), soy sprouts, soy coffee, miso, Tofutti, soy milk, and tofu, with the greatest praise reserved for tofu. A number of recipes are included. On page 94, two panels from the Soyfoods Center (Lafayette, California) catalog of publications are reproduced. They describe the center and the many virtues of soyfoods. Below is a caption: "This organization is bringing a new era in good food to the United States. Write for their handsome brochure, listing books and other data."

3363. Kurz, Marey. 1988. Soja in der Vollwertkueche: Rat und Rezept-Ideen zum Kochen und Backen mit allen Soja-Varianten: Bohnen, Mehl, Milch, Sauce, Tofu und Miso. Das erste komplette Soja-Kochbuch [Soya in whole-foods cookery: Advice and recipe ideas for cooking and baking with all the varieties of soya: Beans, flour, milk, sauce, tofu and miso. The first complete soya cookbook]. Munich, West Germany: Graefe und Unzer GmbH. 102 p. Illust. Index. 20 cm. [11 ref. Ger]

• **Summary:** The copyright (but not the title page) page says that this is a 3rd edition, however the ISBN is unchanged from the 1984 edition. Address: West Germany.

3364. Lautensach, Hermann; Dege, Katherine; Dege, Eckhart. 1988. Korea: A geography based on the author's travels and literature. Translated from the German. Supplemented with a thoroughly revised and expanded index. And edited by Katherine and Eckhart Dege. Berlin, Heidelberg, New York, London, Paris, Tokyo: Springer-Verlag. xvii + 598 p. See p. 160, 180-81. Illust. Maps (some color). 26 cm. [936* ref]

• **Summary:** With 42 photographs, 95 diagrams, 46 tables and a [larger color] map." This classic was first published 40 years ago (a few months before the end of World War II) and the field work was done 50 years ago, when Japan still ruled Korea and all place names were Japanese; these names have all been updated.

Chapter 6, titled "The anthropogeographical character of ancient Korea" (p. 149+) contains extensive information about agriculture and food. Page 160: In wealthier sites, the farm buildings enclose a courtyard, to which an entrance gate gives access (Fig. 37c, p. 158). Some enclosures are so complete that a square courtyard results. "In some corner or other of the courtyard stand the huge brown earthenware jars, in which soy sauce (Jap. *shoyu*, Kor. *kanjang*) is prepared and stored."

Page 180: In East Asia, after cereal grains, pulses / legumes are the next most important crop. In Korea, by far the most important is the soybean (Kor. *k'ong*), which makes few demands on the soil. Korea's climate is ideal for soybeans (Tanaka 1931, p. 18); it is even better than Manchuria's climate, because of the large amount of precipitation during the summer. Today, soybeans are an indispensable part of the various dry-field crop rotations. After planting of the paddies has finished, soybeans are planted on the ridges too; there they grow extremely well without being fertilized. Soybeans are grown throughout Korea, but least in the Kaema upland because of the warmth they require. In northern Korea, on dry fields, they are planted between the end of March and beginning of May. Toward the south, planting is delayed until the end of June. They are generally harvested in October, except in Chejudo, where they are not harvested until early November. Soybeans are the crop that is left standing the longest, and

they are not harvested until their leaves have turned brown and started to fall.

Soybeans are used as a very nutritious food for both humans and horses. Also, cooked soybeans are used as a fertilizer for the rice paddies. "Above all, though, the hot brown soy sauce, which is never lacking on any Korean or Japanese table, is made of them, using salt and pepper and a process of fermentation. Bean curd (Kor. *tubu*, Jap. *tofu*) and soybean paste (Kor. *toenjang*, Jap. *miso*) are also made of them."

Adzuki beans, cotton and hemp are discussed on p. 181. Hermann Lautensach lived 1886-1971. This book was first published in 1945 in German. Address: Prof., Dr.

3365. Leneman, Leah. 1988. *Soya foods cookery*. London and New York: Routledge & Kegan Paul. ix + 145 p. Illust. Index. 20 cm.

• **Summary:** Contents: Introduction. Recipes—1. Soya milk: Soya milk, soya yogurt, soft cheese [made from soya yogurt], and mayonnaise, soya milk skin (yuba). 2. Tofu: Tofu, frozen and dried-frozen tofu, smoked tofu. 3. Tempeh. 4. Miso. 5. Combi-dishes: Tofu and miso, tempeh and tofu.

An introduction to the subject, with more than 100 recipes. Almost half the book is devoted to tofu and tofu recipes. The author, born in the USA, has lived in Britain for more than 20 years. She was once assistant editor of *The Vegetarian*, and also worked at Cranks Restaurant (on Marshall St. in London W1). Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

3366. Philippine Council for Agriculture, Forestry and Natural Resources Research and Development. 1988. *Mga Gamit ng UTAW Bilang Pagkain* [The uses of soybeans as food]. Diliman, Quezon City, Philippines. 46 p. Illust. DA/ATI-PCARRD Farm Primer No. 3. Series of 1988. AC-R4-P-S-V-2-88. [3 ref. Tag]

• **Summary:** Part 1 (p. 1-20) of this Tagalog-language booklet, which contains many illustrations (line drawings), is titled "Soybean Products." It describes how to make basic soyfoods, such as soybean ketchup (*Ketsup na utaw*), soy coffee (*Kapeng utaw*), pastillas, soymilk curds (taho), tokwa (tofu), polboron (a confection usually made with powdered milk, but in this case using soybean powder), soymilk, soy flour (harinang utaw; note that utaw is word for soybean in Tagalog), tao-si (soy nuggets), soy sauce (toyo), and miso.

Part 2 (p. 25-45) titled "Soybean Recipes," includes chicken with miso, tofu with miso, tofu with mushroom soup, soymilk custard, fried meat (pork; Baboy), fried meat with miso, bamboo shoots with miso, baguio beans with miso, fried tofu with sweet & sour soy sauce, miso with noodle soup, chicken soup with tofu, and fried tofu with vegetable sauce. Address: Philippines.

3367. Quigley, Delia; Pitchford, Polly. 1988. *Starting over: Learning to cook with natural foods*. Summertown, Tennessee: The Book Publishing Co. 144 p. Illust. Index. 23 x 15 cm.

• **Summary:** The index to this natural foods, vegetarian (but not vegan) cookbook contains listings for 15 tofu recipes, 7 miso recipes, and 6 tempeh recipes, plus an incorrect definition of "tamari." The book uses a round yin-yang (*t'ai chi*) symbol to mark recipes that "qualify as macrobiotic." The authors have a Florida television show named "The Granary Gourmet." Address: Florida.

3368. Wood, Rebecca T. 1988. *The whole foods encyclopedia: A shopper's guide*. New York, NY: Prentice Hall Press. xv + 218 p. [200* ref]

• **Summary:** This book is mistitled. It should be titled "Rebecca Wood's Macrobiotic Views on Natural Foods." The parts on quinoa, teff, amaranth, and many macrobiotic foods provide good information. There is extensive information on soyfoods, all from a macrobiotic viewpoint, but with many errors or undocumented controversial assertions never seen before in the literature, such as the following: "Cold Tofu. Foods that are cooling, like tofu, tend to reduce the fire in the lower organs. This explains why tofu was eaten by Buddhist monks to abate their sexual desires. This is not a prescription against tofu. Well-cooked tofu is less cooling. For optimum health, we need a balance of warming as well as cooling foods. However, if you are feeling cold, or if it is a cold day, or if you have strenuous activities planned, then you may opt for salmon over tofu."

Foods mentioned are whole soybeans (yellow and black), fresh green soybeans, miso, natto, tofu, tempeh, TVP (textured soy flour), soy cheeses and ice creams, soy protein isolate, soymilk, soy nuts, soy oil, soy sauce, and soy yogurt.

Note: This is the earliest English-language document seen (Feb. 2005) that contains the term "cooling food." Address: P.O. Box 30, Crestone, Colorado 81131. Phone: 303 (or 719) -256-4939.

3369. *Theses on soybeans and soyfoods: Dissertation Abstracts (Database search report)*. 1989. 234 p. Jan. 20. 28 cm. Unpublished manuscript. [1106 ref]

• **Summary:** The Dissertation Abstracts database contains virtually every American PhD dissertation accepted at an accredited institution since 1861. A search yielded 1,106 theses on soybeans and soyfoods not including records with the terms pathogen*, Disease*, weeds, or insect* in the title or abstract. * = truncated term.

It contained the following number of theses on soyfoods: Soymilk 9-14, tofu 6, tempeh 6, miso 4, soy sauce 3, and natto 2.

The most valuable records for us are in the subject categories Food Science & Technology; Health Sciences,

Nutrition; and Economics, Agricultural. Other subject categories include: Agriculture (Agronomy, Animal Culture & Nutrition, General, Plant Culture, Plant Physiology); Biochemistry; Botany; Chemistry (Agricultural and Biological, Analytical); Engineering, Chemical; Entomology.

A count of the records in which we were interested by state where the thesis was written shows the following: Illinois 128, Iowa 68, Indiana 37, New York 30, Missouri 28, Michigan 26, Minnesota 25, and Ohio 17.

3370. Belleme, John. 1989. The imperial sauce: Rich, dark, and subtle, Japan's traditionally made shoyu is an outstanding and versatile seasoning. *East West*. Jan. p. 72-77. [2 ref]

• **Summary:** Westerners indiscriminately sprinkle soy sauce on everything from beef to popcorn. Almost half of the 60 million dollars spent annually by Americans on soy sauce goes for a product that is not even fermented. Kame, La Choy, and Chun King brands for example, are the result of a 1-day chemical process. The ingredients are soy extract, alcohol, sugar, salt, food coloring, and preservatives. Nearly all other soy sauce sold in the U.S.—such as Kikkoman, Yamasa, Marukin, Higashi-Marukin, and Maruten—is made from chemically processed soy meal by a high-tech, accelerated method and temperature-controlled fermentation, and it usually contains sodium benzoate as a preservative.

Traditional shoyu products reach U.S. consumers in a roundabout way. For example, Muso buys traditional shoyu from the Marushima Brewing Co. of Shoda Shima, Japan, and exports it to Eden Foods, which sells it to American consumers under the Eden label. Ohsawa Japan buys from the Yamaki Brewing Co. of Tokyo, and sells to Ohsawa America, which bottles and sells it under the Lima label. The largest producer of traditional shoyu is the Sendai Shoyu and Miso Co. of Sendai, Japan. Sendai makes Johsen Shoyu, which is exported by Mitoku and is bottled in the U.S. under different brand names, including Westbrae, Tree of Life, Emperor's Kitchen, Mitoku-Johsen, and Mitoku Macrobiotic.

The author notes that, "My 8 years of miso-making in Japan and at American Miso Co. have taught me that miso aged in wood is superior to that aged in plastic... although Sendai shoyu and Miso Company started making high tech shoyu in 1950, Sasaki insisted that his company also continue to make traditional shoyu." Although at times Sasaki's pet project seemed a financial disaster, in 1970 he received a phone call from a Tokyo businessman, Akiyoshi Kazama. Kazama, a friend of macrobiotic teacher Michio Kushi, was looking for a supply of traditional shoyu for Kushi's students. When Sasaki showed Kazama his 12 2,000 gallon cedar casks of naturally aging whole soybean shoyu a few days later, Kazama knew his search was over.

Kazama shipped Johsen Shoyu to the U.S. in 5 gallon wooden buckets at first.

Jubei Sasaki has passed away, but his 12 casks of traditional shoyu have grown to 100 and his son continues the whole soybean shoyu tradition.

4 recipes are given. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

3371. Sojarei Ebner-Prosl. 1989. Preisliste [Price list]. Augasse 2, A-2500 Baden bei Wien, Austria. 10 p. Manufacturer's catalog. [Ger]

• **Summary:** The company has two catalog/price lists: one (green) for food processors and one (yellow) for retail stores. Products made by the company have been marked by the author with an "S." In the front of each catalog is an organic certificate. The retail catalog contains 20 fresh products, 3 books, and 30 non-fresh products. Fresh products made by the company include Tofu Natur, Tofu Mariniert, Tofu Geräuchert, Tofu Pastete Siddhartha, Tofu Pastete Toscana, Tofu-Burger, Soja-Getreide-Laibchen, Gruenkern Laibchen, Dinkel Laibchen, Reis-Laibchen, Weizengluten Laibchen, Weizengluten, Badener Bratwuerstchen, Badener Grillwuerstchen, Brotaufstrich "Rusticana", Brotaufstrich "Holzknecht." Fresh products sold but not made by the company include soy tempeh, marinated tempeh, and soy sprouts. The company sells 3 recipe books: (1) Their own recipe book *Wichtig für Ernährungsbewusste* (Important for understanding of nutrition); (2) *Tofu: Essen mit Zukunft* (Tofu: Eating with the future) by Brigitte Vogenreiter and Clemens Kuby, and (3) *Schlank mit Tofu* (Slim with tofu; 117 recipes) by A.W. Dänzer.

The company also sells many non-fresh products including yellow soybeans (organically grown), soya flakes (*Sojaflocken*, not defatted), whole soy flour, tamari, shoyu, barley miso, Hatcho miso, brown rice miso, soba (buckwheat) miso, nigari, Bonsoy soyadrink (natural and cacao), Pinoccio Soybean coffee, and soynuts.

In the catalog for food processors, for example, the regular tofu, marinated tofu, and smoked tofu are each sold in 1 kg, 30 kg, 60 kg, 100 kg, and 200 kg amounts. Address: Baden (near Vienna), Austria.

3372. Wood, Rebecca Theurer. 1989. Quinoa the supergrain. New York, NY: Kodansha International USA/Ltd. 190 p. [51 ref]

• **Summary:** Quinoa (pronounced KEEN-wa; scientific name *Chenopodium quinoa* Willd.) originated in the Peruvian Andes. The protein content of quinoa seeds ranges from 7.5% to 22.1%. The two men most responsible for creating a quinoa market in the USA are Stephen Gorad and Don McKinley of the Quinoa Corporation in Boulder, Colorado.

Note: *Webster's Dictionary* defines quinoa (derived from Spanish, via the Quechua *quinua*; the term was first used in 1625) as "a pigweed (*Chenopodium quinoa*) of the high Andes whose seeds are ground and widely used as food in Peru."

Chapter 8, "All about cooking quinoa," contains many recipes. A number of these use soyfoods, especially natural soy sauce or tamari (p. 65), tofu (p. 80, 84, 110), miso (p. 98), soymilk (p. 106, 164), tempeh (p. 125). Address: Crestone, Colorado.

3373. Inoue, Kojiro; Sugarman, Carole. 1989. I made at least 1,000 pieces of sushi a day. Now I have sushi elbow. *Washington Post*. Feb. 26. p. 122.

• **Summary:** The moving and humorous story of Mr. Inoue, age 45, (as skillfully told by Carole Sugarman), who survived the ten-year process of becoming a sushi chef in Japan, then came to America determined to introduce Americans to sushi and raw fish.

After working in sushi restaurants in Japan for 8 years (and getting married) he heard that Japanese restaurants were getting popular in the United States. In 1971 he came to the USA to run a small (5-stool) sushi bar at Sakura Palace in Silver Spring, Maryland. Sushi wasn't yet popular in America and the customers were surprised that anyone would eat raw fish, squid, octopus, eel, etc. They were also scared to try it themselves. Yet ten months later Mr. Inoue asked his wife and young child to join him. He had a hard time finding good quality, fresh fish. Americans told him, "A fish is a fish." Sometimes he brought frozen fish from Japan or California. After 5 years the owner of his restaurant retired and he now wanted to start and own a restaurant for himself. He started as a sandwich shop, then remodeled. It was hard. He had to explain what sushi was and how to eat to potential customers. Many customers asked for a knife and fork; some still do. He explained about wasabi and soy sauce.

In 1977, the McGovern Report was released. It said that 500,000 Americans died of heart attacks and that Japanese food was low in cholesterol. Because of that, all Japanese restaurants became popular.

Today sushi has become part of American food culture. His customers are now 80% Americans and 20% Japanese. Fresh fish is easy to buy. Mr. Inoue, who was now making 1,000 pieces of sushi day, developed sushi elbow—just like tennis elbow. He had a cast on his elbow for one year.

"Tokyo people love *natto* (fermented soybeans) or miso soup. I eat bread. American bread. Sometimes cereal." Today Americanized sushi is all over Japan. He is still married, but his wife lives in Japan with his three kids. His kids eat American hamburgers, Kentucky Fried Chicken and pizzas in Japan. He operates a sushi restaurant in Washington, DC.

3374. Erewhon. 1989. Erewhon... Macrobiotic foods you can recommend with confidence (Ad). *Natural Foods Merchandiser*. Feb. p. 25.

• **Summary:** This color ad (7.5 by 13 inches) shows colorful packages of five types of Erewhon products: Misos, seaweeds, ramen, rice crackers, and sweets. In the center is a gold plaque that reads: "Recommended by Michio Kushi. Macrobiotic quality." This same endorsement is in the upper left corner of each package. Erewhon now has four 4 varieties of miso under its brand: Hacho (note new correct spelling), genmai, kome, and mugi. Note that all still use the esoteric Japanese names. Plastic bag packages are colorful and attractive. Slogan at the bottom of the ad: "Our great taste comes naturally." Address: [Massachusetts].

3375. **Product Name:** Miso Master Miso [Brown Rice, or Sweet Barley].

Manufacturer's Name: Great Eastern Sun (Marketer). Made in North Carolina by American Miso Co.

Manufacturer's Address: 92 McIntosh Rd., Asheville, NC 28806.

Date of Introduction: 1989. February.

New Product—Documentation: *Natural Foods Merchandiser*. 1989. Feb. p. 14.

3376. *Natural Foods Merchandiser*. 1989. Soy inspirations: With plenty of new products on the horizon, retailers should begin to plan now for a sizzling Soyfoods Month in April. Feb. p. 12-13.

• **Summary:** Sales of soyfoods (tofu, soymilk, soy sauce, miso, other such as entrees, cheese, ice creams, meat analogs, etc.) are estimated to be \$638 million for 1987 and \$682 million for 1988, and projected at \$754 million for 1990. Discusses Corporate Culinary Carnival soyfoods promotions by Judy Brown, and a soyfoods cooking contest by Mike Shields of Food For Thought in Long Island, New York. Winners received their weight in tofu. The unique idea made it into the pages of *USA Today*. Among the 30 entrants, winners were selected in 3 categories: entree, dessert, and beverage.

3377. **Product Name:** Paul's New and Original Brown Rice Tofu Sandwich [Less Spread, More Veg].

Manufacturer's Name: Paul's Organic Food Works.

Manufacturer's Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.

Date of Introduction: 1989. February.

Ingredients: Short grain brown rice*, spring water, nigari tofu*, sprouted wheat tortilla*, toasted tahini, barley miso*, green onions* or leeks*, carrots*, seasonal green*, cabbage, lettuce*, clover sprouts*, shoyu*, sesame oil*, garlic*, ginger*, apple cider vinegar, unrefined sea salt, spices. * = Organically grown per Cal. Health Code Sec. 26569.11.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on green paper. “12 happy ounces. For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down.” Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back of each is a statement: “Concentrate on the issues, not the individuals...” The statement is changed weekly. Talk with Paul Duchesne. 1989. Aug. 16. Introduced in Feb. 1989.

3378. Kitamura, Yasunori. 1989. Re: Shinshu-Miso Research Institute. Letter to William Shurtleff at Soyfoods Center, March 22–in reply to inquiry. 1 p. [Eng]

• **Summary:** The Institute was founded in May 1959. Its annual report, initially titled *Reports of the Shinshu-Miso Research Institute* but now titled *Report of the Shinshu-Miso Research Institute (Shinshu-Miso Kenkyusho Kenkyu Hokoku)* was first published in 1960. It is published in March each year, and in 1987 it started to include English abstracts for most of the articles. The 1989 issue is number 30. A 1-year subscription sent by surface mail costs US\$8.00. A former director of the Institute, Dr. Tsutomu Mochizuki, retired in 1982. Address: Shinshu Miso Kenkyusho, 469-6 Nakagoshi, Nagano-shi 380, Japan. Phone: 0262-28-1221.

3379. Akwarius Almere. 1989. Akwarius prijs en bestelboek: Natuurvoedingsprodukten, Januari-Februari-Maart [Catalog and price list: Natural food products, January-March]. P.O. Box 50070, 1305 AL Almere, The Netherlands. 77 p. [Dut]

• **Summary:** For details, see entry for the April-June 1989 catalog. Address: Almere, Netherlands. Phone: 03240-20800.

3380. **Product Name:** [Miso].

Foreign Name: Miso.

Manufacturer’s Name: Alimentos de Oriente y Occidente.

Manufacturer’s Address: Apartado Aéreo 57011, Santa Fe de Bogota 2, Colombia. Phone: 674 1258.

Date of Introduction: 1989. March.

New Product–Documentation: Letter from Frederic Saussaye, Nelson and Eunice Ortiz, and Juan Feo. Castro. 1992. Feb. 27. Since 1989 they have been preparing processed soyfoods such as miso, soya milk and tofu as other natural products like tahini and cereals. They are a small company with 5 members in a farm in the tropical area of Apulo near Bogotá. They are promoting the consumption of soya in the capital (Bogota) and also on the land. They are hoping to increase their production shortly and to expand their commercial trade inside and outside of Colombia. Shortly, they would like to start growing their

own soybeans on their farm, which is about 1,000 meters above sea level on tropical land, with clay soil having a pH of 7.5.

Follow-up letter of 28 May. They have heard of two people doing (making?) miso in Bogota (one is Mr. Chang) and Medellin, but have had no contact with them. Nelson and Eunice are giving courses about tofu and soya milk in their area, but presently their only commercial product is miso. They have six 200-kg barrels of miso now fermenting or done. It seems people from other villages are interested. They hope people will plant more soybeans.

Leaflet sent by Nelson Ortiz. 1992. July. “Miso. Proteina completa de soya.” 6 panels. Brown on tan. Description and recipes.

3381. Colbin, Annemarie. 1989. *The natural gourmet: Delicious recipes for healthy, balanced eating*. New York, NY: Ballantine Books. x + 325 p. March. Illust. by Laura Hartman Maestro. Index. 24 cm. [16 ref]

• **Summary:** Pat McNees of *The Washington Post* has called Annemarie “The Julia Child of natural foods cooking.” Her photo, in color, graces the cover. The book incorporates “The Five Phases of Food” theory from China, based on a book by John W. (Jack) Garvey (1983), as an aid to meal balancing. Below each recipe name is given the major phase and minor phase that it represents. Soybeans, tofu, tempeh (as well as brown or white rice and mochi) are metal (declining state), while black soybeans are water (maximum rest before growth).

Page 27 notes: “You will not find any recipes in this book with whole soybeans; I find their taste too unpleasant, and tend to believe some research that indicates they may contain oxalates and other elements that prevent nutrient absorption. Soybean products such as miso, shoyu (the natural soy sauce made with wheat), tamari (a wheat-free natural soy sauce), tofu, and tempeh, on the other hand, are delicious; tofu and tempeh are good protein sources when combined with the grains. You will also find the condiments miso and shoyu or tamari used in many of the recipes.”

Soy-related recipes include: Black and white aioli dip (with tofu, p. 49; Note: “Aioli” is derived from the French words for “garlic” + “oil.” Aioli sauce is made from crushed garlic, egg yolks, olive oil, and lemon juice). Tofu and spinach turnovers (Spanakopitas, p. 66-67). Bean-of-the-Orient miso soup (p. 74-75). Shoyu consommé with enoki mushrooms (p. 77). Collard miso soup (p. 78-79). Carrot-beet soup with tofu sour cream (p. 83-84). Tofu sour cream (p. 84-85). Baked [kidney] beans with miso and apple butter (p. 136). Vegetable-tofu sauté (p. 154-55). Tofu mushroom stroganoff with bulgur (p. 155). Tofu sour cream (p. 156). Broccoli-tofu quiche with wild mushrooms (p. 157-58). Open herbed tofu sandwiches (p. 158-59). Tempeh with shallots and white wine (p. 160-61). Tempeh in sweet and sour sauce (p. 161-62). Tempeh with creamy horseradish

sauce (p. 163). Stir-fried bak choy with marinated tofu (p. 169-71). Green peppers with miso (p. 182-83). Spinach-nori rolls with tofu and wild mushrooms (p. 186-87). Green salad with miso-coriander dressing (p. 203). Red and white cabbage salad with miso-onion dressing (p. 208). Radish-watercress salad with soy-sesame dressing (p. 209; with ½ tablespoon black sesame seeds and ¼ cup toasted sesame oil). Salad of wilted collard greens with yellow peppers and white miso dressing (p. 210). Spiced glazed pears with tofu cream (p. 271-72). White miso and orange dressing (p. 285).

Note: This is not a vegetarian cookbook. There is a chapter of fish recipes, and other recipes for the use of alcoholic beverages/seasonings (wine, mirin). Address: Founder and director, Natural Gourmet Cookery School / Inst. for Food and Health, 365 West End Ave., New York City, NY 10024.

3382. GEM Cultures. 1989. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 4 p. March. [4 ref]
 • **Summary:** Contents: 1. Powdered cultures for soycrafters: Powdered starter cultures for tempeh, miso, amazake, shoyu, and tamari. In home and commercial sizes. Rice koji. 2. Cookbooks with culture (lists 4 books). 3. Coagulants for curdling tofu: Natural nigari or Terra Alba calcium sulfate in 1 lb or 5 lb bags. 3. Self renewing cultures: Viili, sourdough, kefir, miso. 4. Sea vegetables from the Mendocino Sea Vegetable Co. 5. Recyclables: Cheese cloth, super sealers (lids).

“We at GEM Cultures are a husband and wife team, Gordon & Betty, with between us 37 years of professional experience in culturing microorganisms and teaching people about them. In 1980 we set up GEM cultures with the goal of providing dependable, low cost cultures and related items for the growing number of people who wish to have a hand in creating a healthier diet through cultured foods.”

 • **Summary:** The 26th study meeting to evaluate commercial miso was held. 233 samples of miso were studied 131 samples were analyzed for physicochemical characteristics. Salt concentration averaged 11.9% and total sugar 18.0%. Miso with high levels of lactic acid was preferred. Address: Nagano, Japan.

3389. **Product Name:** [Taifun Sweet White Miso].
Foreign Name: Weisses Miso.
Manufacturer's Name: Life Food.
Manufacturer's Address: Stuehlinger Strasse 9, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.
Date of Introduction: 1989. March.
Ingredients: Rice, soybeans, salt, water.
How Stored: Refrigerated.
New Product-Documentation: Letter from Anthony Marrese written in on the company's Price List for Restaurants.

3390. Nakamura, Masaaki; Imai, M.; Yasuhira, H. 1989. Karubon san bunseki kei ni yoru miso chû no yûkisan bunseki ni tsuite [Analysis of organic acids in miso using carboxylic acid analyzer]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 30. p. 68-73. [14 ref. Jap; eng]
Address: Nagano, Japan.

Address: Nagano, Japan.
3392. Sato, Masashi; Yasuhira, Hitomi. 1989. Kome no seihaku budomari to kôji, miso no hinshitsu [The effect of polishing rate of rice on the quality of koji and miso]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 30. p. 1-2. [Jap; eng]
• **Summary:** Unpolished rice koji had the least amylase activity. Koji from rice polished to 66% had the least protease activity. Miso from 90% polished rice was preferred, whereas that made from 66% polished rice with the hulls/bran added back was disliked.
3393. Sato, Masashi; Yasuhira, Hitomi. 1989. Hasaimai? (Tayôto riyômai henkei kakôhin) no ryûdo to kôji, miso no hinshitsu [The effect of grain/particle size of crushed rice on the quality of koji and miso]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 30. p. 3-6. [Jap; eng]
• **Summary:** The particle size of crushed rice was found to have a negligible effect on the sensory properties of koji and miso.
3394. Sode, Akio; Nakamura, Masaaki; Takeda, Shigeru; Ito, Kimio; Imai, Manabu; Yasuhira, Hitomi. 1989. Miso no burendo kôka [Effects of blending miso]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 30. p. 7-13. [2 ref. Jap; eng]
• **Summary:** Misos made with various levels of koji and sodium chloride (salt) were mixed in varying proportions for several periods of time. The final products were evaluated for sensory quality.
3395. Takeda, Shigeru; Imai, Manabu; Yasuhira, Hitomi. 1989. Candida-zoku kôbo o riyô shita miso no kôki [Flavor of miso fermented by genus *Candida*]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 30. p. 29-32. [3 ref. Jap; eng]
• **Summary:** Miso was produced by 8 strains of *Candida* and by *Zygosaccharomyces rouxii* Y7 (control). Flavor was studied by sensory evaluation. Address: Nagano, Japan.
3396. Takeda, Shigeru; Imai, Manabu; Yasuhira, Hitomi. 1989. Candida-zoku kôbo no bôyû? shiken [Antiswelling of miso fermented by *Candida* sp.]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 30. p. 64-67. [5 ref. Jap; eng]
• **Summary:** The amount of extra ethanol required to prevent miso swelling (because of gas production) was lower for miso produced by the yeast *Candida etchellsii* S7-1 than for that produced by the yeast *Zygosaccharomyces rouxii*. Address: Nagano, Japan.
3397. Yasuhira, Hitomi. 1989. Atarashii taipu no miso [New types of miso]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 30. p. 86-93. [28 ref. Jap]
Address: Nagano, Japan.
3398. Yokota, Yoshiko; Yasuhira, Hitomi. 1989. Miso bunseki e no kinsekigai bunkôhō no riyō [Application of near-infrared reflectance analysis in miso]. *Shinshu Miso Kenkyusho Kenkyu Hokoku (Report of the Shinshu-Miso Research Inst.)* No. 30. p. 33-42. [10 ref. Jap; eng]
• **Summary:** Near-IR reflectance analysis was applied to the detection of the physicochemical properties of miso. Sample temperature had little effect on the accuracy of the analysis. Moisture, sodium chloride, total nitrogen, lipid, ash, total sugar, and reducing sugar concentration of miso could be adequately measured by this procedure. Address: Nagano, Japan.
3399. Brown, Judy; Bates, Dorothy R. 1989. Judy Brown's guide to natural foods cooking. Summertown, Tennessee: The Book Publishing Co. 160 p. Index. With 8 pages of color photos. 23 cm.
• **Summary:** This natural foods, vegan cookbook, which does not require the use of dairy products or eggs, includes more than 200 recipes, many of which contain soyfoods. In the chapter titled "The Natural Foods Pantry" is a sub-chapter titled "Soy Foods," which gives brief introductions to tofu, tempeh, miso, soy milk, soy cheeses, soy yogurt, soy flour, and soy pulp or okara. There are also sub-chapters on sea vegetables, sprouts (including soy sprouts), organic foods, macrobiotics (which is "heavily emphasized in this book"), more natural foods ingredients (which, under soy sauce, discusses the differences between shoyu and tamari).
The number of recipes featuring various soyfoods are: Tofu (15), tempeh (5), miso (4), soymilk (1), shoyu (1), and okara (1; soysage).
The author, a specialist in consumer education, presently organizes culinary carnivals and natural foods tasting fairs. She has written extensively on natural foods and holds a Master's degree in Consumer Economics from the Univ. of

Maryland. She is president of Judy Brown Enterprises, a public relations company for natural foods products. Address: 9 Dovetree Court, Indian Head, Maryland 20640. Phone: 301-753-6548.

3400. Mitoku Co. Ltd. 1989. Food is medicine: Mitoku macrobiotic (Ad). *East West*. April. p. 33.

• **Summary:** The top half of this full-page ad contains a large square red seal with four Chinese characters, read “*Ishoku Dogen*, which literally means ‘medicine and food (have the) same source.’ It is an old traditional saying in Japan, and its not only Oriental philosophy. In the 4th and 5th centuries BC, a Greek physician spoke of letting food be our medicine. Hippocrates taught that the effects of occupation, climate and food, were where much of the cause of illness lay. Today, modern science and medicine have begun to agree with this ancient wisdom.”

“Mitoku Macrobiotic products are a selection of some of the highest quality foods in the world; Miso, Tamari and Shoyu, premium seaweeds,... mochi.”

USA wholesale distribution: Granum, Seattle, Washington 98105 (206) 525-0051. Spiral Foods Inc., Asheville, North Carolina 28814 (800) 633-2156. Address: CPO Box 780, Tokyo, Japan 100-91.

3401. Shurtleff, William; Aoyagi, Akiko. comps. 1989. Bibliography of miso and soybean chiang: 1,604 references from A.D. 535 to 1989. Lafayette, California: Soyfoods Center. 227 p. Subject/geographical index. Author/company index. Extensively annotated. Printed April 28. 28 cm. [1604 ref]

• **Summary:** This is the most comprehensive bibliography ever published on miso and soybean chiang. It is also the single most current and useful source of information on this subject available today, since 54% of all references (and most of the current ones) contain a summary/abstract.

One of more than 40 bibliographies on soybeans and soyfoods being published by the Soyfoods Center, it is based on historical principles, listing all known documents and commercial products in chronological order. Containing 37 different document types (both published and unpublished, including many original interviews and partial translations of Japanese and European works), it is a powerful tool for understanding the development of this subject from its earliest beginnings to the present, worldwide.

Details on how to use the bibliography, a complete subject and geographical index, an author/company index, and a bibliometric analysis of the composition of the book (by language, document type, year, leading countries, states, and related subjects) are also included. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

3402. Taguchi, Takeko; Sato, M.; Yasuhira, H.; Sekiguchi, J.I. 1989. Taiensei kokyû kesson kôbo no riyô ni kansuru kenkyû [Studies on utilization of halotolerant respiratory-deficient yeast]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 84(4):264-69. April. [7 ref. Jap; eng]

• **Summary:** A respiratory-deficient yeast mutant induced from *Zygosaccharomyces rouxii* did not absorb oxygen. It fermented miso with a 13% higher fermentation efficiency and less sugar consumption than its parent strain. In a taste panel test of the two miso types, some recognized no difference and the rest considered the miso made with the mutant to be superior. Address: 1-2. The Shinshu Miso Research Inst., 469-6 Nakagosho, Nagano-shi 380; 3. Dep. of Applied Biology, Shinshu Univ., 3-15-1, Tokida Ueda-shi 386. All: Japan.

3403. Toriano, Peter. 1989. Japanese food firms cook up new strategies for U.S. consumers. *Economic World*. April. p. 22-26.

• **Summary:** “Riding the success of tasty, low-priced food products, the Japanese eye a bigger helping of the U.S. grocery mart.” Two of the most popular Japanese food products have been soy sauce, ramen noodles, and tofu. “Nissin sold more Cup O’Noodles in the United States last year than McDonald’s sold hamburgers nationally... Japanese food companies and food products are slipping under America’s door unnoticed... The Japanese start selling their food products in the U.S. to a small, very concentrated ethnic market... While Kikkoman can trace exports of soy sauce to the U.S. as far back as 1869, most Japanese food companies did not export to or manufacture products in the United States in significant quantities until the 1970s...”

“American food product companies focus on their competitors, whereas the Japanese tend to focus on what the customer wants...”

“Kikkoman, one of Japan’s largest food-related companies, is involved with wines and liquors, pharmaceuticals, health foods and a chain of restaurants. In addition to its other products, Kikkoman has introduced a shelf-stable tofu, instant miso soup and a rice wine for use in cooking.

“Kenzaburo Mogi, planning manager of Kikkoman’s foreign operations department, says tofu could become as big a market as soy sauce for Kikkoman in the U.S. in the years to come. In the U.S., Kikkoman also owns 80% share of JFC (Japan Food Corp.), a major distributor of oriental food products... Consumption of Kikkoman’s soy sauce has increased fivefold since 1972... On average, each Japanese consumes about 2.5 gallons of soy sauce every year; the average American consumes less than 10 oz...”

“Almost a quarter of Kikkoman’s total business now is outside Japan: two-thirds in the U.S. and most of the rest in

Southeast Asia. The company also is targeting production in Europe, Australia and China...

“Ajinomoto Co, Japan’s largest food processor, has been selling abroad since 1909, when its first overseas office opened in New York... Until the 1960s, Ajinomoto’s main product was MSG (monosodium glutamate). Today, it has a more diversified line-up, with about 41% of sales coming from processed foods, and 26% from seasonings... The predominant products the firm manufactures in the U.S. are amino acids for pharmaceutical use...

“Kibun Products International Inc., a subsidiary of Kibun Company Ltd. Japan, is a major manufacturer of surimi in the U.S... Kibun is a multi-billion-dollar, 50-year-old food products company with worldwide operations totalling \$2,000 million annually...

“Morinaga Nutritional Foods Inc., a subsidiary of Morinaga Milk Industry Co. Ltd., the Borden of Japan, is selling its tofu in air-tight containers that prolong freshness, eliminate water changes and is bacteria-free...

“This could be the food of the future, replacing dairy and meat as major sources of nutrition,” says Kent Cooper, spokesman for Hakuhodo Advertising America Inc. in Los Angeles, which handles Morinaga’s account...

“Faith Popcorn, chairman of BrainReserve Inc., a marketing consulting company to Fortune 500 companies says America is eating healthier and is more and more concerned with where food products originate and what that does to the Earth, known as the graining/greening of America. ‘Vegetarianism is growing like crazy. Americans are changing from flesh food to health food.’”

3404. Product Name: Westbrae Oriental Style Dressings [Lemon & Spice, Oriental Orange, Sesame, Sesame (No salt added)].

Manufacturer’s Name: Westbrae Natural Foods.

Manufacturer’s Address: P.O. Box 91-1181, Commerce, CA 90091. Phone: (213) 722-1692.

Date of Introduction: 1989. May.

Ingredients: Lemon & Spice: Water, honey, expeller pressed canola oil, grain vinegar, sea salt, egg yolk, miso (soy bean paste), xanthan gum (vegetable gum), garlic*, onion*, lemon peel*, lemon juice concentrate, lemon oil, spices, celery seeds, poppy seeds, natural flavors. * = Dried.

Wt/Vol., Packaging, Price: 8 fl. oz. in tall-neck glass bottles.

How Stored: Shelf stable.

New Product–Documentation: Westbrae sell sheet and new product announcement. 1989. May. “Available May 1.” The “Oriental Style Lemon & Spice” uses miso as the 7th ingredient. All oils are expeller canola oil.

3405. Library of Congress, Subject Cataloging Div., Processing Services. 1989. Library of Congress subject

headings. 12th edition. Washington, DC: Cataloging Distribution Service, Library of Congress. 3 volumes.

• **Summary:** This 12th edition (LCSH 12) contains approximately 173,000 headings established by the Library through Sept. 1988. The book was available on 3 May 1989. Approximately 10,000 headings were added since the 11th edition in 1988. Among these headings are 139,000 topical subject headings, 22,000 geographic subject headings, 10,000 personal names (incl. 9,000 family names), 2,600 corporate headings. This book should be used with the Subject Cataloging Manual (1989. 3rd ed.).

These subject headings have been accumulated by LC since 1898 and the first edition of LCSH was printed between 1909 and 1914. Subject headings are listed in boldface type. Approximately 40% of headings are followed by LC class numbers, which are added only when there is a close correspondence between the subject heading and the provisions of the LC classification schedules.

References show the relationship between terms: (1) The equivalence relationship: Use of UF (Use for) references. (2) The hierarchical relationship: Broader terms (BT) and narrower terms (NT). BT and NT function as reciprocals. A term appearing as a BT must be matched by the reversed relationship as an NT (e.g., Motor Vehicles. BT Vehicles. NT Trucks). (3) The associative relationship: Related terms (RT. Ornithology. RT Birds). May Subd Geog (MSG) = May subdivide geographically. Soy related subject headings, listed alphabetically, are:

Fermented soyfoods (MSG). BT Food, Fermented. Soyfoods. NT Fermented soymilk. Miso. Natto. Soy sauce. Tempeh.

Note: Changes in this edition from the 11th edition. Changed: Soybean as food to Soyfoods. Changed: Soybean milk to Soymilk. Changed: Soybean milk industry to Soymilk industry. Added: Soyfoods industry. Added: Fermented soyfoods. Added: Fermented soyfoods industry. Added: Nonfermented soyfoods. Added: Nonfermented soyfoods industry. Added: Fermented soymilk. Address: Washington, DC.

3406. Westbrae Natural Foods. 1989. Distributor catalog: FOB West pricing. Spring 1989. P.O. Box 91-1181, Commerce, CA 90091. [6] + 19 p. 22 x 28 cm.

• **Summary:** Has a black on yellow cover. Address: Commerce, California. Phone: (213) 722-1692.

3407. Akwarius Almere. 1989. Akwarius prijs en bestelboek: Natuurvoedingsprodukten [Catalog and price list. April-June]. P.O. Box 50070, 1305 AL Almere, The Netherlands. 77 p. [Dut]

• **Summary:** Akwarius is a larger importer and distributor of natural food products. They have worked in this field since 1971, and have a strong interest in macrobiotic and anthroposophical foods. Contents (p. 2). Philosophy and function (p. 3). Beverages (p. 7): Sojamelk naturel and Bonsoy, Provamel Sojadrink (4 flavors in 500 ml and 4 flavors in 1 liter sizes), Provamel Soja dessert (puddings; 5 flavors in 125 gm and 1 flavor in 1050 gm).

Manna sweeteners (p. 12): Amasake drink in 350 and 700 gm sizes, and rice koji. Note that Akwarius imports and distributes large line of Manna-brand macrobiotic products

from Muso in Japan. Manna vegetable protein products (p. 21): Dried tofu (non-organic). Bonsoy soymilk, Seitan, and three types of dried wheat gluten (fu). Manna Soy Sauces (Sojasausen, p. 21): shoyu (B = biological or organically grown, and NB = not biological, i.e. non-organic), and tamari (non-organic).

Witte Wonder (p. 22): Seitan, Tofu Spread (in paprika, garlic, celery, dill, mushroom, and pepper flavors, 220 gm sizes, all organic), Tofu in Sauces (peanut, curry-pineapple, and tomato flavors, 340 gm, organic), Tofunaise (plain and lemon flavors), Tofu Dressing (Italian, garden herbs, Mexican, and plain flavors).

Yakso (p. 23): Seitan, Tempeh Spreads (in Indonesian poesta and doeloe flavors), Temmo (round tempeh burger, deep fried then marinated, ¼ inch thick, sold 5 in a glass jar), Soyaroma (tempeh spread like butter), Sweet Indonesian-style soy sauce (Ketjap manis), Tofu Spreads (cream cheese consistency, in salsa, dill, green, shallot, and pommodore [apple?] flavors), Tofu Mayonnaise (Sojanaise), Smoked tofu (paprika, mushroom, and celery flavors in 170 gm wide mouth glass jars).

Akwarius soybeans and soybean meal/flour (p. 27-28, 35, organic). Manna Pasta (p. 28): Soya macaroni. Manna black soybeans from Hokkaido (p. 35; 350 gm, non-organic). Manna Tekka Condiment (p. 44), Manna soynuts (*Sojanootjes*, p. 45, 3 flavors). Lima soyadrink (p. 47).

Manna Miso (Sojapasta; p. 48): Brown rice miso (organic and non-organic), young rice miso (non-organic), barley miso (organic and non-organic), natto miso (non-organic), soybean miso (non-organic), instant miso soup (with and without fish, non-organic), instant miso soup with tofu. Manna sea vegetables (p. 49).

Note: This is the earliest Dutch-language document seen that mentions soynuts, which it calls *Sojanootjes*. Address: Almere, Netherlands. Phone: 03240-20800.

3408. Welters, Sjon. 1989. Soyfoods in Europe: Influenced by a colonial past. *Soya Newsletter (Bar Harbor, Maine)*. May/June. p. 1, 12-15. [1 ref]

• **Summary:** This is a historical overview of the introduction of soyfoods to Europe since 1945. The Indonesians who immigrated to the Netherlands after World War II played a major role in introducing soyfoods (especially tofu, tempeh, and a sweet soy sauce called ketjap) to that country and to Europe. Ketjap was the most popular soyfood in Indonesia. Asian immigrants started small manufacturing companies, restaurants, and importing companies (such as Conimex and Heuschen Schrouff). The macrobiotic movement also played a key role in introducing soyfoods, especially soy sauce, miso, and tofu. In Belgium, the Gevaert family founded Lima and began to make miso on a large scale, but a fire and other financial problems soon forced them to close the plant. Only recently have they started to make miso again.

During the 1970s, especially in Belgium and the Netherlands, inspired by the macrobiotic movement and with information from books by Shurtleff and Aoyagi, a new generation of non-Asian tofu makers emerged. "The first tofu shop in Europe owned and operated by non-Orientals was Manna Natuurvoeding. Opened in Amsterdam in 1977, Manna was a macrobiotic manufacturer, distributor, and retailer run by a non-profit foundation. Soon after opening, Manna was visited by entrepreneurs from Germany, England, Portugal, Denmark, France, Sweden, Austria, and Italy, hoping to learn about making tofu."

During the early 1980s, tempeh was rediscovered. "Yakso Farms in the Netherlands was one of the first non-Oriental companies to produce tempeh, made from organic soybeans, and to process it into spreads, paté, sauces, and marinated products."

In the mid-1980s the focus shifted from production to marketing and to second-generation soyfoods. Most European soyfoods are made with organic soybeans. Address: President, Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 617-264-9511.

3409. Perez Baez, Oswaldo. 1989. Re: New developments with soyfoods in Venezuela. Letter to William Shurtleff at Soyfoods Center, July 10. 3 p. Typed, with signature on letterhead. [Eng]

• **Summary:** "In my last visit to Caracas I contacted: Prof. Makie Kodaira and Prof. Amaury Martinez of the 'Instituto de Ciencia y Tecnología de Alimentos, Facultad de Ciencias, U.C.V.' (Universidad Central de Venezuela) who are very interested in offering a theoretical and practical course about soyfoods, using their pilot plant (the second of importance in Venezuela). Prof. Kodaira studied in Hiroshima, Japan in 1977 and she is a specialist on seafoods. They would like the 'Centro de Alimentos de soya de Venezuela' to organize this course.

"I think this is the time to offer in Venezuela a complete course about soyfoods and I have thought to invite you to come to Venezuela. I am thinking about 2 courses:

"(a) One oriented to Institutional level (Instituto Nacional de Nutrición, Fundación Polar, CIEPE, Universidades, Industry, etc.) for professional people. This course could be in Caracas, Instituto de Ciencia y Tecnología de Alimentos, U.C.V.

"(b) Another one oriented to the general public (not necessarily professional level). This course could be here in La Azulita which is a rural and beautiful place, epicenter of the Venezuelan movement for alternative lifestyles.

"I have thought of the following content for these courses: (1) Soymilk. (2) Tofu. (3) Tofu and soy milk ice cream. (4) Miso. (5) Tempeh. (6) Shoyu.

"I am working on a book about soyfoods, and am enclosing an outline of the contents: I. Introduction. II.

Agronomic aspects. III. Soya and food security. IV. The most important soyfoods. V. Industrial potential of the soybean. VI. Bibliography. VII. Index.” Address: Ing., Centro de Alimentos de Soya de Venezuela, Granja Tierra Nueva, Aldea San Luis, La Azulita, Estado Merida, C.P. 5102, Venezuela.

3410. Welters, Sjon. 1989. Re: Brief history of Manna Natural Foods. Letter to William Shurtleff at Soyfoods Center, July 24. 1 p. With follow-up talk on 2 Dec. 1989.

• **Summary:** This company was founded in about 1973 by Adelbert Nelissen and his wife Wieke Nelissen, plus Hugo van Seenus, among others. Adelbert is Sjon’s brother in law (his wife’s brother). Manna got started in the Rozenstraat in Amsterdam, in an abandoned house that was taken over by so-called “krakers” (counter-culture or hippy squatters). The store called “de Rozemaryn” (Rosemarin) was the first of a chain of stores which, at its peak, contained ten stores total. Hugo now owns and operates Hugo’s Market in Washington, DC

Manna was originally a foundation named Stichting Natuurvoeding Amsterdam. It kept this name until 1982. Manna started the first tofu shop in Europe that was owned and operated by non-Orientals. Opened in Amsterdam in 1977, Manna was a macrobiotic manufacturer, distributor, and retailer run by a non-profit foundation. Soon after opening, Manna was visited by entrepreneurs from Germany, England, Portugal, Denmark, France, Sweden, Austria, and Italy, hoping to learn about making tofu.

In 1975 Manna started importing miso and shoyu from Japan, initially via Muso Foods, and later also via Mitoku. But Muso was always their main supplier.

Manna filed for Chapter 11 bankruptcy or reorganization 2 or 3 times. The first time was a bankruptcy in March 1982. All their property was sold at an auction, but was bought back by a new foundation owned by basically the same people and the same foundation at one-third the value. It was probably at this time that Manna’s name was changed from Stichting Natuurvoeding Amsterdam to Manna Natuurvoeding B.V. The company was back on its feet by 1983 but then things didn’t work out again. At the last moment before declaring bankruptcy, they got financing. But this time the bank took the Foundation out of the picture, so that the foundation was not giving the collateral for loans. The person behind the foundation, Adelbert Nelissen, became the director/president of the holding company. He probably did not have majority ownership. But at this time (May 1983) Sjon and most of the management left.

In about late 1983 or early 1984 Manna moved all operations from Meeuwenlaan in Amsterdam to Zwanenburg. The former section of Amsterdam was torn down by the city. The third time was in 1987, when the company was disbanded. At that time Adelbert became

inactive. The government-appointed curator tried to get as much as possible for the assets. The macrobiotic Manna brand name and the inventory of imported Japanese foods was purchased by Akwarius, which was located in Almere in a building constructed along anthroposophic guidelines (before about 1986 they had been located in the province of Utrecht). The production facility at Zwanenburg and its equipment was purchased (mainly for the bakery) by a conglomerate of 3 natural food companies, including Akwarius and Loverendale (the largest baker of natural yeasted breads in the Netherlands). They made Manna tofu for a year or two, then facing stiff competition, sold off the tofu equipment piecemeal. They ran the Manna sourdough bakery there until 1988, then moved it to Loverendale headquarters, and closed down the Zwanenburg production facility.

Akwarius is a company based on the anthroposophical philosophy of Rudolf Steiner. They were founded in about 1974. In Holland there were 4 types or philosophies of natural foods distributors: (1) Anthroposophical (Akwarius); (2) Macrobiotic and natural foods (Manna); (3) Ecological (Kleine Aarde [Small Earth; inspired by E.F. Schumacher’s book *Small is Beautiful*] and De Nieuwe Lelie [The New Lily]); and (4) Reform movement/vegetarian (VNR: Vereniging van Nederlandse Reformhuizen = Union of Dutch Reform Houses, and Scholten [which was also the exclusive importer of Lima products from Belgium]).

Talk with Sjon Welters. 1994. April 4. Manna and Lima sold only vegetarian foods; they did not sell any fish, poultry, or meat. All these early Dutch natural foods companies were this way because no natural food store would sell fish or other flesh products; they were just not acceptable. Some years after they started they used eggs in a few products but they were always vegetarian. The only people who ever got involved in flesh foods in the early stages were the Anthroposophic/Biodynamic people because its part of their philosophy, but even in the beginning they didn’t sell meat to the stores because customers didn’t want it. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

3411. Business Trend Analysts, Inc. 1989. The health and natural food market: A product-by-product marketing analysis and competitor profile. 2171 Jericho Turnpike #342, Commack, NY 11725. 280 p. Price \$950.00. *

• **Summary:** Section 6 of this report is titled “The Market for Soyfoods” (24 pages). It projects 6.2% growth for the soyfoods industry, and contains the following (much of it provided by Soyatech, Inc. and Soyfoods Center): Analysis and summary. Manufacturers’ sales of soyfoods. Manufacturers’ sales of soyfoods to major outlets. Manufacturers’ sales of soyfoods, by type of outlet. The top six soymilk producers in the U.S. U.S. per capita

consumption of soymilk. Retail sales of soyfoods. Retail sales of soyfoods at major outlets. Retail sales of soyfoods, by type of outlet. Graph: Product mix of U.S. soyfood sales. Estimated mix of distribution channels used to market various soyfoods. U.S. soybean production. Characteristics of women's use of soy sauce. Quick Tamari tips. Selected 1988/89 new product introductions: Soyfoods.

Under "Report Highlights and Special Features" we read: "Soyfoods continue to gain popularity with mainstream consumers, as sales are expected to top the \$380 million mark, at the wholesale level, by year-end. At the retail level, sales of tofu alone are currently pegged at \$77 million, with supermarkets capturing close to 60% of dollar volume."

Overall report Contents: 1. Executive summary. 2. The overall market for health and natural foods (including Soyfoods 1979-1988, with forecast to 1998). 3. The market for health and natural dairy foods. 4. The market for health and natural grocery products. 5. The market for health and natural snack food products. 6. The market for soyfoods. 7. The market for health and natural grains and cereals. 8. The market for health and natural frozen foods. 9. The market for herbal products. 10. Distribution channels. 11. Factors affecting demand. 12. Trends in organic farming. 13. Competitor profiles: Alta-Dena Certified Dairy, Arrowhead Mills, Barbara's Bakery, Celestial Seasonings, Golden Temple, San-J International, Thompson Kitchens. Tivall U.S.A./Garden Gourmet, U.S. Mills (partial list). 14. Directory of more than 200 health and natural food producers. Address: Commack, New York. Phone: 516-462-2410.

3412. Coffey, Rory. 1989. Lupins as an energy-rich protein source for feed and food. In: T.H. Applewhite, ed. 1989. Proceedings of the World Congress on Vegetable Protein Utilization in Human Foods and Animal Feedstuffs. Champaign, IL: American Oil Chemists' Society. xii + 575 p. See p. 410-14.

• **Summary:** Contents: Abstract. Introduction. Lupin consumption and usage. Dehulled lupin. Human consumption: Lupin concentrate, miso soup, lupin tempeh, lupin flour.

Miso soup: Although about 200,000 tons of soybeans are used each year in Japan to make miso soup, there is a problem with oxidation, which causes discoloring. The Shinshu Research Institute has investigated the use of lupins as a substitute for soybeans in an attempt to solve this problem. Oxidation does not occur with lupins and to date results have been encouraging. Table 8 shows a sensory evaluation of the two types of miso (high score is more favorable): Color—Lupin 12, soy 0; Taste—Lupin 10, soy 2; Aroma—Lupin 7, soy 5; Texture—Lupin 6, soy 6.

Lupin tempeh: In 1986 an Indonesian company began to investigate the feasibility of using lupins as a substitute for

soybeans in making tempeh—with the assistance of the Grain Pool of Western Australia and R. Yu of the Victorian Food Research Institute. Despite some problems at the beginning, the efforts by all 3 parties have proved successful and the Indonesian company is now using a significant tonnage of lupins to make tempeh.

Lupin flour: In 1987, the Grain Pool initiated an evaluation of lupin flour in human food products.

Lupins have been grown and used in Western Australia for over 30 years. After extensive genetic engineering, the composition of the present day varieties is far superior to those grown originally. Over 90% of the lupins grown in Western Australia, and all that are available for export, are varieties from the species *Lupinus angustifolius*, a sweet, white, narrow leaf lupin.

In terms of world lupin production in 1985, Australia has the largest area (606,000 ha), followed by the USSR (280,000), and Europe (148,000). In the USSR and Eastern Europe much of the lupins are grown for forage or green manure; not much grain is not harvested. A photo shows R. Coffey. Address: Grain Pool of Western Australia, Grain Pool Bldg., 172 St. George's Terrace, Perth 6000, Western Australia, Australia.

3413. Hanaoka, Toshio. 1989. Miso preparation and new uses. In: T.H. Applewhite, ed. 1989. Proceedings of the World Congress on Vegetable Protein Utilization in Human Foods and Animal Feedstuffs. Champaign, IL: American Oil Chemists' Society. xii + 575 p. See p. 369-74. Contains 4 tables and 4 figures. [27 ref]

• **Summary:** "The prototype of miso was introduced to Japan from Korea at least 1,300 years ago. Misho (the original type of miso) was first cited in Taihouryou in 701 A.D. Although the production method for misho was not described, it probably resembled soybean miso today. In the northeast district of China, it was called 'misun,' and in Korai (located in north Korea 935 to 1392 A.D.) 'misso' and in south Korea 'mijo.' The process includes pounding and mashing of cooked soybeans, shaping into balls, wrapping in rice straw, hanging the wrapped materials under the eaves and mixing with salt and water and often was seen at farmhouses in prewar Japan... Miso originally was made at Buddhist monasteries for internal and use in aristocratic circles.

"Another route of introduction was from China to Japan by Buddhists and envoys who produced fermented soybean foods such as Kinzanji-miso. The difference of this process from the Korean process was to make koji from cooked whole soybeans with barley or wheat without pounding.

"The industrial production of soybean miso was started in Aichi prefecture in 1625 and that of rice miso in 1645 at Sendai as the original of Sendai miso today... Thereafter, the number of miso factories increased gradually in the Tokugawa period (1600-1867) and rapidly up to about

5,000 at the end of World War II. Recently, miso factories introduced many advanced facilities and equipment for economical and hygienic production. The number of miso factories was reduced to about 1,700, amalgamating to large scale factories of which capacity was over 3751 tons in 1984. They produced 353,000 tons equivalent to 59% of total industrial production. Employing 182,000 tons of soybeans, 104,000 tons of rice, 23,000 tons of barley and 72,000 tons of salt, ca. 568,000 tons of miso were produced by all factories in 1985. In addition, the amount of home-made miso is roughly estimated as 60,000 tons. The amount of miso supplied per capita was 4.9 kg in 1987...

“Ninety per cent or more of miso is used as an ingredient of soup in Japan... Daily per capita consumption was 28 to 30 g during the years from 1951 to 1959. From that time until 1985, it gradually decreased to the level of 16 g which is enough to prepare one bowl of miso soup.”
Address: Hanamaruki Inc., 4-22-10 Himonya, Meguro-ku, Tokyo 152, Japan.

3414. Karta, Susani K. 1989. Traditional Chinese soyfood. In: T.H. Applewhite, ed. 1989. Proceedings of the World Congress on Vegetable Protein Utilization in Human Foods and Animal Feedstuffs. Champaign, IL: American Oil Chemists' Society. xii + 575 p. See p. 382-87. [18 ref]

• **Summary:** Contents: Abstract. Introduction. Variables in manufacturing tofu: Soybean variable, processing variable, maceration and extraction (soaking and grinding) stages, filtration and heating stages, coagulation stages, types and concentration of coagulants used in tofu manufacturing. Tofu products.

Table 3 shows 1987 consumption of soybeans as foods in Asian countries. The results are presented here in descending order of per capita consumption: Per capita soybean consumption, country (population), total soybean consumption in 1,000 tonnes. 13.3 kg/capita, Taiwan (19.6 million), 260,000 tonnes. 9.3 kg/capita, Japan (122.2 million), 1,141,000 tonnes. 9.0 kg/capita, Indonesia (175 million), 1,575,000 tonnes. 7.8 kg/capita, South Korea (42.1 million), 330,000 tonnes. 7.7 kg/capita, Singapore (2.6 million), 20,000 tonnes. 6.9 kg/capita, China (1,062 million), 7,325,000 tonnes. 3.4 kg/capita, Malaysia (55 million), 55,000 tonnes. 2.2 kg/capita, Thailand (53.6 million), 118,000 tonnes. 0.3 kg/capita, Philippines (61.5 million), 18,000 tonnes.

In China, fried tofu is called Tou-Pok. Address: American Soybean Assoc., 541 Orchard Rd., #11-03 Liat Towers, Singapore 0923, Republic of Singapore.

3415. Kim, Seung Ho; Kwon, Tai-Wan. 1989. Vegetable protein foods in Korea. In: T.H. Applewhite, ed. 1989. Proceedings of the World Congress on Vegetable Protein Utilization in Human Foods and Animal Feedstuffs.

Champaign, IL: American Oil Chemists' Society. xii + 575 p. See p. 439-42.

• **Summary:** Contents: Abstract. Introduction. Situation of traditional protein foods. Situation of vegetable proteins. Traditional protein foods in Korea: Soy sauce (*kan jang*), hot soy paste (*ko chu jang*), *chung kuk jang* (a kind of soy paste made by mixing natto [*naap doo*] with seasonings [salt, red pepper, and garlic], and grinding then aging the mixture), soybean sprouts (*kong na mool*).

Note: This is the earliest English-language document seen (March 2009) that uses the term “ko chu jang” to refer to Korean-style red pepper and soybean paste (miso).

Note 2. This is the earliest English-language document seen (March 2009) that uses the term “chung kuk jang” to refer to Korean-style natto.

Tables: (1) Domestic Korean production and import of soybeans from 1982 to 1987. Domestic production rose to 250,000 tonnes from 233,000 tonnes. Imports for food uses rose to 144,000 tonnes from 104,000 tonnes. Imports for feed uses rose to 936,000 tonnes from 479,000 tonnes. Total supply rose to 1,330 tonnes from 816 tonnes, up 63% in 5 years.

(2) Consumption of soybeans in traditional Korean foods, in 1,000 metric tons, from 1982 to 1987 (1982/1987). Figures in parentheses are for home production. Soy sauce (*kan jang*) 69(50)/70(51). Soy paste (*doen jang* [Korean soybean miso]) 51(41)/50(40). Hot soy paste (*ko chu jang*) 5(4)/5(4). Soybean curd (*doo bu*) 60/114. Soy milk (*doo yoo*) 7/14. Others: Homemade soybean curd and soy milk, *chung kuk jang*, *choon jang* (kinds of soy paste), soybean sprouts (*kong na mool*), and whole soybeans 145/141. Total 337/394, or an increase of 19.9% in 5 years.

Note: This is the earliest English-language document seen (March 2009) that uses the term “choon jang” to refer to Korean-style soybean paste (miso).

(3) Domestic production and import of soybeans in Korea (Estimated for 1987, in metric tons): Soy protein–Textured vegetable protein (domestically made) 4,500. Soy protein isolate (import) 1,800. Soy protein concentrate (import) 150. Wheat protein–Textured vegetable protein (domestic) 900. Vital gluten (domestic) 150. Gluten (wet & dry) (import) 409. Total 7,909.

(4) Nutritional composition of soybeans and soybeans sprouts (per 100 gm).

Figures show: (1) Manufacturing method for rice hot soy paste (*ko chu jang*) (flow sheet). Numbers represent typical ratio of ingredients in volume. (2) Manufacturing method for chunk kuk jang (a type of soy paste) (flow sheet). Numbers represent typical ratio of ingredients in volume.

A photo shows one of the authors. Address: Korea Food Research Inst., P.O. Box 131, Chongryang, Seoul, South Korea.

3416. Natufood B.V. 1989. Prijs-bestelboek [Natufood price list and catalog, July-Sept. 1989]. Fahrenheitstraat 18, 3840 BN Harderwijk, Netherlands. 73+ p. [Dut]

• **Summary:** This catalog of a Dutch natural foods distributor lists the farming method (organic or not), wholesale and retail prices for each product: Page 8: Witte Wonder tofu spreads (mushroom, chili, green peppercorn, garlic, paprika, celery), Lima Limapast contains sunflower seeds, miso, and soy flour. Page 30. Joannusmolen roasted soy flour. Page 31. Natufood defatted soy flour (sifted). Ad for the Vetara line of ready-to-eat foods, many of which contain TVP. Page 33. Avita soybeans (Avita Natufood's organic food line). Natufood soybeans. Ad from Nutricia for canned powdered infant foods. Nutri-Soja complete infant food based on soy. Nutri-Soja Plus based on soy for infants that have been weaned. Page 34. Nutricia infant formulas: Nutrisoja in 400 gm or 1000 gm and Nutrisoja-Plus in 900 gm. Page 35. Avita little soybeans (regular and large, organic).

Page 36. Witte Wonder soybeans in tomato sauce. Ad for Vetara organic tofu, which is produced by Heuschen-Schrouff B.V. in a completely new facility under extremely sanitary conditions. It is made with organic soybeans with a natural coagulant (Serempi) in the traditional way. "Best quality, lowest price." The product label (250 gm) is shown. Page 37. Refrigerated miso products made in Europe. Lima barley miso and rice miso, both unpasteurized. Page 38. Meat replacers. Seitan is sold by Vetara, Witte Wonder, Yakso, and Manna. Vetara herb tofu, Napolitan tofu, rice tofu, bali tofu, rames tofu, rames tempeh, Tjap Tjoy. Witte Wonder tofu in curry/pineapple sauce, and in peanut sauce. Ad for Vetara vegetarian burgers, frankfurters, and schnitzels.

Page 39. Soya meat replacers and vegetarian mixes: Lists 11 Vetara products based on or containing TVP (textured soy flour) or HVP (hydrolyzed vegetable protein). Nutana meat replacers (9 products). Jonathan natural tofu. Cenovis and Huegli bouillon tablets (14 types, probably contain miso). [Sjon Welters adds that Huegli, a multi-million dollar Swiss food company, owns a major part of Natufood B.V.]. Western bouillons (Miso): Lima barley and rice misos. Heiwa Hatcho miso and instant miso soup. Huegli ad.

Page 42. Vegetarian refrigerated products: Vetara smoked tofu, natural tofu (EKO mark), saté tofu, vetaburgers with pineapple, with cheese & onion, natuburgers. Soyadrinks and desserts: Provamel (8 drinks and 6 desserts [puddings]). Lima (3 drinks).

Page 43. Seasonings: Vetara sweet soy sauce (Ketjap zoet). Yakso sweet soy sauce (Ketjap manis). Soy sauce. Lima shoyu (orange label) and tamari (blue label). Heiwa shoyu and tamari. Vetara shoyu. Page 44. Witte Wonder organic tofu dressings (Italian, Mexican, Garden herbs, or

Natural). Mayonnaise and Tofunaise: Witte Wonder organic tofunaise (regular or with lemon).

Page 52. A. Vogel products: Vogel Sojaforce. Page 67. Natufood non-organic soynuts (natural, paprika, curry, or onion). A photo of the soynuts is given at the bottom of the page. Page 69. Non-organic soynuts in bulk (same 4 flavors as page 67). Page 73. Bulk defatted soy four, and soybeans (organic or non-organic). Ad for Vetara Vegetable Bouillon, which probably contains soy. Address: Harderwijk, Netherlands. Phone: 03410-23240.

3417. Reeder, John. 1989. U.S. import/export statistics on soy products (Interview). *SoyaScan Notes*. Aug. 3.

Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John's specialty is tracking statistics on fats, oils, and oilseeds, plus natural gums and resins. The main publication carrying soy-related import statistics is titled "U.S. Imports for Consumption: U.S. Census Bureau Publication IM146." It is published by the Foreign Trade Div. of the U.S. Census Bureau and is available in a monthly published paper version, or on microfiche, or in electronic database form. With soy, it covers soybeans (Heading/subheading 1201.00), soy flour (1208.10), and soy sauce (2103.10). Miso and tofu statistics are lumped in with hundreds of other minor products in the catch-all basket category "Edible Preparations."

In the tariff part of the report, for each item there is an article description, units of quantity (e.g. kg), and rates of duty (general, special, or 2). For example, soy sauce has a general duty rate of 3%, which is granted to all "most favored nations." The "Special" column shows that it is imported duty free from countries with the codes A (Generalized System of Preferences, applied to many developing countries), E (CBERA or Caribbean Basin Economic Recovery Act), or IL (Israel). CA = Canada gets a reduced rate of 2.7%, which will be reduced to zero over the next 5-10 years under the recent Canadian Free Trade Agreement. Column 2, indicates that a 35% import duty applies to most Communist countries, except those (such as China) with "Most Favored Nation" status, when get the General rate.

In the imports part of the report, under each product (e.g. soy sauce, thin = soy sauce) there is a listing of countries, sorted by region from which the USA imports. After each country there may be the codes GSP (the amount of product imported under the lower General System of Preferences rate, because it has been shown to be as domestic product of that country), and OGN (the amount of product imported under the General rate because it has not been proved to be a domestic product), plus a total for the two. Then statistics for the current month and cumulative from January to date, of the quantity imported (which may be reported in two sets of units, Qty-1 and Qty-2, such as pounds and gallons), the customs value (the Free on Board

or FOB value declared by the importer at the foreign port of export), and the calculated duty received by the U.S. based on the customs value.

The report is also available at federal depository libraries, such as Univ. of California at Berkeley. On 1 Jan. 1989 the way of reporting data was changed to the "Harmonized Tariff Schedule of the United States" from the old "Tariff Schedule of the United States" (TSUS) system. This changes some nomenclature and makes the U.S. reporting more similar to that of many other countries, which facilitates determining tariffs and quotas on given items.

Corresponding export statistics are given in another report titled "Schedule B: U.S. Exports of Domestic Merchandise, FT410" published monthly by the U.S. Census Bureau. Each product has the same product code (e.g., soy sauce is 2103.10).

Another publication is the Directory of International Trade Analysts: Commodity Agreements.

Good databases for searching soy-related data are Disclosure, and Nexus (business news). Address: U.S. International Trade Commission, Agricultural Div., Washington, DC 20436. Phone: 202-252-1319.

3418. Welters, Sjon. 1989. Early involvement with soyfoods and Manna in the Netherlands (Interview). *SoyaScan Notes*. Aug. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sjon was born in 1955. He completed high school plus one year at the National Academy of Fine Arts. Then he dropped out to pursue his interest in the natural foods movement. He got involved with soyfoods when he became a vegetarian in 1973. In Sept. 1975 he started to work for Manna. During 1975-76 he did a lot of experimentation with soyfoods production while working at Manna, and he was involved in selling the shoyu and miso that Manna had been importing from Muso in Japan since 1975. In Sept. 1977 Sjon left Manna and started his non-profit natural foods foundation (Stichting Natuurvoeding Alkmaar) and his own natural foods store, both at Alkmaar (pronounced AL-ek-mayr), the Netherlands, based on the model established by Manna. During 1980-81 Sjon's foundation merged with Manna's foundation and Sjon started to work as director of operations at Manna, and he first became involved with the production of tofu and seitan. During the early 1980s Sjon was an editor of the *Manna Bulletin*. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

3419. Roth, Martin. 1989. Early history of Great Eastern Sun and subsequent work with soyfoods (Interview). *SoyaScan Notes*. Aug. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Other records describe in detail Martin's pioneering work with commercial production of Brown Rice & Tofu Sandwiches, Sweet White Miso, Amasake, Amasake Shakes, and America's first Amasake Ice Cream. In 1982 he and his very close friend Barbara Svenning Garvey (they were never officially married) moved from Boulder, Colorado, to Miami, Florida, then to North Carolina. Martin met Barry Evens in Florida and Barry commissioned Martin to go to North Carolina and set up a macrobiotic distribution and import company near the American Miso Co., of which Barry was then the principal owner. "The beginning of that company was a wonderful experience. Everybody was thrilled. We were the first ones to actually take a full line of Japanese foods and present it to the health food stores in a big way. At that time Erewhon still had a much more limited selection of Japanese imports, such as miso, tamari, soba, etc. We had only imports, 200 to 300 esoteric items that many people never heard. We put together a nationwide sales force and went store to store, introducing the concept of a macrobiotic section. We put that on the map. We had great success, opening hundreds of accounts. I left in about 1984 because I got an opportunity to work for Westbrae as sales and marketing manager, and North Carolina was not my favorite place to live." Martin developed the concept, the name, and the graphics for the Westbrae Malted and for Mitoku's Supersoy. Address: Berkeley, California. Phone: 415-527-7066.

3420. Ebine, Hideo. 1989. Re: Retirement dates of soyfoods researchers from the National Foods Research Institute, Japan. Letter to William Shurtleff at Soyfoods Center, Aug. 28. 1 p. [Eng]

• **Summary:** Masahiro Nakano retired in 1967, Watanabe Tokuji in 1977, and Hideo Ebine in 1982. The National Food Research Institute moved from Tokyo to Tsukuba in Feb. 1989. Address: Central Miso Research Inst., Shinkawa 1-24-19, Chuo-ku, Tokyo 104, Japan. Phone: 03-551-7161.

3421. Montague, Sandy. 1989. Asians and soybeans in Australia (Interview). *SoyaScan Notes*. Aug. 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Prior to 1973 the Australian government had a "white Australia" policy that prevented Asians, blacks, and Indians from immigrating. After the racially discriminatory immigration policies were abandoned in 1973 (the year the U.S. lost the Vietnam war and withdrew its troops), the main group of Asians to enter Australia were Vietnamese. Today (according to the *World Almanac*) Asians constitute only 2% of Australia's population. Any person who now wishes to immigrate must have either money, a skill/occupation, or relatives in Australia. Thus the Asian soyfoods market in Australia is quite small and must cater to Vietnamese.

The key factor in growing soybeans in Australia is the availability and price of water. During the last 2-3 years the price of water has tripled. Thus rice, which requires less water than soybeans, is taking over soybean acreage.

Sandy sells rhizobium inoculants to Australian soybean growers. Three natural foods importers in Sydney import miso; they want organic miso. Address: Nutri-Life, "Teangri" Bethanga, VIC 3691, Australia.

3422. **Product Name:** [Miso].

Foreign Name: Miso.

Manufacturer's Name: Gaïa Enterprise. Officially registered in Jan. 1992.

Manufacturer's Address: Rue Principale, 66130 Corbere, France. Phone: 68.84.86.28.

Date of Introduction: 1989. August.

New Product–Documentation: Form filled out for Anthony Marrese. 1989. Nov. This product was introduced in Aug. 1989. Dan makes 100 kg/year of miso aged for a longer time and 5 kg/month of young miso. Both are not pasteurized.

Letter (handwritten) from Daniel S. Ludington. 1992. Feb. 7. He has been making tofu, tempeh, and miso for sale for 3½ years. He learned to make them using books by Shurtleff and Aoyagi. Now he would like to order their books *Miso Production*, and *Tofu & Soymilk Production*.

Letter (handwritten) from Dan Ludington. 1992. March 3. "Gaïa Enterprise was officially registered with the *Chambre de Metiers* of the Pyrenees Orientales in Jan. 1992. (She had been unofficially in existence using the same name for nearly four years)." Dan's father was a 20-year career cook in the U.S. submarine service. He died instantly of a heart attack at age 54. Dan is the oldest of 4 boys. He received a degree in chemical engineering from MIT in 1977, then worked for Intel Corp. in their factory making silicon chips for 5 years, then for Toshiba USA for another year. When his father died, he kept a 10-year promise to himself to hitch-hike around America. In about Loveland, Iowa, his chemical engineer's eyes saw how chlorinated hydrocarbons enter the food chain, and decided to stop eating meat. About 6 months later he was introduced to macrobiotics. 2½ years later he went to the Kushi Institute in Boston, Massachusetts, to see if he could find a better balance in his diet. There he met Odile Corbel, a French woman with a 12 year-old son named Xavier and 10 years of macrobiotic experience. They were married, and returned to France. 18 months later Dan got a Green Card. While Odile was in the USA, Pauline Schaft had stopped making tempeh, and a weekly, organically grown products market had started in Perpignan. So he and Odile started making tofu, tempeh, and macrobiotic pasties and selling them at this market. The business has grown until today sales are \$400/week. He and Odile are still married with 2 children of their own. Pauline Schaft now goes by her

maiden name of Van Marle; she is now more involved with her yoga practice than with making food. The company now sells 4 kg/week of miso, all direct and without the use of labels, marketing, or distribution.

Proceedings of the Short Course on Food Uses of Whole Oil and Protein Seeds held at Makaha, Hawaii, May 11-14, 1986. [35 ref]

• **Summary:** Contents: Introduction: Introduction. Oriental nonfermented products: Yuba, kinako Thai desserts (tofu guan, med khaonon), Thai foods (protein crisp, cooked baby food, canned evaporated soybean milk, taow-huey, kanom ping kaset). Fermented foods: Natto, hama-natto, tao tjo (a miso-type product made in Indonesia and Thailand), ontjom (made from peanuts, coconut press cake, or okara), kochu chang, ketjap, sufu, yogurt-type products, tauco, soy sauce, miso, tempeh. Western world type products. Full fat soy flour (enzyme active, heat treated). Soybean hulls. Whole soybeans in animal feed. Chapatty [chapati]. Full fat soy grits. Heat treatment of soybeans. Heat treatment and texturizing. Low-fat products. Snacks (soynuts—dry roasted or oil roasted, plain or seasoned). Soybean sprouts. Soy butter [soynut butter]. Combinations of soybeans and cereals. Soybeans as vegetables (mao-tou, edamame, or fresh green soybean). Defatted products. Nutrition. Soybean handling and equipment considerations. Solvent plant considerations. Address: Food Ingredients (Minnesota) Inc., 2121 Toledo Ave. North, Golden Valley, Minnesota 55422.

3426. **Product Name:** Miso Magic.

Manufacturer's Name: Lightning Dudes. Div. of America's Heartland Foods Inc.
Manufacturer's Address: 2619 Ryan Dr., Indianapolis, IN 46220. Phone: 317-257-9101.

Date of Introduction: 1989. September.

Ingredients: Cold Mountain mellow white miso, safflower oil, lemon juice, honey, Dijon mustard, onion powder or garlic.

Wt/Vol., Packaging, Price: 12 oz jar.

How Stored: Refrigerated.

New Product–Documentation: Talk with Tom Main, the developer. 1989. Oct. 5. This is a thick sauce which was introduced in September 1989 and is presently sold only locally. Label. 1989. 3 by 4.5 inches with an irregular shape. Full color and very nicely done. A little elf/angel with wings is touching its magic wand to a dollop of the white miso sauce atop a flowerette of broccoli, accompanied by peas, sliced celery and carrot, with a big ripe tomato in the background. "All purpose sauce. Original. Refrigerate after opening."

Proceedings of the Short Course on Food Uses of Whole Oil and Protein Seeds held at Makaha, Hawaii, May 11-14, 1986. [11 ref]
 • **Summary:** Contents: Introduction. Composition. Required characteristics: For soy milk, tofu, miso, natto, soy sprouts. Conclusions.

The most desired characteristics of soybeans for food processing include: Large seed size, high protein content, high quality, reasonable price. The characteristics desired for each of the soyfoods mentioned above are given.

Table 1.1 shows world production of the eight major oilseeds in million metric tons from 1981-82 to 1985-86. Over this 5-year period, total production of the eight oilseeds has grown by 14.6%, from 169.4 to 194.2. In descending order of production, the eight are: Soybean 96.0. Cottonseed 34.1. Peanut 19.7. Sunflowerseed 18.6. Rapeseed 18.6. Copra (dried coconut meat, 5.0). Flaxseed 2.6. Palm kernel 2.3. Source: Foreign Agricultural Service, USDA. Address: American Soybean Assoc., P.O. Box 27300, St. Louis, Missouri 63141.

3430. Holzapfel, Robert. 1989. The Farm in Tennessee and seitan made with miso (Interview). *SoyaScan Notes*. Oct. 12. Conducted by William Shurtleff of Soyfoods Center.
 • **Summary:** The Book Publishing Co. at The Farm is planning to publish a book on seitan. There are two ways of making seitan: from wheat flour or from gluten flour. The former method is very wasteful of the nutrients in wheat, befouls the sewage system with wheat starch, takes a long time, and gives a lower yield of final product. The method using gluten flour gives no waste, and is quick and easy. Two companies in America that make or sell gluten flour are Arrowhead Mills (Hereford, Texas) and Nature's Harvest (A Seventh-day Adventist company in Michigan).

To make seitan, mix 3 cups water with ½ cup miso and garlic granules or powder to taste. Stir this into 4 cups gluten flour in a bowl. Mix until it becomes elastic, then knead until a uniform loaf is formed. Tear off chunks and shape into patties. Bake on a tray at 350°F for about 10 minutes on side, until nicely browned and savory. The resulting product has the texture and taste of meat. Address: President, The Book Publishing Co., P.O. Box 99, 156 Drakes Lane, Summertown, Tennessee 38483. Phone: 615-964-3571.

3431. Committee on Dietary Allowances, Food and Nutrition Board, National Research Council. 1989. Recommended Dietary Allowances, 10th revised ed. Washington, DC: National Academy of Sciences. x + 285 p. Oct. Index, 24 cm. 7th ed. was 1968. 8th ed. was 1974. 9th ed. was 1980. [200* ref]
 • **Summary:** Recommended Dietary Allowances (RDAs) have been prepared by the Food and Nutrition Board since 1941. The first edition was published in 1943 to provide "standards to serve as a goal for good nutrition."

This book expands the role of calcium in the diet: For young adults (age 19-24) it has been increased to 1200 mg/day, from 800 mg/day. Those with the maximum RDA of 1200 mg/day for calcium are males age 11-14, females age 11-24, and pregnant and lactating women. Males and

females from age 25 and up, and children from age 1-10, still have an RDA of 800 mg/day.

The RDA for iron has been lowered for women of reproductive age to 15 mg/day from 18 mg/day. Iron is a constituent of hemoglobin, myoglobin, and a number of enzymes and is therefore an essential nutrient for humans. Heme and nonheme forms of iron are absorbed by different mechanisms. Heme iron, which is highly absorbable, is found only in animal tissues. "The proportion of heme iron in animal tissues varies, but it averages about averages about 40% of the total iron in all animal tissues, including meat, liver, poultry, and fish. The remaining 60% of the iron in animal tissues and all iron in vegetable products is present as nonheme compounds... The two most well-defined enhancers of nonheme iron are some organic acids (especially ascorbic acid [vitamin C]) and the animal tissues present in each meal. On the other hand, some dietary and medicinal substances such as calcium phosphate, phytates, bran, polyphenols in tea, and antacids may decrease nonheme iron absorption substantially."

The RDA for vitamin B-12 has been lowered from 3 to 2 mcg/day; World Health Organization recommends only 1 mcg/day. Selenium and vitamin K have now been given RDA status. It is recommended that smokers consume almost twice as much vitamin C as non-smokers. Other major revisions appear in the RDAs for zinc, folate, and vitamin B-6.

In the chapter on minerals, section on Calcium (p. 174-84), has the following headings: Introduction, calcium absorption, dietary sources and usual intakes (calcium-precipitated tofu is listed as a good source), bone formation and retention, relationship to phosphorus and protein intakes, other potential functions, recommended allowances (adults and adolescents, pregnancy and lactation, infants and children), excessive intakes and toxicity.

The average American consumed 743 mg/day of calcium in 1977-78. Intake was generally higher in males than in females. Dairy products contribute more than 55% of calcium intake of the U.S. population (Block et al., 1985). "An increase in protein intake reduces fractional tubular reabsorption and results in an increase in urinary calcium excretion. In contrast, an increase in phosphorus intake increases fractional reabsorption and causes urinary calcium to decrease." But some studies (Spencer et al., 1988) have failed to demonstrate effects of dietary phosphorus intake on calcium balance at adequate levels of calcium intake.

For details on vitamin K, see p. 107-14. Vitamin K (fat-soluble) is the name of a group of compounds. "Compounds with vitamin K activity are essential for the formation of prothrombin and at least five other factors (factors VII, IX, and X, and proteins C and S) involved in the regulation of blood clotting... Defective coagulation of the blood is the only major sign of vitamin K deficiency." "The vitamin K content of commonly consumed foods is not known with

precision and therefore is not given in food composition tables... Green leafy vegetables, which provide 50 to 800 micrograms [mcg] of vitamin K per 100 gm of food, are clearly the best dietary sources. Small but significant amounts of vitamin K (1 to 50 mcg/100 gm) are also present in milk and dairy products, meats, eggs, cereals, fruits, and vegetables... A normal mixed diet consumed daily by a healthy adult in the United States has been estimated to contain an average of 400 to 500 mcg of vitamin K." Address: Washington, DC.

3432. **Product Name:** Jaclyn's Non-Dairy Alfredo Sauce, and No Tomato Pasta Sauce [Each Seasoned with Miso].
Manufacturer's Name: Jaclyn's Food Products, Inc.
Manufacturer's Address: P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.

Date of Introduction: 1989. October.

Ingredients: Alfredo: Tofu, organic white miso, water, organic brown rice flour, garlic, imported olive oil, sea salt, natural herbs and spices. Pasta Sauce: Fresh organic carrots, squash, water, onion, green pepper, garlic, imported olive oil, organic red miso, red wine vinegar, sea salt, natural herbs and spices.

Wt/Vol., Packaging, Price: 16 oz jar.

How Stored: Shelf stable; refrigerate after opening.

New Product-Documentation: Leaflet. 1989. April. "The Alfredo sauce can be used in your favorite Fettuccine Alfredo recipe. Try it over noodles, whole grains, or steamed vegetables."

Tardosky. 1989. Whole Foods. Nov. p. 50. Talk with Robert Savar. 1989. Nov. 13. The non-dairy alfredo sauce is made with tofu and mellow white miso. The tomato sauce is made with organic carrots, squash, and red miso.

3433. **Product Name:** Tofu Burgers, Teriyaki Burgers, Miso Burgers, Tofu Nuggets [Plain, or Barbeque].

Manufacturer's Name: La Soyarie.

Manufacturer's Address: 25 rue St. Etienne, Hull, QUE, J8X 1H5, Canada. Phone: 613-235-5356.

Date of Introduction: 1989. October.

Ingredients: Incl. tofu, soy sauce.

How Stored: Refrigerated.

New Product-Documentation: Soya Bluebook. 1989. p. 102-03. Contact: Koichi Watanabe, President.

SoyaCow Newsletter. 1994. July/Sept. Mr. Koichi Watanabe is president of La Soyarie in Hull, Quebec.

3434. Lima N.V. 1989. Lima: Tarif détaillant [Lima Foods catalog and price list]. Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium. 9 p. [Fre]

• **Summary:** This macrobiotic food catalog was bound into the back of the Bonneterre catalog at a 1989 food expo in Paris. Lima sells the following soyfoods, each preceded by its product category: Fresh products: Skewered seitan/tofu,

Presto natural tofu, Presto tofu legumes/vegetables, Presto tofu cheese. Legumes: Yellow soybeans. Sprouts: Green soy/mung (500 gm or 5 kg). Flours: Roasted soy flour. Vegetarian preparations: Lima soy sauce (500 ml or 1 liter), tofu, natural tempeh, tempeh with shoyu. Dressings: Salad dressing with soy and tomato, Salad dressing with soya herb. Specialties: Organic miso (1 month), Hacho miso, Barley miso (organic or regular), Rice miso (organic or regular), Heiwa brand Instant miso soup (regular or red, From Japan), Tamari (250 ml, 1 liter, 18 liters), Mansan Tamari from Japan, Shoyu (250 ml, 1 liter, 18 liters), Sakai shoyu from Japan. They also carry one book titled "Tofu dans le Cuisine Macrobiotique" (Eddie Hara, 1982).

Accompanying the catalog is a packet of individual full-color sheets with photos of products in a folder titled Lima: Quality is our passion." There are sheets titled "Vegetable products rich in protein," "Tamari and shoyu," "Japanese specialties (incl. Heiwa brand shoyu and tamari), and a brochure titled "Lima: 30 years as a producer of organically grown (biological) foods." It describes the life and work of Edgar Gevaert (poet, artist-painter, ecologist, and a leader of the European peace movement). Address: Sint-Martens-Latem, Belgium.

3435. **Product Name:** [Nerimiso (Ginger, Garlic, Sesame, Almond, or Peanut), and Tekka Miso].

Foreign Name: Neri Miso (de Gengibre, de Alho, de Sésamo), Tekka Miso.

Manufacturer's Name: Miso Produções.

Manufacturer's Address: Rua do Douro, No. 92 r/c, Rebelva, 2775 Parede, Portugal. Phone: (1) 247 50 68.

Date of Introduction: 1989. October.

Ingredients: Ginger nerimiso: Miso, ginger, rice syrup (mizuname), saké.

Wt/Vol., Packaging, Price: Nerimiso: 200 gm. Tekka miso: 100 gm.

Nutrition: Per 100 gm.: Calories 419, protein 15.8 gm, carbohydrates 24.8 gm, sodium 1506 mg.

New Product-Documentation: Letter from Miguel Azguime, owner. 1989. Oct. 31. The rice miso is aged 2 years in wooden kegs. The sweet rice miso is aged 1-2 months. There are 5 varieties of Nerimiso.

Labels. 1989. 7 by 1.75 inches. Black on white.

Illustration of a Tibetan vajra on each label.

3436. McCarty, Meredith. 1989. Fresh from a vegetarian kitchen. Turning Point Publications, 1122 M Street, Eureka, CA 95501-2442. ii + 263 p. Illust. by Bernice Kagan. Index. 28 cm.

• **Summary:** A macrobiotic cookbook containing over 450 recipes, many using tofu (at least 20, including many innovative sauces and dressings), tempeh, miso, amazake, soy sauce, soymilk, and amazake. A section titled "Soyfoods: Tofu and tempeh" (p. 151-55) contains 6 recipes

and several variations. On page 202 is a recipe titled "Amazake-Soymilk" in which 3/4 cup soymilk is mixed with 1/4 cup plain amazake. The author has co-directed this natural health center in northern California since 1977. Address: Eureka, California.

3437. *SoyaScan Notes*. 1989. Influence of Japanese and Japan on soyfoods in America (Overview). Dec. 7. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The Soyfood Center's SoyaScan database presently contains 30,790 publications and commercial products related to soya. Of these, 876 (2.9%) concern the influence of Asian-Americans (Japanese, Chinese, Koreans, or Indonesians) or their home countries on soyfoods. Of these 876 records, 638 (73%) concern Japanese influence, compared with 178 (20%) that concern Chinese influence—including Chinese from Taiwan, Hong Kong, Singapore, etc. Thus Japanese influence on soyfoods in America is much greater than that of any other Asian cultural group. We can identify at least seven major areas of influence:

1. Soyfoods Terminology. It is interesting to note that many of the most popular soyfoods in America are most widely known by their Japanese names. We say tofu (not doufu or bean curd), miso (not jiang or soybean paste), natto, okara (not soy pulp), yuba (not doufu-p'i or soybean skin). Even "soy" (as in soy sauce) is derived from the Japanese word "shoyu." Increasingly Americans interested in natural foods also use the terms shoyu and tamari to distinguish them from HVP soy sauce.

2. Kikkoman. By far the most influential Japanese soyfoods company in America today is Kikkoman, just as soy sauce is by far the most important soyfood product. Kikkoman was also the first Japanese company to introduce soyfoods to America. In 1868 the first Japanese immigrants to Hawaii took kegs of Kikkoman brand shoyu with them. In 1879 Kikkoman brand shoyu was registered in California, where it was exported to Japanese immigrants. Exports rose steadily, until between 1949 and 1954 exports of Kikkoman shoyu to the U.S. ranged from 213,000 to 305,000 gallons a year. Kikkoman's first real attempt to reach any foreign market dates from 1956 when, during the U.S. presidential elections, Kikkoman ran television ads to promote its product to mainstream American audiences as a seasoning for meat, fish, and poultry. In 1957 Kikkoman International Incl., a new sales company was established in San Francisco. Sales skyrocketed. In 1973 Kikkoman opened a huge modern shoyu plant at Walworth, Wisconsin. In 1976 Kikkoman passed La Choy to become America's best-selling soy sauce.

3. Introducing Soyfoods to Hawaii. The first Japanese who arrived in Hawaii in 1868 brought shoyu and miso with them. The earliest known soyfoods company there was a shoyu brewery started in 1891 in Honolulu by Jihachi Shimada. This was also the earliest known soyfoods

company started by a Japanese anywhere in the Western world. Hawaii became part of the USA in 1898 by annexation. Hawaii and California were the first two areas in the U.S. where soyfoods became widely available. During the 20th century, Japanese started roughly 183 companies in Hawaii making shoyu, miso, and tofu—far more than Chinese (6) or Koreans (2). They developed innovative new products—such as sweet Hawaiian-style shoyu and miso. These products profoundly influenced the food life of Hawaii.

4. Soyfood Manufacturers in the USA. The earliest known soyfoods manufacturer in the Continental USA was a company (the name is unknown) run by the wife of Chieko Hirata that started making tofu in Sacramento in about 1895. The second earliest was Yamamori Jozo-sho, which started making shoyu in San Jose, California, in 1897. Many of the earliest soyfoods companies in America were run by Japanese Americans. By 1942 at least 158 soyfoods manufacturing companies had been started in America by Asian Americans; of these, 143 (91%) were run by Japanese Americans. When *The Book of Tofu* was published in 1975, it listed 55 tofu companies in America, all run by Asian-Americans; 39 were Japanese- and 16 were Chinese-run. Today America's two largest tofu companies are both run by Japanese Americans: Azumaya Co. in San Francisco, and House Foods & Yamauchi Inc. in Los Angeles. Hawaii's three largest tofu companies are also run by Japanese Americans: Aloha Tofu Co., Kanai Tofu Factory, and Hawaii Tofu. Morinaga Nutritional Foods in Los Angeles and Kikkoman Foods in San Francisco both import large amounts of aseptically packaged long-life silken tofu from Japan.

Another major manufacturer is San-Jirushi Corp. of Kuwana, Mie-ken. In the late 1970s San Jirushi started exporting tamari and soybean miso to America. They set up an office in the early 1980s and began to promote their product as "real" tamari to industrial food processors and the natural foods market. In Sept. 1987 the company opened a state-of-the art tamari plant in Richmond, Virginia, with a capacity of 1 million gallons a year. The company now has 75% of the industrial soy sauce market in America.

In Oct. 1986 a major new joint stock company named American Soy Products began producing Edensoy soymilk in Clinton, Michigan. It was a joint venture between Eden Foods and 4 Japanese companies: Marusan Ai, Kawatetsu Shoji, Muso Shokuhin, and Seikensha. Edensoy has since become America's best-selling soymilk. Prior to 1986 much of the soymilk sold in America was made in Japan.

Finally, three of America's 4 largest miso manufacturers are run by Japanese-Americans. The largest is Miyako Oriental Foods in Los Angeles. The other two are located in Hawaii.

5. Soyfoods Imports from Japan. The first importers of shoyu and miso were Japanese distributors such as Japan

Foods Corp., Mutual Trading Co. and Nishimoto. But starting in 1962 American macrobiotic and natural foods companies started to import large amounts of shoyu and miso. Pioneers were Chico-San, Erewhon, Eden Foods, Westbrae, Edward & Sons, Tree of Life, and Great Eastern Sun. U.S. imports of soy sauce from Japan jumped from 1.7 million lb (174,400 gallons, worth \$317,000) in 1949, to 18.6 million lb (1,897,000 gallons, worth \$3,116,000) in 1972, an 11-fold increase in quantity during only 23 years.

6. Teachers and Information. Many Americans first learned about soyfoods from Japanese teachers, especially macrobiotic teachers, such as George and Lima Ohsawa, Michio and Aveline Kushi, Herman and Cornelia Aihara, and Noboru Muramoto. All have written many influential books and lectured and taught extensively since the 1960s. In addition, many young Americans learned how to *make* soyfoods from these macrobiotic teachers. Moreover, Japan is Asia's best source of information about soyfoods. For example, the Soyfoods Center's SoyaScan database contains 5,095 publications and products about soya and Japan, compared with 1,867 on soya and China or Taiwan.

7. Tofu Equipment Manufacturers. Hundreds of tofu companies have started in America since the mid-1970s. The majority of these are run by Caucasian Americans and most use specialized tofu equipment made in Japan by Takai Tofu & Soymilk Equipment Co., or by Sato Shoji.

3438. Krieger, Verena. 1989. Soja als Nahrungsmittel: genutzt oder missbraucht? [Soya as a food: Used or misused?]. *Zum Beispiel (Switzerland)* No. 12. p. 15-17. Dec. 21. [Ger]

• **Summary:** Soybeans can be fermented to make miso, soy sauce, tempeh, or natto. Or the protein can be extracted in traditional ways to make soymilk, tofu, or yuba. One can also make soy sprouts. In the Western world, soybeans are mostly misused to make high-protein meal for livestock fodder, and vegetable oil. Address: Lucerne, Switzerland.

3439. Kuntjoro, Sri Utami; Kusnadi, N.; Sayogyo, -. 1989. Demand for corn, cassava and soybean in human consumption: A case study in Java, Indonesia. *CGPRT Working Paper* No. 2. xvii + 116 p. Dec. 25 cm. [19 ref]

• **Summary:** Contains much original, detailed information and statistics on consumption, demand, and demand elasticity for secondary food crops (*palawija*) in Indonesia. The main secondary food crops are soybeans (including the soybean products *tahu* {tofu}, *tempe* {tempeh}, *kecap* {soysauce}, and *tauco* {Indonesian-style miso}), corn, cassava, and peanuts. "Pulses, soybean in particular, represent (after cereals) the most important source of vegetable protein for the people of Indonesia. On the whole, soybeans are consumed in the form of tahu (bean curd), tempe (fermented soybean) and kecap (soysauce). Among low-income households, tahu and tempe, which are

relatively cheap in price, are (after cereals) a major source of vegetable protein. According to Sayogyo (1985), tempe is also popular among people in the high income groups.

The National Socio-Economic Survey (Susenas), conducted by the Central Bureau of Statistics, collects socio-economic data from a large number of households throughout Indonesia. The use of chemical fertilizer on soybeans has increased from 5.19 kg/ha in 1973 to 80.39 kg/ha in 1982. Per capita consumption of soybeans has risen from 3.28 kg/year in 1968 to 4.45 kg/year in 1983. In the peak year, 1979, it was 5.33 kg/year.

Table 4.2 shows protein consumption from secondary food crops in 5 Javanese provinces in 1981. The amount of protein contributed daily per capita to the Indonesian diet by soyfoods (in the forms of tempeh, tofu, soybeans, soy sauce [kecap], and miso [tauco]) is greatest in Yogyakarta (22.57 gm; 61.1% of total protein consumption), followed by Central Java (14.57 gm; 37.4% of total), Greater Jakarta (13.78 gm; 33.3% of total), East Java (12.96 gm; 32.8% of total), and West Java (6.44 gm; 14.9% of total). As people's income rises, they tend to consume more soyfoods. Soyfoods provide Tempeh makes the greatest contribution to protein intake in every province, followed by tofu, soybeans, soy sauce (kecap), and tauco (Indonesian miso). Tempeh makes the greatest contribution in Yogyakarta, where it provides 17.86 gm/capita/day of protein, or 60% of the protein supplied by secondary crops, and more than any other single source. The amount of daily protein per capita contributed by tempeh is next most important in Central Java (11.48 gm/day), followed by East Java (9.28), Greater Jakarta (8.98), and West Java (4.16). Tofu makes its greatest protein contribution in Greater Jakarta (4.54 gm/day), followed by Yogyakarta (3.57), East Java (3.49), Central Java (2.80), and West Java (1.99). Address: Agricultural economists, Bogor Univ. of Agriculture.

3440. Berthier, A.M. 1989. Soja, quelle place dans l'alimentation? [Soya: What is its place in the diet?]. *Revue Laitiere Francaise* No. 483. p. 35. [Fre]*

• **Summary:** A brief study of the composition and nutritive value of the soybean and products derived from it, such as soy sprouts, tofu, soy sauce, and miso.

3441. Combemale, Isabelle. 1989. Un nouvel outil de production du tofu en continu: Reportage soja [A new tool for the continuous production of tofu: Reporting on soya]. *Technique Laitiere [Process, Rennes]* No. 1038. p. 51-54. [Fre]

• **Summary:** A description of the installations at the cooperative "The Silos de Valence" used for automated, continuous tofu production. Describes processing conditions and the principal outlets for the products obtained: Miso, soymilk (flavored desserts), and by-products (okara).

Les Silos de Valence, a cooperative that produces soybeans in the south of France, first considered processing soybeans for human consumption while looking for new markets and more profitable high value-added products. In 1988, after market surveys and feasibility studies had confirmed the choice, they established a new company named Innoval. The new production plant in Valence is similar to the one built by Alfa-Laval for Cacoja at Issenheim in 1987. Soymilk base is continually processed up to the point where it is coagulated into tofu.

The new and innovative part of the plant is the concentration of the soymilk base using ultrafiltration (developed by Tech-Sep) [also a DTD patent!] and continuous dosing of the calcium sulfate coagulum, developed and patented by S.E.R.E.A. and equipment built by Steachma.

Simultaneously with coagulation, spices, herbs, vegetables, etc. are added. The total production is sold to the dairy industry, which markets and distributes the products.

The article ends by noting that large companies like Alfa-Laval and Nestle are interested in soybean utilization and many soymilk products are currently marketed by Celia, Triballat, and Est Lait dairy groups in France.

Black-and-white photos show: (1-4) Equipment inside the Innoval plant. (5) Several Innoval products, incl. Inno Fun. (6) An exterior view of the Innoval plant, with details about two companies: (1) Innoval—Address: Allée Joule, Les Auréats, 26014 Valence cedex. Director: M. Pastonnier. Asst. Director: Mr. Reynaud. Capital: 4.8 million francs, of which 70% is Silos de Valence and 28% is financial establishments. Personnel: 10. Expected transformation in 1989: 700 tonnes of grains. (2) Les Silos de Valence—Cooperative of cereal grain producers with capital in 1987 of more than 100 million francs. *Remise d'adhérents*: 5,300. *Producteurs outils*: 1,130. Personnel: 21. (7) Messrs. Tocart, Steachma, and Toulouse. (8) The front gate. Address: Ingénieur agro-alimentaire [France].

3443. **Product Name:** [Rice Miso, Barley Miso, and Brown Rice Miso].

Manufacturer's Name: Kanta Kozaki GmbH.

Manufacturer's Address: Dammweg 16, D-7068 Urbach, West Germany. Phone: 07181/87170.

Date of Introduction: 1989.

New Product—Documentation: Letter from Bernd Drosihn of Viana Naturkost. 1990. April 8. A new Japanese miso company, Kanta Kozaki, has started in Germany near

Stuttgart. They are producing mugi, genmai, and kome miso.

Talk with Bernd Drosihn. 1995. Jan. 30. The owners of Kanta Kozaki are Hiroshi Kozaki (Japanese) and Karl Selgmann (German). This company many have started making miso a little earlier than Bernd's company, Viana. The German man conducted a lot of research on miso, and while doing that, he made miso.

Leaflet titled "Kanta Miso und neue Produkte" sent (faxed) by Bernd Drosihn. 1995. Jan. 30. The company's new products include the Kanta Miso Pickles. The first product of this line is Miso Pickled Cucumbers.

3444. Kato, K.; Akai, S.; Tominaga, S.; Kato, I. 1989. A case-control study of biliary tract cancer in Niigata Prefecture, Japan. *Japanese J. of Cancer Research (Gann)* 80:932-38. *

• **Summary:** Consumption of miso soup was inversely related to bile duct cancer, but not gall bladder cancer—although this relationship was not significant after adjustment for other variables.

3445. **Product Name:** Tofu, Soy Milk, Tempeh, Soy Ice Cream, Soy Punch.

Manufacturer's Name: Natural Cafe. Expanded to include La Soyarie by June 1994.

Manufacturer's Address: Mailing address: 73 Chaussee Rd., Castries, St. Lucia, West Indies. Plant: Union Hilltop Choc, Castries. Phone: 809-452-6421.

Date of Introduction: 1989.

New Product–Documentation: Plenty International. 1994. Jan. A Guide to Growing and Using Soybeans for Food. p. 30. This company makes fresh soyfoods.

Form filled out by Johnson Clarke, Manager. 1994. May 25. The plant is now located at Union Hilltop Choc, Castries, and the phone number is 809-450-2570. The company was founded in 1989. The founders were Johnson Clarke, Maya Clarke, and Ignatius Longville. The original purpose was to work as a group to produce high-quality foods at an affordable price and to educate the populace about soybeans. There have been no changes in the company address or ownership. Milestones: (1) When Johnson built a proper structure of concrete for processing; and (2) When CIDA (Canadian International Development Agency) gave the group a grant to purchase some equipment in 1991. Reasons for success: "I am the only person on the island that is processing [soybeans] on a commercial scale, and I take pride and joy in what I'm doing." The company makes tofu, soy milk, and tempeh, and it buys and markets Vitasoy soymilk, miso, soy oil, Mori-Nu tofu, and soy powder. They make about 100 lb/week of tofu, and they use about 7 gallons of soy milk to make soy ice cream and soy punch. The company's three best-selling products (in descending order of dollar value)

are tofu, soy punch, and soy ice cream. The company now employs 6 people. Their factory is 14 x 30 feet. Offices are in a separate building. Net sales last year were "not much" and the net worth of the business is "not much." "We are a small group of six and just making ends meet. We still have a long way to go in making the population of St. Lucia realize the true potential of soybeans. I don't know if we can continue since we are poorly equipped for processing the beans and packaging the products to sell at supermarkets and shops. We are presently selling only at one small outlet we own. We could sell at hotels, supermarkets, and shops if we had proper packaging equipment such as a vacuum packer." Note: This is the earliest known commercial soy product made in St. Lucia.

3446. **Product Name:** [Tofu, Tofu (in Jars), and Tofu & Miso Paté Spread].

Foreign Name: Tofu, Tofu Tres Delicias, Paté -de Tofu y Miso.

Manufacturer's Name: Vegetalia / Productos Naturales.

Manufacturer's Address: Sant Andreu, s/n, Castellcir, Barcelona, Spain. Phone: 93/866-8298.

Date of Introduction: 1989.

New Product–Documentation: Letter from Bernd Drosihn of Viana Naturkost. 1990. April 8. A tofu company in Spain, owned by Salvador Sala, now sells tofu in jars, and tofu spreads.

Letter from Javier Arocena Aramburu of Zuitzo in Spain. 1992. Dec. 14. Vegetalia is one of four soyfoods manufacturers (including his own company) that he is aware of in Spain. It is run by Salvador. The address is now given as: Plaza de la Era s/n, Castellcir (Barcelona), Spain.

Booklet titled *Recetario* sent by Penelope Stewart of Fair Oaks, California. 1993. July 19. It gives the company address and phone as "Castellcir, Tel. 93-866 61 61." The introduction states that Vegetalia was formed in April 1986 by Salvador Sala, Carmen and Tomás. As of 1992, the company is 6 years old.

Letter from Joaquim Castillo. 1998. May 22. Vegetalia is one of three pioneering soyfoods companies in and around Barcelona.

3447. Acuff, Steve. 1989. *Das makrobiotische Gesundheitsbuch* [The macrobiotic health book. 2nd ed.]. Munich, West Germany: Goldmann Verlag. 256 p. Recipes by Karen Acuff. [Ger]

• **Summary:** This book of macrobiotic philosophy and cookery contains 5 tempeh recipes, and also mentions miso, tofu and tamari. Flora Yap (4/92) notes that the author travels from town to town, lecturing and selling his book. Certain groups are inviting him to speak, renting a place for him to lecture and doing the publicity (paid admission). Address: Idaho, USA.

Series: Shokuhin Chishiki Mini Bukkusu Shirizu (Knowledge of Foods—Mini-Books Series). [Jap]* Address: Director, Central Miso Research Inst., Shinkawa 1-26-19, Chuo-ku, Tokyo, Japan 104.

3452. Echols, John M.; Shadily, Hassan. 1989. An Indonesian-English dictionary. Third ed. Ithaca, New York, and London: Cornell University Press. xix + 618 p. 24 cm. [Ind; Eng]

• **Summary:** Soy-related words include: (1) bijan (sesame; also wijen or bijen). (2) bungkil kedelai (soybean meal). (3) kacang (pea, bean, peanut), including kacang asin (salted peanuts), kacang atom or kacang ganéfo (peanuts fried in

batter), kacang goréng (peanuts fried crisp), kacang hijau or kacang ijo (mung bean), kacang kedelai (soybean), kacang tanah (peanut). (4) kécap (soy sauce; kecap ayam {chicken prepared with soy sauce}). (5) kecipir (four-sided bean eaten as a vegetable [winged bean; *Psophocarpus tetragonolobus*]). (6) kedelai, kedelé (soybean). (7) oncom (fermented cake made from soybean sediment). (8) ragi (yeast, fermentation agent). (9) tahu (tofu, soybean curd), including tahu goréng (fried tofu), tahu isi (tofu filled with meat), tahu kuning (firm yellow tofu), tahu pong (deep-fried puffy tofu), tahu témpé (tofu and tempeh).

(10) tahu (a by-product of tofu similar to yogurt in consistency). (11) takoa, takoah (see takua). (12) takua (firm spiced tofu). (13) taosi (see tauci [soy nuggets]). (14) tapai, tapé (sweet cake made of slightly fermented rice or tubers). (15) tauci, tauco, taucyo (fermented bean paste [like miso] used as a condiment).

Note: This is the earliest (and only) English-language document seen (Feb. 2009) that uses the word “taucyo” to refer to Indonesian-style miso. “Taoci” probably refers to soy nuggets, not to miso.

(16) taugé (bean sprouts). (17) témpé (fermented soybean cake, tempeh; something trivial and unimportant or low grade in quality; *Dlm jaman penjajahan org Indo témpé pribumi* = “During the colonial times the Eurasians considered the natives to be no better than tempeh”). Address: 1. Ithaca, New York; 2. Jakarta, Indonesia.

3453. Fukushima, Danji. 1989. Historical development of soy sauce and soy nuggets in China (Document part). In: K. Steinkraus, ed. 1989. *Industrialization of Indigenous Fermented Foods*. New York and Basel: Marcel Dekker, Inc. xii + 439 p. See p. 2-8.

• **Summary:** “1. Chiang. In 1979, Kinichiro Sakaguchi proposed a unique hypothesis regarding the origin of soy sauce and miso as a result of historical biochemical investigations, and this hypothesis was later introduced by this author in English (Fukushima, 1985a, 1986b). However, new literature on the origin of soy sauce and miso appeared based on more detailed historical evidence (Pao 1982a, 1982b; 1984a, 1984b). According to these papers, soy sauce was derived from a Chinese food called ‘chiang’ (‘hishio’ in Japanese).

“Chiang is a tasty mash product and does not come in a liquid form. Therefore chiang belongs in the category of ‘miso’ in Japan. The first record on chiang can be found in the book entitled *Chou-li* (*Shurai* in Japanese) by Chou-kung (*Shuko* in Japanese), which was published around 1,000 B.C. in the Chou (*Shu* in Japanese) dynasty (1,222 BC to 249 BC). This book covers the matters on the early years of the Chou dynasty in ancient China (about 3,000 years ago). According to this document, chiang was made by the following procedure. First, yellow aspergilli were grown on millet. (Such mold-grown cereals are called ‘koji’

in Japanese.) Then the millet koji and the meat of fish, flesh, or fowl and salt were mixed with a good liquor in a bottle and kept for 100 days. Soybeans were not used in this chiang. The first literature in which soybeans appeared as a substitute for meat in chiang was the *Ch'i-min Yao-shu* (*Saimin-Yojutsu* in Japanese) by Chia Ssu-hsieh (Ka Shikyo in Japanese), the world's oldest encyclopedia of agriculture, published in 535 AD in China. This indicates that the chiang in which soybeans was used originated sometime between the Chou and Han dynasties, when the cultivation of soybeans prevailed. The meats in the chiang described in *Chou-li* were gradually replaced by soybeans in the course of time and further cereals such as wheat, barley, and rice came to be used instead of millet, resulting in the production of many types of chiang. In the process of making chiang during these periods, soybeans were not used as a raw material in koji; rather they were added to the harvested koji prepared from the other cereals. The soybeans were digested by the enzymes of the koji. This digestion mixture was the final product, which was in the form of a mash. The liquid products which belong to the category of soy sauce did not appear in the literature before the later Han dynasty (about 25-220 A.D.).

"There is a description of the liquid product which was made by separating the liquid portion from the chiang in *Ssu-ming Yueh-ling* (*Shimin-Getsurei* in Japanese), published by Ts'ui Shih (Sai Shoku in Japanese) in the later Han dynasty. This liquid was called chiang ch'ing which means 'clear chiang.' The manufacturing processes of chiang and chiang ch'ing are shown in Figs. 1 and 2. Chiang ch'ing is a prototype of soy sauce but it differs from 'chiang-yu' which means literally shoyu or soy sauce in the Chinese characters. The first appearance of the name of chiang-yu was in *Shan-chia Ch'ing-kung* (*Sanya-Seikyo* in Japanese) by Lin Hung (Rin Ko in Japanese) in the Sung dynasty (960-1127 AD).

"The first record indicating use of all the raw materials to prepare koji for soybean chiang appeared in the *Nung-sung I-shin Ts'o-yao* (*Noso-Ishoku-Satsuyo* in Japanese) by Lu Ming-Shan (Ro Meizen in Japanese), published in the Yuan (Gen in Japanese) dynasty (1271-1368 AD). The flow sheet of this soybean chiang is shown in Fig. 3." (In this process, soybeans are roasted, dehulled, cooked, then mixed with wheat flour and spontaneously molded to form koji. The koji is dried in the shade, winnowed, and pounded, then mixed with spices and salt water to form a mash, which is insulated and aged to make the soybean chiang.) The chiang-yu described in *Pen-ts'ao Kang-mu* (*Honso-Komoku* in Japanese), published in 1590 by Li Shih-chen (Ri Jichin in Japanese) in the Ming (Min in Japanese) dynasty, was also made with koji manufactured by using soybeans and cereals (Fig. 4). (In this process soybeans were cooked in water, mixed with wheat, and spontaneously molded to form koji. Salt water was mixed in with a paddle, then the mash

was insulated and aged. Finally it was filtered to make chiang-yu). The ratio of soybeans to wheat in the koji making was 3:2. This ratio is very close to that used in making regular Japanese shoyu, which is made by using equal amounts of soybeans and wheat, as will be described later. The general manufacturing methods of soy sauce in the Ch'ing (Shin in Japanese) dynasty are recorded in *Ch'ing-yuan Lu* (*Seienroku* in Japanese), written by Li Huanan (Ri Kanan in Japanese). Cooked soybeans and uncooked wheat were the raw materials used in koji making. The resultant koji was mixed with brine. After aging, the soy sauce was collected by pressing a deep bamboo colander into the aged mash and ladling out the liquid which had accumulated.

"The original chiang was a mash-type product made with a koji that had been prepared from wheat, barley, rice, etc., and not from soybeans. Therefore, the soybean constituents were only changed through the in vitro biochemical reaction by the enzymes from the mold grown on the cereals. Accordingly, the degree of change of the soybean constituents was not very great and most of the soybean proteins were partially hydrolyzed into polypeptides through the in vitro enzyme action. The degree of liquefaction was not very large and the flavor was not as strong. In the case of chiang-yu, however, mold is grown on both the soybeans and cereals and, as a result, the soybean constituents are changed largely through the biochemical reaction both in vivo and in vitro by the mold throughout the entire process of manufacturing. Accordingly, much of the soybean constituents can be liquefied. The soybean proteins are hydrolyzed to single amino acids and, therefore, the flavor is sharp and strong in chiang-yu. Thus, it can be concluded that (a) the progenitor of miso is chiang, originated in China about 3,000 years ago; (b) the progenitor of soy sauce is chiang ch'ing, originated in China about 2,000 years ago; (c) chiang ch'ing had developed into chiang-yu in China and the regular type of shoyu called koikuchi in Japan at least 1,000 years ago.

"It is an amazing fact that the Chinese had utilized the enzyme action of mold in food manufacturing as early as 3,000 years ago. They deliberately selected yellow aspergilli from many types of aspergilli because they best facilitated the manufacture of chiang. If the definition of 'biotechnology' is to make the products necessary for the welfare of humans by using life phenomena, it can be said that people in ancient China had already produced foods by biotechnology as early as several thousand years ago. In this sense, it is not an exaggeration to say that soy sauce was a pioneer of the actual application of biotechnology.

"2. Shih. Shih is a fermentation product of soybeans, the form of which is a tasty nugget with or without salt. Shih is classified into five types by the kind of microorganism used in its manufacture. Those are *Aspergillus* type (called shih in the areas of Pei-ching, Hu-nan sheng, and Taiwan; and

called hamanatto in Japan), *Mucor* type (shih in the area of Shan-tung sheng and natto in Japan), *Rhizopus* type (tempeh in Indonesia), *Bacillus* type (shih in the area of Shan-tung sheng and natto in Japan), and *Neurospora* type (oncom in Indonesia). The shih described here is the shih of *Aspergillus* type, which relates to soy sauce.

“The earliest literature in which shih appeared is *Shih-chi* (*Shiki* in Japanese) by Ssu-ma Ch’ien (Shiba Sen in Japanese), which was published in 85 BC. Shih is also described along with chiang in *Shuo-wen Chie-tzu* (*Setsubun-kaiji* in Japanese) by Hsu Shen (Kyoshin in Japanese), the oldest dictionary in China published in 121 AD in the later Han dynasty. The raw material of the shih is soybeans as shown in Fig. 5. (In the process described in the *Shi-ching* by Hsie Feng (which survives only in the *Ch’i-min yao shu*), soybeans are washed, soaked, drained, and steamed. The cooked soybeans are cooled, then spread, furrowed, and piled. The last 3 steps are repeated 3 times a day for 3 days until the beans have become spontaneously molded. The resulting soybean koji is mixed with soybean cooking liquid, barley koji, and salt, put into an earthen pot, sealed, and insulated. It is then dried in the shade, mixed with a mulberry leaf extract, and steamed. The last 3 steps are repeated 3 times, resulting in salted soybean shih. In the second process described in the *Ch’i-min yao-shu*, soybeans are winnowed, cooked, drained, and cooled. They are piled, the temperature is measured, and then they are stirred. The last 3 steps are repeated 3 times until they are spontaneously molded. They are then spread and furrowed to make soybean koji. This is winnowed, washed, drained, dried, moistened, piled, fermented, and dried to give unsalted soybean shih.) Therefore the resultant shih (soybean nugget) contains a high amount of protein. In shih, much of the soybean constituents are present in a liquid state. The soybean proteins are hydrolyzed to single amino acids and, therefore, the flavor is sharp and strong. The flavor constituents of shih can be extracted easily by a salt solution. The original shih was served as nuggets; the brine extract came to be used as a seasoning gradually. In *Chi-min Yao-shu* (535 AD), there is a description of about 70 kinds of cookeries using shih extracts. It should be mentioned that shih and its brine extract developed into today’s tamari shoyu in Japan.” Address: Managing Director, Kikkoman Corp., Chiyoda-ku, Tokyo, Japan.

3454. Fukushima, Danji. 1989. Introduction of soy sauce to Japan (Document part). In: K. Steinkraus, ed. 1989. *Industrialization of Indigenous Fermented Foods*. New York and Basel: Marcel Dekker, Inc. xii + 439 p. See p. 9-10.

• **Summary:** “There is no literature on the exact time chiang and shih (soy nuggets) were introduced into Japan. In 702 AD, however, the Hishiotsukasa, the Bureau for the Regulation of Production, Trade and Taxation of Hishio, was established by the Taiho-Ritsuryo, one of Japan’s

earliest constitutions. This bureau was located at the imperial palace and produced various kinds of hishio (chiang) which was consumed by the imperial household. Among these products, the word ‘misho’ is found with the words ‘chiang’ and ‘shih.’ It should be noted that the word ‘misho,’ which is very close to the present word ‘miso,’ is found as one of the products in the bureau. Misho is also found in *Engishiki*, the enforcement regulation of the statutes, which was completed in 927 AD and became effective in 967 Japan. The first appearance of the present word ‘miso,’ was in *Nihon-Sandai-Jitsuroku*, a Japanese dictionary published in 1597 during the Muromachi period. In the Edo period (1603-1867), several pieces of literature describing miso and shoyu were written, such as *Wakan Sansai Zue* (Narushima, 1712), *Honcho Shokkan* (Hitomi, 1695), *Mankin Sangyotai* (Miake, 1732), *Yoshu Fushi* (Kurokawa, 1682), and the like. The manufacturing processes described in these works are close to the present methods for producing miso and koikuchi-shoyu, thus it is presumed that the basic manufacturing processes of today’s Japanese soy sauce had been formed by the early 17th century.

“In the second half of the 17th century, large-scale, industrial production of soy sauce began for consumption in large cities such as Edo (now Tokyo). Surprisingly enough, there are written records that soy sauce had been exported to India, southeast Asia, and Europe as early as the middle of the Edo period [the Edo Period was from 1600 to 1868] (Noda Shoyu Co. 1953). According to documents of the Dutch East India Company stored in the Archives in the Hague, Holland, soy sauce was exported [by Dutch merchants] from Nagasaki in the Kyushu district of Japan to several parts of India: Coromandel in 1668 and 1716, Ceylon in 1670 and 1699, Surat in 1717, Bengal in 1699, and Nagappattinam [Nagapattinam] in 1699. Carl Thunberg, a ship’s doctor for the Dutch East India Company who stayed in Japan for a year and a half from 1775 to 1776, published a book of travels in 1796 (Thunberg, 1796). According to his book, a large quantity of soy sauce was shipped to Batavia (the former name for Djakarta [and Dutch capital of the East Indies]), India, and European countries.” Address: Managing Director, Kikkoman Corp., Chiyoda-ku, Tokyo, Japan.

3455. Hesseltine, C.W. 1989. Fermented products. In: Ruth H. Matthews, ed. 1989. *Legumes: Chemistry, Technology, and Human Nutrition*. New York and Basel: Marcel Dekker, Inc. x + 389 p. See p. 161-85. [29 ref]

• **Summary:** Contents: Introduction: Fermented legume products. A table lists about 85 products with the vernacular name, legume from which it is made, country, and microorganism(s) used. Products made from soybeans include: Miso (bean paste), Shoyu (soy sauce), Sufu (Chinese cheese), Ontjom (Oncom), Hamanatto, Idli (with

and without soy), Natto, and Tempeh. Address: Human Nutrition Information Service, USDA, Hyattsville, Maryland (and NRRC, Peoria, Illinois).

3456. Hoshijo, Kathy. 1989. *Kathy cooks: Vegetarian, low cholesterol*. New York, NY: Simon & Schuster (A Fireside Book). 728 p. Illust. Index. 24 cm.

• **Summary:** Previously published as *The Art of Dieting Without Dieting* (1986). A whopper of a cookbook, with 350 easy-to-prepare vegetarian recipes from the star of the PBS television series “Kathy’s Kitchen”—which airs in 180 cities nationwide. Each recipe contains a detailed (full-page!) nutritional analysis.

This book contains a wealth recipes using tofu, tempeh, soymilk, miso, and whole soybeans.

3457. Leneman, Leah. 1989. *The single vegan: Simple, convenient and appetizing meals for one*. Wellingborough, Northamptonshire, England: Thorsons Publishing Group. 127 p. Illust. Index. 21 cm.

• **Summary:** Vegan recipes for one, grouped seasonally, and within each season by day of the week, with weekly shopping lists and staples to be kept on hand. Soy-related recipes include: Smoked tofu à la king (with smoked tofu and soymilk, p. 21). Strawberry cheese (with plain soy yogurt, p. 29). Spaghetti stir-fry (with tofu, p. 34). Mediterranean-style potato salad with yogurt dressing (with soy yogurt, p. 37). Savoury mushroom bake (with tofu, soy yogurt, and miso, p. 38). Tofu and green pepper savoury (p. 44). Bean and potato salad (with soy yogurt and vegan mayonnaise, p. 47). Courgette (zucchini) and tomato flan (with tofu, p. 48). Tofu and vegetable stew (p. 51). Tofu pot pie (p. 53). Scalloped tofu au gratin (incl. soymilk, p. 58). Nasi goreng (with tofu, p. 63). Chilled cream of tomato soup (with soy yogurt, p. 65). Cream of cauliflower soup (with soymilk, p. 69). Scrambled tofu and leek (p. 79). Irish stew with frozen tofu (p. 84). Tempeh and sweetcorn roast with tahini/mushroom sauce (p. 92-93). Tempeh and mushroom stew on a mashed potato base (p. 98). Sweet tofu ‘omelette’ (incl. soymilk, p. 105). Curried tofu (p. 107). Mushroom miso gravy (p. 115; shows a pack of Sunwheel brown-rice miso). Tropical blancmange (with soymilk, p. 116).

Note: Soymilk and soy sauce are used in small amounts in many other recipes. This book is distributed in the USA by Sterling Publishing Co. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

3458. Leneman, Leah. 1989. *Slimming the vegetarian way*. Revised and reset ed. Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. 144 p. Index. 20 cm. 1st ed. 1980.

• **Summary:** The menus in this natural-foods, vegan cookbook are designed for 1 person and the daily calories

intake is kept at about 1,000 calories. The book takes a positive attitude toward dieting by focusing on those foods you can eat, rather than those you should avoid. Each “menu” consists of breakfast, lunch, and dinner for 1 day. For each meal there is one column for Imperial (Metric) measurements, one for American measurements, and one for calories, with a calories for each meal and for the day. There are menus for each of the four seasons plus chapters on crash diets, desserts, and a vegetarian wholefood calorie chart.

The preface to the new edition notes: “The greatest change which has occurred since the first edition of this book appeared has been the phenomenal proliferation of soya foods (soyfoods in American parlance). Tofu is arguably the best friend a slimmer ever had, for no other food so low in calories and high in protein is as versatile as tofu. Tempeh is another fine soya food for slimmers, though as it is not as readily available as tofu, I have confined its use to only one recipe. Since soya milk and yogurt are now so easy to obtain, I have given them as alternatives to the dairy versions, so that vegans, and others trying to cut down on dairy produce, will be able to use the book in the same way as lacto-vegetarians.”

Soy-related recipes include: Pineapple tofu salad (p. 36). Tofu celery loaf (p. 39). Tofu-stuffed aubergine (eggplant, p. 66). Scrambled egg or tofu, sausalata and tomato (p. 89, 118). Tofu slices on toast with creamy gravy (p. 98). Miso soup with tofu (p. 102). Spaghetti with tempeh and mushroom sauce (p. 127). Vegetable charlotte with smoked tofu (p. 129). Soya milk and soya yogurt are always listed as alternatives to skim milk or yogurt from cows. TVP is used as an ingredient in many recipes, and “Tamari (soy sauce)” is widely used as a seasoning. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

3459. Reddy, N.R.; Salunkhe, D.K. 1989. Fermentation. In: D.K. Salunkhe and S.S. Kadam, eds. 1989. *CRC Handbook of World Food Legumes: Nutritional Chemistry, Processing Technology, and Utilization*. Vol. III. Boca Raton, Florida: CRC Press, Inc. 323 p. See p. 177-217. [233* ref]

• **Summary:** Contents: Introduction. Soy sauce: Types of soy sauce, preparation of *Shoyu* composition, safety. Miso: Preparation, composition, nutritional quality, miso-like products. Sufu: Preparation, microorganisms, biochemical changes and composition, toxicology, method of preparation, chemical composition, physical properties, nutritional quality. Tempeh: Preparation, nutrient composition, nutritional quality, antinutritional and/or toxic factors, *tempeh* and *tempeh*-like foods from other legumes. Address: 1. Community Research Service, Atwood Research Facilities, Kentucky State Univ., Frankfort, Kentucky; 2. Dep. of Nutrition and Food Sciences, Utah State Univ., Logan, Utah.

3460. *SoyaScan Notes*. 1989. Terms related to soyfoods, soybeans, and the soybean industry: Library of Congress subject headings and call numbers (Overview). Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Two different types of call numbers are used by American libraries for cataloging their books. Most larger libraries use the Library of Congress call numbers (LC numbers, which start with two letters) and many smaller libraries use the Dewey Decimal System (Dewey numbers, which contain only numbers).

The following are from the Library of Congress Subject Headings (12th ed. 1989) and the Library of Congress Classification Schedules. The first edition of Class S (Agriculture), for example, was published in 1911, and the 4th edition in 1982. BT = Broader terms. NT = Narrower terms. UF = Use for. May Subd Geog = May subdivide geographically, e.g., Soy sauce industry-Japan.

Class H is Social sciences and economics. Class Q is science. Class S is agriculture (SB is plant culture. SB205 is field crops, legumes). Class T is technology (TX includes nutrition). Class Z is bibliography and library science.

 The following soy-related terms have a subject heading but no LC call number: Miso industry, Natto industry, Soy

sauce, Soybean flour, Soybean glue, Soybean meal, Soybean milk, Soybean products.

3461. Steinkraus, Keith H. ed. 1989. *Industrialization of indigenous fermented foods*. New York, NY: Marcel Dekker. xii + 439 p. 24 cm.

• **Summary:** This book contains the following chapters on soyfoods: 1. Industrialization of fermented soy sauce production centering around Japanese shoyu, by Danji Fukushima. 2. Industrialization of Japanese miso fermentation, by Hideo Ebine. It also contains chapters on the industrialization of the production of sake, tapai, African beers, magehu, ogi, and gari. The final chapter is titled “Industrialization of indigenous fermented food processes: Biotechnological aspects.”

The book is dedicated “To the memory of Prof. Andre G. van Veen, a pioneer in the study of indigenous fermented foods.” Address: Inst. of Food Science, Cornell Univ., Geneva, New York.

3462. **Product Name:** [Miso].

Manufacturer’s Name: CEIO: Centro Educacional Para Integracao Organica.

Manufacturer’s Address: P.O. Box 39, Braganca Paulista, Sao Paulo, Brazil.

Date of Introduction: 1989?

New Product—Documentation: Talk with (call from) a relative of the owner, Ronald Igel. 1990. Jan. 22.

3463. **Product Name:** [Lima Heiwa Natto Miso].

Foreign Name: Lima Heiwa Natto Miso.

Manufacturer’s Name: Lima Foods.

Manufacturer’s Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

Date of Introduction: 1989?

Wt/Vol., Packaging, Price: 500 gm poly bag with gas-release valve.

How Stored: Refrigerated.

New Product—Documentation: Lima catalogue, price list, and color product brochure. 1989. A photo shows the product label and bag. The Label is black and blue on red.

3464. **Product Name:** [Ratatouille Miso (Cooked Vegetables)].

Foreign Name: Ratatouille Miso.

Manufacturer’s Name: Lima Foods.

Manufacturer’s Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

Date of Introduction: 1989?

Wt/Vol., Packaging, Price: 460 gm.

How Stored: Shelf stable; refrigerate after opening.

New Product—Documentation: Lima color brochure. 1989. Oils and cooked vegetables.

Note: *Webster's Dictionary* defines ratatouille (a French term first used in about 1877) as: "a seasoned stew made of eggplant, tomatoes, green peppers, squash, and sometimes meat."

3465. Product Name: [Lima Organic Miso (1-Month, Barley, or Rice)].

Foreign Name: Lima Bio-Miso 1 Mois, Bio Miso Orge, Bio Miso Riz.

Manufacturer's Name: Lima-Andiran.

Manufacturer's Address: Moulin D'Andiran, 47170 Mezin, France.

Date of Introduction: 1989?

Wt/Vol., Packaging, Price: 500 gm poly bag with gas-release valve.

How Stored: Refrigerated.

New Product-Documentation: Lima catalogue, price list, and color product brochure. 1989. A photo shows the product label and bag. The Label is Brown, orange, and white on yellow. "Lima's Bio-Miso is the first and only European miso that is made from raw materials that are organically grown." It is produced at Lima-Andiran in France.

3466. Product Name: [Lima Hatcho Miso, or Rice Miso].

Foreign Name: Lima Hatcho Miso, or Rice Miso.

Manufacturer's Name: Lima-Andiran.

Manufacturer's Address: Moulin D'Andiran, 47170 Mezin, France.

Date of Introduction: 1989?

Wt/Vol., Packaging, Price: 500 gm poly bag.

How Stored: Shelf stable.

New Product-Documentation: Lima catalogue, price list, and color product brochure. 1989. A photo shows the product label and bag. The Labels are brown, orange, or red on beige. An illustration of the predominant grain is shown in the background.

3467. Product Name: [Tekka Miso].

Foreign Name: Tekka.

Manufacturer's Name: Lima-Andiran.

Manufacturer's Address: Moulin D'Andiran, 47170 Mezin, France.

Date of Introduction: 1989?

Wt/Vol., Packaging, Price: 125 gm.

How Stored: Shelf stable.

New Product-Documentation: Lima catalogue and price list. 1989.

3468. Product Name: [Lima Organic Miso (Rice Miso)].

Foreign Name: Lima Bio-Miso.

Manufacturer's Name: Lima-France.

Manufacturer's Address: Moulin D'Andiran, 47170 Mezin, France.

Date of Introduction: 1989?

Ingredients: Whole soya beans*, rice*, water, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 500 gm poly bag with valve to release interior gas from fermentation. Retails for DM 11.95.

How Stored: Refrigerated.

New Product-Documentation: Label sent by Anthony Marrese. 1989. Nov. Front and back. Each 3 by 4.5 inches. Orange, brown, and white on yellowish beige. In Dutch, French, German, and English. Control: Unitrab and Nature et Progres logos. "The first European miso. Paste from whole soya beans and rice, both organically grown; fermentation: 18 months; made in the Southwest of France, neither pasteurized nor sterilized. Use: in soups, stews, dips, vegetable spreads, and sauces for vegetables or fish. Keep in a cool place: 2-4°C. Best before end of 1990."

3469. Product Name: Free (Dairy-Free Tofu-Based Cheese Alternative) [Jalapeno Jack, Garlic Jack, Cheddar, or Spice].

Manufacturer's Name: Sharon's Finest. Div. of Rose International (Product Developer-Marketer).

Manufacturer's Address: P.O. Box 2687, Petaluma, CA 94953-2687. Phone: 707-778-7721.

Date of Introduction: 1989?

Ingredients: Organic tofu, soy oil, tapioca, irish moss, nutritional yeast, agar-agar, guar gum, sea salt, miso, carob bean gum, kuzu, aloe vera, lecithin, citric acid.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

Nutrition: Per 1 oz.: Calories 90, protein 2 gm, carbohydrate 6 gm, fat 6 gm, sodium 110 mg, calcium 95 mg.

New Product-Documentation: Letter from Richard Rose. 1987. Sept. 17. This product should be on the market by Oct. 1987. A U.S. patent is pending. Spot in Food Processing. 1987. Oct. Contains added vitamin B-12. For additional information contact Sharon's Finest Div. of Rose International, Petaluma, California. This product is FREE of casein. It "tastes, looks, and melts like real cheese." Spot in Food Distributors Magazine. 1987. Oct.

Medoff. 1987. Whole Life. Sept/Oct. p. 79, 82. "New Soy Cheese Best Yet to Hit Market." Sharon's Finest brand FREE, a new non-dairy cheese made from Rose International, contains no casein. "They've managed to create a soy cheese that is about as close to real dairy cheese as any we've seen to date... Indeed its similarity to real cheese is startling." A U.S. patent is pending on the product's formulation and process. The product's cheese-like qualities result from the interaction of ingredients, rather than from any one in particular. It contains 70% organic tofu, far more than any other soy cheese on the market. It will be marketed as tofu that is like cheese, rather

than a soy cheese per se. Article includes Label. "The first Tofu that melts and tastes like real Cheese!"

Spot in Health Foods Business. 1987. Dec. "Rose International has introduced a tofu cheese and nog." The cheese, named Free, "tastes, looks, and melts like real cheese." Contact "Rose International, P.O. Box 2687, Petaluma, CA 94953-2687."

Talk with Richard Rose. 1988 Feb. 15, and 1990 March 1. This product has not yet been put on the market. It is hard to find a company to make an unconventional soy cheese. But he is working and it will eventually be launched.

Talk with Sharon Rose of Sharon's Finest. 1992. Feb. 10. This product is still in limbo, on the back burner. They have developed a good formula, but Richard is still working on minor improvements.

Letter (fax) from Richard Rose. 1994. April 21. This product was never sold commercially, and Richard was never wholly satisfied with it. "Plus Kraft beat us to the name, legally." It was the precursor to VeganRella. "Although far better than Soyimage [the only casein-free soy cheese sold at the time], we felt it should, could, and would be even better with more work."

3470. Belleme, John. 1990. Starting a new miso company in North Carolina (Interview). *SoyaScan Notes*. Jan. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John is in the process of starting a new miso manufacturing company named Smoky Mountain Miso Shop. It will be owned by a company named Traditional Foods Inc., which he and a partner started in about June 1989. Over the shop will be a non-profit organization named Institute of Traditional Foods, where people can come to live and study food preparation (tofu, tempeh, miso, seitan, tamari) both on a home and commercial scale, for short or long seminars. He will break ground for the plant in about 3 weeks. It will be attached to his home, 2,000 square feet, Japanese style and very compact, with a capacity of about 50,000 lb/year of miso. He hopes to find 2 distributors, one on each coast: Maybe Blake Rankin of Granum on the West Coast and Macrobiotic Wholesale Co. on the East Coast. Great Eastern Sun will be a competitor. His non-compete agreements with them have expired.

John's wife, Jan Belleme, (who works for Mitoku) is doing a story for *East West* about amazake. The new editor of *Solstice*, John Mann, has decided to focus on macrobiotics, and away from the environmental focus. He would like a story on amazake (\$200). *Solstice* reaches 60,000 people. John spent the summer at an organic winery.

Note: As of June 1993, this company was never started. Instead, John started a company making traditional seitan. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

3471. Orbuch, Paul. 1990. Where Wildwood prefers to sell their tofu in a store (Interview). *SoyaScan Notes*. Jan. 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Wildwood first had to deal with this question in 1981 when they sold their tofu & miso sandwiches on the counter of natural food stores. Wildwood felt there was no danger of tofu spoilage because of the miso. They battled hard against the state health department. They tested tofu with and without miso around it at the state's labs. The results showed that tofu was clearly a potentially hazardous food. From then on Wildwood insisted that all of their tofu and tofu sandwiches be refrigerated below 45°F. Paul's experience is that the average temperature in the produce case wet rack is 50°F.

About 3 years ago Wildwood was at a crossroads. They had three vendor numbers: One of produce, one for grocery/dairy, and one for deli. The buyer explained that this was a mishmash, and asked Paul to choose one. He chose grocery/dairy. Today, in many supermarkets, Wildwood has 18-24 linear feet of space in the dairy case of high-volume supermarkets. In Lafayette, Walnut Creek, and Orinda supermarkets they have only 2 feet. Paul usually goes in and says, "I won't take less than 8 feet." The goal is one facing per product. Paul is aware of the ongoing turf wars between supermarket departments. But note that any product that comes in under produce will have a produce label on it. Wildwood now has a few of its own refrigerated stand-up display cases that contain only Wildwood products, similar to those pioneered by Quong Hop & Co. The cases are located between the produce and dairy departments in the store. The name of the case is "Wildwood Natural Foods" with the company logo. It is not limited to soyfoods, but to natural vegetarian foods—whatever they distribute. But a soy yogurt would probably go next to dairy yogurts in the dairy case. Woody Yeh is still waiting for his cups. Paul thinks Woody's soy yogurt product is excellent. Azumaya sells its Stir Fruity in the produce case because the company's historical relationship is with the produce buyer.

Wildwood is still wrestling with the use of calcium in tofu, and may start to use it, alone or with nigari. Address: Wildwood Natural Foods, 135 Bolinas Rd., Fairfax, California 94930. Phone: 415-459-3919.

3472. Hicks, Russel. 1990. History of Sweet Earth Natural Foods (Interview). *SoyaScan Notes*. Jan. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company was founded by Russel Hicks and Valerie Dallas. They started making and selling foods in 1978 in Pacific Grove. Their first product was named "Vegeburger by Sweet Earth," a soybean based burger introduced in 1978. In the early days, they also had a bakery named Sweet Earth Bakery (P.O. Box 22543 in Carmel). They did all kinds of things. After a year Russel and his wife left for 3 years, then they returned. The company's

second product, launched in about 1983, was called “Tofu Rice Burger by Sweet Earth.” Both products had round labels, so the product name was arched across the top and “Sweet Earth” was arched across the bottom.

In about 1983-84 Sweet Earth started to get serious about selling foods. In 1985 they introduced their fresh “Deli Line,” consisting of perishable, healthy fast and natural foods—especially sandwiches, salads, and soups. (The burgers were vacuum packed with a 3-month shelf life.) Included in this line were various foods in which soy was a major ingredient: Lunch Rush Burrito (with tofu and rice, 1985), Tofummus Sandwich (1985; tofu + hummus), Miso-Vegetable-Barley Soup (1985), Oriental Rice Burrito (1987), Oriental Rice & Tofu Salad (made sporadically, 1987) TMT Spread (with tofu, miso, and tahini, 1989; no longer on the market due to short shelf life). and Tofetti Sandwich (1990). They distribute these perishable foods themselves in the Monterey area, then they have independent distributors that carry their deli line to Santa Cruz, the Bay Area, etc. Veggie Paté Sandwich (with Miso; 1990). They also use a lot of soy sauce and tamari as a seasoning. They buy their tofu from Jack in the Beanstalk in Salinas. They are Wildwood’s biggest competitor in the Monterey area. “Tofu is definitely the food of the future. It’s probably going to take a couple of more years. We’ve been watching this slow change. Ten years from now tofu will be everywhere and in everything. All kinds of foods will be made from it. We raise our children on tofu and they eat it right out of the carton. To them its second nature. I really like the whole soy end of life. It really feels good. I like developing foods with tofu. The biggest problem with tofu is trying to get a long shelf life in products that use it.” Address: 597 Lighthouse Ave., Pacific Grove, California 93950. Phone: 408-375-8673.

3473. Shimoyamada, Makoto; Kudo, S.; Okubo, K.; Yamauchi, F.; Harada, K. 1990. Distribution of saponin constituents in some varieties of soybean plant. *Agricultural and Biological Chemistry* 54(1):77-81. Jan. [18 ref. Eng]
 • **Summary:** Soybean seeds contain many types of glycosides, such as saponins (called soyasaponins) and isoflavonoids. Saponins are bioactive substances with bitter taste. Two types occur only in the seed hypocotyls of soybeans. Address: 1,3-4. Dep. of Food Chemistry, Faculty of Agriculture, Tohoku Univ., 1-1 Tsutsumidori-Amamiyamachi, Aoba-ku, Sendai 981; 2. Kanesa Miso Co., Ltd., 202 Tamagawa Hamada Aomori 030; 5. National Inst. of Agrobiological Resources, 2-1-2 Kannondai, Tsukuba 305. All: Japan.

3474. Wang, Guangjian; Kuan, S.S.; Francis, O.J.; Ware, G.M.; Carman, A.S. 1990. A simplified HPLC method for the determination of phytoestrogens in soybean and its

processed products. *J. of Agricultural and Food Chemistry* 38(1):185-90. Jan. [14 ref]

• **Summary:** Discusses the phytoestrogen content of soybeans, defatted soy meal, hard tofu, soft tofu, dry spiced tofu, soy milk skin (p. 189) / soy milk film (p. 188) [yuba], soy milk, soy sauce, hot soy paste, sweet soy paste [miso?], fermented tofu, soy sprouts (homemade), soy sprouts (grocery), daidzein, genistein, formononetin, coumestrol. Address: Natural Toxins Research Center, Food and Drug Administration, 4298 Elysian Fields Ave., New Orleans, Louisiana 70122.

3475. Klaper, Michael. 1990. Personal history, present work, and views (Interview). *VegeScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Born on 19 July 1947, Dr. Klaper grew up on a dairy farm in Wisconsin. He graduated from the University of Illinois College of Medicine in 1972, was married, then did a 1 year internship followed by 5 years of general practice in British Columbia, Canada. After 3 years of residency retraining in Vancouver he worked for 3 years on an Indian Reservation in Humboldt County, California. Then did 1 year of anaesthesia residency at the Univ. of British Columbia Cardiovascular Service. He worked with surgeons who would ream cholesterol out of patients’ arteries. It was basically plumbing problems. How long can you continue to pour bacon grease down the kitchen sink until it clogs the pipes? One day in 1981 an incident changed his life. A Mr. Phillips came in for open heart surgery. The serum in a blood sample Dr. Klaper drew was cloudy like glue—the man had just eaten a hamburger and a milk shake. During the operation, the surgeon pulled long tubes of cholesterol out of the man’s arteries, then sewed him up. Michael realized that he was eating the same diet as Mr. Phillips. After the operation the overweight surgeon and staff went to the cafeteria and had that same diet. While Mr. Phillips was in the hospital, no one talked to him about changing his diet. They just asked him to come back for a checkup. Michael felt like he was in a Fellini movie. He decided that instead of putting people to sleep, it was time for him to start waking them up. So in June 1981 he resigned his lucrative position as an anesthesiologist, bought a vegan cookbook (from Gentle World) and followed a vegan diet. His blood pressure fell and he lost a 15-pound inner tube of fat around his waist that he had worn for years. He felt much better. In Oct. 1981, he moved to Gentle World in Florida, opened a clinic in nearby Orlando, and practiced “nutritional medicine” for the next 6 years. He was married a second time. At the clinic he especially liked to see fat patients. A change to a vegan diet worked miracles. Now they were putting “the right fuel in the tank.” But he also noticed that in many arthritics, the inflammations in their joints got better, and that the asthma in many asthmatics decreased or disappeared. In the late

1980s he moved to Felton near Santa Cruz, California, and worked with Earthsave Foundation and John Robbins. In early 1990 he moved to Los Angeles to continue this work. He also wrote several books on vegan nutrition.

Today his main work is lecturing about diet and the environment, how America's meat-centered diet is destroying both the earth's ecosystems and our bodies. He advocates changing to a vegan diet and wants people to understand "the true cost of a meat-centered diet." Most of his income now comes from speaking honoraria and sales of his book, none from medicine. He is living with friends in Los Angeles. His favorite periodicals on diet are: McDougall Newsletter, Vegetarian Times, Vegedine, and The Vegan. On ecology: E, and Buzzworm.

Concerning his personal diet: he gets about 600 mg/day of calcium which he thinks is sufficient because his protein intake is also low. For breakfast he has sliced fruit and raisins with apple or orange juice poured over the top. Whole wheat bread with almond butter (and sometimes a fruit puree). Sometimes a scrambled tofu omelet. For lunch: Green salad with yellow or red veggies and tahini dressing (with water and nutritional yeast), vegetable soup, and a sandwich with nut butter or tofu spread (with tahini and shoyu) and/or sprouts. For dinner: Potato or pasta or cooked whole grains (like brown rice), yellow steamed veggies, miso broth often with diced tofu. For snacks he likes almonds and/or raisins. His favorite sweet is Rice Dream [frozen dessert] or fruit. He admires the work of Dr. John McDougall but strongly disagrees with the way he strictly applies the concept of "percentage of calories from fat" in foods, using it to criticize foods such as tofu which actually have very little fat per typical serving.

As of Feb. 1990 Gentle World, a community of 20 people, is selling their land in Florida and moving to Maui. Contact them at Gentle World, P.O. Box U, Paia, Maui, Hawaii 96779. Phone: 808-579-9144. Mr. Waldbaum (Light) is a distant cousin of the Waldbaum family of supermarket fame. They have opened a restaurant named "The Vegan" on Maui and are using lots of soyfoods.

Update: In April 1992 Dr. Klaper announced the foundation of a newly accredited program called the Institute for the Advancement of Nutrition Education and Research, which aims to further physicians' knowledge about nutrition and health. He made the announcement at Natural Products Expo West, during his seminar called Soyfoods and Vegetarianism. As of Jan. 1993 the Institute has conducted two 4-day seminars, mostly for physicians who received Continuing Medical Education (CME) credits. Address: 8843 Pennfield Ave., Northridge, California 91324. Phone: 818-341-0652.

3476. *Yomiuri Shinbun (Yomiuri Daily News, Tokyo, English ed.)*. 1990. Zambian learns of tricks of tofu trade. Feb. 19. [Eng]

• **Summary:** A Zambian man, Stanislas Chisembe, a 38-year-old veterinarian is studying tofu production at a tofu shop owned by Yasuo Tominari in Matsumoto city, Nagano prefecture. He wants to teach the process to his countrymen. In Zambia, where farmers have recently begun to cultivate soybeans, most are exported as cooking oil and feed. He thinks tofu can be mixed with traditional Zambian food, based on cassava and corn, to help relieve protein deficiencies and infant mortality. Chisembe first learned of tofu when he visited Japan 2 years ago. This is the second in a series of articles on an international cultural exchange program called "30 Days in Japan."

"Now he has returned as one of 15 foreigners on a 30-day program in which participants pursue individual projects in Japan. He plans to use his new knowledge about the protein-rich soybean to alleviate malnutrition in Zambia.

"When he returns home, Chisembe will rely on television and other methods to teach tofu-making. The Japan International Cooperation Agency, based in Tokyo, has promised to help him encourage the continued cultivation of soybeans in Zambia...

"At an agricultural center in Toyoshina-machi, Nagano-ken, housewives helped him perfect his technique for making tofu and miso by hand." Address: Tokyo, Japan.

3477. Achter-Theiss, Elke. 1990. Speise statt Futter [Food instead fodder]. *Oeko-Test Magazin (Frankfurt, West Germany)*. Feb. p. 57-59. [Ger]

• **Summary:** Discusses whole dry soybeans, soybean meal, soy sauce, soymilk, tofu and silken tofu, tempeh, and miso.

3478. **Product Name:** Red Miso (1 Year), Mellow Barley Miso, Mellow Rice Miso.

Manufacturer's Name: Great Lakes Grainfoods.

Manufacturer's Address: 225 Parsons St., Kalamazoo, MI 49007. Phone: 616-382-0830.

Date of Introduction: 1990. February.

How Stored: Refrigerated.

New Product-Documentation: Talk with Crick Haltom and Colby Wingate. 1988. April. They have been in business for 2 years making seitan and mochi. They plan to make miso commercially.

Talk with Crick Haltom. 1991 Nov. 23. He started putting up 1-year red miso in the fall of 1989, and soon thereafter started making shorter-term misos, mellow barley and mellow rice, to get some income. The latter became available for sale in early 1990. He made the miso on a fairly small scale in 50-gallon food-grade barrels. He stopped production in March 1991.

3479. Hesseltine, C.W. 1990. Margaret B. Church, 1889-1976. *Mycologia* 82(1):144-47. Jan/Feb. [20 ref]

• **Summary:** "Dr. Margaret Brooks Church was a distinguished mycologist and a charter member of the

Mycological Society who has been neglected in the history of mycology. She made several noteworthy contributions to systematic and applied mycology. She, along with Dr. Charles Thom, wrote the first manual on the genus *Aspergillus*. The first authoritative treatment of oriental fermented foods in the West was written by her. It remains an accurate account of these fermentation processes. Dr. Church also conducted laboratory experiments on soy fermentations and collaborated with Japanese workers, especially Professor K. Oshima; Hokkaido Imperial University, Sapporo, Japan...

“Dr. Church was born in Providence, Rhode Island, on March 13, 1899. She received an A.B. in 1912, an A.M. in 1914, and a Ph.D. in 1918, all from Brown University.

“One of her most important contributions was the USDA Department Bulletin 1152 entitled, ‘Soy and Related Fermentations,’ published in 1923. At that time there was interest in establishing soybean production in the United States because soybeans were being imported into the U.S. from the Orient. This publication had many photographs of the industrial processes of making koji and soy sauce in Japan. Research in soy sauce production began in 1918 and continued for several years. Soy sauce, miso, molded [fermented] tofu, and natto were also described...

“Dr. Church’s research dealt extensively with koji, and it is surprising that she knew even then that tane koji (koji inoculum) consisted of several selected mold strains of *Aspergillus oryzae*. The fact that yellow-green *Aspergillus* strains were employed in these fermentations undoubtedly led both Thom and Church to publish the taxonomic relationships of this group of molds in 1921. Her research on koji was a likely catalyst for her study of industrial enzymes...

“In 1938-1939, Dr. Church served as an indexer and abstractor for Biological Abstracts. Upon her retirement, presumably in 1939, she moved to Lyndon, Vermont.” A large photo shows Dr. Church. Address: 5407 Isabell, Peoria, Illinois 61614.

3480. Nomura, Abraham; Grove, J.S.; Stemmermann, G.N.; Severson, R.K. 1990. A prospective study of stomach cancer and its relation to diet, cigarettes, and alcohol consumption. *Cancer Research* 50(3):627-31. Feb. [45 ref]

• **Summary:** In this cohort study, the authors did not find a significant association between consumption of miso soup or tofu and gastric cancer risk among 7,990 American men of Japanese ancestry in Hawaii, although a trend toward a protective effect of tofu was present. Address: Japan-Hawaii Cancer Study, Kuakini Medical Center, Honolulu, Hawaii 96817.

3481. Soejono, Irlan; Kagatsume, Masaru. 1990. Shifts and development in trade of various food crops in East Asia,

1960-1984. *CGPRT Working Paper* No. 5. xviii + 168 p. Feb. 28 cm.

• **Summary:** For each country discussed, this book gives information on: Production and supply of coarse grains, pulses, and root and tuber crops. Consumption and demand. Trade and trade elasticities. Forecast and policy implications: Prediction on import demand, indication of policy implications. Countries: Japan (p. 1-28). People’s Republic of China (p. 29-42). Republic of Korea (p. 43-62). Taiwan (p. 63-79). The Territory of Hong Kong (p. 81-92). Appendixes (p. 95-165). References (p. 167-68).

Summary: As people in the East Asia subregion become more affluent and westernized, they consume less food grains directly and more livestock products.

Japan: Japanese rice production peaked in 1963 at 13.42 million tons, but surpluses have continued to grow. The government has tried various schemes to induce farmers to switch from rice other crops, including soybeans. A graph (p. 6) shows that soybean production in Japan dropped from 418,000 tonnes in 1960 to 100,000 tonnes in 1976. Because of the Rice Farming Diversification Policy, soybean production since 1976 has increased, rising to 238,000 tonnes in 1984. The graph also shows harvested area and yield during this period. A graph (p. 13) shows the total demand for soybeans in Japan and its components, 1960-1984. The total demand has increased steadily from 1.517 million tonnes in 1960 to 4.814 million tonnes in 1984. About 80% of this demand (3.952 million tonnes in 1984) was for soybeans to be processed. About 90% of these (3.765 million tons in 1984) were crushed into oil and meal. Small and relatively static amounts were processed to make miso (182,000 tonnes) and soy sauce (5,000 tonnes) in 1984. Address: 1. Senior Agricultural Economist, CGPRT Centre, Jl. Merdeka 145, Bogor 16111, Indonesia; 2. National Research Inst. of Agricultural Economics and the Ministry of Agriculture, Forestry and Fisheries of Japan.

3482. Kempff, Klaus. 1990. Brief history of Life Food GmbH–Taifun Tofurei (Interview). *SoyaScan Notes*. March 14. Conducted by Anthony Marrese in Germany.

• **Summary:** Klaus, known as Dhanya, lived in Miami, Florida, for 5 years and has an American wife, although they are separated. His interest in soyfoods began in America. After returning to Germany, in 1985, Klaus bought a little sprout business in a basement/cellar at Wallstrasse 3 in Freiburg. When he bought it, it had no name and was run by a commune of Bhagwan Rajneesh devotees as a Sannyas business. Since April 1985 the commune had been making various sprouts (not including soy sprouts). Klaus named the business Life Food, and in July 1985 he and several others started producing tofu. In the spring of 1986, in Germany, he got a copy of *The Book of Tofu* by Shurtleff and Aoyagi which helped his work. He sold the tofu along with various sprouts (mung, alfalfa, radish, chick peas,

wheat) at the market place. Looking for a way to use his okara, Klaus developed a Soy Burger and started selling it in about Nov. 1985.

Then health officials told them to move or be shut down. While struggling with the decision, a new place (a little grocery store at Stuehlinger Strasse 9, D-7800 Freiburg) became available and an order for one hundred 400 gm packs/week of tofu came along, so in Dec. 1985 they decided to go for it and start making tofu on a larger scale. The business grew steadily and in May 1989 they moved into their present location, a larger, new and modern facility that was previously occupied by a catering service. They purchased a new pressure cooker for making the soymilk for their tofu.

Klaus had a friend named Wolfgang Heck (not a follower of Rajneesh), who was an organizer (*Veranstalter*) of international events. The two began to work together in late 1986. In May 1987 Wolfgang started a business named Taifun that cooked Life Food's tofu for the people in the nearby Market Hall for gourmet foods. Taifun had a small walk-up tofu lunch bar at an indoor market. Here they sold their products and tried out new second generation products.

Klaus and Wolfgang decided to merge their two companies. So on 1 Jan. 1990 Life Food GmbH was formed, with 5 shareholders, including Klaus and Wolfgang. Life Food GmbH bought Taifun (the brand name and equipment) and discontinued operation of the Taifun in the market hall. Taifun became the brand name for many of Life Food's products. But some confusion between Life Food and Taifun still remains. For example, today outside the tofu plant there is a big sign that says "Taifun Tofurei" in big letters and under it in small letters the name of the company, Life Food GmbH.

Life Food GmbH now employs 15 people. Present products they make are tofu burgers (3 types, each 90 gm, 1,250/week), tofu (500 kg/week, started Dec. 1985), tempeh (10-20 kg/week, started July 1987), Tofu Terrine Sausage (just starting; they are terrific). They made samples of white miso in March 1989 and are in the process of bringing it into production. Although most of their okara goes to farmers, some is used in their tofu burgers and the Hop Sing Bratlinge (burger dough for restaurants). Life Food is the only tofu producer in Freiburg, where they control the whole market. They have a 60 kg/hour Takai pressure cooker, a Takai hand okara press, and a meat-type grinder for the soybeans. They make tofu in 10-12 kg batches. They also import and sell a little miso and shoyu.

Follow-up interview by William Shurtleff. 1990. May 9. The company presently makes 800-1,000 kg/week of tofu and 10-15 kg/week of tempeh. They are hoping for a big standing order of 500 kg/week from the student dining hall at Freiburg Univ. The dining hall has already been buying tofu and tofu products for a long time. Their best selling product is tofu, followed by Smoked Tofu, then the Tofu

Terrine (made by pressing tofu, mixing it with vegetables, and baking it in a baking pan; it resembles a goose liver pâté).

Update. 1990. May. Bernd Drosihn says Klaus Kempff is no longer in charge; Guenter Klein and Wolfgang Heck have taken over. Address: Founder, owner and manager, Life Food GmbH, Robert-Bunsen Strasse 6, D-7800 Freiburg, West Germany. Phone: (0761) 50 61 55.

3483. Westra, Marianne. 1990. Early history and current work of Vanka-Kawat B.V. (Interview). *SoyaScan Notes*. March 29. Conducted by William Shurtleff of Soyfoods Center. Followed by letters on 1 June and 2 July 1990.

• **Summary:** This company was founded in 1958, and has been in business for 33 years. They began as both an importer and a manufacturer. The original products they made were tofu (tahoe) and soy sauce (both sweet and salty varieties). In 1958 they began to make the following types of soy sauce: Ketchup Kaki Tiga, Ketjap A, Ketjap Benteng Manis, Ketjap Benteng Asin, Yellow Label Soy, and Tiger Brand Soy. They were still making all of these varieties in 1990.

At the time they started the business, they think there were other manufacturers of soy products in the Netherlands, but they don't remember the names of any companies of individuals. There were small, local Chinese companies that made tofu before they did, and at least one company that made soy sauce before they did. Their mailing address and head office address have not changed since 1958. The mailing address is: Dr. Augustijnlaan 40, 2283 CH Rijswijk, Netherlands (near The Hague). In 1984 Vanka-Kawat was thought to be the second largest tofu maker in Europe and in the Netherlands (after Heuschen-Schrouff), producing 10,500 kg/week. They discontinued tofu production in March 1985 after coming to an agreement with Heuschen-Schrouff, because it was more economical for Vanka-Kawat to let Heuschen-Schrouff (which had all the equipment and knowledge) produce the tofu which Vanka-Kawat sold. They now buy their tofu from Heuschen-Schrouff. They also make sambals, and other foods. They have never made taotjo or miso, but they do import it. And they have never made tempe/tempeh, but they do buy it from the "first Dutch Tempeh factory" and then sell it.

They are not related to Linn Oriental Products (also called Soy-Lin or Lin Tahoe) in Westbroek, but they think that company started in about 1970. The company still exists; the owner is Chinese, but they do not know if it is Mr. Lin. Mr. G.L. Van Kasteren is the best man to talk to about soyfoods. He speaks good English.

This company, which is run by Indonesian-Dutch, imports foods from throughout Asia, though they started with Indonesia, and exports to West Germany, Belgium, France, England, and the USA.

Note: Anneke de Weerd says (4/91) that the two most popular types of soy sauce in the Netherlands are ketjap manis and ketjap benteng; ketjap asin is not well known. Address: Head Office: 3e van de Kunstraat 18, 2521 BB Den Haag (The Hague), Netherlands. Phone: 70-388-8804.

3484. *Agri-Book Magazine (Exeter, ONT, Canada)*. 1990. Beans in Canada. 16(5):1-36. March.

• **Summary:** This entire issue is about soybeans in Canada, with emphasis on soybean production. Articles include: Reviewing ridge tillage. Grading by oil and protein content. Soybeans submit to taste test (by Japanese tofu buyers). The Quebec bean comeback. Weed control in soybeans. Takeya Miso Co. Soybean cyst nematode. Soybean breeding.

3485. Diamond, Marilyn. 1990. *The American vegetarian cookbook: From the Fit for Life kitchen*. New York, NY: Warner Books. xx + 422 p. Index. 29 x 22 cm. [74* ref]

• **Summary:** This is a beautifully presented vegan cookbook, with many creative and delicious recipes. Soy-related recipes and entries include: Description of unpasteurized misos (p. 42). Soy products (p. 43; see also How to replace animal products, p. 93). Red miso tea (p. 71).

Chapter 6, titled "How to replace animal products" (p. 93-119), is devoted largely to soyfoods, especially tofu. At one time the Diamonds were not fans of tofu, but now Marilyn hails it as an "extraordinarily healthful" food. She uses it in what she calls "stedda" foods—such as tofu salad "instead of" chicken salad. In this chapter you will find: Nondairy milk and cream: Soymilk (p. 94-95; the author finds nut and seed milks, almond and sesame, to be more flavorful). Enriched almonnaise (non-dairy mayonnaise with almonds and soymilk, p. 98). Instead of meat (p. 100): Exactly what is tofu? Culinary utopia: A dream come true. Buying and storing tofu. Wrapping tofu. Freezing tofu. Marinating tofu. Mixing tofu with other foods. How to proceed. "Stedda" sour cream. "Stedda" sour cream and onion dip. Cottage tofu or "stedda" feta. "Stedda" ricotta. Tofu "cheese" and olive spread. "Stedda" eggs: Rancheros (with tofu, p. 107). Scramblers (with tofu). Scrambled tofu (another way). Scramblers with fresh shiitake mushrooms. "Stedda Matzo brie (with soymilk and tofu). Burgers and other sandwiches (p. 110): "Stedda" egg salad (with tofu). Happy "chicken" burgers (with tofu). "Stedda" fish fillets (with tofu). "Stedda" meat marinades (* = with low-sodium soy sauce): All-purpose marinade I*. "Chicken" flavoring*. "Beefy" marinade*. Sweet and sour*. "Stedda" chicken fillets (with tofu). Mixed grill platter (with tofu). Kebobs! (with tofu). Tofu meunière. Lemon "stedda" chicken (with tofu). "Stedda" Chinese chicken salad.

"Sour cream" garlic dressing (with tofu, p. 128). "Cheesy" dijon dressing (with tofu, p. 130). French green salad with cottage tofu (p. 141). "Stedda" beef salad (with

tofu, p. 155). "Stedda" mozzarella salad (with tofu, p. 159). Tofu salad (p. 169). "I used to love a fried egg" sandwich (with tofu, p. 181). Spicy tofu tacos (p. 186). Seasonings for soups (miso, p. 189). Basic cream soup (with light miso, p. 191). Miso soup with ginger and green vegetables (p. 193). Easy miso soup with vegetables and tofu (p. 194). Asparagus with tofu (p. 222-23). Vegetable lasagna with tofu ricotta (p. 278). Meatless bolognese spaghetti sauce (with frozen tofu, p. 280). Dairy-free "cheese" sauce for any pasta (with soymilk and light miso, p. 282). Tamale pie (with tofu, p. 311). Mushroom-leek crepes (with miso, p. 316). Winter squash blintzes (with tofu, p. 317). Spinach quiche (with tofu and light miso, p. 317). Asparagus quiche (with tofu and light miso, p. 318). Country pot pie (with tofu). Spanokopita with "stedda" ricotta (with tofu, p. 320). Superb vegetable sushi (with tofu, p. 322). Baking ingredients (soy flour, p. 331, and soymilk, p. 333-34). Carrot-cake cookies (with soy flour, p. 346). "Cheesecake" bars (with tofu, p. 346). Easy banana bread (with tofu, p. 348). "Cheese" strudel (with tofu, p. 349). Mocha parfait (with tofu, p. 350). Baked Indian pudding (with soymilk, p. 350). Applesauce cake (with tofu, p. 352). "Chocolate" carrot cake (with tofu, p. 353). Holiday pumpkin pie (with tofu, p. 355).

Talk with Marilyn Diamond. 1991. Sept. 18. The book is in its 9th printing now and the publisher just allowed her to do a revision, correcting typos and improving recipes. The publisher is not even planning the paperback edition yet because the hardcover edition is selling so well. They now have a 10-year contract with Doubleday (with a 10-year option to renew), and she and Harvey are working on a book together titled "How to Save Your Husband's Life While Saving Your Own." It stresses the need to re-affirm the female energies, which are the earth energies. The Diamonds have established a foundation to support the environment and ecological projects. This last year they contributed funds from it to support tree planting through the National Arbor Day Foundation. Address: Bradenton, Florida 34209.

3486. Gray, Sylvia Ruth; Rogers, Sherry A.; Cohen, Gary Martin. 1990. Here's the B-12!. *Solstice* No. 40. p. 10-13. March.

• **Summary:** "In a follow-up to last issue's cover story, three macrobiotic researchers offer their perspectives on diet and the elusive vitamin B-12." S.R. Gray believes that B-12 deficiencies may be linked to "cobalt-deficient soils and habitual use of various soy products... Recent tests on the tempeh from Turtle Island Soy Dairy were a breakthrough: comparative testing (between *L. leichmannii* and *O. malhamensis*) suggested the absence of analogues and B-12 findings of 5.5 micrograms/120 gm (4 oz.), which is excellent—a far cry from Specker's mean of 0.05 micrograms/100 gm on six tests of tempeh!

“My barometer for good quality miso is that it promotes a substantial rise in bread. Ohsawa America, South River and Yamazaki all produce dark misos which make our 50 percent whole grain bread rise beautifully... One good miso was tested and was found to have B-12 levels four times higher than that found by the Dutch researchers last year. Future tests may prove even this figure to be falsely low; miso testing is tricky, since high salinity affects B-12 extraction processes...”

Will the addition of B-12-making bacterial cultures be helpful in the process of making tempeh? “Actually, since the B-12 content of foods such as tempeh mirrors the cobalt content of the substrate, I suspect no amount of *Rhizopus oligosporus* or *Klebsiella pneumoniae* can make B-12 in the absence of cobalt. In fact, the addition of *K. pneumoniae* to a tempeh culture may actually decrease final B-12 content because of competition for resources.”

G.M. Cohen notes that B-12 deficiency may be caused by chronic mercury poisoning from dental amalgam fillings. Address: Strictly Macrobiotic, 315 First Ave., Salt Lake City, Utah 84103. Phone: 801-521-7936.

3487. Ontario Soybean Growers' Marketing Board. 1990. A profile of the Canadian soyfoods market—Characteristics and potential. Box 1199, Chatham, ONT N7M 5L8, Canada. vi + 40 p. March. 28 cm. Spiral bound.

• **Summary:** Contents: 1. Introduction: Background, study objectives. 2. Research procedures: Data limitations, data collection (data sources). 3. The soyfood market: Soyfood production and utilization, domestic production, imports and exports (introduction, whole soybeans, soy flours and meals, soy oil, soy sauce, protein substances, cream and other substances, bran & soy hulls, soy meal oil cake), balance, conclusions regarding opportunities.

4. Soybeans for food purposes: Natto beans (background, market characteristics, market potential), whole bean soyfoods (introduction, soynuts, full fatted soy flours, soymilk, tofu, soy sprouts, tempeh, miso, natto, soy sauce), foods from soy ingredients (introduction, defatted soy flakes, soy protein concentrate, soy protein isolates, textured soy protein, consumption and imports). 5. Organic soyfoods: Introduction, organizations (major players, labelling requirements, certification), organic soybeans, organic soyfoods, market opportunities, recommendations.

6. Market estimates: Introduction, conversion rates, market characteristics (introduction, ethnic characteristics, immigration trends, implications), soyfood consumption (production). 7. Soyfood products: Introduction, new products (whole bean products, products from soy components), existing products (products with potential for growth). 8. Marketing strategy: Introduction, respondent requests (background), market opportunities (traditional soyfoods, new products), systems development (system

information needs, human resources, production research), institutional needs.

This study was commissioned by the Ontario Soybean Growers' Marketing Board to provide a description of the Ontario soyfood industry. “Production and utilization: In the 1988 crop year, approximately 1.12 million tonnes of soybeans were produced on 1.28 million acres in Ontario. Approximately 86% of the soybeans were sold through the Board, with the remainder being fed or retained on the farms where they were grown. In 1988, 860 thousand tonnes of soybeans were crushed in Canada to produce soybean meal and soy oil, and 272 thousand tonnes were exported.

“Imports and Exports: Canada had a negative balance, a deficit, of almost \$190 million in the value of soybeans and soy products traded. This is just over half a million dollars per day. Our largest single area of exports is whole soybeans for human foods. The percentage of these beans going to the major markets in 1988 were: USA, 37%; Pacific Rim Countries, 34%; and Europe and other 29%. Our greatest imbalance in exports and imports is in soybean meal or oil cake. Canadian crushers are unable to maximize their sales of oil cake because of difficulties in selling surplus soybean oil in the US. Soy oil being sold into the US presently faces a tariff of 18% which is decreasing at the rate of 2.25% per year as per the Canada United States Trade Agreement...”

“Institutional development: We suggest the Board initiate the establishment of a Soyfood Development Association similar in structure and function to the Canola Council of Canada... There is a need to begin to bring all industry stakeholders together to systematically identify problems, information and research needs; develop data bases; and cooperatively promote the soyfood industry.”

Soybeans for food purposes: The total volume of soybeans consumed as soyfoods in Vancouver (BC), Toronto (Ontario), and Montreal (Quebec) was estimated at about 6,000 tonnes, and imports were estimated to be equivalent to 8,000 tonnes of soyfoods.

Miso: One large Vancouver producer and one Toronto producer estimated that the volume of soybeans used to make miso in Canada is only about 35 tonnes/year.

Modern Soy Protein Products: Soy flour, concentrates, isolates, and textured soy protein products. Roughly 2,400 tonnes of soybeans are used in Canada for the production of these products, and 5,600 tonnes of soybeans are used to make the imported products (only bakery flour and extruded flour are made in Canada). Almost 1,000 tonnes of soy protein concentrates and isolates, and 400 texture soy proteins were imported, 83% from the USA. Total exports were 800 tonnes, of which 578 tonnes went to the USA. Soy flour (full-fat): The term “flour” generally signifies that the material has been ground finely enough to pass through a 100-mesh screen. Only relatively small volumes of full-fat

soy flours are used directly as human foods. Some are used in bread, crackers, and pastry products. 5 companies in Canada make 1,538 tonnes of soy flour worth \$495,000.

Natto: Canadians sell roughly 8 to 10 thousand tonnes of natto beans in Japan each year. Natto-type beans are “created by screening out the small beans from among regular food grade soybeans which have white hilums” (p. 15). In Japan about 100,000 tons/year of soybeans are used to make natto. Recently, Canada (via 3 companies—First Line Seeds, W.G. Thompson, and King Grain) has supplied about 10% of this market. Ontario produces about 8,000 to 10,000 tonnes of natto beans. Competition is expected to increase from U.S. seed breeders.

Soy milk: There are presently no large Canadian soy milk manufacturers. A plant is being built by an international trading company near Vancouver (YHS Pacific Fruit Concentrates Ltd., owned by Yeo Hiap Seng). It will supply both the local market and the Western U.S. market when it goes on stream later this year. A high proportion of imported soy milk is organic. Two brands account for 3/4 of all imports: Edensoy and Vitasoy. A high proportion of all soy milk imports are certified organic. This emphasis makes it difficult for Canadian producers to compete because of the shortage of organic soybeans in Canada. Consumption of soy milk is increasing at about 10% a year. Prices range from \$1.50 to \$2.75 per liter, with the organic product commanding the higher prices. Just under 100 tonnes of soybeans are used to produce soy milk in Canada: Vancouver 42 tonnes, Toronto 30 tonnes, Montreal 25 tonnes, plus imports 240 tonnes. 1 kg of soybeans produces 16.5 kg of soy milk.

Soy nuts: The volume of soy nuts made in Canada is quite small. One Toronto company [Grove Country Foods Canada, Inc.; they were in business 1-2 years, but were out of business by Jan. 1991], which began operation in Nov. 1988, sells a line of roasted nuts, which are roasted in the USA and chocolate-dipped in Ontario. Production was only a few tonnes in 1989 and is estimated to be about 10 tonnes in 1990.

Soy sauce: In 1986, according to Statistics Canada data, 2,503 tonnes of soy sauce were produced by 6 firms. The value was \$2,161 per tonne for a total of \$5,411,000. In 1988 Canada imported 5,680 tonnes of soy sauce valued at \$4 million, primarily from China, the United States, Hong Kong, and Japan. Exports were 58 tonnes valued at \$65,000. The major Canadian producers are China Lily and Sun Fresh in Toronto, Wong Wing and VH in Montreal, and Golden Dragon in Vancouver. The value of Toronto production is currently estimated to be about \$5 million.

Soy sprouts: One Toronto manufacturer uses 20-25 tonnes of soybeans per year.

Tofu: About 3,300 tonnes of soybeans are used to produce tofu in Canada, more than any other soy food. The volume of soybeans used is estimated at 1,400 tonnes in

Toronto, 1,200 tonnes in Quebec (when a relatively large operation in Hull [La Soyarie, Inc.], near Ottawa, which exports to Ontario is included), 625-700 tonnes in Vancouver, and 125 tonnes for imported tofu. 1 kg of soybeans produces 2.4 kg of tofu.

Tempeh: Only about 33 tonnes of soybeans are used to make tempeh in Canada, and an estimated 15-20 tonnes in Ontario. Imports are relatively small. 1 kg of soybeans produces 1.6 kg of tempeh. Very few firms produce tempeh in Canada. One producer claims to have over half the Ontario market. A major distributor suggested they sold 4-5 times as much tofu as tempeh.

Soybean crushing: Since 1986 the number of firms crushing soybeans and producing soy oil has decreased from 3 to 2 [Central Soya owns two plants; in 1990 they bought the Canadian Vegetable Oil Processing (CVOP) plant in Hamilton, Ontario, formerly owned by Canada Packers Inc. They purchased Victory Soya Mills in Toronto in early 1985. So now 2 firms own 3 plants]. In 1986 the three plants made 95,108 tonnes of crude soy oil worth \$57,271,000. Two firms made deodorized soy oil, but the volume and value were confidential. Less than \$2 million of any type of soy oil is imported.

Consumption of soy foods in Canada is strongly linked to Asian-Canadians. A table (p. 32) shows that according to the 1986 census, there were about 444,000 people of East- and Southeast Asian origin living in three major Canadian cities: Vancouver (155,105 people comprised 11.2% of the city's population), Toronto (234,325 people comprised 6.8%), and Montreal (55,585 people comprised 2.4%). Thus Toronto was by far the largest market, but Vancouver had the highest density of Asian-Canadians. A similar table (p. 33) updates the previous table to 1988. Immigration has increased sharply since then.

Note: This is the earliest document seen (Feb. 2002) that uses the term “food grade” (or “food-grade”) in connection with Canadian soybeans (see p. 15). Address: Chatham, ONT, Canada.

3488. Krohn, Joni. 1990. Standard Industrial Classification (SIC) Codes (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** *The Standard Industrial Classification Manual* is published by the Office of Management and Budget (OMB), which also publishes the SIC codes. Another related publication is the *The Numerical List of Manufactured and Mineral Products*, and its *Alphabetic Index*, both published by the Census Bureau (within the Department of Commerce); these documents expand the basic 4-digit SIC codes to 7-digits to give more detail: Our industry is most aptly characterized by 2075A = Soybean products.

0116 = Soybean farms. Any industry that starts with zero is agricultural.

2024-071 = Mellorine and similar frozen desserts, incl. those made with tofu.

2026-717 = Products which substitute for fluid milk products [probably includes soymilk].

2026-718 = Other perishable dairy product substitutes [probably includes soy yogurts & cheeses].

2035 = Pickled fruits and vegetables.

2035-234 = Other finished pickles and pickled products [incl. mixes, relishes, peppers, onions, and mushrooms; probably includes miso].

2035-351 = Other sauces, incl. Worcestershire, soy sauce, horseradish, meat, vegetable, etc.

2075 = Soybean flour, grits, meal, cake, and soy oil (unrefined).

2079 = Soybean cooking and salad oil.

2084 = Soybean fibers.

2099-955 = Tofu (Bean curd).

2099-998 = Other perishable prepared foods, sold in bulk or packages, not frozen [probably includes tempeh].

Note: in May 1984 the "Primary SIC" code assigned to tofu manufacturers by Dun & Bradstreet was either 2075 (Soybean Oil Mills), or 2099 (Food Preparation Nec.). Address: Dep. of Commerce, Bureau of the Census, Economic Surveys Div., Industry & Commodity Classification Branch, FOB-3, Room 2744, Washington, DC 20233;. Phone: 301-763-1935.

3489. Drosihn, Bernd. 1990. The founding and history of Viana Naturkost GmbH in Cologne (Interview). *SoyaScan Notes*. April 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bernd started to make tempeh in Cologne in about Aug. 1989 after leaving Soyastern. He moved the company to his present address in Huerth, and started making soyfoods there in Jan. 1990. He makes 3 types of tempeh, 2 tempeh burgers, and 2 tempeh spreads (introduced in 1990). The burgers and spreads are selling well, but the basic tempeh is going more slowly since it is a little unknown to the German consumer—not as well known as tofu. The only other tempeh company in Germany is Byodo in Munich—they also make tofu. Both Bernd's company and Byodo make about 200 kg/week of tempeh. They each make their own tempeh starter. Recently Bernd wrote a little tempeh cookbook titled *Tempeh: A traditional food with a future* (1989, Viana).

The founder of Byodo was Lukas Kelterborn. Harry Whitford came a little after it was founded. Whitford left Soyastern about 6 months ago and since then has been unemployed, living in Dorsten (100 km away; Alleestr. 13a, D-4270 Dorsten 1, West Germany. Phone: 02362-43493), where he runs a Zen Center.

Bernd feels that the future looks bright for his company, in part because he is also making second generation tofu products, including 2 tofu spreads, and 1 tofu sweet cream

dessert, all launched in 1990. He buys the tofu from Tofuhaus Tiefenthal because the quality is excellent, better than from Soyastern although the price is higher than that from Soyastern.

He is now also making two short-term misos (a rice miso and chick-pea miso), fermented for 3-4 months, plus a miso spread. He started to sell these 6 weeks ago and they are selling well. His company address used to be Neusserstrasse 199, D-5000 Cologne 60, but he has recently moved. Address: Founder and president, Viana Naturkost GmbH, Schmittenstr. 106, D-5030 Huerth 6 (Fischenich), West Germany. Phone: (02233) 41323.

3490. Drosihn, Bernd. 1990. Re: New soyfoods companies in Germany, and the German tofu industry. Letter to William Shurtleff at Soyfoods Center, April 8. 2 p. Typed, with signature on letterhead. [Eng]

• **Summary:** Gives the addresses of 4 new tofu companies and 2 miso companies, plus an estimate of the weekly production of ten German tofu companies. Address: Founder and owner, Viana Naturkost GmbH, Schmittenstr. 106, D-5030 Huerth 6 (Fischenich), West Germany. Phone: (02233) 41323 or 221-121175.

3491. Shimizu, Teruo. 1990. Recent developments at Miyako Oriental Foods (Interview). *SoyaScan Notes*. April 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Miyako is presently making about 900 metric tons/year of miso, making them the largest miso manufacturer in America. This is up 30% compared with three years ago (when the dollar/yen exchange rate changed dramatically), but there has not been much increase during the past 2 years. About 80% of sales are to the Asian-American market (including small exports to Japanese in Mexico), and 20% to the natural foods market. Westbrae, a former customer, is now buying their miso from Canada. They are now trying to increase their sales to the Korean-American market. The younger generation of Korean-Americans finds the flavor of Korean miso to be too strong. They (and some Korean restaurants) like to mix equal parts of Miyako rice miso with Korean miso. Some Korean restaurants have switched to using only Japanese miso. One reason is that the quality of Korean miso is inconsistent.

They are selling quite a bit of dry koji to Grainaissance and to Cedarlane, both of whom use it to make amazake. Two years ago Miyako purchased an expensive, automatic, computer-controlled rotary koji fermenter from Nagata Brewery Machinery Co. (the biggest company; they also sold such a machine to Takara USA, the sake maker). It is working very well for them. The only other manufacturer of such fermenters is Fujiwara in Okayama. Address: Vice President, Miyako Oriental Foods Inc., 4287 Puente Ave., Baldwin Park, California 91706. Phone: 818-962-9633.

3492. Leigh, Roberta 1990. Soyfoods: Why their popularity is growing. Special advertising section. *New Age Journal (Boston, Massachusetts)* 7(2):100-. March/April.

• **Summary:** Since the 1920s, Americans have been taught that they need at least two servings of meat and two glasses of milk each day to get enough protein. Many people switching to vegetarian diets or reducing their meat consumption feel most comfortable if they continue to plan at least some of their meals around a high-protein food.

“Consequently, the popularity of soyfoods has boomed during the past two decades... They can also be prepared in a number of ways, such as tofu and tempeh, that mimic ‘meatiness’ in terms of eating satisfaction.

“Shoyu and tamari, both fermented soy sauces, and miso, a fermented soy paste, are often used as bases for soups, gravies, and sauces; many people feel they impart a rich flavor to meat stock. Soy milk and soy cheese are popular with people who want to minimize or eliminate dairy products from their diets. There are even smokey-flavored imitation bacon products made from soy.

“Tofu is a cheese-like product containing the protein, oil, and soluble carbohydrates from whole soybeans that have been crushed and cooked...—Roberta Leigh.”

3493. **Product Name:** Cold Mountain Miso (Made with Organic Soybeans) [Red, Mellow White, or Light Yellow].

Manufacturer’s Name: Miyako Oriental Foods, Inc.

Manufacturer’s Address: 4287 Puente Ave., Baldwin Park, CA 91706.

Date of Introduction: 1990. April.

New Product–Documentation: Portfolio sent by Terry Shimizu of Miyako Oriental Foods. 1999. Nov. 22. Talk with Terry Shimizu. 1999. Nov. 29. This product was introduced in April 1990. Only the soybeans are organic.

3494. Muso Co. Ltd. 1990. Muso product manual: Foods from Japan. Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. 62 p. Catalog. April. 30 cm. [Eng]

• **Summary:** This English-language catalog describes Muso’s natural-food macrobiotic products that are exported to the West. There are 8 pages of color photos at the front, and many flowcharts and recipes in the body of the catalog. Interesting color photos include: Shoyu fermentation room. Spreading moromi before pressing to make shoyu. Hatcho miso aging room. Drying kombu and cultivating nori on nets. Umeboshi and brown-rice vinegar. Shiitake mushrooms growing on logs and huge kudzu roots.

Contents: Shoyu (organic, low salt), tamari (wheat-free soy sauce), miso (Hatcho, barley, rice, white miso, brown-rice miso, awase miso [mixed miso], buckwheat miso, unpasteurized miso [nama miso]), seaweeds, Japanese pasta, wheat free pasta (incl. kudzu noodles), Japanese tea, other beverages, soymilk, amazake, ume/plum products (incl. umeboshi), Japanese pickles, dried foods (incl. kudzu root

starch, shiitake mushrooms, koya tofu, fu [gluten cake]), condiments (incl. tekka miso, *nori no tsukudani*, natto miso [miso condiment]), seasonings, instant foods (incl. brown rice mochi, yomogi mochi, kibi mochi, yaki mochi, abekawa mochi with kinako, cooked brown rice, ramen [Chinese style noodles], instant miso soup), crackers and chips, barley malt syrup and rice malt syrup, food supplements (plum balls, kombu balls), adzuki beans, black soybeans, nigari. Address: Osaka, Japan. Phone: 06-942-0343.

3495. Macfarlane, Bruce J.; Riet, W.B. van der; Bothwell, T.H.; et al. 1990. Effect of traditional oriental soy products on iron absorption. *American J. of Clinical Nutrition* 51(5):873-80. May. [28 ref]

• **Summary:** Various soy products (silken tofu, tofu, tempeh, natto, different types of miso, sufu, and soy flour) were fed to 242 women. Blood levels of iron were then compared. Silken tofu, tempeh, natto, and the misos showed better iron absorption than tofu and sufu. The authors speculated that because tofu is higher in calcium, it might be this calcium that is inhibiting iron absorption. Silken tofu, coagulated with GDL, has a much lower calcium content than silken tofu. Address: MRC Iron and Red Cell Metabolism Unit, Dep. of Medicine, Univ. of Witwatersrand, Johannesburg; Div. of Food Science and Technology, CSIR, Pretoria; and the Dep. of Medicine, Univ. of Natal, Durban, South Africa.

3496. Vanka-Kawat B.V. 1990. Topmerken in de Aziatische levensmiddelen: Prijslijst [The top brands in Asiatic foods: Price list]. 3e v.d. Kunstraat 18, 2521 BB Den Haag, Netherlands. 22 p. [Dut]

• **Summary:** The subtitle is “Import-Export Asian Food Specialties.” Imported items are listed by country of origin. Non-imported are listed by product type: China: Pearl River mushroom soy, soy superior, and superior soy. Philippines: Silver Swan soy sauce. Hong Kong: Best black soy, Best light soy, Best soy light, Best soy sauce, Black soy, Black soy yellow label, Hoi sin sauce Meechung, Taotjo bean sauce. Japan: Akamiso, Kikkoman menmi, Kikkoman shoyu, Kikkoman steak sauce, Kikkoman teriyaki sauce, Marukin soy sauce, Morinaga silken tofu, Nagatani-en akamiso, shiro-miso, Teriyaki sauce. Ketjap: Ketjap kaki tiga, Ketjap A, Ketjap ‘A’ manis, Ketjap benteng asin, Ketjap benteng manis, Ketjap vital, Superior soy, Tiger brand soy, Yellow label. Singapore: Salted soy beans sin sin, Taotjo bean sauce, Taotjo flower brand, Taotjo taksan. Taiwan: Black beans fermented [soy nuggets], Soy sauce ve wong, Tahoe amigo, Tauge [sprouts]. Fresh products: Vacuum packet fresh tofu. Fresh tempeh. Address: The Hague, Netherlands. Phone: 070-388- 88 04.

3497. Oka, Seizo. 1990. Early Japanese immigrants to Hawaii (Interview). *SoyaScan Notes*. June 7. Conducted by

William Shurtleff of Soyfoods Center.

• **Summary:** The first contracted labor immigrants from Japan arrived in Hawaii in 1868 aboard the ship *Scioto*. They took with them miso and shoyu. Before that time, some Japanese drifted ashore or were shipwrecked on Hawaii. A number of groups were supposed to follow the first group, but there was a dispute in the contract so the program was terminated with the first group.

The ship *Scioto* (pronounced sai-OH-tuh) was apparently named after a river in Ohio that flows 237 miles southward through Columbus and empties into the Ohio River in Scioto County. It belonged to the Pacific Mail Steamship Co. of the USA. In Japanese the ship's name is usually romanized in katakana as *Saioto-go* (or less commonly as *Shioto-go*), where "go" (the Japanese character for "number") is a suffix widely used with the names of ships, trains, and other vehicles. "Go" is not a counter for ships—the counter is "seki," such as isseki, niseki.

Robert W. Irwin, an American who became an agent in Yokohama for the Pacific Mail Steamship Co., played a key role in both the 1868 and 1885 contracts. The first group consisted of 148 Japanese. They were under a contract made between the Japanese government and the Hawaiian kingdom. But because of a dispute in the contract, 40 members of the group returned to Japan without fulfilling the contract; 108 remained in Hawaii and fulfilled the contract. Since they left in 1868, the first year of Meiji, they are often referred to as "Gannen mono" which means "Fellows of the first." In 1885 the contracted labor was resumed, and continued on for several years. The second group of contracted labor immigrants was carried from Japan to Hawaii on the ship named *City of Tokio*. Address: Founder and former Head, History Room, Japanese Cultural and Community Center, 1840 Sutter St. #206, San Francisco, California 94115. Phone: 415-751-5951.

3498. Stachura, Irena. 1990. About the ship *Scioto* (Interview). *SoyaScan Notes*. June 9. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** In the book titled *Merchant Sail* by William Armstrong Fairburn two vessels named *Scioto* are listed. The first was built in 1831. Tonnage: 141 tons. Length: 81 feet. Beam/width: 23 feet. Depth: 9 feet. Rigging: Schooner (with triangular sails, pointed at the top). It was probably not built on the West Coast since there is very little information about it in the files of the National Maritime Museum. It was probably built on the East Coast. It is not listed as a Gold Rush vessel.

The second vessel named *Scioto* was built in the Skolfield yard. It was a ship, with 3 masts or more. For more information contact the Mystic Seaport in Mystic, Connecticut. Address: Research Librarian, National Maritime Museum Library, Bldg. e, Third Floor, Fort Mason

Center, San Francisco, California 94123. Phone: 415-556-9870.

3499. Sakaguchi, Noboru. 1990. Early history of making tofu at Le Bol en Bois (Interview). *SoyaScan Notes*. June 14. Conducted by David de Korsak in France.

• **Summary:** In 1969 Mr. Sakaguchi made his first trip to Paris from his homeland, Japan. He returned to Paris in March 1974, and became aware of the possibility of buying a macrobiotic restaurant from a friend who at the time was a cook in that restaurant. From April-Aug. 1974 he returned to Japan to finalize a deal with Japanese investors and to study tofu making. While he was in Paris touring vegetarian restaurants, Mr. Sakaguchi had been struck by the lack of protein in the foods he saw. Tofu naturally came to his mind as the food that would ideally supplement (and complement) that vegetarian cuisine. "Tofu was missing... I thought of this as my mission."

On 2 Sept. 1974 Mr. Sakaguchi opened Le Bol en Bois. He had expanded it to include a natural foods retail store located directly across the street. In the last quarter of 1975 he began trials making tofu using calcium sulfate as a coagulant. In about Nov. or Dec. 1975 he began commercial production of tofu, using real nigari as a coagulant. He sold this tofu only at Le Bol en Bois natural foods store and served it in his restaurant. An invoice dated 26 Dec. 1975 from Mitoku Company Ltd. in Japan shows that he imported 40 kg of nigari (\$17.34), 50 x 150 gm packets of nigari (\$33.27), a grinder for making tofu (\$562), other pieces of tofu making equipment (\$450.35), as well as 1,800 liters of Sakae Tamari-Shoyu, 900 liters of Johsen Tamari-Shoyu, and 200 kg of brown rice miso. Production remained limited (two days a week, 40 cakes per day) until the end of 1976. Mr. Sakaguchi made the tofu himself, helped by some Japanese students. One evening in the winter of 1976 an unusually large number of people came to the store to buy tofu. This corresponded to the end of a conference held by Michio Kushi in Paris. The store became the focus of a lot of interest and activity. Production jumped to roughly 240 cakes per day, two days a week. By the end of 1976 Mr. Sakaguchi had hired his first employee to help him make tofu.

In 1985 the tofu production activity was set up as a separate company named Daizou, located outside of Paris at Champigny sur Marne. At that time production was about 300 cakes per day, two days a week. Mr. Sakaguchi now began to make tofu more than twice a week and to sell this tofu at other retail outlets in addition to his own. Address: 883 Rue de Bernau-Z.I., 94500 Champigny Sur Marne, France. Phone: 48 82 39 90 or 47.06.33.71.

3500. Wollner, Joel. 1990. Re: History of early work with amazake, koji, and Rice Dream in America. Letter to Jan Belleme, Saluda, North Carolina, June 23. 3 p.

• **Summary:** “Starting in the early 1970s, Erewhon imported scant supplies of a highly perishable, fresh rice koji along with its regular line of Japanese products. Most often, this koji was spoiled or worm-infested by the time it arrived in Boston, Massachusetts. But on those few occasions when a usable amount arrived intact, we had the rare pleasure of attempting to make amazaké at home.” One attempt was made on Thanksgiving of 1973. In spring 1977 the Erewhon flagship store on Newbury Street in Boston began to sell Cold Mountain Misos, then Cold Mountain Koji. The misos sold well but not the koji, so Joel and his wife, Wendy, developed a simple method for making amazake at home.

Mona Schwartz in Florida began to order koji from Joel and developed a good recipe for making it into amazake. Joel learned and perfected the process, then described it in detail in the 10-16 April 1978 edition of his newsletter *Erewhon News (Newbury Street)* under the title “Overnight Amazake.” “You can imagine my surprise—no, shock—when, later that spring Charles Kendall, macrobiotic aficionado, keeper of the Erewhon Company store, and supplier to our store of ‘homemade’ organic sauerkraut (his own), approached me one day in the store and asked if I would consider selling the refrigerated amazaké drink he had developed.” The rest is history.

In about the spring of 1985, Joel and Sjon Welters drove to Moniteau Farm where Robert Nissenbaum and Dave Carlson, calling themselves Imagine Foods, were making a frozen confection from amazaké. “This new incarnation of an old Boston study-house favorite, was actually made from a mixture of amazaké, which they first made from Cold Mountain koji and Chico-San brown rice, combined with Chico-San rice syrup and various natural flavorings, and run through a soft-serve ice cream machine. (A frozen dessert made in several flavors from rice kayu sweetened with rice syrup and/or barley malt syrup was sold at Erewhon Newbury Street in 1977-78.)”

But Imagine Foods was having technical and flavor products with its product. In Fayetteville, Arkansas, Joel and Sjon had developed a “series of amazaké-like beverages and desserts made by enzyme conversion from whole grains, including brown rice... Of course, our work was top secret, since, at the time, enzyme processing was virtually unknown in the natural food industry, and used for little more than processing corn syrup in the conventional food industry. Robert and Dave had no knowledge of it at all.

“Sjon and I confirmed (to ourselves) the rightness of our enzyme process for use in Rice Dream to make a single brown rice base ingredient for the mix. This development alone would solve the technical and flavor problems to make a commercially feasible product with a broadly appealing taste and texture. We decided to invite Robert and Dave to relocate to Fayetteville and purchase the base ingredient, which would be made in our plant, from us. Months of negotiations would pass before the enzyme

process solution was finally revealed to Imagine Foods [by whom?] at the next NNFA show. But then, through a series of twists and turns, Sjon and I lost control, and the enzyme process project was ‘diverted’ to California Natural Products. More than this, I am not prepared to discuss at this time.” Address: 19 Pepper Hollow Drive, Clifton Park, New York 12065. Phone: 518-383-0299.

3501. Barnard, Neal D. 1990. *The power of your plate: A plan for better health*. Summertown, Tennessee: The Book Publishing Co. 240 p. Index. June. 23 cm. [65* ref]

• **Summary:** In this book 17 experts, including such eminent medical professionals as Michael DeBakey, William Castelli, and C. Wayne Callaway, meet on common ground with the author concerning the benefits of a low-fat, low-cholesterol, high-fiber diet—that is, a food program that is largely free of meat. The subtitle on the title page reads: *Eating well for better health—17 experts tell you how!*

Contents: Introduction. Part I. 1. Cholesterol, food, and your heart. 2. Dr. Michael DeBakey: An interview. 3. Tackling cancer. 4. New strategies in weight control. 5. Uninvited guests: Food-borne illness. 6. Other common health problems. 7. Foods and the mind. 8. The evolution of the human diet. Part II. 9. Recommendations. 10. Beyond willpower. 11. Food ideas and recipes. References.

Soy-related recipes include: Scrambled tofu (to replace scrambled eggs, p. 215). Miso soup with wakame (p. 216-17). Tofu salad (like eggless egg salad, p. 219). Tofu sour cream (p. 231).

Dr. William Castelli of the Framingham Heart Study notes: “We’ve never had a heart attack in Framingham in 35 years in anyone who had a cholesterol under 150.” Address: M.D., Physicians Committee for Responsible Medicine, Washington, DC.

3502. Cardenas, Danilo C. 1990. Status of the Philippine soyfood industry. Paper presented at the International Conference on Soybean Processing and Utilization. Held 25-29 June 1990 at the Jilin Academy of Agricultural Sciences, Gongzhuling, China. *

Address: Supervising Science Research Specialist, Philippine Council for Agriculture, Forestry, and Natural Resources Research and Development (PCARRD), Los Baños, Laguna 3720, Philippines.

3503. Lark, Susan M. 1990. *The menopause self help book: A woman’s guide to feeling wonderful for the second half of her life*. Berkeley, California: Celestial Arts. 239 p. 22 x 22 cm. [228* ref]

• **Summary:** The title page states: “The first completely practical all-natural master plan to relieve and prevent every symptom of menopause.”

Soy is mentioned as follows: Dairy products: There are many negative health aspects of using dairy products.

Soybeans are a good source of calcium. Soy milks and nut milks can be used as alternatives to dairy milk (p. 46). Breakfast–beverages: Stop using coffee, which contain caffeine. Grain-based coffee substitutes such as Postum, Pero, or Caffix are both nutritious and satisfying. Other good breakfast beverages include nondairy milk, such as soy, nut, or grain milks. Soy milk is now easy to find in health food stores (p. 52-53). Spreads: Peanut butter (without added salt), sesame butter (which is rich in calcium), and soy spreads are good (p. 55). Soups: For women who can't eat soup unseasoned with salt, try adding one teaspoon of miso per cup of soup. Miso, a fermented soy product from Japan, is widely available at Oriental markets and health food stores. It contains less salt than regular table salt. How to substitute for dairy products: Tofu can be used in some recipes to replace cheese. Use soy milk, nut milks, or grain milks in place of dairy milks (p. 70). Substitutes for common high-stress ingredients: In place of 1 cup milk, use 1 cup soy milk, nut milks, or grain milks. In place of ½ teaspoon salt, use 1 tablespoon miso or ½ teaspoon Bragg's liquid amino acids, or ½ teaspoon sea vegetables–dulse, kelp (p. 72-73).

Chapter 8, titled “Menopause self help cookbook,” contains many recipes: A “Fruit smoothie” (p. 75) contains only fruits, no dairy products or soy. For recipes for sesame milk and almond milk, see p. 76. Tofu and sesame-butter spread (p. 79). One dish meals: Almond tofu (Tofu with almonds), and Tofu with snow peas (p. 94). Tofu-wild rice salad (p. 95). Tofu & brown rice (p. 96). Apple-tofu custard (p. 97).

In chapter 10, titled “Herbs for menopause,” is a section on “Herbs for your menopausal symptoms.” The subsection titled “Heavy irregular menstrual bleeding” notes that bioflavonoids, flavonoids from plants, help to strengthen capillaries and prevent heavy bleeding. The section titled “Hot flashes” states: “Many plants are good sources of estrogen, the hormone that helps to control hot flashes. Besides controlling heavy menstrual bleeding, bioflavonoids also have weak estrogenic activity (1/50,000 the strength of estrogen). They are very effective in controlling such common menopause symptoms as hot flashes, anxiety, and irritability... Plants also form the basis for the production of medical hormones. Many common plants such as soy beans and yams contain a preformed steroidal nucleus. Estrogen and progesterone can be synthesized from plants in relatively few steps and have allowed sex hormones to become available commercially at a reasonable cost” (p. 127-28).

Susan M. Lark, M.D., born in 1945, “is a noted authority on women's health care and preventive medicine. She is the Director of the PMS and Menopause Self Help Center in Los Altos, California. She also sees women patients in her private practice. Dr. Lark has been on the clinical faculty of Stanford University Medical School, Department of Family

and Preventive Medicine. She is also an associate member of the Department of Family Medicine, El Camino Hospital in Mountain View, California. Dr. Lark lectures widely on women's health care issues and is a sought-after speaker.”

On the inside rear cover is a mail order form for Dr. Lark's Menopause Self Help Book, plus 3-month supplies of Menopause Vitaminerals, Herbal Formula, and Essential Oil, to be sent to Self Help Options for Women, Carson City, Nevada. On the rear cover is a portrait photo of Dr. Lark. Address: Director, The PMS and Menopause Self Help Center, 101 First St., Suite 441, Los Altos, California 94022. Phone: (415) 964-7268.

3504. Muso Shokuhin. 1990. [Pure heart: Muso general catalogue]. Otedori 2-2-7, Chuo-ku, Osaka 540, Japan. 88 p. Printed 1 July 1990. 30 cm. [Jap]

• **Summary:** This strikingly beautiful, full-color catalog, pictures and describes Muso's natural-food macrobiotic products in Japanese for the Japanese market—although the title is written only in English. Includes many kinds of miso, shoyu (incl. Marushima Shoyu), black soybeans, yellow soybeans, kinako [roasted soy flour], seitan (in a jar from Marushima, p. 41; the product name is written as “Seitan” in large roman letters, then in smaller letters in katakana), San-Iku Foods canned products (Gluten Burger, Gluten Meat, Linketts, Soyees, Snack Joe; p. 41), yuba, gomoku nimame (cooked whole soybeans), many kinds of sea vegetables and related products, San-Iku Soyalac (8 different products), Marusan soymilk (5 different products; 3 are named mineral tou-jyan; the latter is the Chinese term for soymilk), macrobiotic books. Address: Osaka, Japan. Phone: 06-942-0343.

3505. Miller, Bryan. 1990. Restaurants:... Sushisay, basic and raw. *New York Times*. July 6. p. C18.

• **Summary:** This is a review of the Japanese restaurant Sushisay (38 East 51st St.), the only American outlet of a 26-restaurant chain in Japan. It specializes in raw and marinated seafood. One of the few cooked items, an appetizer, “is grilled squid legs. Bite-size pieces of crispy squid dipped in soy sauce are as addictive as popcorn.” Another of its starters is “maguro natto, tuna in fermented soy beans, which had a texture and highly fermented flavor that was off-putting to some tastes.” A soup the reviewer liked was “asari wan, a light miso broth with little-neck clams in the shell,...”

3506. Marshall, Philip. 1990. Early work with soyfoods in the UK: Direct Foods, Whole Earth, Harmony Foods Ltd., and Haldane (Interview). *SoyaScan Notes*. July 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Brian Welsby founded Haldane Foods in 1983. But he was active with health foods long before 1980. He used to do the product mixing for a company named Direct

Foods Ltd. (in Petersfield, Hampshire), which was owned by Peter and Anna Roberts, a very nice, committed pair of vegans. They were among the first people to market dried soya products, particularly TVP, in the UK. And they were certainly the first people to develop the market for composite dry soya products—like burger mixes. Philip has no idea when Direct Foods started, but it may have been in the late 1960s. [Note: It started in Aug. 1969.] They were one of the pioneers of vegetarianism and veganism in England.

Greg and Craig Sams are brothers, both American. Both are very talented guys, excellent at marketing. Greg is in a wheelchair. In the early days, both were the key figures/principals at Whole Earth with the early events at Portobello Road. Whole Earth, which started as a bakery, became Harmony Foods, a large health food wholesaling company. [Note: In 1980 Harmony Foods Ltd. was at 12 Orpheus St., Camberwell, London S.E., England.] Harmony had some of its own Harmony Foods brands and was one of the first companies in the UK to import Japanese miso, shoyu, etc. At some point, Whole Earth was sold off as a health food wholesaler, and its still going with such popular brands as Whole Earth jams, sauce, etc.

Peter Fitch was responsible for putting together the Haldane Foods Group, which incorporates Direct Foods, Haldane Foods, and Realeat. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

3507. Gerner, Bob. 1990. Best-selling soyfoods at Berkeley Natural Grocery Co. in Berkeley, California (Interview). *SoyaScan Notes*. July 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** By far the best selling soyfood product type at Bob's store is soymilk, accounting for 50-65% of total soyfoods sales. The best selling brands, in descending order of sales volume, are Vitasoy (about 40% of soymilk sales, and rising; his store promotes it more in part because he sees sales reps longer and in part because the Vanilla Vitasoy is his favorite soymilk product), Edensoy (30-35% and falling; it used to be the best seller), Westsoy and Westbrae Malted (20% and rising), Pacific Soy (from Tree of Life), and Other (Wildwood Yosoy, Quong Hop, Soy Moo, AhSoy, 5%).

The next best selling soyfood type is tofu (accounting for about 20% of total soyfoods sales, and rising), followed by soy sauce & tamari (10%, stable), soy cheeses (4%, rising), tempeh (2%, falling), soy ice cream (1%, stable or falling), and miso (1%, falling).

Total per capita purchases of soyfoods have risen steadily since the mid-1970s. There have been no plateaus or declines.

Bob dislikes (but understands) the way soymilk manufacturers discount their products, basically forcing him to buy very large quantities—typically 60 cases at a time. This policy favors large retailers, ties up a lot of his capital up-front, and takes up a lot of space in his warehouse. So 95% of the time he buys Vitasoy and Edensoy soymilk when they are on sale at discount prices, then he sells these at discount/sale prices—a practice that he does not like since it seems to contradict the idea of a “sale.” Customers won't buy soymilk any more at “regular” prices. Bob would rather buy what he needs from week to week, then sell all products at a regular price most of the time, then have promotions once in a while. Vitasoy has played a lot of games with distributors to try to get them to buy more at one time, and Bob has heard that this is hurting the distributors and that they don't like it. They can't make money selling at an 8% margin, which they often must do. Edensoy's discount is constant whereas Vitasoy has on and off discounts—which makes buying harder for Bob. Westbrae/Vestro has a more typical discount policy and Bob sells Westbrae products at a regular price most of the time. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

3508. Gray, Sylvia Ruth. 1990. B-12 update. *Solstice* No. 44. p. 6-8. July. [2 ref]

• **Summary:** Her most current miso assay documents vitamin B-12 values 33 times higher than the negligible values reported by previous studies from the Netherlands [Dagnelie et al. 1988] and Cincinnati, Ohio [Specker et al. 1988]. Mercury inactivates B-12. The author is a strong believer in macrobiotics. Address: Strictly Macrobiotic, 315 First Ave., Salt Lake City, Utah 84103. Phone: 801-521-7936.

3509. Karta, Susani K. 1990. The market prospective for tempeh in the year 2000. In: Ontario Ministry of Agriculture and Food, ed. 1990. Soybean Buyers Mission from New Markets, July 1-7, 1990. Tokyo, Japan: Ontario Ministry of Agriculture and Food. 61 p. July. See p. 19-33.

• **Summary:** Contents: Introduction. Market situation for tempeh in Indonesia. Health and nutritional significance of tempeh. Tempeh for weaning food. Constraints and trends in the market development of tempeh. Recommended guidelines and strategies. Ideas for the diversification of tempeh utilization: Tempeh as a food ingredient, new tempeh food opportunities.

Tempeh flour (dried, ground tempeh) used in weaning foods could dramatically reduce the diarrheal diseases among children in Indonesia and other countries. The author estimates the potential demand for tempeh flour in weaning foods used for this purpose in the year 2000 to be 27,720 tonnes in Indonesia and 470,880 tonnes in all Asian developing countries. This assumes average tempeh flour

consumption of 10 gm/day per child or 3.6 kg/year per child.

In 1983 Indonesians consumed about 927,000 tonnes of soybean as food, increasing to 1,528,000 tonnes in 1958. About 50% of these soybeans were used to make tempeh, and 40% to make tofu; the remaining 10% were used to make soy sauce and “tauco” (a fermented whole soybean condiment [Indonesian miso]). In 1988 the average Indonesian consumed 6.45 kg/year of tempeh (equivalent to 4.3 kg of soybeans). In the past 5 years, consumption of soyfoods in Indonesia has increased by an average of 10% annually.

According to a 1988 report from the Indonesian Ministry of Agriculture, the average daily per capita consumption of calories is still below the recommended Indonesian guidelines. In 1988, calorie consumption was only 1,794 calories/capita/day, or about 28% below the recommended 2,500 calories. Protein intake was about 43.3 grams/capita/day, or about 21% below the recommended 55 gm. “Consumption levels of traditional soyfood such as tempeh will continue to grow as the population attempts to meet its protein needs. Moreover, in view of the purchasing power of the average Indonesian consumer, we can expect a continuing increase in the demand for tempeh as it is widely available at a much more affordable price than animal protein... For tempeh manufacturing, imported soybeans are preferred because they are larger and cleaner.” Address: MSc, RD, Manager, P.T. Indofood Interna Corp., Jl. Ancol No. 4-5, Ancol Barat Jakarta Utara 14430 Indonesia. Phone: 690-1365.

3510. Matsuo, Masako. 1990. Okara tenpe no seishitsu ni oyobosu komenuka no eikyô [Effects of rice bran on properties of “okara tempe”]. *Nippon Nogeikagaku Kaishi (J. of the Agricultural Chemical Society of Japan)* 64(7):1237-39. July. [6 ref. Jap; eng]

• **Summary:** The addition of 10% rice bran to okara which is then fermented by *Rhizopus oligosporus* modifies the enzymatic activity, the vitamin content, and the physicochemical properties of the resulting product. The emulsifying capacity and the taste of the fermented product are improved. The addition of rice bran also improves the nutritive value of okara tempeh.

Okara tempeh has a texture that is harder and less elastic than that of white bread. The capacity for water retention and the absorbability of oil, and the emulsifying properties are greater than those of wheat flour. The antioxidant activity is equivalent to that of soybean miso. Address: Lab. of Chemistry, Faculty of General Education, Gifu Women’s Univ., Taromaru, Gifu 501-25, Japan.

3511. Matsuo, Masako. 1990. Okara tenpe [Suitability of “okara tempe” as a foodstuff]. *Nippon Nogeikagaku Kaishi*

(*J. of the Agricultural Chemical Society of Japan*)

64(7):1235-36. July. [2 ref. Jap; eng]

Address: Lab. of Chemistry, Faculty of General Education, Gifu Women’s Univ., Taromaru, Gifu 501-25, Japan.

3512. GEM Cultures. 1990. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. Aug. [4 ref]

• **Summary:** This catalog celebrates the company’s tenth anniversary. Contents: 1. Powdered cultures for soycrafters: Powdered tempeh starter, PTS (11 gm [\$2.25, makes 5+ lb of tempeh], 35 gm, 500 gm, 1000 gm). Starter cultures for miso, amazake, shoyu, and tamari. Introductory koji kits. Commercial spore packets for miso or shoyu. Powdered natto starter. Rice koji (cultured rice) for light misos, amazake, pickles. Most in home or commercial sizes. 2. Cookbooks with culture (lists 4 books). 3. Natural salts for curdling tofu: Natural nigari or Terra Alba calcium sulfate in 1 lb or 5 lb bags. 3. Self renewing cultures: Fresh villi culture, fresh kefir curds, fresh sourdough culture, seed miso. 4. Sea vegetables from the Mendocino Sea Vegetable Co. 5. Handy reusable items: Super sealers (lids for canning), cheesecloth (grade 60), gauze drawstring bags (for spices in mulled cider, whole herbs, etc.). Address: Fort Bragg, California. Phone: 707-964-2922.

3513. Sand, Avraham. 1990. Pioneering soyfoods and natural foods in Israel (Interview). *SoyaScan Notes*. Sept. 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Avraham first went to Israel in 1975 and stayed for about a year. During this time he and Avraham Leider and one other person founded Israel’s first natural foods company, named Amud Ha Shachar (Pillar of Dawn) and located in Jerusalem. The first product they made was granola, followed by whole wheat flour, bulgur wheat, brown rice (which they packaged), and date bars. With this company established, a number of Americans and other westerners who had recently immigrated to Israel and were connected with the company approached the Sachnut, the Jewish government agency which helps finance Jewish cooperative settlements. They asked to be given a moshav. A moshav is like a kibbutz (a cooperative agrarian, rural settlement) except that the families have their own homes and land, and the children live at home. In 1976 the Sachnut gave the group a piece of land, infested with scorpions, upon which nine other groups had tried and failed since 1948 to establish a successful community. The Sachnut also financed a small natural foods factory and bakery on the moshav, complete with an oven and a packaging machine. The moshav was named Moshav Me’or Modi’im, located at Doar Na Hamercaz, in the Judean Hills between Jerusalem and Tel Aviv, Israel.

Avraham returned to North America for several years. While living in a community of 5-6 people in Nova Scotia,

Canada, he was introduced to tofu by people who made tofu for the community, but he did not make tofu there himself.

Between 1975 and 1990 Avraham has spent a total of 8 years in Israel. The rest of the time he was in the USA or Canada or travelling. Avraham returned to the moshav in 1978 and that year he established Israel's earliest known tofu shop as part of Pillar of Dawn. The tofu was made in the same bakery room as the granola, especially in the evenings when the granola wasn't being made. Originally the community scale shop was established solely to make tofu for the 25 or so families living on the Moshav. Tofu production was small, averaging 50 lb/day of tofu one day a week, using a Corona mill grinder powered by a washing machine motor. The tofu was curded using bittern (nigari) from a salt factory on the Dead Sea. The Moshav owned the tofu company collectively and financed it. Avraham was the motivating force that got the operation started with temporary help initially from Yaacov Sack and Moshe Reuben. About 3-6 months after tofu production began, they started to make tempeh. Then Ben Zion Solomon joined Avraham 6-12 months after the company started and they worked together like equal partners for several years as the tofu and tempeh makers. Solomon was also making quite a bit of miso on the moshav (with a little help from Sand). They also introduced soymilk. At some point, they began to sell their tofu and miso at a few health food stores in Jerusalem. As far as Avraham knows, his was the first company to make tofu, tempeh, miso, or soymilk in Israel. They developed a 1-page informational pamphlet, written in Hebrew on one side and English on the other, explaining what tofu was and how it was made, plus some recipes. At that time Israelis, other than recent immigrants from America, didn't know what tofu was.

They reached the point where they decided to buy large scale equipment (from Takai) and set up a real commercial shop on the moshav that could produce 500 to 1,000 lb/day of tofu. The Sachnut indicated that they would be willing to help set up this new business. So in about 1979 or 1980 Avraham traveled to the USA and did a lot of study to learn about tofu equipment, products, and processes in small to medium sized shops. He visited about 20 tofu shops nationwide (most were very open and helpful) and collected information in a notebook. He worked at the Soy Plant in Ann Arbor, Michigan, for approximately a year in about 1980. From time to time he shared information with his father, Ralph Sand, who was doing research on non-dairy cheese and tofu at Anderson Clayton at the time. At the last minute the Sachnut pulled out and decided not to finance the project, so the expansion never took place. They continued to make tofu on a small scale. But the moshav was suffering economically so in about 1981 Avraham and his wife, unable to make a living there, left and returned to the USA. The little soyfoods plant dissolved but shortly thereafter a commercial operation (probably Golden

Jerusalem Tofu) started in Jerusalem and the people on the moshav bought their tofu from Jerusalem.

During the time that Avraham made soyfoods in Israel (1978-81) there was a lot happening with soya. There was a man called the "Soya King" ("Hamelech Soya," probably Eliahu Navot) who was famous in Israel as the country's soybean pioneer. Avraham thinks he lived in Herzlia/Herzliyya, just north of Tel Aviv, but he died in about 1979 or 1980 several months before Avraham was able to meet him. Avraham went to his home town and met his widow, who told him a little about her husband's work with soya.

The most popular food use of soybeans in the late 1970s was in textured soy flour (like TVP). These products were made in Israel by 1 or 2 big companies and sold in supermarkets in very stylish packages indicating that the manufacturers were well established. There were several flavors and large amounts were sold. He does not know the name or address of the manufacturer, but he got the feeling that Eliahu Navot had at least helped inspire these products; he may have helped to develop them.

In America, Avraham set up a soy deli named Sand-Munches in Madison, Wisconsin. They bought tofu from Bountiful Bean in Madison and made and sold tofu sandwiches, nori rolls, tofu salad, tempeh salad, various tofu spreads. They sold to health food stores and had a sandwich cart on the campus.

Avraham was in on the soyfoods wave at the very beginning, but after it became more established and mainstream he felt that his work had been done in that area, so he moved into the field of aroma therapy, inhaling aromatic essential oils from herbs, where he has been working for the last 8-9 years. It is a very powerful form of herbal medicine. He has developed several product lines under the Tiferet brand (a term taken from the Tree of Life in the Cabala) which he markets in health food stores in the USA and overseas. Address: 210 Crest Dr., Eugene, Oregon 97405. Phone: 503-344-7019.

3514. Ornish, Dean. 1990. Dr. Dean Ornish's program for reversing heart disease: The only system scientifically proven to reverse heart disease without drugs or surgery. New York, NY: Random House. xxxi + 638 p. Sept. Index and recipe index. 17 cm. [288* ref]

• **Summary:** This is a landmark, pioneering book—indeed a classic. In addition to carefully documented information on how to reverse heart disease, it offers 100 pages of vegan recipes, including a 21-day menu. It focuses on a low-fat, low-cholesterol diet, regular moderate exercise, stopping smoking, stress management through meditation and yoga, and (ideally) a support group.

Contents: Author's note. Foreword. Introduction—Heart and soul. Part one: Opening your heart. Part two: The opening your heart program. Part three: Opening your heart recipes. Introduction to the recipes by Shirley Elizabeth

Brown, M.D., and Martha Rose Shulman. Twenty-one days of menus. The recipes. Epilogue. Appendix: Nutrient analysis of common foods. Selected references.

In the chapter titled "Introduction to the recipes" a long section on "Soybean products" gives basic information about the following: Whole soybeans, soy flour, soy milk ("It is much higher in fat, lower in vitamin B-12, and lower in calcium than nonfat cow's milk."), soy sauce, tamari, miso, soy cheeses, tempeh, textured vegetable protein (TVP), isolated soy protein, and tofu ("Tofu is a miracle food; it is very easy to digest, very high in protein, low in calories and fat, economical, and extremely versatile").

In the chapter titled "Recipes" is a long section on "Tofu Dishes," which begins with a good introduction: "Tofu is one of the most versatile foods." "Tofu is very high in protein and the perfect substitute for cheese and eggs." Eleven recipes follow: Tofu cheese with fresh herbs. Marinated tofu. Scrambled tofu and vegetables. Lydia's Mexican casserole. Tofu stew with miso. Sweet and sour wok-cooked vegetables with tofu. Chinese eggplant and tofu. Steamed fresh vegetables and tofu with soba noodles (and Misoyaki sauce). Stuffed manicotti (with Marinara sauce).

At the start of each chapter are great quotations. The 288 selected references, listed chapter by chapter at the back, are a valuable addition. As early as 1972 Dr. Ornish was learning meditation and yoga techniques from Swami Satchidananda; these evolved into the stress management program described in chapters 7-9. In 1975 he first became interested in conducting research on heart disease, when he was a medical student at Baylor College of Medicine in Houston, Texas. In 1977 he had the privilege of studying with Dr. Michael DeBakey, assisting in the operating room when he performed bypass surgery. Though his surgical skill was amazing, Ornish began to see the "limitations of technological approaches that literally and figuratively *bypassed* the underlying causes of the problem. It was the difference between temporizing and healing." Most bypass patients "would go home and continue to do the same things that led to the problem in the first place. They would smoke, eat a high-fat, high-cholesterol diet, manage stress poorly, and lead sedentary lives."

For details on this book and its significance, see MacNeil/Lehrer Newshour. 1990. Dec. Address: M.D., Preventive Medicine Research Inst., Sausalito, California 33658. Phone: 415-332-2525.

3515. **Product Name:** Aduki Rice Miso. Renamed Azuki Rice Miso in 1992.

Manufacturer's Name: South River Miso Co. Inc.

Manufacturer's Address: South River Farm, Conway, MA 01341. Phone: 413-369-4057.

Date of Introduction: 1990. October.

Ingredients: Deep well water, organically grown brown rice and aduki beans, sun-dried sea salt, koji culture.

Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 1 lb plastic tub.

How Stored: Refrigerated.

New Product-Documentation: Talk with then Label sent by Christian Elwell. 1992. March 13. He started selling this miso in Oct. 1990. Label. 3.5 by 2 inches. Black on white. Self adhesive. "100% organic ingredients. Unpasteurized. Please refrigerate." On the plastic tub is beige, with black and brown printing. A blue, brown, black, and white sticker (1 inch square) on one side says "Aduki Rice. Vintage 11/91." There is a statement about traditional miso making signed by Christian and Gaella Elwell, a recipe for everyday miso soup, and an illustration of a silhouette of a mother handing a bowl of soup to her son seated across the table. This miso contains no soybeans.

Soyfoods Center taste test. 1992. March 18. Delicious. Has a little sweet taste like finger-lickin' miso, and a non-pasteurized homemade miso flavor.

3516. Jack, Alex. 1990. Soviets embrace macrobiotics: Special report from Moscow and Leningrad. *One Peaceful World (Becket, Massachusetts)* No. 6. p. 1, 7-10. Autumn/Winter.

• **Summary:** Physicians in the USSR are using miso to try to cure radiation sickness from the Chernobyl nuclear disaster which took place on 26 April 1986 in the Ukrainian SSR.

A sidebar on page 7 titled "Miso protects against nuclear radiation" states: "Scientists in Hiroshima reported this summer that in laboratory tests mice fed miso every day were five times more resistant to radiation than those not eating miso. The research, carried out by Prof. Watanabe at Hiroshima University, is the latest data showing that macrobiotic foods can bind and eliminate radioactive material from the body." A photo shows Cary Wolf offering miso soup to people in Moscow. Address: Box 10, Becket, Massachusetts 01223. Phone: (413) 623-5742.

3517. Kudou, Shigemitsu; Tsuizaki, I.; Shimoyamada, M.; Uchida, T.; Okubo, K. 1990. Screening for microorganisms producing soybean saponin hydrolase. *Agricultural and Biological Chemistry* 54(11):3035-37. Nov. [16 ref]

• **Summary:** Soybean saponins in miso and soy sauce are decomposed during fermentation by various species of *Aspergillus* mold. Address: 1&4. Kanesa Miso Co., Ltd., 202 Hamada, Tamagawa, Aomori 030; 2,3&5. Faculty of Agriculture, Tohoku Univ., 1-1 Tsutsumitori, Amamiyama-machi, Aoba-ku, Sendai 981. All: Japan.

3518. **Product Name:** Legume Hearty Vegetarian Stew (Made with Wheat Gluten).

Manufacturer's Name: Legume, Inc.

Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.

Date of Introduction: 1990. November.

Ingredients: Potatoes, wheat gluten [whole wheat flour, water, tamari soy sauce (water, soybeans, sea salt)], carrots, tomato paste, peas, water, sweet potato puree, canola oil, celery, parsley, onions, garlic, molasses, miso (soybeans, water, sea salt), tamari soy sauce (water, soybeans, sea salt), natural flavors, vinegar, oregano, spices, sea salt.

Wt/Vol., Packaging, Price: 10 oz plastic bag (boil-in-the bag).

How Stored: Frozen.

New Product–Documentation: Talk with Gary Barat.

1990. Oct. 31. This weekend at the Natural Foods Merchandiser show in Philadelphia, Legume will introducing 7 new boil-in-the-bag products. The Hearty Vegetarian Stew (made with wheat gluten) is delicious. The gluten manufacturer is Tabachnik in New Jersey.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

3519. [Japanese in South America: Nishii Super Shoyu in Peru]. 1990. Television broadcast. Channel 26. California. Nov. 24. 7:00–7:30 P.M. 3 minutes. From Fuji TV channel 8, "Naruhodo da World," in Japan. [Jap]

• **Summary:** Nishii Shoyu, located in the Victoria district of Lima, Peru, is owned by Mr. Shinji Kawakami, age 75, the second-generation owner. The outside and inside of his shop, and the process by which he makes 5 tonnes/week of shoyu in the traditional hand-made way, are shown. He also makes miso. A close-up shows the 750 ml bottle and its colorful label, orange, blue, and green on yellow. One bottle costs the equivalent of about 300 yen. Address: Japan.

3520. Cederquist, Natalie; Levin, James. 1990. A vegetarians ecstasy: A healthy gourmet celebration of over 250 no cholesterol, no dairy, lowfat recipes devoted to long life and good taste. Glo, Inc., 2406 Fifth Ave., San Diego, CA 92101. 332 p. Dec. Illust. by Natalie Cederquist. Index. 28 cm. [13 ref]

• **Summary:** In this is innovative vegan cookbook, each recipe occupies 1 page and is accompanied by an illustration (line drawing). The glossary of ingredients mentions liquid aminos, miso, seitan, seaweeds, tamari, tempeh, and tofu. Page 28 is devoted to singing the praises of soy products. "Dairyless and eggless: With optimum health in mind, I have chosen to use soy products and egg replacer rather than dairy and eggs. Dairy is mucus forming, it contains cholesterol, fat and hormones, in addition to the pesticides and antibiotics used in the farming and dairy industry.

"Soy and seed cheeses, soy yogurts, soy cream cheese, soy sour cream, soy and rice based ice creams are delicious non-dairy products in the natural markets for you to try which are cholesterol free and low in fat."

The book contains 28 recipes for tofu, and 12 for tempeh. Other interesting recipes are: Sprouted soy salad (with 3 cups soy sprouts steamed for 3 minutes, p. 76). Orange miso dressing (p. 99). Miso soup (p. 162). Miso sesame rice (p. 206). Aduki bean and brown rice pot (p. 212). Féjoada (with soy sausages, p. 213). Mushroom seitan in wine sauce with wild rice (p. 241). Seitan sauté (p. 267). Amazake carob pudding (p. 290). Address: 2. M.D., San Diego, California. Phone: 1-800-854-2587.

3521. **Product Name:** Mellow White Miso, Brown Rice (Genmai) Miso, and Natto Miso (renamed Kickapoo Chutney in April 1995).

Manufacturer's Name: Traditional Foods Cooperative. Renamed Earth Fire Products Co. in Feb. 1994.

Manufacturer's Address: P.O. Box 92 (Corner of Grove and North Railroad Streets), Gays Mills, WI 54631. Phone: 608-735-4711.

Date of Introduction: 1990. December.

New Product–Documentation: Talk with Liz Coleman of Traditional Foods. 1991. Nov. 25. This company was started as a home business by Bob Mandel and Cindy Wiar. They now make 3 varieties of miso and seitan. Liz is the miso maker. The company is now located at P.O. Box 92 (Corner of Grove and North Railroad Streets), Gays Mills, WI 54631. Phone: 608-735-4711.

Talk with Mary Ruth of Traditional Foods. 1991. Nov. 25. Traditional Foods was started in about 1987 by Bob Mandel and Cindy Wiar. In April 1989 Traditional Foods was formally incorporated into a cooperative (a legal form of corporation in Wisconsin) with the same name, and was moved out of the home into a commercial bakery—purchased in the Aug. 1989. New people joined the group and new money was raised. Bob and Cindy became members of the cooperative (nothing was sold). In the fall of 1989 they started to make miso, beginning with a short-term (4-5 week) miso named mellow miso; it was ready for sale in late 1989. Then came a long-term brown rice (*genmai*) miso (ready last winter) and a natto miso [finger lickin' miso]—now made by Liz Coleman.

Traditional Foods now sells about 180-200 lb/month of miso. Mellow white is the best seller of the three types, but brown rice miso comes on strong in the cold months. The company sells about 35-40 lb/week of natto miso.

It is a struggle to make the business succeed. North Farm Cooperative is the major distributor for their little cop in Gays Mills, which is located several hours from Madison, Wisconsin, the headquarters of North Farm. All members of Traditional Foods are members of the local cop, which is a member of North Farm cooperative system.

Traditional Foods also buys some its raw materials from North Farm. The cooperative recently got a grant from the Presbyterian Church designed to help people in economically depressed areas to become more self-sufficient. They are using the money to buy new, larger equipment and to improve their food processing plant.

Talk with Bob Mandel. 1992. Jan. 11. He and his founding partner, Cindy, developed the natto miso—which is the first natto miso or Finger Lickin’ Miso made in the Western world. He wanted a new product so his new company could compete with established miso makers and importers. Initially he wrote William Shurtleff at Soyfoods Center to try to get a recipe for natto miso, but Shurtleff did not have one. Bob had eaten natto miso imported from Japan, so he began to experiment to try to get a similar flavor. Surprisingly soon he made a good product entirely from organic ingredients (the kombu comes from the Maine coast). It was first sold in about Feb. 1990 after they moved the business out of their home. This natto miso is made using a 3-step fermentation as follows. First make barley koji using whole, dehulled (but not pearled) barley. Then add an equal amount of soybeans, plus salt and water as if to start a mellow barley miso. Incubate at 80°F in a fairly large koji incubator for about 1 week, then take out unfinished mellow barley miso, and mix in chopped soaked kombu and gingerroot (run the kombu then the ginger through a sausage maker, with relatively large holes and a cutter blade behind it, attached to their Hobart; the resulting pellets are about 1/10th inch across). Put the mixture back in the incubator and let it ferment for another 4 weeks or so. Finally remove the mixture from the incubator, mix in sorghum molasses (made from crushed grain sorghum stalks), and package immediately in 1-lb plastic deli tubs or in bulk. The product is sold and should be stored refrigerated. The process is labor-intensive and the final product, made in batches of 35–40 pounds, wholesales for \$2.85/lb and retails for about \$3.75/lb or more.

Bob thinks the product has real potential in America. He often serves it in a spread with tahini or almond butter on a rice cake or a cracker, or just straight on a popsicle stick. He has found that many people who would not ordinarily eat miso like natto miso because of its distinctive flavor, natural sweetness, and lower salt content. Bob is not a part of the business any more but he still works at the co-op making koji for miso, and training another person to take it over from him. When he finishes this training, he and Cindy hope to continue their work with food.

Concerning the founding of the company: In the fall of 1986 he and Cindy started to make and sell tofu, seitan, and tempeh from their home in Gays Mills. The business name has always been Traditional Foods. In Dec. 1988 there was meeting called to establish a co-op. In April 1989 they incorporated as a co-operative. In Aug. 1989 they purchased a commercial bakery. The original plan was to start making

tempeh (to get initial cash flow) in the new building, and to develop a line of miso products. The first misos that were later sold started to be made in the fall of 1989. But the person who was supposed to make the tempeh was never able to—so they found themselves in a bind. Therefore in about Feb. 1990 they started to make seitan again. Real sales of the mellow miso and natto began in early 1990. The brown rice miso was not ready until the fall of 1990. To get things started, Traditional Foods sold their products to the co-ops in Madison. The co-ops asked North Farm Co-op (a natural foods wholesaler and distributor) to start distributing Traditional Foods products; North Farm became Traditional Foods’ first distributor in Feb. 1990—distributing to co-ops, other retail stores, and buying clubs. Soon Blooming Prairie was also distributing Traditional Foods’ products, especially west of the Mississippi to buying clubs. In Feb. 1990. Today the company makes seitan (packaged and in bulk) and 3 types of miso.

Talk with Cindy Wiar, founder of Traditional Foods. 1992. Jan. 12. She was unable to get large distributors like Great Eastern Sun and Mountain Ark to carry their natto miso because if that caused a drop in sales of their product imported from Mitoku in Japan, that could lead to a reduction in the volume discounts the distributors got from Mitoku. That was very frustrating to her—even though she could understand the distributors’ position. So they tried to find distributors who were not importing natto miso, and tried to educate consumers to demand the product from their retail stores. After Bob leaves the co-op, Cindy plans to get a straight job to earn money to pay for the house they are now renting. They will also do some market gardening. Eventually they want to start a non-coop traditional miso shop.

Talk with Bob Ribbens, owner of Earth Fire Products Co. (formerly Traditional Foods Cooperative). 1995. Nov. 1. The Brown Rice Miso (that is the product name on the label) was probably first available for sale in 1991, though it could have been late 1990. The natto miso was renamed Kickapoo Chutney in April 1995. Note: Kickapoo is the name of a river and a Native American tribe in southern Wisconsin. Various people outside the company criticized the company for using the word “natto” with a product that was not natto.

3522. Engel, G. 1990. Vergleich von Quark mit Sojaprodukten: Herstellung, Mikroflora, Zusammensetzung, Sensorik [Comparison of quark with soy products: Production, microflora, composition, and organoleptic properties]. *Deutsche Milchwirtschaft* 41(38):1272-75. 7 tables. Also published in *Kieler Milchtage*, 1990. [24 ref. Ger]*

• **Summary:** Compares the quality and nutritive value of cow’s milk and soymilk, and discusses criteria for evaluating the chemical, microbiological, and organoleptic

quality of tofu, okara, miso, tempeh, sufu, and other soyfoods. Address: Bundesanstalt Milchforschung, Inst. Mikrobiologie, Kiel, Germany.

3523. Horii, Masaharu; Ide, T.; Kawashima, K.; Yamamoto, T. 1990. Hypocholesterolemic activity of desalted miso in rats fed an atherogenic diet. *Nippon Shokuhin Kogyo Gakkaishi (J. of Japanese Society of Food Science and Technology)* 37(2):148-53. [19 ref. Eng; jap]

• **Summary:** "Effect of dietary miso on the cholesterol metabolism was examined in rats fed the diet containing 0.5% cholesterol and 0.15% sodium cholate. The inclusion of 20% desalted miso to the atherogenic diet significantly decreased the concentration of serum cholesterol hepatic lipid concentrations at the time of sacrifice (30 days) were in no way affected by dietary miso. The ingestion of the miso preparation doubled the fecal excretion of acidic steroids, while it increased only slightly that of neutral steroids. The dietary miso appeared to exert the potent hypocholesterolemic activity primarily through the enhancement of the catabolism of cholesterol to bile acids in rats fed an atherogenic diet." 3524. **Product Name:** [Nagatani-En Misogura Instant Miso Soup {Fresh Miso Type} (Spinach, or White Miso with Wakame)].

Foreign Name: Nagatani-En Misogura {Nama-miso taipu} (Hôrenso, Shiromiso).

Manufacturer's Name: Nagatani En.

Manufacturer's Address: Nishi-shinbashi 2-36-1, Minato-ku, Tokyo, Japan.

Date of Introduction: 1990.

Ingredients: Spinach: Packet #1: Fresh seasoned miso [chômi miso] (soybeans, rice, salt, alcohol), kombu extract, alcohol. Packet #2. Natural seasoning powder (monosodium glutamate, bonito powder, etc.), dried spinach, dried [frozen] soybean curd, dried wakame seaweed, dried wheat gluten.

Wt/Vol., Packaging, Price: 2.43 oz: Three 69-gram pairs of packets (3 servings) in a large foil pouch. Retail for \$2.25 (1/91, California).

How Stored: Shelf stable.

New Product-Documentation: Product with Label purchased at Diablo Foods, Walnut Creek, California. 1991. Jan. 17. 6 by 8.25 inches. Black, brown, red, blue, and white on light blue. Color photo of a wooden bowl of miso soup on front panel. Color illustration of a traditional Japanese treasure house and a nearby house with overhanging

wooden eaves. To prepare, place the contents of each of a pair of foil packets in a soup bowl, add 1¼ cup boiling water, mix well, cover with a lid, and allow to stand for 3-4 minutes. Nagatani-En is an old and very famous Japanese company. Their main business has always been making ochazuke mix.

Soyfoods Center product evaluation. Very nice flavor for an instant miso soup; lots of wakame. Excellent package design. But certain ingredients on the Japanese label are not listed on the English label (e.g. bonito flakes).

3525. *Nippon Shokuhin Kogyo Gakkaishi (J. of Japanese Society of Food Science and Technology)*. 1990. Miso. 37:203-13. [Eng; jap]*

3526. **Product Name:** [Sobo fix Soya & Three-Grain Soup].

Foreign Name: Sobo fix Soja-Dreikorn-Suppe.

Manufacturer's Name: Sobo Naturkost.

Manufacturer's Address: Goltsteinstr. 43a, D-5000 Cologne 51, West Germany.

Date of Introduction: 1990.

Ingredients: Spelt (Dinkel; German wheat)*, soy flakes*, rye*, wheat*, yeast extract, sea salt, miso, onions*, parsley roots (Petersilienwurzeln)*, parsnips*, carrots*, celery*, herbs.* * = Organically grown.

Wt/Vol., Packaging, Price: 0.75 liters.

How Stored: Shelf stable.

New Product-Documentation: Label sent by Anthony Marrese. 1990. Dec. 12. 5 by 5.75 by 1 inch. Brown, orange, blue, and red on pastel green and white. Dry mix in a cellophane bag inside a paperboard box. "Can be prepared quickly. Makes three bowls of soup." Logo is a little bean with a smiling face, arms, and legs.

3527. **Product Name:** [Sobo fix Soya & Three-Grain Souffle].

Foreign Name: Sobo fix Soja-Dreikorn-Auflauf.

Manufacturer's Name: Sobo Naturkost.

Manufacturer's Address: Goltsteinstr. 43a, D-5000 Cologne 51, West Germany.

Date of Introduction: 1990.

Ingredients: Spelt (Dinkel; German wheat)*, rye*, soy flakes*, wheat*, potato starch, carrots*, yeast extract, sea salt, miso, celery*, corn*, parsley roots (Petersilienwurzeln)*, herbs*, spices. * = Organically grown.

Wt/Vol., Packaging, Price: 150 gm. Makes 2.

How Stored: Shelf stable.

New Product-Documentation: Label sent by Anthony Marrese. 1990. Dec. 12. 5 by 5.75 by 1 inch. Brown, orange, pink, and white on pastel blue and yellow. Dry mix in a cellophane bag inside a paperboard box. "Can be

prepared quickly. Makes 203 portions.” Logo is a little bean with a smiling face, arms, and legs.

3528. Product Name: [Viana Miso-Cucumber Spread].

Foreign Name: Viana Miso-Kuerbis Pastete.

Manufacturer’s Name: Viana Naturkost GmbH.

Manufacturer’s Address: Schmittenstr. 106, D-5030 Huerth 6, West Germany. Phone: (02233) 41323.

Date of Introduction: 1990.

Ingredients: Cucumber*, miso*, celery*, onions*, sesame seeds*, vegetable oil*, spices*, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 200 gm.

New Product–Documentation: Talk with Bernd Drosihn, founder of Viana. 1990. April 7. His company is now making 2 short-term misos, plus a miso spread. He started to sell these 6 weeks ago and they are selling well.

Label sent by Bernd Drosihn. 1990. April 8. 4.75 by 1.5 inches. Self adhesive. Reddish-purple, black, brownish gold, and light purple. “A spicy spread for bread.”

3529. Product Name: [Viana Soy & Rice Miso].

Foreign Name: Viana Soya-Reis Miso.

Manufacturer’s Name: Viana Naturkost GmbH.

Manufacturer’s Address: Schmittenstr. 106, D-5030 Huerth 6, West Germany. Phone: (02233) 41323.

Date of Introduction: 1990.

Ingredients: Soybeans*, rice*, koji. * = Organically grown.

How Stored: Refrigerated.

New Product–Documentation: Talk with Bernd Drosihn, founder of Viana. 1990. April 7. His company is now making 2 short-term misos, plus a miso spread. He started to sell these 6 weeks ago and they are selling well.

Label sent by Bernd Drosihn. 1990. April 8. 3.5 by 3 inches. Self adhesive. Reddish-purple, black, brownish gold, and pea green. Dot matrix printed.

3530. Product Name: Westbrae Natural Ramen Express (Instant Steamed Ramen Noodles in a Cup) [Oriental Vegetable, Golden Chinese Style, Savory Szechuan Style].

Manufacturer’s Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer’s Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990.

Ingredients: Oriental Vegetable: Noodle pasta: Whole wheat flour, sifted wheat flour (sufficient for processing), sea salt. Seasoning packet: Natural flavors, miso* (soybeans, rice, salt), soy sauce powder (soybeans, wheat, salt), corn*, green beans*, peas*, onions*, carrots*, garlic*, spices, xanthan gum (vegetable gum), parsley*. * = Dried.

Wt/Vol., Packaging, Price: 1.1 oz (31 gm) paper cup with peel-off paper lid. Retail for \$1.29 at Open Sesame (2/91,

Lafayette, California).

How Stored: Shelf stable.

Nutrition: 1.1 oz (10 fl. oz as prepared): Calories 120, protein 4 gm, carbohydrate 22 gm, fat 1 gm, % calories from fat 7, cholesterol 0 mg, sodium 745 mg, potassium 165 mg, dietary fiber 1.5 gm.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 3.5 inch diameter at mouth by 3 inches high. Paper cup. Red, black, green, and gold on white. On lid: “Westbrae Natural meals in minutes.” On side: “Low fat. No cholesterol. Recyclable. No hydrolyzed vegetable protein. Directions: 1. Fold lid back halfway. Empty seasoning packet into cup. 2. Add boiling water to ½ inch from top, stir well and re-cover with lid. Let stand 3-5 minutes. 3. Remove lid, stir and enjoy! Microwave: Boil water in separate container, then follow directions above. Savory broth with real ramen noodles, gently steamed, not fried, so there’s only 1 gram of fat. Enjoy a delicious satisfying meal in minutes!” Soyfoods Center product evaluation. Taste: very nice. The miso enriches the flavor of the broth. We like the environmentally friendly paper cup much better than the typical Styrofoam cup, and the paper seasoning packet better than its common foil counterpart. The package design is so-so. A counterpart product sold in supermarkets retails for about \$0.89 for 2.5 oz (with \$0.25 discount coupon) or \$0.356/oz. The Westbrae product sells for \$1.17/oz. or 3.3 times as much.

3531. Product Name: Westbrae Natural Fresh Miso (Instant Soup) [Mushroom, Snow Pea & Ginger, Green Bean & Sesame].

Manufacturer’s Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer’s Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990.

Ingredients: Mushroom: Noodle pasta: Whole wheat flour. Miso packet: Miso (soybeans, brown rice, water, sea salt), mushroom soup stock (shoyu, mirin, shiitake mushrooms, kombu), barley malt, spices, onion*, xanthan gum (vegetable gum). Spice packet: Honey powder, soy sauce powder (soybeans, wheat, salt), garlic*, natural flavor, onion*, mushrooms*, green onion*, spice. * = Dried.

Wt/Vol., Packaging, Price: 0.9 oz (25 gm) paper cup with peel-off paper lid. Retail for \$2.39 at Open Sesame (2/91, Lafayette, California).

How Stored: Shelf stable.

Nutrition: 0.9 oz (10 fl. oz as prepared): Calories 80, protein 3 gm, carbohydrate 14 gm, fat 1 gm, % calories from fat 11, cholesterol 0 mg, sodium 730 mg, potassium 125 mg, dietary fiber 2 gm.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1991.

Feb. 16. 3.5 inch diameter at mouth by 3 inches high. Paper cup. Mushroom: Reddish brown, orange, blue, and yellow on white. On lid: "Westbrae Natural meals in minutes." On side: "Low fat. No cholesterol. Recyclable. Directions: 1. Fold lid back halfway. Empty fresh miso packet and spice packet into cup. 2. Add boiling water to ½ inch from top, stir well and re-cover with lid. Let stand 3-5 minutes. 3. Remove lid, stir and enjoy! Microwave: Boil water in separate container, then follow directions above. Delicious fresh miso soup, ready in minutes. Made with brown rice miso, fresh not dehydrated, for a deep, rich flavor. Delicately seasoned, with a sprinkling of tender noodles. A light, nutritious on-the-go soup."

3532. **Product Name:** Westbrae Natural Noodles Anytime! (Instant Soup) [French Onion, Country Style, Garden Tomato].

Manufacturer's Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer's Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990.

Ingredients: French Onion: Noodle pasta: Whole wheat flour. Seasoning packet: Onion*, honey powder, natural flavors, salt, Parmesan cheese (part-skim milk, cheese culture, salt, enzymes), garlic*, whey*, miso (soybeans, rice, salt), buttermilk*, spices, parsley*, xanthan gum (vegetable gum). * = Dried.

Wt/Vol., Packaging, Price: 1.4 oz (39 gm) paper cup with peel-off paper lid. Retail for \$1.29 at Open Sesame (2/91, Lafayette, California).

How Stored: Shelf stable.

Nutrition: 1.4 oz (10 fl. oz as prepared): Calories 140, protein 5 gm, carbohydrate 26 gm, fat 1 gm, % calories from fat 8, cholesterol 0 mg, sodium 800 mg, potassium 240 mg, dietary fiber 3.5 gm.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 3.5 inch diameter at mouth by 3 inches high. Paper cup. French onion: Blue, red, green, and yellow on white. On lid: "Westbrae Natural meals in minutes." On side: "Low fat. Whole grain noodles. No cholesterol. Recyclable. Directions: 1. Fold lid back halfway. Empty seasoning packet into cup. 2. Add boiling water to ½ inch from top, stir well and re-cover with lid. Let stand 3-5 minutes. 3. Remove lid, stir and enjoy! Microwave: Boil water in separate container, then follow directions above. Tender, satisfying whole grain noodles in a tasty all natural broth. Just 1 gram of fat. No cholesterol. A quick nutritious meal... anytime!"

3533. Facciola, Stephen. 1990. *Cornucopia: A source book of edible plants*. Vista, California: Kampong Publications. ix + 678 p. Indexes (six!). 28 cm. [522* ref]

• **Summary:** "In your hands is one of the most remarkable efforts to come out of the struggle to preserve the genetic diversity of our planet... Steve Facciola has put together an easy-to-understand, easy-to-use compendium of the diversity of food plants available to consumer, gardener and scientist" (from the Preface). The largest and most comprehensive work of its kind, this book gives details on 3,000 edible plant species and 7,000 varieties.

Contents: Preface, by Noel Vietmeyer. Introduction. Acknowledgements. Botanical listings: Alphabetical listings of plant families (*Glycine max* and *Glycine tabacina* are listed in the family Fabaceae, pronounced fuh-BAY-see), fungi families, algae families, bacteria families. Cultivar listings (by common name for the most important and popular crops, e.g., shiitake, soybean, spinach, sprouting seeds). Sources (names, addresses and phone numbers of firms that sell seeds, plants, etc.: Domestic commercial, domestic non-commercial, overseas commercial, overseas non-commercial). Bibliography. Indices and appendixes: Index of principal vernacular names. Index of vernacular and other names occurring elsewhere in the text. Index of usage and edible parts. Index of species native to or naturalized in North America. Index of species not listed in Kunkel [Gunther Kunkel. 1984. *Plants for human consumption*. Koeltz Scientific Books, Germany]. Index of families and genera. Appendix A: Abbreviations used—For type of product offered, for annotated bibliographical citations, in descriptions for sources. Appendix B: Endnotes used in the cultivar listings.

As of Aug. 1994 an electronic version of this book is now available. It runs on Microsoft Windows and uses more than 25,000 hypertext links to cross reference information.

The main information on soybeans is found on pages 91 (Botanical listings for *Glycine max* and *Glycine tabacina*), p. 219 (*Aspergillus oryzae* culture), p. 221 (*Actinomucor elegans* culture for fermented tofu or sufu, and *Rhizopus* cultures for tempeh), p. 224 (*Bacillus subtilis* culture for natto), p. 482-83 (for "field soybeans," lists 5 black-skinned cultivars, and 7 yellow-skinned cultivars; plus 11 "vegetable soybeans"—Agate, Butterbeans, Envy, Extra Early, Fiskeby V, Hahto, Hakucho Early, Kanrich, Okuhara Early Green, Prize, and White Lion), p. 485-87 (sprouting seeds including soybean sprouts with directions for sprouting), and p. 500 (Soyfood cultures).

Additional information on food uses of soybeans is found throughout the book. Tofu: p. 9 (In Indonesia, a salt derived from the fruit of *Rhus javanica* (*Nurude*, *Mu-yen*) is used to coagulate tofu), p. 61 (In Japan the seeds of *Cannabis sativa*, called *asanomi*, are used in deep-fried tofu burgers (*ganmodoki*)), p. 76 (A vegetable curd similar to soybean tofu can be made from the seeds of the bottle gourd or calabash (*Lagenaria siceraria*)), p. 92 (The seeds of the Bonavista bean or hyacinth bean (*Lablab purpureus*) can be prepared as tofu), p. 127 (The seeds of okra, gumbo, or

lady's finger (*Abelmoschus esculentus*) can be made into tofu or tempeh). Kecap (Indonesian soy sauce): p. 9 (In Indonesia, the plant tuberose (*Polianthes tuberosa*) is added to the substrate in making kecap), p. 191 (In Indonesia, fresh leaves of kaffir lime, also called ichang lime, makrut, or djeruk purut (*Citrus hystrix*) are used to flavor kecap). Miso: The following can be used as a substrate for miso—p. 88 (Peanuts), p. 94 (seeds of the velvet bean, also called cowitch, cowhage, benguk (*Mucuna pruriens*)), p. 155 (barley (*Hordeum vulgare*)), p. 156 (proso millet (*Panicum miliaceum*)). Address: 1870 Sunrise Dr., Vista, California 92084. Phone: (619) 726-0990.

3534. Finnegan, John; Cituk, Kathy. 1990. Amazake rice beverage. Celestial Arts, P.O. Box 7327, Berkeley, CA 94707. 80 p. No index. 21 cm. [80 ref]

• **Summary:** Contents: History and development. Making amazake. Complementary foods, spices and herbs. Why use amazake? Rice. Koji. Almond amazake. Nutritional analysis. Makers of amazake. Amazake kefir-yogurt. Amazake as a baby food (with Bifidus and *Streptococcus faecium*). Milk substitutes. The future of amazake. Recipes (29 recipes, including variations). About the ingredients (incl. miso) Appendixes: I. About aseptic packaging. II. Sources of amazake and koji. Bibliography. Glossary.

Note: This book contains extensive information from the book *Amazake and Amazake Frozen Desserts: Industry and Market in North America*, by Shurtleff and Aoyagi (Soyfoods Center, 1988), used without acknowledgment or permission. Except for the chapters on "Recipes," and "Amazake as a baby food," it contains almost no new research or information.

Talk with Benjamin Hills. 1991. Sept. 18. This book reads like an advertisement for amazake. Grainaissance was originally thinking of hiring John Finnegan to write a book on amazake, but they decided to withdraw from the deal, so he went ahead and did it on his own.

Talk with Celestial Arts. 1991. Sept. 27. John Finnegan used to be the head of Elysian Arts, 20 Sunnyside Ave. Suite A161, Mill Valley, CA 94941. He now resides in Santa Monica, California. The book has sold about 800 copies to date.

Note: This is the earliest English-language document seen that uses the term "rice beverage" to refer to amazake and related products. Address: Santa Monica, California. Phone: 415-389-8925.

3535. Heiser, Charles B., Jr. 1990. Seed to civilization: The story of food. New ed. Cambridge, Massachusetts: Harvard University Press. vi + 228 p. Illust. Index. 24 cm. [83* ref]

• **Summary:** An outstanding work, written for the general reader. "This is a classic book about the origins of agriculture and the influence of its discovery on the

development of civilization"—Ghilleen T. Prance, Director of the Royal Botanic Gardens [England; on rear cover].

The Preface notes that this is a book about the plants (and animals) that stand between humans and starvation. The main subjects are ethnobiology, the study of plants and animals in relation to humans, and ecology, the study of organisms in relation to their environment. We humans "get all of our carbohydrates and nearly three-fourths of our protein from plant sources. Moreover, nearly all of the food we get from animals is in turn derived from plants. After all, life depends on photosynthesis; chlorophyll has been referred to as the green blood of the earth."

Table 5-1, "Estimated production of world's 32 major food crops" (p. 63) lists the top ten as (* = member of grass family; units in million metric tons): Sugar cane* 932. Wheat* 536. Corn* 481. Rice* 476. Potato 309. Sugar beet 286. Barley* 180. Manioc 137. Sweet potato 110. Soybean 95. Source: *FAO Production Yearbook*, 1986.

Chapter 7, "Legumes: The meat of the poor," contains a section on "Soybeans" (p. 129-33). It notes that there are no archaeological records of the soybean to help us determine when it was first cultivated, but it was mentioned in Chinese literature before 1000 B.C. Unlike most legumes, the beans are seldom eaten directly, but are used to make many different foods including bean sprouts, miso, tofu, soymilk (such as Vitasoy), tempeh, and soy sauce.

"The widespread cultivation and utilization of soybeans in the United States in the space of a few decades must be one of the most spectacular success stories in the recent history of agriculture."

Photos show: (1) A field of soybeans in the USA planted in rows, free of weeds. (2) Soybean plants ready for harvesting. (3) Soybean seeds. (4) A John Deere combine harvesting soybeans.

Note: Previous editions of this book were copyrighted in 1973 and 1981. Also discusses: Peanuts (p. 126-29). Potatoes and their remarkable history (p. 134-39). Tomatoes and their unusual history (p. 181, 206). Address: Distinguished Prof. Emeritus of Botany, Indiana Univ.

3536. Hesseltine, C.W. 1990. UJNR panel on toxic microorganisms. In: Albert E. Pohland, V.R. Dowell, Jr., and J.L. Richard, eds. 1990. *Microbial Toxins in Foods and Feeds: Cellular and Molecular Modes of Action*. New York: Plenum Press. xvii + 617 p. See p. 1-15. From a Symposium on Cellular and Molecular Mode of Action of Selected Microbial Toxins in Foods and Foods. Held 1988. Illust. 26 cm.

• **Summary:** The UJNR (United States–Japan Cooperative Program on Natural Resources) was established in May 1964. There were 7 original panels, one of which was Toxic Microorganisms. The initial emphasis was on botulism, soon followed by aflatoxins. The Panel consisted of 7 Japanese and 7 Americans; they comprised a mix a people

who were experts on fungal mycotoxins and bacterial toxins. The Panel conducted many activities including joint panel meetings and study tours, exchange of mutual interest items, publication of 6 books, symposia, development of regulations, and interaction with other societies.

The 1966 study tours in Japan were longer than usual because of the review of 4 projects supported by the USA involving the use of soybeans in foods. These 1966 tours included visits to the following Japanese organizations working with soybeans: (1) Universities: Nagoya Univ. (Mycotoxins and soybean fermentations), Tohoku Univ., Faculty of Agriculture (Miso fermentation), Kyoto Univ. (Fermented soybean foods), and Tokyo Univ. of Education (Soybean cheese). (2) Japanese government laboratories: Noda Institute of Research, Chiba (Shoyu fermentation), Institute for fermentation, Osaka (Culture collection and fermentation in General).

(3) Trade association laboratories (each in Tokyo): Japanese Tofu Assoc., Japanese Shoyu Institute, Central Miso Institute. (4) Companies: Sendai Miso Shoyu Co., Sendai (Miso production), Koji Sanzaemon Roho, Kyoto (Koji starter production), Takeda Chemical Industry, Osaka (Antibiotic & flavor fermentations), Kikkoman Shoyu Co., Chiba (Shoyu production).

Talk with Dr. Walter Wolf of Peoria, Illinois. 2000. Aug. 14. He was on the UJNR Protein Panel, which met for about 10-12 years, on alternating years in Japan and the USA. Thus he went to Japan 5-6 times—the last time being in about 1988. The purpose of the panel was exchange of information about protein. They met with their counterparts at the NFRI (National Food Research Institute, Tsukuba). At a typical meeting there would be formal presentations by members of both teams, followed by a field trip to numerous facilities. Address: NRRC, Peoria, Illinois.

3537. Moosewood Collective (The). 1990. Sundays at Moosewood Restaurant: Ethnic and regional recipes from the cooks at the legendary restaurant. New York, NY: Simon & Schuster. 734 p. Illust. Index. 24 cm. A Fireside Book. [55* ref]

• **Summary:** Since it opened in 1973 in Ithaca, New York, Moosewood Restaurant has become famous for its creative semi-vegetarian cuisine (fish are included on the menu and in this book) with a healthful emphasis. The restaurant is run by a group of 18 women and men, most of whom have worked together for nearly 10 years. Major decisions are made collectively. This is the Collective's second vegetarian cookbook. Each section, corresponding to the cuisine of 17 different geographical regions (e.g. Eastern Europe, Japan) and one ethnic group (Jewish) is written by a different member of the collective. The book contains many soy-related recipes: Tofu (20 recipes), tempeh (1), miso (1), soybeans (1), tamari roasted nuts (1), etc. The extensive "Guide to ingredients, techniques, and equipment" (p. 649-

87) describes: Beans (incl. soy), chick pea flour (besan flour), dashi, Hoisin sauce, miso, seitan, soy sauce (see tamari soy sauce), light soy sauce, tempeh, tofu, vegetable oil (incl. soy oil), Worcestershire sauce ("The formula remains a well-guarded secret, but we do know that the Lea and Perrins product contains molasses, anchovies or sardines, sugar, garlic, tamarind, soy sauce, vinegar and spices"). Address: Ithaca, New York.

3538. Morningstar, Amadea; Desai, Urmila. 1990. The ayurvedic cookbook: A personalized guide to good nutrition and health. Santa Fe, New Mexico: Lotus Press. 351 p. Foreword by Yogi Amrit Desai. Introduction by Dr. David Frawley. Illust. by Amadea Morningstar. Index. 23 cm. [40 ref]

• **Summary:** This is a lacto-ovo vegetarian cookbook based on Ayurvedic principles. Contents: Part I: General Information. History of Ayurveda. Nutrition from an Ayurvedic perspective. Discovering your constitution. Attributes and nutritional needs of each constitution. How to imbalance your constitution. Understanding Ayurvedic nutrition: Taste. Digestion. Food combining and preparation. Balancing *Agni*. The digestive organs. The *chakras* and dietary change. Eating with the seasons. Getting ready to cook. Planning balanced meals easily. Menus: *Tridoshic*, *Vata*, *Pitta*, *Kapha*. Part II: Recipes. Part III: Appendices. 1. Most frequently asked questions and answers. 2. Enlarged food guidelines for basic constitutional types (many soyfoods are included). 3. Some basic information about nutrients. 4. Glossary of English and Sanskrit terms. 5. Food name equivalents in Latin, Sanskrit, Hindi. 6. Bibliography. About the authors (autobiographical).

The three *Vatas* (tridosha, three doshas, constitutional or body types) are *Vata* (pure air, head/wisdom), *Pitta* (pure fire, action), and *Kapha* (pure water, love/heart). *Tridoshic* foods or herbs are suited to all 3 constitutions; these include ghee, basmati rice, and asparagus. Concerning soya: "Many *Vatas* handle certain well-spiced soy products well, like tofu or liquid soy milk. Some do not. Let your gut be your guide. Dairy is very calming to *Vata*, especially when it is warm" (p. 14).

"*Pittas* are often attracted to high-protein foods, and do seem to need a little more protein than other constitutions. Goat milk, cow milk, egg white souffles, tofu, tempeh, and the aforementioned cottage cheese are all effective in balancing *Pitta*. Most beans—with the exception of heating lentils—are excellent" (p. 16).

Anything which stimulates elimination tends to relieve *Kapha* (barley and beans being classic examples). *Aduki* beans are especially good, as are black turtle beans, though the latter are more difficult to digest. Soy beans and soy products are recommended less frequently. Over half of tofu's calories come from fat, surprisingly, while only 4% of

black beans' do. Still, soy products like soy milk tend to be less Kapha-enhancing than dairy products" (p. 19).

"Examples of oily food include ghee, vegetable oils, animal fats, soybeans, many vegetables and citrus. Dry foods include corn, buckwheat, rye, millet, most beans and dark leafy greens, to list a few. These latter foods will need moistening of some sort to be more easily digested by most people" (p. 28).

In the menu section, under each constitutional type (dosha, such as Vata), recommended menus are given by season for each meal. For example, soy-related foods included in Vata menus are: Summer: None. Fall: Dinner—Miso tofu, Amasake. Winter: None. Quick day: Breakfast—soymilk. Beverage—Amasake. Weekend day: Nothing. One the road (when travelling): Dinner' Chinese vegetables and rice (with tofu, if well tolerated).

Each recipe in the recipe section tells which constitution type it suits, how long it takes to prepare, in what seasons it is most healing, and how many it serves. For example,—Vata means that it calms Vata, + Vata means that it aggravates or increases Vata, and 0 Vata means that it is neutral for Vata. For brevity, we will give only Vata examples in the following. Soy-related recipes: About tofu (p. 102): Tofu and liquid soy milk tend to be cool and heavy, yet oilier than most other bean products. This oily lubricating quality helps their digestion, as does the pre-processing they have undergone as legumes... Eaten in excess, they will increase *Kapha*. Warming preparation, in the form of heat or warming spices such as ginger, tamari, cumin, turmeric, cinnamon or mustard seeds, aid their healthy breakdown in the system. Beans can be idiosyncratic in effect though; if your experience doesn't match the descriptions given here, trust your direct experience first. Some people have a hard time digesting tofu in almost any form; an allergy to soy may be present. It was popular in the sixties and seventies to serve tofu cold, cubed and plain at health food-type salad bars. This is about the most difficult way to try to consume an already chilling food. Try tofu marinated, spiced and cooked, then make up your mind about its digestibility for you."

Miso tofu (p. 102,—Vata). Tofu mushrooms (p. 104,—Vata). Tofu pesto (p. 104,—Vata). Sauteed tofu and vegetables (p. 105,—Vata, but mildly + Vata with frozen tofu). East Indian lima beans (with tofu, p. 114). Spicy rice and yogurt (with soy milk, p. 131,—Vata; "Made with soy milk, which is lighter and cooler than yogurt, it is suitable for Pitta and Kapha as well"). Vegetable barley soup (with tofu, p. 188, 0 Vata).

About oils (p. 202-03): "Ghee is the highly preferred fat in Ayurveda, being light, easy to digest and potentiating to many of the foods with which it is served." Sunflower oil is the next best choice, being agreeable to all doshas. "Sesame oil is specifically recommended when a warming effect is needed. It grounds Vata... The vast majority of oils are

warming and heavy in quality, including..." soy oil.

"Margarine is cold and difficult to digest and not often recommended by Ayurvedic physicians."

About condiments: Salt, tamari, miso, and pickled ginger all heat up a meal and stimulate agni (fire). A detailed discussion is given of the medicinal function of sea vegetables in Ayurveda (p. 216-17).

About soy milk: Liquid soy milk can be a good alternative to cow's milk, if you are sensitive to the latter. It is also less *Kaphagenic* (imbalancing to *Kapha*) than cow's milk, when properly prepared. Lighter than cow's milk in its effect on the body, it cooks up easily in recipes. Like most high protein foods it promotes building, not cleansing. It is best used in restorative and maintenance programs. It can be warmed with cinnamon, cardamom, nutmeg or ginger and black pepper. Some *Vatas* do not tolerate it well. Dried soy milk powder and soy protein powder are much more difficult to digest than the whole liquid soy milks. Only the most stalwart *Pitta* is likely to be able to consume them without gas, as they are cold, heavy and dry. Whole soybeans and tempeh are often gas-producing as well. For adequate digestion they require much cooking and spicing, good *agni*, and a *Pitta* constitution. Hot soy milk (p. 264).

Scrambled tofu (p. 281,—Vata).

In appendix II (p. 293). The following legumes, in moderation, calm Vata: Aduki beans, soy cheese, soy milk (liquid), tofu, black lentils, mung beans, red lentils, and tepery beans. But these aggravate Vata: Soy beans, soy flour, soy powder, tempeh, garbanzos and most other beans. Among beverages, icy cold drinks and many others aggravate Vata. Beverages that calm Vata are soy milk (well spiced and hot), miso broth, many herb teas. Tofu is calming to Pitta and mildly aggravating to Kapha. Cool in action, some *Vatas* tolerate it well, others do not.

Aduki beans are mentioned on p. 19, 106, 109, 116, 124, 293, 306. Address: 1. Faculty member, The Ayurvedic Inst., Albuquerque, New Mexico; 2. Wife of Yogi Amrit Desai, member of Kirpalu Center for Yoga and Health, Lenox, Massachusetts.

3539. Wagner, Lindsay; Spade, Ariane. 1990. The high road to health: A vegetarian cookbook. New York, NY: Simon & Schuster / Prentice Hall Press. xv + 288 p. Foreword by E. Lee Rice. Index. 24 cm. [54 ref]

• **Summary:** Lindsay Wagner, whose lovely color photo appears on the cover, first achieved widespread television in the early 1970s as "The Bionic Woman." Recently she starred in the Academy-Award winning film *The Paper Chase*. This vegan cookbook uses no meat, dairy products, or eggs. A section titled "Raising the Dairy Question" (p. 13) discusses problems with milk and concludes: "A terrific substitute for milk products comes from that little marvel, the soy bean. Soy milk has the look and consistency of milk, and some brands even taste like it. Try some on your

breakfast cereal, top your pies with our creamless Whipped Cream, spread your sandwiches with eggless Mayo Spread and enjoy Huevos-less Rancheros for brunch. You'll never look at another carton of milk."

Chapter 4, "About the ingredients," includes discussions of Braggs Aminos, cold-pressed oil, kuzu, lecithin, miso, mochi, nori, soy milk, soy sauce, tempeh, tofu. Soy-related recipes include: Huevo-less rancheros (with tofu and soy milk, p. 65). Vegetarian "salami" (with firm tofu, p. 82-83). Mayo spread II (with soy milk, p. 88). Ginger tamari dressing (p. 131). Creamy oil substitute (with soy milk, p. 134). Tofu sour cream (p. 134). Eden cheesy sauce (with soy milk, p. 136).

Chapter 10 (p. 141-59) is titled "Entrées for the meat lover"; most of the recipes are based on soyfoods: Marinated tempeh (p. 141). Marinated tofu. Barbecued tofu or tempeh. Tempeh marinade. Teriyaki tofu. Polynesian tofu. Tofu piquant. Tofu ribs. Grilled tofu with summer vegetables. Japanese eggplant and tofu Romano. Pecan herb loaf (with tofu and soy flour). Easy tofu burgers. Easy easy burgers (with Marinated tempeh or tofu). New Age Italian sausage I (with Marinated tempeh and Marinated tofu). New Age Italian sausage II (with Marinated tofu). Spicy tempeh stir fry. Tofu cacciatore.

Lasagna with zucchini and mushrooms (in Light sauce with soy milk, p. 166). Manicotti stuffed with zucchini and tofu cheese (p. 175). Tacos (with Marinated tofu and tempeh, p. 187). Eggplant al forno (with tofu, p. 213). Banana-strawberry tofu pudding (p. 231). Italian cheesecake (with tofu, p. 243). Coconut-mocha cream frosting (with soy milk, p. 260). Tofu fruit sauce (p. 261). Mock whipped cream (with soy milk, p. 262).

An interesting last chapter titled "Afterword: Meat—We can live without it! Here's why" discusses the role of an "animal-based diet" on destruction of the environment. Address: 1. California; 2. Woodland Hills, California.

3540. Zeffertt, Wendy. 1990. Cultured foods. Gentian Services, P.O. Box 2140, Olympic Valley, CA 95730. 151 p. Illust. by Nancet Zeffertt. Index and recipe index. 28 cm. Spiral bound. [32 ref]

• **Summary:** This book is a good introduction to the many kinds and benefits of cultured or fermented foods. Many chapters (and all soyfoods chapters) contain recipes. Chapters related to soyfoods are 1. Why cultured foods? 2. Cultured dairy products. 3. Miso. 4. Tamari and shoyu (soy sauce). 5. Amazake, sake and mirin. 6. Tempeh. Where to order starter cultures. Glossary.

Note: This is not a vegetarian book; poultry and fish are used in some of the recipes. Address: Olympic Valley, California.

3541. Fantastic Foods, Inc. 1991. Add some character to a quick lunch (Ad). *Health Foods Business*. Jan. p. 40 (A-B).

• **Summary:** The front side of the glossy full-page ad shows a girl smiling behind 7 different "Fantastic Meals in a Cup." The text begins: "Who says a healthy vegetarian lunch can't have a smile in it?" On the back, the ingredients in each of 6 products are listed. Cha-Ca Chili contains textured vegetable protein. All-O-Round Spaghetti contains "soy sauce powder (soybeans, wheat, salt)." Splittin' Peas contains "miso and soy sauce powder (soybeans, rice, wheat, salt)." Leapin Lentils over Couscous contains "miso powder (soybeans, salt)." And Rockin' A B C's contains "miso powder (soybeans, rice, salt)." Address: California.

3542. **Product Name:** Fantastic Cha-Cha Chili, All-O-Round Spaghetti, Splittin' Peas, Leapin' Lentils Over Couscous, Rockin' ABC's.

Manufacturer's Name: Fantastic Foods.

Manufacturer's Address: 106 Galli Dr., Novato, CA 94949. Phone: 415-883-7718.

Date of Introduction: 1991. January.

Ingredients: See below.

Wt/Vol., Packaging, Price: 2 oz (56 gm) paper cup.

How Stored: Shelf stable.

New Product—Documentation: Ad (full page color) in *Health Foods Business*. 1991. Jan. p. 40A-B, and in *Whole Foods*. 1991. Feb. p. 27. "Add some character to a quick lunch." The label of each cup is clearly visible. Ingredients: Fantastic Cha-Cha Chili uses textured vegetable protein as the second ingredient. Fantastic All-O-Round Spaghetti is seasoned with soy sauce powder. Fantastic Splittin' Peas is seasoned with miso and soy sauce powder. Fantastic Leapin' Lentils Over Couscous is seasoned with miso powder. Fantastic Rockin' ABC's is seasoned with miso powder. All the products are low in fat. Just add hot water and serve. Same ad in *Natural Foods Merchandiser*. 1991. Jan. p. 25 (insert).

3543. Fowler Brothers. 1991. Catalog: January 1991. P.O. Box 2324, San Rafael, CA 94912. 79 p. 28 cm.

• **Summary:** The company is a "distributor of natural foods." The following makers, distributors, and brands of soyfood products are listed: I. Bulk Products: Miso (American Miso, 8 products), Soy foods (Turtle Island tempeh and Soy Deli tofu burger). Soy Sauce & tamari (San-J domestic shoyu and tamari, Westbrae Johsen shoyu), Tofu (Quong Hop, 6 products).

II. Packaged products: Ah Soy (Westbrae, 7 soy drinks), Eden Foods (Edensoy, 6 soy drinks), Pacific Soyfoods (6 types of soysage), Pacific Tempeh (4 products), Quong Hop (11 soymilk and 4 tofu products), San-J (tamari crackers, 14 soy sauce & tamari products), Soy Deli (Quong Hop, 5 soy foods, 8 vacuum pack tofu), Sweet Earth (3 vegburgers), Turtle Island (10 tempeh products), Vitasoy (7 soy drinks), Westbrae (2 instant miso soups, 14 soy drinks, 14 types of

soy sauce and tamari). Address: San Rafael, California.
Phone: 415-459-3406.

3544. Kudou, Shigemitsu; Tsuizaki, I.; Uchida, T.; Okubo, K. 1991. Purification and some properties of soybean saponin hydrolase from *Aspergillus oryzae* KO-2. *Agricultural and Biological Chemistry* 55(1):31-36. Jan. [51 ref]
Address: 1&3. Kanesa Miso Co., Ltd., 202 Hamada, Tamagawa, Aomori 030; 2. Faculty of Agriculture, Tohoku Univ., 1-1- Tsutsumitori Amamiya-machi, Aoba-ku, Sendai 981. All: Japan.

3545. Miyazawa, Mitsuo. 1991. [Re: Early shipments of miso and shoyu from Sendai Miso Shoyu Co. Ltd. to Mitoku]. Letter to Chris Dawson of Mitoku, Feb. 22. Based on a request from William Shurtleff at Soyfoods Center. 1 p. [Jap]

• **Summary:** “In Oct. 1970 Jōsen Shōyu was shipped in 18 liter cans, and red (rice) miso was shipped in 20 kg cans.

“In March 1976 brown rice miso was shipped in 20 kg cans. According to our research, these were the earliest dates that each of these products was shipped.”

Chris Dawson adds: “I understand that Johsen was the first with brown rice miso, so this must be the first shipment ever of brown rice miso... I am trying to pull together information about the first shipments of miso and shoyu by Mitoku. It is a little difficult since we do not have the records on hand and some of our early customers are no longer in operation.” Address: Sendai Miso Shoyu Co. Ltd., Furujiro 1-5-1, Sendai 982, Miyagi prefecture, Japan.

3546. Eden Foods, Inc. 1991. Eden Foods product overview (Leaflet). Clinton, Michigan. 12 panels. Feb. 23 x 10 cm.

• **Summary:** Two panels of this leaflet contain a brief history of Eden Foods, plus a chronology of key events in the history of Eden Foods: 1967–The first checking account was opened for Eden Foods, a source of macrobiotic and organic foods in Ann Arbor, Michigan. 1968–Eden Foods, Incorporated became a registered business, with food service, retailing and food processing operations. 1970–Eden Organic Certification Standards were implemented. Eden products were distributed in Michigan and Ohio. 1972–Trade relationship began with Muso Company, Ltd. of Osaka, Japan. 1979–Fire at warehouse reduced records, equipment and inventory to rubble. Two weeks later Eden Foods reopened. 1982–Schmidt Noodle Company, maker of Eden organic pasta since 1976, was acquired by Eden Foods. 1983–Edensoy soy beverage introduced; historic new item in natural foods market. 1985–San Francisco, California sales office and warehouse opened to service the West Coast. 1986–American Soy Products opened to produce Edensoy in Michigan; first aseptic soy beverage plant in the United States. 1988–Eden Foods joined OCIA,

Organic Crop Improvement Association, for independent certification of crops. 1989–Eden and OCIA established standards for food processing as well as growing crops.

Six panels inside the leaflet describe the company’s main product lines and give color photos of leading products from each line: Edensoy soy beverage. Organic durum pasta. Organic tomatoes. Organic grain sweetener (100% barley malt). Oils & vinegars. Beans & grains. Fruit products. Seasonings (Sesame Shake = gomashio). Traditional Japanese pasta. Traditional Japanese miso. Japanese soy sauces. Japanese sea vegetables. Japanese oils & vinegars. Japanese chips & crackers. Japanese pickles. Japanese concentrated foods (plum, garlic, kombu). Japanese teas. Japanese specialty foods (macrobiotic).

The company’s trademark is now “Making a tradition of good health.” Address: 701 Tecumseh Rd., Clinton, Michigan 49236.

3547. **Product Name:** Meatless Healthy Bacon (Made with Tempeh).

Manufacturer’s Name: White Wave, Inc.

Manufacturer’s Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

Date of Introduction: 1991. February.

Ingredients: Soy tempeh (cultured organic soybeans, water), soy sauce (water, soybeans, whole wheat, salt), miso (soybeans, water, salt), dried yeast, beet powder for color, dehydrated onion, granulated garlic, natural liquid hickory smoke and spices.

Wt/Vol., Packaging, Price: 6.5 oz (184 gm) plastic pouch.

Nutrition: Per 1 oz.: Calories 27, protein 4 gm, carbohydrate 4 gm (incl. 3.3 g, dietary fiber), fat 1 gm, cholesterol 0 mg, sodium 310 mg.

New Product–Documentation: White Wave News. 1991. Vol. 4, No. 1. June. A photo shows the label. Like all White Wave products, Meatless Healthy Bacon is made with soybeans grown in accordance with Section 26569.11 of the California Healthy and Safety Code [i.e. organic soybeans]. A comparison of 1 oz. broiled/fried bacon (pork) with Meatless healthy Bacon shows: Fat: 14 gm vs. 1 gm. Saturated fat: 4.95 gm vs. 0.15 gm. Cholesterol: 24 mg vs. 0 mg.

Label sent by Lon Stromnes. 1991. July 30. 4.5 by 10.25 inches. Plastic pouch. Red, black, and yellow on white. “Cholesterol-free! Vegetarian breakfast strips. A great-tasting choice.”

3548. Dawson, Chris. 1991. Re: Chronology of early shipments of shoyu and miso from Mitoku to Europe and the USA. Letter (fax) to William Shurtleff at Soyfoods Center, March 8. 1 p.

• **Summary:** 1969–First shipment of organic shoyu (Sakae Shoyu brand) from Fukaya Shoten in Shizuoka prefecture,

Japan, to Mr. Sakaguchi of Le Bol en Bois in Paris, in 16 liter tins. This shoyu was made with MOA* ingredients.

1970, Oct.—First shipment of Jôhsen Shoyu and red rice miso from Sendai Miso Shoyu Co. Ltd. in Sendai, Miyagi prefecture.

1971—First shipment of Hatcho miso from Hatcho Miso Ltd. in Aichi prefecture to USA.

1976, March—First shipment of brown rice miso from Sendai Miso Shoyu Co. Ltd. in Sendai, Miyagi prefecture. In 20 kg tins.

1980, May—First shipment of Onozaki rice miso from Onozaki Koji-ten in Tochigi prefecture to Oak Feed in Miami, Florida. 84 cartons and 4 kegs.

1980—First shipment of buckwheat miso from Kamegen Jyozo in Nagano prefecture, to Europe. 100 packs of 500 gm each.

1984, Sept.—First shipment of organic tamari from Mansan Shoten in Aichi prefecture to Blake Rankin of Granum in Seattle, Washington. Four x 18 liters.

1984—First shipment of organic soybean miso from Mansan Shoten in Aichi prefecture to Jon Judson of Soy Source, Christchurch, New Zealand.

1987—First shipment of organic young (*waka*) Hatcho miso from Hatcho Miso Ltd. in Aichi prefecture to USA.

1989—First shipment of organic Hatcho miso from Hatcho Miso Ltd. in Aichi prefecture.

* Note: MOA refers to Mokichi Okada International Association, which is a commercial association related to the Japanese religion *Sekai Kyusei Kyo* which means “helping the world religion.” Its basic tenet is to “Make heaven on earth,” to bring peace on earth and health to all people. There are approximately 700,000 members in Japan. Mokichi Okada lived 1882-1955. The commercial company was formed in 1920 and is now known as MOA Trading Company. Its purpose is to promote natural and organic farming and provide natural products for people. Address: International Sales Manager, Mitoku Co. Ltd., C.P.O. Box 780, Tokyo 100, Japan. Phone: 3-3201-6701.

3549. Kudou, S.; Shimoyamada, M.; Okubo, K. 1991. A new isoflavone glycoside in soybean seeds (*Glycine max* Merrill), Glycetein 7-O-β-D-(6"-O-acetyl)-glucopyranoside. *Agricultural and Biological Chemistry* 55(3):859-60. March. [6 ref]

• **Summary:** Soybeans are known to contain the five isoflavone glycosides (genistin, daidzin, glycetein 7-O-β-D-glucoside, 6"-O-acetylgenistin, and 6"-O-acetyl daidzin) and their corresponding aglycones. Address: 1,3-4. Kanesa Miso Co., Ltd., 202 Hamada, Tamagawa, Aomori 303; 2&5. Faculty of Agriculture, Tohoku Univ., 1-1- Tsutsumitori Amamiya-machi, Aoba-ku, Sendai 981. All: Japan.

3550. Wasserman, Debra; Mangels, Reed. 1991. Simply vegan: Quick vegetarian meals. Vegetarian Resource Group,

P.O. Box 1463, Baltimore, MD 21203. 224 p. March. Illust. General index. Index of tables. 23 cm. [117 ref]

• **Summary:** A vegan cookbook. Contents: Foreword. Time-saving cooking suggestions: Microwave cooking. Sample menus: Menu analysis. Top recipes for calcium and vitamin C. Top recipes for iron. Recipes (one section is titled Soy Products: Tempeh Dishes, Tofu Dishes). Food definitions and origins. Herbs and spices. Vegan nutrition (written by Reed Mangels, PhD, RD. Each of the 18 topics is followed by a bibliography; includes a section on each major nutrient, pregnancy, lactation, feeding vegan kids, nutrition glossary, recommended reading list). Cruelty-free shopping by mail.

The Vegetarian Resource Group. The group also publishes a bimonthly magazine, *Vegetarian Journal*, and is considered by dietitians to be a good source of nutrition information for vegans.

This book contains more than 20 tofu recipes and 6 tempeh recipes. Address: VRG, Baltimore, Maryland. Phone: 301-366-8343.

3551. Paine, Heather. 1991. Soya and SIAL '90: Editorial. *SoyaFoods (ASA, Europe)* 2(1):1. Spring.

• **Summary:** “Last year’s SIAL (Salon International de L’Alimentaire) was certainly impressive and all the more so because soyafoods and products containing soya had a remarkably good presence... French soyafoods companies were well represented with many new products... In the ‘new products’ section a soya-oil based margarine from Denmark (Margarines AMA-Dragsbaek Margarine Fabrik S A) won a SIAL D’Or award and a soyamilk from Argentina (AdeS) was highly commended.” Address: editor, SoyaFoods, 27a Santos Rd., London SW18 1NT, UK. Phone: 081-874-5059.

3552. **Product Name:** Miso [Sweet White, Sweet Brown, Mellow White, Mellow Brown, Mellow Barley, English Field Bean Amakuchi (10.9% salt with Field Beans and Barley), and English Soy & Barley Amakuchi].

Manufacturer’s Name: Source Foods.

Manufacturer’s Address: Unit G, Arnos Castle Estate, Junction Rd., Arnos Vale, Bristol BS4 3JP, England. Phone: 0272-716-487.

Date of Introduction: 1991. April.

New Product–Documentation: Talk with Paul Chaplin, founder and owner of Source Foods, who called from England 1992. Feb. 26. He started to sell the miso he makes in April 1991 at a food show and was selling all within 1991. He makes only light, short-term misos. He learned to make miso by working for 5 weeks at Lima Foods in the south of France. He has both books on miso by Shurtleff and Aoyagi. During October and November 1985 he visited and studied with Don DeBona at American Miso Co. in North Carolina, USA. He is now making and selling 7 types of miso. Now he needs to move to another place in Bristol

(perhaps to 16 Pembroke Rd.) because his building is being demolished. Linda Perfect of Impulse Foods in Bristol (tempeh maker) has to move too and is considering moving into the same building. He has very little money.

Talk with Paul Chaplin. 1997. March 20. The new address of Source Foods (Organic Priority) is 9 Cwm, Business Centre, Marine Street, Cwm, Ebbw vale, NP3 6TB, Wales, UK. Phone and fax: +44 01495 371 698.

3553. Tatsumi, Yoshiko. 1991. Kotokoto fukkura–Mame ryôri [Simmer slowly and they expand: Bean cookery]. Tokyo: Zaidan Hôjin Nôsan Gyôson Bunka Kyôkai. 214 p. April 30. [Jap]

• **Summary:** The word *kotokoto* in the Japanese title describes the sound of bubbles coming up during simmering; it is sometimes translated as “pit pat.” This book contains a section of edamame recipes (p. 52-58). After that comes a section on tofu, miso, and shoyu (p. 59+). Address: Cooking teacher, Japan.

3554. Japan company handbook. 1991. Tokyo: Toyo Keizai, Inc. Spring 1991. Second section. [Eng]

• **Summary:** In the section on Foods, 1 page of statistics is given on each of the following soy-related companies: Torigoe Flour Milling, Marukin Shoyu (Japan’s 5th ranked shoyu maker, based in Shozu island), Yutaka Shoyu (based in Tokai area, also makes miso), Sanbishi (shoyu maker based in Tokai area), Kibun. Address: Tokyo, Japan.

3555. Starr, Sara. 1991. Soyfoods: Pleasing to the palate, easy on the planet. *Health Foods Business*. May. p. 34-39. [1 ref]

• **Summary:** “Based on data from the nation-wide study, 1990 HealthFocus on U.S. Consumers, about one in ten health active food shoppers say they eat soyfoods once every two weeks or more.” Address: Vice President, Health Focus Inc., Emmaus, Pennsylvania.

3556. Ohlund, Tim. 1991. Re: Early work with miso and koji in Sweden. Letter to William Shurtleff at Soyfoods Center, June 5—in reply to inquiry. 2 p. Handwritten.

• **Summary:** Tim did the pioneering work with miso and koji in Scandinavia. The following dates were carefully extracted from his records in response to a number of questions asked by William Shurtleff.

1973 summer (July)—I was in Japan to study miso and tofu making, etc.

1982 Feb.—I first sold miso in Sweden. That first year I sold about 35 kg of rice miso and barley miso to friends.

1983 Sept.—I first produced an organic miso (from all organically grown ingredients), using oat koji and yellow peas.

1984 April—I started using the name Malvabo (address: 19063 Örsundsbro, Sweden) and first sold miso to a retail

food store. The first varieties of miso I made were rice miso, barley miso, and oat miso. I also experimented with using peas instead of soybeans because peas are easier to grow in Sweden.

1985 Sept.—I first sold the organic miso developed in late 1983. Address: Timoteus Kojiprodukter HB, Härvestagård, 19 063 Örsundsbro, Sweden. Phone: 0171-65106.

3557. Miso, shôyu no rûtsu wa doko ka? O-shôyu sukii tanken-tai [Where are the roots of miso and shoyu? Two shoyu-lovers go exploring in China]. 1991. Television broadcast. Channel 26. California. June 9. Sat. 8-9 P.M. [Jap]

• **Summary:** This program is part of the series “Shin Sekai Kikô” (New World Homeward Voyage). In Japan, the two explorers first visit two historic places in Wakayama prefecture: In one shop, Kinzanji miso is still made. The Buddhist monk Kakushin from Shinshu in Japan learned to make this miso from a temple named Kinzanji in southern China. They also visit Kadocho, a shop where shoyu is still made in the ancient way. They then travel to China, arriving in Shanghai, and go directly to Hangchow (also spelled Hangzhou; Pinyin: Hangzhou; Japanese: Kôshu), the capital of Chekiang province, located a little to the southwest. In the market there they find a relative of Kinzanji miso, named *tien tou-shih* (sweet soy nuggets) sold at a soy sauce shop.

The shop owners suggest that they go to Chungking (pinyin: Chongching; Japanese: Jûkei), a major city in Szechuan province, to learn more. There they find *tou-shih*, which resembles Japan’s Hamanatto or Daitokuji Natto. Then they visit the ruins of Kinzanji temple where Kakushin learned to make miso. After walking up a long, steep rock path they discover that only a historic bell tower is left.

Now they travel to Yunnan province, in central southern China, wedged between Vietnam and Burma. They arrive at Kunming (pinyin: Kungming; Japanese: Konme). In this area the weather is semi-tropical and many types of fermented foods are made. Now they travel 800 miles by car to the southern tip of Yunnan to a mountain village named Shisan Panna. There lives the primitive Aini tribe, in thatched houses with barefoot children. An elderly woman shows them how she makes miso. Roast the soybeans in a wok, then add water and cook. Pour into a bamboo basket (1 foot diameter, 10 inches deep) lined with a banana leaf, fold the ends of the leaf over the top, and place then basket on a rack over the hearth sunk in the middle of the room’s floor (Jap: irori) for 2-3 days so that the warmth aids the fermentation. Transfer the fermented soybeans to a wooden mortar, add salt and hot chilies (no grain), then pound to a paste. Shape this into 3-4 inch diameter patties, put these on a shallow 2.5 foot diameter bamboo tray, and place on the

rooftop in the sun for 3 days. Broil the patties directly over the fire, put in a mortar, add more salt and chilies, and pound to a paste. Now add boiling water and serve. The result is a spicy miso soup with a bit of a natto flavor (Japanese: natto-jiru). Thus, the Japanese apparently did not invent miso soup! Address: Japan.

3558. Kandler, O. 1991. Bedeutung der Milchsäuren Gärung fuer die Herstellung von Sojaprodukten [Significance of the lactic acid fermentation for the production of soy products]. In: F. Meuser and P. Suckow, eds. 1991. Soja in Lebensmitteln: Vortraege 2. Hamburger Soja-Tagung. Berlin: Technische Universitaet Berlin, Institut fuer Lebensmitteltechnologie und Gaerungstechnologie-Getreidetechnologie. 171 p. See p. 45-62. [32 ref. Ger]

• **Summary:** Contents: Introduction. Overview of lactic acid bacteria and lactic acid. Occurrence of lactic acid in soy products. Lactic acid fermentation in the production of soy sauces and pastes. Fermented lactic acid soy beverages. Conditions for growth and acidification. Acidification and carbohydrate content. Selection of bacteria. Future developments. Summary. Address: Botanisches Institut der Ludwig-Maximilians-Universitaet, Munich, Germany.

3559. Messina, Mark; Messina, Virginia. 1991. Increasing use of soyfoods and their potential role in cancer prevention. *J. of the American Dietetic Assoc.* 91(7):836-40. July. [56 ref]

• **Summary:** Contents: Abstract. Introduction. Historical perspective. Soybeans and the US food supply: Soy protein products, retail soyfoods sales. Nutrient contribution of soyfoods. Soybeans and cancer risk: Experimental studies (isoflavones, protease inhibitors, epidemiology, breast cancer, colorectal cancer). Conclusions. Implications.

“Soybeans contain, in relatively high concentrations, several compounds with demonstrated anticarcinogenic activity. Two of these compounds—protease inhibitors and phytic acid—have traditionally been viewed as antinutrients... It may not be appropriate to evaluate soybeans on nutrient content alone; dietitians need to know about the nonnutritive dietary compounds, called phytochemicals, which may have anticarcinogenic effects... Overall, the epidemiologic data suggest that soy consumption may lower colorectal cancer risk, whereas there is only moderate support for the role of soy in reducing breast cancer...”

Table 1 (p. 838) gives the “Proximate composition and selected nutrient content of various soyfoods in common serving sizes and in 100-gm edible portions” (based on Haytowitz 1986). The soyfoods are: Miso, natto, okara, roasted soybeans (dry- or oil roasted), soy sauce (tamari), tempeh, firm tofu (raw), regular tofu (raw). Address: 1. Diet and Cancer Branch, Div. of Cancer Prevention and Control,

National Cancer Inst., Bethesda, Maryland 20892; 2. Registered Dietitian, private practitioner, Washington, DC.

3560. Tara, Bill. 1991. Pioneering macrobiotics and soyfoods in London (Interview). *SoyaScan Notes*. Aug. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Starting in the late 1960s, the pioneering work with soyfoods in London was done by Craig and Greg Sams. They and their parents were Americans, and they had gone to college in America. Their father was employed by the U.S. armed forces as an historian; they spent a lot of their time growing up between America and England. Greg fell out of a tree while going to college in Berkeley in the late 1960s and was paralyzed from the waist down, so he was confined to a wheelchair, but was still very active and innovative. In the late 1960s they set up a macrobiotic natural foods cafe/restaurant on Portobello Road in London, then changed it into Ceres Grain Shop, a natural foods retail store. As volume increased, they began to distribute their products out of the back of their shop, and in about 1971 founded Harmony Foods Ltd. as a distribution company located in a warehouse on Ladbrooke [sic, Latimer] Road. The model and evolution was similar to that of Erewhon in Boston. Harmony Foods was the first natural foods distributor in England, and probably the second in Europe after Lima Foods of Belgium. Soon they were importing macrobiotic foods from Japan, and distributing organically grown grains from England and from The Camargue (a marshy island in the delta of the Rhone River in the south of France), etc.

Among their early Japanese imports were bulk miso and “tamari” (actually shoyu), imported from Muso in wooden kegs. They repackaged the miso and shoyu in glass bottles under the Harmony Foods label in London. This was the first Japanese miso and shoyu sold in England. In about 1972, as soon as Erewhon started having miso and shoyu packed in Japan, the Sams had the same thing done with theirs, then they applied their own labels in London. But they continued to import in bulk as well. A Chinese company in London made tofu and [mung] bean sprouts, then sold the tofu to the Sams brothers; they sold it unpackaged in open trays in water. At that time, tofu was not emphasized much in macrobiotic circles so not much was sold; it was considered too yin. The Sams also sold deep-fried Rissoles filled with TVP instead of meat; as early as 1970 the Rissoles were being made by an Israeli guy (name?) who owned a shop (name?) by the Hempstead Heath. Marigold Foods also used TVP in the mid-1970s.

In 1970 Bill Tara, then a vice president at Erewhon in Boston, passed through London on his way to India. One purpose of his trip was to scout out the possibility of Erewhon setting up a distribution point or center in England. Paul Hawken was president of Erewhon at the time, and Erewhon was importing miso and tamari from

both Muso and Mitoku in Japan. Bill and Paul had been roommates in a warehouse in San Francisco, then they took over the Erewhon food store from Evan Root, Paul starting 2-3 months before Bill. In London, the Sams brothers were just opening a new natural foods restaurant in the Notting Hill area so Bill and Paul Petrofsky spent 2 weeks fixing it up. Paul later started Baldwin Hill Bakery with High Lerner. Bill stayed in London 2-3 months during this first visit.

In about 1972 Bill returned to London with Russel Demerais, on the Erewhon payroll, again to start and Erewhon distribution center. But Erewhon went through a cash crisis and Harmony foods had grown dramatically. So Bill and Peter Bradford (an Englishman who had come to America in about 1970 and worked for Erewhon doing organic agriculture at Erewhon Farms near Keene, New Hampshire) began to work for the Sams brothers both at Ceres Grain Shop (the retail store) and Harmony Foods (in the warehouse). Bradford, who now has a very successful natural food store in England named Clearwater Natural Grocer, has been one of the most important promoters of soyfoods in the UK. At this time, Craig Sams set up a bakery. By now, miso and tamari sales had increased; Harmony was still affixing its own label to unlabeled packs.

In 1974 Bill and Peter established Sunwheel as a natural food/macrobiotic distributor. They picked up exotic Japanese imports that Harmony found unprofitable and wanted to drop—so there was little or no competitive feeling with the Sams. By late 1974 Sunwheel Hacho Miso, Mugi Miso, and Tamari were on the market, imported from Muso (Yuko Okada) in Japan. Sunwheel also made granola and peanut butter. Sunwheel never sold any other soyfood products; they had very limited warehouse space and no refrigeration.

Note: On 17 Aug. 1975 Renée Tara wrote William Shurtleff in California. She was living at 30 B Market St., Bradford-on-Avon, Wilts., England. She is writing a European Macrobiotic Cookbook. She requests information on miso and invites Shurtleff to visit.

In about 1977 Sunwheel acquired a retail store that had been started in and by the Community Health Foundation. By 1979 Sunwheel was very successful, but it needed to be recapitalized or sold. So the partners decided to sell it to a larger health food company; Peter kept the retail store.

In Nov. 1975 Bill established the Self Health Center which by 1976 grew into the Community Health Foundation (CHF). By 1976 CHF was offering classes in soyfoods. Paul Jones was the key man with tofu; he taught classes and started making tofu out of his home in the Highgate area. Paul Jones was definitely the first Caucasian to pioneer tofu in England. Simon Bailey, a baker who was originally with one of the first natural foods stores in England, located in Bath, taught about tempeh. These people were experimenting in the kitchen with soyfoods and taught in a sort of an apprenticeship program. Jon Sandifer, who is still

with CHF, learned tempeh from Simon Bailey. CHF sold some tofu and tempeh through its own sit-down restaurant named The Seven Sheaves, then renamed The Natural Snack and changed to a cafeteria. A few people did experiments with miso but it never got to a commercial scale in part because of persistent rumors that Lima Foods was going to start making it.

By the late 1970s soyfoods were growing in popularity in the UK. Two separate groups promoted them; the vegetarians and animal rights people (who liked TVP), and the natural foods and macrobiotic people. Marigold Foods also used TVP in the mid-1970s.

Much of important pioneering commercial work with soyfoods in Europe was done by macrobiotic groups in the Netherlands and Belgium. Bill often went there to teach in 1974-79. Tofu, and later tempeh, were emphasized by groups such as Manna in Amsterdam and De Brandnetel in Antwerp. Macrobiotics was much more active in the Lowlands than in England.

The Sams brothers later started Whole Earth as a marketing company for their jams. They sold it fairly soon. Greg Sams (disabled) is no longer in the food business; he runs The Chaos Shop in London which sells photographic reproductions of computer-generated chaos patterns. Craig started Realeat Co. and now may be with the Haldane Foods Group. Address: Director, Nova Inst., P.O. Box 4648, Estes Park, Colorado 80517. Phone: 303-586-6265.

3561. Stackler, Ben. 1991. Macrobiotics and soyfoods in the Soviet Union (Interview). *SoyaScan Notes*. Aug. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The macrobiotic movement in the West has recently been very active in Eastern Block countries. The leaders there are mostly medical doctors. They are treating Chernobyl radiation patients using macrobiotics. Two areas of greatest activity in the USSR are Leningrad (now named St. Petersburg), and a city in the Ural Mountains (east of Moscow) named Chelyabinsk (also spelled Cheliabinsk; a subdivision of the Russian S.F.S.R.). The St. Petersburg doctors have many ambitious plans. They want to manufacture miso and tempeh on a commercial in cooperative with a brewery in St. Petersburg. A year ago there was a macrobiotic conference in Yugoslavia; 500 people from all over Europe attended and Michio Kushi was the featured speaker. In October 1990 Ben went to Moscow and St. Petersburg with 6 macrobiotic people. He had hundreds of pounds of donated miso sent by airlift to the USSR. The *One Peaceful World* newsletter, published by the Kushi Institute in Massachusetts, did a story on his October trip; it includes the names and addresses of the interested people. He will be making a second trip to the USSR within one week, revisiting people he met before.

Note: The MacNeil/Lehrer Newshour reported on 14 Feb. 1992 that a top-secret Soviet nuclear weapons complex

is located near the city of Chelyabinsk. It is one of ten which together produced all of the former Soviet Union's nuclear weapons. Address: 1400 Shattuck Ave. #7-2, Berkeley, California 94709. Phone: 415-527-9389.

3562. Sams, Craig. 1991. Pioneering macrobiotics and soyfoods in England, 1967-1979 (Interview). *SoyaScan Notes*. Aug. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Craig and Greg Sams were both born in America. Their mother is from Nebraska and their father from Pittsburgh, Pennsylvania. Greg is 4 years younger than Craig. During the 1950s and 1960s the family went to England periodically, largely because Craig's father worked in England as a historian for the U.S. Air Force. In 1965 Craig took a year off from college, traveled around the Indian subcontinent, and got hepatitis. Upon returning to the Univ. of Pennsylvania in Philadelphia for his final year, he fell in with 3 followers of macrobiotics and got interested in macrobiotics. In about Feb. or March of 1966 he went to the Paradox, a macrobiotic restaurant in New York and decided that he wanted to start a similar restaurant in London. In late 1966 Craig's brother, Greg, fell out of a tree in Berkeley, was paralyzed from the waist down and was confined to a wheel chair.

In Feb. 1967 Craig started a restaurant named the Macro at 10-A Airlie Gardens, Holland Park, London. Yoko Ono, John Lennon's wife, was one of the first regulars. She was the first person Craig met in London who was aware of macrobiotics; she had learned about it in Japan. But Craig had to close Macro after 2 months because of zoning problems. In mid-1967 Greg joined Craig in London and in Dec. 1967 they opened a new macrobiotic / natural foods restaurant named Seed at 136a Westbourne Terrace, W.2, London—a few minutes walk from Paddington Station. Soyfoods were a part of the menu. They got Kikkoman shoyu, shiro-miso, and Hatcho miso from a Japanese import company named Mikado-ya, which was run by Japanese in southeast London out of the basement of a house and supplied Japanese embassies in Europe and Africa. At that time Craig thinks there were no Japanese restaurants or retail stores in London. Seed soon started to import Hatcho and barley (mugi) miso from Muso in Japan. Seed never used any of Lima's soyfood products. Seed also used fermented tofu; they mixed it with tahini, spread it on bread, and called it a Rarebit—an alternative Welsh Rarebit, which is cheese on toast. Seed purchased fresh tofu and [mung] bean sprouts from a Chinese company named Lung Kee on Fermoy Road, Paddington, London, right on the banks of the canal. It was run by one Chinese man who employed about 15 West Indian / Jamaican women who made the foods. Bean sprouts accounted for most of Lung Kee's business. Craig has no idea when Lung Kee started making tofu. In addition to its mainstay, brown rice, Seed served the

tofu diced in miso soups, or sauteed with vegetables such as nitsuke carrots, etc., or as a dessert with tofu and apple concentrate whipped with fruit to a thick creamy consistency and chilled. The restaurant did well. It was soon famous for its "groovy vibes" and its free meal of brown rice, veggies, and green tea for those who could not afford to pay. Although the Sams brothers were not "proponents of the brown rice and marijuana regimen" (as Kotzsch had implied in 1985, p. 221), Seed was a favorite hangout for a host of '60s counterculture celebrities such as The Beatles, The Rolling Stones, Yoko Ono, and others. Americans such as Bill Tara, Peggy Taylor, Eric Utne, and Paul Petrofsky also worked there. Then people began to ask the Sams if they could buy staple foods from the restaurant. So food was soon packaged and sold over the restaurant counter.

In about March 1969, to meet the growing consumer demand, the Sams brothers opened Ceres, a natural foods / macrobiotic retail store, at 8-A All Saints Road, 2 blocks from and parallel to Portobello Road. Ceres also did extremely well, with Greg and various managers having the main responsibility while Craig focused on the restaurant. Soyfoods retailed by Ceres included Hatcho and mugi miso, tamari, fermented tofu, and fresh tofu sold in trays immersed in water. Eventually Bill Tara and Peter Bradford took over management of Ceres. Soon other people began to open restaurants and natural foods / macrobiotic stores like Ceres in college towns in England: Infinity Foods in Brighton (at Sussex University; Peter Deadman, Robin Bines, Simon Bailey were involved), Arjuna in Cambridge, Harvest in Bath, and On the Eighth Day in Manchester. In 1970 the Sams developed a large mobile tent macrobiotic restaurant and made a lot of money by taking it to various big rock festivals.

In Aug. 1970 Harmony Foods was established as a natural foods / macrobiotic import, product development, and distribution company. The money from the mobile restaurant was used to rent a building at No. 10 St. Luke's Road in London (only about 300 yards from the Ceres shop), and to import enough products to start a line / range of products under the Harmony Brand (the logo was a yin / yang sign). They stored and packed these in basement at Harmony Foods. Starting in 1969, the first imports for the restaurant and for Ceres had come from Muso in Japan, and from a macrobiotic society in Vietnam came red rice and green tea. In 1970 they started to import 4-5 tons of organically-grown brown rice from The Camargue in the south of France. Grown by the same man who grew brown rice for Lima Foods, it became the company's main product. Harmony Foods started out with about 20 customers—16 conventional health food shops and 4 of the new wave of natural foods stores (which the natural foods stores called "grain shops"). Wholefood of Baker Street was the pioneer "organic shop" that started in the 1950s. They were part of the Soil Association, so organic growers used it as an outlet

for the first organically grown produce retailed in England. They soon became an important outlet for Harmony Foods as well. In addition a man named Ivan Cerilla?? would collect food (mostly produce) from the organic growers and deliver it to restaurants like Seed and Manna in London. One other product that was grown organically was Pimhill Flour. Harmony Foods was a pioneer in developing new organic growers (such as Stewart Patterson who farmed wheat with horses) and in putting organically grown foods into retail outlets.

By Aug. 1970 Harmony Foods was distributing soyfoods, including Hatcho miso, mugi (barley) miso, and tamari from Muso in Japan—imported in wooden kegs and packed in glass jars. These were the first miso and shoyu products available at retail outlets in England.

In Jan. 1971 Harmony Foods outgrew its building on St. Luke's Rd. and moved into a larger warehouse at 191 Latimer Road (Maidenhead), a former cosmetics factory. Just before the move, Bill Tara informed the Sams that he was in London to set up Erewhon Europe to compete with Harmony. The restaurant, Seed, was sold in the spring of 1971 and reopened as The Magic Carpet. In 1971 Ceres was renamed Ceres Grain Shop and relocated at 269 A Portobello Rd.

In mid-1972 the shop next to Ceres closed. The Sams took it over and made it into Ceres Bakery. It transformed large amounts of wheat, organically grown in England, into unique and delicious naturally leavened breads. The enzymes in the freshly-milled flour helped to leaven the bread.

When they closed down Seed, the restaurant on All Saints Road, there was still a demand for simple macrobiotic food, so in about Feb/March 1971 they opened Green Genes, a sort of macrobiotic workingman's café on a much smaller scale. Each person picked up her or her food from a counter; there was no table service. It was open for lunch only whereas Seed had been open only in the evenings.

In 1972 they began to publish a magazine titled *Seed: The Journal of Organic Living*. Bill Tara and Peter Bradford helped with it occasionally. It continued for 6 years. That same year, above Ceres Bakery, started Ceres Bookstore, which only last for 1½ years.

Meanwhile Bill Tara and Peter Bradford had expanded and transformed Ceres Grain Shop, but in a way that led to extensive shoplifting, so it was scaled back to near its original size and finally sold in 1979 to Jack Weller. By that year all efforts and resources were focused on Harmony Foods, the wholesale business. Peanut butter (non-organic), the first product manufactured by Harmony, was now in two of the leading supermarket chains, Safeway and Waitrose. Address: 269 Portobello Road, Notting Hill, London W11 1LR, England. Phone: 071-229 7545.

3563. Gray, Sylvia Ruth. 1991. Vitamin B-12: A disappearing act? *Gold Mine Gazette (San Diego, California)*. Summer. p. 1, 6. [5 ref]

• **Summary:** Theorizes as to why the vitamin B-12 content of our foods may be decreasing. "In the 1960s, tests using the protozoan *Ochramonas malhamensis* showed B-12 values for beef liver, beef heart, Swiss cheese and chicken breast to be 122, 14.2, 1.71, and 0.5 mcg/100 gm, respectively. Tests in 1989 by the same protozoan and procedure identified no B-12 in any of these foods and only 2.19 mcg/100 gm in "natural" beef heart—little more than one-seventh of the previous value. Similarly in the 1960s, tests using the bacterium *Lactobacillus leichmannii* showed B-12 values for egg yolk and canned tuna to be 9.26 and 2.8 mcg/100 gm. Tests on these same foods by the same bacterium and procedure in 1990 revealed B-12 values of 1.28 and 0.5 mcg/100 gm," respectively.

"Happily a number of foods used in the macrobiotic and vegetarian communities appear superior to their flesh food counterparts. Wakame, kombu, and nori showed B-12 levels above 9 mcg/100 gm, while mekabu and alaria were approximately 2. (Note: Since bacterial synthesis of vitamin B-12 occurs mostly on the sea vegetables' surface, they are weighed dry and tested unwashed. Findings need to be divided by four to obtain mcg/100 gm cooked portion, and consumers should strain and use the rinse water in cooking.) Aside from sea vegetables, one brand of tempeh was above 4 mcg/100 gm of B-12 and three quality misos ranged between 0.74 and 0.16 mcg/100 gm."

Vitamin B-12 was the last of the vitamins to be discovered (in 1948). It can only be produced in nature by bacterial synthesis. Address: Strictly Macrobiotic, 315 First Ave., Salt Lake City, Utah 84103. Phone: 801-521-7936.

3564. McSweeney, Daniel. 1991. Consumer survey 1991. *Whole Foods*. Aug. p. 34-36, 39, 41.

• **Summary:** This survey was conducted at 18 natural foods stores throughout the USA. Product purchases. Percentage of respondents who purchased a type of product at a natural foods during the past 12 months: Cheese substitute 28%, meat 34%, miso 34%, sea vegetables 33%, soy milk 51%, soy sauce 36%, tamari 52%, tempeh 33%, tofu 57%, yogurt (dairy) 64%.

3565. *One Peaceful World (Becket, Massachusetts)*. 1991. Whole foods in the Soviet Union. No. 8. p. 4. Summer.

• **Summary:** "Macrobiotics continues to spread in the U.S.S.R. In Cheljabinsk [Chelyabinsk, Cheliabinsk], doctors report that the thousands of pounds of food airlifted to Russia by OPW last fall is being put to good use. 'Miso is helping some of our patients with terminal cancer to survive,' report Drs. Lidia Yamchuk and Hanif Shaimandarov. 'Their blood (and blood analysis) became better after they began to use miso in their daily food.' They

also hope to grow soybeans and request seeds that will ripen in a short, cool summer.

“To help, contact: Lidia Yamchuk or Hanif Shaimardanov, Br. Kashirini Str. 108A 141, Cheljabinsk 454136, U.S.S.R. Or: Yuri Stavitsky, 23 Bolshaya Raznochinaya Flat 12, Leningrad 197110, U.S.S.R.”
Address: Box 10, Becket, Massachusetts 01223.

3566. Pickarski, Ron. 1991. *Friendly foods: Gourmet vegetarian cuisine*. Berkeley, California: Ten Speed Press. 277 p. Illust. Index. 23 cm. [23 ref]

• **Summary:** This is a stylish vegan cookbook, with a wealth of sophisticated and delectable soyfoods recipes. The author recommends only high-quality ingredients. Brother Ron grew up in Michigan and during high school spent time in the restaurant business flipping hamburgers. Later he became a Franciscan monk (OFM). A look at his own health revealed the need to change his diet. So Brother Ron changed to a natural vegetarian diet and experienced weight loss and renewed energy. Now he considers himself a food missionary—helping people transform their lives through food. Friendly foods are “foods that are friendly to our bodies, our pocket books, our busy schedules, and our environment.”

In the section on dairy-like products, the author recommends soy milk and some “tofu ice creams.” He recommends use of soy cheeses sparingly since they are high in fats (especially the softer types). He considers nondairy creamers to be a less healthful than their dairy counterparts, since they are high in saturated fats and artificial additives. “Typically, nondairy creamers contain corn syrup solids, partially hydrogenated vegetable oil (including coconut oil, cottonseed oil, palm oil, or palm kernel oil), sodium caseinate, sodium phosphates, mono- and diglycerides, sodium silico aluminate, and artificial color. I do not consider this type of product to be an example of a high-quality food.”

Soy-related recipes include: Marinated vegetables with marinated tofu (p. 41). Shish kebabs (with marinated tofu, p. 42). Marinated tofu with scallions (p. 43). Gefilte tofu with horseradish and charoset sauce (p. 49-50). Zucchini bisque (with tofu, p. 66). Tofu wakame salad (p. 82). Tofu cottage cheese (p. 89). Vegan sour cream (with soy milk, p. 90). Soy mayonnaise (with tofu, p. 90). Silken tofu mayonnaise (p. 91). Lemon cream dressing (with tofu, p. 92). Oil-less miso dressing (with soy milk and white miso, p. 96).

In the chapter on entrees, there are detailed descriptions of tofu, tempeh, and seitan. Soysage (with cooked soybeans and soymilk, p. 105). “Meatballs” (with cooked soybeans, p. 107). American loaf (with silken tofu, p. 112-13). Tofu spinach pie (p. 120). Auberge Hanfield pie (with silken tofu, p. 121). Russian vegetable pie (with silken tofu and tofu cottage or ricotta cheese, p. 122). Greek moussaka (with

tofu topping, p. 128-9). Sweet and sour tempeh (p. 133). Southern fried tofu (p. 134). Tofu Swiss steak (p. 135). Tempeh stew (p. 136). Thanksgiving day tofu (p. 137). Tofu Jamaican run down stew (p. 138). Tofu paneer (p. 139). Seitan (p. 140-43). Seitan à la Normandie (p. 144). New England boiled dinner (with tofu or seitan, p. 145). Seitan Parmesan (with vegan cheese made with tofu, p. 147-48). San Francisco stir-fry (with seitan or tofu, p. 151). Berner platte (with protein accompaniments made with tofu and Soysage, p. 155-56). Vegan Béarnaise sauce (with silken tofu, p. 161). Miso sauce (p. 164-65). Tahini lemon sauce (with silken tofu, p. 165). Steamed kale with lemon miso sauce (p. 176).

In the dessert section, there is mention to tofu chocolate as an alternative to chocolate. Carob cake (with tofu chocolate, p. 217). Chocolate cream couscous cake (with filling made with silken tofu, p. 220). Silken tofu chocolate “cheesecake” (p. 221). Key lime shamrock torte (with silken tofu, p. 222). Raspberry sabayon sauce (with silken tofu, p. 232). Tofu chocolate “buttercream” icing (p. 234). Tofu chocolate ganache (p. 234-35). Mocha grain coffee (with any grain coffee substitute, cocoa, brown rice syrup, and soy milk, p. 238). Christmas soy nog (with soy milk and lecithin granules, p. 238).

The last section of the book, titled “The Culinary Olympics,” gives recipes that Brother Ron prepared while competing in these Olympics, starting in 1978. These Olympics are held every four years at Frankfurt, Germany, by the International Cooks Society. The American Culinary Federation is the U.S. organization that promotes the competition. “In 1978 I won a gold medal in the national competition, which qualified me to compete in the 1980 Culinary Olympics. In 1980 I founded the American natural foods team and, with this team, international competition to gain widespread competition for vegetarian cuisine. In that year, I became the first professional vegetarian chef to compete in the Olympics and win a medal for totally vegetarian foods. I also competed in 1984 and 1988... My team won bronze and silver medals in all three years that we entered the competition.” Soy-related recipes dominate this section, and include: Baked tofu pâtés (spinach, tarragon, or carrot, p. 241-42; won a bronze medal in 1984). Tofu and sea vegetable quenelles (beet, spinach, or carrot, p. 243-45; won a silver medal in 1988). New York cima roll (with tofu, p. 248-49; won a silver medal in 1988). Tofu seitan Wellington (p. 250-51; won a bronze medal in 1984). Vegan London broil (with seitan, miso, and tamari, p. 251-52; won a bronze medal in 1984). Southern blackened tempeh with tomato-apricot-ginger coulis (p. 253-54; won a silver medal in 1988). Carrot cream in squash shell (with soy milk and tofu, p. 255-56; won a silver medal in 1988). Chocolate squash confection (with Tofu Chocolate Ganache, p. 259-60; won a silver medal in 1988). Address: O.F.M., St. Anthony’s Shrine.

3567. Stepaniak, Joanne; Hecker, Kathy. 1991. Ecological cooking: Recipes to save the planet. Mobilization for Animals, Pennsylvania, Inc., P.O. Box 99762, Pittsburg, PA 15233. 228 p. Index. 23 cm.

• **Summary:** This vegan cookbook contains 500 recipes, including many using tofu, tempeh, miso, and soy milk. Almost all the recipes are uncomplicated, and the directions are short and simple to follow. Many can be prepared quickly. Sales and proceeds benefit Mobilization for Animals. Reviewed by Debra Wasserman in *Vegetarian Times* (May 1992, p. 97).

Note: The author self-published this book for a while, then the Book Publishing Co. in Summertown, Tennessee, became the publisher. Address: Pittsburg, Pennsylvania. Phone: 412-232-5106.

3568. Spear, Bill. 1991. Soyfoods in Yugoslavia (Interview). *SoyaScan Notes*. Sept. 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bill just returned from a 1-week macrobiotic summer camp at Kumrovec, Croatia, Yugoslavia; 75 people plus staff attended—during the current civil war. Last year he attended the same event, along with 600 other people. There are presently an estimated 5,000 to 10,000 macrobiotic people in Croatia. The major activity is in Zagreb. Croatia has most of the money and industrial productivity in Yugoslavia and that is a major reason that Croatians want independence. The Serbians are a relatively poor majority.

There are two commercial and at least three home-based soyfoods manufacturers in former Yugoslavia. The best contact is Ivan Jugovac (about 40 years old), owner of Anyo located at Skolska Ulica 43A, 51215 Kastav (near Rijeka), Croatia, Yugoslavia. Ivan knows the names of the other soyfoods companies in Yugoslavia and is part of a loosely-knit soycrafters network there. Anyo, which started about 2-3 years ago, makes 250-300 kg/week of tofu (100 kg/day in 4 or 5 batches) and 150-200 kg/week of seitan. From the tofu they also make smoked tofu, grilled tofu, deep-fried tofu, and tofu spread (with okara). The tofu is made in a 100-liter steam jacketed kettle and the nigari is imported from Japan. Their soybeans (which are not organically grown) come from Becej (pronounced BECH-ay) in Serbia, Yugoslavia. The business is doing well. Ivan makes natto for his personal use. He wants to start making miso and amazake commercially, and is looking for sources of koji and koji starter.

A second soyfoods shop in Belgrade, Serbia (name, address, and contact person unknown) makes tofu, seitan, and tempeh on about the same scale as Anyo. It probably started at about the same time as Anyo. There are 1-2 small tofu shops in Zagreb, and one in Novi Sad, Serbia; in each, the tofu is made in a home kitchen. In Slovenia, a tofu company that will be the largest in Yugoslavia is nearly

ready to begin operation in Slovenia, but the current civil war has delayed their opening. They plan to make 100 kg/day of tofu.

The man who knows the most about soyfoods in Yugoslavia is Zlatko Pejic, a peace activist who is president of the Society for the Improvement of the Quality of Life and head of the macrobiotic community in Zagreb. His wife is a cooking teacher. He invited Bill to Yugoslavia, has been to the USA, and lectures throughout Yugoslavia. He has visited most of the soyfoods companies in Yugoslavia, has a fax, and like Ivan speaks pretty good English.

Basically all of the interest in soyfoods in Yugoslavia grew out of macrobiotics. Several of the people who started companies attended the Kushi Institute in London. Two years ago, others attended the International Macrobiotic Institute in Kiental, Switzerland. In both places there are classes in soyfoods production (miso, tempeh, tofu, etc.) taught by various macrobiotic teachers such as Roberto Marrochhesi. Most companies have some books from Soyfoods Center. Bill is still actively affiliated with The Bridge in Connecticut and is a teacher of macrobiotics. Address: North Road, Bantam, Connecticut 06750. Phone: 203-567-0554.

3569. *SoyaScan Notes*. 1991. The concepts of alkaline (*arukari-sei*) and acidic (*sansei*) foods in Japan (Overview). Sept. 20. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** It is common knowledge among most typical Japanese that foods can generally be classified along a continuum that ranges from alkaline at one end to neutral (*chusei*) in the middle, to acidic at the other end. Alkaline foods (those with an alkaline ash) are generally considered to promote and protect health. It is widely believed that one should try to keep one's blood a little on the alkaline side of neutral. According to E.C. Grey's *The Food of Japan* (League of Nations, 1928) and *Inshoku Jiten (Encyclopedia of food and drink)*; Motoyama 1958; see arukari) and to discussions with numerous Japanese, well-known alkaline foods are as follows. Each food is followed by an "alkaline value" in parentheses taken from Grey (1928, p. 56-111; the "alkalinity is due to lime and magnesia"): sea vegetables including kombu (88.9), wakame (55.8), nori (35.3); black soybeans (40.2), yellow soybeans (38.1), soyfoods (and Soyfoods Center) including yuba (25.6), kinako roasted soy flour (25.2), Hamana natto (Hamanatto 24.8), natto (19.3), green soybeans (ao-daizu, dry; 17.8), Misozuke (vegetables preserved in miso, 16.3), shoyu (14.3); red miso (11.5), okara (9.0), white miso (8.1), edamamé (green vegetable soybeans, 5.8), aburage deep-fried tofu pouched (6.7), soy milk (3.8), tofu (1.1), shiitake mushrooms (41.0), azuki beans (27.0), umeboshi salt plums (3.1), dried fruits including dried fig (46.8), dried persimmon (21.3), raisins (15.3), cheese (18.0), most fresh fruits including yuzu

(citron, 11.7), buckwheat (7.0), fig (6.3), lemon (5.9), banana (4.6), mikan (mandarin orange, 4.0); root vegetables including potatoes (13.9), tororo imo (11.5), daikon radish (5.0); most green vegetables such as komatsuna cabbage (11.3), or daikon leaves (10.9), pickled vegetables such as takuan (14.6). Alkaline beverages or liquids include tea, coffee, dairy milk (2.6), condensed milk (8.0), powdered milk (26.6), grape wines, and vinegar.

Acidic foods, which the Japanese believe should be used in moderation, include: white sugar (0), mizuame [rice syrup] (0), chocolate (3.0) and other sweet foods, eggs (2.8), flesh foods including chicken (5.2), pork (5.2), beef (5.1), fresh fish (avg. 5.3), alcoholic beverages including amazake (0), beer (0), sake (0); animal fats including butter (1.6), margarine (0.9).

Many Japanese find that acidic foods, when consumed in excess, give them acid indigestion. Neutral foods include rice (0.5-2.9), wheat (3.5-6.6), barley (2.7-4.6), and wheat gluten (1.0).

Note that this classification system is unrelated to the yin-yang continuum used by macrobiotics; most Japanese are unaware of macrobiotics. The latter, for example, considers meat to be yang (alkaline), whereas wines, fruits, and milk are yin (acidic).

3570. South River Miso Co. Inc. 1991. Catalog no. 10 [Mail order]. South River Farm, Conway, MA 01341. 8 p. Sept. 21. 28 cm. [3 ref]

• **Summary:** "Since 1979. Made by the Elwell Family. Authentic farmhouse style miso. Made from 100% organic ingredients. Processed and packed entirely by hand. Unpasteurized, full of life." Black ink on tan paper with many illustrations. Contains an introduction and 3 sections titled: What is miso?, What is koji?, and Amazing amazake. There is a recipe for Winter Day Miso Soup. The company now sells the following types of miso: 1. Hearty varieties: Three year barley, black soy barley, brown rice miso, dandelion-leek miso. 2. Sweet tasting, mellow miso varieties: Sweet tasting brown rice miso (formerly named Mellow brown rice miso), Chick pea miso. 3. More sweet tasting types: Golden millet miso, Aduki miso, Kasha (buckwheat) miso. Address: Conway, Massachusetts. Phone: (413) 369-4057.

3571. Gerner, Bob. 1991. The origins and early history of Westbrae Natural Foods in California, through December 1971 (Interview). *SoyaScan Notes*. Sept. 29 and Oct. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Westbrae started as a natural foods distribution company in July 1970 before it opened a retail store. Bob Gerner worked as the manager of the coffee house at the University of California at Davis. They had their own baker (a woman), and they baked everything from scratch. She was interested in natural foods, and Bob was starting to get

interested. Occasionally he would visit the Sacramento Real Food Company (1500 Q St., Sacramento). Bob's girlfriend, Kristin Brun, who lived in the Santa Cruz mountains, taught Bob how to make granola and bread. So the people at the coffee house at Davis started make and serve granola there. At one point, Bob got so interested in natural foods that he decided he wanted to go into the new field. The baker was also interested, so they decided to open a store, even though they had no money. Bob quit his job as manager of the coffee house but stayed on as a cook. He met four other couples who planned to open natural foods retail stores, so they joined together.

In May 1970 the ten partners (none of whom had any money) opened the Natural Food Works on Olive Drive in Sacramento. (It still exists, though on G Street.) The store opened during final exams of Bob's senior year, so he skipped his last 3 finals and never graduated. Bob was chosen to be manager, since he was the only partner with any business experience. One of the store's main products was granola, which Bob made at night on the stove in the coffee house at Cal Davis (on the sly, from midnight until 6 o'clock in the morning).

Buying the ingredients for granola in bulk and merchandise for the store from suppliers involved a lengthy truck route. Since Bob was manager of the store and no one else wanted to do the route, Bob was elected. He drove a truck weekly to the San Francisco area and bought rolled oats from The Food Mill in Oakland, cashew nuts from Hirschfelder in San Francisco, 2 barrels of honey from Les Garabaldi (a bee-keeper in Canyon), miso and soy sauce from Chico-San in Chico, apple juice from Heinke's in Paradise. Then he stored all the ingredients in his room that he rented in a farmhouse in Dixon, a farm community near Davis. He weighed and bagged the ingredients in his room.

One of the partners suggested that they start a small farm or garden. So on a ½-1-acre plot behind a church he planted an organic garden and grew vegetables for the store. But the store couldn't sell them all, so Bob decided to try to distribute them and granola to other young natural food stores in Berkeley.

In late June 1970 Bob attended the founding meeting of Organic Merchants (OM), held outdoors on the side of Mt. Shasta. OM was the first trade association for natural food retailers on the West Coast and the first organic trade association.

In July 1970 Bob started distributing granola, fresh vegetables, and Heinke's apple juice in the company truck. He delivered these foods to various natural food retail stores in Berkeley: Wholly Foods (2999 Shattuck Ave. at Ashby), Good Natured Foods (on Solano), the Granary (and a macrobiotic retail food store on Shattuck near Vine), and Ma Revolution (on Telegraph).

Soon his granola ingredients and other items were added to his line (these were his sole worldly possessions): 2,000

lb dried organic pears (dried on a farmer's lot while camping out in the Santa Cruz mountains), fresh apples, fresh tomatoes, etc. Later, when Bob got too busy, Heinke's delivered their juice to his sister Margaret's house in El Sobrante, and he used her house as a juice warehouse.

Originally the distribution company had no name; it was Bob Gerner doing business as Bob Gerner with no business license. It was strictly cash and carry.

Some of the training in how to run the store was provided by Fred Rohé of New Age Natural Foods in San Francisco in early 1970. One of the partners went to work at Rohe's store, where he learned many of the basics, such as how to stock shelves, mark-up prices, etc. Fred ran this free training program, which took several days, for anyone who wanted to open a natural food store.

After a few hectic weeks as manager of this unwieldy, undercapitalized 10-person partnership, Bob decided to quit. He could see it wouldn't work. But he still kept working for them until someone else volunteered to do the truck run free of charge.

Being out of a job, Bob decided to start a new natural foods company with a smaller number of closer friends—though he still had no money. Bob's sister (Margaret), and his brother-in-law (Bob Ortiz) got together and founded the new company. Kristin was not interested in becoming a partner at that time. Bob found a truck. Ortiz, who was a teacher and a mechanic, retired as a teacher getting \$500 from his pension fund, bought the truck for \$100, and became the truck driver. Originally the company was run out of Margaret and Bob Ortiz's home. While looking for a warehouse and granola factory, the 3 partners found a vacant market (originally a small Safeway supermarket, more recently a market with a Chinese tenant, but it had had no tenant for 18 months) at 1336 Gilman St. in Berkeley. They signed the lease on 10 Aug. 1970. But the building was zoned for a retail store, so they opened a retail store in the first 12 feet of the building, and used the other 80% for a kitchen and warehouse for their wholesale business. The company still had no name, and in fact it did not have enough money to take down the sign on the building that said "Westbrae." So, what the heck, they decided to call the company "Westbrae Natural Foods." On 2 Feb. 1971 the store opened for business and got a business license.

Companies that began distributing natural foods in northern California before or at about the same time as Bob Gerner were Landstrom and K&L (Kahan & Lessin; both big, old-line distributors of health foods and supplements, from Los Angeles, started in the 1930s), The Food Mill in Oakland (1930s), Chico-San in Chico (about 1965; Bob bought their Spiral Foods soy sauce and miso in bulk wooden tubs from the Osoba Noodle Nook Restaurant [2505 Hearst in Berkeley] and from a garage in San Francisco), and New-Age Natural Foods in San Francisco (Fred Rohé; he started retailing in 1965-67, then began

distributing in the early 1970s). Bob recalls that he would go to New-Age Natural Foods, buy many bulk staples such as 50-pound sacks of whole grains (wheat or rye berries) and beans from Arrowhead Mills. Rohé sold these to Bob and others like him from his retail store at wholesale prices. Westbrae had a flour mill to grind its own fresh flour. By about early 1971 Fred opened a separate natural foods wholesale facility (named New Age Distributing) in San Jose. At first they wholesaled only produce. Then they branched out into dry goods, working with Dennis Morgan. The company changed its name to The Well in about 1972-73, then later it was renamed Pure and Simple. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

3572. Gray, Sylvia Ruth. 1991. Re: Vitamin B-12. Letter to William Shurtleff at Soyfoods Center, Sept. 29. 2 p. typed.

• **Summary:** Sylvia initiated the vitamin B-12 project in 1988 after reading various scientific studies showing low levels of B-12 in common macrobiotic and vegetarian foods. "At present, more than fifty vitamin B-12 food assays have been completed on 12 vegetarian cobalamin sources and 12 animal product sources. Seven cobalt assays have also been completed. A very recent assay on the brain of range fed/finished beef showed vitamin B-12 content of 1/46th of previously norms for this organ." Assays cost \$85 each.

"In my estimate, the concentration of toxic and/or antinutritive factors in all beans and bean products (with the exception of very aged products such as miso and shoyu) renders them 'iffy+' for daily use." A color photo of Sylvia, her youngest daughter, and two granddaughters is enclosed. Address: Strictly Macrobiotics and The Vitamin B-12 Project, 315 First Ave., Salt Lake City, Utah 84103. Phone: 801-521-7936.

3573. Kudou, Shigemitsu; Fleury, Y.; Welti, D.; Magnolato, D.; Uchida, T.; Kitamura, K.; Okubo, K. 1991. Malonyl isoflavone glycosides in soybean seeds (*Glycine max* Merrill). *Agricultural and Biological Chemistry* 55(9):2227-33. Sept. [21 ref]

• **Summary:** Isoflavone concentration in the soybean hypocotyl is about 5-6 times higher than in the cotyledons. Nine kinds of isoflavone glycosides were isolated from the hypocotyls of soybean seeds. Three kinds were proved to be malonylated soybean isoflavones. The principal conjugated forms of isoflavones in the soybean hypocotyl were 6"-O-malonylglucosides. "All of the isoflavone components produced intensely undesirable taste effects such as bitter, astringent and dry mouth feeling."

A graph (p. 2229) shows "Isoflavone accumulation during maturation of Maple Arrow soybean seeds." The accumulation of daidzin, genistin, glycitin and their corresponding malonylated forms in immature seeds during

development began at about 35 days after flowering and increased until about 60 days after flowering. Malonylgénistin and the genistin content increased during the late development of the beans, whereas malonyldaidzin and daidzin accumulated throughout the whole period. Address: 1&5. Kanesa Miso Co., Ltd., 202 Hamada, Tamagawa, Aomori 030, Japan; 2-4. Research Centre, Nestlé Ltd., P.O. Box 44, Vers-Chez-Les-Blanc, CH-1000 Lausanne 26, Switzerland.

3574. Nishimoto, Miyoko. 1991. *The now and Zen epicure: Gourmet cuisine for the enlightened palate*. Summertown, Tennessee: The Book Publishing Co. 250 p. Color photos. Index. 24 x 21 cm.

• **Summary:** This is a gorgeous, delightful vegan cookbook (though it uses honey), loaded with color photos. Most recipes, designed for entertaining, embody an atmosphere of elegance with a sense of fun, capturing the best of traditional European cuisine, offering gourmet recipes with an element of Japanese style, simplicity, and flavor. Each recipe is accompanied by a nutritional analysis, and most are remarkably low in fat.

The author is founder and owner of the Now & Zen Bakery (1838 Golden Gate Ave., San Francisco, CA 94115) which is well known for its tofu cheesecakes and other delights, and which sells dried okara. She is also a jazz vocalist and vegetarian chef. Born in Japan to a Japanese mother and an American father, she moved to Mill Valley, California, with her parents when she was age 7 and became a vegetarian at age 12. A photo on the rear cover shows Miyoko Nishimoto. She shows great virtuosity in the use of soyfoods—and wheat gluten. The section on ingredients contains excellent, detailed information on miso, nut milks and creams (almond milk and cashew milk, which the author prefers for some uses to soymilk), agar, okara, soy milk and soy cream, soy sauce, soy sour cream, soy yogurt, tamari, tempeh, tofu, frozen tofu, and pressed tofu.

Soy-related recipes include: Tofu “cheese” (p. 32). Tofu “boursin” or herb-garlic cheese ball (p. 33). Tofu “feta” cheese (p. 35). Tofu cream cheese spread with herbs (p. 36). Eggplant and tofu pâté (p. 51). Smoked tofu, mushroom, and garlic canapés (p. 53). Tofu “mornay” sauce (p. 65). Tofu aioli (p. 82). An introduction to quick and tasty tofu cream soups is given on p. 108. Each of the following cream soups contain tofu. Cream of pumpkin soup (p. 109). Cream of corn soup (p. 110). Cream of green pea soup (p. 111).

Mediterranean eggplant and tofu gratin (p. 115). Tofu burgers suprême (p. 118). Creamy tempeh curry (p. 119). Tempeh mexicali (p. 121). Sweet and sour tofu (p. 122-23). Whole cabbage with hearty tempeh stuffing (p. 124-25). Herbed soybean casserole or stew (p. 132). Savory tempeh and vegetable stew (p. 134-35). Tofu bourguignon (p. 138-39). Homemade tofu pasta (p. 142-43). Ginger tempeh with

green peppers (p. 145). Homemade gluten, Tempeh and gluten burgers, and the Great gluten turkey with dressing (p. 150-160). Tempura tofu (p. 163). Marinated tofu (p. 164). Smoky marinated tofu (p. 165). Believable bacon (with tofu, p. 166). Beans and “bacon” casserole (with tofu, p. 167). Orange-soy dressing (p. 177). Tofu sour cream (p. 179). Tofu mayonnaise (p. 180). Tofu thousand island dressing (p. 182). Tropical coconut banana ice cream or sauce (with tofu, p. 212). A different pumpkin ice cream (with tofu, p. 213). Italian cheese-less cake (with tofu, p. 216). Cashew cheesecake (with tofu, p. 217). Tofu crème (p. 218).

For a lengthy and very positive review of this book by Carol Flinders, see *Vegetarian Times* Nov. 1991, p. 86-87. Address: San Francisco, California.

3575. South River Miso Co. Inc. 1991. *Cooking at home with South River Miso* (Leaflet). Conway, Massachusetts. 10 panels. Front and back. 14 x 10 cm. [6 ref]

• **Summary:** Printed with brown ink printed on tan paper, this leaflet contains 11 recipes, some interesting information about miso, and several illustrations. Address: South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

3576. South River Miso Co. Inc. 1991. *Storing miso at home* (Leaflet). Conway, Massachusetts. 6 panels. Front and back. 14 x 10 cm. [6 ref]

• **Summary:** Printed with purple ink on gray paper, this leaflet describes how to store different amounts of miso at home, and deals with the problem of mold growth. Contains 4 illustrations from *The Book of Miso*, by Shurtleff & Aoyagi. Address: South River Farm, Conway, Massachusetts 01341. Phone: (413) 369-4057.

3577. Kennedy, J. Robert. 1991. *History of Chico-San's distribution and import operations* (Interview). *SoyaScan Notes*. Oct. 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Chico-San never really developed its own distribution company. It used other established distributors, such as Balanced Foods in New Jersey, K&L (Kahan & Lessin) in Los Angeles, Landstrom in San Francisco, and Health Foods Incorporated in Chicago. “We had a tough time getting started in selling macrobiotic foods. Chico-San also sold a lot of macrobiotic foods through its mail-order service because most of the large distributors only wanted the best-selling items such as rice cakes, soy sauce, and sesame salt; they wouldn't take the complete macrobiotic line.” In late 1962, shortly after the company was established, Chico-San got a few vans and began a few small routes down to the San Francisco Bay Area and as far north as Redding, distributing 2 types of whole-grain bread (a rice loaf and an unleavened whole-wheat bread) and

gluten-nut crackers to the Berkeley Co-op and established (old-line) health food stores. The Berkeley Co-op was one of the first to carry the full line of macrobiotic products. These routes continued until about 1964-65.

Chico-San's first really successful product was rice cakes. They were introduced in 1963 but initially the big distributors took showed interest. That changed starting in about 1964 when a new generation of rice cake machines began to make a better product and a few of the big distributors started to carry them. By 1965 Chico-San's rice cakes and other popular products were being sold at more than 150 California outlets. It was the national popularity of the rice cakes that kept Chico-San from developing its own distribution company, and relying instead on larges established distributors—and later brokers.

By about 1966-1967 rice cakes and rice chips (*senbei*) were beginning to cut a wedge into the mass market nationwide, so Chico-San created the Spiral Foods brand for these mainstream products, keeping the Chico-San brand for the health food market.

Concerning imports of miso and soy sauce from Japan, Chico-San first imported directly from George Ohsawa; he located the manufacturer, put the order together, and shipped it himself. Then came Nippon C.I., which was started by George and some of his disciples in Tokyo, but it didn't last very long. In 1966 Chico-San started importing from Muso Shokuhin in Osaka. But after Muso started selling a lot to Erewhon (which became a major competitor for Chico-San), Bob felt that product quality began to decline, so he began to do all his importing from Ohsawa Japan, a company that was developed by George's sister-in-law (Lima Ohsawa's sister), Flora Tanaka, at George's request. Bob felt the quality of products from Ohsawa Japan was better than from Muso, but the prices were higher and the company was not quite as professional in its business dealings.

Concerning the sale of Chico-San to Heinz, Bob is overall not very happy with the outcome. Granted, rice cakes are now much more widely known and sold in supermarkets, but the loss of Chico-San "put a big hole in the process of selling macrobiotic foods." Bob and Herman Aihara bought back the macrobiotic line from Heinz and created Ohsawa America in Chico to try to sell it. Early general managers were Marty Roth, then Lane Seiger (who had previously worked for Bob at Chico-San). But the volume was not there on relatively few products to sustain a company profitably and eventually the company ran up debts of \$300,000. At that point Bob basically gave the company to Sierra Natural Foods in Brisbane, California. Sierra had several thousand products; they only paid for the inventory. Bob is now working to develop new products from rice—such as a rice-crust pizza and crackers. Address: Chico, California. Phone: 916-891-0970.

3578. Ebine, Hideo. 1991. Nutritive value and physiological function of miso. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 89-94. [17 ref]
 • **Summary:** In 1989, approximately 599,000 tonnes of miso were produced commercially in Japan; of this, 80% as rice miso, 10% barley miso, and 10% soybean miso. In addition, an estimated 40,000 tonnes of miso were made at home. Per capita consumption was 5.2 kg/year. 90% or more of all miso in Japan is used as an ingredient in soups. Table 1 shows the 3 basic varieties of miso (rice, barley, and soybean), the 8 subvarieties based on taste and color, and the principal areas where each subvariety is produced. Discusses the basic process for making miso, the chemical composition, fatty acid composition and vitamin and mineral composition of 5 basic types, plus the amino acid composition of 4 basic types. Research is summarized which indicates that miso consumption reduces gastric cancer mortality (Hirayama 1984), miso contains an antimutagen against benzo(a)pyrene and trp-p-1 (Kitamura 1984), miso reduces hepatic [liver] tumors caused by neutron radiation of mice (Ita et al. 1989), a miso component depresses tumor formation by Sarcoma-180 inoculated in mice (Miyazaki 1989), salt-free miso has a cholesterol-lowering effect (Horii et al. 1990), and regular miso has antioxidative activity (H. Kato, 1989). Address: Central Miso Research Inst., Shinkawa 1-26-19, Chuo-ku, Tokyo 104, Japan.

3579. **Product Name:** [Tempast {Vegetarian Tempeh Spread}].

Foreign Name: Tempast.

Manufacturer's Name: Lima Foods (Marketer).

Manufacturer's Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

Date of Introduction: 1991. October.

Ingredients: Water, tempeh*, sunflower seeds*, whole meal bread*, sunflower oil*, miso, free range eggs, onion*, pumpkin*, dulse (seaweed), ume [plum] vinegar, sea-salt, herbs. * = Organically grown.

Wt/Vol., Packaging, Price: 150 gm glass jar. Retails for DM 6.70 (10/91, Bremen, Germany).

How Stored: Shelf stable; refrigerate after opening.

New Product-Documentation: Label sent by Anthony Marrese of Bremen, Germany. 1991. Oct. 7. 9.25 by 1 inches. Paper. Black on light orange. Color photo of the spread on a slice of bread, topped with a slice of radish and cucumber. CINAB organic certification symbol. Nature et Progres organic certification symbol. Ingredients are listed in Dutch, French, German, and English.

3580. **Product Name:** [Tofu, Tofu Mayonnaise, Hot Squash Pies with Miso-Tofu Topping, Tofu Tart (with

Cocoa or Carob), Tofu Salad with Tahini, Vegetarian Spring Rolls (Filled with Rice, Tofu & Soy Sprouts), Seitan].

Foreign Name: Tofou, Tourte au Giraumon (Nappage Miso, Tofou et Umé), Tarte au Tofou (cacao-pays, ou fruits de saison), Salade de Tofou (Tofou, crème de Sésame, tamari, aromates), Nems, Seitan.

Manufacturer's Name: Pascal Pinault.

Manufacturer's Address: "Caplet," 97226 Morne Vert, Martinique, French West Indies 0033. Phone: +59 6 55 56 57.

Date of Introduction: 1991. October.

New Product–Documentation: Talk with Pascal's sister, Marie, who calls from Orange County, California, to enquire about a source of tempeh starter for Pascal. 1993. March 17. Pascal has been very involved with soyfoods for many years. He has been making tofu and tofu products out of his home in Martinique for several years; he sells these mostly to restaurants. He would like to start making tempeh.

Letter, price list, and resume sent by Pascal Pinault at the above address. 1993. April 2. In Martinique he has been making an average of 12 to 20 pounds of tofu every week since Oct. 1991. His business has no formal name. He uses most of the tofu he makes to produce second generation products such as tofu mayonnaise, hot squash pies with miso-tofu topping, tofu & cocoa (or carob) sweet pie, tofu salad, spring rolls (*Nems*). For details see entry for the letter.

Note: This is the earliest known commercial soy product made in Martinique or any French Overseas Department.

3581. Saio, Kyoko; Watanabe, Tokuji. 1991. Food use of soybeans in Japan. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 35.

• **Summary:** In 1988 some 47,000,000 tons of soybeans were consumed in Japan; 79% of this amount was used to make edible and 19% (8,900,000 tons) was used for foods. In the process of making edible soy oil, more than 3,000,000 tons of defatted soybean meal were produced; 89% of this was used as livestock and poultry feeds, and 12% was used in foods (mostly for soy sauce, but with some for soy protein products and others). There has been a rapid increase in consumption of edible oil and defatted meal in Japan, accompanied by an increase in animal protein in the diet.

In 1988 Japan produced only 290,000 tons of soybeans domestically, and most of this amount was used for foods, especially tofu (60%), miso (24%), natto (9%), and other foods (dried-frozen tofu, yuba, kinako, etc.). The consumption of these foods have risen proportionally to the increase in Japan's population, which means that over all per capita consumption is static.

A recent survey conducted in Japan showed that 82% of Japanese ate soyfoods more than 3 times/week, and that Japanese people had a rather good image of these foods,

describing them as healthy, natural, tasty, good for daily use, inexpensive, and delicious.

Japanese enjoy both traditional and modern soyfoods. The technologies for making "Vegetable Protein Products" from soybean meal have been introduced from the USA since 1970, but these have been modified and adapted to suit Japan's tastes and needs. "The importance of soybean foods in Japanese dietary life cannot be too much emphasized. We love them as traditional but also new foods." Address: 1. Research Council Secretariat, MAFF; 2. Tokyo Metropolitan Food Technological Research Center. K. Saio is presently at: National Food Research Inst., MAFF, 2-1-2, Kannondai, Tsukuba 305, Japan.

3582. Smoky Mountain Natural Foods. 1991. Fall/Winter 1991. Natural foods price list [Mail order catalog]. 15 Aspen Court, Asheville, North Carolina 28806. 23 p. 28 cm.

• **Summary:** This is a "Catalogue of natural foods, body care and home products for a healthier, more natural way of life." This mail-order company, which began operation in Jan. 1991, sells products made by other companies; it does not do any manufacturing and does not have its own brand on any products. Their specialty is macrobiotics products, and they buy their Japanese imports from Macrobiotic Wholesale Co. They sell miso (Miso Master American Miso, Mitoku Japanese miso, Traditional Foods domestic miso, and instant miso soups from Edward & Sons), black soybeans and azuki beans (organic are grown in the USA, non-organic from Hokkaido), sea vegetables, soy sauce (San-J shoyu and tamari, Mansan tamari, Sakae shoyu, Johsen shoyu), San-J teriyaki sauce and Szechuan sauce, Nasoya dressings and Nayonaise, Natto miso chutney, Sesame miso sprinkle, Tekka condiment (jar or bag), jinenjo tekka, MMB [Mitoku Macrobiotic, a premium brand] organic farmhouse tekka, seitan, MMB traditional dried tofu, Tofu burger, scrambler, and stroganoff, Sweet Cloud sesame miso munchie, Sweet life miso candy.

John Troy is not connected to this company, nor is John Belleme; John is the wizard, and now he makes sauces from the Wizard's Cauldron. He also works with John Belleme at Traditional Foods making seitan. Address: North Carolina. Phone: 1-800-926-0974.

3583. **Product Name:** Kasha Miso [With Buckwheat Koji].

Manufacturer's Name: South River Miso Co. Inc.

Manufacturer's Address: South River Farm, Conway, MA 01341. Phone: 413-369-4057.

Date of Introduction: 1991. October.

Ingredients: Deep well water, organically grown buckwheat, organically grown soybeans, sun-dried sea salt, koji culture. Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 1 lb plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Talk with then Label sent by Christian Elwell. 1992. March 13. Soybeans are a major ingredient in this miso, but the koji is made with buckwheat. His company sold 300-400 lb. He started selling this miso in Oct. 1991. Label. 3.5 by 2 inches. Black on white. Self adhesive. “100% organic ingredients. Unpasteurized. Please refrigerate.” There is a statement about traditional miso making signed by Christian and Gaella Elwell, a recipe for everyday miso soup, and an illustration of a silhouette of a mother handing a bowl of soup to her son seated across the table.

3584. **Product Name:** Meat of Wheat Sun Burgers, Grilled Burgers, Chicken Style, Sausage Style, Hearty Original (Seitan Loaf), or Chicken Style Chili.

Manufacturer’s Name: Ivy Foods.

Manufacturer’s Address: Office: 7613 S. Prospector Dr., Salt Lake City, UT 84121. Phone: 801-943-7664. Fax: 801-943-7311.

Date of Introduction: 1991. November.

Ingredients: Sun Burger: Wheat gluten, brown rice, tamari, miso, onion, garlic, lemon juice, bean flour [white bean, black bean, garbanzo], yeast, flour, walnuts, vegetable oil [canola oil], xanthan gum, spices and natural seasonings.

Wt/Vol., Packaging, Price: 16 oz plastic bag inside a paperboard box.

How Stored: Refrigerated.

Nutrition: Per 98 gm.: Calories 221, protein 26 gm, carbohydrate 28 gm, fat 2 gm, cholesterol 0 mg, sodium 277 mg.

New Product–Documentation: Talk with Goldie Caughlan of Puget Consumers Co-op in Seattle. 1992. Feb. 7. The company is selling gluten-based products under two trademarks: Wheat Meat and Meat of Wheat. Ivy Foods, the maker, is a member of Ivy International. Some of the products are of excellent quality. The company, a new company, will be showing the products shortly in Tacoma, and then at Anaheim. They were at the Anaheim show in early 1991 scoping out the market. She is not sure whether or not they have any products for sale yet. They also seem to be selling some Worthington products (Morningstar Farms line).

Talk with Mira Blue Machlis (pronounced MAK-liss) of Ivy Foods. 1992. Feb. 7. She and her husband, Mark, own this company. Mark has been in the restaurant business all his life, and his father originally owned all the Farrel’s Ice Cream parlors in the northwest. Their company introduced their products in 1991 at Anaheim as Wheat Meat. The government was 9 months late in letting them know that they couldn’t use that Trademark, because it was already registered. Their attorney did a trademark search and they got a copy of the trademark application and found out the person who owns the trademark. The trademark was

registered in about 1982 although it states that the owner first started making the product in 1977. The owner of the trademark no longer lives where the Trademark was registered, but they have his phone number. Their company is now test marketing 5 gluten-based products in Salt Lake City and the surrounding area. And these products are available by mail order. They plan to make a gluten-based chili, which Sysco, a restaurant supply company, is now carrying. Ivy Foods, a regular business, is a member (not a division) of Ivy International, a contemplative group. “We are considering opening the company up to be a cooperative after a while. We’re not in this to make money. We’re in this more to set up a model business. We make all of our decisions through contemplation. We try to do things a little more consciously, and to recognize that food really is a vehicle for nurturing. This country has kind of forgotten that. When we moved to Salt Lake City we opened up a little vegetarian restaurant, the Sun Bun Café, with 2 partners. Mark started developing the Sunburger for them. It became so popular that we decided to take it to the natural foods show at Anaheim to see what the response was. The response was overwhelming. Now we are ready.” Originally they considered food service operators their main potential customers, but now they hope to establish their base among natural food consumers. The little natural food store in town sells about 100 lb/week. After that base is stabilized, they plan to focus more on mainstreaming.

They have applied for a trademark on Meat of Wheat. They manufacture the products and their temporary plant will soon be moving to a new location.

Talk with Mark Machlis of Ivy Foods. 1992. Feb. 27. Most of their products (Chicken, Sausage, and 2 burgers) were first available for sale in Nov. 1991 at several stores in Salt Lake City. They now have a mail order program which allows them to ship their products in bulk as cheaply as they can put them in a store. This is good for people in outlying areas.

Products (Sun Burger, Chicken Style) with Labels sent by Mark Machlis. 1992. March. 4.25 by 6.5 by 2.75 inches. Paperboard box. Chocolate brown, red, white, green, gold, and tan. Sun Burger: Color photo of two patties on a wooden cutting board surrounded by grains and vegetables. “Vegetarian. Gourmet grain protein.” Contains three preparation hints. At the top of one side panel is a symbol of one green circle inside another. Between the two is written “Animal Free” in bold green letters. In the central circle is an illustration of a lion and a lamb.” The text reads: “As citizens of the world seek ecological balance, consciously made food choices open new options for Animals and Mankind... ‘The frog does not drink up the pond in which he lives’ (Buddhist Proverb).”

“Ivy International seeks to assist more conscious shoppers with an easily recognizable symbol which will clearly identify a vegan food product from lacto-ovo

vegetarian products. For the free brochure, 'More Conscious Nourishment,' write to: Ivy International, Brighton Star Route, Brighton, Utah 84121.

Soyfoods Center Product Evaluation: Sun Burger. Package design: Generally excellent, but the term "Wheat Meat" is a registered trademark owned by another person, and a refrigeration statement should appear more prominently. The ingredients terms "bean flour" and "vegetable oil" are ambiguous. Sensory evaluation: All liked the product (score of 8); good texture and flavor. Chicken Style: Sensory evaluation: Some liked the product (score of 8), but one person did not (2), saying it reminded her of bread. The pieces are like torn pieces of chicken.

Leaflet. "Meat of Wheat Gourmet Grain Protein." A black and white photo shows each of 4 products. "All natural ingredients. Low fat. No cholesterol. High protein. Animal free." Ingredients in other products: Chicken Style: Wheat gluten, bean flour, vegetable oil, spices and natural seasonings. Sausage Style: Same as Chicken Style. Hearty Original: Wheat gluten, tamari, onion, garlic, lemon juice, bean flour, yeast, walnuts, vegetable oil, spices and natural seasonings. In a chart titled "Nutritional Comparisons," each of 4 products is compared with its meat counterpart and a Worthington counterpart. In each case the Ivy Foods product has a lower percentage of calories from fat (9-17%).

Wheat of Meat recipes: Contains 8 recipes on the front and back of one sheet. The Chicken-Style Chili is available only for institutional and restaurant use.

Spot in Natural Foods Merchandiser. 1993. Sept. p. 76. Receive up to 20% off on Meat of Wheat Sausage Style.

Ad in Vegetarian Times. 1993. Sept. p. 50. "Meat of Wheat." Available in: Grilled Burgers, Sun Burgers, Chicken Style, Sausage Style, Hearty Original. Order from your health food store or call Ivy Foods direct at 1-800-280-1313. Gives a recipe for Meat of Wheat Magnificence.

Ad in Vegetarian Times. 1993. Oct. p. 32. "Meat of Wheat." "Sausage Style ideas: Pizza topping, manicotti & lasagne, tacos & burritos, tossed with pasta.

Ad in Vegetarian Times. 1993. Nov. p. 20. "Giving Thanks." Make a vegetarian "no Tom" turkey using Wheat of Meat Chicken Style.

3585. Teegarden, Ron. 1991. Founding and early history of the food co-op (in Ann Arbor, Michigan) that later became Eden Foods (Interview). *SoyaScan Notes*. Dec. 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ron ran a business named the Teegarden-Leabu General Store located in the basement of Marshall's Bookstore (that sold radical and anarchist literature), which was below the Herb David Guitar Studio at 209 South State Street a few blocks off Main Street in Ann Arbor. The store was financed by his partner and best friend Vic Leabu (pronounced luh-BOE then but luh-BUU now; it's Romanian not French), and Gloria Dunn worked there a lot.

A very kind black lady named Rose from Marshall's Bookstore rented Ron and Vic the space for \$50.00 a month because she liked the creative work they were doing and Marshall's was using the basement. The store sold antique clothing from the 1920s, art from local artists, and records; it was not a thrift store.

In about the summer of 1969 Ron and Gloria Dunn started a small food-buying co-op. The co-op was an eccentric, inventive, creative expression—and food was part of it. Co-ops were very new in those days. Within a few weeks some friends, who were also involved in macrobiotic cooking, joined the circle of people that were buying food together. These included Vic Leabu, Tim Redmond, Mark and Nancy Retzliff, and Bob Thorson. The informal group ordered food from Erewhon roughly 3-5 times; Gloria and Ron put together the orders which were probably pre-paid. When the food arrived, those who had participated in the order divided it up at the Teegarden-Leabu General Store. Ron Teegarden brought whole grains and miso into the co-op. Vic Leabu's influence gradually increased, while Gloria's declined. At the maximum, no more than 12 people were ever involved with the food co-op to which Ron belonged. It was never thought of as a business, it had no assets nor board of directors, and it never paid any money for the space that it used occasionally. It was just a bunch of people buying together.

When the co-op first started, there was only one little old-line health food store in Ann Arbor; the room was about 10 feet square and it did not sell natural or macrobiotic foods except very expensive brown rice in little bags.

To go back a bit: In early 1968 Ron felt he was becoming severely debilitated—from smoking pot (as was the fashion in those days) and the incessant pressure of being a varsity tennis player at Michigan on a full athletic scholarship and a pre-med student with a heavy academic load. In retrospect, he felt like he almost had chronic fatigue syndrome from burning the candle at every end. So he wrote a letter to George Ohsawa (not knowing that Ohsawa had died) asking for advice. He got a great letter back from Herman Aihara saying, in effect: "Eat miso soup and tekka every day, use them to help you give up coffee, and if you ever come to California, please come and stay with me."

Ron was deeply impressed with Herman's kind and generous offer to a person he didn't even know. So Ron sold his dope to buy an airplane ticket to California, and appeared at Herman's door in long hair and a beard. They took him in and within a week his life changed and has never gone back. "It was a revelation." He became thoroughly macrobiotic, quit drugs, and returned to Ann Arbor; thereafter his memory became clearer and he dropped everything to start what has become a lifelong interest in Oriental medicine and healing. Ron notes: "I am eternally grateful to Herman as great man." Shortly thereafter Ron and Iona, who had known each other for years

but ever gotten along well, were married; she then quit drugs, started a macrobiotic diet, joined the co-op, and soon became a fantastic cook. In 1971 she wrote a cookbook titled *Freedom through cooking: The macrobiotic way*.

Jimmy Silver was not a member of the co-op but he was a key influence because he had been macrobiotic for about 2 years, he had an advanced understanding of the philosophy and practice, he had long hair and was very hip, but he did not use drugs—which was very rare at that time. He was so healthy, his wife was very beautiful, and they were both very pure. He managed a rock group named the MC-5 whose motto was “Sex, drugs, and rock and roll.” People looked up to him as the leader of the macrobiotic movement in Ann Arbor. Ron doesn’t know where Jimmy got his food—he never came into the co-op. Nor does he recall that the co-op ever had a bank account and he does not see why they would have needed one.

But after 2-6 months the local health department wouldn’t let them keep grains in the basement of Marshall’s Bookstore, so they moved it to an upstairs location at 514 East William Street; that was when Bill Bolduc and Tim Redmond (with important guidance from Jimmy Silver and help from Mark Retzloff) began to organize the co-op and transform it into a company, which was first given a name—Eden Organic Foods. At that same time, Ron greatly decreased his involvement in the food co-op. He shopped at the co-op quite a bit but he does not recall ever working there. He was busy with his own store and he became motivated to try to finish school (he was in school but carrying a light load), then he wanted to move to California, so he and Iona sold their second-hand general store for \$300.

The question arises: When was Eden Foods established? Ron Teeguarden believes that the idea for Eden Foods was born in mid-1969 with the establishment of the original unnamed food co-op that ordered macrobiotic foods. “That was when the seed was planted, though it didn’t bloom until later that year when the name Eden was coined and a real macrobiotic food company came into existence.” Ron is happy to have been connected with this group and to helped to plant the seed that has become one of America’s most successful natural food and macrobiotic food companies—Eden Foods—but he feels that he deserves very little credit for what he did and he certainly does not want to be called “the founder.” “Most of the credit for establishing the company goes to Bill Bolduc.” He is now deeply involved with Chinese herbs, has just raised close to \$1 million, and plans to build an upscale store in Hollywood by late 1992, and eventually take his concept nationwide.

Follow-up talk with Ron. 1993. March 6. The time from 1967 to 1969 is quite hazy in his mind. It seems like another life and another world. “It’s a funny, fuzzy feeling to know that I was part of Eden and part of Erewhon when it first started.” Ron also started the Acupressure Center in

Berkeley. Ron did not follow developments at Eden Organic Foods after he left Ann Arbor in 1970. He does not recall having ever met Michael Potter, and he still does not recall that the food co-op ever had a bank account or that he ever signed a signature card for that account (yet “We probably did have a bank account; Maybe Vic got it and I might have signed it. Maybe that’s where the money went every day.”) And he has never been aware that the name “Eden” may have been derived from letters in his last name—but he is not sure that his recollections are correct. His new Herbal Emporium in Hollywood is coming along very nicely. Address: The Tea Garden, 1334 Abbott Kinney Blvd., Venice, California 90291. Phone: 310-450-0188.

3586. **Product Name:** [Sweet Simmered Miso, and Soy & Sunflowerseed Miso].

Foreign Name: Nerimiso, Sun-Miso.

Manufacturer’s Name: Soy & Rice.

Manufacturer’s Address: Via A. Canale 8/c, 10078 Venaria Reale (TO), Italy. Phone: 011-402-0380.

Date of Introduction: 1991. December.

New Product–Documentation: Letter and Labels sent by Bosco Franca and Garafola Carmelo of Soy & Rice. 1992. Feb. 4 by 2.75 inches. Black on white. Self adhesive. The logo is that developed by Mitoku which states in Japanese characters “*I Shoku Dô Gen*” (Medicine and food come from the same source, or Your food is your best medicine). Store at 4°C [39.2°F]. The company began to make this product on a test basis in about Dec. 1991. Both products are sweetened with corn malt (Malto di Mais).

3587. Tsuiseki: Iya-dôfu [Chase: Stone-dofu] 1991.

Television broadcast. Channel 26. California. Dec. 29. Sun. 7-7:30 P.M. [Jap]

• **Summary:** In 1185 when the Genji (Minamoto) clan defeated the Heike (Taira) in a famous naval battle on the Inland Sea, some of the Heike survivors fled to mountainous central part of Shikoku island, where their descendants still live today in the remote village of Iya. Shizue Fukushima, a 73-year-old woman, is the village tofu maker. Her Iya-dofu, also called *iwa-dofu* or *ishi-dofu* (meaning “stone tofu”), is much harder than most Japanese tofu. Made by hand, with nigari as a coagulant and without machines, it takes 3 times as long to make as most tofu. The curds are broken into small pieces by vigorous stirring and they are then pressed with a heavy weight for a long time. The finished tofu, dropped onto a stone floor from a height of 1 meter, remains unbroken. A favorite preparation in the village is named *Dekomawashi* derived from the words Dengaku plus *mawasu* (to turn). Slabs of tofu are skewered, and spread with miso. The base of each wooden skewer is then placed nearly upright into the hearth ashes around a fire. Small potatoes are also skewered on separate skewers.

When one side is nicely grilled, the tofu is turned so that the other side can also be grilled. Address: Japan.

3588. **Product Name:** Mitoku Goma-Muso Sesame-Miso Sprinkle.

Manufacturer's Name: Mitoku Co. Ltd. (Distributor).
Made in Japan.

Manufacturer's Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1991.

Ingredients: Barley miso (whole soybeans, barley, sea salt), toasted whole sesame seeds.

Wt/Vol., Packaging, Price: 2.8 oz (80 gm) plastic bag. Retails for \$2.39 (11/91, USA).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 3 by 3.5 inches. Self adhesive, on a 4.5 by 6.5 inch plastic bag. Reddish orange, yellow, and white. "A traditional Japanese condiment... Sprinkle freely on brown rice, vegetables and other favorite dishes to impart extra goodness, flavor and nutritiousness."

3589. **Product Name:** Sweet Life Candies: Miso Drops–Natural Brown Rice Malt Candy.

Manufacturer's Name: Mitoku Co. Ltd. (Distributor).
Made in Japan.

Manufacturer's Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1991.

Ingredients: Traditional rice malt (selected whole brown rice, organic sprouted barley, pure spring water), natural brown rice miso (whole soybeans, whole brown rice, water, sea salt).

Wt/Vol., Packaging, Price: 1.76 oz (50 gm) plastic bag. Retails for \$1.19 (11/91, USA).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 4.5 by 6 inches. Plastic bag. Gold and white on brown with see-through window. "The original sugar-free sweets from Japan... Sweet Life Candies contain no sugar or any artificial sweetening whatsoever; just the rich goodness of rice malt, with exciting natural flavors. The perfect taste treat for all the family." There are 12 other flavors in this natural candy line. The miso flavor is hard, not chewy.

3590. **Product Name:** Jinenjo Tekka: Tekka Condiment.

Manufacturer's Name: Mitoku Co. Ltd. (Distributor).
Made in Japan.

Manufacturer's Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1991.

Ingredients: Hatcho miso (whole soybeans, water, salt), jinenjo (wild mountain yam), lotus root, carrot, burdock, ginger, toasted sesame oil.

Wt/Vol., Packaging, Price: 3.5 oz (100 gm) plastic bag. Retails for \$5.99 (11/91, USA).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 3.5 by 2.75 inches. Self adhesive, on a 6 by 4.5 inch plastic bag. Blue on white.

3591. **Product Name:** Mitoku Natto Miso Chutney: Barley/Soybean/Vegetable Relish.

Manufacturer's Name: Mitoku Co. Ltd. (Distributor).
Made in Japan.

Manufacturer's Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1991.

Ingredients: Barley, whole soybeans, barley malt, kombu, ginger, water, sea salt.

Wt/Vol., Packaging, Price: 10.5 oz (300 gm) plastic crock. Retails for \$3.99 (11/91, USA).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 3 inch diameter. Self adhesive. Red and yellow on metallic gold.

Soyfoods Center product evaluation. 1991. Dec. 3. Good name! This condiment, which resembles Indian chutney in its chunky consistency, but is a little more salty and less sweet, is actually a type of Finger Lickin' Miso (namé miso). Flavor: Very nice. Label design: Terrible–too hard to read.

3592. Shinshu-Miso Research Institute. 1991. *Report of the Shinshu-Miso Research Institute* No. 32. p. 1-130. [Jap; eng]

Address: Nakagoshō 469-6, Nagano-shi 380, Japan.

3593. **Product Name:** "Beefy" Burrito (Renamed Mexican Tofu Burrito), and Mexican Tofu Sloppy Joe.

Manufacturer's Name: Soy Devine.

Manufacturer's Address: Box 668, Miranda, CA 95553.

Date of Introduction: 1991.

New Product–Documentation: Talk with Mara Devine. 1995. June 1. In 1995 Cajun Barbecue Style was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. She moved from Miranda to Arcata, California, in June 1993.

3594. **Product Name:** Simply Delicious Vinaigrette Un-Dressing [Tofu Poppyseed, Lemon Tahini, Miso Sesame, Herb Garlic], and Miso Magic.

Manufacturer's Name: Wizard's Cauldron, Ltd.

Manufacturer's Address: P.O. Box 969, 108 S. Church St., Hillsborough, NC 27278. Phone: 919-732-9445.

Date of Introduction: 1991.

Ingredients: Tofu Poppyseed: Canola oil, well water, apple cider vinegar, honey, organic tofu (White Wave), clear shoyu, garlic juice, white wine, pepper mash, lemon juice, mustard, poppyseeds, natural herbs & flavours, natural vegetable gum.

Wt/Vol., Packaging, Price: 10 fluid oz (300 ml) glass bottle.

How Stored: Shelf stable.

New Product–Documentation: Talk with John Belleme. 1992. July 11. John Troy is back in business after American Natural Foods went bankrupt—with the help of designer / marketer John Fogg. He now owns and runs a company named Wizard's Cauldron, located about 100 miles from where Belleme lives. Of his 30-35 products, the one Belleme likes best is Miso Magic, which is a sauce and/or dressing in his Simply Delicious line. John Troy has been very successful. He just spent \$200,000 upgrading his operation. He has a totally automated bottling and labeling line. His specialty is interesting combinations of esoteric ingredients. He makes two lines for Joel Dee under the Edward & Sons label.

Products sent by John Troy. Reddish brown and dark blue on pastel labels. Stylish. Lemon Tahini contains "clear shoyu" as the fifth ingredient. Herb Garlic contains "clear shoyu" as the sixth ingredient.

Talk with John Troy. 1999. May 3. His plant is now located at 8411 Hwy. N.C. 86 N, Cedar Grove, North Carolina 27231. He does a lot of work out of his home. Two thirds of his business is private label; he makes 14 SKUs for Whole Foods (such as Soy Ginger), Wizard's Hot Stuff for Joel Dee of Edward & Sons, Miso Mustard Dressing (fresh refrigerated organic) for Alberts, etc. He is in the process of removing the honey in some of his products and switching to agave nectar, to make them vegan and to give them a lower glycemic index; agave nectar is about to be approved as a sweetener for diabetics. Products he makes under his own Simply Delicious brand for the natural foods trade are three flavors of organic vinaigrette—each of which has a soy ingredient. They were introduced in about 1991.

3595. **Product Name:** Troy's Micro-Saucery Organic Ginger Sauce, Peanut Sauce, Chipotle Sauce.

Manufacturer's Name: Wizard's Cauldron, Ltd.

Manufacturer's Address: P.O. Box 969, 108 S. Church St., Hillsborough, NC 27278. Phone: 919-732-9445.

Date of Introduction: 1991.

Wt/Vol., Packaging, Price: Bottle.

New Product–Documentation: Talk with John Troy. 1999. May 3. His plant is now located at 8411 Hwy. N.C. 86 N, Cedar Grove, North Carolina 27231. Two thirds of his business is private label. Products he makes under his own

Troy's brand for the natural foods trade are three organic sauces—each of which has a soy ingredient. They were introduced in about 1991. Chipotle refers to smoked jalapeño; it is like a miso barbecue sauce, with a southwestern flavor profile. The ginger and peanut sauces each contain soy sauce.

3596. Chelf, Vicki Rae. 1991. *Cooking with the right side of the brain: Creative vegetarian cooking.* Garden City Park, NY: Avery Publishing Group Inc. viii + 283 p. Illust. incl. many color plates. Index. 28 cm.

• **Summary:** This vegetarian cookbook, which contains over 500 healthful recipes, shows a strong macrobiotic influence. The extensive glossary of ingredients includes good descriptions of adzuki beans, many sea vegetables, amaranth, amasake, gluten, gluten flour, koji, kudzu, miso, mochi, natto, natto miso, okara, quinoa, seitan, shoyu, silken tofu, soybeans, tamari, tempeh, tofu, and T.V.P. (Textured Vegetable Protein). All of these ingredients are used in recipes. There are at least 26 tofu recipes, 6 seitan recipes, and 4 tempeh recipes.

The author, who also illustrated this book, has been a vegetarian for 16 years. While living in Quebec, Canada, she wrote several French-language vegetarian cookbooks. The right side of the brain controls thoughts and actions that are creative, intuitive, spontaneous, and artistic, whereas the left side controls more logical, concise, analytical, and scientific thinking. Conventional education encourages development of the left side of the brain. This book encourages creative experimentation and improvisation with the recipes given.

3597. Clearspring Ltd. 1991. *Macrobiotic quality wholefoods.* London: Clearspring. 1 p. 1 sheet. 21 cm. *

• **Summary:** This leaflet advertises Clearspring's line of largely Japanese malt syrups, Japanese teas, sea vegetables, miso, soya sauces, amazake, umeboshi, pasta, sauces and crackers.

3598. Hesseltine, C.W. 1991. Peoria, an international center of fermentation excellence. *Transactions of the Illinois State Academy of Science* 84(1-2):1-11. [11 ref]

• **Summary:** This paper was presented on 28 Sept. 1989 as the after-dinner address for the 50th Anniversary Celebration of the Peoria (Illinois) Branch of the American Chemical Society. Contents: First fermentations. Hiram Walker Co. (1816-1899; for many years they operated the world's largest bourbon whiskey plant in Peoria). Takamine. Northern Regional Research Center. Penicillin & Dr. Andrew Moyer. Penicillin—others (incl. Dr. Kenneth Raper). USDA's Agricultural Research Service (ARS) culture collection (which dates back to 1904). Polysaccharides. Mycotoxins. Fermented foods (especially soyfoods such as miso, shoyu, and tempeh). Fermentation in Peoria today

(ADM uses the old Hiram Walker distillery to make fuel alcohol from corn). Honors and awards. References.

“Dr. Jokichi Takamine was the father of commercial enzymology and one of the pioneers of biotechnology. He was born in 1854 in Japan and received his Doctor of Pharmacology and Ph.D. in Engineering. He became very interested in Western concepts that would be useful to the Japanese but he also was interested in Japanese contributions to the West in science, industry and culture. In 1884 he married an American girl whose father helped him financially start the Takamine Ferment Company in Peoria in 1890. This company’s business was to produce ‘diastase,’ a mixture of glucoamylase and α -amylase. This mixture of amylases was produced by the koji molds (*Aspergillus oryzae* and *A. soyae*) and it was here in Peoria that fungal amylase was first introduced to the West. In the production of alcohol from grain it is necessary to break down the starch to sugar, which is then fermented to alcohol. Up to this time the starch conversion step of grain was brought about by the use of malt produced by the germination of grains.

“In the Takamine process the malt was replaced by fungal α -amylase and, therefore, was a process in direct competition with malt utilization. Apparently this new innovation was greeted with apprehension by the malt manufacturers. There was labor agitation and a propaganda campaign against Takamine. In 1894 the distillery where he worked was burned to the ground. Arson was suspected but never proven. The distillery which used fungal amylase was rebuilt, but the company dissolved the Takamine corporation and Takamine left Peoria in 1894. In 1894 Takamine obtained a U.S. patent on his enzyme diastase preparation called Taka-diastase.

“Later Takamine founded the Takamine Laboratories in the East [Clifton, New Jersey] and the Sankyo Pharmaceutical Company of Tokyo. He also isolated crystallized adrenaline at the same time that this was done by J. Abel at John Hopkins. Takamine obtained patents on adrenaline. He is also known for arranging for three thousand cherry trees for planting at the Tidal Basin in Washington. Recently a book on Dr. Takamine was prepared and printed by the Miles Company, which some years ago bought the Takamine Laboratories. The book contains his writings translated into English along side the original Japanese.”

“The ARS Culture Collection is one of only two large culture collections in the USA, and its primary function is to find and maintain useful or potentially useful microbial and genetic taxonomic material. This collection dates back to 1904 when Charles Thom was hired by the USDA to investigate the mold cheeses. In making these studies, Thom secured several hundred strains of *Penicillium* and *Aspergillus* which became the nucleus of the ARS Culture Collection. At first Thom was at the Connecticut

Agricultural Experiment Station, but in 1913 he moved to Washington, DC, taking his cultures with him. The oldest mold culture in the Collection is a strain of *Actinomucor elegans* isolated in 1892. Thom’s collection had no formal recognition, and the story is told how Thom worked in the Laboratory on weekends to transfer his collection. In 1940 when the Fermentation Laboratory was established at NRRC, the Thom Collection was moved from Washington, DC, to Peoria and was formally recognized as one of the fermentation groups with Dr. K. Raper in charge. Dr. J. Wickerham joined the group to be curator of the Yeast Collection, and W.C. Haynes was selected to maintain a Bacterial Collection. Since then the number of curators has increased from 3 to 6. Some famous private collections were added in 1940, including the Harvard Collection which had strains isolated before 1900.” Address: 5407 Isabell, Peoria, Illinois 61614.

3599. Homma, Gaku. 1991. The folk art of Japanese country cooking: A traditional diet for today’s world. Translated by Emily Busch. Miso, miso soup, miso-dama, and tamari (Document part I). Berkeley, California: North Atlantic Books. xii + 270 p. Illust. Glossary and index of Japanese words. Recipe index. 26 x 20 cm.

• **Summary:** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, homes, etc.

Here we will discuss only those parts of the book relating to miso, miso soup, miso-dama, and tamari: The author arrived in Denver, Colorado, in 1977. One day an Aikido student of his took him to a local health food store. In the Japanese section he found hijiki, wakame, nori, miso, and soba. To his surprise, he found that although the foods were expensively priced, each was of “third-rate quality” (p. 5).

He started a Japanese restaurant in Denver, but never advertised it as a health food restaurant. Would anyone serve unhealthy food in a restaurant? Occasionally there would be customers with questions such as, “What kind of miso or shoyu do you use?” He realized that many customers were worried about their diets, rather than being grateful that they had enough food and that they could had the freedom to choose to eat whatever they wanted (p. 11).

He was born in Akita, in northeastern Japan, where the winters are harsh, and traditional people stored foods for winter survival. Some vegetables were buried in miso (soybean paste). Some soybeans were also preserved by making them into miso, which was a *hazonshoku* (preserved food) (p. 16, 18).

During the Kamakura period [1185-1333] Zen Buddhism became very popular with the samurai. Since Zen

forbade the consumption of any warm-blooded animals, the diet was strongly affected. One popular food was “*kanbutsu* (lightly salted, dried fish) flavored with a mixture of soy sauce and miso called *hishio*” (p. 26). A photo shows Zen priests, heads shaved, eating in a monastery, Note: *Hishio* was similar to Chinese soybean *jiang*, a mash with the consistency of thin congee [rice porridge] or apple sauce; it could be separated by straining or filtering into liquid soy sauce [like *tamari*], with the solid residue being somewhat like miso, although with less flavor.

During the Muromachi period [1336-1573], Zen Buddhism continued to influence the Japanese diet, which consisted mainly of rice, cooked vegetables, and an early form of miso named *namé miso* (“lick miso” [finger lickin’ miso]) (p. 27).

In traditional Japanese farmhouses, fish or fowl were sometimes marinated with salt and miso or *tamari* (juice from making [soybean] miso), “flash-seared on both sides to seal in juices and flavor, then stuck into the *venkei* (bamboo basket stuffed with rice straw used to store foods above the sunken fire place {*irori*}) to be smoked” (p. 32).

In traditional farmhouses, if there was more meat than could be eaten during lunch and dinner, “the rest was marinated in miso and *tamari*. The miso would keep the meat from spoiling during the night. The next morning the meats were rinsed lightly, seared, and put in the *venkei*” for the rest the working day. When the family returned for a meal, the meat was ready to eat” (p. 38).

Fishermen would mix their cooked rice with *umezu* (the juice left over after pickling *umeboshi* salt plums). And they would eat fresh fish with their *umezu* rice balls. First they would split the fish in half from the inside out—without using a knife. Then they would dip the fish in *tamari* or miso, and eat it uncooked, on the spot. Sometimes the *tamari* was mixed with wasabi (Japanese green horseradish) as a dip. Wasabi is a sterilizing agent, served with sushi to this day (p. 39).

A dish found in Homma’s home town of Akita is called *kayaki* or *kai yaki*, which means “shell bake.” “A large scallop shell is placed over the fire and filled with fish, tofu, and seasoned vegetables. Miso, soy sauce, or *shottsuru* (juice from pickling fish) as added for taste” (p. 40).

In the Owu mountain range of northeastern Japan, men whose livelihood depends primarily on hunting are called *Matagi*. “These people also farmed, but they were takers of life.” So their lives, like those of the fishermen, were restricted and controlled by religious customs. On long hunting trips, the only food or “flavoring they carried was a dried ball made out of soybean paste called *miso dama*. All they had to do was to add water to make miso or miso soup (p. 42).

After the Tokyo Olympics in 1964, “Japan became a country inspired by consumerism.” Japanese wanted to be like Americans. In “modern” families, the husband and wife

both began to work outside the home. In the evening, just as the husband walked through the door, the wife would tear open a pouch of instant *misoshiru* (miso soup) and add hot water—“looks so real and tastes so good”—as they chased the American dream (p. 46).

Table manners: “When you are being served a meal, your chopsticks should lay horizontally in front of you at the close edge of the table. Your rice bowl is on your left and your miso soup is on the right...” In Japanese restaurants in the USA, when serving dinner, they usually serve a salad and then *misoshiru* or *osumashi* (clear soup) before the meal (p. 56-57).

When you are a guest in a Japanese home, you “can only ask for *misoshiru* a second time. This is very formal; if it is a casual situation the rules are not as strict, yet manners are important in all situations” (p. 58).

Slightly sour Chinese cabbage mixed with tofu and chopped *negi* (Japanese onion [or leek]), “simmered with water, miso, and *sakekasu* (rice wine lees), makes a delightfully sour dish...” “The first bulbs to appear after the winter snow melted belonged to the *fuki* (butterbur) plant. “These bulbs were seasoned with miso and roasted, or made into *sunomono*” (seasoned with rice vinegar) (p. 66).

“Miso and *tamari*—soybean by-products: Making miso was traditionally a community effort that began May 21st or 22nd (*haru higan* or the spring equinox).” Soybeans are soaked overnight, boiled, drained, and poured into a large tub. Men wearing rice-straw shoes to protect their feet crush the beans. The women then shape the crushed beans, while they are still warm, into pyramids, squares, or balls, depending on the locality [just like with *meju* in Korea]. After the shapes have cooled, they are tied with rice-straw rope and hung under the eaves of the house (see 2 photos, p. 68). When the naturally occurring fungus [mold] begins to grow on the soybean shapes, it is said that “the flower has opened.” When the shapes are covered with a fragrant bloom of mold, they are transferred to the *misodaruru* (large cedar miso tub). Just before miso making time this tub is filled with water or weighted with rocks and soaked in a river so that the wooden staves would swell tight. It is then tested for leaks Salt and water are added and the tub is covered. From time to time the cover is removed and the miso is stirred to enhance the fermentation process. This farmhouse method of making soybean miso is simpler than that which requires the use of *koji*, and the miso has a saltier taste.

While soybean miso is fermenting, a dark, rich, delicious liquid gathers at both the top and bottom. This is collected and called *tamari* (or miso-damari), and is used in traditional farm houses like soy sauce. In the countryside, *shoyu* (soy sauce) was traditionally made “as a cash crop to be sold in the cities. The mountain people and country farmers couldn’t afford *shoyu*, so they used *tamari* or *taremisu* instead.

As a child, it was Homma's job to crush the boiled soybeans. His family used koji. The traditional farmer keeps a storage shed for the tubs of miso and pickles near his house—but not too near. "City people sometimes use the phrase 'you smell like miso' to mean that you come from" the countryside.

"Sometimes on larger farms, miso was stored for up to eight years. To have old miso in your house meant that you had a large, prosperous family" (p. 67-69). Continued. Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido ad Cultural Center, Denver, Colorado.

3600. Homma, Gaku. 1991. The folk art of Japanese country cooking: A traditional diet for today's world. Translated by Emily Busch. Miso, miso soup, miso-dama, and tamari (Document part II). Berkeley, California: North Atlantic Books. xii + 270 p. Illust. Glossary and index of Japanese words. Recipe index. 26 x 20 cm.

• **Summary:** Continued (p. 72): *Kojikabi* is the koji mold [*Aspergillus oryzae*]. Koji (made from either steamed rice or barley) and its mold serve as a source of enzymes, which break down [hydrolyze] starches into sugars and proteins into amino acids, in the process of making both miso and shoyu. Koji is also used to make sake, and in farmhouses it was used to make *nigorizake* (unrefined sake, also called *doboroku* or *ohho*) in parts of the northeast provinces. *Nigorizake* has been made from *genmai* (brown rice) since the Edo period (1600-1868). (p. 72).

Japan's traditional "seasonings are still undergoing change to suit current tastes [and lifestyles]: witness 'lite' soy sauce and reduced-salt miso!" (p. 74).

A photo shows *miso dama* [which could be called miso koji] and konnyaku dama hanging from the eaves of a traditional farmhouse (p. 83, 85).

There are many ways to preserve fish; one way is to marinate them with miso or tamari (which also add a subtle flavor) and then to dry them. Fish and shellfish (*gyokai-rui*) which have been dried are called *himono* (p. 90).

Homma has childhood memories of morning kitchen sounds. Rice being washed, snapping of kindling to start a fire under the *kama* (rice pot), "the sounds of chopping, as the tofu and scallions were cut for the miso soup" (p. 104).

A whole fish can be used by a single person with no waste. "One section can be eaten fresh that day. The second can be marinated in shoyu or miso for six to seven hours and frozen; this way it is ready to bake and eat at any time" (p. 112).

Breakfast—Setting the table. The simplest breakfast includes *ichihan*, *ichiju*, and *issai*, which means one bowl of rice, one bowl of soup, and one side dish. This simple breakfast is served during religious training, eaten for four or five days consecutively before a fast, or eaten to change one's diet or to lose weight." "The *ichiju* is either a kombu-

or shiitake-based miso soup or a clear soup. The *misoshiru* contains a good balance of tofu and vegetables." The many *issai* include *tsukemono* (a variety of vegetables pickled with miso, salt, shoyu, or *nuka* {rice bran}), and *yakimono* (fish grilled either plain or marinated in shoyu, miso, *sakekasu* {rice wine lees} or *nuka*) (p. 122).

Okayu is rice porridge. "If you take plain okayu and mix in vegetables, fish, and miso or shoyu, you have *zosui* (p. 125).

"Morning side dishes: *Tsukemono*—pickles. Originally *tsukemono* were vegetables pickled in miso. Miso was called 'ko' in earlier times. *Ko no mono* [literally "fragrant things"; *ko* is the Japanese character for "fragrance"] is the old name for pickles." Today miso pickles are still made in Japan, but salted pickles are more popular (p. 126).

Recipe for *miso zuke*—Pickles made with miso (p. 132).

Yakimono—Grilled and broiled dishes (for breakfast):

One way to prepare fish for breakfast is to marinate them for 1-3 days in miso, shoyu, or *sakekasu* (saké lees). A recipe for *Kasu zuke yaki*—Fish marinated in rice wine lees is given (p. 144, 146).

Recipes for *Nasu no miso ni*—Japanese eggplant sauteed with miso, *Tekkamiso*—Soybeans and burdock sauteed with miso (p. 151).

Misoshiru—Miso soup: *Misoshiru* is an integral part of the traditional Japanese breakfast. Japanese farmers started their workday very early. Traditionally they began their day with a large pot (*nabe*) of grains, cereals, vegetables, and miso mixed together to make a porridge like *zosui*. In the last 50 to 60 years the *misoshiru* and rice have been served separately in the traditional Japanese breakfast. There follows a detailed, very interesting 7-page discussion of the art of making and consuming miso soup. Homma has found nothing that evokes as much gratitude and delight from Japanese traveling in the USA as to be served real miso soup. "For myself, if I think of my mother's *misoshiru* I become the most homesick!" "The most important point to consider when making *misoshiru* is timing." The best time to add the miso (which has been mixed with a small amount of dashi to dissolve it) to the soup is just as everyone is sitting down to the table to eat. "As soon as it starts to boil, remove it from the heat and serve." Three recipes are given for making *misoshiru dashijiru*: (1) With kombu and shiitake. (2) With kombu and katsuobushi. (3) With niboshi or yakiboshi (dried sardines or anchovies). Thirteen miso soup recipes are given: (1) Tofu and wakame. (2) Wakame and potato (*jagaimo*). (3) Wakame and shiitake. (4) Sliced tofu and negi leeks. (5) Bits of tofu (*kuzushi tofu*) with spinach. (6) Cabbage with agé (deep-fried tofu puff), (7) Soybean sprouts (*daizu no moyashi*) with agé. (8) Snow peas with agé. (9) Daikon (Japanese white radish) and carrots. (10) Onion and potato. (11) Kabocha (Japanese pumpkin). (12) Sweet potato (*satsuma imo*). (13). Asari or hamaguri (short-neck clam or regular clam). Diagrams (p.

158) show 3 ways (from 3 dishes to 6) of setting the breakfast tray (*ozen*).

Aemono recipes: *Shiraae*—Vegetables and tofu flavored with miso. *Kaiso no ume shiraae*—Sea vegetables and tofu flavored with miso and pickled plum. *Burokkori no shiraae*—Broccoli and tofu flavored with miso and pickled plum. *Nanohana no ume shiraae*—Rapeseed leaves and tofu flavored with miso and pickled plum. *Sayaingen no goma misoae*—Green beans flavored with miso and sesame seeds (p. 178-80).

Nabemono (one pot) recipes: *Tsumire nabe*—Fish ball and vegetable casserole flavored with soy sauce [and miso]. *Nabemono* with miso flavor base: *Butaniku or toriniku nabe*—Pork or chicken and vegetable casserole flavored with miso. *Gyuniku nabe*—Beef and vegetable casserole flavored with miso. *Kaisen nabe*—Seafood casserole flavored with miso (p. 226-28). Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido ad Cultural Center, Denver, Colorado.

3601. Shufu-no tomo. 1991. Anzen shokuhin no hon: Munôyaku, mutenka no honmono shokuhin otoriyo se gaido [The book of safe foods: A guide for getting real foods without agricultural chemical or additives]. Tokyo: Shufu-no-tomo-sha. 144 p. Illust. 26 cm. Tokubetsu henshû (Special edition). Shufu-no-tomo Seikatsu Series. 26 cm. [Jap]

• **Summary:** This beautiful book is about Japanese natural foods, organically grown without agricultural chemicals and processed without chemical additives. It is packed with color photos and descriptions of the products, the people and companies that make them, and the places where they are made. The name, address, and phone number of each company is included. Miso (p. 16-20). Shoyu (p. 21-27). Natto and tofu (p. 76-78).

Amazake (p. 16-17): Koji-ya Saburouemon, Nakamura 2-29-8, Nerima-ku, Tokyo, Japan. Phone: 03-3999-2276. 100 years old, 6th generation.

Miso & Shoyu (p. 18): Sendai Miso Shoyu, Kojo 1-5-1, Wakabayashi-ku, Sendai-shi, Miyagi-ken 982, Japan. Phone: 022-286-3151.

Miso & tamari (p. 19): Nakamura Jozo, Tatsuno-cho 1536, Yokkaichi-shi, Mie-ken 510, Japan. Phone: 0593-26-0456. Started 70 years ago. 3rd generation. About 15 years ago started to make naturally fermented soy products.

Miso (incl. barley miso; p. 20): Shirouza Shoten, Meihama 3-3-27, Nishi-ku, Fukuoka-shi, Fukuoka-ken 819, Japan. Phone: 092-881-0413.

Shoyu made with whole soybeans (p. 21): Kikkogo Shoyu Kondo Shoyu Moto, Yamada 733, Itsukaichi-machi, Nishitama-gun, Tokyo 190-01, Japan. Phone: 0425-95-1212.

Shoyu (p. 22-23): Kadocho, Kita-machi 7, Yuasa-machi, Arita-gun, Wakayama-ken 643, Japan. Phone: 0737-62-2035. 5th generation.

Shoyu (p. 24): Yamaki Shoyu, Kotobuki 3-3-16, Honsho-shi, Saitama-ken 367, Japan. Phone: 0495-24-6161.

Unpasteurized miso, and shoyu (p. 25): Shoku Seikatsu Kenkyu-kai, Miroku-ji 83, Fujisawa-shi, Kanagawa-ken 251, Japan. Phone: 0466-22-0635. Started in about 1970.

Shoyu, amazake base, koji, miso (p. 26): Inoue Shoten (Igeta Shoyu brand), Owari-machi 57, Kitakyo, Nara-shi 630, Japan. Phone: 092-741-5360. 4th generation. Started during the Genji era (1864-65).

Shoyu (p. 27): Jokyu, Daimyo 1-12-15, Chuo-ku, Fukuoka-shi 810, Japan. Phone: 092-741-5360. Started 135 years ago.

Natto (p. 76): Kuroishi Natto, Fukuroi 1-74, Kuroishi-shi, Aomori-ken 036-03, Japan. Phone: 0172-52-3958. Started 60 years ago.

Natto (p. 77): Shojiki Mura, Nishitakao 5-237, Kitamoto-shi, Saitama-ken 364, Japan. Phone: 0120-421351. A relatively new company.

Tofu (p. 78): Kurihara Shoten, Endo 2022, Fujisawa-shi, Kanagawa-ken 252, Japan. Started in about 1977. Address: Tokyo.

Address: Que.

3603. Yokotsuka, Tamotsu. 1991. Proteinaceous fermented foods and condiments prepared with koji molds. In: Arora, Dilip K.; Mukerji, K.G.; Marth, E.H., eds. 1991. Handbook of Applied Mycology. Vol. 3: Foods and Feeds. New York, NY: Marcel Dekker, Inc. x + 621 p. See p. 329-73. Chap. 11. [118 ref]

• **Summary:** Contains a great deal of very interesting information. Contents: 1. Introduction. 2. Fermented soybean foods in East and Southeast Asia: A. Douchi (China), Hama-natto (Japan), and in-yu (Taiwan). B. Shuidouchi (Shandong province, China), thua-nao (Thailand), kinema (Nepal), and natto (itohiki natto) (Japan). C. Tempe [Tempeh] and Oncom [Onchom] (Indonesia) (Making soybean tempe, volatile flavor of tempe, chemical composition and nutritional value of tempe, tempe bonkrek). D. Fermented tou-fu (soybean curd) products: Sufu (China and Taiwan), Tofu-yo (Okinawa, Japan).

3. Fermented salty condiments in a slurry or paste made from soybeans and cereals: A. Doujiang (touchiang) (China) and Tauco [taucho] (Southeast Asia). B. Doubanjiang (Toupanchiang). C. Tianmianjiang (Tienmienchiang). D. Gochujiang and Doenjang (Korea). E. Hishio (Japan). F. Miso (Japan) (Production and consumption of miso, making rice miso and barley miso).

4. Fermented salty liquid condiments made from soybeans and cereals: A. Japanese shoyu (Manufacture of koikuchi and usukuchi shoyu, manufacture of tamari shoyu). B. Soy sauce produced in east and southeast Asian countries other than Japan (Korea, Taiwan, Hong Kong, Singapore, Malaysia, Indonesia, Thailand, People's Republic of China {the process, acid hydrolysis illegal until recently}, chijhi or whole soybean soy sauce still made in the basins of the Zhujiang {Pearl} River and the Huanghe {Yellow} River).

5. Biochemistry involved in shoyu and miso manufacture: A. Selection of raw materials. B. Contribution of improved cooking methods of raw materials to increase the enzymatic protein digestibility. C. Selection and improvement of koji molds. D. Improvement in koji making. E. Microbial and chemical control of salty mash fermentation. F. Flavor evaluation of koikuchi shoyu. G. Stability of color of pasteurized shoyu. H. Nutritional concern about shoyu and miso (salt content). Safety of koji molds and shoyu (aflatoxins).

6. Conclusion.

Tables show: (1) Chemical composition of kinema, thua-nao, and douchi. (2) Changes in nitrogenous compounds during Natto Fermentation. (3) Changes of nitrogen compounds in sufu making. (4) Constituents of some types of miso. (5) Chemical composition of various kinds of genuine fermented shoyu in Japan. (6) Effect of cooking conditions of thoroughly moistened defatted soybean grits on the enzymatic digestibility of protein. (7) Differences between *A. oryzae* and *A. sojae* used for shoyu fermentation. (8) Proteinases produced by *Aspergillus sojae*. (9) Enzyme composition of koji as influenced by the difference of material. (10) Various metabolic patterns by lactobacilli in shoyu mash. (11) Digestibilities of protein in shoyu, miso, natto, and tempe fermentations. (12) Results of quantitative analysis of flavor constituents in koikuchi shoyu.

Figures show: (1) Flow sheet of tempe making. (2) Flow diagram of sufu making. (3) Diagram of rice-miso fermentation. (4) Diagram of koikuchi shoyu fermentation. (5) Tamari-shoyu fermentation. (6) Microflora changes in shoyu mash fermentation. (7) Classification of *Aspergilli*. (8) Fermented foods and condiments made from soybeans mixed with or without cereal grains or flour. Address: Research Div., Kikkoman Corp., Noda City, Chiba prefecture, Japan.

3604. Hayakawa, Tsuneo. 1992. Re: Hacho miso company is now building its own miso museum. Letter to William Shurtleff at Soyfoods Center, Jan. 8. 1 p. Typed. [Eng]

• **Summary:** The museum is intended to let people know the old way of miso production and to make them more familiar with the company. Using several mannequins, old tools, and some documents owned by the management, the company has almost completed the main part of the museum. Tsuneo, a younger brother of the president, is in charge of collecting historical materials for the museum. He began work on this project 2 years ago; before that he worked for a newspaper company. He intends to make a miso literature corner in the miso museum. Mr. Kaneko, former chief of the general affairs section, retired 10 years ago. Address: Hacho Miso, 69 Okan-dori, Hacho-cho, Okazaki-shi, Aichi prefecture 444 Japan.

3605. Hayakawa, Tsuneo. 1992. Re: Building a Hacho miso museum in Okazaki City, Japan. Letter to William Shurtleff at Soyfoods Center, Jan. 8. 1 p. Typed, with signature. [Eng]

• **Summary:** "Hacho Miso Company (Goshikaisha Hacho Miso in Okazaki City, Japan) is now building its own Miso Museum to let people know what the old way of miso production was and to make them familiar with the company." He asks for ideas and advice. Shurtleff responds with three specific suggestions. Address: c/o Hacho Miso, 69 Okandori, Hacho-cho, Okazaki-shi, Aichi prefecture, Japan.

3606. Dinh, Daniel. 1992. Present status of soyfoods in Vietnam (Interview). *SoyaScan Notes*. Jan. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Tofu and soymilk are the only two soyfoods that are widely known and used in Vietnam. Daniel's relatives made fish sauce (*nuoc-mam*) in Vietnam. Before 1975 there was a trade association of fish sauce manufacturers in Vietnam and their company was one of only 12 major manufacturers in the association. Then in 1975 when the Communists took over, he had to flee the country, and his family decided to destroy their fish sauce factory, lest they face death or prison as capitalists. Now the situation is ripe for his return to Vietnam, and he is interested in learning to make miso and soy sauce, and perhaps starting production in Vietnam. Address: 22821 Sherman Way, West Hills, California 91307. Phone: 818-704-6432.

3607. **Product Name:** Tempeh Starters, and Miso Starters.

Manufacturer's Name: Future Foods.

Manufacturer's Address: 3 Tai Madog, Stablau, Llanrug, Gwynedd, LL55 3PH, Wales, UK. Phone: (0286) 870606.

Date of Introduction: 1992. January.

New Product-Documentation: Letters from Owen Smith of Future Foods. 1992. Oct. 27 and Dec. 2. He has a small

company selling unusual seeds of food plants as well as tempeh and miso starters. He obtains the cultures from GEM Cultures in California, and started selling them in Jan. 1992. His company is planning to start making its own tempeh starter using the method described in books on tempeh by Shurtleff and Aoyagi.

3608. Morgenroth, Lynda. 1992. Luisa Baranda: There's more to macrobiotic cooking than brown rice, as this gentle, spiritual Boston woman can demonstrate. *Yankee* 56(1):88-92, 94. Jan.

• **Summary:** For Luisa (nicknamed Luchi) cooking is a meditation. Born in Chile, she spent years in Paris (France) and Spain, but now teaches macrobiotic cooking in Boston. When flavoring soup with miso, she would never just dump a blob of miso into the soup. Instead, she lowered a ladle with a little miso into the pot, massaged some broth into the miso, then "eased the stock-thinned paste into the soup." Also discusses adzuki beans and various seaweeds (kombu, wakame, dulse, and arame). Includes recipes for: Miso soup (with wakame). Hiziki (hijiki) with vegetables. Scrambled tofu. Steamed greens and tofu dressing.

3609. **Product Name:** Lite & Spicy Flavormates: Miso Magic.

Manufacturer's Name: Redwood Company (The). Div. of JRJ Trading (Importer-Marketer-Distributor). Made in America.

Manufacturer's Address: 243 The Broadway, Muswell Hill, London, N10, England.

Date of Introduction: 1992. January.

Ingredients: Incl. miso.

Wt/Vol., Packaging, Price: Retail for £2.49.

New Product-Documentation: Health Food Business (London). 1992. Jan. p. 12. "Vegetarian breakfast treats with JRJ's organic bacon." These products spice up all manner of dishes.

3610. Roller, Ron. 1992. The U.S. miso market (Interview). *SoyaScan Notes*. Feb. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** During the past 3-4 years, the U.S. miso market seems to be growing, but only slowly. Ron has been away from direct contact with sales of Eden Foods' miso for the last 8 months (when he ceased to be president of Eden Foods, Inc.), but he still has a good sense of what is happening. He sees miso as a macrobiotic product—macrobiotics are the main user base other than Asian-Americans. It is also a very Japanese food. There are now so many natural foods products on the market that miso must compete with, that convenience has become a big factor for consumers. Miso is not very well understood by many American consumers. The sodium level in miso may hurt the growth of miso sales in America—especially for new

consumers; it will probably not have much of an effect on those who use miso and know what it is.

Ron's estimates of the U.S. Caucasian market share of the main miso types is as follows: Barley miso 35%, salty rice miso 25%, sweet rice miso 25%, Hatcho and other soybean misos 12%, specialty misos (natto miso, buckwheat miso, etc.) 3%.

More barley miso is sold in bulk than other types. Ron sees sweet rice miso (sweet white miso; shiro miso) as having the most future potential for Americans—especially for those who are not macrobiotics. Eden imports sweet white miso from Japan; it is pasteurized to prevent spoilage, but it does turn brown over time. Ron thinks miso is a great food that is not adequately appreciated. It may have great potential as an ingredient sold to the food industry for use in processed foods.

Ron, personally, has a deep interest in Japanese natural foods, in food production, and in how the raw materials (such as soybeans and grains) are produced, i.e. in organic crop production. "The word 'macrobiotic' is a word that I personally rarely use, though the exposure to that philosophy has taught me a great deal. The interest in macrobiotic foods is increasing. The old dreams about locally-produced, organically-grown foods have come true. They are widely available and nicely packaged and marketed." Address: President, American Soy Products, 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

3611. O'Connell, Michael. 1992. History of Ploughshares Foods Ltd. in Glastonbury, England (Interview). *SoyaScan Notes*. Feb. 27. Conducted by Anthony Marrese in England.

• **Summary:** This company was founded in 1984 in the Essex countryside by Michael O'Connell and Fiona Bruce under the name "The Emperor Liu An's Tofu Palace." Liu An was the legendary inventor of tofu in China. The business was an 8-tonne mobile catering truck and kitchen on wheels which went to open-air shows and festivals; its purpose was to serve vegan organic food (including tofu), demonstrate tofu-making, and promote veganism. They started operating the truck in Aug. 1984. Recipes prepared in the mobile restaurant in 1984/85 included tofu blueberry mock cheesecake, tofu mayo, tofu sweet cream, tofu lasagna, tofu pudding, tofu ice cream, tofu burgers, tofu gulash, and tofu pizza. In 1985/86 they launched okara steam pudding with dates, okara shepherd's pie, and okara burgers.

In Aug. 1986 the company moved to Glastonbury, started a non-mobile restaurant, and changed the company name to Ploughshares Foods Ltd. (after the Old Testament Biblical expression from The Book of the Prophet Isaiah 2:4 "They shall beat their swords into plowshares, and their spears into pruninghooks: nation shall not lift up sword

against nation, neither shall they learn/study war any more”).

In 1988 the restaurant introduced tofu quiche (onion and mushroom), okara veggie roll, okara tempeh, okara tempeh Bolognese/moussaka, and braised tofu in miso sauce. In 1989 they launched soya cream cheese with chives, and in 1991 okara tempeh with leaf protein added.

In 1991 the company structure changed from a partnership to a cooperative. Other current members of the co-op are Miranda Bruce, Sophie Pullinger, and Lalita Gordon Milverton.

The company was a pioneer in introducing tofu and new ways of using it to vegan restaurants. Uses included burgers, pies, dressings, creams, main dishes, salads, soups, etc. They introduced foods that were free of dairy products, wheat/gluten, and/or sugar, and developed a leaf protein product named Leafu (i.e. tofu from leaves). Their vegan cooking school was the first such school to receive the “City and Guild” qualification to those who graduate from their residential diploma course teaching vegetarian, organic, and special diet foods. The company provides a friendly working environment, as for single working parents, and is involved in the wider issues of improving society.

The main reasons for the company success are a commitment to delicious, aesthetic, nutritious food, customer loyalty, and a commitment to research, development, and innovation.

Anthony Marrese adds: “All of their products are good, and their people are especially nice. I spent about 18 months helping with the tofu production and restaurant in 1987/88.” Address: 54 Roman Way, Glastonbury, Somerset, BA6 8AD, England. Phone: 0458-831182 or 835233.

3612. DeBona, Don. 1992. The miso market in America and The American Miso Co. (Interview). *SoyaScan Notes*. Feb. 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The miso market in America is growing nicely. There are two distinct U.S. miso markets, the Asian-American (Oriental) market and the natural foods (macrobiotic) market. Don can only speak for the latter, and is best able to discuss his company’s experience in that market. In the last 3-4 years, his production has grown on average 10-12% a year. He thinks that the causes of this growth are the wider availability of miso, and its greater accessibility to mainstream consumers who increasingly shop at natural food stores and chains such as Whole Foods Market and Bread & Circus. Neither the current recession nor the greater consumer awareness of dietary sodium affect miso sales. Most miso buyers are macrobiotics or vegetarians who are not very concerned about consuming too much sodium. People who buy his lower-sodium misos (sweet white [rice], sweet barley, mellow barley, or chickpea miso), do so not because of their lower sodium content but because they have different applications and

flavors. He does not market his low-salt products as “low salt” nor does he see any great potential in making and marketing low-salt misos. Miso buyers generally know a lot about miso and about nutrition. He makes no nutritional claims on his miso products. His main concerns are with the taste and quality of his misos.

From the late 1960s until the very early 1980s, the non-Oriental U.S. miso market was largely a macrobiotic market. But the growth he has seen in the last 3-4 years is mainly to non-macrobiotic customers. He estimates that more than half the people who buy his miso do not think of them selves as macrobiotic, and perhaps a third of them have never even heard the word “macrobiotic.” They buy it as a vegetarian natural food product; they like the taste, and see it a new and versatile seasoning. The dark misos provide a meatlike flavor but the sweet and mellow misos do not. People use mellow white miso in soups, salad dressings, or stir fries. Dark misos are used more in soups, whereas sweet misos are not very widely used in soups.

He would categorize the different varieties of miso (both from a production and sales viewpoint) as percentages of his total production as follows: 1. Long-term, traditional darker, 40% (23% barley and 17% rice). 2. Mellow miso (white or barley), 30%. 3. Sweet miso (white or barley), 20%. 4. Other (including non-soy): Chickpea, 10%.

Looking at the same categories for the American natural foods/macrobiotic market as a whole: 1. Long-term, traditional darker, 57% (35% barley, 15% rice, 7% soybean or Hatcho). 2. Mellow miso (rice or barley), 25% (American Miso Co. and Miyako Oriental Foods/Cold Mountain dominate this category). 3. Sweet miso (rice or barley; only American Miso makes or sells a true shiro miso), 10%. 4. Other (including non-soy): Chickpea, finger lickin’ miso (a topping), natto miso, buckwheat miso, etc. 8%.

Two Japanese men now live and work at American Miso Co.; one was brought by John Belleme about 8 years ago, and one came about 3 years ago. They are in production. Don also has 2 American workers. They are like part of the family. He has never had soybean or Hatcho miso in his house and has never seen these Japanese eat it. Don does not particularly like the taste; it is dark, lacks sweetness and a complex bouquet due to its lack of grain, and is over-aged. Moreover, he feels it is more difficult to make because soybean koji is hard to make.

Westbrae sells a lot of miso on the West Coast but not much on the East Coast. Miso is said to be Westbrae’s third best-selling product category. Don used to sell Westbrae’s miso in the 1970s, when he worked for Laurelbrook Foods in 1980-81, shortly after Rod and Margy Coates were bought out.

Companies that make the miso in the USA using organically grown soybeans and grain include American Miso Co. (50% of natural foods market), and South River Miso Co. (10%); Westbrae and Miyako/Cold Mountain only

use organic soybeans, but they call their miso “organic.” New labeling regulations will soon make that illegal, and will probably cause most of the miso made in America to be made from organically grown soybeans and grains. Many consumers want organic miso.

The three largest makers of miso in America (for both markets), in descending order of production, are Miyako Oriental Foods, American Miso Co., South River, Junsei Yamazaki, and Traditional Foods. The major miso importers, again in approximate descending order, are Eden Foods, Great Eastern Sun (Mitoku Brand), Westbrae, Granum (Mitoku brand), and Tree of Life (Mitoku Brand).

In the U.S. natural foods market, American Miso Co. is the market leader. Don estimates the size of this market to be about 750,000 lb/year, but he would guess that Asian-American market is about twice this large (1,500,000 lb/year). His various misos retail for about \$5.95 in 1 pound sizes or \$3.95 in 8 oz sizes. When Don travels in America, he studies the shelves, and has been in almost every major natural foods store in the USA. He also regularly visits distributors and food brokers. But he does not try to keep systematic statistics on the market size.

American Miso Co. is growing rapidly, and it is hard to finance this growth from earnings. Don’s plant is now too small relative to demand; it is bursting at the seams. He has added more vats and plans to add another building this summer, financing it with a bank loan. The company is owned by only two people: Don and his partner, Barry Evans. Barry used to have a lot of money, but he got out of the marijuana business—where he made the money. He is now in jail in Santa Barbara for selling marijuana. In went to jail in Jan. 1992 and expected to be there for about 2½ years. Much of the \$500,000 startup capital for America Miso Co. came from Barry, but since then the company has largely had to finance itself. Financially the company is doing very well; they have made a profit every year for the past 3-4 years. Don is wary of bringing in more partners because of bad experiences in the past. Don has had a very good relationship with Barry Evans, and it has greatly benefited both of them and American Miso Co.

Don, whose ancestry is mostly Italian plus a little Irish, greatly enjoys running the company. His role has changed a lot. Up until last year, he made miso every week. How he does that much less, and focuses more on marketing. For the past 2-3 years he has also been president of Great Eastern Sun—a position he held before he came to replace John Belleme at American Miso Co. Most customers identify the company as “Miso Master” rather than “American Miso Co.” Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

3613. DeBona, Don. 1992. Miso in Europe (Interview). *SoyaScan Notes*. Feb. 29 and April 19. Conducted by

William Shurtleff of Soyfoods Center.

• **Summary:** Don has had 2-3 offers (though not serious enough) to go to Europe to build and run a miso factories. When a really serious offer for a major joint venture is made, backed by sufficient capital, he would like to do it. He would provide the production (and maybe the marketing) expertise. In about 1985 Don trained Jan Kerremans, a Belgian, from Lima Foods in the south of France, in how to make miso—after they had started and weren’t doing very well. After that, Lima got their miso production under control, but then Jan left at about the same time that Lima Foods was sold—Don is not sure which came first. Jan was a minor partner in Lima Foods. The Gevaert family sold Lima in about 1987-88 to Vibec, a consortium in Canada. At that time Lima had a lot of financial problems. Then in about 1989 Lima was purchased from the Canadian company by Euronature, a large France-based international food company. Lima is presently doing well, and their traditional high standards of food quality are completely supported by Euronature. Mark Callebert is the manager of Lima; Pierre Gevaert no longer owns any part of Lima and is no longer active with the company. Lima is no longer making miso at their old mill on a river in the south of France. Lima also made rice cakes and ground their sea salt at that old mill. This mill was the Gevaert’s personal getaway and farmhouse, and he thinks they kept it when they first sold Lima, and no longer process food there. The Lima rice cakes may now be made in Belgium. Don thinks Lima Foods is now stronger than they were 5 years ago. Great Eastern Sun was the first company to import Lima’s miso into America, starting in about 1984, and they were the sole importer for about 18 months until Lima appointed Eden as their exclusive U.S. agent. Don’s current contact at Lima Foods is Mark Callebert. Don buys a lot of their salt in containers, directly from Europe, but he has to run the money and paperwork through Eden Foods. Don has exported several containers of miso to Europe through Sjon Welters’ wife’s brother, Adelbert, who used to work with Manna Foods in the Netherlands. He has also exported some to Erika Lemberger of EuroHealth. Bernard Faber also wants import Don’s miso. After the Chernobyl nuclear disaster, Mitoku’s sales of miso to Europe reached a new high, from which they have since dropped.

There is currently no major miso manufacturer in Europe. There is a small miso plant in Bristol, England named Source Foods, founded and run by Paul Chaplin, who Don trained at American Miso Co. for about 2 months. Chris at Mitoku recently told Don that Italy has recently become Mitoku’s biggest market for natural food products in Europe.

In short, there is great potential for miso in Europe, including Eastern Europe, although the political instability of Eastern Europe makes for a very risky financial environment there. Its a high risk, high gain situation.

Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

3614. DeBona, Don. 1992. Work with tofu and soymilk in America (Interview). *SoyaScan Notes*. Feb. 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Don has owned a part of Bean Mountain Soyfoods in North Carolina since 2-3 years ago; their biggest competition in the tofu market is Nasoya. Don was on the board of the Soyfoods Association of America, but he dropped it when he saw it was basically a tofu and soymilk association; he was “the token miso maker.” Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

3615. Kushi, Michio. 1992. Introduction to *Culinary Treasures of Japan*, by John and Jan Belleme. 16 p. Jan. Unpublished manuscript.

• **Summary:** This manuscript, which was published in a condensed form in the actual book, tells the story of Mitoku and their work to export traditional Japanese natural foods to the Western world. Michio Kushi was instrumental in getting Mr. Akiyoshi Kazama involved in this work. Mr. Kushi, who became a World Federalist after World War II, came to the U.S. in Nov. 1949 to study at Columbia University. He continuously sought ways of establishing world peace, and increasingly came to believe that a proper diet is the basis for health, happiness, and peace.

In April 1966 the author’s wife, Aveline, opened a small store named Erewhon in Boston. Michio began to search for a Japanese source for foods that Erewhon would sell. He was introduced to Mr. Kazama (who lived in Tokyo) through a Japanese friend, Mr. Obayashi, who resided at that time in New York City. Michio felt that Mr. Kazama understood his desire for foods of high quality. So Mr. Kazama “began his search for food producers and manufacturers who were sincere and willing to supply the kind of quality we requested. I know that for him, at that time, it was a great gamble. It was also a painstaking and slow step-by-step process.”

Mr. Kazama was born on 1 Feb. 1930 in Yamanashi prefecture. He graduated from Waseda University in Tokyo, then was selected to study business in the United States. After arriving in Chicago, Illinois, he was drafted by the U.S. government to serve in the American Army in Korea and in Japan from 1956 to 1958. Upon his return to Japan, he settled in Tokyo where he became an import agent for a German company dealing in optics and electronics. After the Kushis contacted him, he became involved in the emerging natural food business. [He founded a company named Mitoku. Mi = Michio. To = Tomoko (Aveline’s given name in Japanese). Ku = Kushi].

In 1968 Mr. Kazama made his first shipment of Japanese natural foods to Erewhon; the order was worth \$3,000. The Kushis first met Mr. Kazama in Boston in 1970. Over the years, the volume of Mitoku’s exports steadily grew, and expanded to Europe, Australia, and the Middle East. Today Mitoku ships its products to about 35 countries.

Approximately 40% of Mitoku’s exports go to America, 40% to Europe, and 20% to Australia and other regions. Annual sales are about \$10 million. Among the major suppliers are Sendai Miso Shoyu Co. Ltd., Hacho Miso Co. Ltd., Hagoromo Miso, Ltd., Hanamaruki Miso Co. Ltd, San Iku Foods Co. Ltd.

Distributors of Mitoku’s products include the following: In the USA: Westbrae Natural Foods Inc., Great Eastern Sun Inc., U.S. Mills Inc., Tree of Life Inc., and Shojin Natural Foods (Hawaii). In Canada: Koyo Foods Inc., Flora Distributors Ltd., and Timbuktu. In Costa Rica: Distribuidora de Productos Macrobioticos S.A. In England: Sunwheel Foods Ltd, Clearspring Natural Grocer, Meridian Foods Ltd. In France: Celnat, Tama. In Belgium: Lima N.V. In the United Arab Emirates: Emirates Trading & Marketing Est. In South Africa: Key Health. In Austria: Naturkostladen, Lebenszeichen. In Switzerland: S’lotusbluemli, Terrasana, Futonhaus. In Sweden: Kung Markatta. In Norway: Alternative Import. In Finland: Makro Bios. In Portugal: Armazens Da Matinha. In Spain: Kunga. In Italy: La Finestra Sul Cielo, Probios S.R.L., Dalla Terra al Cielo, Solo Natura. In Israel: Tivoli Ltd. In Australia: Pureharvest. In New Zealand: Enso. In Singapore: Nature’s Best. In Yugoslavia: General Export. In Japan: Seibu Department Stores Ltd., Tokyu Department Stores Ltd. Among the countries reached indirectly through trans-shipment are Hungary, reached through Austria, various South American countries reached through the United States, and other countries such as Poland, Czechoslovakia, Iceland, Andorra, Ireland and the Caribbean Islands.”

As Mitoku developed its international operations, Mr. Kazama hired many students from Western countries, including Blake Rankin (USA), Ferro Ledvinka (Italy), Christopher Geoffrey Dawson (New Zealand, starting 1979), Robbie Swinnerton (England), Terrie Adams (USA), and Michelle Harbroun (France).

“For the past 10 years, Mitoku has echoed and supported the macrobiotic perspective with its motto ‘Isshoku-Dogen.’ These words, though they have been forgotten in the last few centuries by the very people in the health care field who should remember them well, mean literally ‘medicine and food have the same source,’ and can be translated as ‘food is medicine.’ This saying has been used and known as part of the ancestral heritage of wisdom transmitted from generation to generation for several thousand years in Oriental countries such as China, Korea and Japan.

“In an attempt to preserve Japanese traditions, Japan has instituted a ‘Living Treasures’ program granting official

recognition and support to [living masters in] various cultural areas such as theater, music, dance, sculpture, carpentry, weaving... and arts and crafts. Ironically, though, Japan has not granted the same official recognition to its traditional methods of food processing and production in spite of the fact that increasingly large numbers of people throughout the world are now appreciating traditionally processed Japanese food products and have become aware of their important health benefits. The Japanese traditional arts of producing miso, soy sauce, tofu, natto, amazake, rice vinegar, sake, mirin, condiments and pickles as well as cooking methods and preparation are unique among the culinary practices of the world... These foods are also works of art... It is my hope and recommendation that official recognition and support be granted by the 'Living Treasures of Japan' to those who have dedicated their life to the traditional art of food production and processing in spite of the hardships and commercial disadvantages they are compelled to face in business competition and present-day economical conditions." Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

3616. **Product Name:** Traditional Japanese Soup (in a Cup) [Mild Miso, or Dark Miso].

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-545-9545 or 415-821-4040 (Perelman).

Date of Introduction: 1992. February.

Ingredients: 1995: Liquid broth in foil pouch: San-J rice miso (water, whole soybeans, rice, salt), kombu extract (seaweed, barley malt), water, alcohol, salt, shiitake mushroom powder. Dried vegetables in foil pouch: Fu ([baked] wheat gluten), tofu (soybean curd), scallions.

Wt/Vol., Packaging, Price: 0.930 oz (23.6 gm) net paper cup. By March 1995 1.1 oz. Retail for \$1.49 (3/95, California).

How Stored: Shelf stable.

New Product–Documentation: Spot in *Natural Foods Merchandiser*. 1992. July. p. 72. Shows a black-and-white photo of the side of both cups. Both products are prepared with real miso paste (not dried) for authentic Japanese flavor and texture. "Just add boiling water to create instant soup for lunch-on-the-go or a low-fat first course."

Talk with Steve Zoller of San-J. 1992. July 6. This product was introduced in Feb. 1992. Product with Labels sent by Steve Zoller. 1992. July 7. Illustration: On the dark miso a Japanese man drinking a cup of miso soup; on the mild miso, a Japanese woman doing the same. "Directions: Squeeze contents of miso packet into [paper] cup. Empty contents of vegetable packet into cup. Add boiling water to ½ inch from top of cup. Cover for 1 minute. Stir well before eating."

Ad (8 by 11 inches, color) in *Natural Foods Merchandiser*. 1992. Sept. p. 35. "188 years and one minute later, its soup." Shows a Japanese man and woman, kneeling on opposite sides of a low table in a tatami mat room, each drinking a paper cup of San-J miso soup. "Seven generations after San-J's founding fathers began making miso near Nagoya, Instant Miso Soup-In-A-Cup comes to America." San-J: Established 1804.

Product with Label purchased at Open Sesame in Lafayette, California. 1995. March 11.

3617. *Weight Watchers Magazine*. 1992. Chinese New Year. 25(2):45. Feb. *

• **Summary:** Includes recipes.

3618. Macdonald, Bruce. 1992. How Erewhon got involved in wholesaling and distributing natural foods (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the spring of 1969, during Bruce's tenure as general manager, Erewhon got into the wholesale business, running it initially out of their retail store at 342 Newbury Street. Paul Hawken was not involved in the wholesaling to other companies before he left for Japan. Their store was divided into 3 parts: The front half was the retail store, the back half contained the mill (a little 5-inch Meadows Mill later used for grinding whole-grain flours), a walk-in refrigerator, and packing tables (where Bruce recalls working with Jim Docker, packing little 1-5 lb paper bags of grains), and the basement (connected to the ground floor by a dumb waiter) was the warehouse for storage of commodities.

The wholesale business began in the basement. It started because Erewhon got a good deal on some sesame oil. A company named Sesame Products had developed the Egyptian salt method of removing the husks of the sesame seeds. The company apparently went bankrupt, but actually they were a front for some illicit import dealings, such as electronic parts from Mexico. They got caught, and had to sell their high-quality oil. Erewhon bought the oil and some amber bottles, bottled the oil, and that was their first wholesale product.

Next Erewhon expanded its line of mechanically pressed, unrefined oils. Bruce had seen some expeller-pressed corn oil at Paul Keene's Walnut Acres, so he ordered it from Shawnee Milling Co. in Shawnee, Oklahoma. Erewhon considered hexane solvent extraction to be the "big bad method" of removing oils, expeller pressing to be so-so (because the temperature in the worm-screw reached 140-160°F), and hydraulic pressing to be the best since it kept the product coolest. This golden corn oil foamed upon being heated and tasted like butter in baked goods. Erewhon's third natural oil was a safflower oil. (In

1970 Paul Hawken wrote a pamphlet titled “The New Oil Story”).

Next Erewhon added a line of grains. They got non-organic brown rice from Koda Brothers in Dos Palos, California. The company was owned by Japanese-Americans, who were the first to break out of the cooperative marketing scheme, in which all growers mixed their rice together. They had rubber rollers, which did not scratch the grain during dehulling. Their Kokuho-Rose white rice has been the rice of choice for 30 years among Japanese-Americans. Bruce thinks they may have first sold brown rice (in 100 lb peat bags) to Infinity in New York, then to Erewhon.

Then Erewhon added a line of products imported from Japan. These first arrived in about Nov. 1968, just as the Erewhon retail store at 342 Newbury St. was opening. All the Japanese imports came in bulk from Muso Shokuhin in Osaka, rather than individually packaged. Tamari (from Marushima) and miso (including bulk mugi [barley] and Hatcho miso), moromi, etc. came in wooden kegs, loose, rather than in containers, so there was lots of breakage. Most of these imported products were stored in the basement. Erewhon bought some noodles (soba and udon in 5 kg boxes) from Japan Foods, then from Nishimoto Trading Co. and also from Muso. The product line was very simple, consisting of no more than 400 different items. The best-selling wholesale items were the oils, tamari, miso, rice, and imported kuzu, umeboshi (salt plums) and azuki beans. In the retail store there was no produce case or freezer, no vitamins or supplements, no potatoes or dairy products.

Initially, Erewhon’s largest customer was the combined 4-5 macrobiotic study houses in Boston, Massachusetts, accounting for roughly 50% of sales. Erewhon had an old van that delivered the food to the study houses, initially at retail prices; this business kept the retail store afloat. By the late spring of 1969 the wholesale business began to take off, and the macrobiotic study houses were now allowed to buy at wholesale prices. Some additional delivery trucks were acquired.

The macrobiotic products, other than what Erewhon imported, were only available in health food stores, through Chico-San. Because of the high mark-ups at several stages in the process, these products were tremendously expensive for consumers. So Erewhon decided to sell direct to East Coast stores, cutting out the distributors, to keep prices down. Now things started to move very fast, and Erewhon soon achieved national distribution. “It was like introducing products into a vacuum. The whole natural foods industry was starting up, all these little places like Eden Foods in Ann Arbor [Michigan], Tom Swan in Chicago [Illinois], etc.

Bruce traveled to New York and lined up new wholesale customers among macrobiotic restaurants and food stores. Samsara, a macro restaurant in the lower east side run by

George Abehsera, was Erewhon’s first customer and its biggest restaurant customer. (Michel Abehsera’s younger brother, George later became the baron of the clay and soap business, Three Sheaves, Pierre Cattier, then Nature de France). Right around the corner was Arnie Greenberg, who had a deli on the lower east side, and was one of the first to merchandise macrobiotic foods; he rapidly became Erewhon’s best customer. He was very busy selling a mish-mash of foods though he had no particular personal commitment to macrobiotics. Before him, Irma Paule in New York City had run “The Little Cupboard” but had gotten in trouble and was no longer in business at this time. Other good restaurant customers were the Paradox, and the Caldron (Gloria Bremmer at 308 E. 6th St.). The Good Earth, a retail store run by Townley, soon began to order; he was one of the original honest organic produce retailers. The restaurants and the food stores accounted for about equal sales volume for Erewhon. Erewhon shipped all its goods to New York (its sole market) via common carrier; Erewhon owned no delivery trucks of its own. There were no other natural food stores in Boston. One other unique customer was Jimmy Silver, who was macrobiotic, the manager of a rock band named Iggy Pop and the Stooges, and had hair down to his waist. He would drive down from New York with his cute little wife, Susie, and buy \$300.00 of food at a time for the whole band. It was the biggest single order that Erewhon ever got in those days. Not long after that, Jimmy dropped out of the music scene and came to Boston.

Then Roger took over from Bruce as general manager in about Oct. 1969, right after Bruce married Maureen, his first wife, and left for Los Angeles to set up a branch of Erewhon there. The little store had sales of about \$400/day. The day of Bruce’s wedding, in about Oct. 1969, was the first day that Erewhon’s sales topped \$1,000/day. It was a milestone day and in those days it seemed like big money. But 2 years later, Erewhon’s sales were \$20,000/day.

How did Erewhon finance this growth? At the beginning Erewhon, the trailblazer, was extremely profitable, since they had essentially no competition, and had thriving retail stores in Boston and Los Angeles. The dollar was very strong (from 1967 to 1971 one dollar was worth 355 yen), so Erewhon could buy an item for \$1, sell it for \$3.50 and still be \$2 under any competition (mainly Chico-San). Erewhon invented the concept of a natural food store. Fred Rohe in San Francisco had developed a related idea, perhaps a little before and in parallel with Erewhon. His Sunset Health Foods, later named New Age Foods, was a modified health-food store that sold vitamins, whereas Erewhon was a pure natural foods store, that didn’t sell vitamins. In addition, Erewhon had quality standards and a philosophy of foods that no one in the industry had.

After Bruce left, Erewhon moved into its first real warehouse on Farnsworth St. This represented the first real

commitment to the wholesale business. A fleet of trucks was acquired. Eventually semis were delivering all over New England. Address: P.O. Box 100, Cambridgeport, VT 05141. Phone: 802-869-2010.

3619. Macdonald, Bruce. 1992. The origin and development of Erewhon's operations in Los Angeles. Part I. 1969 to 1971 (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Erewhon started a retail store in Los Angeles because Aveline's youngest son, Hisao, had some form of leg disorder, congenital or from infancy, probably in his knee. Aveline found a Japanese doctor in Los Angeles who she believed (and it turned out that she was right) could cure it. But the doctor had to see Hisao almost daily. So in about August 1969 Aveline moved to California. Bill Tara went with her, while Michio stayed in Boston, Massachusetts. Aveline got a very nice house at 7511 Franklin Ave. in Hollywood. Later she moved into the former Japanese embassy, which was a mansion in a very nice neighborhood, several blocks away on [7357] Franklin Ave. Bruce also lived in this mansion. In Los Angeles, Bill Tara started Erewhon's second retail store, in large part because Aveline needed good macrobiotic food. Tara rented a very small space at 8003 Beverly Blvd. and called the new store "Erewhon West." Later the name changed several times, but it ended up being just "Erewhon." He got some cinder blocks and boards, ordered a shipment of food from Erewhon-Boston, then he opened the door. Initially, business was extremely slow.

Bruce was married on 13 Sept. 1969 to Maureen Trill in Boston. The marriage ceremony took place in the Old South Church, and some 200 people (including Michio Kushi) attended. It was the biggest wedding in the Boston macrobiotic community to date. Maureen had lived in a macrobiotic study house run by Susan Hillyard, and had studied cooking with Aveline Kushi and Susan Hillyard. About 2 weeks after the wedding, in early October 1969, Bruce and his new wife left Boston. At that time, Roger Hillyard took over as general manager of Erewhon-Boston from Bruce. They drove to Los Angeles, arriving in late Oct. 1969. The first thing he did was to build a walk-in cooler. Bill Tara, who was always more interested in the teaching, philosophical, and scholarly side of macrobiotics, left shortly after Bruce arrived. Bruce was more oriented toward the business side. Bruce became the head of the store, and Jimmy Silver soon came out from Boston to work with him at the store. Soon shipments of foods began to arrive directly from Japan, sent by Paul Hawken with whom Bruce talked frequently by phone. So in the summer of 1970 Bruce put out a wholesale price list and rented a warehouse (about 2,000 square feet) catty-corner across the street (something like 7990 Beverly Blvd.). Soon the first Erewhon products packaged in Japan began to arrive, and

because of these retail packs the wholesale business took off. The first seitan came in shrink packs; it later came in jars. Tamari was the best-selling import, followed by miso, then umeboshi. The foods still arrived in small boxes or single kegs; containers did not begin until later. At about this same time Tom DeSilva, a lawyer who became a yoga instructor, applied for a job as a janitor; he just wanted to be around.

Erewhon West soon outgrew its first warehouse, in part due to a deal made with the Lundberg Brothers. Bob Kennedy of Chico-San was the pioneer in contracting with the Lundbergs to grow short-grain brown rice in California. Chico-San had exclusive rights to all the rice produced by the Lundbergs. But Chico-San sold this rice for a high price, which prevented Kennedy from selling the amount he had contracted to buy. So a side deal was made, between Erewhon and the Lundbergs, in which the Lundbergs packaged the unsold rice exclusively for Erewhon and labeled it "unsprayed." Chico-San would not allow it to be labeled "organic." With this arrangement, Erewhon got into the rice business in a big way, selling their rice for \$11.00 a bag versus about \$30.00 for the same product from Chico-San labeled "organic." Brown rice soon became Erewhon's biggest product; they sold it to Eden Foods, Laurelbrook, Tom Swan in Chicago [Illinois], Tree of Life in Florida, Food for Health in Tucson (Arizona), some distributors in Northern California, Green Mountain Grainery in Boulder (Colorado), etc. It was rice that gave Erewhon nationwide distribution, putting their products in every natural food store in the USA. Bob Kennedy was furious but he was stuck with his contract, and Bruce thinks the Lundbergs eventually let Kennedy off the hook.

Now Erewhon-West began to catch up with Erewhon-Boston in sales because of two factors: They could get a shipment from Japan 3 weeks faster than Boston, and they were near the source of brown rice.

In late 1970, to keep up with the explosive growth, Erewhon rented a second warehouse at 8454 Steller Drive (10,000 square feet). In his "spare time," entrepreneurial Bruce founded two other businesses of his own: Pure & Simple, and The Natural Living Company. Pure & Simple, located in the Steller Drive warehouse, was the first of America's new wave of natural food snack companies. Bruce had talked over the idea with Paul Hawken, who felt that snack foods were not appropriate for Erewhon at that time. The company's first product was Corn Munchies, which was the first natural corn chip. They would make corn tortillas, cut them into wedges, fry them in sesame oil, and season them with tamari. The Corn Munchies soon became very successful. The Natural Living Co. made bodycare products and cosmetics, starting with Sesame Shampoo and Sesame Lotion. Bruce had met a brilliant chemist named Carlos de Villalvilla, a Cuban aristocrat who was head of research for Max Factor. Bruce asked him to

develop a line of cosmetics without preservatives or mineral oil (a vegetable oil should be used instead of a petroleum derivative).

By early 1971 Erewhon had outgrown the 10,000 foot warehouse and another 20,000 square feet in an old bakery, from which they did all transshipments to distributors. The store expanded twice, taking over the corner fish store, to 8001 Beverly Blvd. Continued. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

3620. Macdonald, Bruce. 1992. The origin and development of Erewhon's operations in Los Angeles. Part II. 1971 to 1991 (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In one of its first issues (the very first was published in Jan. 1971), *East West Journal* published an interview with Bruce while Erewhon-Los Angeles was at the peak of its activity. They arranged for imports of natural foods from Japan to come into Los Angeles. They developed labels for the products with nice stories about each product; Burton Block did the graphics and helped with the text. He later became famous with the Nutragena designs.

In early 1971 Bruce found out that Paul Hawken had somehow obtained some stock and thus ownership in Erewhon and had not mentioned it to Bruce. So Bruce went back to Boston and discussed the matter with Paul. Paul said, essentially, "That's the way it is." Ultimately Bruce felt that Michio was to blame for the problem, but "when I found out that Paul had some stock, I felt he had broken a blood bond with me and deliberately deceived me. I was not upset at Michio. Basically I have always felt that he was just stupid. He had the greatest opportunity—like the founding of the computer industry and he was Bill Gates—and he couldn't comprehend the American entrepreneurial spirit. Michio's approach was the traditional Japanese one. You come to work for a company, we pat you on top of the head, you have lifetime employment, but don't ever ask to own any of it. He should have offered the people who conceived and built Erewhon partial ownership in the company to motivate them and to keep them around. Failing to do that was Michio's biggest mistake."

In 1970 *The Wall Street Journal* ran a front-page feature story on the emerging new natural foods industry. A person from Merrill-Lynch came in and said, "We could package this business and raise millions for you."

Bruce had always thought that Aveline had always owned all the Erewhon stock—from day one to the bitter end. The Kushi's attorney, Morris Kirsner, had put it in her name because they were worried about something happening like had happened to Irma Paule who ran the Ohsawa Foundation in New York. After Beth Ann Simon died in Nov. 1965, the FDA raided the Ohsawa Foundation late one night and found its Nature's Cupboard to be selling

food, as well as books, recommending the food as a cure for illness. Charged with "false advertising," the center was closed down, and the focus of macrobiotic teaching shifted to Boston. Michio was always concerned about teaching and being a purveyor of the foods about which he was teaching.

Seeing no future for himself in Erewhon, Bruce left Erewhon forever in May 1971 to attend to his two other thriving businesses. Bruce had been willing to work hard to build the company for a small salary (\$150/week), reinvesting all earnings, on the understanding that he would become a part owner later—the entrepreneurial way. Erewhon had more than 99% of the market share on all of the Japanese imports. Bob Kennedy was buying from Tokyo C.I., which was very tiny. They had excellent sources for oils and grains, had built "Erewhon" into the top brand name, and had developed an aura of almost invincibility and quality. In short, they owned the market they had created.

What happened to Erewhon-Los Angeles? One of the people who financed the early growth of Erewhon was John Deming, whose family were wealthy rice [sic, oil] barons. He married Judy Coates, lived on a trust fund, and invested something like \$150,000 to \$200,000 in Erewhon. Paul Hawken was close friends with him, in part because Paul married Judy's sister, Dora. Then (according to hearsay) something happened and John asked for his money back. Erewhon said they couldn't pay him, but offered him Erewhon-Los Angeles instead. So Deming ended up owning Erewhon-LA. [Note: For John Deming's version of this, see Dec. 1994 interview with him].

Today the store is owned by Tom DeSilva; it is named "Nowhere" and in the spring of 1991 it moved into a very fancy million-dollar complex up the street because the landlord refused to renew the lease.

During much of the early history of Erewhon, Paul Hawken was in Japan. Paul's main reason for going to Japan was so that Erewhon could develop consumer packages and have the products (tamari, miso, noodles, seaweeds, kuzu) packaged in Japan. Hawken didn't return from Japan until the Erewhon store and 2 warehouses in Los Angeles (8554 Steller Drive, plus part of an old gigantic bakery) were up and running at full speed. They could get imports from Japan 2-3 weeks sooner in Long Beach than in Boston. From the West Coast, they shipped the goods as far east as Chicago, Illinois.

Warren Clough of Shiloh Farms was involved with organic farming before Erewhon; Warren was a very early pioneer.

Very little documentation remains on the early history of Erewhon. In about mid-1971 *East West Journal* published an interview with Bruce about Erewhon, conducted by his first wife, Maureen. It contained a photo of Bruce, and a good chronology of developments at Erewhon-Los Angeles. That was the real active time for the West Coast. In

Aug. 1973 Paul Hawken wrote a self-serving article in *East West Journal* titled "Erewhon: A biography. The view within," which is full of inaccuracies. Bruce thinks that Patricia Smith (Patti, in Monrovia, California) might have early Erewhon catalogues. She was working for Trader Joe's until several months ago. She now has a new job elsewhere. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

3621. Hayakawa, Tsuneo. 1992. Re: History of Hacho miso company. Letter to William Shurtleff at Soyfoods Center, March 17. 3 p. Handwritten. [Eng]

• **Summary:** There is firm evidence to show that this company was established in 1645. Most documents written during the Meiji period (1868-1912) state that the company was established in that year. "And a death register, which had been kept in the Buddhist temple where my ancestors' tombs stand, supports this view.

"Until about 1600, my ancestors lived in the area across the Yahagi River which runs 80 meters west of our company. Then very favorable social and economic conditions for a Miso company were realized. The stream of the Yahagi River became so broad that ships with heavy load could sail up and down very easily. Next, the Tokaido-Highway was improved...

"Therefore, present location at Hacho-Miso Company became very suitable for production and sales activity of Miso. Foreseeing the future, one of my ancestors decided to move to Hacho-cho to start the business. Besides, this place was gifted with good soybeans, pure water of the Yahagi River and excellent salt. Our company has more than one-hundred sales-record notebooks (*Daifukuchō*). Some of them were written in the Edo period."

The president and top man at Hacho-Miso company is now Kyūemon Hayakawa, his elder brother, who was born in 1916. His two sons are in charge of the actual daily business; one is vice-president and the other managing director. Address: Hacho Miso, 69 Okan-dori, Hacho-cho, Okazaki-shi, Aichi prefecture 444 Japan.

3622. Shimizu, Teruo. 1992. Recent developments at Miyako Oriental Foods (Interview). *SoyaScan Notes*. March 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Their Caucasian-American miso market is growing at about 10% a year. Miyako's total sales in America are growing at about 15% a year. They started using organic soybeans about 2 years ago, and that has helped the growth of their product in the natural foods market. The Japanese yen has steadily become more expensive (i.e. one dollar buys fewer yen), so the cost of miso imported to America has risen approximately proportionally. Thus many Japanese restaurants in America that formerly used imported miso are now buying their miso from Miyako. Miyako is not exporting any miso to Japan,

because the freight is high and there is also a high tariff on miso imported into Japan. Address: Vice President, Miyako Oriental Foods Inc., 4287 Puente Ave., Baldwin Park, California 91706. Phone: 818-962-9633.

3623. Halizon, Scott. 1992. Early work with natural foods and miso in Colorado. Joyous Revival and Eden Foods (Interview). *SoyaScan Notes*. March 25. Conducted by William Shurtleff of Soyfoods Center.

Address: Salt of the Earth, P.O. Box 1614, Rifle, Colorado 81650. Phone: 303-625-4444.

3624. Bateson, Betsy Reynolds. 1992. Tidbits on skewers... hot off the barbecue. *Sunset (Menlo Park, California)* 188(3):140-41. March.

• **Summary:** Contains a recipe for Miso- and maple-marinated pork with apple and onion; it calls for 1/3 cup *aka miso* (red fermented soybean paste).

3625. Bounds, Sarah. 1992. The subject of soya. *BBC Vegetarian Good Food (England)*. Spring. p. 28-29, 31-32.

• **Summary:** An introduction, with many color photos, to soyfoods, including TVP, tofu, soya milk, soya flour, soya oil, soy sauce, miso, tempeh, fresh soya [green vegetable soybeans; "soya beans can be eaten fresh straight from the pod, served green and tender..."], and whole dry soybeans. Contains considerable incorrect information.

3626. GEM Cultures. 1992. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. March. [4 ref]

• **Summary:** A new addition to the catalog is "Tofu form boxes" named "Total Tofu!" Each is made by a local woodworker in Mendocino County using American beech wood. The 8 by 5 by 3½-inch size is large enough to press 2 pounds of tofu. Included also is a 3 oz packet of natural nigari, 3 ounces of Terra Alba calcium sulfate, a double square of Grade 60 cheesecloth to line the box, and directions on how to make tofu and soymilk. Price of a Total Tofu kit, postpaid, is \$32.00. Address: Fort Bragg, California. Phone: 707-964-2922.

3627. Johnson, Lawrence A.; Myers, D.J.; Burden, D.J. 1992. Early uses of soy protein in the Far East, U.S. *INFORM (AOCS)* 3(3):282-88, 290. March. [54 ref]

• **Summary:** A nice history of the subject based on a review of the literature. Contents: Early history in East Asia (industrial uses, chiang and miso, natto, tempeh, soymilk, tofu, shoyu). Emergence of U.S. soybeans (early soybean mills, ADM, Glidden). Chemical understanding of soybean protein (major components/fractions). First industrial applications (oil and meal). Soy protein-based plastics (Henry Ford). Chemurgic movement (U.S. Regional Soybean Industrial Products Laboratory, Northern Regional Research Center, Glidden). Soy protein adhesives (I.F.

Laucks). Paper coatings and sizings (Glidden). Soy fiber spinning (Ford, Azlon, Drackett). Other industrial uses. Address: Center for Crops Utilization Research, Iowa State Univ., Ames, Iowa 50111.

• **Summary:** This is one of the best sources known on the subject, which includes much information on the export of shoyu from Japan to other parts of Asia and to the Netherlands by the Dutch East India Company (VOC).

Chronology and basic concepts: Almost all shoyu (soy sauce) exported from Japan during the 1600s and 1700s (and all soy sauce exported officially or legally) was exported from a tiny man-made island named Dejima in Nagasaki Harbor. Most of it was exported by the Dutch East India Company (VOC), which was the only European company allowed to trade with Japan during this period of isolation from 1600 to 1854. The Japanese government classified all soy sauce exported from Deshima into two basic types: (1) Official trade freight (*motokata nimotsu*, also called *compania nimotsu*), and (2) Private trade freight (*waki nimotsu*, also called *yakusha / sojya* {staff / sailor} *nimotsu*). Official trade freight was the kind engaged in by the Dutch East India Co.; this freight was recorded in the Nagasaki Trading Firm Journal. Private trade freight referred to the goods traded privately by Dutch sailors and by the chief and staff working at the Nagasaki Trading Firm.

Note: In about 1600 the Chinese obtained an official trade permit and settled in Nagasaki. At the peak of Chinese activity there, about a century later, as many as 190 Chinese ships a year were visiting Nagasaki, and one-sixth of the town's population hailed from the East Asian mainland.

1609-1641—The Dutch East India Co. (VOC) maintains a trading post at Hirado, a small island off the northwest coast of Kyushu.

1634—Dejima (literally “protruding island,” also spelled Deshima), a small artificial island in Nagasaki Harbor is constructed as ordered by shogun Iemitsu; it originally accommodated Portuguese merchants.

1638-1639—The Portuguese (and other Catholic nations) are expelled from Japan for suspected complicity in the Shimabara Revolt of 1637.

1641 May—The Dutch East India Co. is moved from to Hirado to Dejima, where they were kept almost like prisoners on the tiny island. For 200 years, Dutch merchants were generally not allowed to cross the little bridge from Dejima to Nagasaki, and Japanese were likewise banned from entering Dejima. From 1641 to 1853 the Dutch are the only Western nation allowed to trade with or to enter Japan,

but solely on Dejima. Chinese and Korean traders are still welcome, but their movements are restricted.

Dutch ship arrivals: From 1641 to 1671 an average of 7 ships per year. From 1671 to 1715 about 5 per year. From 1715, only 2 ships were permitted each year; this was reduced to 1 ship in 1790 and again increased to 2 ships in 1799.

1647—Exporting of shoyu (soy sauce) to Asia from Japan (as official trade freight) began. The first shipment was 10 kegs (*taru / balien*) sent to Amping, on today's Taiwan, by the VOC's Taiwan Trading Firm. From 1647 to 1720, this shoyu was exported from the Nagasaki Trading Firm to each regional trading firm in Asia, including today's Hanoi, Vietnam (1652); Ayuthaya, Thailand (1657), Jakarta, Indonesia (1659), Malaca, Malaysia (about 1860), 250 km northwest of Phnom Penh, Cambodia (1665), Paliacatta, 40 km north of Madras, India (1666), Bengal region, India (1666), Colombo, Sri Lanka (1670), Surat, northwest coast of India (1672), Amboina, Banda, and Ternate, in the Moluccas, Indonesia (1693), Sulawesi Island (Celebes), Indonesia (1693).

1685—The Shogunate at Edo limits the amount of “private trade freight” to 400 *kan* (1 *kan* = about 3.75 kg), or about 1,500 kg or 3,300 lb.

1669 March 31—20 kegs of shoyu are shipped from Japan to Batavia on a Chinese ship (Source: Diary of Casteel Batavia). This is the earliest document seen showing a Chinese ship exporting shoyu from Japan.

1687—20 kegs of shoyu made in Kyoto (1 keg = about 29.104 liters) is shipped to the Ceylon (today's Sri Lanka) trading headquarters. It is believed to have been made by a sake brewer in Kyoto. At that time, Sakai city, a southern suburb of Osaka city, was located on the edge of Osaka Bay at the mouth of the Yamato River. It is one of the largest and most important seaports in Japan during the Medieval era, and is also famous in the Kyoto/Osaka (along with Kyoto) for its soy sauce production. During the period 1764-1780 shoyu was made in Sakai by 4 manufacturers, including Shobei Hosoya. Soy sauce made in Sakai was transported by ships along the Inland Sea (north of Shikoku), through the narrow straight between northern Kyushu and Shimonoseki, around the north and west sides of Kyushu, to Nagasaki. These ships from Sakai were called the “Sakai Raw Silk Carrier Boat” or *Sakai Bune*. They had been authorized to ship imported silk from Nagasaki since the Keichô period (1596-1611) of Edo era. The ship was empty going back from Sakai to Nagasaki and the space was used for soy sauce exports. Much of the shoyu exported from Japan to the Netherlands is thought to have been made in the Kyoto / Osaka area. It was probably made mainly in Sakai, while that made in Kyoto was exported in small amounts for special occasions. Extremely low priced shoyu is thought to have been made in Kyushu, and exported to China. None of the shoyu exported during the Edo /

Tokugawa period (1600-1867) was made in the Edo / Tokyo (*Kanto*) area.

1711–In the Chinese and Western Freight Log it is recorded that 61 kegs of shoyu (56 large kegs and small kegs) as well as 40 kegs of miso were exported as “official trade freight,” whereas 867 kegs were exported as “private trade freight.” Thus, the private freight (in this rare year where records exist) was about 8 times as much as the official freight.

1712–Some 999 kegs of shoyu and miso are exported as “private trade freight.” Unfortunately we are not told how many of these contained shoyu and how many contained miso.

1721-1792–The VOC exports Japanese shoyu only to its trading headquarters at Batavia (today’s Jakarta, Indonesia); from there it is transferred to each regional trading firm.

1737–The VOC first exports Japanese shoyu to the Netherlands, from its Batavia headquarters. Thus, Japanese soy sauce first arrived in the Netherlands (and in Europe) in 1737. All this shoyu was exported as “official trade freight.” This export route was used until 1760. During the 24 years from 1737 to 1760, approximately 46,000 liters of soy sauce were exported from Dejima to the Batavia headquarters, and 15,600 liters (about 1/3 of the total) were then shipped from Batavia to the Netherlands. In 1742 and 1743, no shoyu was transhipped from Batavia to the Netherlands. Thus, during the 22 years that shoyu was transhipped from Batavia to the Netherlands as “official trade freight” was about 707 liters/year. The amount exported was calculated based on the capacity of the “large keg” (29.104 liters); the small keg held exactly half this capacity (14.552 liters). In addition, a substantial amount of shoyu was presumably exported from Batavia to the Netherlands as “private trade freight.”

Also in 1737 the limit of 400 *kan* on “private trade freight” is abolished, so that any amount can be exported in this way.

1790–Shoyu is first exported from Japan in comprador bottles; these bottles, made of grey / white porcelain, were recorded as “sterilized soy sauce” and 550 of them were used this year to export shoyu.

1795–The book titled *Travels in Europe, Africa, and Asia, Made between the Years 1770 and 1779...*, by Charles Peter Thunberg (a Swede) is published in English. An entry from about the year 1776 (Vol. 4, p. 107), in the chapter on Commerce, reads: The traffic in Soy [sauce]... is more considerable [than that of tea. Japanese] soy is much better than that which is brewed in China. For this reason, soy is not only exported to Batavia [Jakarta], in the wooden kegs in which it is made, but likewise sold from thence to Europe and to every part of the East Indies. In some places in Japan too the soy is reckoned still better than in others; but, in order to preserve the very best sort, and prevent its undergoing a fermentation, in consequence of the heat of the climate, and thus being totally spoiled, the Dutch at the

Factory [at Desima / Dezima / Dejima] boil it up in iron kettles, and afterwards draw it off into bottles, which are then well corked and sealed [by applying bitumen / coal tar to the stopper]. This mode of treatment renders it stronger and preserves it better, and makes it serviceable for all kinds of sauce.

Note: This early discovery of pasteurization and sealing in porcelain bottles explains how the Dutch were able to keep this soy sauce from spoiling becoming overfermented while it was being shipped from tropical Japan, to Batavia [Jakarta], across the Equator, around the Cape of Good Hope (south of Africa), then all the way to the Netherlands.

1799–The Dutch East India Co. (VOC) is dissolved.

1804-1829–A total of 2,672 kegs of shoyu is exported in Chinese ships during most of these 26 years from Japan. About 153 kegs/year are exported (range: 12 to 322 kegs, but with no exports in 1805, 1816-18, 1824-28).

1854–Japan’s policy of self-imposed national isolation is abolished / ended. Shoyu can be exported freely, without limits.

Some 670 liters a year went to Holland. The soy sauce to be sent to Holland was put in a special container with special outside packaging. The shoyu that was exported was made mostly in Kyoto and In 1765 the famous French-language *Encyclopedia*, by Denis Diderot had a section on soy sauce.

Brief biography of Teijirô Yamawaki: 1914–Born in Japan. 1950–Graduated from Tokyo University, Dep. of Literature, Faculty of Japanese History. 1954–Awarded his doctorate (PhD) in history from Tokyo Univ. Between 1960 and 2002 he was the author of at least 8 books in Japanese including: (1) *Smuggling (Nukeni)* (1965, Nikkei Shinsho). (2) *Trading with Chinese Merchants in Nagasaki* (1964, Yoshikawa-kobunkan). (3) *Nagasaki Trading Firm of Dutch Merchants* (1980, Chiokoron). (4) *Encyclopedia of Silk and Cotton during the Edo Period (Jiten Kinu to Momen no Edo Jidai)* (2002, Yoshikawa-kobunkan, Tokyo, 230 p.).

3629. Amartseff, Nik. 1992. The invention and commercialization of roasting soybeans, seeds, and nuts with shoyu or tamari: Hopi Seeds and Nik’s Snaks at Erewhon (Interview). *SoyaScan Notes*. April 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In about 1969-1970, Nik met Paul Hawken at New Age Natural Foods in Palo Alto, California, where Nik had been hired by Fred Rohe to create the natural deli department. Nik knew David Mastrandrea. Paul offered Nik a job at Erewhon. When Nik saw the coming demise of New Age, he accepted Paul’s offer, and arrived in Boston in about May of 1971.

At about the same time, Paul met a guy named Jerry (his last name started with “S,” perhaps “Sh,” and sounded like a German Jewish name). Jerry was roasting very small batches of sunflower and pumpkin seeds in iron skillets in his home kitchen in Berkeley, California; while they were still hot, in the skillet with the fire off, he would season them by rapidly mixing in undiluted tamari and continuing stirring until the liquid was evaporated and the flavor absorbed by the seeds. He bagged them and peddled them on the streets. Nik thinks that Jerry launched the first such commercial product, probably in about 1968. He had become reasonably successful when Paul met him in about 1969-1970, so Paul invited him to come to Boston, where Paul set him up in a corner of the recently acquired warehouse at 33 Farnsworth St. Jerry started production using his former simple, skillets, then Paul helped him to buy a used cast-metal tumbler-style coffee roaster, converted to a peanut roaster, that could process 50 lb at a time. After being roasted, the seeds were poured into a large rectangular sieve, custom fabricated for this purpose. Jerry was making and packaging this line of Hopi Seeds as a one-man operation. Each seed was roasted and seasoned separately. They were on the market sometime between late 1969 and early 1970. His production soon exceeded his ability to handle it; he was selling through Erewhon wholesale. When Nik arrived in May 1971, Hawken asked Nik to assist Jerry. But after 1 month, Jerry suddenly disappeared—it was apparently related to his selling marijuana on the streets. Soon thereafter, by the summer of 1971, Nik increased the line from 2 products (sunflower, and pumpkin seeds) to 5 (almonds, cashews, and soybeans). They were sold in 1 oz polyethylene-cellophane bags. Erewhon had received a shipment of specially processed, split soybeans, from a new easy-to-clean, easy-to-empty roaster made of sheet steel was developed (it’s construction resembled a cement mixer). While the roasted seeds were still inside, Nik would spray in the tamari using a sprayer with a long nozzle, then finish cooking them on low heat.

When Nik arrived in May 1971, the main soy products that Erewhon sold were traditional tamari and miso, imported from Japan, plus soybeans and soy flour (toasted from Arrowhead).

By the fall of 1971 Nik was no longer directly involved with manufacturing the tamari-roasted seeds and nuts; he had been promoted to installing Erewhon’s first semi-automatic equipment to make the Hopi Seeds, granolas, etc. The main management people at Erewhon in those days were Paul Hawken (the alleged head), Bill Tara, Hy Lerner, and Yuko Okada (of Muso Shokuhin). Wally Gorell (who was designing packages for a while). Erewhon was setting up its West Coast operations at this time and there seemed to be an ongoing power struggle between Hawken versus Tom DeSilva and Roger Hillyard. At one point, Roger went to Arrowhead Mills. Nik continued to work for Erewhon until

about May 1972. Later he returned in Sept. 1973 and stayed until about 1977.

At one point, Wally left Erewhon and Paul Hawken got a small graphic design firm to design a more sophisticated label for the Hopi Seeds and to change the name. The name they came up with was Sol Seeds, with a stylized logo of the sun. But the name had not been researched and the owner of that registered trademark threatened to sue. By now Paul Hawken was gone and Ty Smith was president. When Nik returned to Erewhon in Sept. 1973, he renewed his involvement in this line, which still contained only 5 items. By about 1974 he had built the line into one that contained up to 12 products, including trail mixes and mixed nuts and seeds. So at that time Ty honored Nik by renaming the line “Nik’s Snaks.” The name “Sol Seeds” never appeared on a commercial Erewhon product. By the time Nik left Erewhon in about 1977, there were about 18 items in the Nik’s Snack line, a total of about 30 products including the various sizes of one product. Nik had taken a home operation, that never got sophisticated but was based on a good idea, and made it sophisticated in terms of the manufacturing process, product development, the package design, and the marketing. Nik’s Snaks were a good-selling product for Erewhon for as long as the company existed. Many other natural foods companies developed their own competing lines of “tamari-roasted seeds and nuts.” Address: Right Hand Press, P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

3630. Macdonald, Bruce. 1992. Introduction to macrobiotics and early work at Erewhon (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce was born on 5 Feb. 1946 in New London, Connecticut. In 1964 he entered the University of Connecticut, and essentially majored in LSD. He was an early buyer (for personal use only) of LSD from the Boohoo Church in Florida. This “Church” was the original importer of LSD from Sandoze Labs in Switzerland. Arthur Klets was head; Timothy Leary and Richard Alpert were involved.

At Christmas, 1965, Bruce dropped out of the university because he had a kidney disease that just wouldn’t go away. He went to a doctor who gave him, sequentially, 4-6 varieties of antibiotics. Each one worked for several weeks until the microorganisms became resistant. Seeing that he was on a dead-end road at age 18, he freaked. He took a bus to New York and sitting near him was Kathy Bellicchi (who is now living in Brookline, Massachusetts). She said to him, “Just eat brown rice and salt and it will go away.” Bruce began to study macrobiotics, and yin/yang. Finding a chart which showed buckwheat to be the most yang grain, he decided to start eating buckwheat as his main food. He moved to Vershire, Vermont (a good, clean, quiet place for healing) and began living in a cabin with Bort Carleton (a

shoe tycoon in Boston), who was also involved with macrobiotics. Bort also sponsored a macrobiotic study house. Soon he was cured—permanently—of his kidney disease. He became a true believer in macrobiotics. He and Bort would drive to Boston to listen to Michio Kushi's lectures in the old church.

In June 1967 Bruce moved to Boston, and began to live in the University Road study house. After four quick affairs with lovely young women ("I was really yang"), Michio called him over to 216 Gardner Road and asked him to "chill out" (calm down) with these girls, since Michio was "involved" with the same young ladies. Michio and Aveline had initially gotten together in a marriage arranged by George Ohsawa, who sent Aveline to America to marry his best student. Michio and Aveline had an "open marriage," and both of them had affairs with younger people of the opposite sex the whole time that Bruce was in Boston. This was well known in the upper echelons of the still small macrobiotic community.

By late 1967 Bruce was working as a carpenter for Michio's landlord (Mr. Fogelman), redoing his house at 216 Gardner Rd. Paul Hawken hired Bruce to be the contractor and carpenter to remodel the new Erewhon retail store at 342 Newbury St. Bruce did most of the design and contract work, then he assisted Jim Docker (a master carpenter) in the remodeling, getting thick planks from Boston piers for the floors, and constructing the shelves with dowels rather than nails. Erewhon had a little store below street level at 303-B Newbury Street, that later became Tao Books. While the business was at 303-B Newbury, in Aug. 1968 the first imports from Japan started to arrive from Muso Shokuhin. These included tamari (soy sauce) and miso. But Erewhon was unable to get Hatcho miso ("the Emperor's miso") in foil packs, and that was Erewhon's first contact with Mr. Kazama; he was able to get that product for Erewhon in less than boat-load quantities. From then on, Erewhon started to import from both Muso and Kazama/Mitoku. The Erewhon store at 342 Newbury St. opened in November 1968, on Thanksgiving day, and several months later, in March 1969, Paul Hawken went to Japan. Paul asked Bruce to take over as general manager of Erewhon. Roger Hillyard ran the retail store in the front of the building.

What finally happened to Erewhon? Michio always said that Erewhon was a school; he should have said it was a business. Address: Right Hand Press, P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

3631. Kushi, Michio. 1992. The main reasons for Erewhon's decline and bankruptcy, and current work with macrobiotics worldwide (Interview). *SoyaScan Notes*. April 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michio has thousands of files in his basement, and some of them probably contain early catalogs and other information about Erewhon. Erewhon definitely started to

import from Mitoku first, and then Muso—but they were about the same time. Michio set up all these connections before Paul Hawken went to Japan. Mr. Kazama came to America and they talked about the items Michio wanted to import. Then Muso was approached. Michio thinks Erewhon started importing foods from Japan 1-2 months before Hawken went to Japan. Hawken and Evan Root went to Japan at the same time. The main purpose of Hawken's trip was to study Japanese language and culture, and to set up more good connections for Erewhon and to arrange for products to be packaged individually; previously all were shipped in bulk. Paul didn't find out any new sources, Mr. Kazama did that.

Michio believes that there were two main reasons for Erewhon's decline and bankruptcy: (1) The company tried to expand too much too fast. At the end it was selling 4,000 products; (2) This rapid expansion led to Erewhon having many poor quality products. The company should have concentrated on high quality macrobiotic foods. Management wanted to have a wider selection of products, in part because competitors were offering a wide selection. Also, Erewhon gave up its virtual monopoly on macrobiotic-quality products imported from Japan and revealed many secrets about the Japanese manufacturers and suppliers of those foods and how those foods were made. If he had to do it over again, Michio would concentrate on only the best quality foods, and let the company grow slowly and naturally. For example, the quality of tamari soy sauce began to decline at a very early date. Likewise with the umeboshi plum and sea vegetables. "The quality of every product was declining because of too rapid growth in the company's sales. Moreover the educational activities didn't keep up with the company's growth. Muso and Mitoku have been keeping good quality as best they can but the so-called other natural food buyers, who were not concerned with macrobiotics, also started to go to Japan and buy those products, not only from Muso and Mitoku, but from other suppliers too—especially suppliers of soy sauce and miso with lower quality. These inferior quality products were retailed for a cheaper price at stores in America. The public did not know about the difference in quality, so Erewhon began to face big competition.

Even though Aveline owned Erewhon, neither she nor Michio ever received any salaries or money from the company. They wanted to let the management of Erewhon have a free hand, so they didn't tell them how to run it—to slow growth and concentrate on keeping quality high. "Erewhon was more like an educational place." There were debates over whether or not Erewhon should carry organic cheese and vitamins. Michio and Aveline opposed carrying these products, but let management do as it wished.

At the time Erewhon was growing most rapidly, the company needed money to finance the expansion, but bank interest rates were extremely high—about 15-18%. Inventory

control for 4,000 items is very difficult and expensive; it requires a large warehouse and shallow inventories. During the last few years, Erewhon was able to fill only 40-50% of its orders because so many items were out of stock. Also as the company grew, many non-macrobiotic employees had to be hired to drive the delivery trucks, and they created a labor union. Erewhon had to battle with this union for 1½ to 2 years, and that cost a great deal of money. Truck drivers cut prices to stores in order to try to meet the prices of competitors. Financial difficulties piled up starting at the time when interest rates jumped and the union was formed.

Bill asks why Aveline and Michio didn't give talented managers a share of the ownership in Erewhon to motivate them to stay with the company. Michio says that Paul Hawken owned one-third of the Erewhon shares. Evan Root owned shares in Sanae. The Kushis paid all or part of Evan and Paul's travel and living expenses in Japan. Paul got his one-third shares after he returned from Japan and became president. When he resigned, he was definitely paid for the value of his shares. Paul wrote from California that he needed the money and offered to sell back his shares. So Michio and Aveline sent him the money and Paul sent his shares back to them. Only later did Michio learn that Paul needed the money because of his divorce from Dora Coates. Other people (whose names Michio also remembers) also owned some shares. Michio does not feel that giving managers ownership would have helped Erewhon. Michio thinks that the people who managed Erewhon during its last 5 years had the necessary business skills necessary to manage a company of that size that was growing rapidly.

Another reason for Erewhon's fall was that Michio did not pay serious enough attention to what was happening at Erewhon. He was too involved in teaching in America and Europe. At the time he noticed what was happening and stepped in, the situation had already become too serious. There was much sloppiness allowed by management, even though their intentions were good. He should have noticed a year before. It was a very sad situation. "Yet Erewhon had meaning as a pioneer company. That spirit still remains. My purpose at present is to continue education all over the world. Macrobiotics is now spreading all over the world, even to the Soviet Union, Thailand, and Japan. In Leningrad some 300 medical doctors are now studying macrobiotics as a group to help find a solution to the health problems of their country. His books are being translated into many Eastern European languages. Also it is very important to reach the scientific, medical, and nutrition professions—as well as governments. Their attitudes are now rapidly changing. Macrobiotics is now growing tremendously. My main concern with natural foods is that the quality be kept very good. My current effort is to elevate the quality of each product. For example, miso should definitely be fermented for 2-3 years. Soybeans and grains should all be organically grown, and only very good sea salt should be used—such as

that made by S.I. Salt, an American company in New Mexico, and Lima salt in Europe [from Lima Foods in Belgium]. Michio now goes to Japan twice a year, and there he gives many lectures all over the country, helps to set up chapters of One Peaceful World, and works with food makers on product quality. He also formed the Japan Organic Natural Food Association (*Yûki Nosui Sanbutsu Kyôkai*) in Japan, of which he is president. About 200 companies are members.

On the one hand, Michio is happy with the way his work is going now. "But of course, I am always dissatisfied too. My time and my ability are limited. I can't help as many people as I would like. The demand is so great. So I always feel sad on that point. Whenever you talk with people from Erewhon, please extend my best wishes. And say always that Michio is thinking of them and their happiness. I hope sometime in the future we can get together. Then we can talk more about how to build one peaceful world—and not only food, but more about health, families, government, economics, and spiritual matters, and how to make the many countries more united and harmonious in one world. Let's work together." Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6869.

3632. Kotsch, Ronald. 1992. Recollections of the early days of Erewhon and Japan (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ron does not have any early Erewhon catalogs because he does not collect things. He gave all the research materials he gathered while writing his PhD thesis on George Ohsawa and the history of macrobiotics to Marc van Cauwenberghe's library; much of the material was in Japanese (photocopies of Ohsawa's books) and the rest was the English-language notes Ron took while reading these many books and other Japanese-language writings. However he will check to see if his sister has any early Erewhon catalogues.

Ronald was the manager and only employee of Erewhon in the summer of 1967, from early June to August, while the retail store was still downstairs at 303-B Newbury St., shortly before Paul Hawken arrived. Ron thinks he took over from Eizo Ninomiya, a Japanese fellow who barely spoke English and who replaced Evan Root in the spring. Eizo had come to teach a rather obscure form of jujitsu. Ron quickly learned that he was not cut out to be a businessman. The main products he sold (from rough wood shelves) were Kokuho-Rose brown rice, whole wheat flour and beans (which he bagged), Sahadi sesame butter, sea vegetables, and miso. He remembers bagging foods endlessly. Erewhon was probably ordering a lot of products from Infinity Foods, so the miso may well have come from them. He lived at the Gardener Road house and he would give Aveline the day-end receipts, which averaged about \$50-60 a day that

summer. One day he couldn't account for \$5 and it was a big thing. In the evenings he and 8-10 other people would gather for Michio Kushi's talks in a back room at the Arlington Street Church. Ronald thinks he was replaced by Paul Hawken and Bill Tara. Ron does not know who owned Erewhon.

Ron went to Japan in the fall of 1967 with a vague plan to study Japanese culture and macrobiotics. He had studied Japanese at Harvard for a year the previous year, before he discovered macrobiotics. He was the first person from the Boston community to go to Japan for this purpose. Cecil and David Levin came in the spring of 1968. Ron studied with Japanese people, including an acupuncturist named Take Nouchi. He took flower arrangement classes at Nippon C.I., which had a cubbyhole in a huge commercial building. He lived with Michio Kushi's parents for the first 4-5 months (early Dec. 1967 to early April 1968), in Japan, at Hoya near Tokyo, then he moved to Kyoto and enrolled in Kyoto University as a research student. After 4 months, in Aug. 1968, he returned to America.

In 1976 Ron resolved to finish his graduate studies. To receive a doctoral degree in History of Religions from Harvard he needed only to write a dissertation. So he brushed up his Japanese and flew to Japan in Feb. 1977. He enrolled immediately in Kyoto University, got some jobs teaching English in colleges there, and spent the next 18 months collecting books and papers about Ohsawa, 95% in Japanese, and conducting 15-20 interviews. In July 1978 he returned to Boston and for the next 18 months he read and took notes on the documents he had collected. In the 2-3 years after he finished the thesis, he received 200-300 requests for copies of it, indicating that there was an interest in the history of macrobiotics. This led him to write a book on that subject at the request of Japan Publications. It has sold about 7,500 copies. In 1987 his book *Macrobiotics: Beyond Food* was published.

Ron continues to write: he is now interested in Rudolf Steiner, Anthroposophy, and Waldorf Schools, plus the Alexander Technique related to body awareness. He is the editor of a magazine that deals with Waldorf education. He writes a little for *Natural Living* and *New Age* magazines. Address: 4 Hulst Rd., Amherst, Massachusetts 01002. Phone: 413-256-6478.

3633. Root, Evan. 1992. Recollections of early work with Erewhon and Sanae. Trip to Japan with Paul Hawken (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of April 29.

• **Summary:** Evan (his first name rhymes with "heaven") does not have any early Erewhon catalogs, but he thinks Marc van Cauwenberghé might have some in his library on macrobiotics. He does have a letter to the general public announcing the opening of the first Erewhon retail store on

9 April 1966. It was at 303-B Newbury St., below street level. Initially Evan owned (titularly) 100% of the stock in Erewhon, but soon he passed it to Aveline Kushi after legal documents were drawn up. While he was at Erewhon the little retail store sold the following soy products: whole soybeans and probably soy flour (probably from Walnut Acres or a Mennonite community, both in Pennsylvania), soy sauce and miso (probably both obtained from Infinity Foods in New York; Infinity imported these products from Japan). Hamanatto was also sold. No tofu was sold at the store, but firm tofu was available from nearby Chinatown.

The Kushis imported miso, shoyu, condiments, etc. from Japan about twice while Evan was managing the Erewhon retail store. This direct importing was infrequent and the quantities were small due to the lack of cash. It was much easier to buy from Infinity or Chico-San and not tie up the money. In fact it was the norm to stretch out those friendly distributors as long as possible for payment.

Before he left Erewhon, in Oct. 1967, Evan personally hired Paul Hawken, with Aveline's permission, to take his place. Then Evan opened the first macrobiotic restaurant in Boston, named Sanae (meaning "young rice plant" in Japanese); it opened in early 1968 on Newbury St. In late March 1969, Evan and Paul Hawken left Boston and traveled to Japan together. Several months before they left, Evan had been given 50% of the shares of stock in Sanae by the Kushis for the work he had done at Sanae. The Kushi's lawyer, Morris Kirsner, had drafted the agreement to read that if Evan did not return to management of the company within 18 months, he would agree to sell this stock back to the Kushis at an agreed-upon price. Evan thinks that Paul had a similar type of stock arrangement in Erewhon, but he is not sure what it was (Note: See interview with Aveline Kushi, March 1993). Evan went to Japan mainly to study the language and culture. He ended up staying there 3 years and 7 months, largely in Tokyo (Setagaya-ku, Shoin-jinja-mae). He studied Japanese at the Tokyo School of Japanese Language. After 18 months, there was a lad name Hiro Fujieda living with the Kushis in Boston. Rather than Hiro pay rent to the Kushis, Hiro's family would pay Evan monthly in Japan on a monthly basis—until the value of the stock was paid off. Evan used this money to support his studies.

After about a year, in late 1971 or early 1972, Evan went to work for Muso Shokuhin in Osaka. He translated letters that arrived from Europe and America into spoken Japanese, and then answered the correspondence. By the end of his stay in Japan, Muso was exporting quite a volume of natural foods and exports were a big part of the company focus. Evan thinks that Ty Smith took his place when Evan left.

Returning to Boston in early Oct. 1972 (along with Mr. Masuda and Michelle Matsuda), Evan became an employee of Sanae after several months, working as maître d'. In 1971, while Evan was in Japan, Sanae had expanded to

open another larger branch restaurant in Boston, originally called “Sanae” but informally called “Big Sanae,” then later formally named The Seventh Inn (at 269 Boylston St.). When Evan was in Japan, he heard that the restaurants were not doing well, so Yuko Okada (originally of Muso Shokuhin, who was working at Erewhon) took over management of Sanae. Hiroshi Hayashi, a top cook in a lineage, traveled to Boston from Japan, bringing with him his disciple, Chika Abe, to take charge of cooking at Sanae. His disciple, Mr. Yozo Masuda, later joined them. Hayashi is now at a restaurant named Latacarta in Peterborough, New Hampshire (Phone: 603-924-6878).

Evan’s recollection is that Paul Hawken’s trip to Japan was more to study the language and culture, but he did work on Erewhon business while he was there. Moreover, he returned from Japan after about 9 months to work at Erewhon. Evan feels that few of the people involved in early macrobiotic businesses saw themselves strictly or even mainly as businessmen. “None of us were in it, as I saw it, for the money. For us, the whole thing was a Cultural Revolution with respect to Japan.” Evan also identified strongly with the phrase “Biological Revolution.”

When Paul Hawken returned from Japan, he built Erewhon into a big natural foods company. Address: 541 Washington St., Brookline, Massachusetts 02146. Phone: 617-566-4783.

3634. DeBona, Don; Callebert, Mark. 1992. Update on Lima Foods and Euronature (Interview). *SoyaScan Notes*. April 19 and 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The following is based on a talk that Don had in North Carolina with Mark Callebert, general manager of Lima Foods in Belgium, then a direct interview with Mark in Belgium on April 23, followed by a letter from Mark on June 16 with exact dates. Mark has worked with Lima for about 16 years (since 1 Sept. 1975).

The Gevaert family sold Lima in May 1988 to a company named Vibec in Quebec, Canada. Vibec was a construction company (they were not involved with foods) and the owners spoke French. The contact with Vibec was made via Henry Lucy, a Frenchman who was on the Lima board of directors (and also a shareholder), who was a friend of Michio Kushi (Michio had healed Henry’s wife), who had quite a lot of money, and who also had a construction company in Africa. Michio was also on the Lima board for a while. Vibec purchased Lima as a way of getting involved in the new European market without borders which will begin at the end of 1993. However Pierre Gevaert and his son, Daniel (who was production manager at Lima, France), kept their property and mill in the south of France where Lima used to make miso. At that time Lima had a lot of financial problems. Pierre Gevaert owned the majority of the stock in Lima, and his relatives

(mostly his brothers and sisters) owned the rest. Mark and Frank Stevens (Pierre Gevaert’s son-in-law) played key roles in negotiating the deal, then stayed on to run the company. On 22 April 1989 Lima purchased Jonathan P.V.B.A., which is still a fully owned subsidiary (daughter company) of Lima. But the marriage of Lima (a Belgian natural foods company) and Vibec (a Canadian construction company) was a strange one, and for that reason it didn’t last long.

Then in September 1989 Lima was purchased from Vibec by Euronature (pronounced as in French, YU-ro nA-TYUR), a large international food company headquartered in Paris, France. Euronature is a holding company that was founded in June 1989; the president of Euronature was able to raise a lot of money from banks and insurance companies to create the holding company. Frank Stevens was killed in an automobile accident in Nov. 1989.

Lima is presently doing well, is financially very solid, and the future looks bright. Lima has sales of about \$15 million a year, but the company is not yet profitable. Mark feels that they will become profitable when sales reach about \$17 million/year. Their traditional high standards of food quality are completely supported by Euronature. Pierre Gevaert (born 21 July 1928 now in his mid-60s) no longer owns any part of Lima and neither he nor his son have been active with the company since it was purchased by Euronature. Pierre lives in the south of France and works on his organic farm there. Lima is still headquartered at Sint-Martens-Latem in Belgium.

Euronature has 4 major divisions: (1) Natural foods division, including Lima Foods, Lima’s bakery and muesli factory, and several natural foods distribution companies; (2) Gourmet division; (3) Seafoods division (Euronature’s largest), with branches scattered throughout Europe; (4) French specialty foods division.

Lima’s largest product lines are their muesli products (which they make at their own plant), their bakery (located 6 km from Sint-Martens-Latem in Belgium), their sesame division (they make tahini and gomashio, and were one of the first to grow sesame seeds organically), and their tomato canning division (located in the south of France, it makes tomato sauces and ratatouille). Lima’s leading soyfood products are tamari, shoyu, organic miso, their soymilk products (including regular and Mocha-Soy soymilk, and Soy Desserts, all made by Alpro in Belgium), fresh tofu salads, and tofu in cans and jars. Imports from Japan are now quite small, representing only about 10% of Lima’s total sales. Although Lima no longer makes its own miso, it still sells quite a lot of miso—much of it from past batches made by Jan Kerremans in the south of France. Lima is now looking for other sources, including American Miso Co. in North Carolina. Jan now works part time as a consultant for Alpro in Belgium.

Jonathan's main products are now seitan and tofu (both fresh [pasteurized] and in jars), plus many second-generation products made from seitan and tofu, such as fresh tofu spreads, tofu pates, seitan brochettes, etc. Jonathan makes all of the seitan, tofu, and related products sold by Lima. Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

3635. Boysen, Hans-Juergen. 1992. Soja [Soya]. *Schrot & Korn (Germany)*. April. p. 16-20. [Ger]

• **Summary:** An introduction to soybeans and soyfoods, including whole dry soybeans, soy oil, soymilk, soya meat (Sojafleisch, TVP), Whole soy flour, tempeh, and soy sprouts.

Note: This magazine is sold in German natural food stores (Naturkost-Laden).

3636. Wilson, Lester A.; Murphy, Patricia A.; Gallagher, Paul. 1992. Soyfood product markets in Japan: U.S. Export opportunities. Ames, Iowa: MATRIC (Midwest Agribusiness Trade Research and Information Center). x + 64 p. April.

• **Summary:** Contents: Figures. Tables. Acknowledgments. Introduction. I. Soybean processing (by Wilson and Murphy). Food from soybeans: Soybean chemical composition, environmental influences on soybean composition. Soyfood manufacture: Soymilk, tofu, momen tofu, kinugoshi tofu, packed tofu, aseptically-packaged tofu, deep-fried tofu, kori tofu. Tofu-related research: Recent studies at Iowa State University, summary, future research. Other nonfermented soyfoods: Yuba, kinako, texturized soy protein foods. Fermented soyfoods: Miso, shoyu, natto, tempeh. Japanese Agricultural Standards (JAS). Identity preservation and transportation. U.S. soybean quality and the Japanese market: Grain quality, judging quality, potential new markets.

II. Japanese soyfood markets (by Gallagher). Demand and growth prospects: Consumption patterns, demand analysis, forecasts. The U.S. share of the food soybean market: Sources and uses, market share analysis, determinants of relative prices, prospects. Trade and trade barriers: Soybeans, processed products. Summary and recommendations.

Appendixes: A. Excerpts from specifications and standards of food additives, etc.—Manufacturing and storage of tofu. B. Excerpts from standards and certification systems in Japan. C. Additional agricultural standards for soybeans. References.

Table 2.1 shows soybean use for soyfood production in Japan; actual (1986) and projected (2000). Soybeans for tofu are expected to increase from 524,000 to 609,700 tonnes. Soybeans for miso are expected to decrease from 156,000 to 101,600 tonnes. Soybeans for natto are expected

to increase from 92,000 to 118,600 tonnes. Figures 2.1 to 2.4 show Japanese per capita consumption of tofu, natto, miso, and soy sauce from 1965 to 1988. Tofu: Japanese annual per capita consumption of tofu has risen since 1965, except that it fell during 1973-1977. In 1965 about 3.6 kg/capita of soybeans were used to make tofu, increasing to 4.4 kg/capita in 1988. If 1 kg of soybeans yields 2.8 kg of tofu, then per capita tofu consumption in 1988 was 12.32 kg or 27.1 lb.

Natto: Japanese annual per capita consumption of natto has risen steadily, from a little less than 0.4 kg in 1965 to 0.6 kg in about 1968, to 0.8 kg in 1988.

Miso: Japanese annual per capita consumption of miso fell from 8 kg in 1965 to about 5.4 kg in 1985, then it began to rise to about 5.7 kg in 1986.

Soy sauce: Japanese annual per capita consumption was about 12 liters in 1965. It fell to 11 liters in 1967, rose to 13 liters in 1973, then fell to 9.8 liters in 1985, after which it rose for 1 year. Address: 1-2. Prof. of Food Science and Human Nutrition; 3. Assoc. Prof. of Economics. All: Iowa State Univ. Phone: 515-294-0160.

3637. Chait, Mat. 1992. Early recollections and work with the Ricycle and soyfoods in Boston, 1970-1972 (Interview). *SoyaScan Notes*. May 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the late 1960s Mat had started graduate school in counseling psychology at Hunter College in Manhattan, New York. But under the influence of yoga, Swami Satchitananda, Hinduism, vegetarianism, and macrobiotics, he decided to drop out and to study macrobiotics in Boston with Michio Kushi. He arrived in Boston in about December 1969. Nine months later, Mat started operating the Ricycle at Boston University in September 1970 at Boston University. He recalls: "The design of the Ricycle was absurd. It consisted of a steam table (which without its food weighed 600-700 pounds) welded onto the back of a girls bicycle. To move the Ricycle, he pedaled it (rain or shine; or pushed it up even gradual hills), but it was so heavy and clumsy as to be almost immobile." At night it was kept in the garage of the macrobiotic study house at 6 Ellery Street.

During the first 6 months, Barbara Grace prepared most of the desserts and whole grain breads at the kitchen of a big study house across from the Brookline High School. Marion (who had an Italian last name) prepared the vegetable and grain dishes in another study house. (Note: Marion married Frank Calpeno, who owned Ceres Natural Foods, a fairly big macrobiotic food distribution business in Colorado Springs, Colorado; they moved to Colorado in the early 1970s). Dora Coates (whose parents started Laurelbrook Foods) also cooked for Mat for a while. The business took off quickly, with the help of many magazine and newspaper articles. Mat got a loan, so in early 1971, in

the dead of winter when it was too cold to be out on the street, Mat built a kitchen inside the Erewhon warehouse, and it began operation at the end of March 1971. Since Paul Hawken was in California at the time, Mat got permission from the acting president of Erewhon.

Every day the Ricycles would offer a grain dish, whole grain bread, a vegetable dish, a dessert, and often a soup—but there was a different menu every day. A number of popular dishes contained soy as an ingredient. A miso-tahini spread was usually available with the bread. Miso soup and Miso Rice were often served. For Miso Rice, miso was mixed with a little water then stirred into a pressure cooker of hot rice that had just been cooked, and allowed to stand for a few minutes. Mat vividly recalls that on days when he had to stand in front of Boston University in the freezing cold for 6 hours without moving, the miso soup would keep him warm. After Mat opened the kitchen at Erewhon, he contracted with David Kalan of Crane's Call Bakery, a macrobiotic bakery, to make most of the desserts and other baked goods for the Ricycle. Sometimes the vegetable dish of the day had tofu in it, or the grain dish had miso in it.

While building the kitchen inside Erewhon, Mat constructed two more Ricycle carts. Mat launched these in the spring of 1971; one served its macrobiotic lunches on weekdays at MIT in Cambridge, and the other in downtown Boston at government center. He was unable to get permit to operate at Harvard Square. The other 2 Ricycles were operated by people that Mat employed; they were paid a percentage of their sales.

One year at the Christmas reunion, Mat did an elaborate impersonation of Michio Kushi (complete with makeup and a built-up nose construction), wrote, sang, and led the audience in a song about miso to the tune of "Get me to the church on time." The words went: "I'm drinking miso in the morning. Hatcho or mugi is sublime. Aveline or my daughter, go heat up the water, and get my miso soup on time. If you use onion, sautee it first, if you use daikon, it satisfies your thirst. For I'm drinking miso in the morning..."

Mat left Boston in about December 1972 to take an acting job in New York. At the time he sold and shipped all 3 Ricycles to an eccentric millionaire's son in Texas. He does not have any recollection of Tan Pups being on the market but he does remember seitan imported by Erewhon from Japan, perhaps by Japan Foods, in the form of little dark salty chunks. Perhaps Robert Hargrove might know more about this. Perhaps Erewhon made the Tan Pups.

Concerning Paul Hawken's departure from Erewhon in late 1973, it has always been Mat's understanding that Aveline Kushi owned the company but that the Kushi's negotiated to pay him \$30,000 when he left.

Mat once visited Erewhon's little farm in Keene, New Hampshire. They made sauerkraut there on the top floor of a building; one would jump up and down on the cabbage in a

barrel to press it. Address: 8-23rd Ave., Apt. 302, Venice, California 90291. Phone: 213-465-0383 or 213-469-5408.

3638. Okada, Yuko. 1992. Re: Muso's soymilk factory in the USA. Importing organic soybeans to Japan. Letter (fax) to William Shurtleff at Soyfoods Center, May 21. 1 p. [Eng]
 • **Summary:** "Did you know that I have a soymilk factory in the U.S.? It has been operating for almost 7 years. It was the first soymilk company in the United States and is growing every year. The company is located in Michigan, where most of the organic soybeans are grown." Note: The author is probably referring to Muso's 15% ownership in American Soy Products, Inc., whose plant at Saline, Michigan, began commercial operation in Nov. 1986.

Muso is also importing organic soybeans into Japan, and has already imported about 300 metric tons this year. The use of organic soybeans in Japan is growing on the part of companies making shoyu, miso, tamari, tofu, etc. for Muso. Address: Muso Co., Ltd., Kosei Bldg. 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 06-942-0341.

3639. Bond, Hannah. 1992. Studying macrobiotics in Boston and founding South River Miso Co. in Conway, Massachusetts (Interview). *SoyaScan Notes*. May 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Hannah, whose maiden name is Bond, first went to Boston for a short time in the spring of 1969, then she returned for a short time in 1970. She lived in Boston from 1976 to 1980. She was one of the people in three couples who founded South River Miso Co. Originally the company was founded as Ohio Miso Co. by Thom Leonard. Thom sold it to Christian Elwell. Christian needed money to finish the shop and buy the equipment. So she and her former husband, Anpetu, loaned him some money. She left because there was a falling out between Christian and Gaella Elwell on the one hand, and the two other families on the other. One of the families was she and her husband at that time, Anpetu. He was a Russian Jew but he had lived for a while with native Americans (the Lakota Sioux) and they had given him the Lakota name Anpetu. The other couple, whose name she does not recall, left first, for other reasons. She and her husband were hoping to turn the land into a land trust, whereas Christian and Gaella favored private land ownership. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2001.

3640. Lindner, Anders. 1992. Soyfoods at Natural Products Expo West. *SoyaFoods (ASA, Europe)* 3(2):6-7. Spring.

• **Summary:** "The 12th annual Natural Products Expo West took place at the Anaheim Convention Center, from 10 to 13 April 1992. Some 900 exhibitors and 40 seminars with expert speakers attracted 12,000 visitors... Some 35 companies exhibited soya foods in Anaheim."

Interesting new products include: Edamame (frozen green soybean in the pod) from Miyako Oriental Foods. Fromage de Soy (cheese alternative in 6 flavors) from Nutrition Specialties International Ltd. (headed by Mr. Patrick E. Cochran; profits go to the International Nutrition Research Foundation Inc., a Seventh-day Adventist organization promoting a rational, healthy, dietary and life-style), Shedd's Willow Run soya margarine from Van den Bergh Foods (Mic-Ellen Associates Ltd.). The Vitasoy–Nasoya Group had a large stand at the show headed by Yvonne Lo and John Paino. White Wave Soyfoods Inc. and the SoyFoods Association of America sponsored a lecture titled "Vegetarianism and Soyfoods" by Michael Klaper, M.D. The Association represents about 30 companies within the soyfoods industry. Address: Director, Lactasoy Agency, Helsingborg, Sweden.

3641. **Product Name:** [Sweet White Miso].

Foreign Name: Shiro Miso.

Manufacturer's Name: Soyalab.

Manufacturer's Address: Via B. Cellini 48N, 50020 Sambuca Val di Pesa (Firenze), Italy.

Date of Introduction: 1992. May.

Wt/Vol., Packaging, Price: 350 gm glass jar.

How Stored: Shelf stable.

New Product–Documentation: Letter from Stephen Jannetta of Lititz, Pennsylvania. 2000. Jan. 12. Stephen worked with Christian Elwell at South River Miso Co. in Conway, Massachusetts, for two seasons: (1) Oct. 1990 to May 1991, and (2) Sept. 1993 to May 1994. After the first season he traveled to Italy.

The first miso that he produced in Italy was for Soyalab (located near Florence) during a period between February and May of 1992. This was basically experimental. They made about 500 kg of shiro miso and about 1,500 kg of barley miso. The shiro miso was packaged [pasteurized, in 350 gm glass jars] and distributed under the Soyalab label in the spring of 1992. Both types of miso were made from organic soybeans and grains. The equipment was all improvised, and the miso was aged in small (about 55 gallon) wooden vats. The idea for the glass jars came from Europe—probably Germany.

Soyalab was purchased by La Fonte della Vita (located near Cuneo, Italy) in 1994 and Stephen went there in October of that year after his second season at South River Miso Co. In about April 1995 "the 1,500 kg of barley miso that was produced at Soyalab in 1992 was packaged and distributed, I believe, under the Soyalab label."

3642. *Whole Foods*. 1992. Source book 1992. 15(5):33-294. May. Illust. Index. 28 cm.

• **Summary:** Contents: How to use this book (p. 8).

Wholesalers/distributors alphabetical listing. Wholesalers/

distributors geographical listing. Brokers. Publishers. Associations. Consultants/service companies.

Product directories: A listing of manufacturers/importers/growers by products: Foods (p. 77-111—soy-related categories include: Beans/bean products, cheese substitutes, coffee substitutes, cultures, miso, soy products, soy sauce, soymilk, tamari, tempeh, tofu, tofu entrees), vitamins and supplements, herbs, cosmetics/personal care, miscellaneous products. Brand names. Product index. Manufacturers/importers/growers alphabetical listing.

Note: The listings related to soy products are full of errors. Address: South Plainfield, New Jersey.

3643. Gerner, Bob. 1992. Recollections of Mithra Grossman, Intermountain Trading, and Family Orchards (Interview). *SoyaScan Notes*. June 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company, started in about 1975 by Mithra Grossman, began as Intermountain Trading Co. at 2546 Tenth St., Berkeley, California 94710. Located very near Westbrae, Mithra was a consolidator—and had a beautiful blond Swedish wife. He would collect a variety of natural foods made on the West Coast of the U.S. by companies such as Heinke, Westbrae, etc., then put them on rail cars and ship them to the East Coast. Also starting in about 1975 he began buying miso from Westbrae that the latter was importing from Japan. At one point Westbrae was selling 25-50% of their imported miso to Mithra Grossman, who shipped it all over the USA to other wholesalers. Westbrae did not have enough business to import that much. Gradually he became a distributor, then he started developing and marketing a line of mixed packaged nuts, etc. to which he gave the name Family Orchards. The fruit and nut mixes in the Family Orchards snack line contained two types of soyfoods: Soynuts, and tamari-roasted peanuts. (For details see the company's Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 60-61). Grossman bought most of the raw materials for his Family Orchards line from Westbrae. In about 1979-1980 his company went out of business; he blamed Westbrae for its failure and bore strong resentment toward them. The price structure under which Westbrae had sold its products to Grossman was no longer profitable for Westbrae, who decided to raise prices. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

3644. McGlasson, Linda. 1992. Soyfoods in the next century: Feeding the world one bean at a time. *Health Foods Business* 38(6):30-34, 36. June. [1 ref]

• **Summary:** A table gives estimated retail sales of soyfoods in the USA in 1990, in descending order of sales (million dollars): soy sauce \$395.5, tofu \$94.1, second generation products (such as dips, dressings, entrees, non-dairy

desserts, cheeses, yogurts, and imitation meat products) \$81.6, soy milk (not including infant formulas made with isolated soy proteins) \$60.0, miso \$44.5, soy nuts \$9.7, tempeh \$7.5. Total \$657 million. Source: Soyatech in Bar Harbor, Maine. The two fastest growing segments are soy milk (increasing at 20% a year) and second generation products (15-20% a year). "Soyfood sales are expected to grow steadily through the next decade as health and environmental concerns become increasingly important factors in food purchasing decisions... an estimated 33 to 50% of all adults are reducing their intake of meat, yet they still have the craving.

Protein Technologies International of St. Louis, Missouri, is developing a line of structured proteins, which are look-alike meat components. There are versions that look and feel like ground beef, crab meat, and chicken.

Angelo Morini, founder of Galaxy Foods, began trying substitutes for the real cheese he was using in his pizza business. He left the pizza business in 1968 and began making soy cheese full-time. The company began slowly by selling to food service customers, then they started marketing the cheese nationally in 1984. In 1985 Galaxy started in the health food industry with a new line, Soyco. Following a fire, the company has relocated in a new 55,000 square foot state-of-the-art manufacturing facility in Orlando, Florida. They are now producing soy cheese products and are scheduled to launch 30 new items this year.

One sidebar, titled "Quickie Dictionary of Soyfoods," defines tofu, miso, tempeh, soy milk, and shoyu. Another says "Soyfoods Take Spotlight in New Infomercial." The infomercial is based on Dr. Michael Klaper's education seminars for doctors and other health professionals titled "Let Food Be Your Medicine." Klaper (a noted physician, author, environmentalist and nutritionist [and vegan]) is co-founder and director of the Institute for the Advancement of Nutrition Education and Research. The tentative title for the new infomercial is "The Nutrition for the 90s, a Transition to Health." It will begin airing in July on cable TV. Radio's Top 40's Countdown host Casey Kasem will emcee the show with Dr. Klaper. The show will feature top scientists and doctors, plus testimonial interviews with many celebrities and famous athletes. Address: Managing editor.

3645. Santiago, Librado A.; Hiramatsu, M.; Mori, A. 1992. Japanese soybean paste miso scavenges free radicals and inhibits lipid peroxidation. *J. of Nutritional Science and Vitaminology (Tokyo)* 38(3):297-304. June. [20 ref]

• **Summary:** The antioxidative and free radical scavenging activity of miso was demonstrated by electron spin resonance spectrometry. Miso may act as an antioxidant by scavenging free radicals.

This article was summarized in *Cereal Foods World* (Jan. 1993, p. 33-34) under the title "Move over vitamin E;

Here comes miso." Address: 1&3. Dep. of Neurochemistry, Inst. for Neurobiology, Okayama Univ. Medical School, 2-5-1 Shikata-cho, Okayama 700; 2. Yamagata Technopolis Foundation, Yamagata 900. All: Japan.

3646. Belleme, John. 1992. Santa Fe Organics and seitan (Interview). *SoyaScan Notes*. July 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Santa Fe Organics is owned by 3 people: James MacCreight (of Santa Fe, New Mexico) and John each own 45%, and Sandy Pukel (owner of Oak Feed Store in Florida) owns 10%. James got involved because he knew of John's work at American Miso Co., and he was a friend of Barry Evans. Barry was the majority owner of that company but he was sent to jail in early 1992 in California with a 7-year sentence, of which he must serve at least one-third. John got bought out of American Miso Co. in 1986 for two reasons: He had conflicts with Barry, and there were indications that Barry was making his money illegally. He wanted to get out "before the whole thing came down on our heads. My equity in the company might have been confiscated by the federal government." Before Barry went to jail, he made a deal such that his two companies (American Miso Co. and Great Eastern Sun) were not affected. After John left American Miso, he and Sandy Pukel formed a partnership with Blake Rankin and established Granum East. They ran that for 2½ years then sold it to Great Eastern Sun in 1988. From that time until 1990 he and his wife, Jan Belleme, did a lot of writing.

James MacCreight, a former Hippie, had made money investing in real estate in Philadelphia, Pennsylvania, where he also founded and owned George's Restaurant (a lovely place named after George Ohsawa). One day in late 1990 he called John and said "I'd like to do something with you. What would you like to do?" They spent a lot of money starting a miso shop adjoining John's home in Saluda, North Carolina, but then John decided it would not be grand enough to meet James' expectations. So they dropped the miso project after 6 months before the equipment even went in. James heard about Seitan Mama's, and they decided to make seitan instead. John had been interested in seitan since 1974, and in Feb. 1978 his wife, Jan, had started an early and very successful seitan company in Coconut Grove, Florida named Seitan Mama's, which see. In early 1991 a huge building became available at an excellent price 10 miles from John's home in Saluda at 906 Locust St. in Columbus, North Carolina. Their first line of 4 retorted seitan products in glass jars was introduced in June 1991. Originally they had planned to be a wholesale company, selling pallets via commercial trucking lines or UPS directly to larger stores (mostly on the East Coast) with a broker; it was hoped that this approach would keep the retail price down. Now they sell only through distributors.

Santa Fe Organics produces its seitan using a huge Japanese-made gluten-making machine (ordered through Mitoku) and an automatic cutter. The company has 3 production workers. To the machine they add flour, water, and salt (or nigari). The salt helps develop a little more gluten, and gives a tighter product with a higher yield. John's machine will process 150 kg (330 lb) of flour per run (which takes 2½ hours). Paddles in the machine knead the flour with water for about 30 minutes to develop the gluten, then the loaf sits undisturbed under water for about an hour, then the dough is rinsed by kneading it under water for about 1 hour; 100 kg of flour yield about 45 kg of fresh gluten. John orders his wheat flour freshly milled once a week from a mill 50 miles away. Fresh milling is very important for good yield and taste. He uses organically grown hard winter wheat. John uses a mixture of whole wheat and unbleached white flours. The key to getting flavors to penetrate to the core of the seitan lies in retorting at 250°F under pressure (which causes the seitan to expand and become porous allowing flavor penetration) plus the proper mixture of flours. The more whole wheat flour used, the greater the flavor penetration and concentration—but the product is somewhat bready and less dense. The more unbleached white flour used, the greater the density, chewiness, and meatlike texture of the final product. The proportion of flours varies with each product.

John has no problem with starch disposal. The local government looked at the starch and its effects on the local sewage system carefully, and actually encourages Santa Fe Organics to dump it into the sewage system. Eventually John would like to find ways to use the starch, as in stews.

Sales of Santa Fe Organics seitan are large and growing—although the company is still not profitable. A new conflict has arisen in that one owner wants to own a larger percentage of the total shares.

Plans for the future: (1) A new line of 3 Seitan Sloppy Joe products, due out in August; (2) They may have a ravioli maker in Atlanta, Georgia, make Seitan Ravioli using they would ship to Atlanta. They will be sold frozen, 18-22 units in a 13 oz bag, like the Soyboy Ravioli from Northern Soy in Rochester, New York; (3) Sell frozen 6-8 oz chunks or slabs of seitan in bulk (12 lb in a plastic bucket) to restaurants and foodservice institutions, then help them to work out recipes. They hope to have Tree of Life or Cornucopia distribute the product; (4) John's wife, Jan, is now finishing writing a vegetarian cookbook for the Avery Publishing Group. It will contain a whole chapter on seitan. (5) John would like to write a book on miso.

Mitoku has sold two Japanese-made gluten-making machines to the Western world; one was sold to Lima Foods in Belgium. The retort process that both Jonathan and Santa Fe Organics use is a very technical process; one must be set up with a license and follow federal regulations. According to Chris Dawson, Lima imported this machine for Jonathan—

which made the seitan that Lima sold. The other machine went to the Erewhon warehouse, where it sat for years, until it was sold to the people who started Upcountry. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

3647. Okada, Yuko. 1992. Re: History of Muso Co. Ltd. (Muso Shokuhin) in Japan. Letter (fax) to William Shurtleff at Soyfoods Center, July 2. 2 p. [Eng]

• **Summary:** Muso was formed as an establishment in February 1966, and Yuko has worked for the company since that time. His current title is president of Muso Co., Ltd. for Export and Import division, a position he has held for the last 6 years. Yuko first went to the USA in April 1970. First he worked at the Erewhon retail store and at the Erewhon warehouse as production manager and import manager. After 2 years he began to manage a macrobiotic restaurant [the Seventh Inn] for 2½ years as executive vice president. After the restaurant had paid off all its debts, he returned to Erewhon as import manager, and was also in charge of determining the cost of all production.

Yuko thinks that Muso began to ship foods to Erewhon in 1968. [Note: Kotzsch. 1984, Dec. *East West Journal* p. 14-21 states that Muso began to export foods in 1969.] The main food items shipped during the first year were shoyu (made by Marushima Shoyu Co.), several types of miso (made by Kanemitsu Miso Co. and Ohta Hatcho Miso Co.), black soybeans, azuki beans, many types of sea vegetables and teas, buckwheat noodles, umeboshi pickles, and takuan (daikon pickles).

The following Westerners have worked for Muso over the years: Paul Hawken (March-Oct. 1969), James Docker (several months), Jim Ledbetter (several months), Evan Root (several months), Tyler Smith (6 months), Steve Earle (4 years). Only Americans have worked at Muso.

Muso moved to their present address in the Kosei Building on 1 Dec. 1986. The company still maintains a domestic distribution company at its former address at Otedori 2-5-1, Higashi-ku, Osaka. Address: Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 06-942-0343.

3648. Troy, John. 1992. Update on Wizard's Cauldron and work with miso (Interview). *SoyaScan Notes*. July 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John makes many lines of products that contain miso. "The Wizard" line, sold through Joel Dee of Edwards & Sons, contains three products: Hot Stuff, Stir Crazy (a stir-fry sauce), and Sweet & Sour Sauce. The Premier Japan line is also exclusive to Edwards and Sons. The Simply Delicious line consists of many salad dressings, such as Lemon Tahini, Ginger Plum (with umeboshi plums), Tofu Poppyseed, and Miso Sesame (the only miso product in this line). His favorite salad dressing (which is also his best-

seller) is the Miso Sesame; it is sweetened with rice syrup, and contains both clear shoyu and white miso. "It's really nice."

A fourth line, called "Troy's" is a line of sauces, such as a steak sauce and a poultry sauce. Three of these products contain miso: Miso Magic (a sauce for grains and vegetables), and Cracked Peppercorn Steak Sauce, and Honey Mesquite Barbecue Sauce. John's favorite sauce is his Thai Peanut Sauce. A fifth, called Harbor Lites, is a line of six seafood sauces—all of which contain either soy sauce or miso. The Garlic Grill contains miso. There is also a Ginger Soy in this line.

American Natural Foods (ANF), started in 1984, attracted many local investors who finally got control of the board of directors and encouraged John to do things that went against his beliefs; the company eventually lost about a million dollars, and John lost everything he had. It didn't go bankrupt; it's still alive but John "walked away from it." Its sole product is Miso Mustard, which is made by Morehouse Foods.

At the end of 1985 John was penniless, and had to draw unemployment to buy groceries. "But it was a real blessing in disguise." John started doing some consulting work. In 1986 he started a new company named "Wizard's Caldron," which was initially just a consulting company. John was able to buy the trademark for Hot Stuff away from ANF, then cut a deal with Joel Dee. In Oct. 1987 Edwards and Sons became the exclusive distributor of his Premier Japan line and his Wizard Baldour condiments and sauces, including Hot Stuff. He saved enough money to buy a little plant, then started real small, making food products again. The new company's first product line, the Simply Delicious salad dressings, was launched in 1989. The company has been growing and growing, until now it is a very healthy little company with one million dollars of annual sales. This is the first time John has owned his own plant; previously he always had to use co-packers. "I'm just having a wonderful time with it, but it was a hard lesson to learn." John buys his miso from Don DeBona of American Miso Co. He also uses a lot of clear shoyu, which he buys from San-J; they make it in Japan. He consulted for San-J, and when he visited their plant in 1986 he noticed some stuff dripping from a vat. They said it was clear shoyu which they said they used in sauces, dashi, etc. He brought back a 5-gallon pail to the USA, and eventually made it a featured ingredient in his line of salad dressings. Address: The Wizard's Caldron, 8411 Hwy. NC 86 N, Cedar Grove, North Carolina 27231. Phone: 919-732-5294.

3649. *SoyaScan Notes*. 1992. The remarkable food-related creativity that took place in Boston from the late 1960s until the late 1970s, especially within the macrobiotic community (Overview). July 13. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** A flowering of original food product development took place in Boston during this period. There were a number of reasons for this (1) The meeting of two food cultures, Japanese and American, together with new ideas related to diet and health, as embodied in the macrobiotic teachings of Michio and Aveline Kushi. Just as the meeting of two oceans currents leads to a region at the boundary of great biological activity and development, so does the meeting of two cultures. Young Americans were introduced to a host of new basic foods which they quickly began to use and process in new ways. These included miso, tofu, seitan, amazake, umeboshi salt plums, sea vegetables, rice syrup, rice cakes, azuki beans, mochi, and many more. To cite but four examples: (A) Seitan: Japanese had used seitan as a salty condiment or seasoning. By late 1972 Americans had transformed it into a succulent meat substitute. (B) Tofu: It had never occurred to Japanese to put tofu in a blender. By the mid-1970s Americans in Boston were combining it with a sweetener to make delectable dairyless tofu cheesecakes and cream pies, or to make low-fat, cholesterol-free salad dressings, dips, and spreads. (C) Amazake: Japanese serve this as a hot beverage like tea, most in teahouses; The only flavoring used is gingerroot. Americans transformed it into delectable ice creams (free of dairy products and sugar), or thick, sweet drinks resembling milk shakes sold refrigerated in plastic bottles. Americans also used amazake as an all-purpose natural sweetener in place of sugar, honey, or maple syrup. They also learned to make a rice milk resembling amazake using commercial purified enzymes instead of koji; at this point, the line separating amazake and rice syrup became somewhat blurred. (D) Rice Syrup: Japanese use *amé* or *mizumamé*, made from koji, as the basis for taffy-like candies or, in very limited ways, as a sweetener. Americans soon began to make rice syrup using commercial enzymes instead of koji and to use it as an all-purpose natural sweetener in place of sugar, honey, or maple syrup.

(2) The closely-knit, almost communal nature of the macrobiotic community in Boston, was one in which many people, mostly young people (including many women), were working closely together with a common vision. New ideas were shared more than guarded or patented. Joel Wollner notes that it was almost like the art community in Paris during the impressionist era of the late 1800s.

(3) The Erewhon retail store (opened in April 1966) provided a ready testing ground for new local products. Many got their start in one or more of these stores. The Erewhon Trading Co. (which started importing Japanese natural and macrobiotic foods in Aug. 1968), and which began wholesaling and distributing in the spring of 1969, greatly helped to expand the market for good products.

(4) The community was fortunate to have a number of exceptionally talented entrepreneurs in the food business, including Paul Hawken, Bruce Macdonald, Roger Hillyard,

Bill Tara, and many others. Many of these individuals later left the area to start their own food companies.

(5) It was during this period that the natural foods, macrobiotic foods, organic foods, and vegetarian movements (all closely related, and often based on similar philosophical, ethical, and spiritual values) began to grow in the United States, in part in reaction to the overly-processed, overly chemicalized, unhealthful foods produced by big food companies, and the highly-chemicalized food growing techniques used by American farmers—and in part because of the leadership and inspiration of the community in Boston.

3650. Bersky, Kamil. 1992. Re: Work with soyfoods, seitan, and amazake in Czechoslovakia. Letter to whom it may concern, July 30. 1 p. Typed, with signature.

• **Summary:** “We are now producing 5 varieties of seitan, 5 varieties of tempeh, amasake, tofu, and we can offer barley malt. Our plan is to start koji and miso production, open a macrobiotic center with a year-round program, a kindergarten, and a small restaurant with a shop.” Address: M.D., The Macrobiotic Centre of Czechoslovakia, Mlynska 659, 51 801 Dobruska, Czechoslovakia. Phone: 42 443 21578 (fax).

3651. Bloom, Leslie Beal. 1992. Super summer sauces. *Gourmet* 52(7):56. July. *

• **Summary:** Includes Recipes.

3652. GEM Cultures. 1992. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. Aug. [4 ref]

• **Summary:** This catalog celebrates the company’s 12th anniversary. Address: Fort Bragg, California. Phone: 707-964-2922.

3653. **Product Name:** Finger Lickin’ Miso [Ginger].

Manufacturer’s Name: Leo Risin’ Foods.

Manufacturer’s Address: 1525 Rhode Island, Lawrence, KS 66044.

Date of Introduction: 1992. August.

Ingredients: Ginger: Barley, organic soybeans, rice, water, ginger root, sea salt, garlic, kombu, sorghum cane juice, *Aspergillus oryzae* culture.

Wt/Vol., Packaging, Price: 8 oz. plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Letter and Labels sent by Clayton McHenry, founder and owner of Leo Risin’ Foods. 1994. Feb. 22. In August 1992 Clayton began to make Finger Lickin Miso (in only one flavor, ginger) for the Community Mercantile (a co-op grocery in Lawrence) and Clearly Nature’s Own (a natural food store in Kansas City, Missouri).

3654. **Product Name:** [Vitam Miso Paste {Apple, Ginger, Honey, Chili Pepper}].

Manufacturer’s Name: Vitam Hefe Produkt GmbH.

Manufacturer’s Address: Walter-von-Selve Str. 2, 31789 Hameln, Germany. Phone: (40) 5151/95-400.

Date of Introduction: 1992. August.

Ingredients: Honey: Honey, Miso from oats, sea salt, ginger, garlic.

Wt/Vol., Packaging, Price: 4.38 oz glass jar.

How Stored: Shelf stable.

New Product–Documentation: Leaflets and letter sent by Elke Heitmeyer of Scenario International (P.O. Box 24177, Los Angeles, California 90024-0177. Phone: 310-470-9166). These products are made in Germany by Vitam Hefe Produkt GmbH. The color leaflet shows the products packed in paperboard boxes, and states: “Organically grown oats, not soy, are fermented in a 3-4 months long process to form our delicious miso sauces... A delectable sandwich spread, flavor for rice, soups, tofu, dips, and sauces.

Leaflet titled “Story” by Scenario International. “Elke Heitmeyer, the founder of Scenario International, is originally from the Eastern parts of Germany.” She is a vegetarian. “The Organic Gourmet product line has been sold in German specialty health food stores, ‘Reformhaus,’ for years. The manufacturer is a member of the Neuform Assoc. of Natural Food Producers.”

Leaflet. “New. Organic Flavored Miso Pastes.” Gives a recipe for Chili Miso Tortillas.

Letter and products (with Labels) sent by Elke Heitmeyer in response to enquiry from William Shurtleff of Soyfoods Center. 1994. Jan. 11. The miso pastes were first sold in Germany under the brand name Vitam in August 1992. They were first sold in the U.S. under The Organic Gourmet brand in July 1993.

3655. Waxman, Howard. 1992. History of Essene, natural foods retailer and distributor (Interview). *SoyaScan Notes*. Sept. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Essene began in March 1969 as a macrobiotic natural foods retail store named Essene Macrobiotic Supply at 2031 Samson St. in Philadelphia, Pennsylvania. Primarily a juice and snack bar, it was founded by Denny Waxman, Charles Smith (Smitty), and Stanley Petrowski; Stanley left after several months. Howard was not involved with the company at that time. After about a year, the growing retail store moved to 320 South St. (at 3rd) in Philadelphia and changed its name to Essene Traditional Foods.

By Feb. 1971 a distribution company, also named Essene Traditional Foods, was started in the retail store—following the Erewhon model. An ad in *East West Journal* (Feb. 1971, p. 10) shows that “Essene,” at 320 South St., was a distributor and wholesaler of natural and traditional foods, including miso, tamari, sea vegetables, and organic

grains, vegetables, and beans. They made stone-ground wheat flour on the premises. The distribution company soon outgrew the store and by May 1972 had moved into a small warehouse at 58th & Grays Ave., Philadelphia PA 19143. Then it moved to a larger warehouse in Boyertown, about 1 hour drive outside Philadelphia. The distribution company went out of business in about 1976-78; it had been in business for about 5 years.

In 1981, when Bill Tara returned to the United States to become director of the Kushi Institute of Boston, Massachusetts, Denny Waxman, head of the Philadelphia East West Center, went to London to run the Community Health Foundation and the Kushi Institute. He stayed two years. Denny now lives in Portugal.

The retail store is still in business, owned by Howard. He moved to his present address about 3½ years ago, from 320 South Street, Philadelphia, PA 19147. Address: Owner, Essene Natural Foods, 719 S. 4th St., Philadelphia, Pennsylvania 19147. Phone: 215-922-1146.

3656. Malloy, Thomas. 1992. Imports of miso to the USA (Interview). *SoyaScan Notes*. Oct. 14. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** According to a person he contacted in the Minneapolis, Minnesota Dept. of Commerce (under Bureau of Census), the United States imported 2,054,153 lb of miso (listed as “soybeans, prepared or preserved, NESOI”) in FY (fiscal year) 1991, 1,432,701 lb in FY 1990, and 1,302,220 lb in FY 1989. Thomas does not know the meaning of the term NESOI. Address: Minnesota.

3657. Belleme, John; Belleme, Jan. 1992. *Culinary Treasures of Japan: The art of making and using traditional Japanese foods*. Garden City Park, New York: Avery Publishing Group Inc. xiv + 232 p. Illust. by Akiko Aoyagi. Index. 25 cm.

• **Summary:** Contents: Acknowledgments. Foreword. Preface. Map of Japan showing where 21 traditional foods sold by Mitoku are made. 1. Kuzu: The wonder root. 2. Mirin: Sweet rice wine. 3. Miso: A health secret to savor. 4. Mochi: The sweet rice treat. 5. Noodles: Traditional Japanese fare. 6. Rice malt: Heavenly sweet water. 7. Toasted sesame oil: Cooking oil supreme. 8. Shiitake: Miracle mushrooms. 9. Soy sauce: King of condiments. 10. Tea: A national institution. 11. Snow-dried tofu: Protein powerhouse. 12. Umeboshi: Venerable pickled plums. 13. Vegetables of the sea: Underwater harvest. 14. Brown rice vinegar: Japan’s liquid treasure. 15. Traditional vessels: Vats, crocks, and barrels. Glossary. Worldwide importers.

Concerning soy sauce, this book discusses Sendai Shoyu and Miso Co., Johsen, tamari, Mansan Brewing Co. founded by Oguri family in 1875, almost destroyed in Sept. 1959 by the fierce Ise-wan typhoon, “discovered” in 1982 by Akiyoshi Kazama of Mitoku. Now a macrobiotic staple.

For details on the uncondensed introduction to this book see Kushi (1992) “Introduction to *Culinary Treasures of Japan*.” Though very interesting, it contains a number of factual errors and statements that leave the wrong impression. Address: Saluda, North Carolina.

3658. **Product Name:** Sweet Barley Miso, and Mellow Barley Miso.

Manufacturer’s Name: Leo Risin’ Foods.

Manufacturer’s Address: 1525 Rhode Island, Lawrence, KS 66044.

Date of Introduction: 1992. October.

Ingredients: Incl. soybeans, barley, salt.

Wt/Vol., Packaging, Price: Sold in plastic bags inside of 8 oz and 16 oz plastic tubs.

How Stored: Refrigerated.

New Product–Documentation: Letter from Clayton McHenry, founder and owner of Leo Risin’ Foods. 1994. Feb. 22. In October 1992 Clayton began to make Sweet & Mellow Barley Miso for the Community Mercantile (a co-op grocery in Lawrence) and Clearly Nature’s Own (a natural food store in Kansas City, Missouri).

3659. McSweeney, Daniel. 1992. 10th Annual Whole Foods Consumer Survey: Getting to know your customers. A profile of an aging and affluent consumer emerges from the survey. *Whole Foods*. Aug. p. 32-34, 36, 38, 43-44.

• **Summary:** A table titled “Food purchases” (p. 43) shows the percentage of respondents who purchased a type of product at a natural foods during the past 12 months, in descending order of popularity (also shows percentages for 1991 and 1990): Tofu 52%. Soy milk 42%. Tamari 38%. Soy sauce 29%. Miso 28%. Tempeh 25%. Cheese substitute 19%. Sea vegetables 17%. Note: The sample size is not given.

3660. Louie, Elaine. 1992. 43 peaceful acres of Japan in Connecticut: A retreat that evokes home. *New York Times*. Nov. 12. p. C8.

• **Summary:** On weekends, Isao Aiba, his wife Lisa Sorce, and their two kids live Japanese style on 43 acres in Lime Rock, Connecticut, in the foothills of the Berkshires. And the family shares their retreat with 3-10 Japanese guests each weekend.

“Every two months, Ms. Sorce drives to Yaohan, a Japanese supermarket in Fort Lee, New Jersey, to stock up on raw fish, pickles, tiny dried fish and natto, a natto, a fermented [soy] bean favored in the north and east of Japan.”

At home in Connecticut, her breakfasts typically include miso soup.

3661. Griffis, Gil; Wiedermann, Lars. 1992. Marketing food-quality soybeans in Japan: A manual on how to profit

from the niche market in Japan for value-added soybeans. 5th ed. St. Louis, Missouri: United Soybean Board. 25 p. Nov. 28 cm.

• **Summary:** Contents: Introduction. Japan: Desired soybean characteristics, tofu (procedure for making tofu, desired soybean characteristics, color of hilum, seed size {the larger the better, preferably more than 20 grams/100 beans}, color of cotyledons, hull, composition, special notes, American interpretation), miso (same categories of information as tofu), natto (ditto; seed size: The smaller the better, with a maximum of 5.5 mm diameter. Round shape is preferred to oval in order to limit swelling during the soaking and boiling processes), food quality soybean varieties (name, maturity zone, release year, used to make what soyfoods), distribution channels, marketing channels, protocol, pricing, organically-grown soybeans.

Taiwan: Introduction, list of major buyers, users, and trade associations. Korea. Southeast Asia. United States.

Appendix I. Distribution systems for soybeans used for food in Japan: Tofu, natto, miso. Appendix II. Food soybean imports by country of origin, 1984-1991. USA is the largest supplier (845,000 tonnes in 1991), followed by China (279,000), then Canada (28,000). Total imports, which have stayed about constant during this period, were 1,152,000 tonnes in 1991.

Appendix III. Distribution by usage of soybeans used for food—1991, direct use only in tonnes (metric tons). Tofu: 607,000 tonnes total, of which 562,000 come from the USA and Canada, 25,000 from China, and 40,000 from Japan. Up 2% from 1989.

Miso: 171,000 tonnes total, of which 38,000 come from the USA and Canada, 121,000 from China, and 12,000 from Japan. Up 0.5% from 1989.

Natto: 147,000 tonnes total, of which 87,000 come from the USA and Canada, 50,000 from China, and 10,000 from Japan. Up 9% from 1989.

Other: 39,000 tonnes total, of which 20,000 come from the USA and Canada, none from China, and 19,000 from Japan. Total food use of 964,000 tons is up 2% from 1989. Source: Japanese trade newspapers and trade associations. These figures do not include a estimated 492,000 tonnes of soybeans used indirectly (in the form of defatted soybean meal) for soy sauce, 222,000 tonnes used for soy protein, and 20,000 tonnes for other indirect uses.

Appendix IV. Directory of direct importers of food-quality soybeans. Appendix V. Traders of food-quality soybeans. Appendix VI. Soy food organizations in Japan (tofu, miso, soymilk, packaged tofu, natto). Appendix VII. Helpful contacts.

Food quality soybean varieties (with maturity group / zone, and year released; table, p. 5): Chico (00, 1983), Grande (0, 1976), Proto (0, 1989), Minnatto (0, 1989), NattoKing (I, 1988), Disoy (I, 1967), Vinton (I, 1978), Vinton 81 (I, 1981), King Natto (I, 1985), Kato (I, 1989),

Magna (II, 1967), Prize (II, 1967), Marion (II, 1976), LS201 (II, 1989), Provar (II, 1969), Beeson (II, 1969), Kanrich (III, 1956), Kim (III, 1956), LS301 (III, 1989), Verde (III, 1967), IL2 (III, 1989; from Illinois), Hawk (III, ?), Emerald (IV, 1975), Vance (V, 1986), Camp (V, 1989), Hartz 936X (VI, 1981), Hartz 914 (VI, 1989), Hartz 922 (VI 1989), Merrimax (? , 1986).

Note: This report was originally published in Sept. 1989, mainly for use by the the American Soybean Association office in Tokyo. Address: 1. Division Director for Asia; 2. Country Director for Japan. Both: American Soybean Assoc.

3662. **Product Name:** Skinny Dippers (Spreads and Dips) [Spring Garden, Bretonne, Hawaiian, Aztec, Spicy Greek, or Chinese].

Manufacturer's Name: Redwood Company (The). Div. of JRJ Trading (Marketer-Distributor). Made in America.

Manufacturer's Address: P.O. Box 1298, London, N20 0YT, England. Phone: 81 / 368 2638.

Date of Introduction: 1992. November.

Ingredients: Incl. tempeh, soymilk, miso.

Wt/Vol., Packaging, Price: 120 gm pack retails for £1.20.

How Stored: Refrigerated.

New Product–Documentation: Spot in SoyaFoods. 1992. Autumn. p. 5. “Skinny Dippers spreads and dips.” Four flavors are based on tempeh: Spring Garden, Bretonne, Hawaiian, and Aztec. Two are based on soymilk: Spicy Greek, and Chinese. Other soya ingredients used, depending on the flavor, include soya bean sprouts and miso.

3663. Arocena, Javier. 1992. [Re: Recent developments at Zuaitzo]. Letter to William Shurtleff at Soyfoods Center, Dec. 14. 2 p. Typed, with signature on letterhead. [Spa; eng+]

• **Summary:** In June 1988 he moved his company to Plaza Santa Maria, 01001 Vitoria-Gasteiz. He knows of three other soyfoods manufacturers in Spain: Natur-Soy, Vegetalia, and La Sojeria, all near Barcelona.

“I was a pioneer in the production of tofu and seitan in Spain but for the last 12 years I have kept on doing the same thing, working only at the family level, making little but doing it well.

“Now we are living in the country at Villanueva Tobera, 09214 Condado de Treviño (Burgos), Spain... about 25 km from Vitoria-Gasteiz.

“As of today, our plans are not to increase our work with tofu and tempeh derivatives, but rather to develop new products, above all the full gamut of fermented soy products... such as miso, tamari, natto, and amazake.” But since he has difficulty understanding English, he would like to get Spanish-language publications. Address: Zuaitzo, Villanueva Tobera, 09214 Condado de Treviño (Burgos), Spain. Phone: 945/28 86 30.

3664. Soyfoods Assoc. of America. 1992. Soyfoods 2000: Merchandising soy products into the next century (Ad). *Natural Foods Merchandiser*. Dec. 16-page color special supplement, 8½ by 11 inches, inserted after p. 28.

• **Summary:** Contains full color ads by Morinaga Nutritional Foods, Inc. (Mori-Nu Tofu, Firm and Extra Firm), Lightlife Foods, Inc. (5 types of tempeh, Tempeh Burgers [Lemon Grill, American Grill, Barbecue Grill], Tofu Pups, Vegetarian Chili, Sloppy J, Foney Baloney, Fakin Bacon, Lean Links), Worthington Foods, Inc. (Natural Touch Okara Pattie, Garden Pattie, Dinner Entrée, Lentil Rice Loaf), Sovex Natural Foods, Inc. (Better Than Milk, Tofu Ice Cream [Vanilla or Strawberry], Good Shepherd Spelt, Millet-Rice Flakes, For Goodness Flakes!), Vitasoy (U.S.A.) Inc. (Light Vanilla, Original, and Cocoa soy drinks).

Contains black-and-white ads by White Wave, Inc. (Five Grain Tempeh, Meatless Tofu Steaks, Soya A Melt Soy Cheeses [Regular or Fat Free] and Singles, Lemon Broil Tempeh, Amaranth Tempeh, Teriyaki Burgers, Organic Tofu, Dairyless Non-Dairy Yogurts, Tempeh Burgers, Sea Veggie Tempeh, Meatless Healthy Franks, Snack'n Savory Tofu), Cemac Foods Corp. (Unbelievable brand Cheesecake; based on nonfat baker's cheese; contains no soy, no fat, no cholesterol), Solait International Ltd. (Solait Powdered Soy Beverage), Tofutti Brands, Inc. (Lite Lite Tofutti, Tofutti Cuties, Land of the Free [Non-dairy frozen desserts, free of fat and sugar, sweetened with fruit juice], Tofutti Egg Watchers, Better than Cream Cheese, Sour Supreme [Non-dairy sour cream], Premium Tofutti, Tofutti Soft Serve Mix), Sharon's Finest (TofuRella), American Natural Snacks (Soya Kaas), Great Eastern Sun (Miso Master brand misos), The Macrobiotic Wholesale Company, Turtle Island Foods, Inc. (Keep It Simple Stirfry-Diced Marinated Tempeh), Betsy's Tempeh (Tempeh), Quong Hop & Co. (The Soy Deli-9 Tofu Burgers, 3 Savory Baked Tofu, Pacific Tempeh, 3 Tempeh Burgers, 7 fresh water packed and vacuum packed tofu), MYCAL Group (natural dehulled soybean flakes).

Articles and sidebars include: "Welcome to the future: Soyfoods 2000." "Soyfoods Association names new executive director" (Virginia Messina, whose photo is shown). "Soyfoods Association mission statement." "The modern evolution of soyfoods," by Michael Whiteman-Jones and William Shurtleff (Shurtleff's photo is shown). "Unraveling the soyfoods merchandising mystery," by Michael Whiteman-Jones. "Research shows soyfoods may help prevent cancer," by Mark Messina, PhD (whose photo is shown). "Key reasons to buy soy: Environmental, nutritional, economic."

This attractive insert was coordinated by Franke Lampe and edited by Lisa Turner, both of NFM.

3665. Vaidya, Achutananda. 1992. Re: Pioneering and making tofu and other soyfoods in Nepal. Letter to William Shurtleff at Soyfoods Center, Dec. 26. 9 p.

• **Summary:** "I started making tofu in 1974. I did not have any connection with my uncle in starting my tofu company, however I did have a chance to see him make tofu at his residence in Kathmandu, and from that time I got the idea in my mind to make tofu myself. I learned the details of the process in Nepal from Mr. Akifumi Nakamura of Kobe, Japan, a member of the Japan Overseas Cooperation Volunteers (JOCV), who worked at the Central Food Research Laboratory in Kathmandu, which was also my office in 1974. I worked together with him as a counterpart for two years learning how to make tofu. During his stay there I learned wholeheartedly the process of making tofu. I learned from him that this food product called "Bhatmas-ko-paneer" in Nepali is known as "tofu" in Japan. Vita-Tofu is the brand-name of my tofu. This tofu is not packaged. It is sold in the form of rectangular cakes out of water-filled cans or bowls because most of the local vegetable shops do not have refrigerators. Even to this day sale of tofu is difficult during the hot summer months because of lack of refrigeration in food retail stores. At the start, for the first 4-5 years, I delivered my tofu from door to door because even at that time the people of Kathmandu did not know about tofu. They did not want to buy it because they did not know how to cook it.

"From July 1979 to March 1980 I was invited to Japan for 9 months training at the Akita Prefecture Brewing Laboratory. During that time I also learned in detail the processes for making soy sauce, miso, and soyamilk. During that period I also got a chance to read *The Book of Tofu*, *The Book of Miso*, *Miso Production*, and *The Book of Tempeh* all of which helped me very much. I still have all those books. In 1985 I was invited by the Rotarians of Akita-Aomori to return to Japan for 1 month (Jan/Feb. 1985) to receive further technical training in making tofu, miso, soy sauce, soyamilk, moyashi (sprouts), koji, fruit fermentations for wine, etc. Today I produce tofu, soy sauce, and miso in my small factory in Kathmandu. I currently have an electric wet grinder imported from Kyoto, Japan, in 1976. My other equipment (a basket pressing machine and tofu presses) were all made in Nepal by Nepalese mechanics."

Accompanying this letter are 27 color photos showing the following: Vita Tofu in Nepal. Making koji with his wife in Nepal. Studying and making tofu, miso, and shoyu in Japan in 1980 and 1985. His business card notes: "Food Technology in Brewing from Japan. Products & Suppliers: Tofu (Vita), Soyamilk (Vitabean milk), Soya Curd, Soya Sauce, & Miso."

His Curriculum Vitae notes that he was born on 28 Dec. 1947, resides at 9/374 Bhedasingh, Kathmandu, and is married. Address: Founder and owner, Nepal Soya

Industries, 9/374 Bhedashing, Jamaguthi, Kathmandu, Nepal.

3666. Gold Mine Natural Food Co. 1992. Macrobiotic, organic and Earthwise products for you and your home (Mail order catalog and price list). San Diego, California. 48 p.
Address: 1947 30th St., San Diego, California 92102-1105.
Phone: 1-800-475-3663.

3667. Troy, John. 1992. The Wizard behind innovative salad dressings: Photos, samples, and interviews available (News release). Cedar Grove, North Carolina. 1 p. Dec.

• **Summary:** Begins with a biography of Troy's boyhood years, with summers spent in western North Carolina on a rural farm with his maternal grandmother doing what he loved best—cooking with his grandmother on her wood stove.

“Troy's journey from kitchen to manufacturer has an unusual twist. Intensely interested in medicine and health, Troy worked as a surgical and research lab assistant in his late teens but his part-time stereo business made him more money in the 60's. The back-side of success was introspection. Troy searched his spiritual aspirations in the 70's. He became vegetarian and was introduced to healthy Asian foods like tofu, miso soybean condiment, and umeboshi plum vinegar. That's when he made the link between food and medicine.

“Troy's next business venture involved natural foods. The American Natural Food Company was born in 1983, where he developed a line of miso-based condiments under his ‘Wizard’ nickname. Natural food stores went into a slump and Troy lost everything, but kept Wizard Baldour his original trademark.

“‘Funny how things happen. Just as I was out of work, my wife, ex-wife and I were given a chance to buy a local restaurant, The Regulator Cafe,’ quips Troy.

“The restaurant became successful and was the perfect place for Troy to create and test new recipes. At the same time, he did formulation consulting for several other natural food manufacturers creating new sauces and condiments from organic and fresh ingredients. This gave him the financial means toward furthering his own comeback.

“Thus, in 1988 he started Simply Delicious, Inc. Now he works out of his own manufacturing facility using the natural ingredients he loves.”

This year alone more than one million bottles of Simply Delicious salad dressing have been sold in the USA alone.

A full color, 4-page brochure titled “Simply Delicious” accompanies this news release. It contains color photos of Chef John Troy and products in three different lines that he makes: (1) Simply Delicious, (2) Harbor Lites Sea Sauces, and (3) Troy's sauces. Address: The Wizard's Cauldron,

8411 Hwy. NC 86 N, Cedar Grove, North Carolina 27231.
Phone: 919-732-5294.

3668. Watanabe, Hiromitsu; Okamoto, T.; Takahashi, T.; Ogundigie, P.A.; Ito, A. 1992. The effects of sodium chloride, miso or ethanol on development of intestinal metaplasia after x-irradiation of the rat glandular stomach. *Cancer Science* 83(12):1267-72. Dec. *

• **Summary:** Rats fed miso eliminate radioactive materials from the body more rapidly than animals not receiving miso.

3669. **Product Name:** Dressings: Creamy Miso (Vegan), or Tamari Vinaigrette.

Manufacturer's Name: Martin Brothers Fresh Dressings.

Manufacturer's Address: P.O. Box 1686, Austin, Texas 78764. Phone: (512) 478-4434.

Date of Introduction: 1992-1994?

Ingredients: Incl. miso.

Wt/Vol., Packaging, Price: 12 oz bottle.

How Stored: Refrigerated.

New Product–Documentation: Spot in *Vegetarian Times*. 1998. March. p. 12. “Mixed dressings.” A 12-oz bottle retails for \$4.29. A color photo shows the labels. Talk with Brett Davis of Martin Brothers. 1998. March 10. These products were first introduced locally in about 1992-94. The company makes only salad dressings. For details, talk with Carl Martin, owner.

• **Summary:** In this case-control study, consumption of miso soup or miso was associated with increased risk of stomach cancer.

3672. **Product Name:** [Korean Soybean Miso].

Foreign Name: Doen Jang.

Manufacturer's Name: MSB Food Enterprises, Inc.

Manufacturer's Address: 430 Casanova St., Bronx, NY 10474. Phone: (212) 617-6700.

Date of Introduction: 1992.

How Stored: Refrigerated.

New Product–Documentation: Talk with Michael Lee, V.P. Gomé Tofu Inc. 1996. Nov. 14. His father, John Lee, a Korean-American, started MSB Food Enterprises in 1986 in

the Bronx to make different foods from soybeans using all natural processes. In 1992 they introduced *doen jang* (pronounced TEN-jang, Korean Soybean Jang, like miso). In December 1995 the company moved to a new address: 710 Longfellow Ave., Bronx, New York 10474. Phone: (718) 617-4105.

3674. Vegetalia. 1992. Recetario [Recipe book]. Castellcir (near Barcelona), Spain. 32 p. 21 cm. [Spa]

• **Summary:** The Introduction to this handsome color booklet (which contains many color photos), was written by Salvador Sala. It states: "Thanks to you, this year in 1992 we will celebrate the 6th year of Vegetalia's existence. It has not been easy to get to where we are now, but it has been very satisfying, especially for me. When, in April 1986, together with Carmen and Tomás, we decided to form Vegetalia, our dream was to facilitate the improvement of the quality of life, in the ecological way."

For each of the following foods there is an introduction, a nutritional analysis, then several recipes: Seitan, tempe (a color photo shows tempeh sold in perforated plastic bags, and immersed in a broth in jars), tofu (a color photo shows tofu sold in self-sealing bags and immersed in a liquid in jars), pickles, amasake [amazake], gomasio [gomashio], and Algas Klamath (a type of sea vegetable), and Vegetalin (made with whole wheat, olive oil, sea salt, natural leavening, and sesame). Page 32 notes that the company makes seitán, tempe, tempe estofado, tofu, tofu tres delicias, paté -de tofu y miso, etc. It also sells an large line of natural foods made by other companies, including: Soyçisse (a type of soy frankfurter). Tofume (smoked tofu). Biosoy (soymilk). Postre de Soja (Soymilk desserts, in hazel-nut/filbert, vanilla, chocolate, apricot, strawberry, and pear flavors). Soy yogurt (natural and low fat). And Vegetalia is working to help the Third World via CEPAN in Brazil.

Note: This is the earliest Spanish-language document seen that mentions amazake, which it calls "amasake." Address: Castellcir (near Barcellona), Spain. Phone: +34 3-866 61 61.

3675. Berk, Zeki. 1992. Technology of production of edible flours and protein products from soybeans. *FAO Agricultural Services Bulletin* No. 97. 178 p.

• **Summary:** Contents: Foreword. 1. The soybean: Background, production, marketing, agricultural characteristics, physical characteristics and morphology of the soybean, chemical composition (moisture, proteins, lipids, carbohydrates, minerals). 2. Utilization of soybeans: Utilization options for soybeans, whole bean utilization, the oil mill route (utilization of the oil fraction, utilization of the meal fraction). 3. Oil-mill operations: The expeller

(operation principles, advantages and disadvantages of the expeller process, equipment), the solvent extraction process (operation principles, receiving and storage of soybeans, preparation for extraction, solvent extraction, post-extraction operations). 4. Edible soybean flours and grits: Introduction, definitions, composition and quality parameters (definition and classification of edible soy flours and grits, composition, quality standards), full fat soy flour and grits (production processes, utilization), defatted soy flours and grits (production processes, utilization). 5. Soybean protein concentrates (SPC): Introduction, definition, composition, types, production processes (the aqueous alcohol wash process, the acid-wash process, heat denaturation/water extraction process), utilization (basic considerations, use in bakery products, meat products, other uses). 6. Isolated soybean protein (ISP): Introduction, definition, composition, types, production processes (conventional process, problems in conventional processing, alternative processes), utilization (meat products, seafood products, cereal products, dairy-type products, infant formulas, other uses). 7. Textured soy protein products: Introduction, spun-fibre based texturization, extrusion texturization, steam texturization, utilization (meat extenders, meat analogs, other applications). 8. Soymilk and related products: Introduction, composition and classification, production processes (the traditional process, the Soya Technology System (STS) Process, the INTSOY (Illinois) process, the Buhler Process for soy micro-powder), soymilk related products. 9. Tofu, tempeh, soysauce and miso: Introduction, soy sauce, miso, tempeh, tofu (Introduction, regular and silken tofu, kori-tofu, deep-fried tofu, fermented tofu). Appendixes: I. Standards and specifications. II. Organizations and government agencies. III. Manufacturers and suppliers of soybean processing plants and equipment. IV. Sample budget quotations for complete soy processing or soybean related food manufacturing plants. Address: Technion-Israel Inst. of Technology, Haifa, Israel.

3676. Buswell, Robert E., Jr. 1992. The Zen monastic experience: Buddhist practice in contemporary Korea. Princeton, New Jersey: Princeton University Press. xiii + 264 p. + [8] p. of plates. See p. 120-21. Illust. Index. 25 cm. [190+* ref]

• **Summary:** The section titled "Meals" (p. 120-25) notes that there are many similarities between the diet in the monasteries and that in the homes of the local agricultural peasants. "The major difference is that all meals served in the monasteries are vegetarian [actually vegan]. The bodhisattva precepts of the Mahayana branch of Buddhism forbid monks from eating the flesh of any sentient being." Cereal grains provide 70-80% of the caloric intake. "In addition to steamed rice, meals always include some kind of soup (*kuk*)... The soup is generally based on tojenjang, a

fermented bean paste like Japanese miso and flavored with soy sauce (*kanjang*) and sesame salt.”

“Bean products constitute one of the largest components of the monastic diet during all seasons. The basis of many bean products is *meju*, a fermented bean paste somewhat like the Japanese *nattô* [more like the Japanese *miso-dama*, or soybean koji]. *Meju* is used as a major ingredient in producing soy sauce, red-pepper paste, and *toenjang*. Cooked black [soy] beans, seasoned with soy sauce, sugar, and white sesame, are served at least once a day. Tofu (*tubu*), or bean curd, frequently appears on this menu, but this is always purchased from a professional maker, who delivers it to the monastery on the back of his motorcycle. When the tofu is especially fresh, it is served steamed in whole blocks, to be dipped into a sauce made of soya, sesame oil, and red-pepper sauce.”

Note: The author was privileged to spend five years as a Buddhist monk in Korean monasteries between 1974 and 1979, primarily at Songgwang-sa. He made two additional trips to Songgwang-sa in Nov. 1987 and July 1988. The monastery is in Suncheon near the southern coast of Korea.

3677. Cardenas, Danilo C.; Legaspi, Benjamin M. 1992. The status of soybean production and utilization in the Philippines. In: *Increasing Soybean Production in Asia: Proceedings of a Workshop*. Bogor, Indonesia: CGPRT Centre. 187 p. See p. 119-35. Held 21-24 Aug. 1990 at Phitsanulok, Thailand. [8 ref]

• **Summary:** Contents: Introduction. Production situation: Production trends, economics of soybean production, price trends, marketing of soybean. Philippine foreign trade situation: Soybean imports, soybean exports. Soybean utilization. Government policies/programs affecting the industry: Policies, programs. Major problems besetting the local soybean industry. Conclusions.

The soybean, also known locally as “utao,” has become an increasingly important economic crop in the Philippines. Yet in 1987 (the latest year for which figures are given) only 5,698 tonnes (metric tons) were harvested from 6,490 hectares, having a value of 45,169,000 pesos. This represented only 0.02% of the total Philippine quantity of agricultural production, and only 0.05% of total farm area and value. Philippine soybean production peaked at 11,466 tonnes in 1982. Most of the country’s soybeans are grown in the southern Mindanao region (72.1%), followed by northern Mindanao (10.0%) and central Mindanao (9.4%). Imports of soybeans and products have steadily increased since Philippine farmers do not produce enough soybeans to meet local demands; the value (FOB US\$) rising from \$61,989,000 in 1980 to \$127,981,000 in 1988. The main imports are soybean meal (accounting for 86.87% of total import value), refined soybean oil (5.19%), soybeans (4.18%), and crude soybean oil (223%). Before March 1986 the National Food Authority (NFA) had the sole authority to

import soybeans, but with the introduction of the trade liberalization program, importation has reverted to private firms. In 1989 the country’s major sources of imported soybeans were China (which supplied 42% of total imports), Brazil (34%), and the USA (15%). Exports, which are negligible, have grown from \$136,000 to 1,123,000 during the same period. The main exports are soy sauce (accounting for 91.03% of total value), salted and fermented soybeans (*tausi*, 3.34%), and soybeans (2.65%).

Table 7 lists and describes “Soybean-based food products popularly used in the Philippines.” Fermented products include soy sauce, salted and fermented soybean (*tausi*), tempe (tempeh), soybean paste (miso), and soybean curd (fermented tofu cubes; a soft cheese-type product with a salty but mild flavor, eaten as a relish or cooked with meat and vegetables). Non-fermented products include soybean sprouts (*toge*), soybean cheese (*tokwa* [tofu]), Geerlings cheese (taho, soymilk curds; a sweet dessert or snack food for children), soybean milk, and roasted soybean (soy coffee).

“In terms of food usage, Filipinos, unlike other Asians, have not developed a taste for soya-based products... Most of the soy products available in the market are either made at home or in family-operated shops.

“It is interesting to note from the report of Co (1987) that small scale food processors engaged in manufacture of taho and tokwa preferred locally grown beans to imported ones. They claimed that local soybeans have a distinctive ‘fresh’ quality which imparts a finer and smoother texture to their finished products providing a longer shelf life than that produced from imported beans.

“Recently, several developments in the local economy have signaled a revival of interest in the use of soybean as food. In 1980 Nestle Philippines Incorporated began commercial production of powdered soymilk products and later a baby soya-cereal food formulation and a soya-based meat extender which is produced primarily for export to other Asian countries. Today Nestle Philippines, in co-operation with the Land Bank of the Philippines, the Regional Offices of the Department of Agriculture and PCARRD is encouraging local production of soybean and had adopted a no importation policy.

“Some years ago, the use of TVP also gained a permanent foothold in the local processing industry. It is used in the manufacture of ground meat products and as a meat extender. Almost all TVP used in the country is imported except for the locally manufactured full-fat TVP which is being produced by the Vitarich Corporation, one of the biggest feed millers in the country. The company has built a full-fat soya processing plant capable of utilizing 900 MT [metric tons] of soybean per month. Unfortunately, all its raw soybean requirements are imported from the U.S. and China.

“Soybean flour, protein concentrate and protein isolates are the newest soya-based products and are now used extensively in the country for the formulation of meat emulsion products. All raw materials are imported and there is no local manufacturing capability at present.”

“Programmes: As early as the 1970s, the government tried to involve itself to some degree in boosting national soybean output, despite the low priority it accorded to soybean in general. It was an involvement borne out of an urgent need to meet the growing requirements of the local feed milling and livestock industry, rather than of a need to address the high incidence of malnutrition among Filipinos. Accordingly, the government launched a number of programmes to improve soybean production, most of which failed to achieve their goals. At present, only the PCARRD-coordinated Soybean Pilot Production Programme continues to function. This programme was initiated in late 1983.”
Address: 1. Supervising Science Research Specialist, Philippine Council for Agriculture, Forestry, and Natural Resources Research and Development (PCARRD); 2. Dep. of Agriculture Bureau of Plant Industry, Los Baños National Crop Research and Development Centre. Both: The Philippines.

3678. Chainuvat, Chavalut. 1992. Soybean production and utilization in Thailand. In: *Increasing Soybean Production in Asia: Proceedings of a Workshop*. Bogor, Indonesia: CGPRT Centre. 187 p. See p. 1-15. Held 21-24 Aug. 1990 at Phitsanulok, Thailand. [6 ref]

• **Summary:** Contents: Introduction: Importance of agriculture, establishment of the Department of Agricultural Extension, DOAE's functions & responsibilities, soybean production, soybean production area, crop seasons, cultivation practices, harvesting, vegetable soybean. Soybean production and consumption campaign: Previous activities, 1990 activities, new creative work. Conclusion.

Thailand produces about 650,000 tons of soybeans each year. Of this, the first-grade seed is used for either home food industries (150,000 tons) or for next season's seed and other grain use. The remaining 500,000 tons are second grade seed, which are crushed to yield soy oil and soybean meal. The 20% of production used for food is used as follows: Fresh soybeans (*toa rae*) sold in open markets. Home industries: Soymilk, curd (tofu), soy sauce, fermented soybeans (*tao chiew*), soybean sprouts, starch or protein isolate for hot dogs or other sausages, and crisps (*Tao Nao*). Soy milk industries: Instant powdered milk mixed with dairy milk, fresh soymilk in packages, fresh soymilk in open market restaurants. “No soy grain [soybean seeds] is exported, except for a small amount of first-grade soybean to Singapore and Malaysia for making the above mentioned food.”

“Vegetable soybean: Vegetable soybean is becoming more popular in agri-business, as many frozen-product

companies are showing interest in this new crop. Seed is imported from Japan and Taiwan. Production yield has been impressive in several regions of the country such as Chiangmai, Chachoengsao, Petchburi, etc. Two companies which are close to the extension offices, are Chiangmai Frozen Food Co. and Okada Corporation Ltd.

“The Department of Agricultural Extension plays the role of middleman between private companies and the farmer. Extension officers also transfer new information to the local farmers. Additionally, a national plan on vegetable soybean has been submitted to the policymakers and a future plan includes the promotion of domestic consumption.”

“Previous activities: In 1972 the idea of a soybean campaign was first thought of by scientists in the Institute of Food Research and Product Development, Kasetsart University and the Department of Agricultural Extension. The major sponsor and co-creator, was the American Soybean Association. The co-institutes organized a grand dinner to open the campaign. Afterwards, the Department of Agricultural Extension encouraged Bangkok and provincial headquarters to organize exhibitions, field days and local broadcasting or publications on soybean production and processing. The home-economists from various provinces and organizations met for training and a seminar. The Food Institutes of Kasetsart University played a major role through publications, technology transfer, demonstrations and seminars.”

“Since the opening of the soybean campaign, we assume that about 50 percent of the total population has received information about soybean. At least 10 percent of the population has started or increased soybean consumption, both industrial and home made products. This evaluation was carried out by the working group using stratified random sampling with a well-designed questionnaire.

“From general observation, soybean has become more popular than in the past. Urban people are now aware of soybean products and do not object to consuming soybean in their regular diet. Rural people, however, have very definite ideas about food and it is difficult to change their traditional food habits. The main target of our campaign was therefore to introduce soybean products into the daily food pattern of rural villagers.” Address: Div. of Crops Promotion, Dep. of Agriculture Extension, Bangkok, Thailand.

3679. Lark, Susan M. 1992. *The menopause self help book: A woman's guide to feeling wonderful for the second half of her life*. Berkeley, California: Celestial Arts. 239 p. Illust. Index. 22 x 22 cm. [228* ref]

• **Summary:** This is a revised edition (but revised only in very small ways) of the 1990 edition, also published by Celestial Arts. The cover of both books is the same except that the words “Revised & Updated” appear near the top of

the cover in the 1992 edition—but not on the title page. The title page and the total number of pages in both editions are the same. Page 234, the index, and the following page about the author are all slightly expanded. The page facing the inside rear cover, advertising various books published by Celestial Arts, has been completely revised. The rear cover has a more recent portrait photo of the author. The text related to soy is identical and on the same pages.

Susan M. Lark, M.D., born in 1945, “is a noted authority on women’s health care and preventive medicine. Dr. Lark has been on the clinical faculty of Stanford University Medical School, Division of Family and Community Medicine, where she continues to teach. She has been the director of a number of clinical programs for women and worked with thousands of patients in her nearly twenty years of private practice... Dr. Lark is available for phone consultation at (415) 964-7268.” Address: M.D., 101 First St., Suite 441, Los Altos, California 94022. Phone: 415-964-7268.

3680. Leneman, Leah. 1992. *The tofu cookbook*. Hammersmith, London, England: Thorsons—An imprint of HarperCollins Publishers. 127 p. Illust. Index. 24 cm.

• **Summary:** “These no-meat, no-dairy, cruelty-free recipes foster health and a healthy environment by replacing meat and dairy products in traditional recipes with tofu... and soy milk. From bouillabaisse and guacamole to lasagna, curries, and ice cream, here are delicious new takes on your favorite international recipes.” The copyright page notes: “Many of these recipes previously appeared in *The International Tofu Cookery Book* and *Soya Foods Cookery*.”

Contents: Introduction. Types of tofu. Other soya (soy) foods: Soya milk, soya yogurt, soya mayonnaise, bean curd sticks or sheets, tempeh, soy sauce, miso, soya cheese (such as Veeze). Notes on recipes. Making tofu at home. 1. Soups and dips. Note: Ingredients for every recipe are given in both Imperial/Metric and American units. 2. Salads. 3. British- and American-style dishes. 4. Mexican-style dishes. 5. Mediterranean-style dishes. 6. Indian-style dishes. 7. Chinese- and other Far Eastern-style dishes. 8. Desserts. Recipe reference chart (for quick and easy recipes, recipes suitable for a single portion, and recipes for a dinner party).

Note: *Webster’s Dictionary* defines bouillabaisse (pronounced bu-yuh-BAYZ, a term derived from the French and first used in 1855) as a highly seasoned fish stew made with at least two kinds of fish. See also: Potpourri. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

3681. Margen, Sheldon. 1992. *The wellness encyclopedia of food and nutrition: How to buy, store, and prepare every variety of fresh food*. New York, NY: Rebus. 512 p. Illust. Index. 26 x 21 cm.

• **Summary:** Soy-related information appears on the following pages: Soybeans, illustrated and described (p.

60). Sprouts, including soybean and adzuki bean sprouts (p. 158-60). “Soybean sprouts contain small quantities of toxins that can be harmful, if eaten in large quantities” [uncooked, see p. 356]. Legumes (p. 348-58), incl. soybeans, “soy nuts,” soy milk. Legumes are “by far the best plant source of protein...” Per half 3½ ounces (½ cup cooked) soybeans contain more calories, fat, protein, iron, and calcium than any other of the 15 legumes listed (p. 351). How to avoid the gas problem. Tofu, miso, and tempeh (p. 357, sidebar). Non-dairy frozen desserts (made from tofu, p. 461). Soy cheese (p. 469). Soybean oil and margarine (p. 497-98).

Concerning vitamin K, see p. 16, 27, 30. The RDA for adults is 45-80 mcg. The body stores this fat-soluble vitamin for a relatively long time. Without this vitamin, blood would fail to clot. Preliminary studies suggest it also plays a role in maintaining strong bones in the elderly. Bacteria in the body’s intestines manufacture about 80% of the vitamin K we need, and the rest comes from the diet. Deficiencies are almost unknown, and they are usually caused by an inability to absorb the vitamin, rather than an inadequate intake. Sources: Cabbage, cauliflower, spinach and other leafy vegetables, cereals, soybean oil and other vegetable oils. Address: School of Public Health, Berkeley, California.

[Jap]* Address: Japan.

3683. Santos, D.T. 1992. Soybean cultivation in the Philippines. In: *Increasing Soybean Production in Asia: Proceedings of a Workshop*. Bogor, Indonesia: CGPRT Centre. 187 p. See p. 137-50. Held 21-24 Aug. 1990 at Phitsanulok, Thailand.

• **Summary:** Contents: Introduction. Development of the soybean industry: Nestlé Philippines’ soybean operations (Nestlé soya farm, commercial soy production, soy loan and buy-back scheme, soy sourcing beyond Tupi, growth requirements and adaptability of soybean, soybean cropping systems), crop research and development, extension programme. Appendix 1: Soybeans—maize monocropping (crop rotation). Appendix 2: Maize—soybeans—crop rotation (three consecutive maize followed by soybeans). Appendix 3: Maize—soybeans intercropping (6 rows corn -4 rows soybeans). Appendix 4: Wet season 1988—soybean researchers at Nestlé soya farm Tupi South Cotabato.

“Soybean, first cultivated in China during the eleventh century BC, was introduced into trading regions of the

Philippines in the fifteenth century AD. Its cultivation and use spread throughout the Philippines and then the western hemisphere in the nineteenth century. Soybean... is considered by scientists and economists to be a major food source for the future. Although currently produced in small quantities, both traditional and new soybean products such as soya cheese, soybean curd, and miso, and Nestlé's Twin, Vita, Soyex and Ceresoy, are popular with Filipinos.

"Development of the soybean industry: Soybean production in the Philippines has developed in response to an increasing demand. Varietal selection and development commenced in the early 1930s. In the 1970s, the Philippines Council for Agriculture and Resources Research and Development (PCARRD), in cooperation with the University of the Philippines at Los Baños and the Department of Agriculture, introduced the National Soybean Production Programme (NSPP) which promoted development of, and self sufficiency in, soybean... Under the programme, soybean planting was established throughout the country. A large soybean extraction plant with a 50 ton daily capacity was built by the Philippines Asia Food Industries Corporation in the early 1980s to produce the livestock industry's requirements of soybean oil and meal as well as soy-based food products.

"However, the combined impact of limited raw materials, the 1984 recession and some external political pressures led to the closure in 1986 of the factory and the NSPP. Individual initiatives among former participants allowed research and development activities to continue.

"PCARRD is currently engaged in a comprehensive nutrition-based programme covering soy production, post-harvesting processing, marketing, product utilization and development of improved varieties. This programme is funded by the International Research and Development Center of Canada."

"Nestlé Philippines' soybean operations: During the last ten years, Nestlé Philippines has developed new soy-based products with the assistance of Nestlé Switzerland. These include Vita Choco Drink, Twin, Ceresoy and Soyex.

"Nestlé Philippines, through Nestlé Soya Farm, continues to identify promising soy varieties and to generate the appropriate production and post-harvesting processing techniques to ensure its factory receives high quality raw materials.

"Nestlé soya farm: This six hectare soy research and demonstration farm in Tupi, South Cotabato has three main functions: production, crop research, and development and extension." Address: Nestlé Philippines, Inc., Agricultural Services Dep., 335 Gil Puyat Ave., Makati, Metro Manila, Philippines.

3684. Sass, Lorna J. 1992. *An ecological kitchen: Healthy meals for you and the planet*. New York, NY: William

Morrow and Company, Inc. xv + 492 p. Index. 26 cm. [35+* ref]

• **Summary:** This excellent vegetarian (actually vegan), ecological cookbook, proves that the most environmentally sound diet is also the healthiest and, for many, the most delicious and economical. It emphasizes whole grains, fruits and vegetables, focuses on unprocessed and minimally packaged foods, use of regional and seasonal foods, efficient menu planning, and creative recycling of leftovers. Delightful quotations relevant to the book's subject are scattered throughout.

The chapter titled "Tofu and tempeh" (p. 217-31) contains basic information and many recipes. Other soy-related recipes include: Thai vegetable soup (with tofu, p. 39). Ten-ingredient lo mien (with tofu, p. 165-66). Triple bean maybe it's chili (p. 186-87). Black soybeans (p. 191-92; keep the skins on by adding salt). Curried mustard green with tofu (p. 255). Chinese-style stir-fry of kale, onions, and marinated tofu (p. 258). Tahini-miso spread (p. 315). Sun-dried tomato dip (with tofu, p. 318). Brilliant beet dip (with tofu, p. 319). Onion upside-down cornbread (with tofu, p. 323-24). Tofu whip (like whipped cream or whip topping, p. 398).

The very fine chapter / glossary "Ingredients A to Z" (p. 399-468) includes: Aduki / azuki beans, agar, almond butter, almonds, amaranth, amasake (incl. koji), arame, barley malt syrup, black beans-fermented (salty black beans), Bragg liquid aminos (like soy sauce, but not fermented, making it an ideal seasoning for those who suffer from yeast sensitivities), daikon, dulse, gomashio, hijiki, job's tears, kombu, kuzu (kudzu), kuzu kiri, lupins, miso, mochi, natto, nigari, nori, peanut butter, peanuts, quinoa, rice-brown, rice cakes, rice syrup, sea vegetables, tamari-roasted seeds, seitan (wheat gluten), sesame butter (tahini), sesame oil, sesame seeds, shoyu, soybeans, soybeans-black, soy cheese, soy flakes, soy flour, soyfoods, soy grits, soy ice cream, soy milk, soynuts, soy oil, soy powder (powdered soy milk), soysage, soy sauce, soy yogurt (fermented), tahini, tamari soy sauce, tempeh, tofu, umeboshi plums, wakame, wasabi, winged beans. Note: Also contains recipes for many of these glossary items.

A color portrait photo on the inside rear dust jacket shows Lorna Sass—with a brief biography; she is a culinary historian, cookbook author, and food writer. Address: Box 704, New York City, NY 10024.

3685. Shinshu-Miso Research Institute. 1992. *Report of the Shinshu-Miso Research Institute* No. 33. p. 1-125. [Jap; eng]
Address: Nakagosho 469-6, Nagano-shi 380, Japan.

3686. Toomay, Mindy; Hadler, Susan Geiskopf. 1992. *The best 125 meatless pasta dishes*. Rocklin, California: Prima Publishing. xvi + 318 p. Illust. Index. 22 cm.

• **Summary:** This vegetarian pasta cookbook contains information about tofu, tempeh, and miso, plus 7 tofu recipes, 2 tempeh recipes, and 2 miso recipes. Agé (puffy deep-fried tofu) is used in: Soba in broth with fried vegetables and age. Soy sauce is used in various broth recipes.

3687. Toussaint-Samat, Maguelonne. 1992. *A history of food*. Translated from the French by Anthea Bell. Malden, Massachusetts, and Oxford, England: Blackwell Publishers Inc. xix + 801 p. Illust. Index. 23 cm. [200* ref]

• **Summary:** A fascinating book of vast scope. The author's principal interest is in the medieval and Renaissance culture of Europe, in particular the domestic economy, food, and clothing. Thus the focus of the book is on Europe (especially France) and the Middle East. It also emphasizes the symbolism of foods.

Chapter 2, "The history of gathering," contains a section titled "Soya: the most widely eaten plant in the world" (p. 51-56), which is long on myth and symbol, and short on historical accuracy. It briefly discusses the following: Soya milk, soya flour, miso, jiang, soya sauce, soya oil and meal, bean-sprouts, tofu, dried soya beans.

Interesting chapters include: The history of meat (p. 93+). The history of cereals (p. 125+). The history of oil (p. 205+). The history of bread and cakes (p. 223+). An essential food: The history of salt (p. 457+). Spice at any price (p. 480+, including The great trading companies). The lure of sugar (p. 552). The potato revolution (p. 711+). The assurance of dietetics (p. 755, including an excellent "Chronology of dietary progress" from 2 million B.C. to the present, with detailed information on food developments during the paleolithic, mesolithic, and neolithic periods of the Stone Age). Address: Historian, journalist, writer, France.

3688. **Product Name:** [Organic Barley Miso].

Foreign Name: Bio Miso Orge/Gerst.

Manufacturer's Name: Danival.

Manufacturer's Address: Moulin d'Andiran, 47170 Mezin, France. Phone: 58-651-002.

Date of Introduction: 1992-.

New Product-Documentation: Letter and catalog sent by Valérie Gevaert. 1997. March 25. Lima-Andiran was acquired in early 1990 by Pierre Gevaert's son (Daniel) and his wife (Valérie), and renamed Danival. The location of their factory in Mézin, France, has not changed.

3689. **Product Name:** Organic TofuBurgers [Original].

Manufacturer's Name: Stow Mills (Distributor).

Manufacturer's Address: Chesterfield, NH 03443-0301.

Date of Introduction: 1992?

Ingredients: Organic tofu (filtered water, organically grown soybeans, natural calcium chloride nigari—a natural

mineral coagulant, not a preservative), fresh carrots, rolled oats, sunflower seeds, sesame seeds, dried currants, barley malt syrup, red miso (water, rice, soybeans, salt), onion powder, garlic powder, spices, guar gum, natural orange extract, canola oil.

Wt/Vol., Packaging, Price: 6.5 oz (184 gm) vacuum pack. Retail for \$1.59 (7/92, Maryland).

How Stored: Refrigerated.

Nutrition: Per 3.25 oz patty: Calories 240, protein 14 gm, carbohydrate 19 gm, fat 12 gm, cholesterol 0 mg, sodium 85 mg, dietary fiber 12 gm.

New Product-Documentation: Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. Label is 4 by 5.5 inches. Self adhesive. Dark blue, red, and black on light blue and light green. Color photo of a Tofuburger with tomato slices, onion rings, and a lettuce leaf. "All natural. Wheat free. Low sodium. Meatless. Dairy free. No cholesterol. High calcium. High protein. Stow Mills Tofu Burgers are precooked for your convenience. Please do not overcook. To prepare, just grill, fry or microwave until heated."

3690. Takeya Miso Co., Ltd. 1992? Takeya-Miso: Soy bean paste (Brochure). Nagano, Japan. 4 p. Undated. 26 cm. [Eng]

• **Summary:** This attractive color brochure presents Takeya Miso Co. Ltd, "since 1872." Miso—"It comes from nature. It goes with everything. Nature's perfect food—healthy, tasty. Takeya miso!" Contains 6 recipes with photos. Address: 2-3-7, Kogandori, Suwa City, Nagano 392, Japan.

3691. Arifuku, Ichiro; Kakuichi, T.; Kobori, M.; Shinohara, K. 1993. Miso kasu chûshutsu-butsumo in vitro ni okeru seitai bôgyo tantô saibô ni taisuru sayô [Effect of extracts of miso dregs on several cultured biophylactic cell lines]. *Nippon Shokuhin Kogyo Gakkaishi (J. of Japanese Society for Food Science and Technology)* 40(1):69-74. Jan. 15. [10 ref. Jap; eng]

Address: 1. Food Industrial Research Inst., Tottori prefecture, Sakaiminato, Tottori 684; 2. Fujisawa Pharmaceutical Co. Ltd., 5-2-3 Tokodai, Tsukuba, Ibaraki 300-26; 3-4. National Food Research Inst., The Ministry of Agriculture, Forestry and Fisheries, 2-1-2 Kannondai, Tsukuba, Ibaraki 305. All: Japan.

3692. *Times (Milford, Nebraska)*. 1993. Soybean foods reduce cancer risk. Jan. 27.

• **Summary:** Doreen Blackmer, director of consumer information for the Nebraska Soybean Program, is excited about the potential significance of soybeans in fighting cancer. She explains that "you can substitute tofu for part of the cheese in your lasagna recipe. You can add a teaspoon of miso to your baked beans."

Dr. Mark Messina says that the first “golden age” of nutrition was from 1910 to 1940 with the discovery of all the vitamins and minerals essential to good health. He says we are now entering the second golden age when the value of “anti-nutrients” is being discovered. This is where soybeans come into the picture.

3693. Potter, Michael. 1993. Re: A brief chronology of Eden Foods. Letter to William Shurtleff at Soyfoods Center, Feb. 14—in reply to inquiry. 2 p.

• **Summary:** William Shurtleff sent Michael Potter a chronology of Eden Foods that he (Shurtleff) had compiled from various sources, and asked for Potter’s comments, which follow. This letter is a follow-up to a letter written by Potter to Shurtleff on 1 March 1992.

“Eden Foods, Inc. was first incorporated as a non-profit corporation in the winter of 1967/1968, I believe. It was later (Bill Bolduc told me, in a manner that was not consistent with state law) reincorporated (after Ron Teeguarden pulled out) as a regular corporation under the name Eden Organic Foods, Inc. This WAS done by Bill Bolduc in November of 1969.

“Mr. William Shurtleff, traditionally corporations do not define the date they were *founded* as the date they became ‘officially’ or legally ‘incorporated.’ Commonly, decades separate these two occurrences, sometimes centuries.

“These thoughts will loosely follow your 2-page ‘chronology of key events.’ Eden was buying and selling soyfoods, tamari and miso, for more than 2 years prior to Nov. 4, 1969.

“During the spring of 1970 I became a partner of Joyous Revival natural foods in Birmingham, Michigan. I developed a relationship with Bill Bolduc... [the Eden’s store’s manager], as we were both attempting the same things and respected the quality of the work each other was doing. Frequently Bill B. asked me to move to Ann Arbor.

“After a falling out with my partners in December 1970, I visited Bill and Judy [his wife] in January 1971 and was hired by Bill on the spot, at his home, in his kitchen. My first job was to help a failing new Eden retail outlet in downtown Detroit on the campus of Wayne State University. (I never lived in Detroit at the time. I lived in Walnut Lake 30 minutes north.) By late spring or early summer 1971, after closing this Eden store, my pregnant wife Carol and I moved to Ann Arbor where I assumed responsibility for the Eden Foods store at 211 South State St. It is of interest that Eden Foods’ name had already been legally changed back to just Eden Foods, Inc., when I moved to Ann Arbor.

“During the winter of 1971/1972 I was given what amounted to 13.5% of the common stock of Eden Foods, Inc. The share holdings then broke down: Bill Bolduc and Tim Redmond owned the same number of shares, but Judy

Bolduc owned a small number of shares so the Bolducs owned the largest block.

Mid-Summer, July 1973, Bill thought the company was going out of business and after I stepped into a near fist fight between Bill and Tim outside the warehouse we were sharing with Mid West Natural Foods; I told them ‘that if they’d just quit fighting and leave things alone, all would be well.’ Bill immediately offered to sell me all of his stock. I asked Bill how much he wanted for it. After a very brief pause he said “\$2,500.” I told him that I’d try to get the money. We parted. Bill left and Tim and I went back to work. The next day I visited a friend named Ray Suber and asked him to help me purchase the stock. He said he would and to come back the next day. I did and was given \$2,500 cash as a ‘contribution to the natural foods movement.’ With the \$2,500 I purchased all of Bill and Judy’s Eden Foods, Inc. stock. Neither Bill nor Judy ‘sold their stock back to the company.’ They sold it to me for cash. They were glad to get out because they were convinced the company couldn’t make it.”

From a talk on 31 Oct. 1993: There was a 51% Tim Redmond / 49% Michael Potter share holding configuration in Eden Foods, but it lasted for less than a year. When Michael bought all of the Bolduc’s stock, he owned the majority of Eden Foods’ stock. But he realized that Tim Redmond’s father might withdraw his \$10,000 if he knew Michael had majority ownership, and if that happened Eden would not be able to survive. So Michael immediately (as part of the transaction with the Bolducs) gave Tim enough of his stock so that Tim owned 51% and Michael owned 49%.

About 3 months later, Michael loaned about \$44,000 in cash to Eden Foods. This was money that Michael’s father had entrusted to him. But Michael became uncomfortable having no control over something for which he was responsible—both the company and his relationship with his father. Michael discussed his feeling with Tim, and Tim agreed to give Michael equal ownership in exchange for Michael converting his \$44,000 loan into an investment in Eden Foods. Now neither partner could make a major decision without the other’s agreement—a good situation for Eden Foods.

“In September 1973, at Royce Seeger’s home, I received the unanimous recommendation of an employee steering committee and became Bill Bolduc’s successor as president of the company. My first goal was to get us away from MidWest Natural Foods for moral and ethical reasons. I located a new facility in the process of being constructed and developed a relationship with the owner/builder, John Sheer. In the spring of 1974 we relocated to that 4601 Platt Road, Ann Arbor warehouse.

“During this period I was building and moving Eden’s retail store to 330 Maynard St. in Ann Arbor. The move actually took place in the summer of 1973. It included a

large store, a large fast food (chapati sandwiches, etc.) deli, and a natural foods bakery named Sun Bakery, that relocated itself from Kalamazoo, Michigan. These three operations were under one roof in a 6,000 square foot old printing plant at the University of Michigan's campus, leased by Eden Foods, Inc. This operation paid off all Eden's debt and paid for the new warehouse, computer, offices, trucks and equipment. The wholesale operation was carried by the retail until late 1974 after trucks were put out on regular routes throughout the Mid-west.

In October 1974 I made my first of eleven trips to the People's Republic of China (Eden made a total of 13 trips between Oct. 1974 and Nov. 1979) and stopped in Japan on the way back to visit Yuko Okada at the Muso Company. Prior to 1974 Eden Foods imported shipments from Mr. Kazama of the Mitoku Co. in Japan. After my visit to Muso, seeing their educational activities, their macrobiotic center activities, etc., I decided to import Japanese foods exclusively from Muso. Tim Redmond had cultivated the Mitoku connection and initiated our first Japanese imports.

"Spring 1979 Cliff Adler is hired by myself to do sales work for Eden in Chicago. During that summer he lends Eden Foods \$100,000, for which he is paid bank interest rates.

"After the Nov. 27, 1979 warehouse fire Cliff converted his \$100,000 to stock in February 1980 as Tim Redmond left, certain that Eden was finished. Tim's stock was redeemed with Eden giving him title to our operations at 330 Maynard St. In one transaction Tim was bought out by the company, Cliff and I became 34% shareholders, 10% was sold to Frank Dietrich of Natural Foods, Inc. (Toledo, Ohio) for \$100,000 and the following percentages of Eden Foods' common stock were given to Eden managers shortly after we laid off 35 people: Ronnie Roller 5%, Michael Gordon 4%, Mark Cook 4%, Kathy Knor 3%, Bill Swaney 3%, and Bob Duha 3%. This free stock was limited to book value and had to be sold to Eden Foods whenever the person left the company regardless of the reason for leaving. It could not be sold another way.

"In early 1984 when Mike Gordon left Eden his stock was awarded to Michael Potter as a bonus by the Board of Directors... to be continued." Address: Chairman, Eden Foods, Inc., 701 Tecumseh Rd., Clinton, Michigan 49236. Phone: 517-456-7424.

3694. Bates, Dorothy R.; Wingate, Colby. 1993. *Cooking with gluten and seitan*. Summertown, Tennessee: The Book Publishing Co. 128 p. March. Illust. by Barbara McNew and Thomas Johns. Index. 22 cm.

• **Summary:** This is vegan cookbook. Seitan is gluten cooked in a soy sauce broth. This book calls vital wheat gluten "instant gluten flour." It has already had the starch and bran removed and needs only to be mixed with

seasoning and liquid. Miso is used as a seasoning in several recipes, and "tamari" in many seitan seasoning sauces.

Contents: Introduction. A word on nutrition. Making gluten. Making seitan. Ingredients. Recipes (a nutritional analysis is given for each recipe): Appetizers, soups, salads, American, Asian, Continental, Mexican, Italian. Sources for ingredients. Address: Summertown, Tennessee.

3695. Pinault, Pascal. 1993. Re: Work with tofu and tofu products in Martinique. Update on soyfoods in the Caribbean. Letters to William Shurtleff at Soyfoods Center, April 2 and 27. 4 p. and 5 p. Handwritten, with signature. Plus list of his products and prices, resumé, and photos of his home, equipment, and Morne-Vert.

• **Summary:** Pascal saw and ate tofu for the first time in May 1980 when he was living in India, while visiting some friends in Poona (Maharashtra). He bought 1 pound of tofu at a tofu shop but he is not sure if they were making the tofu in a back room of the shop or at some other place. "I suppose this tofu manufacturing plant in Poona was an offshoot of the Rajneesh Ashram, which was very active at that time and place." Pascal lived in Goa, south of Bombay, from 1976-1980; there he baked bread leavened with palm wine. He learned most of what he knows about soyfoods while living and working, mostly in health food stores or health farms (see attached resume), in the Catskill Mountains area of New York from 1981 to 1987. There he learned to make tofu for his personal use (not for sale) by adding lemon juice to hot soymilk then pressing it in a cloth. During two other trips to India in 1982-83 and 1986 he found and bought chunks of a dry soy protein product resembling TVP which must be cooked in water. He found this soy protein product very interesting for a country like India which has such a shortage of protein, however the price was high—about 10 rupees/kg compared with 2½ rupees/kg for wheat.

In Jan. 1988 he and his family moved to Martinique. "I was compelled to make tofu for myself and my family because there was no other vegetable protein available in Martinique, except for this chunky TVP. I was still using lemon juice instead of nigari and making 2 pounds of tofu at a time. Then in 1991, as I started to import Japanese food products from France (umeboshi, seaweeds, amasaké, etc.), I ordered a small booklet on making tofu using nigari. Plus I had an excellent book (*Les Aliments Fermentés Traditionnels*, by Claude Aubert [1985]) in which I found recipes and nutritional details on many foods like tofu, okara, sufu, tempeh, amasaké, and, in general, all the foods subjected to lactic acid fermentation. In Martinique he has been making an average of 12 to 20 pounds of tofu every week since Oct. 1991 when he moved with his family to mountainous Morne Vert. Occasionally he makes larger amounts for a health food store that sells it or when he caters for groups. His main work is to introduce and popular

tofu and soyfoods in Martinique. He would like to expand his tofu and vegetarian “traiteur” (catering) business; his main problem is lack of funds, so he plans to apply for financial aid.

The water he uses to make his tofu comes straight from a spring a mile up in a beautiful mahogany forest. He also makes sprouts—mostly alfalfa, mung bean, and clover, but sometimes wheat grass. He uses most of the tofu he makes to produce second generation products such as tofu mayonnaise, hot squash pies with miso-tofu topping, tofu & cocoa (or carob) sweet pie, tofu salad, spring rolls (*Nems*).

“I know of two vegetarian restaurants in town (Fort-de-France) that make their own tofu and serve it to customers, but no one in Martinique uses tofu as extensively as I do, thanks to my 7 years’ stay in the Catskill Mountains. In fact, it takes a long time to get people used to tofu in an island where Creole culinary habits are still well-established.”

One of the restaurants that makes tofu is Le Second Souffle, owned by Mr. Gerard Sainte-Rose (27 Rue Blenac, 97200 Fort-de-France, Martinique, FWI 0033. Phone (596) 63-44-11). He has owned this vegetarian restaurant for quite a while now and is mostly interested in reviving the consumption of local fruits and vegetables. “Gerard is the only person in Martinique that I actually saw growing and harvesting soy beans. That was 2 years ago. He had grown soybeans on a piece of agricultural land in Ducos, a town near Le Lamentin, which is not far from the capital city of Fort-de-France (Martinique). He got the soybean seeds from a friend in St. Lucia (a Caribbean island just south of Martinique). Mr. Sainte-Rose harvested only a few soybeans; they were small but healthy looking. He is an organic gardener who sells his products out of his restaurant. He presently has a 6 hectare farm where he grows organic vegetables for his restaurant. Two years ago we had an agreement to set up a tofu plant together in his restaurant. He promised me a job (that’s when I gave him my recipes), and he even started to acquire some material for making tofu. But he never followed through. That’s when I started making tofu by myself, even without the proper material setting. He even bought some of my tofu. I think he would probably be interested in growing more soy, if approached very tactfully, and if he sees financial interest without having to pay a counterpart. He is an interesting person with a lot of good ideas,” but he tends to be hard to work with as a partner.

On St. Lucia one can find the “Soy Place” is Castries, the main town in St. Lucia. They make tofu there, sell it, and cook it for the food-counter [take-out] part of the shop. People grow soy beans on St. Lucia and on Dominica, maybe with help from Canadians. They make tofu and cook it. One “Ital” rastafarian restaurant in Roseau, Dominica, serves tofu pâté and deep-fried, plus “accras” (fried okara dumplings). “In Dominica I heard of two other places where they make and serve tofu. Ital food, which has absolutely

nothing to do with Italian food, is the name that the Rastafarians give to the main dish of their mostly vegetarian diet (except for fish). In this main dish, chunky textured vegetable protein is sometimes used in place of fish. “In the Caribbean, including Martinique, Ital food is available in quite a few Rastafarian places, which they call their ‘ghetto.’ These are restaurants open day and night that include reggae ‘sound systems. The chunky TVP remains the main vegetable protein they use; they also use it in other dishes such as vegetarian cous-cous, etc. They are, in my experience, a bit hostile to tofu, seitan, or other such new foods, at least in Martinique; maybe when it comes from a white person they presume it is not vegetarian.” He has heard of (but has not seen or tasted) smoked tofu dried over a fire using green banana leaves.

Pascal is interested in vegetarianism and macrobiotics. He likes tempeh and would like to start now to make and introduce it to Martinique, where it is totally unknown.

Concerning seitan: “I first started to make seitan in Martinique under the same circumstances as tofu—lack of vegetable proteins other than beans. Not having ready-made gluten, I first made it by washing white-flour wheat dough. That was a very long and messy process but was well worth it. Then I found wheat gluten in the Tama catalogue—the company I mentioned that specializes in Japanese products. That’s when I started to sell seitan—though there is not much demand for it. I learned to make seitan while living in the Catskill mountains of New York from a macrobiotic British girl friend who also taught me how to make amazake.

Update of April 27, 1993. “Since my family sent me tempeh starter (thanks for giving them the address), I have started small-scale production.”

Update of July 17, 1993. “I first made amazaké, in Martinique, in 1992. Even though I gave samples to quite a few people, nobody has seemed to be interested in this product, or to realize the versatility of it! So, I keep ordering it from Tama, packed in glass jars, and make my own once in a while, using ‘Cold Mountain’ starter. I’ve been a bit disappointed by this non-reaction. Amasaké being one of my favorite sweeteners, which I value more than any breakfast or desert cereal. My youngest daughter ate it as a first ‘solid’ food when she was only 5 months old, along with bananas.”

“If you allow me a personal remark about my work in Martinique, I find it extremely ungratifying. The public here is highly suspicious of anything new and foreign. My little business doesn’t allow me to assume my financial obligations, and I sometimes consider going back to the U.S. But I still want to try harder, at least for a few months.”

Note: This is the earliest English-language document seen that uses the term “amasaké” to refer to amazake. Address: “Caplet,” 97226 Morne Vert, Martinique, French West Indies 0033. Phone: 596 55-56-57.

3696. Angier, Natalie. 1993. Chemists learn why vegetables are good for you: Certain plant ingredients can inhibit cancers. *New York Times*. April 13. p. C-1, C9. Science section.

• **Summary:** An illustration shows a bowl of miso soup. Researchers at Children's University Hospital in Heidelberg, Germany, have isolated a compound named genistein from the urine of those who eat a traditional Japanese diet rich in soy products (like miso soup) and vegetables (especially cruciferous vegetables—those from the cabbage family). Dr. Lothar Schweigerer, his student Theodore Fotsis, and their co-workers discovered that, in test tubes, genistein blocks angiogenesis, the growth of new blood vessels. Their work was published in the current issue of the April issue of the *Proceedings of the American Academy of Sciences*.

An illustration shows genistein blocking the growth of new capillaries that supply blood to some tumors. It also retards proliferation of some cancer cells.

People consuming a traditional Japanese diet were found to have 30 times as much genistein in their urine as typical Westerners. This could explain why Japanese men, who leave their country for several years to work in the USA or Europe, find their rate of prostate cancer rises sharply. Tiny prostate tumors, which have been kept from growing by, say, daily intake of miso soup, would be free to grow on a Western diet.

Dr. Judah Folkman of Harvard Medical School (Cambridge, Massachusetts), who has pioneered our understanding of how tumors grow, found this to be a “fascinating report.” He noted that this is the first time scientists have reported that certain dietary factors, found in the urine, could inhibit the proliferation of blood vessels. Blocking angiogenesis has the potential for providing an ideal type of therapy, since it would attack the tumor while leaving normal tissue intact. Only rarely do new blood vessels grow in the adult body—except to meet the sinister demands of malignant tumors. So any compound that blocked angiogenesis would have few side effects.

At present, only about 5% of the approximately \$1.8 billion annual budget of the National Cancer Institute is spent on prevention; most of rest is spent to find high-profile cures, such as gene therapy. Dr. James Duke, an economic botanist with USDA, thinks the country would be much better off if we spent \$1 billion a year on cancer prevention—including education on diet and cancer.

A large table titled “Potential cancer fighters in foods” (p. C9) includes flavonoids, plant sterols, vitamin E, genistein, (all found in soy products) and fiber. Fiber dilutes cancer-causing compounds in the colon and speeds them through the digestive system. It discourages the growth of harmful bacteria and promotes the growth of healthful ones. And it may foster production of a healthier form of estrogen.

3697. Pinault, Pascal. 1993. Re: Tama—France's best importer of Japanese natural foods. Letter to William Shurtleff at Soyfoods Center, April 27. 5 p.

• **Summary:** Tama is located at 883, rue de Bernau, 94500 Champigny / Marne, France. Phone: (1) 49-83-79-94. Fax: (1) 47-06-37-85. Tama traces its origins to the 1960s when it was part of a restaurant, Le Bol en Bois, the first vegetarian place in Paris. This restaurant (at 35, 40 Rue Pascal, 75013, Paris) now specializes in macrobiotic cooking. They added a health food store and a “new age” book shop.

“Tama distributes Mitoku products and excellent miso, soy sauces, amasaké, kuzu, Japanese seaweeds, mochi, etc. They have an excellent list of books concerning natural foods and cooking. They print their own brochures about tofu, seaweeds, and others. Tama has a subsidiary branch named Tofu-Daizou which makes the best tofu in France, as far as I know.” Address: “Caplet,” 97226 Morne Vert, Martinique, French West Indies 0033. Phone: 596 55-56-57.

3698. Herian, Anne M.; Taylor, S.L.; Bush, R.K. 1993. Allergenic reactivity of various soybean products as determined by RAST inhibition. *J. of Food Science* 58(2):385-88. March/April. [16 ref]

• **Summary:** RAST stands for “radioallergosorbent test.” Soybean allergy is a common childhood food allergy, although it is less common than allergies to cow's milk, eggs and peanuts. Food allergies are generally more common in children than in adults. In this study of atopic adult patients, using RAST inhibition as a measure, the allergenicity of a variety of soy products was compared to that of whole soybeans. Results indicated that, when expressed on a per protein basis, although extracts of tofu, miso, tempeh, and fermented soy sauce were allergenic, they were as little as one tenth as allergenic as extracts of whole soybeans. Address: 1. Dep. of Food and Research Inst., Dep. of Food Microbiology and Toxicology, Univ. of Wisconsin, Madison, Wisconsin 53706; 2. Dep. of Food Science and Technology and Food Processing Center, Univ. of Nebraska, Lincoln, Nebraska 68583-0919, address inquiries to second author.

3699. Leneman, Leah. 1993. 365 plus one vegan recipes: Delicious meals and ideas for every day of the year. Hammersmith, London, England: Thorsons—An imprint of HarperCollins Publishers. 144 p. April. Index. 24 cm.

• **Summary:** Chapter 1 of this book, titled “The Vegan Dairy,” gives recipes for homemade soya milk, mock cream (from soya milk), soya flour cheese, yogurt cheese (from soya yogurt). There are also recipes for cashew or almond milk, cashew cream, and cashew cottage cheese.

Chapter 11 (p. 85-100), titled “Tofu and other Soya Foods,” contains a long introduction plus the following

recipes: Home-made tofu. Tofu and onions. Sweet and sour tofu and vegetables. Sea-flavored crisp tofu slices. Mushroom stroganoff. Tofu kebabs. Tofu casserole. Warming winter stew (with tofu). Korean-style kebabs (with tofu and miso). Tofu and green pea bhajia. Tofu 'scrambled eggs.' Scrambled tofu and mushrooms. Tofu piperade. Spicy tofu scramble with red pepper and tomato. Tofu knishes. Tofu and pea curry. Tofu burgers. Swiss steak (with frozen tofu). Savoury tofu 'mince' (with frozen tofu). Crispy fried sea-flavoured frozen tofu. Tofu goulash. Smoked tofu stew. Smoked tofu, courgette and sweetcorn risotto. Smokey duvec (with smoked tofu). Pease pudding and smoked tofu bake. Smoked tofu pasties. Steamed savoury smoked tofu pudding. Smoked tofu charlotte. Lek and smoked tofu au gratin. Smoked tofu and mashed potato cakes. Tempeh croquettes with mushroom sauce. Tempeh hash with potatoes. Indonesian-style tempeh. Tempeh stroganoff. Japanese-style tempeh kabobs. Tempeh burgers. Tempeh chilli. Mock 'ham' (with dried bean milk sheets [yuba]). Mock 'chicken' (with yuba). Mock chicken cooked Indonesian style.

Chapter 13 is entirely about sea vegetables, and a number of the recipes contain tofu, tempeh, miso, or soya milk. A number of other recipes throughout the book also use soyfoods as an ingredient. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

3700. Miso [Miso]. 1993. Television broadcast. Channel 18. KTSF. California. April 25. Sun. 7:00-7:30 P.M. [Jap]
 • **Summary:** This program is part of the series "Tsuiseki" (The Chase). Address: Japan.

3701. Nagayama, Hisao; Tokue, Akihiko. 1993. The naked kitchen: Miso. *Look Japan (Tokyo)* 38(444):24-25. March.
 • **Summary:** A nice introduction to miso. Color photos show: (1) A bowl of miso soup. (2) Four different types of miso, each on a wooden spoon. (3) Miso Dengaku.

3702. **Product Name:** [Red Miso].
Foreign Name: Miso de Riz.
Manufacturer's Name: Projet Miso (owned by Fonds de Contrepartie Rwanda-Canada).
Manufacturer's Address: P.O. Box 2018, Kigali, Rwanda. Phone: (250) 76730.
Date of Introduction: 1993. April.
Wt/Vol., Packaging, Price: 300 gm.
How Stored: Shelf stable.
New Product–Documentation: Letter from, form filled out, and label sent by Johnny Kashama, based on an interview with François Munyankindi of Projet Miso, Rwanda. 1993. Dec. 21 (which see). This company began to ferment red miso in 1992 and to sell it in April 1993. This is the first company in Africa to make and sell miso.

Label. 1993. 8 by 3.25 inches. Green, gold, and brown on white. Illustration of the silhouette of a family sitting around a table. The label text in Kinyarwanda (the local language) states: "Miso is a food made from soybeans, rice, and salt. It contains vitamins and proteins. It aids digestion. It does not require the inconvenience of refrigeration. It can be added to other dishes, and used to sweeten them. Two coffee spoons of miso are sufficient for one person." In French there is a nutritional analysis plus the following: "Miso can be mixed in at the last minute with sauces, soups, or other dishes prepared without salt. 60 gm of miso should be used to season the soup for 4 people. No cholesterol." The expiration date is also given.

3703. Library of Congress, Subject Cataloging Div., Processing Services. 1993. Library of Congress subject headings. 16th edition. Washington, DC: Cataloging Distribution Service, Library of Congress. 4 volumes. Address: Washington, DC.

3704. Belleme, John. 1993. Problems with trying to make traditional seitan America. Plans to start making miso dressings (Interview). *SoyaScan Notes*. June 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John plans to shut down Santa Fe Organics soon and stop making seitan. He is losing too much money. He hopes to start making miso dressings. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

3705. Carper, Jean. 1993. Colon cancer frighten you? Avoid red meat. Miso power unmasked. *Advance (Staten Island, New York)*. June 16.

• **Summary:** In a new study, researchers at the Columbia University College of Physicians and Surgeons found that women who ate the most saturated fat and red meat were more likely to have polyps—small precancerous growths that can lead to colon cancer years later. This research reinforces warnings from a recent Harvard study which showed that "women who ate a daily main dish of red meat—about five ounces of beef, pork or lamb—upped their risk of colon cancer two and a half times compared with women who ate meat less than once a month."

For more than a decade, Japanese studies have shown that consumption of miso helps prevent cancer. "Researchers from Japan's Okayama University Medical School now believe they have unlocked miso's health-promoting secret. Miso is an anti-oxidant. In experiments, miso neutralized free radicals, rampaging molecules in the body that attack cells and help create a wide array of diseases, including cancer. Miso also helped protect fats in the body from becoming rancid and able to foment disease activity, including artery clogging.

"Miso derives its antioxidant powers from chemicals in soybeans and from substances created by fermentation,

researchers say.”

3706. Weiner, Michael. 1993. New developments with Amano and Yamashita (Interview). *SoyaScan Notes*. June 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michael works as a consultant for Peter Joe of Sunrise Market Ltd. and with Amano Foods. He used to consult with Mandarin Enterprises in British Columbia. Now his main work is as a broker, representing various U.S. companies such as Vitasoy, Knudsen, Santa Cruz, etc. Amano still makes all of Westbrae’s organic miso. Amano is trying to construct a 60,000 square foot plant. They had a joint venture with Yamashita but it fell apart. Now Yamashita is constructing their own 60,000 square foot soy sauce plant in Oregon. The ground breaking will take place in a couple of weeks. Michael does not feel that this will be much of a threat to Amano, which plans to sell a lot of Amano products in supermarkets. The market is big and growing rapidly. Soyfoods now are given large amounts of shelf space (8-16 linear feet) in the produce section of all supermarkets in western Canada (British Columbia, Alberta, and Manitoba). A major reason for this is that Mandarin and Sunrise have an excellent relationship with the people in charge of the produce section in western Canadian supermarkets. Initially Michael helped to establish some of these relationships; these companies got a few facings for their tofu. Then Mandarin added their tofu burgers. Then Sunrise added Yves Wieners and soy cheese. The products sold, which is proof that exposure will work. Michael was involved in trying to make the same thing happen in Ontario with the Loblaws chain, and in Quebec, but they were never allowed to give the program a try—not even in 1-2 stores.

Safeway supermarkets are so sold on soyfoods that they have developed special open-front, vertical, refrigerated “Tofu Products” cases that are placed adjacent to the produce case, but have a lower temperature. They are quite large and contain everything from soy drinks to tofu, soy cheese to meatless hot dogs. Soyfoods are very widely available on Vancouver Island.

Sunrise and Michael jointly import Mori-Nu tofu into Canada from Japan. Also Sunrise distributes some juice products for which Michael is the broker. Mori-Nu does not sell well in supermarkets because it’s retail price is too high. Address: President, New Age Marketing, P.O. Box 39590, White Rock, BC, V4A 9P3, Canada. Phone: 604-538-0127.

3707. Messina, Mark. 1993. Welcome to *The Soy Connection*. *Soy Connection (The) (Chesterfield, Missouri–United Soybean Board)* 1(1):1-2. [7 ref]

• **Summary:** Discusses the growing interest in soyfoods (such as tofu, tempeh, soymilk, and miso) in America. They are becoming more mainstream. An estimated 2/3 of all tofu is sold in traditional supermarkets. Tofu consumption in America has doubled during the past 10 years.

3708. *Newsletter of the Soyfoods Association of America (Libertytown, Maryland)*. 1993. Thank you to the American Soybean Association. 4(2):2.

• **Summary:** “The American Soybean Association has awarded the SAA [Soyfoods Association of America] a grant for \$27,625.00 to develop and distribute educational materials on soyfoods and to produce periodic press releases. The grant will be used to produce a 4-color brochure on soyfoods and eight individual, camera-ready fact sheets on tofu, soymilk, tempeh, miso, texturized vegetable protein, soy flour, soy-based meat analogs, and soy oil. Materials will be made available to state soybean boards for distribution to consumers and volunteer soy promoters, to state level cooperative extension nutritionists for distribution to consumers through county home economics offices, and to health professionals for use in health and nutrition education programs. The first two fact sheets—on tofu and soymilk—will be available this month. All of the materials will be completed by Fall, 1993.”

3709. Xu, Zeng Quan. 1993. Tempeh in America and molded soybeans in China (Interview). *SoyaScan Notes*. July 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** He is a native of China but is now making tempeh in Michigan. Tempeh reminds him somewhat of a food named *mei dou* (“molded + beans”) which his mother and other housewives used to make in Jiangsu province near Shanghai. The warm weather there makes it easy to produce. His mother (and other housewives) then used the *mei dou* to make soybean jiang (similar to Japanese miso). The Korean word *meju*, also referring to mold-fermented soybeans, was probably derived from the Chinese *mei dou*.

He has never seen tempeh in China nor heard of ‘*Tou chiah ping*’ [soybean fried cake] observed, described, and photographed by William Morse in Beijing, China, in 1931. Address: Rosewood, Ann Arbor, Michigan.

3710. **Product Name:** The Organic Gourmet Miso Paste [Apple, Ginger, Honey, Chili Pepper].

Manufacturer’s Name: Scenario International Co. (Importer-Marketer). Made in Germany by Vitam Hefe Produkt GmbH.

Manufacturer’s Address: P.O. Box 24177, Los Angeles, CA 90024-0177; Walter-von-Selve Str. 2, 31789 Hameln, Germany. Phone: (40) 5151/95-400.

Date of Introduction: 1993. July.

Ingredients: Honey: Honey, Miso from Oats*, sea salt, ginger, garlic*. * = Certified organically grown.

Wt/Vol., Packaging, Price: 125 gm / 4.38 oz glass jar.

How Stored: Shelf stable.

New Product–Documentation: Leaflets and letter sent by Elke Heitmeyer of Scenario International (P.O. Box 24177,

Los Angeles, California 90024-0177. Phone: 310-470-9166). These products are made in Germany by Vitam Hefe Produkt GmbH. The color leaflet shows the products packed in paperboard boxes, and states: "Organically grown oats, not soy, are fermented in a 3-4 months long process to form our delicious miso sauces... A delectable sandwich spread, flavor for rice, soups, tofu, dips, and sauces.

Leaflet titled "Story" by Scenario International. "Elke Heitmeyer, the founder of Scenario International, is originally from the Eastern parts of Germany." She is a vegetarian. "The Organic Gourmet product line has been sold in German specialty health food stores, 'Reformhaus,' for years. The manufacturer is a member of the Neufarm Assoc. of Natural Food Producers."

Leaflet. "New. Organic Flavored Miso Pastes." Gives a recipe for Chili Miso Tortillas.

Letter and products (with Labels) sent in response to enquiry from William Shurtleff of Soyfoods Center. 1994. Jan. 11. The miso pastes were first sold in Germany under the brand name Vitam in August 1992. They were first sold in the U.S. under The Organic Gourmet brand in July 1993.

3711. Centa, Roland A. di. 1993. Re: Introducing tempeh and tofu to Italy. Letter to William Shurtleff at Soyfoods Center, Aug. 9—in reply to inquiry. 4 p. Typed, with signature. Followed by a letter of Sept. 10 answering questions.

• **Summary:** Roland was one of the first people to introduce soyfoods to Italy. He was very interested in macrobiotics and was a close friend of Michio Kushi. "My interest in food was to heal people with food and I had a lot of success using a holistic approach to help people with major diseases. For all these cures I used a lot of miso, tempeh, and tofu. Good miso was available. However tempeh and tofu had to be locally produced. I cured people from 1980 until about 1985.

"As I am a businessman I was always business minded in order to produce, make a profit, and be able to realize my ideas—which always cost. I am educated in international law and advise corporations who want to expand abroad.

"Tempeh: There was only tempeh available for Paris, made by a lady there named Anita Dupuy, who delivered and sold it to Le Bol en Bois (a macrobiotic restaurant in Paris) and to some consulates and embassies (such as the Philippines). As I was busy elsewhere I sent Giovanna Mazzieri (of Milan, Italy) to Paris [for 1 week in Feb. 1983] to study the process. She was a very busy lady and a fan of macrobiotics after I healed her husband of a very difficult disease. She was very smart and she produced in tempeh in Milan in about 1980 [actually mid-1983]. It was perfect and of very good quality. It was sold in a few health food stores. (Letter from Roland of Sept. 10 says Giovanna's tempeh was never sold commercially in stores; she produced tempeh only non-commercially from Feb. 1983 until today.

Roland taught her to make tofu in June 1982; she started to make and sell it shortly thereafter).

"Actually it never took off commercially and eventually was used only for selected people, me and my patients. At that time I was very strict in eating macrobiotic. I was very sensitive to the quality of tempeh: I didn't like the acid taste. On the island of Bali I once ate some tempeh which was very acid. Therefore I used to deep freeze it in order to have it ready when we wanted tempeh with perfectly good taste. Today it is no longer produced, or only in small quantities, for the use of the family of Giovanna and some friends in Italy. As I am no longer living in Italy and I stopped curing people, unfortunately I don't use tempeh any more myself. I was interested to find out whether it worked in curing people. It did! However in order to make a profession and profit-making enterprise, I preferred to do other jobs.

"Tofu: Tofu was produced by myself. I am sure I was the only one who produced it on the basis of your teaching the first time in Italy in 1978. After seeing an ad in the *East West Journal*, I ordered your *Book of Tofu* by mail.

"Tofu already existed in Italy in Chinese restaurants in all the major cities. They called it Tau-Fu. After studying your book, I went to many kitchens in order to observe how it was produced, and with the cooks I ate the okara which was never offered to the clients of the restaurants but was seasoned very hot for themselves. The main restaurant I studied at was "La Muraglia," which means "The Wall" and which still exists.

"I then bought the Tofu Kit [made by Larry Needleman of The Learning Tree] which was advertised in the *East West Journal*. With this kit I started to make my first tofu. It was at once of very good quality.

"I started to make the equipment following the instructions in your book and twice a week produced 10 kg of tofu, which was used by my family, and sold in health food stores and later to my patients. I sold the tofu also in bakery shops where I offered the clients free samples to taste before they eventually bought it. I had a few sales. I produced the tofu in the kitchen of my apartment on Via Maffei in Milan. I got up very early and at 8 A.M. the kitchen was clean—you couldn't see anything left of the production. My wife [who was Vietnamese] didn't want to have a mess in the kitchen when she got up.

"Before I going to work as a consultant in the morning, I delivered the tofu to various shops. I didn't sell as a company because the quantity was too small to justify a commercial set-up yet. After about a year, when the whole business was working well, I transferred everything to a friend of mine who was looking for a job. He did it also in his apartment, but had problems with the neighbors who saw the kettles steaming on his balcony and they wondered what he did in his place. As nobody knew what tofu was, he said he was making some kind of cheese. The neighbors

thought he might even have cows in his flat, and they managed to kick him out of his rented apartment after he had been making tofu there for about one year.

“When we heard that a company from Rimini [located 200 miles southeast of Milan and run by Gilberto Bianchini] had also started to produce tofu, we stopped production I didn’t get the feedback in profit from this business; I preferred to use my time in other operations and buy the tofu made by Gilberto Bianchini at health food stores in Milan. I am sure I would have had success in Italy if I had continued. But I didn’t have the support of my family, even though my wife was Vietnamese, and therefore I oriented myself to other activities. Someone who makes 10 kg of tofu in his kitchen before going to work must be a bit crazy—right?”

“Nowadays in France I eat tofu about 2-3 times a week, as does my companion, Barbara, and our 4-year-old Carolina.

“Tofu-Kit: In about 1979 I produced about 100 tofu kits, which I sold for 30,000 lire to friends and other people who were interested in making their own tofu. As it was actually a copy of the American tofu-kit which I bought in the U.S., I wanted to see whether there was a real interest in this product before marketing it in Italy. Since it didn’t sell very well, I didn’t go ahead with it. Eventually I planned to buy the copyright from the tofu-kit people in the U.S. In 1979 I also published booklets in Italian and French titled “Tau-Fu Kit” and Tofu Kit” respectively. One was sold with each tofu kit; they were not sold separately.

“You have been for me a kind of guru, without knowing each other, because I have a lot of admiration for your approach. You are probably successful because you did only this: Writing about things related to soya.” Address: 3, Boulevard d’Aguillon, 06600 Antibes, France. Phone: (33) 07-80-70.

3712. Obis, Mariclaire Barrett. 1993. Take another look at soyfoods. *Vegetarian Times*. Aug. p. 54-56, 58, 60, 62, 64, 66. [8 ref]

• **Summary:** A good introduction to soyfoods including whole dry soybeans, fresh green soybeans, soy flour and grits, soy sauce, soy oil, textured vegetable protein, soymilk, okara, soy yogurt and cheese, tofu, tempeh, and miso. Address: Contributing editor, *Vegetarian Times*.

3713. Hachmeister, Kathleen A.; Fung, Daniel Yee-Chak. 1993. Tempeh: A mold-modified indigenous fermented food made from soybeans and/or cereal grains. *Critical Reviews in Microbiology* 19(3):137-88. [185 ref]

• **Summary:** An excellent review of the literature. Contents: Introduction. Mold-modified indigenous fermented foods: Miso, shoyu (soy sauce), hamanatto, sufu, fermented rice (sierra rice), tapé (lao-chao), ang-kak, ogi, tempeh, ontjom (oncom, lontjom), bongkrekk (tempeh bongkrekk), kenima.

Processing developments in legume tempeh manufacture: Traditional tempeh fermentation, industrial production of tempeh, methods of preparation (cleaning, dehulling, hydration and acid fermentation, partial cooking, draining, cooling, and surface drying, inoculation, fermentation containers, incubation, harvesting, storage, and preservation, uses and preparation of tempeh). Organoleptic properties of tempeh. Microbiological aspects of legume tempeh: Microbial ecology, traditional and modern soaking methods, effect of soaking, acidification, and initial bean pH, effect of boiling prior to inoculation, effect of *Klebsiella* and *Enterobacter*, effect of lactic acid bacteria and yeasts, microbiological safety and quality, heating prior to consumption. Nutritional quality of legume tempeh. Chemical and biochemical changes in legume tempeh: Changes in protein and amino acids, changes in carbohydrates, changes in lipids, antioxidant potential, changes in minerals, changes in vitamins. Antinutritional factors associated with legumes: Flatulence-producing factors, protease inhibitors, tannins, phytic acid, hemagglutinins, other antinutritional factors. Cereal grain tempeh—practical applications: Background information, materials and methods, results and discussion, conclusions and future developments. Summary. References. Address: Dep. of Animal Sciences and Industry, Kansas State Univ., Manhattan, KS 66506.

3714. Shurtleff, William; Aoyagi, Akiko. comps. 1993. Bibliography of koji—grains and/or soybeans cultured with *Aspergillus oryzae*: 535 references from 700 B.C. to 1993, extensively annotated. Lafayette, California: Soyfoods Center. 151 p. Subject/geographical index. Author/company index. Language index. Printed Sept. 5. 28 cm. [535 ref]

• **Summary:** This is the most comprehensive bibliography ever published about koji. It has been compiled one record at a time over a period of 18 years, in an attempt to document the history of this subject. It is also the single most current and useful source of information on this subject available today, since 59% of all records contain a summary/abstract averaging 185 words in length.

This is one of more than 40 bibliographies on soybeans and soyfoods being compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyfoods Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features: 25 different document types, both published and unpublished; every known publication on the subject in every language—including 242 in Japanese, 226 in English (plus 75 with an English summary), 33 in German, 11 in Chinese, etc.; 16 original Soyfoods Center interviews and overviews never before published. Thus, it is a powerful tool for understanding the development of koji and related products from their earliest beginnings to the present.

The bibliographic records in this book include 478 published documents and 28 unpublished archival documents. Each contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English publications together with an English translation of the title, month and issue of publication, and the first author's first name (if given).

The book also includes details on 33 commercial koji products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to make best use of this book, a complete subject and geographical index, an author/company index, a language index, and a bibliometric analysis of the composition of the book (by decade, document type, language, leading periodicals or patents, leading countries, states, and related subjects, plus a histogram by year) are also included. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

3715. Seeger, Royce. 1993. Recollections of work with Eden Foods (Interview). *SoyaScan Notes*. Oct. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** At age 18 Royce was introduced to macrobiotics by Jimmy Silver. He was never involved with the food buying co-op before Eden Foods started. He started working for Eden Foods in about the fall of 1970 at the store on State Street. He was married with a child, he needed a job, and he was interested in macrobiotics, so the job was a natural. At the time he started work, Bill Bolduc, Mark Retzlöff, and Tim Redmond were working at that store. After he had worked there about a year, Michael Potter arrived. Initially he ran the cash register, stocked the shelves, and ran the 8-inch stone flour mill grinding wheat, corn, rye, rice, etc. into flour. Shortly after he started work, he also began to mill soy flour. Tom Vreeland grew the soybeans organically. Royce toasted the soybeans lightly, about half way, so that the flour could be milled more easily and was still yellow. The roasting got rid of the heavy raw taste, but some raw soy flour taste still remained. Initially the soy flour was sold in paper bags, but the bags became very oily, so they switched to packing it in 3 sizes of cello bags which we heat sealed. The bags were considered biodegradable. Eden couldn't buy too large a supply since they became brittle after a while. A printed label was affixed by hand to each cello bag. The flour was also sold in big 25 lb paper flour bags, which were stamped with a rubber stamp to indicate the contents.

Eden also made Kokoh, a macrobiotic baby cereal, which contained roasted soy flour and was also packed in the small cello bags. All the ingredients were roasted together and then ground; soy was one of the ingredients. The soy was roasted longer than it was for the flour.

Eden was also importing miso in kegs from Japan. Employees would pack the miso into 1- and 2-lb bags. Eden still imports its miso in bulk kegs.

In those days the store wasn't making much money; it had just come from being a co-op, so often the only pay employees got was to have their bills paid—such as rent, so they didn't get evicted. They didn't really get a pay check. In about 1973 Royce quit work at Eden to do some construction work for a friend, and then moved to Arizona to be with his wife's parents. After about 10 months he returned to Ann Arbor and went back to work for Eden Foods. This time he stayed until 1978, running the mill and doing packaging. Then he left for a second time; he needed to make more money.

In 1982 Royce returned to work for Eden for a third time. He started working in production at a small bottling line where Eden bottled soy sauces (imported in 55 gallon drums from Japan), vegetable oils, and vinegar. Eden still bottles its soy sauce this way. One person runs the filler, which fills 6 bottles at a time; he slides in 6 bottles, pulls down the lever which fills them, then he puts them on a conveyerized line. The next person on the line puts on caps. Finally, at a labeling machine, one person labels one bottle at a time. Then he went back into running the mill, grinding flours. Royce has been working at Eden, more or less, since 1982. However in 1987 he developed testicular cancer, which had spread throughout his lymph system. His weight dropped to 155 lb and parts of his spine had to be removed. The cancer is now in remission and he feels like he is getting stronger. Royce now serves as Michael Potter's driver, since Michael is not allowed to drive at all by himself. Royce likes working at Eden Foods, even though he is not an official employee, since he is receiving disability payments. Address: 133 S. Clinton, Manchester, Michigan 48158. Phone: 313-428-0973.

3716. Brown, Alan. 1993. Kinmata: Fine dining at a Japanese inn. *Bon Appetit* 38(10):118-22. Oct.

• **Summary:** Kinmata Ryokan is a nearly 200-year-old traditional Japanese inn located in Kyoto at 407 Shijo-agaru, Goko-machi, Nakagyo-ku. The owner, Haruji Ukai, who is also the chef, is the seventh generation of his family to run the inn; he greets each new guest in person when they arrive. The food at Kinmata, which is "as delicious as it is beautiful," features *kaiseki* cuisine. There are only seven rooms in two-story Kinmata and no private bathrooms. Contains two miso recipes: Broiled bean curd and eggplant with miso (Kinmata's version of dengaku). White miso soup

with shrimp. Address: Free-lance travel writer based in Tokyo.

3717. **Product Name:** Savory Spreadable Miso (Nerimiso or Sweet Simmered Miso) [Shiitake Mushroom, Peanut Raisin, Red Chili, Gingerroot, Garlic].

Manufacturer's Name: Leo Risin' Foods.

Manufacturer's Address: 1112 Delaware St., Lawrence, KS 66044. Phone: 913-832-1521.

Date of Introduction: 1993. October.

Ingredients: Garlic: Soybeans, rice, water, sake, honey, garlic, salt, and *Aspergillus oryzae*.

Wt/Vol., Packaging, Price: 4 oz glass jar with metal screw-on lid with rubber seal. Retail for \$2.89 per jar (3/94).

How Stored: Shelf stable.

New Product–Documentation: Talk with Clayton McHenry, founder and owner of Leo Risin' Foods. 1994. Feb. 21. He started making Nerimiso in Oct. 1993.

Letter and Labels sent by Clayton McHenry. 1994. Feb. 22. In April 1993 Clayton moved his kitchen from his former home to his new home at 1112 Delaware St., Lawrence, Kansas 66044. He continued to produce a variety of tempehs, plus natto and packaged deli foods (plus Finger Lickin' Miso every now and then). In April 1993 he started making Homemade Saké Kits. Then in October 1993 he started producing *nerimiso*, labeled as Savory Spreadable Miso, was made and sold in various flavors: Shiitake Mushroom, Peanut Raisin, Gingerroot, Garlic, and Red Chili. "The last 3 flavors have proved to be the more popular ones. Now I am attempting to market these nerimisos more widely with the goal of obtaining an account with a natural foods warehouse. My nerimisos are packaged in 4 oz. glass jars."

Label. 1994. The text on the back label reads: "This Savory Spreadable Miso is similar to 'nerimiso,' a Japanese miso product which is among the most popular forms of miso consumed in Japan. Use as a convenient topping for rice, tofu, curries, and fresh or cooked vegetables. Also use as a spread for toast or sandwiches." An illustration shows Farmer John picking his teeth with a long straw, and lots of animated little soybeans running and dancing around the edge of the label.

3718. Shi, Yanguo; Ren, Li. 1993. *Dadou zhipin gongyi-xue* [The technical arts of soybean products]. Beijing, China: Zhongguo Qinggong Yechu Banshe [Chinese Ministry of Light Industry]. xii + 484 p. Illust. No index. 18 cm. [34 ref. Chi]

• **Summary:** Wade-Giles reference: *Ta-tou chih p'in kung-i hsüeh*, by Shi, Yen Kuo; Jên, Li. Contents: Preface. 1. Introduction to soyfoods: Terminology and classification, origin and development, future prospects. 2. Soybeans: Production, seed structure and components. 3. Chemical

composition of soybeans: Soybean lipids, carbohydrates, minor components. 4. Soy proteins: Overview, molecular weight and classification, water solubility, denaturation, functionality, soy enzymes and antinutritional factors. 5. Soy oil extraction: Oil extraction from soybeans, solvent extraction principles and process outline, pre-extraction preparation, extraction process, other extraction technology, supercritical CO₂ extraction. 6. Chinese traditional soyfoods: Principles and ingredients, soybean soaking and cleaning, soymilk preparation for tofu processing, coagulation and molding, lactone tofu, yuba, meat alternatives. 7. Fermented tofu: Varieties (total 14 discussed), ingredients, microorganisms, mucor fermented tofu & process, top 8 products. 8. Soy nuggets and fermented soy paste (miso): Soy nuggets, fermented soy paste. 9. Soymilk (soy beverages): Production principle and outline, beany flavors and reduction, several commercial production lines, fermented soymilk, dry soymilk products. 10. Products from defatted meal: Defatted soy flour, soy protein concentrates (*dadou fenli danbai*), soy protein isolates (*dadou nongsuo danbai*), structured soy protein products, soy emulsifiers, applications of soy protein products. 11. Soy by-products utilization: Okara and its uses, soy whey and its uses. 12. Biological and chemical assay methodology: Assay for protein solubility, soy protein isolation, soy protein molecular weight measurement, gas chromatographic analysis of soy oligosaccharides, HPLC analysis of soy oligosaccharides, phytic acid assay, assay for hexanal Å the major beany flavor component, trypsin inhibitor assay, lectin assay, urease assay, lipoxygenase assay, soybean cell biology: thin sample preparation technology, soybean cell biology: ultra thin sample preparation technology.

Note: Talk with KeShun Liu. 2001. July 9. Green vegetable soybeans (*maodou*) are not mentioned in this book. Address: China.

3719. Soyfoods Association of America; American Soybean Association. 1993. Good news about soyfoods. San Francisco, California. 16 p. 19 cm.

• **Summary:** This attractive booklet, containing 6 color photos, introduces soyfoods. Produced jointly by the Soyfoods Association of America and the American Soybean Association, it represents a first in cooperation between these two organizations. Contents: Soyfoods—A healthy choice: Soyfoods lower blood cholesterol, and fight cancer. Adding soyfoods to your menu: It's easy! The soyfoods family: Soybeans and edamame or fresh green soybeans, soy flour, texturized soy protein (TSP), soymilk, tofu, tempeh, miso, meat analogs, soy oil (a brief description is given of each). Soy recipes: Miso soup. Tofu chocolate cream pie. Creamsicle spritzer (with soymilk). Banana pancakes (with soy flour, soymilk, and soy oil). Sloppy joes with texturized soy protein. Barbecued tempeh.

Nutritional value: Gives the composition of tofu (soft, silken, firm), meat analogs, soy oil, miso, texturized soy protein, tempeh, soymilk (regular or lite), and soy flour (full fat or defatted). Address: 1. One Sutter St., Suite 300, San Francisco, California 94104; 2. American Soybean Assoc., 540 Maryville Centre Drive, Suite 390, St. Louis, Missouri 63141-9200. Phone: 1. (415) 393-9697; 2. 1-800-Talk-Soy.

3720. *SoyaScan Notes*. 1993. Chronology of the American Soybean Association's growing interest in promoting soyfoods in America. Nov. 5. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1992 Jan.—Keith Smith of ASA calls Mark Messina PhD, at the National Cancer Institute and asks what Mark knows about possible cancer-preventing substances in soybeans. ASA was getting a lot of enquiries on the subject, which was Mark's specialty at NCI.

1992 Dec.—ASA decides to allocate a large portion of their 1993 research funds for health-related research. The 1993 budget contains \$1,200,000 in funding for three 2-year projects which each received \$400,000 over the 2 years. One project by Stephen Barnes involves soy and prostate and breast cancer, one by Maurice Bennink of Michigan State involves soybeans and colon cancer, and a third by William Wong involves cholesterol metabolism in soy.

1993 March—ASA allocates \$27,625 for the Soyfoods Association of America (mainly Ginny and Mark Messina) to develop and distribute educational materials on soyfoods and to produce periodic press releases. The grant will be used to produce a 4-color brochure on soyfoods and eight individual fact sheets on tofu, soymilk, tempeh, miso, texturized vegetable protein, soy flour, soy-based meat analogs, and soy oil. These materials will be made available to state soybean boards.

1993 June—*The Soy Connection*, a quarterly newsletter on the nutritional benefits of soyfoods, starts to be mailed to 70,000 registered dietitians across the U.S. This high-quality publication, edited by Mark Messina, contains articles by experts in their fields, plus some good recipes.

1993 Oct.—Dr. Mark Messina is officially hired by ASA as a consultant. He gave about 12 public speeches on soy, diet, and chronic disease prevention in 1993, and has 15 more planned for 1994. Messina also coordinates nutrition research for a group named the North Central Soybean Research Program. As part of this, Steve Sonka of the University of Illinois is conducting a \$43,000 economic impact analysis to determine the market potential for soyfoods and its effect on soybean consumption. The report is expected out in Dec. 1993. USB only has 3 paid employees and 60-65 volunteers, so they hire the ASA to do projects using money from USB and everything that ASA does is approved by David Thomas.

1993 Oct.—USB has a booth (probably its first) at the annual 3-day conference of the American Dietetic Assoc.

attended by roughly 10,000 people. ASA and Dr. Messina were there. Evans Food Group, ASA's big food-related public relations firm in Seattle, Washington, was also there. The booth was geared mostly toward soy oil, but most of the interest from dietitians was in soyfoods. Fact Sheets on soyfoods and a brochure prepared by the Soyfoods Association and Evans Group were distributed. Soynuts were served but they ran out in the first 2 hours. Messina encouraged USB to have enough good soy-based snacks to last for 3 days for next year's show.

1993 Nov.—*Good News About Soyfoods*, an attractive 16-page booklet, prepared jointly by the Soyfoods Association of America (Ginny Messina) and USB, featuring information about and recipes for soyfoods is mailed to about 3,000 to 5,000 key media contacts.

1994 Feb.—The First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease is held in Mesa, Arizona, organized by Dr. Mark Messina and sponsored by the United Soybean Board as well as soybean growers from Nebraska and Indiana.

1995—The United Soybean Board (USB) begins to sponsor dietitian seminars on the health benefits of soy in 26 cities across the USA. The budget for each seminar is \$8,000. Manufacturers can exhibit products at seminars for a fee of \$75 per table.

1996 Jan.—The Indiana Soybean Development Board introduces *Soyfoods USA*, the world's first e-mail newsletter on soyfoods. It is sent monthly to e-mail addresses free of charge. By Feb. 1997 there are 1,200 subscribers.

1996—USB creates and develops the theme "Soybeans—Designed for Life." When someone phones one of the state soybean associations or boards, music with these words plays in the background while he or she is on hold.

1996 Sept.—The Second International Symposium on the Role of Soy in Preventing and Treating Chronic Disease is held in Brussels, Belgium, again organized by Dr. Mark Messina. Sponsors contributing more than \$15,000 include: American Soybean Association, Nebraska Soybean Board, United Soybean Board, Ohio Soybean Board, Indiana Soybean Development Council. Other sponsors: Illinois Soybean Association and Illinois Soybean Program Operating Board, Soyfoods Association of America, Minnesota Soybean Research and Promotion Council, Iowa Soybean Promotion Board, and Michigan Soybean Promotion Committee.

1997 Jan.—USB announces 11 more Soy Connection Dietitian Seminars that will be held in major cities across America during 1997, from April 4 to Sept. 12.

1997 Feb. 25—The Illinois Soybean Assoc. (ISA) mails a form letter to all known soyfoods manufacturers in the USA, stating that it has recently teamed up with a number of industry leaders and researchers to examine the feasibility of a cholesterol health claim for soy protein products. The letter asks that each manufacturer send ISA

(by March 5) nutritional labels for each soyfood product that it makes or distributes.

3721. Coward, Lori; Barnes, N.C.; Setchell, K.D.R.; Barnes, S. 1993. Genistein, daidzein and their β -glycoside conjugates: Antitumor isoflavones in soybean foods from American and Asian diets. *J. of Agricultural and Food Chemistry* 41(11):1961-67. Nov. [31 ref]

• **Summary:** This is a very important article. Isoflavones were first extracted with alcohol (80% aqueous methanol) and then the fat was removed from the extract with hexane solvent. Details of the isolation process are given. The results showed that most Asian and American soy products, with the exception of soy sauce, alcohol-extracted soy protein concentrate, and soy protein isolate, have total isoflavone concentrations similar to those in whole soybeans. Asian fermented soyfoods contain mainly isoflavone aglucones, whereas in nonfermented soyfoods of both Asian and American origin isoflavones are present mainly as β -glycoside conjugates. The estimated daily intake of these isoflavones by Asians is similar on a body weight basis to the isoflavones in soy-containing diets which inhibit mammary tumorigenesis in animal models of breast cancer. Therefore, it is possible that dietary isoflavones are an important factor accounting for the lower incidence and mortality from breast cancer in Asian women.

“The concept of reducing cancer risk by chemoprevention has become an important aspect of current cancer research. It has been suggested that two so-called phytoestrogens, lignans and isoflavones, may play a role in the prevention of estrogen-dependent breast cancer and colon cancer.

Three tables show the isoflavone concentrations in various types of soyfoods. For each food, the content of the following is given: Conjugated genistin, conjugated daidzin, genistein aglucone, daidzein aglucone, total isoflavones, D/G ratio, percentage of genistein aglucones, and percentage of daidzein aglucones. After each food listed below we will show the total concentration “as is” and then (if given) on a dry weight basis.

Table 1 shows isoflavone concentrations (in mg per gram) in basic nonfermented Asian soyfoods: Soymilk (0.252 / 3.256), Tree of Life tofu (0.417 / 2.031), Mori-Nu tofu (0.494 / 3.827), soy flour (1.338), soy powder (1.748), and soy nuts (2.363).

Table 2 shows isoflavone concentrations (in mg per gram) in fermented Asian soyfoods: Tempeh (0.430 / 1.130), miso (0.920 / 1.379), rice miso (0.404 / 0.721), barley miso (0.721 / 1.195), Shiromiso soup mix (0.708), Akamiso soup mix (0.882).

Table 3 shows isoflavone concentrations (in mg per gram) in other soyfoods: Soy sauce (0.023 / 0.090), soy cheese (0.050 / 0.105), Tofutti soy ice cream (0.032 / 0.092), Ice Bean soy ice cream (0.117 / 0.360).

Although flavonoids are found in many plants, vegetables, and flowers, isoflavones such as genistein and daidzein are found in just a few botanical families. This is because of the limited distribution of the enzyme chalcone isomerase largely to tropical legumes. Partly for this reason, isoflavones are a very minor part of American or British diets. Address: Depts. of Pharmacology and Biochemistry and Comprehensive Cancer Center, Univ. of Alabama at Birmingham, Birmingham, Alabama 35294, Mass Spectrometry Lab., Children’s Hospital Medical Center, Cincinnati, Ohio 45229.

3722. Wheatley, Georgia. 1993. An American vegetarian resource directory: Some signposts on the journey towards a healthier, more ethically and environmentally balanced lifestyle. Ferguson, Missouri: WheatSong Press. 94 p. Nov. Index. 22 cm.

• **Summary:** Contents: 1. Audio/Visual resources: Audio, video, tape producers/distributors. 2. Cookbooks (248 citations). 3. Electronic resources: Internet sources (America Online, Compuserve, Public Dialup Internet Access List compiled by Peter Kaminski), vegetarian sources accessible from the Internet (rec.food.veg, fat-free, veggie {send email to the Internet address listserv@gibbs.oit.unc.edu}, granola, world guide to vegetarianism, AR-Talk, AR-News), other electronic vegetarian sources (Genie, Prodigy). 4. Family and children’s resources: Audio, activities, books, cookbooks, periodicals, video. 5. Mail order products. 6. Organizations and groups: National, local organizations listed alphabetically by state and city, starting your own group. 7. Periodicals, journals, and newsletters. 8. Publishers/distributors. 9. Radio/television resources: Radio, television. 10. Resource books. 11. Travel resources.

Note 1. This is the earliest document seen (July 2007) that mentions the Internet in connection with soyfoods or vegetarianism. Note 2. A new edition was published in Aug. 1996. Address: P.O. Box 35009, Ferguson, Missouri 63135. Phone: (314) 524-0894.

3723. Kashama, Johnny. 1993. Re: Projet Miso in Kigali, Rwanda. Questions answered on Soyfoods Center questionnaire and returned to SC on 21 December 1993. 3 p. Handwritten, with signature. [Eng]

• **Summary:** The following is based on an interview with Mr. François Munyankindi of Projet Miso (B.P. 2018, Kigali, Rwanda). Projet Miso (Project Miso), was founded on 1 Oct. 1990 to manufacture miso and to contribute to the improvement of the diet of the people of Rwanda. It was founded by Mrs. Suzanne Dionne of the *Fonds de Contrepartie Rwanda-Canada*, which is the owner. It is a cooperative venture between Canada and the government of Rwanda. The company began to ferment red miso in 1992 and to sell it in April 1993; it now makes red miso (340 kg/

week), tamari (14 liters/week), and shoyu (it is still in the fermentation and has not yet started to be sold). Miso is the best-selling product of the three, with sales of 102,000 Rwandese francs per week (1 U.S. dollar = 145 francs). They learned the process by studying *The Book of Miso* and *Miso Production* by Shurtleff and Aoyagi. The company employs 11 people: 1 manager, 6 production workers, and 4 office workers and others. The company has 290 square meters of production space and 27 square meters of office space.

Mr. Munyankindi thinks [and he is correct!] that this is the first company in Africa to make and sell miso, tamari, or shoyu. The miso is accepted by the local people. "As you know, miso is a medicinal food and it is recommended by many physicians." Address: c/o Tofu-Rwanda, P.O. Box 1906, Kigali, Rwanda. Phone: (250) 76730.

3724. Viana Naturkost GmbH. 1993. Sound im Glas [Sound in Glass]. Euskirchen-Kuchenheim, Germany. 6 panels. 21 cm. Company catalog. [Ger]

• **Summary:** This stylish, 6-panel company catalog is black, red, and white on pea green. The company sells Brown-Rice Miso (*Genmai* Miso) and Barley Miso (*Mugi* Miso). Spreads for breads include Chickpea Spread (*Kichererbsen Pastete*, with shoyu and soybeans), Vegetable Garden (*Gemuesegarten*, with organic tofu), Inka (with organic tofu), Toto (with organic tofu), and Miso Squash Paste.

Note: During 1993-94 Viana purchased modern tofu production equipment from Takai in Japan. Address: Willi Graf Str. 88, 33881 Euskirchen-Kuchenheim, Germany. Phone: 02251/56076.

3725. **Product Name:** [Viana Barley Miso].

Foreign Name: Viana Mugi Miso: Soja Gersten Wuerzpaste.

Manufacturer's Name: Viana Naturkost GmbH.

Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251/56076. Fax: 02251/75638.

Date of Introduction: 1993.

Ingredients: Soybeans*, barley*, water, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Refrigerated.

New Product-Documentation: Label sent by Bernd Drosihn, founder and owner of Viana. 1994. Feb. 14. 8 by 2 inches. Red and white on dark green. "Ideal as a basis for soups, dressings, creams and pastes. A savory spread for bread. Light. Free of cholesterol and of yeast."

3726. **Product Name:** [Viana Brown Rice Miso].

Foreign Name: Viana Genmai Miso: Soja Reis Wuerzpaste.

Manufacturer's Name: Viana Naturkost GmbH.

Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251/56076. Fax: 02251/75638.

Date of Introduction: 1993.

Ingredients: Soybeans*, rice*, water, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Refrigerated.

New Product-Documentation: Label sent by Bernd Drosihn, founder and owner of Viana. 1994. Feb. 14. 8 by 2 inches. Red and white on yellowish gold. "Ideal as a basis for soups, dressings, creams and pastes. A savory spread for bread. Light. Free of cholesterol and of yeast."

3727. **Product Name:** [Viana Spreads for Bread (Chickpea Spread, Vegetable Garden, Inka, Toto, Miso Squash Spread)].

Foreign Name: Viana Brotaufstriche (Kichererbsen Pastete, Gemuesegarten, Inka, Toto, Miso Kuerbis Pastete).

Manufacturer's Name: Viana Naturkost GmbH.

Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251/56076. Fax: 02251/75638.

Date of Introduction: 1993.

New Product-Documentation: Brochure titled "Sound im Glas," sent by Bernd Drosihn, founder and owner of Viana. 1994. Feb. 14. The ingredients for each spread are as follows (* = organically grown): Chickpea Spread: Chickpeas*, sesame seeds*, peanuts*, apple cider vinegar*, shoyu* (water, wheat, soybeans, sea salt), garlic powder*, herbs*, spices*, sea salt; Vegetable Garden: Tofu*, carrots*, leeks*, vegetable oil*, celery*, sea vegetables, garlic powder*, onion powder*, herbs*, spices*, sea salt; Inka: Tofu*, amaranth*, hazelnuts*, vegetable oil*, vegetables*, herbs*, spices*, sea salt; Toto (Italian): Tofu*, tomato pulp*, vegetable oil, olives*, herbs*, spices*, sea salt; Miso Squash Spread: Squash or pumpkin*, onions*, sesame seeds*, celery*, miso (soybeans*, rice*, barley*, water, sea salt), spices.

3728. Escano, Crisanto R.; Gaddi, Virgilio Q. 1993.

Country report 11-Philippines. In: N. Chomchalow & P. Narong, eds. 1993. Soybean in Asia: Proceedings of the Planning Workshop for the Establishment of the Asian Component of a Global Network on Tropical and Subtropical Soybeans. Bangkok, Thailand: FAO Regional Office for Asia and the Pacific. viii + 218 p. See p. 92-108. RAPA Publication (FAO), No. 1993/6. [12 ref]

• **Summary:** Contents: (1) Introduction. (2) Production: Status, major growing seasons and cropping systems, constraints, resolving constraints. (3) Processing, utilization and marketing: Status, supply and demand, exportation of soybean products, constraints, resolving constraints.

Figures: (1) Trend in soybean production, Philippines, 1980-90. (2) Soybean area harvested, Philippines, 1980-90. (3) Trend in the soybean yield, Philippines, 1980-90. (4) Regional shares of total production, Philippines, 1990. (5) Soybean and soybean product shares in importation, Philippines, 1990. (6) Country of origin, soybean meal import, Philippines, 1990. (7) Country of destination, soysauce export, Philippines, 1990.

Tables: (1) List of soybean-based food products popularly used in the Philippines. (2) Volume and value of soybean imports, 1980-90.

Soybean production increased from about 9,800 tonnes (metric tons) in 1980 to a peak of 11,466 tonnes in 1982, then decreased to 5,614 tonnes in 1990. Area planted to soybeans increased from about 10,000 ha in 1980 to a peak of about 11,000 ha in 1982, then decreased to about 7,000 ha in 1990. The average yield for the period 1980-1990 was 920 kg/ha, but has generally been falling since 1983. Southern Mindanao has been the single most important soybean producing region in the Philippines for more than a decade, accounting for about 67% of total Philippine soybean production in 1990; Central Mindanao comes next with about 23%.

A brief history of soybean production in the Philippines from 1983 to 1990 appears on pages 99-10. Popular soyfoods products in the Philippines include: A. Fermented products: Soy sauce (toyo), fermented soybean curd (tausi [sic, salted, fermented black soybeans]), tempeh (tempe), soybean paste (miso), soft fermented soybean curd (tahuri). B. Non-fermented products: Soybean sprouts (toge, taugé), soybean cheese [curds] (tokwa), Geerlings cheese (taho [tofu]), soybean milk (soymilk), and roasted soybean powder (soy coffee).

Philippine imports of soybeans and soybean products have increased rapidly since 1980, yet 93% of these imports in 1990 were soybean meal, of which 38% comes from India, 33% comes from the USA, 22% from China, and 7% from others.

In April 1991 the General Milling Corporation's soybean solvent extraction plant began operation in Tabango, Batangas. It is expected to reduce the country's imports of soybean meal but increase the imports of raw soybeans. Address: 1. Scientist III. 2. Subject Matter Specialist. All: PCARRD, Los Baños, Laguna, Philippines.

3729. Kataoka, Haruyo. 1993. Japan: A cookbook. Munich, Germany: Mosiak Verlag. 157 p. Index. [Eng]*

• **Summary:** This book contains one section (2 pages) that discuss tofu, including how to make tofu at home, followed by 15 tofu recipes. Other dishes using soy appear elsewhere, like Plum Wine with Soya, Milk Jelly, and some dishes that use miso as an ingredient.

Note: This book was originally published by in 1990 Mosiak Verlag in German.

3730. Kitamura, Keisuke. 1993. Country Report 6-Japan. In: N. Chomchalow & P. Narong, eds. 1993. Soybean in Asia: Proceedings of the Planning Workshop for the Establishment of the Asian Component of a Global Network on Tropical and Subtropical Soybeans. Bangkok, Thailand: FAO Regional Office for Asia and the Pacific. viii + 218 p. See p. 64-69. RAPA Publication (FAO), No. 1993/6.

• **Summary:** Contents: (1) Production and uses. (2) Research activities. (3) Germplasm.

Figures: (1) Scheme of domestic soybean price in Japan. (2) Geographical distribution of soybean varieties according to their ecotypes and location of soybean breeding stations in Japan.

Tables: (1) Planted area, production and yield of soybean in Japan. Total planted area has decreased from 306,000 ha in 1960 to 146,000 ha in 1990. Production has decreased from 418,000 tonnes (metric tons) in 1960 to 220,000 tonnes in 1990. Yield has increased from 1,360 kg/ha in 1960 to a peak of 1,790 kg/ha in 1990. (2) Trends of soybean supply and demand. Japan's imports have increased from 3,244,000 tonnes in 1970 to 4,330,000 tonnes in 1991, when 97.3% of the soybeans used in Japan were imported. Uses of soybeans in 1990: Oil 3,630,000 tonnes—up from 2,505,000 tonnes in 1970. Food 725,000 tonnes—up from 522,000 tonnes in 1970. Fermented products (miso, shoyu, natto) 196,000 tonnes—down from a peak of 208,000 tonnes in 1980. Animal feed 95,000 tonnes—up from 10,000 tonnes in 1970. (3) Trends of soybean price. (4) Trends of seed production. (5) Soybean research activities in Japan. (6) Objectives of the respective breeding stations for soybean. (7) Characteristics of the leading and some unique soybean varieties in Japan. For each of 15 varieties gives: Name, year registered (1928-1991), breeding method (crossing, pure line, mutation, back-crossing), ecotype, weight of 100 seeds, seed color, hilum color, characteristics. Address: National Agricultural Research Centre, Tsukuba City, Japan.

3731. Marks, Copeland; Kim, Manjo. 1993. The Korean kitchen: Classic recipes from the land of the morning calm. San Francisco, California: Chronicle Books. 236 p. Illust. Index. 23 cm. [8 ref]

• **Summary:** Korea is a peninsula surrounded by water (including the Yalu River that marks the border between China and Korea). There are an estimated 200 varieties of kimchi such as cabbage, cucumber, eggplant, white radish, turnip, etc. The glossary (p. 7-13) includes: Denjang paste (a fermented soybean paste and flavor enhancer). Gochu Jang (hot fermented chili paste; Gochu means chili). Seaweed: Kelp (*Ulva conglobata*, laver (*Porphyra umbilicalis*, sold in very thin sheets [nori]), *miyuk* (*Undaria pinnatifida* [wakame])). Soy sauce (with directions for making it at home). Soybean curd (Two types: Chinese is a

firm square about 4 inches on a side and 1 inch thick; Japanese is soft and creamy, about 2 inches thick).

Concerning Gochu Jang: This is the main seasoning in Korean cooking. It has been prepared at home for centuries and stored in the many black pottery pots so conspicuous on Korean rooftops or gardens. Each year on March 3, an auspicious date, the householder starts to prepare enough gochu jang to last all year. Ingredients: Glutinous rice (cooked to a pudding consistency), fermented soybean cake (*meju*), hot red chilis, salt, and barley malt syrup mixed with water. These are mixed and allowed to ferment [outdoors] in a pottery jar for at least 3 months. In early May, as the weather warms, the [woven conical bamboo] cover of the storage jar is removed early each day “so that the sun can strike and warm the contents to accelerate fermentation. At night the cover is replaced.” The fermentation process eventually reduces gochu jang to a smooth, jamlike consistency with a many-dimensional flavor; it adds a lively sting and rich red color to any food with which it is used. “Korean cooking without this indispensable condiment is unthinkable.”

Recipes include: Beef shreds in soy sauce (p. 48). Fried spiced bean curd (p. 57, *Tubu choerim*). Stuffed bean curd (p. 58, *Tubu gui*). Crushed bean curd salad (p. 70, *Tubu sang she*). Bean curd and pork patties (p. 96). Assorted stuffed fritters (p. 100-01, *Jon*). Seasoned dipping sauce (p. 109, *Yang yeum kanjang*). Simple bean curd soup p. 117, *Tubu kook*). Bean curd soup with clams (p. 125, *Sundubu*). Vegetable soup with soybean curd (p. 135, *Tubu jigae*). Soybean sprout soup (p. 136, *Kongnamul kook*). Address: 1. Food historian; 2. Dr. (Mrs.), expert on history, science, and preparation of kimchi.

3732. Pitchford, Paul. 1993. *Healing with whole foods: Oriental traditions and modern nutrition*. Berkeley, California: North Atlantic Books. xxii + 656 p. Illust. Index. 26 cm. [536 ref]

• **Summary:** Contents: 1. Origins. Part I: The roots of diagnosis and treatment. 2. Yin-yang and beyond. 3. Qi vitality. The six divisions of yin and yang: 4. Heat/cold—The thermal nature of food and people. 5. Exterior/interior: Building immunity. 6. Excess and deficiency.

Part II: Essentials of nutrition. 7. Dietary transition. 8. Water. 9. Protein and vitamin B-12. 10. Oils and fats. 11. Sweeteners. 12. Salt. 23. Condiments, caffeine, and spices. 14. Vitamins and supplements. 15. Calcium. 16. Green food products. 17. Survival simplified. 18. Enjoyment of food. 19. Food combinations. 20. Fasting and purification. 21. Food and children.

• **Summary:** Contents: (1) Introduction. (2) Production: trend, major growing seasons and cropping systems, constraints, resolving the constraints, future research. (3) Processing, utilization and marketing: Consumption, processing, marketing, constraints, resolving the constraints. (4) Resources: Personnel, seeds. (5) On-going research projects. (6) Information required. (7) Conclusion.

Tables: (1) Area, yield, and production of soybean in Vietnam, 1970-90. (2) Soybean production constraints in Vietnam. (3) Several research findings on soybean breeding and farming patterns. (4) Identified constraints for soybean production in Vietnam. (5) National requirement for food and production of soybean. (6) Methods of soybean processing of Vietnam. (7) Constraints to soybean processing, utilization, and marketing. (8) Future research priority for soybean in Vietnam. (9) Number of scientists working on soybean research. (10) Training needs on a priority basis. (11) Soybean varieties of high yield potential.

Introduction: "Soybean has been cultivated in Vietnam for a long time. Le Quy Don, in his book "Van Dai Loai Ngu", written in 1773, mentioned about soybean cultivation. It is the second most important legume in Vietnam. All soybean products are used as human foods and animal feed because of its high food value (40-50% of protein and 20-25% of oil).

"The Government of Vietnam, which is conscious of the importance of soybean and its role of human food and animal feed, and the possibility to increase its production, has listed soybean as the number two most important crop after groundnut in her agricultural development policy."

Table 1: Area planted to soybeans in Vietnam grew from 17,078 ha in 1970 to 149,000 ha in 1990, projected to grow to 300,000 ha in the year 2000.

Production of soybeans in Vietnam increased from 5,277 tonnes (metric tons) in 1970 to 146,020 tonnes in 1990, projected to grow to 420,000 tonnes in the year 2000.

Yield of soybeans in Vietnam grew from 309 kg/ha in 1970 to 980 kg/ha in 1990, projected to grow to 1,400 kg ha in the year 2000.

"Most of the soybean produced in Vietnam is consumed as human food prepared by traditional methods, which include fermented products such as soysauce, soypaste (miso), soycurd (fermented tofu), and soycheese, and non-fermented products such as soymilk, soycurd (tofu) and soybean oil.

Note: This is the earliest English-language document seen (March 2009) that uses the term "soypaste" to refer to miso.

Concerning the Vietnamese names of these foods, Huong Quan Nguyen (Zomore Quan) writes, in reply to a question from Soyinfo Center. 2008. Aug. 17. Soy sauce = “xi dau” (the Vietnamese “d” written without the bar across the vertical stroke is pronounced “Z”).

Soy paste = “tuong dau nanh” or “tuong Cu Da.” “Tuong” is a generic term meaning “sauce.” As you know, Cu Da is the name of the village famous for its soy paste. “Tuong Cu Da” literally means “sauce made in Cu Da Village.” Soy paste is made in many villages in North Vietnam, not just in Cu Da. I have heard that Tuong Ban and Tuong Pho Thoi are just as good as Tuong Cu Da.

Soy curd = “dau hu” (which is unfermented. Once the soy curd is fermented, it is referred to as “chao”).

Soy cheese = “chao” (this word has no diacritical mark).

Note: Zomore asked six Vietnamese people who are knowledgeable about soyfoods and all are aware of only one kind of fermented tofu in Vietnam; therefore they cannot imagine what fermented “soycheese” is. Address: Legumes Research and Development Centre, INSA, Dong Da, Hanoi, Vietnam.

3736. *SoyaScan Notes*. 1994. Keywords used with more than 1,000 documents in the SoyaScan database, as of 1 January 1994 (Overview). Jan. 1. Compiled by William Shurtleff of Soyfoods Center.

3737. O'Brien, Jim. 1994. Can tofu stop cancer? Research shows soy foods cut risk of breast, prostate cancers *Your*

Health. Jan. 25. p. 21-22. [1 ref]

• **Summary:** Mark Messina, PhD, a nutritionist and former researcher at the National Cancer Institute for 5 years, states that “There’s strong evidence to indicate that soy can lower cancer risk, especially of the breast and prostate.” Messina says that “soy may contain ‘anti-estrogens,’ compounds that perform many of the necessary and beneficial functions of real estrogen, but not the harmful stuff (for example estrogen is vital for reproductive health, but researchers believe it may spur growth of many breast cancers).

In Japan, where the diet is rich in soy [and much lower in fat], the breast cancer rate is much lower than in the USA. Every year in Japan roughly 7 women per 100,000 die of breast cancer and 28 per 100,000 are diagnosed with the disease; the corresponding figures for U.S. women are 27 and 105.

Japanese men also have low rates of prostate cancer. 3.5 per 100,000 Japanese men die of this disease every year but it kills 15.7 per 100,000 American men—also nearly a fourfold difference.

3738. Macdonald, Bruce. 1994. Macrobiotic Wholesale Co. is now Macrobiotic Company of America (MCOA) (Interview). *SoyaScan Notes*. Jan. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce (who was one of the early important figures in Erewhon) bought this company from Kurt Schmitz on 15 Sept. 1993. Kurt, who is about age 65, had come to North Carolina from California to retire. He had worked at Hewlett-Packard for more than 20 years. He purchased the company (named Macrobiotic Wholesale Co.) in Aug. 1986 from Great Eastern Sun; Barry Rand negotiated the deal. At the time the company had sales of about \$170,000/year; now its sales are well over \$1,300,000/year and the last two months have set sales records. Bruce renamed it Macrobiotic Company of America. Bruce used to live in Vermont, but he now lives in North Carolina. Kurt is interested in possibly starting a miso manufacturing company in North Carolina—which has long been considered by macrobiotic teachers to have an ideal climate for making miso (hot summers, cold winters, somewhat humid). The American Miso Company is only 50 miles away. Bruce would like to move the company up to the northeast; he feels it is situated in the wrong place.

Macrobiotic Wholesale Company used to be a division of Great Eastern Sun. Great Eastern Sun sold products to distributors, whereas Macrobiotic Wholesale Company sold directly to retail stores. The distributors got upset with Great Eastern Sun for wearing two hats, so Great Eastern Sun decided to sell Macrobiotic Wholesale Company. Barry Evans still owns Great Eastern Sun.

Note: Half of MCOA is owned by Muso Shokuhin of Japan. When William Shurtleff asked Bruce about this on 4 April 1997, Bruce confirmed that it was true. When the

company was purchased from Kurt Schmitz on 15 Sept. 1993, Yuko Okada of Muso put up 95% of the money and Bruce put up 5%—using his own funds. Yuko borrowed all or most of the 95% to make the purchase, and MCOA is paying him back. Bruce agreed to manage the company in exchange for 50% ownership, which he still has. Muso owns the other 50%. He did not tell the true story to Shurtleff in 1994 because Muso wanted to keep this semi-confidential. Address: Owner, Macrobiotic Company of America, 799 Old Leicester Hwy, Asheville, North Carolina 28806. Phone: 704-252-1221.

3739. DeBona, Don. 1994. Early work with natural foods, macrobiotics, and soyfoods in America (Interview). *SoyaScan Notes*. Jan. 27. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Don was born in Eagle Pass, Texas, in 1955. He had “hung around natural food stores since high school.” While in high school, he worked as produce clerk at a natural foods store named The Powerhouse in his home town on Towson, Maryland. It was the town’s first natural foods store. They bought foods from Erewhon.

In 1977 Don graduated from a small Catholic college named Mount St. Mary’s College in Emmitsburg, Maryland. He got interested in macrobiotics through books (such as *Zen Macrobiotic Cooking* by Michel Abehsera) that same year several months after he graduated; he had been a vegetarian for about 6 months. His first job after college was in Virginia at Appalachian Outfitters, a store which outfitted people going on camping or river trips.

Don worked for Laurelbrook Foods in Maryland for about a year, starting in 1981. He left shortly after the company filed for Chapter 11 bankruptcy protection on 15 Feb. 1982, then he went to work on a Permaculture farm named Watkins Farm on the Maryland/Virginia border. Run by a man named Law Watkins, it was testing no-till agriculture, growing organic winter wheat, barley, soybeans and summer produce according to the principles set forth in Masanobu Fukuoka’s classic, *The One Straw Revolution...* After working there for a year and a half, in December 1983 he went to Great Eastern Sun (GES, which had started business in March 1982). GES was just starting to get involved with soymilk (Ah Soy) when Don arrived; taking charge of the soymilk was his first project at GES. Barry Evans hired Don and was actively running GES at the time. Marty Roth had just left for Westbrae when Don arrived; Don took his place as general manager/sales manager. John Belleme was still at American Miso Co. John Fogg designed the package for Ah Soy; Don invented the phrase “Nondairy Soy Beverage” which is now widely used on other soy beverages. After working at GES for about a year plus several months, Don and his wife went down to the American Miso Company in Feb. 1985 to take over from John Belleme. Bob Ballard took Don’s place at GES, but

Don was the general manager of GES until Nov. 1993, when he hired John Swann. Don still owns part of GES (as well as part of American Miso Co., along with Barry Evans) and is paid by them, even though American Miso Co. is a separate corporation. Bean Mountain Soyfoods in North Carolina was shut down about 2 years ago; John Swann used to be in charge of Bean Mountain. John Fogg worked with John Troy for a while; they started a company named American Natural Foods. Then John Fogg did consulting for Arrowhead Mills, but 2-3 years ago he left the natural foods business and was writing books on motivation. Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

3740. Shurtleff, William; Aoyagi, Akiko. comps. 1994. Soyfoods industry and market—Bibliography and sourcebook, 1985 to 1993. Lafayette, California: Soyfoods Center. 361 p. Subject/geographical index. Author/company index. Language index. Printed 11 Jan. 1994. Published Jan. 1995. 28 cm. [985 ref]

• **Summary:** This is the second of the two most comprehensive books ever published on the soyfoods industry and market worldwide.

In May 1982 the first study of the burgeoning soyfoods industry in the Western world was compiled by Shurtleff and Aoyagi, and published by Soyfoods Center. In April 1985 the fifth edition of that book, titled *Soyfoods Industry and Market: Directory and Databook* (220 pages), was published. It contained statistics through 1984, the market size and growth rate for each soyfood type, rankings of leading soyfoods manufacturers of each soyfood type and the amount each produced, analyses, trends, and projections. This book is published to update the 1985 market study.

In the decade since 1984 the soyfoods market has continued to grow at a very healthy rate, with some soyfood types (such as soymilk) growing at a truly astonishing sustained rate—in both the USA and western Europe—as the statistics in this book show so vividly. In 1975 only 75 new commercial soyfood products were introduced in the USA, yet that number skyrocketed to 217 in 1979, reaching an amazing 422 new products in 1987.

During the decade from 1984 to 1994, Soyfoods Center has invested most of its time and resources in the production of SoyaScan, the world’s largest computerized database on soyfoods, which contains more than 44,500 records as of Jan. 1994. This database also includes a wealth of carefully researched statistics and analyses of the soyfoods market; those from the start of 1985 to the end of 1993 are contained in this book. Its scope includes all known information on this subject, worldwide. Its focus, however, is statistics, analyses, and trends concerning the soyfoods industry and market in the United States and Europe.

In May 1990 Soyfoods Center conducted an in-depth study of the tofu market in Europe (137 pages), and in July 1990 of the soymilk market in Europe (261 pages). All original interviews and published records from both of these market studies, plus a summary of each study, are included in the present book.

The SoyaScan database is composed of individual records. One record might be an original interview with the head of the largest soymilk company in Europe, on the size and growth of the soymilk market in Europe, and new trends in that market, conducted by William Shurtleff of Soyfoods Center. Another might be a published article or an unpublished document concerning the growth of the market for soy yogurts or soy sauce in America.

This book documents the growth of each product category in every country worldwide. The book contains three extensive and easy-to-use indexes: A subject/geographical index, an author/company index, and a language index. These allow you to find the exact information you need on the soyfoods industry and market quickly and easily. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

3741. United Soybean Board; Nebraska Soybean Program. 1994. Designed for life: A closer look at the versatile soybean's contribution to human health (Brochure). Lincoln, Nebraska. 12 panels. 23 x 10 cm each. [1 ref]

• **Summary:** Contents: Soybean fiber. Soybean protein (in soy flour, isolates, concentrates). Soybeans: The newest and oldest of designer foods. Finding and using soybeans: Miso, tofu, natto, tempeh, full fat flour, soymilk, soy nuts, soy sauce. Soybean oil: 85% unsaturated fat, no cholesterol, high in polyunsaturates, hydrogenation and *trans* fatty acids. Once upon a time ("circa 1500 BC, Yu Xi-ong and Gong Gang-shi, who were either bandits or warlords depending on your perspective..." discovered the soybean. Note: This story has no basis in historical fact). The soybean: Health insurance in a pod.

Photos show: Two hands holding up a large Chinese bowl of miso soup containing squares of tofu. A table set with dishes of various East Asian soyfoods. Charts: Bar graphs showing percentage of saturated, monounsaturated, and polyunsaturated fatty acids in soybean oil and other oils and fats. Nutritional analysis of 1 cup of cooked soybeans.

Note: This brochure was developed for the United Soybean Board (USB) by the Evans Group in Seattle, Washington. It was mailed mostly to food manufacturers. Address: Lincoln, Nebraska.

3742. United Soybean Board. 1994. Soybeans: Unlocking the secret to good nutrition. Healthcare guide. St. Louis, Missouri. 8 p. 28 cm. [5 ref]

• **Summary:** Contents: A critical food source from the dawn of history. The only vegetable that contains complete

protein. World soybean production (1992/93, bar graph). The most versatile food on earth. Health benefits of soy foods (discusses only soybean oil!). Nutritional analysis of soybeans, kidney beans, and peanuts. Bar graph showing the fatty acid composition of soybean oil and other oils and fats (soybean oil is "the balanced oil"). Hydrogenation and health. Cis and *trans* fatty acids. Soybean oil's place in the diet. Whole soybeans foods: Tofu, tempeh, miso, natto, soy sauce, full fat soy flour, soy "nuts" and soymilk. Soybean fiber (the outer hull). Soy protein products: Defatted soy flours, soy isolates, soy concentrates. Isoflavones (incl. Genistein). Soybeans, the "All American" legume. For more information call 1-800-Talk-Soy.

Note: This brochure was developed for USB by the Evans Group in Seattle, Washington. It was mailed mostly to dietitians, nutritionists, and members of the food industry. It focused more on soy oil than on soy protein. Address: St. Louis, Missouri.

3743. Nakagawa, Keiko H. 1994. The miso market in America (Interview). *SoyaScan Notes*. Feb. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Keiko has just finished a market survey titled *Beikoku Miso Shijo Chōsa Hōkoku* (The miso market in America: Report of a survey; 22 pages, in Japanese). She used statistics (with permission) from *Soyfoods Industry and Market: Directory and Databook* (1985) by Shurtleff and Aoyagi and from a database search of the SoyaScan database to get started on her research. Then she contacted all miso manufacturers listed in the directory and in this search, and interviewed the owner of each company. She found that total miso production by the 7 manufacturers listed below was 1,467 tonnes/year = 3,227,400 lb/year. She found that the largest miso makers in the USA (including Hawaii) are as follows, listed in descending order of size: 1. Miyako Oriental Foods (founded 1976, 1,000 tonnes/year = 2,200,000 lb/year, Los Angeles; Mr. Shimizu says they are still only using half their production capacity. Note: In 1982 Miyako produced 544 tonnes/year of miso according to Shurtleff and Aoyagi. 1985. *Soyfoods Industry and Market*, p. 108). 2. Hawaiian Miso & Soy Co. (founded 1936, 227 tonnes/year = 500,000 lb/year, Honolulu. Production was 512 tonnes/year in 1982). 3. American Miso Co. (founded 1979, 113 tonnes/year = 250,000 lb/year, North Carolina. Production was 125 tonnes/year in 1982). 4. American-Hawaiian Soy Co. (founded 1941, 91 tonnes/year = 200,500 lb/year, Honolulu. Production was 125 tonnes/year in 1982). 5. South River Miso Co. (founded 1981, 18.18 tonnes/year = 40,000 lb/year, Massachusetts). 6. American Biofoods (founded 1983, 16 tonnes/year = 35,300 lb/year, Holmdel, New Jersey; also makes Dengaku Miso). 7. Junsei Yamazaki Miso Co. (founded 1983, 2 tonnes/year = 4,400 lb/year, Orland, California).

Companies listed in the 1985 directory which cannot be located and probably no longer make miso are: Cottage Miso (Wisconsin), Imagine Foods (Missouri), Parks Brands (Hawaii), The Soy Plant (Ann Arbor, Michigan), and Well House (Colorado).

Imports of miso to the USA have continued to increase dramatically, from 959 tonnes (metric tons) in 1982 to 1,554 tonnes in 1992 (according to Japanese Customs sources).

On 20 Feb. 1994 Keiko sent a copy of her Japanese-language market study to Soyfoods Center, where it was placed in the library. Address: 667 Spyglass, Valley Springs, California 95252. Phone: 209-772-1502.

3744. Asbridge, David D. 1994. Agricultural importance of soybeans. In: Mark Messina, ed. 1994. First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease: Abstracts. Chesterfield, Missouri: United Soybean Board. 27 p. See p. 6. Held 20-23 Feb. 1994 at Mesa, Arizona.

• **Summary:** "Soybeans are omnipresent in American life... Last year, the average American consumed only four pounds of soyfoods in the form of soy protein products, tofu, soymilk, tempeh, miso, soy sauce, and soynuts. They consumed over 40 pounds of soybean oil in the form of margarine, salad dressings, cooking oils, and shortening. They consumed 204 pounds of meat, poultry, and eggs. Soybean meal, the most widely used processed feed ingredient in the U.S., is the leading source of protein for meat and poultry animals. To meet this huge demand for soybeans, vast resources are needed. In 1992, 440,000 U.S. farmers planted 59 million acres of soybeans. That's enough to nearly cover the entire state of Arizona. The farm value of the 2.2 billion bushel crop was more than \$12 billion dollars. Once farmers sold the 1992 crop, the majority of the soybeans were either crushed into meal and oil, or exported. The meal and oil were valued at \$6 billion and \$3 billion, respectively. Exports, which historically make up one-third of the U.S. soybean crop, directly reduced the U.S. trade deficit by almost \$4.5 billion dollars and indirectly employed 126,600 people. It has been estimated that since 1975, the value of the soybean crop has been about \$275 billion in nominal terms. The multiplier effect brings the total impact to the US economy of soybean production to \$800 billion." Address: American Soybean Assoc., 540 Maryville Centre Drive, Suite 390, P.O. Box 27300, St. Louis, Missouri 63141-1700.

3745. Badani, Bernard. 1994. Edible soybean mission report, Indonesia, Taiwan, Korea, February 1994. Ottawa, Ontario, Canada: Agriculture and Agri-Food Canada. 23 p. 28 cm. Spiral bound.

• **Summary:** Contents: Foreword: Mission objective, countries visited, main goals, conclusion. Acknowledgments. Names of the 8 mission members. Visit

to Indonesia (Jakarta): Background, visits (Nestle soymilk plant in Surabaya, BULOG), conclusions, market potential (short, medium, and long term). Visit to Taiwan (Taipei, Taichung, Tainan, Kaohsiung): Background (the pro-American soybean lobby), visits (Taiwan Tofu Manufacturers Assoc., Tet Union Corp., Great Wall Enterprises, Heng Yih), conclusions, market potential (short and medium term). Visit to Korea (Seoul): Background, visits (Hyosung Corp., AFMC, Korean and Seoul Tofu Manufacturing Co-operatives), conclusions, market potential (short and medium term). List of contacts by country (photocopies of business cards). Note: Mr. Badanai works for this federal organization in Ottawa.

This mission, whose coordinator was Michael Loh, took place between Feb. 25 and March 10, 1994; it was organized by OSGMB with assistance from the Canadian Embassies in Jakarta and Seoul, and the Canadian Trade Office in Taipei. The overall objective of the mission was to open these 3 markets to the sale of Special Quality White Hilum (SQWH) soybeans from Canada for use by their soy food industries.

Indonesia imports about 700,000 tonnes of soybeans each year, mostly grade #1 from the USA, to supplement its local production of about 1.3 million tonnes. About 250,000 tonnes of the imports are used to make soyfoods such as tempeh (which accounts for about 80% of the total), tofu, tauchu (Indonesian miso), and soybean milk. The majority of their domestically grown soybeans are also used to make soyfoods. All Indonesian soybean imports are handled by BULOG, a government agency which determines yearly requirements and allocates the resulting imports to various companies under a complex price structure formula apparently designed to maintain the competitiveness and full utilization of the domestic crop whose internal prices are very high by international standards. Sarpindo is the largest Indonesian soybean crusher. Nestle operates a soymilk plant in Surabaya that makes 12,000 tonnes/year and is completing a second one of 20,000 tonnes capacity in Jakarta. Much of Nestle's production, especially for the new Jakarta plant, is oriented toward the export market, with the Philippines as their top priority.

Taiwan grows only 12,000 tonnes of soybeans domestically, but they import 2,400,000 tonnes per year. Their main suppliers are the USA (1,938,000 tonnes, 80.8% of the total), China, 297,000 tonnes), and Argentina (6,000 tonnes). Imports are handled mostly by a small number of major crushers, which then select a portion of the #2 soybeans imported, bag them, and sell them to Taiwanese soyfood manufacturers. About 8% of the total imports (200,000 tonnes) are handled in this way. Tofu is by far the most important soyfood in Taiwan, with consumption of 49.79 kg/capita/year. Most tofu is made by very small companies. The main problem facing Canadian exporters is the almost total control that the pro-American soybean

lobby has shown so far in Taiwan. This lobby includes the main local crushers/importers of U.S. soybeans (which have a strong interest in maintaining the present import and distribution systems that make local tofu manufacturers dependant on them), and the American Soybean Association (ASA) office (with a staff of 15) in Taipei. Tet (Ttet) Union Corp. in Tainan is the largest crusher in Taiwan. Fwusow (Fwu Sow) is a large edible oil company. Taiwan's largest tofu manufacturer is Herng Yih Food Industrial Co. of Kaohsiung. The 13 year old company has two plants, 14 minutes drive apart.

Korea imports between 1 and 1.1 million tonnes of soybeans a year to supplement domestic production of about 200,000 tonnes. Approximately 200,000 tonnes of the total imports and 20,000 tonnes of domestically grown soybeans are used to make soyfoods, mostly tofu. All soybeans destined for this purpose are purchased by AFMC, the Agricultural and Fisheries Marketing Corporation, a state-owned corporation and government monopoly under the Ministry of Agriculture. that resells soybeans to food processors according to their needs, charging a very high markup over the import purchase price. This markup, in turn, allows AFMC to subsidize purchases of domestic soybeans which it buys at prices close to 5 times the international price but which it resells to tofu manufacturers at the same price as the imported soybeans. It is expected that AFMC will loose its importing monopoly on food grade soybeans by 1997 due to the GATT agreement. An immediate market potential for Canadian soybeans seems to exist for sprouting soybeans, of which Korea purchases about 6,000 tonnes a year. Address: Grains and Oilseeds Div., International Markets Bureau, Agriculture and Agri-Food Canada, Ottawa.

3746. Andoh, Elizabeth. 1994. Tokyo's rich array of regional dining. *New York Times*. March 6. p. XX6, XX19 (Sunday).

• **Summary:** Contains excellent reviews of the following Tokyo restaurants: Konomi, Kakiden, Itosho, and Shigeyoshi. The latter served "warabi ferns wrapped in fresh yuba (broad ribbons of bean curd [tofu])" and a "soup, which contained cubes of tofu and strips of fried bean curd... well seasoned with a burnished brown miso."

Note: This brief description of yuba is inaccurate; yuba is made from soymilk, not tofu. Address: Japan.

3747. *Toyo Shinpo (Soyfoods News)*. 1994. Miso no shukka juncho. Shôyu wa tomoni genshō. 93 nen no seisan shukka [Miso and shoyu production and shipment in Japan for 1993: Miso is increasing but shoyu is decreasing]. March 21. p. 5. [Jap]

• **Summary:** In 1993 in Japan 559,238 tonnes (metric tons) of miso were produced and 578,024 tons were shipped. Also

in 1993 some 1,163,843 kiloliters of shoyu were produced and 1,189,896 kiloliters were shipped.

3748. Hayhow, Sally; Messina, Mark. 1994. The soy solution: Might this humble bean have a critical role in preventing heart disease and cancer? *Vegetarian Times*. March. p. 77-78, 80, 82-84.

• **Summary:** A growing body of scientific evidence indicates that soyfoods can help in preventing heart disease and cancer. Soy protein has been shown to reduce the "bad" type of cholesterol, known as low-density lipoproteins (LDL). But the public is largely unaware that eating soyfoods may lower blood cholesterol markedly, thereby reducing heart disease risk. As a result of the lack of publicity given to these important scientific studies, a powerful, palatable form of preventive medicine is not being used.

One long section discusses isoflavones, which are plant estrogens that are only about 1/100,000th as potent as human estrogen. This weak estrogen activity may be responsible for their anticancer effects in hormone-related cancers such as breast cancer. Estrogen increases cancer risk by binding to receptors in breast cells. Isoflavones mimic estrogen, attaching to the receptors, and effectively blocking human estrogen. The most widely used drug in breast cancer treatment, tamoxifen, works in a similar way. Soyfoods are one of the only plentiful food sources of isoflavones.

Six little "sidebar" illustrations explain: Add a quarter pound of cubed, firm tofu to your stir fry: 13 gm of soy protein + 40 mg isoflavones. Pour half a cup of soymilk on your morning cereal: 10 gm soy protein + 20 mg isoflavones. Replace ¼ of the wheat flour in your bread with soy flour: 3 gm soy protein + 5 mg isoflavones (assuming a 3-cup loaf cut into 16 slices). Snack on a quarter cup roasted soynuts instead of peanuts: 18 gm soy protein + 50 mg isoflavones. Add a quarter cup TVP per person to chili: 11 gm soy protein + 35 mg isoflavones. Mix a tablespoon of miso into a cup of water for a warming broth: 1 gm soy protein + 5 mg isoflavones.

• **Summary:** Talk with Christie Metzger of the MSRPC. 1996. Jan. 4. The first edition of this book was published in March 1994. Some of the recipes came from the winners of a contest. Address: 360 Pierce Ave., Suite 110, North Mankato, Minnesota 56003. Phone: 507-388-1635.

3750. Palmer, Jane. 1994. Soybeans: From tiny pods come big gains in the field of medical research. *World-Herald (Omaha, Nebraska)*. April 6. p. 37-38. Living section.

• **Summary:** Dr. Connie LaBarr, director of consumer information for Nebraska Soybean Program in Lincoln discusses new medical research linking soybeans with the prevention and treatment of diseases such as cancer, heart disease, and osteoporosis. She notes that “The soybean genistein has been called the ‘magic bullet’ in the fight against cancer.”

One sidebar titled “Joy of Soy Can Be Sampled at Home” gives recipes using whole dry soybeans, tofu, miso, and soynuts. Another sidebar titled “Soy Pops Up in Product After Product” lists the many products in a typical Omaha supermarket that use soy as an ingredient. Address: World-Herald Food Writer.

3751. Begley, Sharon; Springen, Karen; Hager, Mary. 1994. Beyond vitamins: Just a few years ago, scientists didn’t know phytochemicals existed. But today they are the new frontier in cancer-prevention research. *Newsweek* 123:44-46. April 25.

• **Summary:** A pull-quote states: “Soybeans, whether as miso soup or tofu or straight up, contain genistein. This phytochemical seems to keep tiny tumors from getting connected to capillaries that carry oxygen and nutrition. Without these supply lines, the tumor never grows, metastasizes—or kills.”

Most small tumors are not dangerous. The “danger lies in lumps that grow, invade the bloodstream and send colonists throughout the body. That is how breast, prostate and other solid tumors kill. But the original lump cannot grow without supply lines—capillaries that bring oxygen and other nutrients. Last year German researchers announced that they had isolated a chemical in soybeans that prevents these vital supply lines from forming. Called genistein, it might one day be copied in the lab and given to people to prevent small tumors from growing. In fact, the lack of genistein may explain why Japanese men who relocate in the West and adopt a soy-poor diet for even a few years have a greatly elevated risk of prostate cancer: without genistein, tiny tumors are no longer deprived of the blood vessels that let them grow.”

During 1993, some 1.17 million new cases of cancer were reported in the United States. The National Cancer Institute is so excited about phytochemicals that it has launched a multimillion dollar project to find, isolate, and study them.

Broccoli contains many cancer-preventing phytochemicals. Sulforaphane (which is also found in cauliflower, Brussels sprouts, turnips, and kale) removes carcinogens from cells. Cooking does not destroy it, and an improved version has now been synthesized. PEITC prevents carcinogens from binding to DNA. And indole-3-carbinol helps a precursor to the hormone estrogen break up into a benign rather than a cancer-causing form.

Citrus fruits, berries, and many other fruits and vegetables contain flavonoids [flavonoids], which help cancer-causing hormones from latching onto a cell.

Tomatoes, strawberries, pineapples, and green peppers are a rich source of p-coumaric acid and chlorogenic acid, two phytochemicals that work by disrupting the chemical union between two common molecules in cells; this union can produce a carcinogen.

A one-page sidebar titled “Are supplements still worth taking?,” by Geoffrey Cowley, notes that millions of health-conscious Americans consume antioxidant vitamins, revered for their power to subdue free radicals. In 1993 alone store sales of vitamin E supplements grew by 39% to \$123 million, vitamin C grew by 10% to \$117 million, and beta-carotene (vitamin A) grew by 31% to 22 million.

3752. Kath. Gemeinden St. Johann und St. Joseph. 1994. Soja fuer Ghana [Soya for Ghana]. Duisburg-Hamborn, Germany. 24 p. Illust. 21 cm. [Ger]

• **Summary:** Each year this group of German Catholics has one development-help project in Ghana. In 1991 and 1992 it was trees for Ghana. In 1993 it was soya for Ghana. Contents: Development help? by Gottfried O. Praem. Africa’s need (incl. population growth, demographics, per capita GNP, and infant mortality). Our new project: Soya for Ghana. Why soya? Yields a variety of foods, healthy, ethical (in relation to eating animals and protecting the environment), good for agriculture. History of the soybean plant. Food products from the soybean: Soymilk, tofu, soy protein, soy sauce, miso, tempeh, soy oil, soy sprouts. Cultivation of soybeans in northern Ghana. Planting and harvest. Ghana—the land and its agricultural products. Teaching hygiene in Ghanaian. Dear money: Where does it come from and how is it spent? Past projects in Ghana and the 1993 Soya for Ghana project. The Bole mission station in northern Ghana (90,000 inhabitants of which 4,000 are Christian). Recipes. A talk with Brother Rudolf, age 62, during his visit to Hamburg in Sept. 1993. Address: Duisburg-Hamborn, Germany.

3753. *SoyaScan Notes*. 1994. Foods of East Asian origin that the macrobiotic movement/community has played a leading role in introducing to America, starting in about 1960 (Overview). May 10. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** These include brown rice, rice cakes, miso (many types), shoyu (traditional Japanese-style soy sauce), tamari (Japanese soy sauce containing little or no wheat; prior to about 1980 many practitioners of macrobiotics referred to natural shoyu as “tamari,” thus inadvertently popularizing real tamari, which now may be better known in the USA than it is in Japan), natto (fermented soybeans), seitan (wheat gluten seasoned with a soy sauce broth; this word was coined by George Ohsawa), amazake (thick rice

beverage), umeboshi salt plums, sea vegetables (kombu, wakame, hijiki, nori, etc), tofu, soymilk, alternatives to dairy products (macrobiotics do not consume dairy products), buckwheat noodles (*soba*), kuzu, rice syrup, barley malt syrup, azuki beans, sesame seeds, sesame salt (*gomashio*), daikon (white radish) and daikon pickles, kabocha (Hokkaido pumpkin), shiitake mushrooms (also known as Chinese black mushrooms, they have a firm "meaty" texture), burdock, jinenjo (glutinous yam).

They have done this by starting and running many natural food companies to import, distribute, manufacture or grow these foods; by writing cookbooks and other books about these foods; by teaching classes (including many cooking classes in which these foods are used); by influencing other people to do all of the above.

The Japanese names of many of these foods have become anglicized and are now the standard English-language names.

The macrobiotic movement also played a major role in introducing "tahini" or sesame butter (a Middle-Eastern food) to America, starting with George Ohsawa's book *Zen Macrobiotics* in 1960. Of the first 20 records in the SoyaScan database that mention "tahini," 14 are associated with macrobiotics. Likewise, 22 of the first 50 records are associated with macrobiotics.

• **Summary:** An excellent vegan sourcebook and cookbook by three registered dietitians. For the Contents and details, see the 1995 revised American edition.

Talk with Vesanto Melina. 1996. July 22. This book has presently sold about 25,000 copies in Canada alone. A revised U.S. edition was published in Nov. 1995 by The Book Publishing Co. in Summertown, Tennessee. Address: Canada.

3757. Marrese, Anthony. 1994. Travels collecting soyfood products, interviewing soyfoods manufacturers, and sending the packages and reports back to Soyfoods Center (Overview). *SoyaScan Notes*. June 3. [Eng]

• **Summary:** Letter—1989 Oct. 28. Report from France.

Letter—1990 Dec. 24. Contains 1 report from India and 11 labels. He is now c/o Richter in Worpswede, Germany.

All the products (priced with "Dm") from Germany were purchased between Jan. 1992 and June 1992. All the products from Ireland (priced with "P") were purchased between June 1992 and May 1993. In March 1993 he interviewed Molly Turner and Teac Macro Center in Ireland. All the products priced with escudos (\$) from Portugal were purchased between May 1993 and May 1994.

Letter—1994 May 12. Contains 19 labels and 3 company reports (all from Ireland). He has been out of touch for about 2 years. From Germany he traveled to England, then Ireland, then Portugal, with interim visits to France, Israel, and Germany. He is now in Lisbon, Portugal. He and girlfriend Mary have just received starter cultures from GEM Cultures in California. They plan to make their own koji and misos this year, for their own use and the use of a small group with which they work. This group is mainly interested in psychic development.

3758. *Soyafoods (ASA, Europe)*. 1994. U.S. soyfoods consumption predicted to grow. 5(2):3. Summer.

• **Summary:** A U.S. study titled *An economic analysis of the use of soybeans as human food* predicts that domestic increases in consumption of soyfoods could use an additional 100 to 240 million bushels of soybeans each year. The study was conducted for the North Central Soybean Research Program by researchers at Agricultural Education and Consulting in Savoy, Illinois (Phone: 217-352-1190).

The study found that the following food categories which have the greatest potential to use soya as an ingredient (listed in descending order of projected use levels): (1) Flour products—bread, bakery products, pasta, and pizza dough. 2. Meat products—ground beef and processed meats. 3. Dairy products—liquid milk replacements, processed cheeses and yogurt. 4. Snack foods—crisps, extruded snacks, snack nuts and meat snacks. 5. Soyfoods—tofu, soymilk, tempeh, soy sauce, and miso. 6. Fresh vegetables—green vegetable soybeans.

However there will be tradeoffs. For example, increased use of soya to make meatlike products will ultimately lead to less need for soybean meal to feed livestock animals. But overall, the researchers believe that net crop income, at least

for the North Central Region of the United States, will rise from nearly 8% to over 30%.

3759. *Gourmet*. 1994. The last touch: Salad dressings. 54(6):176. Aug.

• **Summary:** One of the recipes, Miso vinaigrette dressing, calls for red miso.

3760. Wang, Huei-ju; Murphy, Patricia A. 1994. Isoflavone content in commercial soybean foods. *J. of Agricultural and Food Chemistry* 42(8):1666-73. Aug. [28 ref]

• **Summary:** Isoflavones are one class of phytochemicals and are found in soybeans in large amounts. Twelve isomers of isoflavones were quantified: three aglycons and nine glucosides. Soybeans contain two major isoflavone aglycons, genistein and daidzein, and a minor one, glycitein. In the seed, the isoflavones are present primarily as β -glucosides. The nine glucosides are: daidzin, genistin, glycitin; 6"-O-acetyldaidzin, -genistin, or -glycitin; and 6"-O-malonyldaidzin, -genistin, or -glycitin.

This paper gives data on the concentration and distribution of isoflavones in 29 commercial soybean foods, grouped into three types: Soy ingredients, traditional East Asian soy foods, and second-generation soyfoods. Four values are given for each product in micrograms per gram, on an "as is" basis: daidzein, genistein, glycitein, and total isoflavones.

(1) Soy ingredients: Vinton 81 90: 600, 954, 82, 1636. Vinton 8191: 240, 648, 107, 995. Green vegetable soybeans: 546, 729, 79, 1354. Soy flour: 226, 810, 88, 1124. TVP #1: 473, 707, 202, 1382. TVP #1: 484, 702, 156, 1342. Soy isolate #1: 77, 273, 115, 466. Soy isolate #2: 115, 392, 102, 610. Soy isolate #3: 122, 393, 99, 615. Soy concentrate: trace, 13, 42, 56.

(2) Traditional soy foods: Roasted soybeans: 563, 869, 193, 1625. Instant soy beverage #1: 311, 617, 109, 1037. Instant soy beverage #4: 407, 665, 111, 1183. Tofu (73% moisture): 146, 162, 29, 337. Tempeh: 273, 320, 32, 625. Bean paste (ko chu jang in Korea): 272, 245, 77, 593. Fermented tofu: 143, 224, 23, 390. Honzukurimi miso (rice and soybeans): 79, 177, 38, 294.

(3) Second generation soyfoods: Soy hot dog: 34, 82, 34, 150. Soy bacon: 28, 69, 24, 122. Tempeh burger: 64, 196, 30, 289. Tofu yogurt: 57, 94, 12, 164. Soy Parmesan: 15, 8, 41, 65. Soy Cheddar cheese #1: 2, 5, 27, 34. Soy Cheddar cheese #1: 34, 40, 35, 109. Soy mozzarella cheese: 11, 36, 30, 76. Flat soy noodle: 9, 37, 39, 85.

Some manufacturers use ethyl alcohol extraction to prepare soy protein concentrates; this process removes a substantial portion of the isoflavones. The products examined for this paper which had the lowest content of isoflavones (all less than 100 micrograms per gram) were: soy cheddar cheese A 34, soy protein concentrate 56, soy Parmesan 65, soy mozzarella cheese 76, flat noodle 85.

"Proposed anticarcinogenic doses of soybean isoflavones range from 1.5 to 2.0 mg per kg of body weight per day (Hendrick et al, 1994). There are a number of soy food choices that will fit this dose requirement without the need to consume unusual amounts of these soy foods."

Isoflavone standards and extraction of isoflavones: Authentic standards of daidzein and genistein were obtained from commercial sources (ICN Pharmaceuticals, Plainview, New York, and Calbiochem Corp., San Diego, California). Daidzein and genistein were from previous work in the laboratory (Murphy 1981). The starting material for extracting isoflavones was defatted soybean flour. It was, in turn, extracted with acetonitrile (ACN) and 0.1 N HCl [hydrochloric acid] (1:5:1 w/v/v) according to the procedure of Murphy 1981. Address: Food Science and Human Nutrition, 2312 Food Sciences Building, Iowa State Univ., Ames, Iowa 50011.

3761. *Weight Watchers Magazine*. 1994. Pacific heights. 27(8):42. Aug. *

• **Summary:** Asian foods. Includes Recipes.

3762. Andoh, Elizabeth. 1994. Where Tokyo's young crowd likes to eat: Choice tables. *New York Times*. Sept. 18. p. 165.

• **Summary:** A look at popular restaurants in Tokyo. "One sampler is made up of five rolls of sushi—one each of tuna, omelet, natto (sticky fermented [soy] beans), mentaiko (spicy cod roe) and fresh ama ebi (shrimp).

Also mentions: "chilled cubes of silky bean curd," "miso-thickened broth with wakame, or sea tangle..." "fried bean curd" "sweet adzuki beans."

3763. Business Trend Analysts, Inc. 1994. The health and natural food market: Past performance, current trends, and opportunities for growth. 2171 Jericho Turnpike #342, Commack, NY 11725. 325 p. Sept. Price \$995.00. *

• **Summary:** Chapter 3 of this report, the first of seven chapters that discuss individual product categories, is titled "The Market for Soy Foods: An in-depth analysis of historical, current, and projected sales. Trends in the U.S. market for soy foods. Manufacturers' total sales of soy foods. Manufacturers' sales of soy foods, by distribution channel. Total retail sales of soy foods. Retail sales of soy foods, by distribution channel. Retail sales of soy foods, by type: Soy sauce, tofu, second generation, soymilk, miso, soy nuts, tempeh. Worldwide soybean production, total and per capita. U.S. production of soybean oil. New product introductions in the market for soy and vegetarian foods, including names of manufacturers, brand names, and product descriptions.

Under "Report Highlights and Special Features" we read that after the 3-year recession, most product categories posted strong gains, but "several segments failed to cash in on the growth bonanza. Manufacturers' sales of soyfoods

were up a meager 2½%, while the market for frozen health foods declined slightly... One-third of consumers under the age of 35 feel it is extremely important that the food products they purchase are natural; the percentage is even higher among older consumers. Over 40% of adults believe they will contract heart disease or cancer.” Today 68% of adults are overweight, up from only 58% a decade ago.

Overall report Contents: 1. Executive summary. 2. Overall market dynamics (including Soyfoods). 3. The market for soy foods. 4. The market for herbal teas. 5. The market for dairy foods. 6. The market for grains and cereals. 7. The market for frozen foods. 8. The market for snack foods. 9. The market for groceries. 10. The health food consumer. 11. The health/natural food store industry. 12. Competitor profiles. 13. Industry directory. Address: Commack, New York. Phone: 516-462-2410.

3764. Legume, Inc. 1994. Healthy vegetarian meals from Legume (Ad). *Natural Foods Merchandiser*. Sept. Insert glued in after p. 34.

• **Summary:** The full-page color ad begins: “Legume means vegetarian. Whether ‘vegetable’ in French, or ‘bean’ in English, the Legume name stands for the finest in vegetarian cuisine. And now, Legume’s pledge to quality, organic ingredients, convenience and great taste comes in energy efficient, recyclable cans.” A color photo shows the six products in the Legume Healthy Vegetarian line (in 15 oz cans): Chicken Style Soup, Chicken Style Chili, Beef Style Stew, Beef Style Soup, Beef Style Tamales, Italian Polenta. All products except the Polenta contain wheat gluten and miso.

Talk with Chandri Barat of Legume. 1995. Sept. This new line of canned entrees was launched in Dec. 1994. All products in the line are vegan; most products contain wheat gluten and miso. The new labels will state: “no animal products” rather than “vegan.” The present terms such as “chicken flavored meat analog” will be replaced by “flavored wheat gluten (water, wheat gluten, miso,” etc.). The company that makes these products is an old-fashioned, established one. The products are now starting to be sold in supermarkets, in the natural/health foods section. Address: P.O. Box 609, Montville, New Jersey 07045.

3765. Kennedy, J. Robert. 1994. How rice syrup and grain syrup came to America from Japan (Interview). *SoyaScan Notes*. Nov. 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Chico-San was launched on 6 March 1962 in Chico, California, as a retail store and a wholesale business, capitalized with \$10,000. The first Yinnies grain syrup (rice and barley) and Yinnies (rice syrup candies) that Chico-San sold in America were made in Chico-San’s food plant at 1262 Humboldt Avenue, in Chico, California, and sold in about 1971. The Yinnies syrup was on the market about 2-3

months before the candy. The candy was made by boiling down the syrup a little more, then pulling it like taffy using a regular taffy-pulling machine (Bob’s idea, never conceived of in Japan). So already Bob had developed two American innovations: Growing koji on brown rice, and pulling Japanese-style rice candy to give it a texture like taffy. Bob recalls that the demand for the Yinnies syrup (which was used as an all-purpose natural sweetener, especially by macrobiotics) was greater than the demand for the Yinnies confection. These macrobiotic products were made using the traditional Japanese koji process, except that the koji was made from organically-grown brown rice, grown by the Lundberg Brothers at Wehah Farms in Northern California.

Bob used to visit Japan 2-4 times a year in the early 1970s, because Chico-San was importing a large number of Japanese food products and Bob went to visit the farmers and suppliers. During these visits, Lima Ohsawa took him to visit several traditional Japanese shops that made rice syrup (*amé* or *mizuumé*) from koji. Bob observed carefully and took a few notes, which may still be in his diaries (which are in storage). He may have ordered a few samples from Japan, but they were not sold in America.

Bob dabbled and experimented with making rice syrup for at least two years before the product was launched commercially. During this time he learned how to make koji and rice syrup mostly from Mr. Junsei Yamazaki who had emigrated to Chico from Japan in 1963 (sponsored by Bob Kennedy) to make miso and natural shoyu for Chico-San. After graduating from Tokyo Agricultural University, Yamazaki had been a rice farmer in Japan for 17 years. In 1964 he began his first experimental production of miso and shoyu in Chico. His first large batches were made in mid-1970. Since he had to make koji for both miso and shoyu, it was an easy step to make rice koji for amazake. The amazake was cooked, filtered (to removed the fiber), then simmered slowly to yield rice syrup—a slow but relatively simple process. By the late 1960s or early 1970s Yamazaki was making small batches of rice syrup on an experimental basis in the back room at the Humboldt Ave. plant. By 1971 production of rice syrup was in full swing; it was sold in a 12 oz. glass jar and labeled “Yinnies Grain Syrup.”

On 14 Sept. 1972 disaster struck. A fire at the Chico-San plant and warehouse at 1262 Humboldt Ave. destroyed 90% of the company’s natural food inventory worth approximately \$350,000. The company moved to 2244 West First Street in Chico and struggled to get back on its feet. For several months, they continued to make Yinnies syrup from koji in the traditional way in a newly-built koji room. But the demand for this syrup was much greater than the amount that could be made using the traditional koji process. Bob had a friend named Carl Abbott, who worked at a nearby nut plant (Continental Nut Co.) and was also a very bright food chemist. So right after the fire Bob asked

Carl if he could do some research to find a way to expand output of rice syrup using natural enzymes with organically grow brown rice to maintain the natural quality and without addition of chemicals—such as caustic chemicals. Carl met with experts at Miles Laboratories (who had never worked with brown rice before), determined the best commercial enzymes, then made adjustments in cooking times and temperatures to fit the needs of the enzymes. Bob is not sure, but he recalls, two enzymes were purchased from Miles: Alpha-amylase to liquefy the rice, and gluco-amylase to break down the rice carbohydrates into sugars (mostly maltose). When Chico-San switched over to using commercial enzymes with brown rice to make rice syrup, they discontinued the use of koji.

In 1971 and 1972 sales of Chico-San's rice cakes began to increase dramatically. After the 1972 fire, it took the company about a year to get back to manufacturing any significant volume of rice cakes. By 1973 the demand for rice cakes was growing like mad. Bob had to build new and better machines that could keep up with the demand. Sales of Yinnies syrup were also growing nicely. Then the company ran out of space at the location on West First Street. So on 1 Jan. 1979 the company moved its Rice Cake machines back to the original address at 1262-1266 Humboldt Ave.—which had been renovated after the fire, and on which Chico-San now had a 10-year lease. Chico-San retained 6,000 square feet of its location on West First Street for the manufacture of Rice Syrup. At about that time Bob met Pat and Cheryl Mitchell, owners of California Natural Products (CNP) in Manteca, California. They were making various syrups, but definitely not from rice.

Note: Robert Nissenbaum of Imagine Foods (23 Nov. 1994) strongly disagrees with this 1979 date. He is certain that in the summer of 1984 he visited the Chico-San plant that was making rice syrup. It was located in Chico, in a sort of garage at the end of an alley. He was buying rice syrup from Chico-San at the time for use as a sweetener in amazake he was making in Missouri, and he wanted to find out why the quality was so inconsistent. He thinks that CNP first began making rice syrup under contract for Chico-San after August 1984.

Bob Kennedy decided to contract with CNP for production of all his Rice Syrup. Bob sold all Chico-San's Yinnies syrup equipment to Pat and Cheryl; this equipment was compatible to whatever they were doing. He also told them all his secrets for making brown rice syrup and had them sign a non-disclosure agreement and a contract which stated that CNP would make rice syrup only for Chico-San. Chico-San guaranteed in writing to buy a specified amount of rice syrup. "Everything went fine until I sold the business to Heinz."

When Heinz bought Chico-San on 16 Nov. 1984, they wanted it all or nothing. If they decided after six months that there were parts of the business they did not want, Bob

could buy those parts back. Chico-San carried \$100,000 to \$150,000 inventory of Japanese food imports. Bob expected to be able to buy back the Yinnies syrup business if Heinz decided not to pursue it, but the contract wording, unfortunately for Bob, allowed Heinz to essentially trade the rice syrup business to CNP. Bob lost track of what was happening between Heinz and CNP. He was supposed to work for Heinz as a consultant for about a year, but he didn't like it so he asked to be released from that obligation—which they did after about 3 months. "If I had had a crystal ball at the time, I would have kept the rice syrup business, but at the time I did not think much about it. I was really a little burned out with Chico-San. I was doing 10-12 hours a day for years. It was quite a relief to be free of it."

Bob Kennedy knew about Robert Nissenbaum, who was developing Rice Dream non-dairy ice cream before Chico-San was sold to Heinz. Chico-San was shipping hydrolyzed rice (made by CNP) to Robert Nissenbaum before Nissenbaum was aware of CNP. [Note: Robert Nissenbaum—see interview of Nov. 1994—says he bought only rice syrup from Chico-San, and he became aware of CNP at about the same time as Chico-San, before CNP was processing rice]. Then Chico-San was sold to Heinz in Nov. 1984 and Rice Dream (made with rice beverage from CNP) started to be manufactured in Palo Alto, California, in Jan. 1985. Address: Chico, California. Phone: 916-891-0970.

3766. Gold Mine Natural Food Co. 1994. *Macrobiotic, organic and Earthwise products for you and your home* (Mail order catalog and price list). San Diego, California. 64 p. 28 cm.

• **Summary:** Soy-related products include organic black soybeans, organic yellow vegetable soybeans, organic aduki beans, Ohsawa soy sauce, Ohsawa tamari, South River miso, Junsei Yamazaki miso, Ohsawa yuba, Ohsawa organic dried tofu, and kuzu. Address: 3419 Hancock St., San Diego, California 92110-4307. Phone: 1-800-475-3663.

3767. Shinshu-Miso Research Institute. 1994. *Report of the Shinshu-Miso Research Institute* No. 35. p. 1-100. [Jap; eng]
Address: Nakagosho 469-6, Nagano-shi 380, Japan.

3768. Fryer, Anne-Marie; Fryer, Wil. 1994. *Das kleine Buch ueber Salz, Miso, und Shoyu* [The little book about salt, miso, and shoyu]. Voelklingen, Germany: Ost-West-Bund Verlag. Illust. No index. 15 cm. [Ger]*

3769. Grogan, Bryanna Clark. 1994. *The (almost) no-fat cookbook: Everyday vegetarian recipes*. Summertown, Tennessee: The Book Publishing Co. 192 p. Index. 21 cm. [10 ref]

• **Summary:** This low-fat vegan cookbook contains a wealth of soy-related recipes, including 27 recipes that call for tofu. Address: Denman Island, east of Vancouver, British Columbia, Canada.

3770. Miyako Oriental Foods, Inc. 1994. Cold Mountain Miso: Ethnic versatile seasonings (Portfolio). Baldwin Park, California. Six inserts. 31 cm.

• **Summary:** The portfolio jacket was printed in about 1993 or 1994. The six inserts (all leaflets), printed over a period of ten years, include: (1) "Miso: Made from organic soy bean" (March 1995; two sides, color photo of four products on front, recipes on the back). (2) "Cold Mountain Miso: A traditional taste of Asia to the modern world" (March 1997; two sides, color photo of four products on front). (3) "Miso: Made from organic soybeans" (1983; two sides, printed brown on light beige). Gives specifications for three types of miso. (4) "Miso: Made from organic soybeans" (1983; two sides, printed brown on tan). Gives specifications for Cold Mountain dehydrated miso. (5) "Fermented black bean paste: Versatile seasoning" (1995; two sides, printed brown on light blue). Gives specifications for Cold Mountain fermented black bean paste. Ingredients: Black soybean, rice, salt, water, *Aspergillus oryzae*. (6) "Dehydrated fermented black bean paste: Versatile seasoning" (1996; two sides, printed brown on light gray). Gives specifications for Cold Mountain dehydrated fermented black bean paste. Address: 4287 Puente Ave., Baldwin Park, California 91706. Phone: 818-962-9633.

3771. Ontario Soybean Growers' Marketing Board. 1994. New uses for soybeans (Leaflet). Ontario, Canada. 2 p. Undated. 28 cm.

• **Summary:** Contents: Soy diesel. Premium building materials (such as Environ). Industrial solvents. Anti-chronic disease agent (isoflavones and protease inhibitors from tofu, miso, and tempeh). Road dust suppressants. Asphalt and concrete release agents. Lubricants and hydraulic fluids. Biodegradable plastic utensils. Soy oil based inks. Soy textile fibres (can be used for erosion control on landscape projects, for peat pots, fishing nets, and "soy silk" in clothing). Soy adhesives (for plywood products and composites). Address: Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

3772. Stepaniak, Joanne. 1994. The uncheese cookbook: Creating amazing dairy-free cheese substitutes and classic "uncheese" dishes. Summertown, Tennessee: The Book Publishing Co. 192 p. Index. 21 x 18 cm. [16 ref]

• **Summary:** This is an excellent, very creative cookbook with a poor index, developed especially for people who, due to choice or chance, have eliminated cheese from their diet. The recipes are well designed to satisfy any compelling cheese fantasies you may have.

Contents: Introduction. Cheezes, spreads & dips. Soups and chowders. Fondues & rarebits. Sauces, pestos & dressings. Pizzas, polentas & breads. Quiches, casseroles & entrées. Sweets. Glossary. Mail order suppliers of natural foods.

Tofu is used as a major ingredient throughout this cookbook. For example: Muenster cheese (p. 23). Chunky Roquefort dip & dressing (p. 24). Tofu cottage cheese (p. 27). Tofu ricotta (p. 27). Betta feta (p. 28). Brie (p. 31). Liptauer käse (p. 32). Boursin cheese (p. 33). Tofu cream cheeze—rich or light (p. 34-35). Kefir cheeze (p. 36). Garbanatto (p. 39). Hot Parmesan artichoke dip (p. 41). Pecan cheese (p. 42). Egg-free (vegan) mayonnaise (p. 89). Tofu sour cream (p. 90). Calzones (p. 100-10). Tofu tetrazzini (p. 122) Tofu devonshires (p. 140). Mattar paneer (p. 146). Tofu cheezecakes & cream pies (ten varieties, p. 164-74). Tofu whipped topping (p. 172).

Many other recipes also call for "low-fat, dairy-free (vegan) milk" which is defined (p. 183) as "a generic term which refers to any creamy beverage such as soymilk, nut milk, or rice milk that is produced from non-animal products.

Interesting products in the glossary (p. 180-184) include: Agar, barley malt syrup, brown rice syrup, liquid aminos, mirin, miso, seitan, tahini, tamari, tempeh, toasted sesame oil, tofu, umeboshi plum paste, vegan milk, yeast—nutritional (*Saccharomyces cerevisiae*).

3773. **Product Name:** [Tofu Quiche (With Smoked Tofu)].

Foreign Name: Tof'quiche—Au Tofu Fume.

Manufacturer's Name: Gaia.

Manufacturer's Address: 11, rue François Chancel, 31190 Auterive, France. Phone: 61 50 67 39.

Date of Introduction: 1994?

Ingredients: Tofu*, soymilk* [filtrat de soja], smoked tofu*, flour T65*, rolled oats, sunflower oil*, shoyu [sauce de soja], miso [pâte de soja], aromatic herbs. * = Organically grown.

Wt/Vol., Packaging, Price: 130 gm.

New Product—Documentation: Color leaflet (undated, 6 panels) sent by Jean-Luc Alonso. 1994. May 16. *Une gamme de pains spéciaux, goûters et desserts naturels, 100% végétaux, biologiques et sans adjonction de sucre* [A line of special breads, snacks, and natural desserts. Made purely from plants, organically grown, and without the addition of sugar]. The printed address has been crossed out; the new address is: 7, rue du Mail, 81300 Graulhet, France. Phone: 63 42 16 03. The following products are included in the leaflet (the label of each is shown): Tof'délice—Caroube (A fresh carob pastry based on tofu). Tof'quiche—Au tofu fume (Tofu quiche based on smoked tofu). Friand au seitan (Seitan appetizer).

3774. Rosas, Juan Carlos; Young, Roberto A. 1994?. El cultivo de la soya. Quinta edición [The cultivation of soya. 5th ed.]. *Departamento de Agronomía (Zamorano, Honduras), Publication No. AG-9603*. 68 p. Undated. [Spa]

- **Summary:** Contents: 1. Overview: Economic importance, chemical composition, history, taxonomy. 2. Morphology of the soybean plant. 3. Physiology of the growth and development of the soybean plant: Stages of development. 4. Environmental factors that affect the cultivation of soya: Soil, water, irrigation, light / photoperiod, temperature, period of growth. 5. Practical cultivation: Preparation of the soil, time of planting, density of planting, quantity of seeds, systems of cultivation, control of weeds (methods of weed control, chemical control). 6. Mineral nutrition of soybeans (and inoculation). 7. Diseases that affect the cultivation of soybeans and their management: Bacterial, fungal, viral, other, seed treatment. 7. Insects that attack soybeans. 8. Harvest and storing. 10. Improvement of soybeans. 11. Processing and utilization: Industrial processing (extraction of oil, soy flours, soy protein concentrates (*concentrados proteicos de soya*), soybean cake). Direct consumption: In the Far East, the soybean is consumed in the form of fermented and non-fermented foods. Fermented foods include shoyu, miso, mato [sic, natto], and tempeh, while non-fermented foods include soymilk (*la leche de soya*), tofu, yuba (*juba*), and kinako. 12. The cultivation of soya in Honduras (history).

In 1972, the Ministry of Natural Resources (*Ministerio de Recursos Naturales*) reported the initiation of commercial soybean production on a small scale in various departments of the country (Olancho, El Paraíso and Comayagua). Three varieties were used at that time: Biloxi, Hardee and Jupiter. However, before these reports were made, at the Panamerican Agricultural School (*la Escuela Agrícola Panamericana (EAP)*), some hectares had already been planted with the varieties Jupiter and Pelican. Discusses additional developments in 1974, 1982, 1986, 1987, and 1988. Address: 1. PhD; 2. PhD.

3775. Rower, Howard. 1995. History of The Infinity Company and Infinity Foods. Part I (Interview). *SoyaScan Notes*. Jan. 22. Conducted by William Shurtleff of Soyfoods Center.

- **Summary:** Howard grew up in a Jewish family in Boston, Massachusetts. In about 1964 or 1965 he got interested in macrobiotics. John Hammond, his next door neighbor and a blues singer, was involved in macrobiotics and he told Howard about it one day. So Howard went to the Ohsawa Foundation in New York City, which was run by Irma Paule in those days. He bought some groceries from her and began practicing macrobiotics. George Ohsawa came to New York in 1965 for a summer camp (See Kotzsch 1985, p. 137) and Howard met him. "Ohsawa said he was looking for a guy like me and he wanted me to grow rice in New

York state. I found out that was a pretty impossible task so I asked him to pick something easier. He said 'Okay, grow kuzu.' I said, 'Okay, when you get back to Japan, send me some kuzu plants.' And he said, 'Oh no. That's not the Zen way. The Zen way is for you to do it yourself, now.' I spent about 6 months finding out what a kuzu plant was. Finally I got some old agricultural bulletins that described how good kuzu was, then later described how bad it was. I finally managed to find somebody in the South who dug up some kuzu in the winter and sent it to me. I grew it in my garden in New York. The next year when Ohsawa came, I sat him down under this huge kuzu vine, like an arbor, at the back of my house. I said 'There's the kuzu you wanted.' I took some of the kuzu roots and actually extracted kuzu from them and put it in a test tube. I showed it to Ohsawa, told him it was the first kuzu ever extracted in New York, and gave him the test tube. He was astonished and delighted. He said, 'Now we have to begin to work. I knew I was right. You *are* the man I'm looking for. You must begin to import macrobiotic food products from Japan at once. I will ship them to you.' So we started this relationship and in 1965 I began importing foods from Ohsawa in 1965. He used to send me tamari [soy sauce] and miso in beautiful little 18-liter wooden kegs, tied with rope." Howard sold these products to health food stores and to Michio Kushi.

Also during 1965 Howard read a book about grain and he got very interested in freshly-ground flour. A grain of wheat is alive, but as soon as you mill it, it dies. After 5 days the taste and nutritional value have both declined. So people should mill flour, then keep it refrigerated, and use it as soon as possible. So Howard bought a little home flour mill, and set it up in his house. He ground some wheat flour, his wife made some bread, and they really liked the bread. They served the bread to friends who came to dinner, then they wanted fresh flour, so he made flour for them. Pretty soon he was delivering flour to people, then a health food store wanted to sell it, so he had a label made, even though he didn't have a company name at all. So he threw the *I-Ching* to help him choose a name. The hexagram was "Perseverance Furthers." He was going to name the company "Thomas J. Perseverance" so it would sound like a real person. His brother, who was visiting at the time, said "That's a stupid name. You might as well call it Infinity if you're going to have a dumb name." Howard liked the name Infinity, and decided to name his company The Infinity Co. However, later he did have some labels printed on which Perseverance Foods was the company name—just for fun. He once had a lawyer named Bill Pratt, so he sold "William Pratt Old Barrister" brand honey. One of his children pinched his thumb in the flour mill at home and his wife became concerned that a more serious injury could happen. Moreover everything in the house began to dusted with a thin layer of flour.

Howard started The Infinity Company in about 1965 at 188 Duane Street in New York, in the lower Manhattan neighborhood named Tribeca. It distributed, imported, and manufactured natural foods. George Hannides (pronounced HAN-uh-dees) came to work with him, and he later became a minor working partner. the Infinity Food Company in New York.

Howard had a friend who practiced karate in a loft at 188 Duane Street, and his landlord gave Howard a small space that had a desk in it on another floor of the same building. So Howard moved in his mill and started doing business as The Infinity Company. Within 2-4 years Howard incorporated the company and changed the name to The Infinity Food Company. Then the health food stores began asking Howard to make other kinds of fresh flour, such as rye flour or corn meal. He did, and soon the product line had expanded to 250 different products. Eventually he had two 30-inch flour mills plus a 24-inch mill and some little 8-inch ones. He had a room full of mills, and milling was a large part of Infinity's manufacturing business. In addition, at one point, the company was getting truckloads of dried fruit and of fruit juices from California, plus jams and jellies made without sugar from the City of Industry, California.

"Michio Kushi was operating out of a house on Harvard Square in Cambridge. He was selling groceries in the hallway. He had started out in New York, then he ran into some kind of terrible financial trouble. He fled to Cambridge to avoid his creditors. His wife, Aveline, ran the business and he was the guru. In the early days, Michio was Erewhon's biggest asset. He used to go around and lecture, then people would say 'Where can we get this food,' and he's say 'Go to Erewhon.'" Howard is not sure whether or not he ever sold products to Erewhon in the early days. Howard is not sure whether or not he began importing foods before Erewhon. "Erewhon didn't have any kind of an operation going on when I had my warehouse. They became important later. In the beginning, they may have been getting some products from Ohsawa in Japan at the same time I was. Erewhon was located in the Kushi house in Cambridge, where a few of the real loyal macrobiotics lived with the Kushis and helped to pay the rent. They had sort of a grocery display in the hall, and they sold some foods. In the early days, Erewhon bought miso, tamari and other typical macrobiotic products from Infinity." Continued. Address: 84 MacDougal St., New York, NY 10012. Phone: 212-982-3620.

3776. Drosihn, Bernd. 1995. The soyfoods market in Germany. New developments at Viana Naturkost (Interview). *SoyaScan Notes*. Jan. 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bernd's company, Viana, is now one of the two largest tofu manufacturers and soyfoods marketers in Germany. The other large company is Life Food in Freiburg.

Their brand name is Taifun, and they have been growing rapidly for the last two years.

The tempeh market is very small in Germany. There are only two manufacturers: Hamburger Tofu Manufaktur (Christian Nagel, in Hamburg) and Viana. There is now only one real miso manufacturer in Germany: Kanta Kozaki GmbH in Urbach near Stuttgart. Viana stopped making miso 2 years ago, however Viana sells miso made by Kanta Kozaki in glass jars under the Viana label. A Japanese man (Hiroshi Kozaki) and a German man (Karl Selgmann) run the company together. They have been making miso for 3-4 years. Viana also sometimes makes koji for Kanta Kozaki.

Bernd and Albert Hess are planning to attend the Natural Products Expo West in Anaheim, California, March 10-12, 1995. Address: Founder and president, Viana Naturkost GmbH, Willi Graf Str. 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251-56076.

3777. Mindell, Earl. 1995. *Earl Mindell's soy miracle*. New York, NY: Simon & Schuster. A Fireside Book. 256 p. Index. 22 cm. [97 ref]

• **Summary:** Contents. Part I: Soy—The miracle food. 1. The soy story: explaining the miracle. 2. Soy by any other name. 3. Does soy prevent cancer? 4. Heart and soy. Part II: Soy for special needs. 5. Just for women: Rx for menopause and osteoporosis. 6. Just for men: Rx for prostate problems. 7. Kids, cancer, and heart disease. 8. Tips for vegetarians. Part III: Not by soy alone. 9. Thirty-seven miracle foods from the Pacific Rim. Earl's pearls: A guide to vitamins and minerals. Part IV: Get more soy in your life. 11. Savvy substitutions. 12. Cooking with soy. 13. Breakfast the soy way. Part V: Seventy super soy recipes (p. 149-230). Glossary. Resources. Selected bibliography.

Pages 12-13 note that soybeans are an abundant source of many different types of phytochemicals, including isoflavones, genistein, protease inhibitors, and phytic acids.

Chapter 2 describes the different types of soy foods. Traditional soy foods: Soy milk, tofu (firm tofu, silken tofu, yakidofu, koyodofu [sic, koya-dofu]), okara, natto, tempeh, miso, soy sauce, kinnoko [sic, kinnako] flour. Soy protein products: Soy protein concentrates, soy protein isolate, soy flour, texturized soy protein, meat analogs. Other soy products: Soy fiber, soybean oil, lecithin. Questions about soy foods. Page 33 asks the question: "If phytochemicals in soybeans are so healthy, why can't they be extracted from food and made into a pill like a vitamin?" Answer: Researchers are not yet certain which phytochemicals are the most important. "There may even be other beneficial compounds in soy that have yet to be identified. Your best bet is to eat the real food." A section titled "Soy's top ten benefits" (p. 36-38) discusses: 1. Antioxidant. 2. Breast cancer. 3. Cholesterol lowering. 4. Colon cancer. 5. Hip fracture. 6. Hot flashes. 7. Immunity. 8. Kidney disease. 9. Lung cancer. 10. Prostate cancer.

Chapter 3, titled "Does soy prevent cancer?" discusses six compounds which cancer researchers believe may be effective in cancer prevention: Isoflavones, genistein, daidzein, protease inhibitors, phytic acid, and saponins. A long section later in the chapter discusses each of these, with special emphasis on genistein.

Note: The author has also written *Earl Mindell's Herb Bible* and *Earl Mindell's Food as Medicine*. He is a newcomer to this field. This book may appeal to those who are looking for miracles from the foods they eat. Most of the information contained in this book can be found in Mark and Virginia Messina's outstanding *The Simple Soybean and Your Health* (1994), and the *First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease: Proceedings from a symposium held in Mesa, Arizona, on February 20-23, 1994*, published in full in *The Journal of Nutrition* Vol. 125, No. 3S, March 1995 Supplement. It was from this symposium and the outline published before the symposium that Mindell got his idea for this popular book.

Dr. Mindell is an R.Ph. (Registered Pharmacist) with a PhD in Nutrition from Pacific Western College in Renton, Washington.

According to a review of *Earl Mindell's New and Revised Vitamin Bible*, by James A. Lowell, PhD. (Nutrition Forum, June 1986) "Mindell claims to hold valid credentials in nutrition. Although he does have a bachelor's degree in pharmacy from the University of North Dakota, his Ph.D. is from the University of Beverly Hills, an unaccredited school which lacks a campus or laboratory facilities." Mindell helped to found the Great Earth chain of vitamin and health food stores, numbering about 200 in 1986, America's second largest such chain. Address: R.Ph, PhD, registered pharmacist and Prof. of Nutrition at Pacific Western Univ. in Los Angeles. He lives in Beverly Hills, California.

3778. Minnesota Soybean Growers Association; Minnesota Soybean Research & Promotion Council. 1995. *Cooking with soy*. Revised 2nd ed. North Mankato, Minnesota. 48 p. Jan. 22 cm.

• **Summary:** Contents: Introduction. Tofu facts. Soy milk facts. Soy flour facts. Miso facts. Tempeh facts. Texturized soy protein facts. Meat analog facts. Soy oil facts. Whole (dry) soybean facts. Whole (green) soybean facts. How to cook whole soybeans.

Recipes: Appetizers & snacks. Dips & dressings. Beverages. Salads & soups. Breads. Main entrees. Cakes, cookies & desserts. Substitutions.

Talk with Christie Metzger of the MSRPC. 1996. Jan. 4. The revised edition of this book was published in Jan. 1995; the first edition was published in March 1994. Address: 360 Pierce Ave., Suite 110, North Mankato, Minnesota 56003. Phone: 507-388-1635.

3779. **Product Name:** Vegan Cajun Burger (On a Bun), and Cajun Tofu Sloppy Joe (The Filling).

Manufacturer's Name: Soy Devine.

Manufacturer's Address: 1881 Fieldbrook Road, Arcata, CA 95519. Phone: 707-849-8430.

Date of Introduction: 1995. January.

Ingredients: Processed organic tofu [frozen], tomato sauce, onions, honey, mustard, cider vinegar, safflower oil, tamari (Westbrae), peanut butter, garlic, miso, spices (incl. paprika, cayenne, allspice).

New Product-Documentation: Talk with Mara Devine.

1995. June 1. Cajun Barbecue Style was first introduced in 1987. In Jan. 1995 it was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. The latter product is sold as a product in its own right, but also serves as the filling for the burger. She moved from Miranda to Arcata, California, in June 1993.

3780. Mann, Sue. 1995. Re: Tempeh, tofu, and miso in Ecuador. Letter to William Shurtleff at Soyfoods Center, Feb. 4. 4 p. Typed, with signature, and handwritten.

• **Summary:** A woman, who is about to get some kind of degree in soyfoods/nutrition and who is Quito's top macrobiotic teacher/cook/storeowner, already makes her own tofu and miso, and is interested in tempeh. Sue will be talking with her soon.

"I have been making tempeh for friends, and in about 3 weeks will start moving toward commercial production. With three restaurants waiting and friends no longer willing to take it without paying, prospects are good." She orders a copy of the book *Tempeh Production*, by Shurtleff & Aoyagi, to be sent to Andrew McCallum in Rochester, New York. On a separate handwritten sheet she gives details on 3 commercial soy products from Ecuador and Colombia. Address: c/o Donna Lewen, Cassilla 17-12-578, Quito, Ecuador. Phone: 593 2-570-600.

3781. Arnold, Kathryn. 1995. The joy of soy. *Delicious! (Boulder, Colorado)*. Feb. p. 34-36. [3 ref]

• **Summary:** The soybean "has long been revered by vegetarians as a nutritional powerhouse. However, the real secret is that soyfoods may help prevent disease." They are cancer fighters and good for the heart. A table (p. 36) lists 12 different types of soyfoods and their uses: Tofu, tempeh, okara, miso, natto, TVP, soymilk, soy grits, soy flour, soy cheese, soy sauce, soy yogurt.

Note: This periodical, which began publication in about 1983, is published for natural products consumers by New Hope Communications in Boulder, Colorado. As of March 1998 some 425,000 copies of *Delicious!* are distributed each month to over 900 health food retail stores throughout the United States.

3782. **Product Name:** Barley Miso (Long Term).

Manufacturer's Name: Earth Fire Products Co.
Manufacturer's Address: P.O. Box 92 (Corner of Grove and North Railroad Streets), Gays Mills, WI 54631. Phone: 608-735-4711.

Date of Introduction: 1995. February.

New Product–Documentation: Talk with Bob Ribbens, owner of Earth Fire Products Co. (formerly Traditional Foods Cooperative). 1995. Nov. 1. Long-term barley miso was first sold in Feb. 1995.

3783. **Product Name:** [Sweet Barley Miso, 6-Month Barley Miso].

Foreign Name: Miso.

Manufacturer's Name: Lion Health Food Co.

Manufacturer's Address: Zagorska 12/9, YU-11080 Zemun, Yugoslavia. Phone: +381 11-106073.

Date of Introduction: 1995. February.

Ingredients: Organic barley, organic soybeans, spring water.

How Stored: Shelf stable.

New Product–Documentation: Talk with Don DeBona and Paul Chaplin. 1997. March 20. Two new miso makers in Yugoslavia are Sladjan Randjelovic and his wife, Vladimirka, of Lion Health Food Co. (Zagorska 12/9, YU-11080 Zemun, Belgrade, Serbia / Yugoslavia). Their business card says: "Belgrade, London, and Beijing." Vladimirka is actively involved in the business. They are both very macrobiotic. They already make *mizumamé* (rice syrup or rice malt). Their miso was of fairly good quality. They also make an interesting miso with added shiitake and kombu.

Talk with Sladjan Randelovic. 2001. April 21. He learned how to make miso in Sweden from Tim Ohlund in 1992-93 (he lived in Tim's house for several months) and from Soyfoods Center's books on miso. On 30 May 1992 the United Nations imposed sanctions on the newly reconstituted Yugoslavia as a means of ending the bloodshed in Bosnia; these sanctions have been in effect throughout the life of his business and have made it very difficult for him to order ingredients, sell products, etc. Both his miso factory and sales office are in Serbia; the factory has always been in a small village named Barajevo about 50 km from the center of Belgrade. He first began selling the barley miso he made in Feb. 1995—starting with sweet barley miso (short term), then 6-month barley miso. The next year he sold 18-month barley miso. These were made with all organic ingredients. He uses much of his miso to make Imoplex, a cleansing product that contains shiitake mushrooms, kombu extract, and herbal extract. In 1997 he exhibited his miso and miso products at Biofach in Germany. Neither Sladjan nor Soyfoods Center are aware of any company that made miso commercially in Eastern Europe before he began; thus he was probably the first! Today his home is in Montenegro, very near the Serbian

border. He is married and has three children. A book he wrote about food was published last year. He also makes tofu for his own family.

3784. Messina, Mark; Messina, Virginia. 1995. Soybeans linked to health benefits. *Vegetarian Voice (Dolgeville, New York)* 20(4):10-11. Winter.

• **Summary:** Contents: Introduction. Soy and heart disease. Soy and cancer. Other roles for soy. What if you can't tolerate soy. The whole diet approach.

A table shows the isoflavone content of selected foods: Soymilk (1 cup) 40 mg. Tofu (½ cup) 40 mg. Tempeh (½ cup) 40 mg. Miso (½ cup) 40 mg. TVP, cooked (½ cup) 35 mg. Soy flour (½ cup) 50 mg. Soybeans, cooked (½ cup) 35 mg. Soy nuts (1 ounce) 40 mg. Isoflavones (unlike vitamins) are not destroyed in conventional cooking methods.

3785. *Ontario Soybean Growers' Marketing Board Newsletter*. 1995. 1994 Annual Meeting highlights. Feb. p. 3.

• **Summary:** More than 300 soybean growers, industry and government representatives, and suppliers attended the Dec. 1994 Annual Meeting of the Ontario Soybean Growers' Marketing Board. Bernard Leung (photo shown) of Harcan Kingsoya spoke on soyfood opportunities. Garth Baxter of Maple Leaf Foods expressed his belief that the miso market holds the best potential for expansion of Canada's food soybean exports to Asia. New markets with good potential include Taiwan, South Korea, Indonesia, and the Philippines.

"Frank Daller of ProSoya reported that his company is setting up soymilk production facilities in several locations across Canada. Their strategy is to sell bulk soymilk to dairies for processing and packaging."

The Board reported a financial operating surplus of \$311,225 for the year ending 31 August 1994, and a reduction in Board fees from 90 cents per tonne to 80 cents for the 1994 crop. Address: Box 1199, Chatham, ONT, Canada N7M 5L8. Phone: 519-352-7730.

3786. *Ontario Soybean Growers' Marketing Board Newsletter*. 1995. Japanese miso mission visits Ontario. Feb. p. 4.

• **Summary:** Five Japanese miso manufacturers, who collectively purchase 180,000 tonnes/year of soybeans for their miso requirements, visited Ontario to see for themselves the excellent quality and appearance of Ontario soybeans. These 5 men represent over 1,600 miso manufacturers in Japan. They also met with OMAFRA Minister Elmer Buchanan. Address: Box 1199, Chatham, ONT, Canada N7M 5L8. Phone: 519-352-7730.

3787. *Tufts University Diet and Nutrition Newsletter*. 1995. Scientists spotlight phytoestrogens for better health.

12(2):3-6. Feb.

• **Summary:** This article, which discusses the health benefits of phytoestrogens in detail and portrays soy in a very favorable light, contains a 3/4- page sidebar titled “Is there soy in your future?” Breast cancer is the number two killer of women in America and prostate cancer is the number two killer of men. Some scientists now believe that both men and women can take the same step to reduce their risk of succumbing to these diseases—change their diets to include phytoestrogens. This change of diet will probably also have a profound effect on menopausal symptoms such as hot flashes and mood swings. There are several classes of phytoestrogens: Isoflavones (which “are especially prominent in soy—apparently the most potent food in terms of its estrogen-like effects on the body”), coumestans, and lignans.

“Understanding the hypothesis behind the protective effects of the phytoestrogens in soy and other foods can be a bit tricky, especially when it comes to women, because it relies on seemingly contradictory concepts that have to do with whether a woman is pre- or postmenopausal.”

The sidebar on soy discusses tofu, tempeh, and miso.

3788. Krizstan, Jan. 1995. Re: Work with seitan and soyfoods in Slovenia. Letter to William Shurtleff at Soyfoods Center, March 1. 2 p. Typed, with signature.

• **Summary:** Jan phoned on 6 January 1995, then wrote a long letter dated March 1. His first name is pronounced “Yan.” He was born in 1967 in Ljubljana, the capital of Slovenia, where he now lives. He worked for two years on Slovenian television, then in 1992 he quit because of unhealthy working conditions. He had already been a vegetarian for 2 years and he knew that many people are looking for and need healthy food, but they don’t know how to get it. So he started a small private company named “Izvor” (“The Source”) and in Sept. 1992 started (together with friends) to publish a magazine in Slovenian titled *Bio Novice* (“Bio News”) that would connect these people. The main subjects were growing plant foods in accordance with Nature, healthy diets, ecology, alternative medicine, and the culture of peace and non-violence. “It was very difficult, because we started with almost no money, but we published 15 issues of *Bio News*. In December 1994 we had to stop publishing because of big financial problems.

“One of my friends [Vesna Crnivec] translated some paragraphs from *The Book of Tofu* about preparing home made tofu and made an article. We published her translation, a summary of the Introduction, and some of Akiko’s illustrations in one of the first issues of *Bio News* (See issue 5/6, letnik 1993, p. 40-44). Some readers (especially women) showed great interest in it! Later I translated some paragraphs from *The Book of Tofu* and published them (together with Akiko’s good illustrations) in issues 14 and 15 of *Bio News*. At the end of the article I

gave the address of Soyfoods Center for all people interested in ordering your books.

“Last year I was attracted to making seitan and tofu from organic wheat and soybeans. Mr. Mirko Trampus is my very good friend. He has an organic farm in Metlika (1 km from the border with Croatia, in southeastern Slovenia). He has been growing wheat, soybeans, and daikon organically for the last 6 years with very good results. We decided to make a kitchen in his house for transforming Mr. Trampus’ soybeans, wheat and daikon into tofu, tempeh, natto, soymilk, seitan and pickled daikon.

“A few days before New Year 1995 I visited all Ljubljana’s bookshops, because I wanted to find some information about tofu and seitan. What a surprise! There was your *Book of Tofu*. I found it once again and bought a copy. I was so happy. Not far away I found the book *Cooking with Seitan* by Barbara and Leonard Jacobs, with a foreword by Aveline Kushi.
